Your support, and the part you play, have a very important role, a very important influence on the outcome of this vital effort."

More will Live the more you Give
HEART FUND
OUR RESPECTS to Julian Mortimer Kaufman

Success is writing “how to do it” article at right time

Are you looking for a better job but don’t know how to go about getting one? The formula is simple, according to Julian M. Kaufman, vice president and general manager of XETV (TV) Tijuana-San Diego, and vice president of KMEX-TV Los Angeles, newly established all-Spanish programmed station on uhf ch. 34.

“Writing article for Broadcasting” is Mr. Kaufman’s advice. “I did and got 28 job offers inside of a week.” Of course, he admits, the timing may have had something to do with it. He was manager of KPHO-TV Phoenix and his article “How to operate a tv station in a medium-sized market” appeared coincidentally with the lifting of the freeze on tv construction. Grants were being issued once more and a lot of people found themselves about to enter a field in which they had no experience, so anyone who knew his way around a tv station was in great demand. Points in the article seemed to answer many of the questions that people considering the medium had in mind so it wasn’t surprising that a great deal of mail was directed to his attention.

The letter that interested Julie most came from Emilio Azcarraga, Mexican broadcasting tycoon, offering him the management of XETV. Soon after that, Julie moved to San Diego, where XETV’s sales offices are located. The transmitter and studios are across the border in Mexico. (“Everything from a new tube to the engineer’s lunch has to go through customs.”)

In The Middle • Operating a Mexican station programmed in English for the San Diego market presented social and financial problems as well as those of logistics. “They loathed us on one side of the border and hated us on the other,” Julie says of those early days. XETV was then an independent station dependent for its programs on syndicated films, old movies and what programs could be produced locally. Julie went heavily into public service. Two hours each morning were given to California Western U., whose professors, in those pre-video tape days, rose at dawn to make the trek across the border to deliver their tv lectures live.

Julie and his wife, nee Katherine Likins, made the rounds of San Diego civic affairs, volunteering their services to worthwhile causes and donating time on XETV as well.

Julie has been as particular about the station’s advertisers as its programming, ruthlessly rejecting commercials he found in bad taste and trying not to think of finances but to concentrate on the right image. He handpicked the station’s on-air personalities and insisted that XETV live up to the FCC standards as well as those of the Mexican government.

It was a hard regime, but it paid off. Today, XETV is a full-fledged ABC-TV affiliate and is accepted as an integral part of San Diego television. “The early resistance has evaporated,” Julie says. “San Diego is now considered a three-station market. It’s been a long time since I’ve heard us referred to as ‘that Mexican station.’ Our sponsor list includes top San Diego advertisers—banks, department stores and the like.”

Jolly Ollie • One of the things that keep Julie busy is a thriving syndication service for programs and commercials produced in Tijuana for use by U.S. advertisers and stations. Jai alai games, on tape, have become popular fare in many cities other than San Diego and one of Julie’s favorite anecdotes is about a telephone call from the manager of a tv station in a southwestern state who wanted to know more about “that Jolly Ollie show of yours.”

For the past year Julie has been involved in establishing uhf stations in U.S. cities for a new company, Spanish International Broadcasting Corp., of which he is 5% stockholder, and of which Sr. Azcarraga owns 20%, the maximum permitted a non-U.S. citizen. “When I heard ‘uhf,’ I shuddered,” Julie says, “But I found out that Shakespeare was right—the play’s the thing for sure.

“We took over a uhf station in San Antonio that was almost dead, put in all-Spanish programming and inside of 60 days we’d increased billings by 30 times, bringing the volume up to a five-figure total a month. In Los Angeles, after four months, we’re on the verge of breaking into the black and we’ve got an application in for the New York market.”

The Early Years • Born April 3, 1918, in Detroit, Julian Mortimer Kaufman grew up in Newark, where he graduated from high school in mid-depression and at 17 became possibly the nation’s youngest publisher—of the Elizabeth (N.J.) Sunday Sun. By doing everything himself and working virtually around the clock he made the weekly shopping news a profitable operation which he sold for enough money to support him while “I became a writer.” A year of much writing but no sales killed that idea and before he had time to wonder what to try next he got the answer from Washington: Four years of service in the Army Air Corps.

The war over, he took his bride to Tucson. Another shopping news, another success, again a sale and they were off to Minneapolis where Julie enrolled in a tv school—determined to get in on the ground floor of the new medium. KSTP-TV was broadcasting experimentally; the students were given the run of the studio and here Julie learned his tv abc’s.

Illness in his wife’s family took them to San Diego, where Julie became tv director of an advertising agency. This led to an account executive’s job at KG0-TV San Francisco, which in turn led to the post of sales manager at KPHO-TV Phoenix. He had been promoted to station manager when he wrote the article that Emilio Azcarraga read.

Julie and Kitty have two youngsters, Nikki, 18, and Keith, 8. They live in an adobe house near Escondido (“about as far as I can get from the studio and still get a perfect picture”). Golf, tennis, swimming, baseball, and basketball (company team), and a controlled diet (he learned four years ago of a diabetic condition) keep Julie slim, trim and tanned.

Of his many affiliations, he is proud of his membership in the University Club (by special board action), his inclusion in the Hall of Fame of the San Diego Ad Club and his appointment by Governor Brown of California to the state’s mental health board.
**EDITORIALS**

**Momentum**

This could be the big year for broadcasters. Big not merely in dollar volume or programming successes, but in relief from the harassment of government and perhaps in legislation that will retrieve the freedom assured them by Congress in 1927 when the first radio law was enacted.

The local television hearings in Omaha have boomeranged on the FCC and have evoked new congressional attention. The monographs drafted by members of the Federal Communications Bar Assn. proposing drastic changes in the Communications Law to prevent the FCC from imposing its programming judgments upon broadcasters have elicited applause—and action—from many thinking broadcasters. FCC Commissioner-designate Kenneth Cox learned, perhaps with dismay, that members of the Senate Commerce Committee are against the FCC's "big brother" attitude. He got the message during his confirmation hearing 10 days ago.

A significant change in the posture of NAB President LeRoy Collins also has helped. Heretofore he has been disposed toward peaceful co-existence with the FCC. He suddenly became a bellicose defender of broadcasters' rights in attacking the FCC's Omaha inquisition.

The momentum must not be lost. A new opportunity to accelerate the pace will be presented Feb. 26-27 when the conference of state broadcaster association presidents meets in Washington under NAB auspices. Here is a direct line to all of the state legislatures and to all of the members of the congressional delegations.

The state presidents should be urged to support the new legislation to redefine the limits of FCC authority, to repeal the political section (315) and to impart to broadcasters freedom from censorship, direct or indirect.

We said this could be the big year for broadcasters. It will be if they want it. They must work for it at the state as well as the federal level. They must insist through their state associations and their NAB directors that their trade association get behind the legislative drive.

The troops and the guns are there. The spade-work has been done. It's time to launch an all-out offensive.

**Kangaroo court**

Broadcasters might as well resign themselves to a long and uphill struggle in their efforts to get their cameras and microphones into most of the courts in this country. By voice vote (a chorus of "ayes," a scattering of "nays") the house of delegates of the American Bar Assn. voted last week to retain the association's Canon 35 which prevents the photographing and broadcasting of trials.

It is too early to predict the effects of the bar association's action, but we cannot imagine they will be salutary. The association's canons already have the force of law in many state courts and are voluntarily observed in most others. Now that the association's house of delegates has reaffirmed Canon 35, on the recommendation of a special committee that had been studying the subject for several years, state courts that may have been waverin toward liberalization are bound to have second thoughts.

The report of the bar association's special Canon 35 committee is a document that will obstruct the broadcasters' cause, although it contains imperfections that can, in time, be turned to the broadcasters' advantage. We must agree with NAB president LeRoy Collins that the committee failed to give broadcasting a fair trial and that it betrayed a shocking lack of confidence in the character of judges.

As Gov. Collins pointed out, in a statement issued after the committee's report was made public but before the house of delegates adopted it, the committee rejected a proposal by the NAB and the Radio and Television News Directors Assn. for a series of tests of broadcast coverage under actual trial conditions to determine its effect on the conduct of trials. The committee said the tests would not be "fruitful." As Gov. Collins put it, the tests would have given the committee "an opportunity to base its conclusions on fact rather than supposition."

The committee also opposed the granting of discretion to individual judges to open or close their courts to radio and TV, and it gave as its reason: "Since most of our state judges still are elected in political campaigns, in which their success can be affected by the media of public communication, it is unfair to subject them to potentially powerful pressures for a favorable decision as to courtroom privileges."

Surely there will be state judges who object to the bar association's assumption that they lack the nerve to control their own courts. There will certainly be some who will question the committee's rejection of tests before reaching its conclusion. It is to those local judges and local bars that broadcasters must turn now.

In those communities where the possibility of court access exists, broadcasters must do their best to exploit it. And when broadcasters are admitted to cover trials, they must plan their coverage to be so unobtrusive that the most reactionary member of the bar cannot later complain that broadcasting clutters up a courtroom. It might have helped the broadcasters' cause before the bar association's study committee if some of their fellows had performed less ostentatiously in courtrooms in the past.

**Articles of faith**

If a common theme ran through the Washington meeting last week of the Advertising Federation of America and the Advertising Assn. of the West, it was articulated by Peter G. Peterson, president of Bell & Howell. Mr. Peterson decried generalized criticisms of advertising and attempts to invoke crippling government controls.

Mr. Peterson said the government should protect the consumer "from the hit-and-run lie perpetrated by the fly-by-night company, but beyond this obvious exercise of authority against fraud we must tread very gingerly indeed." We hope that bureaucrats will come to share Mr. Peterson's appraisal of the public. "My confidence in the brains and backbone of the consumer grows daily," Mr. Peterson said.

To that it might be added: In America freedom is our most important product.

"I'm in advertising, really ... that's just to keep tv repair men on their toes!"

RCA maintains a stock of more than 6 million exact replacement parts—covering RCA Broadcast Equipment built as far back as the early '30's. RCA Replacement Parts Service is open 24 hours a day.

RCA The Most Trusted Name in Electronics
All together, it's Michigan's 3-in-1 shopping center and America's 37th Metropolitan TV market!

And why not put it together, as it is on our sign? After all, that's exactly what happens every time WJRT turns its transmitter on: the highways shrink, the hyphens fall out and you get metropolitan Flint, Saginaw and Bay City in a single TV buy. A buy that, by virtue of its 183,100 metropolitan TV homes, represents the 37th market!

If you're an advertiser, you'd do well to look into WJRT, which created "FLINTSAGINAWBAYCITY" in the first place. Which gets the lion's share of the TV audience, morning, noon and night. And registers a 70% or better net weekly circulation in most of the surrounding 23 counties. Better call Harrington, Righter and Parsons today. Just ask for "FLINTSAGINAWBAYCITY"!

Waiting for word

It's unlikely there will be formal confirmation of Newton N. Minow's resignation as chairman of FCC until after he returns from European trip Feb. 2. If so, then chances are he won't comment until he's confronted on Capitol Hill by either House or Senate Commerce Committee, which might develop week or so later. There's avid congressional interest because Commerce Committee chairman had no inkling of Minow plans until publication in Feb. 11 issue of Broadcasting of report that he had advised President Kennedy of his intention to leave in late May and had recommended FCC's newest commissioner, 33-year-old E. William Henry, Tennessee Democrat, as successor.

Customarily there has been no time lag when member of FCC has resigned. But, in extremity of Minow situation, it's recalled that in most instances committee has been left before completion of their appointed terms they have either joined entities in communications or in law practice which would have posed conflict of interest questions. In Mr. Minow's case, however, his association with Encyclopaedia Britannica would present no such question since firm isn't licensed in broadcasting.

Early lock-up

CBS-TV President James T. Aubrey Jr. is expected to send letter to affiliates this week giving full schedule for 1963-64 season (also see story, page 60). Letter expected to contain personal note to effect that this is earliest CBS-TV, or any network, has ever locked up full schedule. Torrid programming pace also is reflected in CBS-TV's selling. Judy Garland's new vehicle, Sunday, 9-10 p.m., next fall, reportedly already is SRO and with advertisers actually waiting for possible opening. Advertisers already in show are said to include Menley-James (Contac), American Tobacco, S&H Green Stamps, and fourth unidentified advertiser.

Ratings witnesses

"Who's Who" of broadcasting, advertising, program production and government are expected to be called to testify early in March when House Special Subcommittee on Investigations begins long-awaited hearings on broadcast rating services (see story, page 34). Although subcommittee sources are mum about plans, it's known that number of broadcasters in both radio and television have been interviewed in "use" made of rating surveys and may be called to testify.

Among program men with gripe against ratings are David Susskind, Peter Tewksbury of It's a Man's World and Sylvester L. (Pat) Weaver. It also is anticipated that testimony will be solicited from network heads and their programming vice presidents, leading advertisers and responsible government agencies. After opening round on generalities of surveys, investigation will likely turn to individual rating firms.

Two for one

There's good change A. C. Nielsen Co. will act soon, as number of its clients have been urging, to resolve measurement problem that otherwise will get bigger month by month. Problem is in its treatment of multiple-set tv homes: If there are two sets in home and both are tuned to same channel, it's counted as one home; if they're tuned to different channels, it's two homes. And in computing "Homes Using Television" it's counted as two homes in any case as long as both sets are on. "HUT" figures, then, are inflated to extent that there's concurrent multiple-set usage within homes.

Multiple-set homes now represent about 12% of national total (more in some areas such as New York), but Nielsen says non-concurrent usage reduces inflation to "insignificant" proportions. It acknowledges, though, that situation will get worse as multiple-set homes increase, so is trying to work out solution now. This may take form of multiple processing to eliminate duplication.

Local and live

FCC is expected to act within 30 days on license renewals of most of some 100 California and Texas stations whose applications have been held up because of questions about programming (Broadcasting, Dec. 3, 1962). Staff is now reviewing applications in light of FCC decisions in WKY-TV Oklahoma City and WFAA-TV Dallas cases. Both stations had been cited by staff because of alleged lack of proposed local, live programming. But commission renewed both after ruling they had made substantial showing in 6-11 p.m. time period through policy of pre-emption. Rule of thumb being used is that stations that can make similar showing are to be renewed.

CBS-TV affiliates study

Basic study of contractual relations between network and affiliates is being undertaken by CBS-TV Affiliates Assn., which last week retained counsel to undertake project. Dr. Harold J. Barnett, Ohio State economist, and Charles H. Smith, of U. of Minnesota, former CBS economist, were retained, along with Ernest Jannes, Covington & Burling, and Tom Wilson, of Dow, Lohnes and Albertson, as Washington legal counsel with Mr. Jannes as coordinator. Cost of project understood to be in area of $35,000 and will be underwritten by contributions of highest half-hour rate of affiliated stations. Study will include affiliate compensation as well as option time, clearances and related factors. Individual compensation agreements will not be covered. Project was approved by affiliates board at meeting in Palm Springs, Calif., last December.

Affiliates board last week approved retention of experts on recommendation of its economic and legal study committee, which met in Chicago Feb. 6. Members of committee are Howard Lane, KOIN-TV Portland, Ore., chairman; T. B. Baker Jr., WLAC-TV Nashville, chairman of full board; Thomas S. Murphy, Capital Cities Broadcasting, New York, secretary; Charles H. Crutchfield, Jefferson Standard Broadcasting Co. (WBTN), Charlotte; William B. Quarton, WMT-TV Cedar Rapids; Tom Chauncey, KOOL-TV Phoenix, and Richard A. Borel, WBNS-TV Columbus.

New ally

Sen. J. Howard Edmondson (D-Okla.) has heeded complaints of Oklahoma broadcasters against FCC programming intrusions and plans to take action. Senator, who resigned as governor two weeks before end of his term to accept appointment to Senate, plans conference with Oklahoma broadcasters this weekend. Conference was called because of protests against FCC's Omaha hearing on local television programming (Broadcasting, Feb. 11, 4).

Location shooting

Dearth of prime time, first-run syndicated series is expected to continue in 1963-64, but one strong contender in this category is United Artists Television's "Lee Marvin Show." UA TV is reportedly to be producing and selling series with following twist: If station in given market agrees to buy series, UA TV will film an episode there and engage station to serve as co-producer. Details expected to be announced by UA TV in next few weeks.

INDIANAPOLIS

*The Indianapolis market, we mean!

This provocative headline is more than a facetious approach to a marketing problem. If you presently have distribution in and are exerting advertising pressure on the Indianapolis market, then consideration of the Terre Haute market is of vital importance to your sales success.

HERE’S WHY:

1. Terre Haute is closely linked to Indianapolis for its distribution.
2. Two of the Leading Supermarket Chains in the Terre Haute-Indianapolis coverage area credit the WTHI-TV area with more than one fourth of their total area sales.
3. Indianapolis Television, even when extensively used, misses 80% of the Terre Haute metro area.

4. Combining WTHI-TV with any Indianapolis television develops sizeable, additional penetration without additional cost.
5. The combination of WTHI-TV with an Indianapolis effort reduces excessive duplication, substituting new potential customers.
6. The Terre Haute-Indianapolis media approach does not reduce the level of impact in metro Indianapolis.

These facts were revealed through a series of special studies conducted by ARB. These are presented in detail and are available through your Edward Petry Man.

WTHI-TV delivers more homes per average quarter hour than any Indiana station* (November 1962 ARB)

Hope package on NBC-TV costing $18 million

CHRYSLER BUYS HOUR-LONG REVUE-PRODUCED SERIES

NBC-TV announces today $18 million Chrysler Corp. buy of weekly hour tv show for next season that will be built around Bob Hope. Earlier estimates had placed tab at some $14 million in time and talent (see story, page 58). Spokesmen, however, placed package price at some $11 million for talent and production, and about $7 million for time. New program will fill Friday, 8:30-9:30 p.m., on NBC-TV's schedule next fall, starting Sept. 27.

Chrysler's purchase was made final after long negotiations by Richard E. Forbes, Chrysler's director of corporate advertising; Charles (Bud) Barry, Young & Rubicam's senior vice president and director of tv and radio; NBC President Robert E. Kintner; Walter D. Scott, NBC-TV executive vice president; James Saphier, representing Bob Hope, and Lew Wasserman, MCA president, representing Revue Productions.

In addition, Chrysler will co-sponsor with Gillette the following sports coverage on NBC-TV: World Series, All-Star Baseball Games, Rose Bowl and Blue-Gray Football Games.

Contract for Hope series is for 52 weeks, with total of 48 color productions in which comedian will be seen. Five will star him in variety format and sixth will feature his annual Christmas presentation (expanded this year to 90 minutes). Also included are two full-hour dramatic shows in which Mr. Hope will star.

Revue will film all other programs in series, emphasizing suspense and adventure with Mr. Hope appearing as host.

NBC-TV proclaimed buy as major and outstanding, noting that as single-season, one-advertiser purchase, new series places Chrysler in position of being one of few companies with full sponsorship of weekly hour on tv. It's pointed out also that Chrysler's tv effort will enable its dealers to benefit by weekly continuity with tv audience.

NCTA board wants 'simple' legislation

National Community TV Assn. board of directors, meeting in New Orleans, "unanimously" adopted resolution that NCTA seek "federal legislation."

Individuals at meeting reached Friday refused to elaborate on legislation to be sought pending series of regional meetings with NCTA members to explain plan and seek endorsement. It was learned, however, that responsible community tv leaders feel "simple" legislation from Congress is necessary to assure orderly growth and control of catv. Points that reportedly will be covered in proposed bill:

(1) federal government, through FCC, assumes control of catv thus preempting restrictive and non-conforming regulation by states and local communities; (2) protection for individual, local tv station with its signals to be put on catv system and non-duplication of programming from outside station; (3) provision for adequate signal strength of local station at least as good as those brought in from other cities.

All 25 NCTA board members were at New Orleans meeting and voted for resolution after presentation of alternatives to regulation or no regulation by Washington attorney E. Stratford Smith of Smith & Pepper. NCTA spokesmen said there is still "a lot of planning to be done" before formal presentation is made to Congress.

Board members know that they will have tough selling job to do before plan is accepted by rank-and-file membership who are repelled by any mention of regulation, it was pointed out. Leaders reportedly feel very strongly that they have taken right step and that "degree" of regulation is needed in view of catv overlap with regular tv.

In Congress * This same view was expressed Friday by powerful member of House Commerce Committee. He said NCTA directors evidently have decided to take this approach rather than have "tougher regulation forced on them." "Simple" regulation will be hard to come by, however, if catv continues to spread into cities already well served by tv stations, he said.

Present climate among catv leaders and government is much better today than it was some weeks ago, community antenna spokesman said.

In recent weeks, Mr. Smith and Robert L'heureux, NCTA general counsel, have met with key FCC officials on proposed federal legislation (CLOSED CIRCUIT, Feb. 11). NCTA leaders feel that views of NAB—which wants much stricter control and has authorized own committee to study situation—are not important to overall plan.

Lobbying before Congress for NCTA plan already is underway. It is understood that month ago FCC Chairman Newton N. Minow asked Washington communications consultant Frank (Scoop) Russell to use his office to mediate differences between FCC, Congress, broadcasting and catv on proposed regulation. Mr. Russell, former NBC vice president and present RCA-NBC consultant, owns half-interest in Ellensburg, Wash., catv.

Catv bill failed to pass Senate by one vote three years ago and FCC has given request for strict regulation top priority legislative request for 1963. Rep. Oren Harris (D-Ark.), chairman of House Commerce Committee, has taken opposite view. NAB, with, would like to see regulation at least as strong as that originally sought by FCC.

Personal touch needed in successful advertising

Advertising that fails to survive in today's keen competition for prospect attention probably lacks "interpersonal" quality, Paul C. Harper Jr., president of Needham, Louis & Brorby, Chicago, said Friday in keynote talk before Ad Forum of Houston. He noted advertising often has to pass through so many steps for approval, checking and development "that by the time it gets through it has lost the qualities of humanity that are needed to make any communications successful."

Mr. Harper said communications with consumer to be effective "must be mathematically precise in their selection of the prospect and they must be totally and utterly human in their expression."

LeRoy Collins, NAB president, spoke at same meeting (see story, page 52).

Some problem!

Three glamorous women television announcers have been banished from their independent network news program in London because they were too glamorous and too emotional.

One of the girls admitted that "our fashions and hair styles tend to detract" from news. She also revealed she sometimes had to "control my emotions" when reading tragic stories involving children.

Network officials said trio had not been fired, just retired from on-camera newscasting.

more AT DEADLINE page 10
Ray M. Stanfield, eastern sales manager of Peters, Griffin, Woodard, New York, elected vp in charge of radio. Mr. Stanfield, former vp and general manager of Belk Radio Stations and general manager of WIST Charlotte, N. C., for more than five years, joined PGW in May 1962 as director of radio promotion and research. He was promoted to eastern sales manager in July of that year. Previously, Mr. Stanfield was director of sales and programming, and news-sports director of WIS Columbia, S. C., from 1953-56, and had been associated for 10 years with stations WFBC and WEJF Greenville, S. C.

Richard A. R. Pinkham assumes new executive role at Ted Bates & Co. in reorganization of media and programming departments. Mr. Pinkham, senior vp in charge of radio-tv and member of board of directors and of executive committee, elevated to senior vp in charge of media and programs. In effect, Mr. Pinkham becomes department head and chairman of new “planning committee.” Media and programming operations now come under planning committee whose members are John E. Koeper, vp, network tv; Joan A. Geiger, vp, media research; Donald W. Severn, vp, media relations; Harold J. Saz, vp, media services. Bates also named J. M. Murphy, William T. Kammerer, Winston W. Kirchert, Robert P. Engelke and Norman H. Chester, who are all vps, as media group directors. Edward A. Grey, senior vp in charge of media operations at Ted Bates, resigned earlier this month.

Scott Paper buys NBC ‘White Paper’

Scott Paper Co., Philadelphia, has purchased one-half sponsorship in third NBC-TV White Paper on Communism, “Who Goes There?” to be presented March 1 (7:30-8:30 p.m. EST). Second half of show was purchased by Upjohn Co. last December. Scott with Upjohn also sponsored first two NBC-TV specials on Communism, “The Death of Stalin” and “The Rise of Khrushchev.”

In other network tv purchases, Proctor & Gamble will sponsor Grindl, half-hour situation comedy series starring Imogene Coca and produced by Screen Gems, on NBC-TV this fall. Sunday 8:30-9 p.m. (EST) is tentative time slot.

Ralston-Purina Corp., St. Louis, through Guild, Bascom & Bonfigli, San Francisco, has renewed sponsorship of Stump the Stars on CBS-TV, Monday 10:30-11 p.m. through September.

McIntire and Congress

FCC says controversial broadcasts of Rev. Carl McIntire do not concern it as much as short-wave station over which he broadcasts, WINB Red Lion, Pa., agency is telling Congress. Commission said Friday it is investigating station to determine whether it is operating in accordance with terms of its license and representations made to FCC. Agency makes statements in form letter it has prepared for members of Congress who have been deluged with complaints because FCC is investigating Rev. McIntire, whose programs are carried by 400 am and fm stations.

Commission says its investigation of station involves question of whether it is operating in accordance with rules governing international broadcasting. These rules require short-wave stations to help promote goodwill for U. S. on part of foreign listeners. Rev. McIntire’s broadcasts reportedly often denounce U. S. foreign policy.

WEEK’S HEADLINERS

Mr. Stanfield

David Schoenbrun, chief Washington correspondent and bureau chief for CBS News, appointed to newly created post of chief European correspondent, effective March 1. Bob Allison assumes role of Washington bureau manager vacated by Mr. Schoenbrun and Bill Small becomes director of news in City. Mr. Allison had been news director and executive producer in Washington and Mr. Small had been bureau’s assistant director of news since July 1962. The new position, which had been expected (Broadcasting, Feb. 11), will mark a return to Europe for Mr. Schoenbrun who was CBS News’ Paris bureau chief from 1947 until November 1961. CBS News President Richard S. Salant indicated, however, that Mr. Schoenbrun will make the countries of the Common Market his beat and not just France. Mr. Schoenbrun was a high school teacher in mid-30s who took freelance writing in New York, served Office of War Information in 1941 and served as combat war correspondent with Army during World War II. He opened Overseas News Agency bureau in Paris after the war and reported for CBS News as a stringer until being named Paris bureau chief for the network news operation in April 1947.

...a lot of New Yorkers are eating later.
From 6 to 7 PM every weekday a big slice of New York’s public is satisfying another appetite. For news, WABC-TV’s The Big News.

What sets The Big News apart from five, fifteen and thirty minute newscasts is not merely the fact that it is one solid hour of news. It is the concept. The premise that a community-minded station is a station that is sensitive to the needs of the community.

And that a city like New York deserves the full treatment in news. Not just the headlines. Not just the highlights. But all of it.

International, national, local, sports, weather. Not just what happened and where. But why. The stories behind the news. The people who make it. The features and personalities who give it life. The sights and sounds of a day the wide world over.

You can’t produce this kind of a news show, you can’t create this kind of excitement, and do it in less than an hour. And you can’t do it unless, like WABC-TV, you have a full complement of newscasters, reporters and camera crews.

The New York Herald Tribune called it “the most exciting new contribution to the local TV scene we’ve seen in months.”

The operative word in this review is “local.” Each ABC Owned Television Station is showing equally vigorous leadership in local news coverage.

KABC-TV’s similar hour newscast in Los Angeles...WBKB’s Alex Dreier’s unique personality in Chicago. KGO-TV’s “American Newsstand” for young people in San Francisco...WXYZ-TV’s award winning “Rural Newsreel” in Detroit...are all highly local reflections of the same enthusiastic will to contribute to the active life of the communities.
A calendar of important meetings and events in the field of communications

**Indicates first or revised listing**

**FEBRUARY**

**February 20:** American Federation of Television & Radio Artists, Los Angeles chapter, annual meeting, 8 p.m. Hollywood Knickerbocker Hotel. New officers will be installed and a committee will report on wages and working conditions.

**February 21-23:** Western Radio & Television Assn., 16th annual conference on the educational use of television, Ambassador Hotel, Los Angeles.

**February 21-23:** Alpha Epsilon Rho, annual regional convention, Ambassador Hotel, Los Angeles, in conjunction with Western Radio & Television Assn. conference. Two panel discussions for WKTA by the fraternity are "Talking in Radio & Television" and "Another Threat to American Broadcasting: The Controversial Pilkington Report."* 

**February 25:** Third annual Mike Award banquet of Broadcast Pioneers, Imperial Ballroom, Americana Hotel, New York City. Cocktails at 6:30 p.m. in the Vendome Ballroom; dinner at 7:30 p.m. in the Imperial Ballroom.

**February 25:** Hearing on NBC-RKO General station transfers resumed on "The Eleventh Hour." U. of California, Los Angeles.

**MARCH**

**March 6:** International Radio & Television Society banquet, Waldorf-Astoria Hotel, New York.

**March 6:** Assn. of National Advertisers workshop on tv advertising to discuss new techniques for testing commercials, allocation of media budgets, participation vs. spot announcements and predicting tv success. Speakers will be David Mahoney, executive vice president of Colgate Palmolive; Herbert Zeltner, vice president and media director of Lennen & Newell; Henry Brenner, president of Home Testing Institute and Eric Marder, president of Eric Marder Assn. Hotel Plaza, New York.

**March 7:** California Assn. of Broadcasters, Mark Hopkins Hotel, San Francisco.

**March 8-10:** Annual Radio-TV Conference and Clinic, U. of Oklahoma, Norman. It will be combined with the Seminar on Station Operations, sponsored by the Oklahoma Broadcasters Assn.

**March 9-10:** Oklahoma Broadcasters Assn. seminar on FCC rules and regulations. Oklahoma Center for Continuing Education, U. of Oklahoma, Norman. Speakers will include FCC commissioners-designate Kenneth Cox and NAB Executive Vice President Vincent Wasielski.

**March 9-12:** American Women in Radio & Television, Projection '63 workshop, 10 a.m.-12:30 p.m., tv wing, McEvers Annex, 483 Lexington Ave., New York.

**March 11:** Florida Assn. of Broadcasters, U. of Florida broadcasting day, Gainesville.

***March 11-12:** Deadline for filing proposed findings in Grand Rapids, Mich., ch. 13 proceedings.

**March 12:** Puerto Assn. of Broadcasters, San Juan. Howard Bell, NAB vice president, will speak.

**March 13-15:** Audio Engineering Society's West Coast spring convention, Hollywood Roosevelt Hotel, Los Angeles. FM stereo broadcasting, disc recording and reproduction, microphones and earphones and audio applications in the space age are among topics to be dealt with in technical papers.

**March 15:** Louisiana Assn. of Broadcasters, Opelousas Inn, Opelousas.

**March 15:** Deadline for comments on FCC proposed rulemaking to allow daytime stations to go on the air at 6 a.m. or sunrise, whichever is earlier.

**March 15-16:** Institute of Electrical & Electronic Engineers, Pacific composite conference, California Institute of Technology.

**March 18:** Extended deadline for comments in FCC inquiry on objectionable loudness of commercial announcements and commercial continuity over am, fm and tv stations.

**March 18:** Reply comments to FCC's proposed rules on allocation of time.

**March 20-23:** Spring conference of Electronic Industries Assn., Statler-Hilton Hotel, Washington, D. C. To be preceded by a seminar on "The European Electronics Market," featuring talks by authorities on overseas business development, on March 19.

**March 21-22:** Second annual Collegiate Broadcasters Conference, sponsored by International Radio & Television Society, Hotel Park-Sheraton, New York.

**March 21-25:** Annual management conference of the National Federation of Advertising Agencies, Scottsdale, Ariz. Conference arrangements are being handled by Robert C. Garland, president of the Garland Agency of Phoenix.

**March 22-23:** Spring convention of Arkansas Broadcasters Assn., Sam Peck Hotel, Little Rock. Speakers will be Blair Vedder, vice president and media director of Neotham, Louis & Brorby and Roy Moore, special agent, FBI's Little Rock office.

**March 22-23:** Arkansas AP Broadcasters Assn. meeting, Little Rock.

**March 23:** Annual national convention of Intercollegiate Broadcasting System, New York University.

**March 25-28:** Institute of Electrical & Electronic Engineers, convention, New York Coliseum and Waldorf-Astoria Hotel.

**March 26:** Final date for the filing of applications for ch. 5 in Boston. Applications will compete comparatively with present occupant WBBH-TV.

**March 26:** Board of Broadcast Governors hearing, Ottawa.

**March 29-30:** National Assn. of Educational Broadcasters Region II conference, Tampa, Fla.; WEDU-ETV host station. Meetings and programs to be held at WEDU and the International Inn. Work sessions on programming, in-school instruction, public relations and graphic arts.

**March 31-April 2:** Annual NAB convention, Conrad Hilton Hotel, Chicago.

**APRIL**

**April 1:** Stockholders' meeting, Wometco Enterprises Inc., Miami, Fla.

**April 1-5:** Canadian Assn. of Broadcasters annual convention, Royal York Hotel, Toronto, Ont.

**April 3-5:** Assn. of National Advertisers West Coast meeting, Santa Barbara Biltmore

**DATEBOOK**

**ONLY KCEN-TV CHANNEL 6 OFFERS**

**MAXIMUM POWER COVERAGE IN THE WACO-TEMPLE MARKET center of Texas' population density**

Midway between Dallas, Fort Worth, Houston and San Antonio, KCEN-TV's maximum 100 KW Power on Channel 6 offers greatest coverage in the market and assures:

meeting, Executive Motor Hotel, Richmond.
April 26—Chrysler TV in the VAPB newscasting and tele-
casting contests and for public service will
be presented on first night at the banquet.

*April 29-May 1—Assn. of Canadian Ad-
vertisers, Royal York, Toronto.

April 29-May 4—"Rose d'Or" Contest; May
20-25, 1963—Television Symposium and Ty
Equipment Exhibition. The two events are
part of the Third International Television
Festival announced by the City of Mon-
treux, Switzerland. For further information
write to Box 97, Montreux.

MAY

May 2-5—American Women in Radio &
Television annual convention, Sheraton
Palace Hotel, Philadelphia. James T. Quirk, TV
Guide publisher, will speak.

May 3—Indiana U. Radio and Television
Department banquet, Bloomington, Ind.
Julian Goodman, v.p. for news, NBC, will be guest speaker.

*May 5-7—Television Programming Confer-
ence annual meeting (formerly SWAPDTV),
Royal Orleans Hotel, New Orleans. The
meeting is primarily for program execu-
tives from Louisiana, Texas, Oklahoma and
Arkansas. Those interested in attending
should contact: Jerry Romig, 529 Royal St.,
New Orleans. Program details to be an-
ounced.

May 9-11—Seminars in editorial, advertis-
ing and circulation, U. of Wisconsin School
of Journalism, Madison.

May 11—California AP Radio-TV Assn.
meeting, Anaheim, Calif.

May 16-18—Western States Advertising
Agencies Assn. annual conference, Riviera
Hotel, Palm Springs, Calif.

May 17-19—Louisiana-Mississippi AP Broad-
casters meeting, Lafayette, La.

May 18—Florida AP Broadcasters annual
meeting, Cape Colony Inn, Cocoa Beach,
Fla. News panels in the morning, a lunch-
eon, afternoon tour of Cape Canaveral and
an awards dinner at night.

May 19-21—Assn. of National Advertisers,

BROADCASTING, February 18, 1963
Fly United jets to Chicago

United is the first choice of many convention travelers—not just because we offer more jets to more U.S. cities than any other airline, but because of our special convention services.

For example, United offers a Group Occupancy Plan that lets you travel together as a group. United's Passenger Reserved Air Freight lets you take exhibits and display material along with you easily and economically. We'll even help you with convention planning, if you wish.

Providing you with these special services is the natural result of an attitude of Extra Care—for people—that guides everything we do at United. For reservations, call United or your Travel Agent.
Bob Rowell, of F., C. & B., joins Tricorn Club

Our club hat crowns some of the smartest market media brains in the land. Because they’re the ones “in the know” about North Carolina’s Golden Triangle Market. Bob made the club’s exclusive ranks by correctly answering this required quiz: 1. What is the Golden Triangle Market? 2. What is North Carolina’s No. 1 metropolitan market in population, households and retail sales? Answer to both: the 3-city Golden Triangle of Winston-Salem, Greensboro, High Point. He then scored a triple play by knowing that North Carolina ranks 12th in population. But the real money winner is the marketing team that knows WSJS Television is the No. 1 sales producer in the No. 1 market in the No. 12 state.

Source: U. S. Census.

Ed Coughlin, of Peters, Griffin, Woodward, passes the club hat to Bob.

May 20—Georgia Radio Day, Atlanta Advertising Club, Atlanta.

*May 20—22—Electronics Parts Distributors Show, Conrad Hilton Hotel, Chicago.

*May 22—Annual spring managers meeting, New Jersey Broadcasters Assn., Rutgers U., New Brunswick, N. J.

JUNE

June 1—UPI Broadcasters of Illinois, Hotel Jefferson, Peoria.

*June 4—Board of Broadcast Governors hearing, Ottawa.

*June 7-14—Annual convention of National Community Tv Assn., Olympic Hotel, Seattle.

June 8-11—Georgia Assn. of Broadcasters annual convention, Callaway Gardens, Ga.

*June 11-13—WAB Convention, Jasper Park Lodge, Alta.

*June 15-19—Annual convention, Advertising Federation of America, Atlanta, Ga.

June 18-20—Annual convention of Electronic Industries Assn., Pick-Congress Hotel, Chicago.

*June 20-22—Florida Assn. of Broadcasters convention, Robert Meyer Hotel, Jacksonville, Fla.

*June 21—Colorado AP Broadcasters Assn. meeting, Durango, Colo.

June 22-27—Advertising Assn. of the West annual convention at Ambassador Hotel, Los Angeles. Junior conclaves, June 22: business sessions, June 24-26; president’s dinner, June 26; golf tournament, June 27.

JULY

*July 28-Aug. 1—Radio Broadcast Seminar of Barrington Summer Conference, Barrington College, Barrington, R. I. Lecturers include: Dr. Eugene R. Berlmann, president National Religious Broadcasters; Ralph Brent, president Worldwide Broadcasting; Dr. Clarence Jones, chairman of board World Radio Missionary Fellowship (RFMB).

AUGUST

*Aug. 4-6—AAB Convention, Newfoundlander Hotel, St. John’s.

Aug. 20-23—Western Electric Show and Convention, San Francisco; trade show and technical program at Cow Palace, other events at midtown hotels. Submission of papers for the technical program of the convention are requested by the committee headed by Dr. Jerre D. Noe, director of the engineering sciences division of Stanford Research Institute, April 15 is the closing date for submissions. Authors should send abstracts and summaries to Dr. Noe, WESCON Technical Program Chairman, Suite 2210, 701 Welch Road, Palo Alto, Calif.

*Aug. 27—Board of Broadcast Governors hearing, Ottawa.

SEPTEMBER

*Sept. 10-12—Fall conference of Electronic Industries Assn., Biltmore Hotel, New York.

*Sept. 13-22—International Radio, Television & Electronics Exhibition (FIRATO) at the R.A.I. Building in Amsterdam. Live tv programs will be broadcast from a special studio to be set up at the show. This will be carried out by the Netherlands Television Foundation in cooperation with Dutch tv channels.
who is the nighttime tiger of Omaha TV?

KETV leads all Omaha stations in average homes reached and share of sets-in-use, 6:30 p.m. to midnight. Of the two stations offering feature films six nights a week, KETV dominates with 66% or more of this total movie audience. When most Omahans watch, they watch KETV. Who says so? Both ARB (Nov.-Dec., 1962) and Nielsen (Oct.-Nov., 1962).
LEADS IN SERVICE

“K” may rattle his missiles and Fidel harangue... but during February and March most Hoosiers will be caught up in the annual Hoosier Hysteria... the crowning of a new high school basketball champion. Over one and a half million people will see the tournaments in person. Millions more will follow the progress on radio. WIBC audiences will hear all the action described by Sports Director Sid Collins just as he has done each year since 1947.

LEADS IN AUDIENCE

Basketball is but one of the many popular features heard on WIBC. Sports reports plus thirty-five daily newscasts, consistent editorializing, air personalities with general appeal and farm programs are combined in a program format that has earned for WIBC the largest audience morning, afternoon and evening in Indianapolis and Indiana.* This huge and loyal audience is available to you... the national advertiser!

  Pulse Metropolitan Area Survey, October, 1962.
  Pulse 46-County Area Survey, October, 1962.

OPEN MIKE

Believe what you say

EDITOR: Some of us have spent years telling ourselves, our clients, our wives, dogs, cats and anyone who would listen that air media are the most effective methods of communication. For years, we have stressed the immediacy of news and weather and sports on radio. We have laid equal stress on the visual impact and vast audiences of television.

If this is true at all, why in the name of Marconi have so many stations, especially in New York, treated the newspaper strike as a major catastrophe...?

I spent several days in New York during the strike. I watched television and listened to the radio in my hotel room for hours on end. Television kept showing comic strips and bragging about its expanded news coverage. Other stations kept presenting columnists. Radio stations expanded the news and talked about the newspaper strike as though the end of the literate world was upon us. The impression was that without newspapers, the public would be devoid of news, comics and feature writers.

If the radio or television stations were struck, would the newspapers expand their news coverage...? I have a big life-size picture of any major paper running front page stories by Huntley, Brinkley, Edwards, Collingwood, etc., in the event of an air media strike.

As an advertising man, I have often noticed that a promotion manager of a station will practically frame a two-inch newspaper mention of a show placed by the agency and pay little or no attention to the value of his own station's on-the-air promotion spots for the show.

I object strenuously to this seemingly inbred inferiority complex of all air media for their 19th century competitor. Print is not king any more. Air media are. How can we sell or use them effectively if a newspaper strike makes us look like only newspapers are capable of responsible newscasting, entertainments, sportscasting, advertising and general coverage?

Let's stop saying how powerful air media are... or let's believe it ourselves.—Marshall Hawks, vice president, Emery Advertising Corp., Baltimore.

'Thanks'

EDITOR: With the conclusion of the 1963 United Cerebral Palsy campaign, we take this opportunity to express our sincere thanks for your publication's cooperation with our effort.

The space devoted by your maga-
"KFAX purchased its complete 50 kw transmitting plant on a turn-key contract from Continental Electronics. The Type 317B Transmitter has been in service just over a year now, and we are more than pleased with its performance. Frequency response is excellent, and overall distortion including San Francisco studio equipment averages less than 2%. Much of our programming originates at the transmitter, so the actual sound we get on the air is even better than reflected in the overall performance curves. The transmitter operates into a four-element directional antenna with excellent stability. We like the reasonable size of the transmitter, and the accessibility for servicing. Continental personnel have been thoroughly cooperative; and this meant a great deal to us during the construction phase."

Roger L. Roberts, Chief Engineer, Argonaut Broadcasting Co.

zine to the cause of cerebral palsy served not only as a means of bringing before the public the magnitude of the cerebral palsy problem, but was also of invaluable assistance to our fund-raising effort.—William Clay Ford, National Campaign Chairman, United Cerebral Palsy Assns. Inc.

Echoes to Nashville sound

EDITOR: A word of thanks for your fine article on the Nashville sound. Since going on a country music format the first of this year, WXL's mail pull is now nearing the 6,000 letter mark. Sponsor results are the most encouraging in the station's history. Take it from our sales department, country music really sells both sponsor and listeners.—Garnet Bradley, WXL Detroit.

EDITOR: As president of the Country Music Assn., I would like to take this opportunity to thank you for the wonderful layout country music had in the Jan. 28 issue. It was a very fine job.—Gene Autry, Country Music Assn., Nashville.

EDITOR: In the San Joaquin Valley of California we have found a wide acceptance of country music with more people enjoying it every day. Congratulations on your excellent report on Nashville, the home of country and western music.—Robert Scholz, program director, KEEP Fresno, Calif.

EDITOR: Your report on Nashville sound is just the thing to show those who make their living in radio yet know nothing about music or the current tastes of the listening public. Country music is not the nasal twang that some people think it is.—Dale Elchol, KMA Shenandoah, Iowa.

Charges inconsistency

EDITOR: I find it difficult to understand why Brooks Russell, of WESR Tasley, Va., should wish that the FCC had put an am grant freeze into effect in the 1940's (OPEN MIKE, Jan. 21).

Where would Mr. Russell be if they had? WESR was granted on Jan. 23, 1958.—David Watt, Texan Stump Co., Austin, Tex.

On the Omaha scene

EDITOR: Your comprehensive story about the FCC's Omaha programming hearing (BROADCASTING, Feb. 11, 4), particularly that vignette regarding interested observers, was very interesting. Imagine my surprise, however, when I failed to find mention that among them were two staff members of the NAB, both of whom were in attendance for the greater part of the hearing.—Douglas A. Anello, National Assn. of Broadcasters, Washington, D.C.
HOW IS FREEDOM WON? As the 13 colonies prepared to fight for freedom, Patrick Henry said, “The battle, sir, is not to the strong alone; it is to the vigilant, the active, the brave.”

These qualities are found today in America’s dynamic Rural Electric Systems. When existing power suppliers refused to build lines into the countryside, rural people formed their own organizations—cooperatives or power districts—borrowed capital from the Rural Electrification Administration, and built their own electric systems.

Today, nearly 1,000 rural electric systems serve 20 million people in 46 states. They have strengthened the entire economy by creating a new, continuing billion-dollar-a-year market for electrical appliances and equipment. They help build the areas they serve by providing leadership in the development of small industries, recreational and other community facilities. The entire nation benefits as once-depressed rural areas are revitalized.

Economic freedom, too, is won by “the vigilant, the active, the brave...”
Whenever the subject of our television series, Death Valley Days, is brought up people almost invariably are curious to know why the program is still on the air after so many years, particularly when most other programs fade away in much less time.

During its 33 years on the air, Death Valley Days has been the envy of many other programs that have attempted to emulate us. Most of them have been unable to overcome the fickleness of the American viewing public. We at U. S. Borax have always been deeply honored that the public elected to support Death Valley Days through their purchase of our 20 Mule Team products and have done everything in our power to maintain this confidence.

Authenticity Pays Off • Probably the biggest single reason for the show's consistent popularity since 1930 on radio and since 1952 on television is its unvarying authenticity. This has been a "must" since the show's beginning for which the public has expressed its appreciation and confidence. The viewing audience believes in our show and their confidence carries over to our products. This has resulted in steady sales increases. The program's quality would be our best guess as to why our series has been around since radio and television's toddler days. It's real American, and what better ingredient is there to sustain the life of a program?

The history of this unique entertainment vehicle began during the infant days of radio. During the summer of 1930, the management of Pacific Coast Borax Co. (now United States Borax & Chemical Corp.) requested the newly established radio department of McCall-Erickson, our advertising agency since 1926, to create a radio show which would tell authentic stories of the old west, set in and around Death Valley, where our Borax product was originally mined.

Radio Pioneer and Veteran • An audition was held at NBC during August, and on Sept. 30, 1930, the now famous bugle call was first heard on radio. Sales of our consumer products showed an almost immediate increase and we knew before long we had a winner. For the next two decades the program ran consistently and successfully on network radio.

To say that we had a lot working for us when in 1951 we decided to convert our valuable radio property into a tv show would be a gross understatement. We had tested various media and found that the medium that would afford us the greatest sales increases for the dollars spent was television. Initially, we wanted to use one-minute spots to carry our advertising message, but late in 1951 there were very few available. That fact, plus our desire for national coverage, forced us, you might say, into spot tv— but on a program basis.

In Death Valley Days we had a name deeply imprinted in the public's consciousness as representing good entertainment, a musical theme which was linked closely with the name, and a well-established host-narrator, "The Old Ranger," who was "real" to hundreds of thousands of past listeners.

A Tv Natural • There were other advantages, too. The show had wonderful photographic possibilities in the visual beauty of Death Valley, as well as other outdoor locations throughout the west. There were excellent promotional and merchandising possibilities for, among other things, the public connected 20 Mule Team Borax products with Death Valley Days and the famous 20 mule team was one of the most recognizable trademarks in the world. The most important strength we had in our favor was the fact that Death Valley Days has an anthology format with no "regular" personality, which can lead to early decline in popularity.

Another asset was our rich mine of story material highly suitable for conversion into tv dramas. Last, but not least, we were most fortunate to have Ruth Woodman, who researched the story material and wrote all but a few of the original radio scripts. Her familiarity with the story problems and her writing experience were of almost irreplaceable value. All of these factors came into play when we made our final decision, early in 1952.

Our desire for national coverage of the program posed some problems because in 1952 the television networks were limited regional hookups, not the nationwide affairs they are today. So in order to obtain national coverage we bought spot time. Buying time was quite a chore because of the coverage demanded and the shortage of prime after-dark time. The spot lineup was spread all over the nighttime map, with every day in the week included and the time segments ranging the gamut from 7 to 10:30 p.m. in the 62 cities we entered. This buying pattern remains basically the same, even today.

Once we were in a market we had little trouble in establishing ourselves, and by the time competition did appear we had amassed a loyal following which stayed with us. Fortunately for us, westerns were among and still are the most popular type of tv entertainment. So our anthology series set in a western locale, which is closely identified with our products, fared very well.

In the beginning, Death Valley Days was broadcast every other week. As our sales increased, the schedule was stepped up to broadcast each week in major markets until today our program is seen in over 102 top markets each week, representing over 92% of all tv homes in the country.

New Into Color • This year marked another step when we produced several of our Death Valley Days episodes in color. It is our intention to make certain the show keeps pace with the rapid and challenging growth of color television as a medium.

Personally, I see continued progress for the series in the future. As long as the public enjoys authentic dramas of real people and events of the pioneer days and continues to support our program by purchasing our consumer products, the 20 mule team wagons will continue to roll across the nation's tv screens.

David V. Parker is vice president in charge of the 20 Mule Team Products Dept. of U. S. Borax responsible for the sale and distribution of the company's household and industrial maintenance products. He joined the company as a sales representative in 1942. In 1946 he was made assistant to the director of sales and advertising—a position he held until 1952 when he was named director. He held this post until 1957 when he was appointed vice president of the 20 Mule Team Products Dept.

WHAT PEOPLE REALLY THINK OF TV

■ Deepest look yet at tv audience finds everybody watching
■ Some feel guilty about time they spend, but go on viewing
■ Entertainment is what they want; commercials cause unrest

The most painstaking study of television viewer attitudes ever offered to programmers and advertisers is being published this month, after three years of field work, tabulation and analysis. It is The People Look at Television, a 422-page book reporting on a study undertaken by the Bureau of Applied Social Research of Columbia U. The profile that emerges depicts the American viewer as grateful for the blessings television brings into his home but inclined to wish, when he feels required to justify his devotion to his set, that the programs would do a little more to inform and educate him—in an entertaining way.

The study is a major research project carried out to find who watches tv, how and when and why. It was financed by a $135,000 grant from CBS, whose president, Frank Stanton, first proposed such a project in 1955. The field work was conducted by the National Opinion Research Center at the U. of Chicago and by Elmo Roper Assoc. The book is being published by Alfred A. Knopf, New York ($7.95).

The People Look at Television, which presents the "key findings" of the study, was prepared by Gary A. Steiner, associate professor of psychology at the U. of Chicago's Graduate School of Business, who headed the research project. The book's three parts treat the viewer's reaction to television as a medium, to tv viewing as an activity and to tv programs and commercials.

Its major findings:
- There are two predominant viewing types: (1) The "average American" viewer, who has become almost dependent on his television set for relaxation and entertainment; who accepts its offerings uncritically and in some cases with extreme enjoyment, and who wishes vaguely that tv programs could be "more informative and educational and yet entertaining. (2) The "average non-average" viewer, who is more sophisticated, better educated and in a higher socio-economic group, who also watches tv for relaxation and entertainment and has his favorite programs, but who is likely to be more critical of tele-

vision "in general" and more concerned with selective viewing.

Dr. Steiner adds his own "conjectures and opinions," reached after making the study. Clearly labeled as separate from the study itself, Dr. Steiner's views nevertheless place the study in perspective with the present FCC policies and the differing approaches involving television programming.

He concludes that:
- Those who are concerned about what television does to or for the viewer will have to consider the two philosophies under which tv programming might be dispensed: the "cultural democracy" concept by which the public would be provided the kind of programs it prefers, with audience approval the principal factor in determination; and the Platonic approach by which viewers would be provided only those programs "good" for them (informative, educational, aesthetic, inspirational), as determined by those considered qualified and authorized to pass judgment on what ought to be and what ought not to be shown. Dr. Steiner leans toward the "cultural democracy" view.

Large Sample • The CBS-initiated study was based on a national survey of 2,497 adult viewers (18 to 70) in widespread parts of the country. Of the 2,497 respondents interviewed, 207 reported no tv set in their homes; the 71 of those who said they "never watch" tv were subtracted from the total to leave 2,427.) Also included in the project was an additional study of 300 viewers in the metropolitan New York area, conducted as a check.

In the national survey, the National Opinion Research Center and the Roper organization each interviewed approximately 1,250 adults in their homes during March and April 1960. The interviews were conducted in 537 small areas in both metropolitan and non-metro
dopolitan regions, selected to offer a representative mixture of geographic, demographic, economic and social characteristics.

The NORC and Roper interview techniques and methods were somewhat similar and so were the results, though arrived at separately. Both organizations took precautions to interview a heavy proportion of evening and weekend viewers as well as the daytime viewer represented by the housewife. A specified portion of the NORC residents were Negroes.

In thoroughness, scope and ambition, the CBS-supported project outclasses all other research in the field. The only project remotely approaching it was a study of the television audience conducted in nine major U.S. cities by Social Research Inc., Chicago, for Campbell-Ewald Co., Detroit agency (Broadcasting, May 1, 1961). Both took exhaustive surveys of viewer attitudes toward tv and its programs: and both stressed how the viewer's attitudes toward television are largely determined by his socio-economic and educational background. Both were based on interviews made in the spring of 1960.

But the differences in methods, findings and conclusions, where they could be compared, were even more pronounced. (The findings in the Campbell-
The dilemma of programmers is pointed up in this chart: a program that pleases one viewer stands a good chance of displeasing another (except news and religious programs, which have no admitted objectors). In leading categories there's close balance between those who like and those who dislike; in several others more "don't care" than do care. Chart is adapted from one in "The People Look at Television," subtitled "a study of audience attitudes."

The Campbell-Ewald study, obviously, was intended to help the agency in its media decisions and media use.

The Campbell-Ewald study used a sample of 255 persons living in major U.S. cities, interviewed by Social Research Inc. researchers. The CBS-financed study consisted of interviews of 2,427 persons, in both metropolitan and non-metropolitan areas, and the division of interviewing between NORC and Roper, even though methods were similar, could be considered as a check of one organization's accuracy against the other's.

Interest Gain • Whereas, the 1961 report found the average viewer to be jaded and bored with TV and ready to seek solace from other media, the current report finds no such trend away from TV, in fact, more interest than ever, and a general contentment with programming itself.

(If may be fairly said that the current report has the advantage of 20 months' hindsight in actual conclusions drawn from findings about the viewer's attitudes toward TV. Both studies, for instance, reported viewer demands—and a corresponding trend—toward more light entertainment such as comedy, and the return of the Gleasons, Caesars, etc. In the Campbell-Ewald document this was more of a prediction: in the current report, a statement of fact.)

Whereas, the earlier report could only surmise, from findings, that actual viewing does not always coincide with the attitudes about TV expressed by viewers, especially the better-educated, higher-income viewers, the current report indicates this condition actually exists, based on its checks of the ARB diaries.

The earlier report examined the various types of programs and viewers' attitudes toward them, but there was no attempt to define the elements that constitute a "public service" program: there was no discussion of whether program content should be determined by the response of the viewers (and therefore, advertisers) or by the decisions of others based on what is "good" for the public; there was no discussion of program "balance" (percentages of "public service" vs. other types of programs).

The current report discusses all these issues, though Mr. Steiner labels them as his personal conjectures and opinions.

Average Viewer • Here is a profile of the "average American" viewer as sketched by the study's findings:

He spends hours with TV daily and finds it relaxing, pleasant and an integral part of his life, well worth its substantial costs. Its advantages are easier to see than the activities it replaced and its advantages for his children outweigh the dangers and problems involved.

He has come to depend on daily, routine viewing and he is no longer overthrown by what he sees. He thinks the programs are good and some especially so. He feels no lack of specific kinds of programs and is aware of no "imbalance"; he watches what's available. He recalls some serious TV dramas, but remembers especially TV's comedy stars; his favorites, therefore, are likely to be in the "action" and "comedy-variety" categories, relaxation and entertainment, which TV gives him in plenty.

He'd like TV to be more informative and educational, but not without entertainment; except for the day's news and the weather he rarely tunes in serious and informative public affairs shows, even when he's watching.

And, in fact, he considers TV tops in entertainment. He turns to the newspaper for more important local and other happenings. He likes radio for quicker, capsule summaries and magazines for limited, specialized interests, but TV is what he prefers for relaxation and diversion. It seems unlikely that

BROADCASTING, February 18, 1963
any home medium will replace it in this regard.

He is of the opinion there's too much violence on tv, but feels the broadcaster should take the blame, not the parent of the child viewer. He doesn't feel parents should have to screen the programs the youngsters watch, especially since parents often benefit from the time children spend with tv.

**Critical of Commercials** He thinks there are too many commercials (see story page 30), especially those that are boring, repetitious and irritating, and he wishes those in charge would do something to improve the situation.

But his real worry comes from his guilt feeling at the amount of time he "wastes" watching tv during his leisure hours (and perhaps for women, during "working hours"), "doing" nothing but relaxing, and it arouses some ambivalence in him toward the medium. To active Americans, tv watching is not as easy to justify as golf ("healthful"), reading ("admirable"), sleep ("restorative"). "The average viewer," the report sums up, "would not give it (tv) up if he could—of course, he could if he wanted to."

When the set breaks down, he loses no time getting it back into working order. This "average American" viewer has no more than a high school education, an annual income of less than $8,000, and he accounts for more than three quarters of all tv homes and a still higher percentage of the effective audience at any given time because he watches more.

And here is a sketch of the "average non-average" viewer composite arrived at in the study's findings:

He has a higher education, a higher income and is more cosmopolitan and sophisticated. In many ways he is like the average viewer, but there are notable exceptions. He is generally negative in talking about tv, and though he finds the same basic satisfactions in it as does the average viewer, he is more concerned about its "costs" to him.

**Quick to Praise** Like the average viewer, he turns to tv mainly for relaxation and entertainment. He has more alternative sources of serious information, especially magazines, but when he watches television he selects informative programs from what is available.

He, too, remembers fondly the comic greats of past seasons and wants to see them return. He watches a lot of tv, a bit less than average, but still quite a bit. He is quicker to praise his favorite programs than the average viewer.

But he's less satisfied with tv and its programs "in general," and is likely to emphasize the issues of "productive" programming and selective viewing. He may claim he's more selective than he

*All programs watched by all viewers (viewer exposures)*

---

How closely what's offered coincides with what's available is indicated in this chart, based on a study conducted for prime-hour periods among Arb diarists in New York. Conclusion: by and large there's reasonably close correlation. One notable exception, as shown: regular news shows represented 20% of the programs available but totaled 29% of the programs watched by the average viewer. From "The People Look at Television."

---

is, but probably no more than he would like to be. He is attracted to specific, outstanding dramatic programs, but these account for only a small share of his viewing, which is, like the average viewer, devoted mostly to light entertainment.

Though he calls for more informative television (it's his No. 1 complaint about tv), he apparently doesn't want more like the present, for he takes little advantage of informative programs available on commercial channels and still less of those on educational tv outlets. He often lists current informational shows as his favorites, but has little to suggest when asked for specifics.

Although his answers are made partly because he feels they're expected of a well-educated, sophisticated respondent, there seems to be some indication he's concerned with the social and cultural implications of so much television and
Wanted: shorter, funnier, fewer commercials

Advertisers who would have their commercials better liked should try making them more entertaining and informative, less aggressive and distasteful—and shorter and fewer and less intrusive of the programming in which they appear.

This advice attempts to crowd into a one-sentence lesson a solution to the main things that viewers think are wrong with tv commercials, as detailed in The People Look at Television, the massive study conducted by the Bureau of Applied Social Research of Columbia U. (see page 27).

The study's examination of viewer attitudes toward commercials reports that, unlike programming, which is not a source of widespread dissatisfaction, commercials do frequently rub people the wrong way and probably do displease almost everyone at one time or another, for one reason or another.

System Okay • But this dissatisfaction is not nearly enough to make people want to replace commercial broadcasting with a non-commercial system, the report continues, though it notes that the study did not explore the alternatives deeply.

It did find that three-fourths of the people felt that "commercials are a fair price to pay for the entertainment you get," and that more than half said they would want tv without commercials.

Nor does it reflect itself in any impressive desire for pay television, either as an alternative or as an adjunct to the present system, the report asserts. A total of 31% voted for a trial of pay tv at 50 cents per program if additional stations would be used; 20% if some of the existing stations were to be used. A flat 22% favored a trial at $1 per program.

its use for "escape" among the masses. Thus, he reasons, the country needs more informative and educational tv programs, not for him, but for the common good when adopted by others. Sekel also thinks in large numbers that programs can be both enjoyable and intellectually satisfying. He wants to justify the time he spends with tv by learning something worthwhile to him. The mere fact that he has alternatives to television may make him dissatisfied with the seductive "influence" of television, the easier time-killer.

The big difference between the two groups, the study says, is not so much in how they use it, but in how they feel about it. Thus:

"What the majority accepts as a legitimate use of television, the minority may think of as abuse of it (or its abuse of them). The mass audience is more likely to think tv for keeping those in the family together, physically: the class viewer is more apt to blame it for keeping them apart, socially. The large segment concentrates on the help it gives them in keeping their children out of mischief; the small, on the fact that it (also) keeps them out of books or bed."

The average and non-average viewers are at least as concerned with how they watch television as what they watch, and so are the popular critics and observers, the report says. This concern does not deny the significance of programming, however, for the actual use of tv influences programming by determining what is most popular. But popular programs and popular criticism of tv, they must be read against the criteria the public actually applies, both that expressed willingly and that not readily admitted.

Dr. Steiner, in his discussion of "cultural democracy" of tv programs (response to audience demands) versus the argument that what the public wants is irrelevant, quotes FCC Chairman Newton N. Minow and New York Times columnist Jack Gould as stating the latter view, and Sir Robert Fraser,

The report offers this conclusion on "content":

"The specificity of praise and criticism regarding the content of commercials indicates the difference in acceptability among the various approaches presently being used. In one sense, this should encourage and challenge those who wonder whether commercials can be improved.

"Clearly, commercial content per se is not objectionable. Some are good and some are bad; and viewers pretty well agree on which is which, and why. None of this, of course, speaks to effectiveness, 'good' and 'bad' here means only 'liked' and 'disliked' and perhaps that distinction is at the root of the problem.

"The point, however, is that advertising agencies—unlike program producers—would face relatively few dilemmas if their object were to please their audience."

Advertising they like "best" or consider "worst," the viewers gave responses which were assembled into categories as follows:

| Mentions | Mentions
|-----------|-----------|
| Category | "Best" | "Worst"
| Beer, wine | 187 | 52
| Foods, soft drinks, gum | 173 | 54
| Automobiles | 124 | 40
| Laundry soap, detergent, cleanser | 84 | 102
| Deodorants, cosmetics, hair products | 55 | 80
| Cigarettes, cigars | 51 | 110
| Industrial organizations | 36 | 1

Dr. Steiner begs to differ with the FCC's definition of "public service" programs as news coverage, informational programming, and religious or secular editorializing. The FCC and "other evaluators" of broadcaster performance must recognize entertainment as "a legitimate and perhaps most significant 'public service.'" There's serious question as to which does the most good within the civic objectives sought, especially if the size of audience is considered, he says.

In other words, he says, if broadcasters are to be evaluated on how well they serve the public, the FCC might expand consideration to the whole schedule, for entertainment shows do many of the things the public service shows are supposed to do, and do them better; and "good, enriching" entertainment may be the most important public service performed by tv.

Dr. Steinera challenges those who raise the question of "balance" in tv programs. Suppose, he said, that there are only two audience segments, A and B, and two types of programs, A and B, and that A will watch only a and B only b. Suppose, further, that A's out-number B's by three to one, and that A's usually watch twice as much tv.

How to Balance • Now, he asks, what
would a perfectly balanced schedule look like? Should there be equal amounts of “a” and “b” so every audience member has an equal chance to be served? Should there be three times as much “a” because it has three times the potential audience? Or twice as much on the grounds that each “a” consumer has twice the appetite? Or should it be sixfold over “b” to take both of these differences into account?

Of course, in real life the A’s will watch some “b,” and vice versa. “But the chances are not the same; for example, the college-educated watch comedy or adventure far more frequently than the barely literate will tune to heavy information. In some cases, then, the first choice for one segment is a close second for another; while the preferred face of the second may be entirely uninteresting or incomprehensible to the first.”

Uses a Factor • Should the different uses these segments make of tv be a factor? Such problems usually are left to the free market, he said, and “that giant computer” decides what shall be produced and in what quantities.

Some argue, he says, that the free market system of balance is not workable because in tv a limited resource is allocated to a limited number of licensed producers or distributors, who sell not directly to the public, but to advertisers. If balance cannot be defined as the result when the present system is simply left alone, then it seems to rest with those talking about program balance to “state precisely what they mean, and how they know,” he says.

Dr. Steiner deals a telling blow to advocates of mandatory educational-informational programs with this quotation from Sir Robert Fraser:

“If you decide to have a system of people’s television, then people’s television you must expect it to be . . . and it will reflect their likes and dislikes, what they can comprehend and what is beyond them. Every person of common sense knows that people of superior mental constitutions are bound to find much of television intellectually beneath them. If such innately fortunate people cannot realize this gently and with good manners, if in their hearts they despise popular pleasures and interests, then, of course, they will be angrily dissatisfied with television. But it is not really television with which they are dissatisfied. It is with people.”

The People Look at Television includes a foreword by Bernard Berelson, director of the Bureau of Applied Social Research, who reviews the background and also expresses his gratitude to Dr. Stanton and CBS for underwriting the study and “allowing the bureau full freedom in its planning and execution.”

There also is an afterword by Paul F. Lazarsfeld, also of the bureau, and co-editor, with Dr. Stanton, of earlier works on radio and other communications research and co-developer of the Lazarsfeld-Stanton program analyzer.

More Studies • Dr. Lazarsfeld looks at “some problems which television research has not yet adequately explored” and suggests some possible ways of studying them. He describes these areas as “detailed study of the audience’s experience”, “experiments in changing public preferences”; “studies of the long-range effects of television”; “research on matters of taste” and “research on decision-making in the broadcasting industry.”

Dr. Lazarsfeld ventured that “probably the greatest gap in our knowledge about television pertains to the structure of the industry, its relations to the advertiser and to the FCC.”

He noted that broadcasters, like leaders in other industries, fear that competitive information will be revealed if they let themselves be researched too fully. But he thought this “might be a short-sighted view” because as things work now, congressional investigations occasionally break through and “the public gets not a balanced picture but a series of horror stories.”

“What is so badly needed is various kinds of studies of the industry, such as detailed biographies of programs: take a successful tv program; through what steps did it go from the moment when the idea was first conceived? Who had influence and in what direction did he exercise it? Here one should not just shrug off the controversial role of the advertiser. On aesthetic matters who exercised the judgment which would correspond to, say, the Artists’ Council Inc, in French broadcasting? It would be equally interesting to take a number of unsuccessful programs and attempt a similar biography.”

Dr. Lazarsfeld thought another useful study might center on “The Industry’s Relation to the FCC.” He said Chairman Minow, “who is relatively active in the exercise of his office,” and the industry and public “could learn a great deal if we knew what happened when Clift Durr [FCC member 1941-48] played a somewhat similar role 15 years ago. But no history of his regime was ever written.”

In network-affiliate relations, he continued, it would be “instructive to compare situations where the affiliates take the good sustaining program and situations where they don’t. Is the difference due to the personality of the local managers or to a different objective structure in the market? How do communities actually react” to local station policies?

The complicated relationships among networks, sponsors, FCC and audiences, he said, requires “a whole series of studies . . . to give a rounded picture.”
13 Financial Firms Can't Be Wrong
(at least not for very long)

We are sure you'll agree that banks, savings and loan, and other financial institutions are about as choosy an advertiser as you could ask for, when it comes to making a media buy.

Therefore, we are quite proud that thirteen have chosen WFAA to carry their message to Dallas, Fort Worth and the surrounding area.

The list includes several of the largest banks, as well as smaller suburban banks. It includes Texas' largest savings and loan association and many of its competitors, both in and out of the State.

And the fact that some of them have been with us for as long as 16 years proves one thing for sure. They must be getting their money's worth!

Assuming that you don't work here and are not familiar with the market, you may appreciate this particular group testimonial. We could talk all day about the "cut" and quality of our audience — and not say it half so well. Or convincingly.

If it's further evidence of results you want (in another category) we welcome the chance to provide it. Call your Petry office or write us direct.

Oren Harris set to go after ratings
AS PLANS NOW STAND, HE'LL COME IN LIKE A LION IN MARCH

Rep. Oren Harris (D-Ark.), whose old Legislative Oversight Subcommittee shook the broadcasting industry and the FCC with three years of headline-making investigations, this week will announce plans for a new round of hearings on radio-tv rating services by the old subcommittee under a new name.

The hearings, under present plans, will begin the first week in March and will be spread over several weeks.

Even as plans were crystallizing, however, it was learned that pressures were being exerted from outside the subcommittee to prevent the hearings from being held.

Chairman Harris will head a Special Subcommittee on Investigations—of his House Commerce Committee—to be organized tomorrow (Feb. 19). The special group is a carryover of the Subcommittee on Regulatory Agencies of the last Congress, itself a successor to the widely publicized oversight unit which helped disclose payola, rigged quiz shows and ex parte contacts with FCC commissioners. Many of the same regulatory agency subcommittee staff and members of Congress will join Rep. Harris in the ratings investigation.

An organizational meeting of the Commerce Committee will be held tomorrow just before the first session of the special group. Other standing subcommittees of the Commerce Committee are slated to be named at the same time.

Members of the Subcommittee on Investigations, to be announced tomorrow, in addition to Chairman Harris include: Democrats—Reps. John Moss (Calif.), Paul Rogers (Fla.), Gillis Long (La.) and W. R. Hull Jr. (Mo.); Republicans—John Bennett (Mich.), William Springer (Ill.), J. Arthur Younger (Calif.) and Donald G. Brozman (Colo.). All except Reps. Long, Hull and Brozman were members of the old Subcommittee on Regulatory Agencies.

Reps. Long and Brozman are freshmen. Rep. Hull has transferred to the Commerce Committee from the Public Works Committee. Going off the investigative subcommittee are Reps. Walter Rogers (D-Tex.), who will be named chairman of the Communications Subcommittee tomorrow, Robert Hemphill (D-S.C.) and Vernon W. Thomson (R-Wis.).

Well-Banked • Rep. Harris has asked the House to appropriate approximately $206,000 for the investigative subcommittee, included in the some $500,000 he is seeking for the full Commerce Committee.

Two subcommittee staffers—Rex Sparger and Bob Richardson, working under Chief Counsel Charles Howze—have spent 18 months investigating the rating services in preparation for next month's hearings. They have visited practically every measuring firm in the country and have reportedly interviewed dozens of broadcasters, advertisers, agencies and survey interviewers in many cities. All the top services and some minor ones will be called to Washington to testify during the hearing.

The hearing will run for only a few days early in March and then will recess for an undetermined time, it is understood. A subcommittee spokesman said this method was planned to permit the full committee to take up legislative matters during the interim.

Efforts reportedly have been made to stall the hearings both from within Congress and outside. A senator's office, according to a reliable source, has accused Messrs. Sparger and Richardson of undue harrassment of at least one of the services. However, it was learned last week that the hearings will go on as scheduled despite outside interference.

No. 1 question in Washington: Who gets Minow's job?

The guessing game in broadcasting and government circles last week was about the successor to Newton N. Minow as chairman of the FCC. Broadcasting's Feb. 11 report of Mr. Minow's intention to leave government was accepted as fact, and Mr. Minow did nothing to dispel this.

The 37-year-old chairman accompanied by his wife, left on a 10-day trip to Europe last Friday without shedding official light on his plans. His terse 13-word statement released last Monday, following publication of Broadcasting's story of his plans, was interpreted generally as tacit confirmation of his impending resignation, to join Encyclopaedia Britannica Inc., in his home town of Chicago, as a high officer and legal counsel.

The statement, issued by the FCC's information office Monday, after the press associations and other media had picked up Broadcasting's story, said:

"Broadcasting Magazine frequently speculates about my future—and often engages in wishful thinking."

Matter of Fact • Although no other authorized comment emanated from the chairman or his office, his fellow commissioners, almost to a man, construed the report as accurate. So did others close to the chairman. The news dispatches picking up Broadcasting's story uniformly reported that the chairman "did not confirm or deny" the report.

Broadcasting reported that Mr. Minow had advised the President of his intention to leave the FCC and had recommended the appointment.
What's Discretionary Income?

...it's this yummy-flavored Canine Cuisine instead of table scraps

Great stuff—Discretionary Income—and there's 27% more of it (on the national average) in Ohio's Third Market. No medium—but none—blankets it as fully and warmly as WHIO-TV, AM, FM. Ask George P. Hollingbery.

Additional morsel for thought:

Dayton has been Ohio's fastest growing major metropolitan area during the past 20 years. Source: U. S. Census of Population, 1960.

Associated with WSB, WSB-TV, Atlanta, Georgia and WSOC, WSOC-TV, Charlotte North Carolina

BROADCASTING, February 18, 1963
of the FCC’s newest member—33-year-old E. William Henry as its successor. It was comment about Mr. Henry that provoked discussion not only among broadcasters but also in congressional circles and within the FCC. Mr. Henry, although a commissioner for only five months, already has been classified by his colleagues as able and strong-minded, and wedded to the New Frontier philosophy of rigid regulation. He presided over the recent hearings into local television programming in Omaha and, in his public statements, supported the FCC’s right to evaluate station programming.

When reports first developed several months ago about the possibility of Mr. Minow’s departure, speculation logically developed that Mr. Henry might be his successor. Mr. Henry worked for the New Frontier during the 1960 presidential campaign and has political connections with influential Kennedy supporters in Tennessee.

Also mentioned as a possibility for the chairmanship was Kenneth Cox, currently chief of the FCC’s Broadcast Bureau, who has been nominated by President Kennedy for FCC membership. Mr. Cox, a former Seattle attorney and protege of Sen. Warren G. Magnuson (D-Wash.), chairman of the important Senate Commerce Committee, also is seen as a candidate for the chairmanship. His confirmation for commissioner is regarded as certain and awaits only the approval of the Senate.

Newcomer’s Chance • There is always the possibility that the successor to Mr. Minow’s commissionership will also be named chairman. Whether the successor will be a “merit” appointee through promotion of a senior staff member of the FCC, or whether he will be selected from the outside, also figured in the speculation last week. It was presumed that since Mr. Minow had notified the President three weeks ago of his intention to resign, White House attaches assigned the task of selecting appointees to high federal posts already were on the job.

There was no pin-pointing of the date of Mr. Minow’s resignation. It is understood that he notified the President that he wanted to depart before June 1. Mr. Minow for some months has confided to friends that he found it hard to make ends meet in Washington on his $20,500 stipend. He has said that he would not enter communications practice or join any licensed entity in broadcasting.

At the Encyclopaedia Britannica he will join a company that has no connection with broadcasting except for the syndication of educational films by Encyclopaedia Britannica Films Inc., a subsidiary. Mr. Minow’s former law firm, headed by United Nations Ambassador Adlai Stevenson, now dissolved, represented former Sen. William Benton, chairman of EB, and Mr. Minow had the film subsidiary as his client.

When the President chooses Mr. Minow’s successor, it will be his fourth appointment to the FCC since he assumed the presidency. His previous appointees were Messrs. Minow, Henry and Cox. The fourth Democrat is the veteran commissioner Robert Bartley, who has served for 11 years and is a Texan—the nephew of the late Speaker Sam Rayburn. Mr. Bartley has expressed no chairmanship aspirations but undoubtedly would accept the appointment if it were offered. It is believed he would have the unqualified support of Vice President Lyndon B. Johnson.

WAST, WTEN get separation waiver

The FCC last week, in separate actions, waived its minimum mileage separation requirements and granted the applications of W TEN (TV) (ch. 10) Vail Mills and W AST (TV) (ch. 13) Albany, both New York, to move their transmitter sites. WTEN will move its transmitter about 31 miles southeast, towards Albany and increase power to 200 kw from 144 kw; WAST will move about 12 miles northeast of Albany towards Troy.

The commission said that WTEN’s move will place it about 21 miles short of the required distance of 170 miles from WJAR-TV (ch. 10) Providence, R. I. WAST will be short spaced with etv WNDT (TV) (ch. 13) New York by 28 miles. WTEN and WAST had experienced transmitting difficulties in the area due to adverse terrain conditions and the commission said the moves were aimed at providing “more equitable” vhf service in the Albany-Schenectady-Troy area “by providing three fully competitive stations.” The third station is WRGB (TV) (ch. 6) Schenectady.

The two stations, according to the commission, will have to give “equivalent protection” to the two co-channel stations WJAR-TV and WNDT and provide “precise offset” equipment at their own respective expense.

The Assn. of Maximum Service Telecasters Inc. had petitioned against both applications; both petitions were denied last week in the commission’s action.

Keep in Touch • The commission said that both moves must deny service viewers that now receive WTEN and WAST signals “... and where the number of viewers is more than minimal, the applicant shall install and maintain sufficient television broadcast translator stations ...” so that service will not be lost.

The two stations will also be required to air announcements of their proposed moves two weeks before they are made; this will have to be done both aurally and visually, twice nightly between 7 and 10 p.m., three nights weekly during the two weeks. The stations are also required, the commission said, to explain that if because of the move viewers lose their service they should write to whichever station and the FCC, so that service may be reinstated.

The commission further stipulated that WTEN and WAST could not begin construction of their new transmitter sites until they file engineering data showing the feasibility of translator service to the areas around Herkimer, N. Y., and Rutland-West Rutland, Vt., respectively. The two stations must also await FCC decision that the proposals are acceptable.

FCC plans change in multiple owner rules

The FCC last week announced plans to tighten its multiple ownership rules so that broadcasters with the maximum number of stations would have to dispose of one interest before applying to purchase or build another. Present rules require only that an interest be disposed of after the acquisition of a new station is approved by the commission.

The FCC rules allow no one to own more than seven am or fm stations. The limit on tv interests is also seven, but only five of these may be vhf. Furthermore, a broadcaster may own just one station in a service area.

Under present procedures a broadcaster may apply for an eighth station if he promises to cut his holdings back to seven when it is granted, but the proposed amendment to the multiple ownership rule would end that practice. Comments on the proposal are due March 15.
Why WJAC-TV bought
Seven Arts’ “Films of the 50’s” Volumes 1, 2, 3, 4 and 5

Says Alvin Schrott:
Executive Vice President and General Manager,
WJAC-TV, Johnstown, Pa.

“We bought the Seven Arts’ ‘Films of the 50’s’ because they were too good to let our competition get them. Frank Cummins, our program director, analyzed the Seven Arts’ releases. He recommended them as being top quality pictures and the most outstanding films available.

“We program the ‘Films of the 50’s’ on our Saturday night Cinema Six show which starts at 10 o’clock and runs participating until 11:00. Following a 10 minute break for the news to 11:10, we run to conclusion with the same sponsor each week. Our audience loves the films, and as a matter of fact, I do too—I stayed up again till one o’clock Sunday morning watching ‘Battle Cry’, one of the Seven Arts’ terrific features from Volume 3.”

FCBA to publish lawyers’ monographs
GIVES THEM CHANCE TO DEBATE COMMUNICATIONS ACT

Radio and communications lawyers are going to have a chance for their own “great debate” on the Communications Act.

The executive committee of the Federal Communications Bar Assn. voted last week to have the monographs written by members of a special committee (BROADCASTING, Jan. 28) published in the Journal of the FCBA. They are expected to be in print before mid-March. According to FCBA President Donald C. Beelar, an open meeting of the membership will be held “before summer.”

Mr. Beelar said that the decision to have the monographs published was the “consensus” of the 12-man executive board.

There were four reports:
The most important, written by Leonard Marks, called for a radical overhaul of the FCC, splitting the commission's functions into three separate areas—a single administrator, a court of review and a commission of five members to handle policy matters.

A second document, written by W. Theodore Pierson, recommended the amendment of Sec. 326 (which now forbids the FCC to censor broadcast programs) to ban unequivocally the FCC's interest in programming in any form whatever,

The third report, on Sec. 315, was written by Philip G. Loucks, and called for the deletion of this political equal time provision.

A fourth report, written by Reed Rollo, called for a major revision of the present common carrier provisions.

In addition to Mr. Beelar, members of the FCBA executive committee are: Thomas W. Wilson, first vice president; Maurice M. Jansky, second vice president; Philip Bergson, secretary; Herbert Schalkind, assistant secretary; Ernest W. Jennes, treasurer, and Warren Bak, business in procur, Mr. Pierson, Reed Miller, J. Roger Wollenberg, and Frederick H. Walton Jr.

John W. Willis is editor of the FCBA Journal.

Federal judge to hear Bayer-FTC case tomorrow

Argument on a Federal Trade Commission request for a preliminary injunction to stop the current advertising by Bayer aspirin based on an article in the Journal of the American Medical Assn. is scheduled to be held before a federal judge in New York tomorrow (Feb. 19).

The FTC issued its complaint last month against Sterling Drug Inc., and its advertising agency, Dancer-Fitzgerald-Sample Inc., charging that advertising for Bayer aspirin on tv and radio in newspapers and was false and misleading (BROADCASTING, Jan. 21).

At issue are the claims made by Bayer based on a report published in the Dec. 29 AMA Journal by a medical team which tested the efficiency and effect of five analgesic preparations.

Earlier, an FTC petition for an immediate temporary restraining order was denied by a U. S. District Court judge in New York.

Dodd plans reports from subcommittees

A Senate subcommittee "probably" will continue its investigation of alleged "Communist infiltration" of broadcasting. Sen. Thomas J. Dodd (D-Conn.) said Thursday (Feb. 14).

Interviewed on Capitol Cloakroom (CBS Radio, Thursday, 6:30 p.m., EST), Sen. Dodd, vice-chairman of the Senate Internal Security Subcommittee, said the subcommittee would report next month on the executive (closed) hearings it conducted in January with witnesses associated with the Pacifica Foundation (BROADCASTING, Jan. 28, 14.)

The testimony also will be made public about the same time, it has been learned. Subcommittee hearings so far have dealt only with Pacifica, licensee of four listener-supported, non-commercial stations: KPFX (FM) Los Angeles, KPFA (FM) and KPFB (FM) Berkeley, all California, and WBAI (FM) New York.

The FCC has not renewed licenses of any Pacifica station (AT DEADLINE, Jan. 14), and is not expected to take any action until the subcommittee's findings are available.

Juvenile Delinquency and Tv • A Senate Juvenile Delinquency Subcommittee report on the effects of television on youth will be released "about next month," said Sen. Dodd, who also is chairman of the delinquency subcommittee. The lengthy report, awaited since subcommittee hearings ended last spring, will be "constructive," said the senator.

He added that he thought "there have been many improvements" in television brought on by the industry itself, not necessarily by the subcommittee's activities. The networks and the stations have done this on their own in the past year or two, Sen. Dodd said.

An initial draft of the report was revised at Sen. Dodd's request to include "recently uncovered evidence" of how tv sex and violence affect different types of children, normal as well as disturbed (CLOSED CIRCUIT, Dec. 24, 1962).

FTC opens L.A. office

A new field office has been opened in Los Angeles by the Federal Trade Commission with Robert E. O'Brien attorney in charge. Mr. O'Brien formerly was assigned to the FTC's Atlanta office. The Los Angeles office is at 215 W. 7th St., Room 1212.

New bills introduced in Congress

The following legislation affecting broadcasting has been introduced in Congress. Proposals which duplicate earlier bills and resolutions are so noted (• indicates legislation introduced in past Congresses):

Office of Federal Administrative Practice: H.R. 3560, Rep. James Roosevelt (D-Calif.): to establish an office of Federal Administrative Practice and provide for the appointment and administration of a corps of hearing commissioners (resembles partially H.R. 43, to set up an administrative court [BROADCASTING, Feb. 4]).

Bribery in sporting contests: H.R. 3696, Rep. William M. McCulloch (R-Ohio): to prohibit schemes in interstate or foreign commerce to influence by bribery the outcome of sporting contests.

Equal time suspension: H.J. Res. 247, Rep. Oren Harris (D-Ark.): to suspend for 1964's Presidential campaign the equal time provisions of the Communications Act (see page 46 and BROADCASTING, Jan. 21).

Senate probe to center on Telstar, Relay

CONSIDERATION OF KENNEDY NOMINEES SET FOR MARCH

Senate legislative activity—including action on broadcasting and other communications matters—was scheduled last week following initial steps by that chamber to set itself in order after a month of delay caused by a filibuster on a proposed—and unsuccessful—change in rules.

The Senate Communications Subcommittee will begin hearings today (Monday) to find out why two of the nation’s first communications satellites haven’t worked properly.

Early next month the full Senate Commerce Committee will consider names of the men President Kennedy has nominated to be incorporators of the nation’s Communications Satellite Corp. (Broadcasting, Feb. 4).

The senators will ask some of the nation’s top authorities on space communications whether difficulties experienced in the operations of Telstar and Relay mean that this country’s space plans have been set back.

Relay developed trouble immediately after its Dec. 13 launch and Telstar acted up around the same time, but both have been operating properly this year (Broadcasting, Jan. 14).

Witnesses to be called on the satellite operations will include: FCC Commissioner T. A. M. Craven, top officials of the National Aeronautics & Space Administration, representatives of the American Telephone & Telegraph Co. and Radio Corp. of America. Sen. John O. Pastore (D-R.I.), subcommittee chairman, will preside.

Incorporators’ Hearing • The hearing on the incorporators—first set for March 4—has been pushed back to March 11. Sen. Pastore will preside at the full committee session.

The 12 men the President has nominated to be incorporators of the satellite firm are the same he named for recess appointments last year (Broadcasting, Oct. 8, 15, 1962), except for Philip L. Graham. Mr. Graham, president of the Washington Post Co. (Post-Newsweek stations) and initial chairman of the board of incorporators, resigned last month. He was succeeded as chairman by Sam Harris, a New York attorney and director in two mining companies, who was vice chairman of the satellite group.

The Democratic Steering Committee made committee assignments for senior and freshman senators, which will be announced officially today. Republicans were expected to meet today to handle similar organizing tasks. All actions are subject to Senate approval, expected early this week.

A shift in the ratio of Democrats to Republicans on the Commerce Committee—which handles just about all legislation affecting broadcasting—will give the Democrats one more member. Formerly the committee had 11 Democrats and six Republicans. The new ratio, caused by Democratic gains in the November elections, is 12:5.

Sen. George A. Smathers (D-Fla.), long a member of the Commerce Committee, has left for a post on Foreign Relations.

Two veteran Democrats have been added to the commerce: Sen. Philip A. Hart (D-Mich.), who leaves Agriculture and Forestry and Sen. Howard W. Cannon (D-Nev.).

The Space Committee • The Aeronautical & Space Sciences Committee, which lost the late Sen. Robert S. Kerr (D-Okla.), its chairman, will be headed by Sen. Clinton B. Anderson (D-N.M.) (At Deadline, Jan. 21), who moved past two senior senators, who waived the top post. Sen. John Howard Smethers (D-Fla.), the former Oklahoma governor, now serving the unexpired term of the late Sen. Kerr, was named to the Democratic vacancy on the space committee created by the former chairman’s death.

NIAC group studies new warning systems

Broadcast and communications working groups to study methods of using AM, FM and TV stations to alert the public in the event of a war emergency have been established by the National Industry Advisory Committee, the FCC announced last week.

Heading the special NIAC committee which has undertaken to formulate a new method of emergency warning, is John F. Meagher, NAB radio vice president. J. Leonard Reinsch, executive director of the Cox stations, is vice chairman.

Chairman and vice chairman of the subgroups are:

The mission was given last month to NIAC by the civilian defense office of the Dept. of Defense (Broadcasting, Feb. 4). It calls for the committee to investigate the feasibility of a broadcast warning system which will provide an instantaneous alarm on a 24-hour-a-day basis with a capability of reaching 95% of the population.

Under the present Cenelrad method, radio stations are alerted by the North American Air Defense Command via the press teletype facilities of the AP and UPI. Stations broadcast a special signal which alerts government and public installations with receivers equipped to receive the special code.

One of the major elements in any new alerting system will be the establishment of transmission standards to activate radio and TV receivers. A major factor, it is presumed, will be how to reach receivers that are not turned on.

The system will be used, probably, for other peacetime purposes, like weather warnings, threats to life and property, etc.

NIAC is a special committee comprising representatives of broadcasting and communications services formed to advise the FCC on defense communications.

NAB still opposes proposed FM table

The FCC last week received over 25 reply comments to its proposed FM table of assignments (Broadcasting, Dec. 24, 1962), although the deadline for the rebuttal comments has been extended to March 18.

Outstanding among the comments, which ran mostly along the lines of requesting specific channels allocated to specific areas, was that of the NAB. The NAB mainly renewed its opposition to the commission’s planned assignment table and reiterated its former views (Broadcasting, Nov. 5, 1962).

The NAB urged that the commission definitely state its intention to protect existing FM stations, that operate in excess of the power and antenna height allowable in their zone under the new assignment table, with a ‘grandfather clause.’ The association restated that the proposed table is too rigid and urged a policy of assignments based solely on mileage separations and administered on a “go-no-go” basis be adopted.

Much out of tune with the other comments was that of the Illinois Broadcasting Co., licensee of three FMs, which told the commission that the proposed assignment table was a good idea. But, it said, provisions for unused channels should be made. If a channel goes unused it should be planned to reallocate the channel, providing it meets with mileage separation requirements.
puzzle: Tees for Twos

One balmy afternoon, Frank Grindley, Jay Walters and Bob Gilbertson, three good men and true in the Harrington, Righter & Parsons sales organization, were business-lunching with three agency time-buyers, to wit: Bob Decker (Ted Bates), Jim Lavelle (Dancer, Fitzgerald, Sample), Jim Kelly (Leo Burnett, Chicago).

To clear their heads before they grappled with their new expense account forms (and to limber up their bent left elbows), one of the men suggested a brisk 18 holes. Each HR&P man teamed with his guest.

Lavelle, Decker, Kelly and Walters shot 106, 102, 100, and 94 respectively, which indicates the difficulty of the course rather than the curvature of the elbows. Grindley and Gilbertson shot a 96 and a 98, but since they hadn’t put their names on their scorecards, it was some time before they figured out whose score was which. When they finally identified their cards, it was discovered that two of the twosomes had the same total score. Walters’ partner beat Grindley’s partner.

How were the men teamed? Tee off on this problem and win a small trophy.

*Our team knows the score when it comes to sales; so do our clients. For well-above-par results they lean heavily on such audience-pleasing WMAL-TV spot carriers as Maverick, Thriller, SurfSide 6, Checkmate, Championship Bowling, Girl Talk, Trails West, and Bachelor Father.

WASHINGTON, D. C.

BROADCASTING, February 18, 1963
FCC IS TARGET OF PROBE

Dingell subcommittee seeking to aid the little man tied up by regulatory agencies’ long, red tape

A new House subcommittee will soon begin examining the regulatory agencies especially the Federal Trade Commission—with an eye on improving and speeding up their procedures, it was learned in Washington last week.

The new unit will be a subcommittee on regulatory agencies operating under the Select Committee on Small Business. Its chairman, Rep. John D. Dingell (D-Mich.), is known to broadcasters for his efforts to prevent the FCC from breaking up clear radio channels.

Meanwhile, proposed hearings to look further into complaints from small businessmen that they are not getting a fair opportunity to buy prime time from television stations and networks probably will be shelved. (A subcommittee headed by former Rep. Dale Alford (D-Ark.) had said there was substance to the complaints and recommended further hearings [Broadcasting, Dec. 10, 1962].

Little Guys’ Complaint • The small businessman suffers the same problem with all regulatory agencies, according to Rep. Dingell. Owners of small radio stations seem to get a better break from the FCC than do businessmen working with other agencies, Rep. Dingell has said. But the 36-year-old Detroit law

maker also has had differences with the FCC. “They can process the little guy to death,” he has said.

However, the FCC will be the sub-committee’s main target, it was learned and the subcommittee’s approach will be cautious and respectful. Rep. Dingell is well acquainted with FTC Chairman Paul Rand Dixon. They worked together on drug and other legislation when Chairman Dixon was chief counsel of the Senate Antitrust and Monopoly Subcommittee and Rep. Dingell was ranking Democrat on the House Commerce Committee’s Finance and Commerce Subcommittee.

Dixon Well Regarded • The congressman holds Chairman Dixon in “high regard,” although he is understood to be nonetheless concerned about the 

FCC’s slow procedures, which in Rep. Dixon’s opinion can put a small businessman out of business before he can obtain relief from a complaint.

Despite Rep. Dingell’s determination to see the FCC’s procedures improved, he is known to oppose the agency and Chairman Dixon’s efforts to obtain cease-and-desist powers. Such authority could work against the small businessman, Rep. Dingell believes, the merchant could be tied up by a court order, possibly unfairly obtained, until his business folds from delay in other FCC procedures.

Only 3 on FCC still want drop-ins

The FCC proposal to drop in vhf channels at substandard separations in eight two-station markets has apparently lost much of its steam. Some of the commissioners are said to have had second thoughts about the effects the drop-ins would have on the development of uhf television.

A majority of the commission was believed to favor the proposal, which would provide the markets with a third vhf network outlet (Closed Circuit, Feb. 11). But the discussion of the commissioners last week revealed a deep split among them.

The matter is not expected to come up again until the commission’s meeting Feb. 27 because Chairman Newton N. Minow will be out of the country this week as a member of the U.S. delegation to a United Nations conference in Geneva.

Three Supporters • Although no votes were taken, the proposal last week reportedly had had only three hard-core supporters—Commissioners Frederick W. Ford, Rosel H. Hyde and T. A. M. Craven.

Reportedly opposing it in varying degrees were Chairman Minow and Commissioners Robert T. Bartley and Robert E. Lee.

Commissioner Lee, who was said to be the most vigorous opponent of the proposal, is the commission’s staunchest supporter of uhf television. But Chairman Minow and Commissioner Bartley were also said to have had some misgivings about the effect the drop-ins would have on the development of uhf television. Commissioner E. William Henry is considered, thus far, as the “swing man.”

Chairman Minow, however, was said to have suggested an alternative approach—approve the drop-ins with the proviso that those granted the channels be required to surrender them after an unspecified number of years and accept uhf channels in their place.

The eight proposed drop-in markets are Baton Rouge, La.; Birmingham, Ala.; Charlotte, N.C.; Dayton, Ohio; Jacksonville, Fla.; Knoxville, Tenn.; Johnstown, Pa., and Oklahoma City (a shift of ch. 5 from End).

Petitions Filed • Meanwhile, there was a stirring of renewed concern about the proposal on the part of uhf broadcasters. The Assn. for Competitive Television filed a petition with the commission last week asking for time in which to comment on the proposal in view of the “changed circumstances” resulting from the passage of the all-channel receiver act.

The association is understood to feel that, in passing the act last year, Congress went on record as favoring the development of uhf television and that, as a result, dropped in vhf channels would not be in the public interest.

In addition to the association’s filing Taft Broadcasting Stations and Springfield TV Broadcasting Corp. notified the commission they are interested in obtaining uhf channels in Dayton.

Taft, in a supplemental comment on the Dayton drop-in proposal, said the addition of a vhf channel in Dayton would be inconsistent with the intent of the all-channel bill. The company said the only possible reason the commission could have for considering the addition of a third vhf channel is that it doubts a uhf station would be built in Dayton.

But, it added, Taft is prepared to build a uhf station there—and one that would have greater coverage than a “squeezed-in” vhf station—it was assured another vhf channel would not be added. Taft said it was prepared to file a request for a rulemaking for a uhf channel and to apply for it.

Taft owns WKRC-AM-FM-TV Cincinnati, WTVN-AM-FM-TV Columbus (both Ohio), WBRX-AM-FM-TV Birmingham, Ala. and WKYT-TV Lexington, Ky.

Springfield TV (WWLP Springfield, Mass.) asked the commission to delete ch. 38 in Connerville, Ind., and assign it to Dayton. The company noted that ch. 22 is now assigned to Dayton but that the station to which it was granted, WONE-TV is now dark.

Rep. Dingell

Universal TV Tape Recorder
The Basic Compact with Provisions for Adding PixLock, Cue, ATC and Color

The Universal model enables you to obtain in one compact unit very high standards of performance, reliability and interchangeability... at lowest cost. You buy this basic unit and add exactly what you want in the way of accessories to achieve your desired type of operation.

The availability of a complete line of accessories provides programming flexibility and operating convenience, making the TR-2 an excellent choice for many applications. Circuits of proved performance are utilized throughout. Transistors are employed where they do the most good in achieving materially improved performance and significant savings in space.

**STUDIO AND MOBILE MODELS.** The studio model is available in a single (3-rack) cabinet 70” wide, 84” high, and 24” deep. It requires less than 10 square feet of space. For mobile applications the TR-2 is housed in two separate cabinets each measuring 66” high, 24” deep, and 50” wide. Both models are designed for adding color.

**ACCESSORIES.** The wide range of accessories which can be integrated in the basic TR-2 include: Air Bearing Headwheel, PixLock, Picture Monitor, Waveform Monitor, Audio Cue Channel, Automatic Timing Corrector (ATC), Two-speed operation, and Color.

See your Broadcast Representative for complete details. Or write to RCA Broadcast and Television Equipment, Building 15-5, Camden, New Jersey.

**Outstanding Features**

- Lowest Priced Compatible Quadruplex Recorder
- Optional Two-Speed Operation
- Electronic Quadrature Control
- Designed for Adding Color
- Complete Line of Accessories

RCA
The Most Trusted Name in Television
DID EXAMINER ERR IN CH. 12?
FCC counsel protests bypassing of Mack’s diary; maintains all 3 applicants should be disqualified

The FCC General Counsel’s office told the commission last week that the hearing examiner in the Jacksonville ch. 12 ex parte case had erred in reaching his decision without giving any weight to diary entries of then Commissioner Richard Mack.

Associate General Counsel Hilburn Slosberg, in oral argument, said the entries would help provide background for an alleged commitment given by Mr. Mack to one of the stockholders in WFGA-TV, which subsequently was given the grant. Mr. Slosberg called this commitment “the salient feature” in the case.

Chief Hearing Examiner James Cunningham, following a hearing on ex parte charges two years ago, had cleared WFGA-TV of any implication of wrongdoing, but recommended that the August 1956 grant be voided because Mr. Mack participated in the decision after improper representations were made to him by the two losing applicants. Mr. Cunningham also recommended that the losing applicants, Jacksonville Broadcasting Co. and City of Jacksonville, be disqualified (BROADCASTING, April 6, 1962). City has withdrawn its application.

The General Counsel’s office has maintained all three applicants were guilty of ex parte contacts and should be disqualified.

Examiner Supported • Bernard Koteen, counsel for WFGA-TV, argued that the case against the licensee, Florida-Georgia TV Co., was based on circumstantial evidence and that after a thorough examination the examiner had found no evidence on which to conclude the company was guilty of ex parte activities.

Joining Mr. Slosberg in attacking the initial decision—but for different reasons—were attorneys for Jacksonville Broadcasting Co. and the City of Jacksonville, both said there was nothing in the record to implicate them in any improper activities.

Mr. Slosberg, in discussing WFGA-TV’s role, said the hearing record included evidence, including some 20 entries from Mr. Mack’s office diary, which would help explain “how and why” the alleged commitment, to Mitchell Wolfson, was made.

But, he said, Mr. Cunningham had ignored the entries as “incompetent,” although he had admitted them in evidence. Mr. Wolfson originally owned 5% of Florida-Georgia, and Wometco, which his family controls, 15%. Wometco now owns 47.5% of the company.

Mr. Slosberg said the commission should either consider the entire record or, if it agrees with the examiner’s procedure, to reopen it to permit the General Counsel’s office to submit new evidence. In exceptions to the initial decision last June, Mr. Slosberg said the General Counsel’s office would call several witnesses if the record were reopened, including Mr. Mack. The former commissioner was involved in all 10 ex parte cases reviewed by the commission.

Orlando ch. 9 Cited • Mr. Koteen, in urging the commission to affirm the examiner’s finding that Florida-Georgia was innocent of ex parte contacts, cited the FCC’s decision in the Orlando ch. 9 case. In both cases, he said, the evidence was circumstantial. And in the Orlando proceeding, he added, the com-

VOA’s new Greenville facility doubles Voice’s power

The Voice of America’s new Greenville, N.C., transmitting facilities have doubled the Voice’s power. Dedicated Feb. 8, the 4.8 megawatt shortwave transmitting system strengthens the Voice’s competitive position against communism. But the U.S. is still third behind Radio Moscow and Radio Peking, said Edward R. Murrow, director of the U.S. Information Agency, the Voice’s parent.

The new power at Greenville is necessary to overcome the penetration and number of Communist broadcast hours, USIA said. While the Voice now broadcasts 740 hours a week in 36 languages, Russia airs 1,205 hours weekly and Red China 787 hours each week.

Its new power is being used by the Voice in five ways:

• To put a clear, direct signal into areas where only weak or intermittent signals went before; Central America, West Africa and Scandinavia. What were once considered good reception areas in parts of Europe, Latin America and North Africa now are receiving a signal “strong enough to lean on,” reported Henry Loomis, director of the VOA, who heard tests of the signal during a January inspection tour.

• To feed programs relayed from VOA headquarters in Washington, D.C., to relay stations in Africa and the Far East.

• To replace VOA transmitters in Wayne, N.J., and Brentwood and
mission found that the sworn denials of the Mid-Florida principals were sufficient to overcome the implications of wrongdoing (Broadcasting, Jan. 14). He said the commission should, therefore, reach the same conclusion regarding Florida-Georgia.

Regarding the alleged commitment by Mr. Mack, Mr. Koteen said that Mr. Wolfson "categorically denied" such a contact. The alleged commitment was reported by Rep. A. Sydney Herlong Jr. (D-Fla.), who had called Mr. Mack at the request of Jacksonville Broadcasting. Mr. Koteen also said Rep. Herlong testified that Mr. Mack might have made the comment merely to "brush him off."

Mr. Koteen added that although other individuals were said to have made ex parte contacts in behalf of Florida-Georgia, all denied them and no evidence was developed that refuted their statements.

Mr. Koteen also questioned the commission's right to void the grant. He said that since no appeal or other action was taken to stay the grant, the case is closed. Under questioning, he said the commission could now move against Florida-Georgia only through revocation or denial of renewal proceedings.

Losing Applicants Protest

Both Charles Murchison, appearing for Jacksonville Broadcasting, and John Rafter, for the City of Jacksonville, said there was no evidence to show that the principals of their applicants made ex parte contacts.

Mr. Murchison said James Stockton, president of Jacksonville, who was found by the examiner to have attempted to influence the commission ex parte, was simply trying to secure an impartial decision by the commission. Mr. Murchison said Mr. Stockton, a prominent Jacksonville Democrat, was concerned about reports his competitors were attempting to use political influence against him at a time when a Republican administration was in office.

According to Mr. Murchison, the examiner found only that an attorney representing Jacksonville had gone to see Mr. Mack but had never spoken for the company. Mr. Murchison said the attorney, Jack J. Daniel, "didn't say another word in Mr. Mack told him he intended to vote for Florida-Georgia.

Mr. Murchison, like Mr. Slosberg, urged disqualification of Florida-Georgia because of ex parte activities.

Mr. Rafter said that although the City of Jacksonville was no longer an applicant, it wanted to clear its name of any charges stemming from the examiner's decision. The examiner found the City guilty of ex parte activities because a city commissioner, J. Dillon Kennedy, hired an attorney, Miles H. Draper, to "neutralize supposed political pressure in Washington."

Mr. Rafter said that Mr. Kennedy had acted without any official authorization or even the knowledge of his fellow commissioners. Therefore, he said, City shouldn't be held responsible. Furthermore, he said, there was no evidence that Mr. Draper actually attempted to influence the commission.

The oral argument was heard by five commissioners — Acting Chairman Rosel Hyde, Frederick W. Ford, Robert T. Barley, E. William Henry and Robert E. Lee.

The FCC last week...

- Granted Frontier Broadcasting Co.'s application for a new TV station on ch. 3 in Sterling, Wyo. The station is to have a power of 27.7 kW and an antenna height of 780 ft. The commission stipulated that the grant is subject to a final action on Frontier's application for renewal of license of KBFC-TV Cheyenne. Main principals of Frontier are: Cheyenne Newspapers Inc. (Woming Eagle and State Tribune) 24.4%; Tracy S. McCraken 20%; F. R. Rickeson Jr. 17%. The McCraken estate owns Cheyenne Newspapers. Frontier also owns KBFC Cheyenne and KSTF (TV) Scottsbluff, Neb.
- Granted the U. of Maine a construction permit for a new noncommercial educational TV station on ch. 12 in Orono. The new station will operate with a power of 229 kW and an antenna height of 990 ft. U. of Maine is also applicant for another TV station on ch. 10 Presque Isle.
- Designated for hearing the application of WIXX Oak Park, Fla., for a license to cover its construction permit. Hearing will concern charges by City Council of Oak Park that WIXX has reneged on its original programming proposal (general market format) in favor of an all Negro format (Broadcasting, Jan. 14). The FCC has denied station a program test authority pending the outcome of the hearing.
- Granted request by KBOM Mandan-Bismarck, N. D., that station be allowed to stay on the air until March 3. KBOM's license was revoked by the commission last December (Broadcasting, Dec. 24, 1962) because it deceived the FCC and made unauthorized transfers of stock ownership, and was consequently ordered off the air by Feb. 17. The extension, which would be for 14 days, is in order to service Mandan until the application of Capital Broadcasting Inc. for the 1270 kc outlet can be processed. The commission waived its am freeze to accept the application by Capital fearing that Mandan would be left without a first service.
- Received two requests from operating radio stations asking for a waiver of the commission's am application freeze and that it accept their applications for major changes. WCBQ Whitehall, Mich., requested acceptance of its application to move the station's transmitter site nine miles to North Muskegon because it is in financial difficulties and the move would give a greater service area. For the third time KODA Houston asked for consideration of its application to increase its power to 5 kW from 1 kW, so that it might provide service originally planned for. KODA said commission refusal to consider the application is unlawful. KODA told the commission that an increase in power to 5 kW would in no way interfere with other outlets and would free itself from interference.
- Assigned uhf ch. 16 in Cotati, Calif., for noncommercial educational use and deleted that channel from Pittsburg where it had been assigned as a commercial channel. Assignment of ch. 16 in Cotati had been requested by Sonoma State College Foundation Inc.
- Granted a waiver of am freeze order and accepted for filing the application J. W. Dunavent for new daytime station on 1600 kc, 500 w, in Eminence, Ky. Application will be available for processing March 26.

Schenectady, N. Y., now considered obsolete. Planned annual operating costs of Greenville ($2.4 million) may be offset in part by the retirement of the obsolete facilities, the Voice reports.

- To provide an internal communications link to overseas posts from which USIA correspondents may feed reports to Washington (via Greenville) for incorporation in programs later fed from Greenville back overseas.
- To give the Voice an emergency communications system. Many of the agency's own messages have been sent by cable. Greenville gives the Voice a facility to develop instantaneous communication between U. S. posts overseas and Washington.

Completion of the Greenville complex is only one step along the way in the Voice's modernization program. Improvements are being made at Wooferton, England, and on the Island of Rhodes, and in the U. S. at Bethesda, Ohio, and Delano and Dixon, Calif. Another major transmitting operation is being constructed in Liberia where the Voice is installing six 250 kW and two 50 kW transmitters at a cost of about $13.9 million.

Broadcasting, February 18, 1963
Harris proposes 1964 Sec. 315 suspension

A bill introduced in the House last week would set the same ground rules for radio and television coverage of the 1964 presidential campaign that was followed in 1960, the year of the “great debates.”

Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, Monday (Feb. 11) proposed suspension of Sec. 315’s equal time requirements for nominees for the office of President and Vice President.

Hearings will be scheduled “in the near future,” Rep. Harris said.

KICA-TV tells FCC of competition from catv

KICA-TV Clovis, N. M., last week supported the FCC’s proposed rule to restrict catv systems’ use of microwave facilities and described the station’s difficulties in competing with a catv system operating in Clovis.

KICA-TV, a CBS and ABC affiliate, told the commission that its programming is duplicated by the Clovis catv system, which is owned by Midwest Video Corp. The Midwest system carries the signals of KVII (TV) and KFDA-AM both Amarillo, Tex., ABC and CBS affiliated, respectively. The Clovis catv also carries KGNC-TV (NBC) Laredo, Tex., and KSWS-AM Roswell, N.M., which is also NBC but carries ABC and CBS on a secondary basis. KICA-TV further noted that these four stations are more than 100 miles from Clovis.

The Clovis station said that Midwest has refused to acknowledge KICA-TV requests to be included among the signals carried by the catv system. Competition is “grossly inequitable and unfair” and KICA-TV’s economic existence is threatened, the station told the commission.

Rhode Island TV takes ch. 6 case to court

An unsuccessful bidder for ch. 6 New Bedford, Mass., attacked the FCC’s action of last July authorizing WTEV (TV) in that city to move its transmitter closer to Providence, R.I.

Rhode Island Television Inc., principally owned by Providence businessman Robert Riesman, contended last week in the U.S. Court of Appeals in Washington that his application should have been accepted by the FCC and that it should have been placed in a hearing with WTEV’s request to move its transmitter. The commission refused to accept the Rhode Island Television application on the ground that the channel was already occupied by WTEV. WTEV at that time had asked for permission to move its transmitter site from Martha’s Vineyard to Tiverton, R.I. The FCC granted this move July 31, 1962. WTEV began operation at its new site Jan. 1.

Rhode Island Television also asked the FCC to revoke the ch. 6 grant to WTEV on the ground the station had not been constructed on time, and also to reopen a rulemaking proceeding of eight years ago involving the proposed move of ch. 6 from New Bedford to Providence.

The argument was heard by Circuit Judges David L. Bazelon, George T. Washington and Warren E. Burger.

WQAD-TV grant attacked by losing applicants

The FCC’s 1962 grant of ch. 8 Moline, Ill., to Moline Television Corp. (WQAD-TV) was attacked by the four losing applicants last week in the U.S. Court of Appeals in Washington.

The unsuccessful applicants charged that the FCC did not penalize Moline Television for what they claimed was a lack of a complete survey of the community to determine program content. They also alleged that the commission placed undue emphasis on previous broadcast experience by some of the principals of Moline Television.

WQAD-TV is headed by Frank F. Schreiber, former Chicago television station executive.

Contending for the Moline frequency are Community Telecasting Corp., Moline Broadcasting Co., Illiway Television Inc. and Tele-Views News Co.

The appeals court panel comprised Circuit Judges Henry W. Edgerton, Walter M. Bastian and John A. Danaher.

WTOP Radio’s research ‘breakthrough’

NEW STUDY GOES BEYOND THE BOXCAR FIGURES FOR DETAILED DATA

A breakthrough in “numbers” research—one that pins down an advertiser’s likeliest prospects in a station’s total audience—is being announced today (Feb. 18) by Washington’s WTOP Radio.

The new research goes beyond the so-called boxcar numbers of program ratings and shows audience composition in terms of how many are beer drinkers, or coffee users (by type of coffee), or automobile drivers, camera owners, etc.

In all, the study breaks down the audiences of six leading Washington radio stations and shows, for each station, this type of ownership and usage information on each of more than 45 major and small demographics and more than 25 food and drug products.

In addition it gives for each of the six stations information on listening patterns, household financial activities, entertainment patterns and many other areas.

More Realistic * Thus, according to Lloyd W. Dennis Jr., vice president and general manager of WTOP, an advertiser in almost any category can see just how many users of his product—or allied products—are reached by the various stations and then can place his advertising on this ‘much more realistic basis, rather than on the basis of total audience alone.” Mr. Dennis explained: “One station may have twice as much total audience as another, but if the other station has more users of his type of products, then the advertiser would be wasting much of his effort—and probably paying higher rates, too—if he bought on total audience alone.”

KRNT-TV

"One of the great news stations in the nation"

AN OPERATION OF COWLES MAGAZINES AND BROADCASTING, INC.
Represented By The Katz Agency
ings under actual selling conditions, Mr. Dennis said, brought advertiser and agency response that “far exceeded even our most enthusiastic expectations. As a result, we consider this multi-dimensional research study to be the most important and far-reaching development for providing support information in the intelligent use of the radio medium.

“We have broken through the circulation barrier’ and predict that this is the beginning of a new era in broadcasting research.’ ”

He compared the new research to an incandescent bulb in “the candlelight era” of audience research and predicted it will lead to equally great advances in sales and research sophistication over the next several years.

1,000 Households • Conducted for WTOP by SRDS Data Inc., the study encompassed personal interviews in almost 1,000 households, using 20-page questionnaires whose findings filled more than 100,000 punchcards and then were transferred to tapes for quick access via computers.

The useful data thus computer-stored would fill a “report” reaching from floor to ceiling and still leave much valuable data to be mined, one spokesman reported. Mr. Dennis put it this way:

“Because of the complex nature of the study and the fact that literally thousands of cross-tabulations are involved, WTOP Radio is not releasing it as a general published report.

“However, any qualified agency or client seeking sophisticated audience and consumer profile information about the Washington market is free to call upon us and we will be happy to tell them what we can provide. WTOP Radio wants to do everything possible to contribute to the intelligent and successful use of radio advertising by clients both new and old.”

Research Milestone • Phillip W. Wenig, president of SRDS Data Inc., said he was confident that this study represents a true milestone not only in broadcast research but in all media research. It sets the pattern, he said, “for the highly sophisticated computerized material that the industry has been demanding of late.”

Mr. Wenig said that before starting the field work for WTOP his company “had been testing and perfecting research techniques for more than two years for just this type of research study. Thus we knew beforehand the things we could do and the pitfalls to avoid. Even so, we spent considerably more time re-testing the procedure until we were absolutely certain that the most exacting standards had been met.”

In announcing the study, titled “A Radio Audience Profile Study of the Washington, D.C. Market,” Mr. Dennis said:

“For almost a decade I have been convinced that broadcasters were neglecting first-class research which probes deeply as well as broadly. We’ve measured circulation almost exclusively. We know that there are nearly 200 million radios owned by Americans and that they are purchasing new sets at the rate of over a-million-and-a-half each month.

“But what is sorely needed is research which goes beyond boxcar numbers; which probes in terms of what the advertiser wishes to accomplish and in terms of the specific audiences he wants to reach.

“Such research, properly conducted, is not cheap. But what is even more costly is for responsible segments of the industry to continue to go on without it. That is why WTOP Radio has undertaken what we believe to be the most ambitious and far-reaching study ever made by any station. We wanted to be able to relate radio audience profiles, station by station, to the advertiser’s consumer profiles and to be able to report on them in depth. This we have succeeded in doing. . . .”

Tv tie-in campaigns termed successful

The successful use of television during tie-in promotion campaigns was outlined by two speakers at an Association of National Advertisers clinic in New York last Thursday (Feb. 14).

E. A. More, advertising director of the Formica Corp., a division of American Cyanamid Corp., described an overall tie-in promotion project for the company, covering national building materials manufacturers, model homes, consumer magazines, exhibits as well as tv. In the television tie-in Mr. More pointed out, Formica appealed to its large number of furniture customers through commercials on CBS-TV’s Eye-witness program, offering a shoppers guide of 40 furniture manufacturers using Formica in their products. Formica, Mr. More indicated, is enthusiastic about all types of tie-in promotions.

J. F. Donovan, vice president of advertising and public relations for A.M.F. Pinspotters Inc., told the ANA clinic the details of an “effective” tie-in promotion conducted in 1961 with Beecham Products (Brylcreem and Silvikrin) during the summer months when bowling activity is low. A “bowl free” tie-in promotion was developed, he said, offering any person buying either Brylcreem or Silvikrin one free game at an AMF-equipped bowling center. Beecham advertised the offer on its commercials on three tv network shows and AMF spotlighted the promotion in bowling magazines and newspapers. The results for both AMF and Beecham, Mr. Donovan concluded, were “spectacular.”

REP KILLS GROUP SALE PLAN

McGavren-Guild charges it's a form of rate-cutting; Eastman Co. defends practice against critics

Station representative McGavren-Guild Co., New York, last week announced it had abolished its station group selling plan.

And with this news, Daren F. McGavren, the rep's president, charged that "group plans have degenerated into nothing more than well planned and highly embellished forms of rate cutting under a fancy title."

Mr. McGavren's attack brought an immediate response from Robert E. Eastman & Co. which also has a group selling plan.

Mr. Eastman, president of his rep firm, counter-charged that the withdrawal of the plan by one rep firm and accompanying "attempts to condemn and devaluate all group selling" amounted to "an admission of weakness because group selling has been part and parcel of the broadcasting industry ever since NBC hooked up its first network many years ago."

Other station rep firms which have station group selling plans—Blair Radio and H-R Representatives are prominent—declined comment. Several other reps use the plan as an occasional selling approach.

In group selling a rep firm offers a package time rate to an advertiser that contracts for a spot schedule on all of the stations, using one invoice, one billing. Packages usually carry special rates.

Katz Accounting • The Katz Agency said it doesn't offer a package at a discounted rate but encourages advertisers to buy any combination of its stations at card rate, and for simplification a multi-station buy can be made with a single order and invoice because of Katz's "accounting" procedure.

Mr. McGavren averred that group selling plans "undermine the prestige of the radio industry, taint the representatives who sell with them, and, via guilt by association, sully the reputations of participating stations which have normally rock-hard, unyielding rate cards."

He indicated also that some advertisers have come to use the plan in a "cynical" manner by expecting its use "as a matter of course, and then demand discounts." He said, too, that advertisers—some with small budgets—will have reps put together special groups to fit the budget and "with sometimes as few as four to six stations."

Mr. McGavren charged that group selling plans often place the buyer in the position of ordering "marginal stations" that he ordinarily would not include on his list. He asserted that many "leading station" managers have objected because "they are identified with secondary outlets with flexible cards." Mr. McGavren cited a delay in advertiser payment to some stations when others in the group fail to submit bills and affidavits on time, and said the group plan tends to restore stations into "the rigid category of networking."

Bonus Spots • At one time, Mr. McGavren said, group plans were offered to advertisers that were new to radio, and the outcome was to give impetus to the medium when it was "lying fallow. But now they amount to "wholesale rate cutting" with some instances of bonus spots for buys of say 10 spots weekly.

Mr. McGavren also referred to an FCC warning that stations avoid entering agreements to set combination rates (that is, several stations within a single market) (Broadcasting, Feb. 4). Though group radio selling by reps entails stations in different markets, Mr. McGavren expressed the opinion that group plans "may sometimes involve stations with overlapping coverages" and cautioned that the government's attitude might ultimately harden to include all sales groupings.

Mr. Eastman declared that if a group selling "concept and execution are poor, then it follows that the plan itself must also be ineffective and eventually be withdrawn." He said that a "prime prerequisite is a list of strong major radio stations," and listed such "prestige" advertisers as Union Carbide, Kitchens of Sara Lee, Champion Spark Plugs, the Kellogg Co., Mystik adhesive products, Groves Labs and Viek Chemical Co., as using the Eastman plan.

It was noted by McGavren-Guild spokesmen that the rep firm had its group selling plan operating nearly a year and had 35 stations participating. The plan, they said, accounted for approximately $500,000 worth of national-regional business.

Though not discussed, there's another, underlying reason for some reps' increasing chagrin over major group selling plans—that is, the competition they present for the national advertising dollar over and above the competition from the four radio networks.

Spot tv up 17% in '62

Spot television gross time billings will total $721,212,000 in 1962, Television Bureau of Advertising announced today in a preliminary report. The total represents a 17% increase over the $617,398,000 in time billings in 1961. The fourth quarter in 1962 totaled $197,759,000 compared with $177,827,000 for the like period the year before, or an increase of 11.2%. In computing the dollar increase, the bureau estimated it was more than $284,000 for each day of the year in 1962—a total of more than $103.8 million.

At odds over group sales plans
MY STARS!

Look what's been added to Complete Range Programming!

Such famous CBS Radio stars as Garry Moore, Arthur Godfrey, Leonard Bernstein and Art Linkletter have joined our regular WJR personalities. And complete CBS news and public affairs resources have been added to our broadcasting schedule. That makes Complete Range Programming more complete than ever before.

The "something for everyone" found in this kind of variety programming increases our ability to lure listeners from our 115-county four-state Great Lakes market.

The millions of loyal WJR listeners drawn from more than 17 million folks in this market will be more loyal now that they can stay tuned to our station to hear these famous personalities...as well as their favorite cultural programs, music shows, farm reports, homemaker shows, news reports, live variety shows and sports coverage.

And happy WJR advertisers should be absolutely starry-eyed when their Henry I. Christal representative explains that this increased potential is included in just one buy...WJR.
Substance, image go together in advertising
ENLARGE QUALITY, COLLINS TELLS HOUSTON AD FORUM

Advertising, constantly under attack from many sides, can best enhance its "image" by improving its "substance," NAB President LeRoy Collins said last Friday (Feb. 15).

This is because "advertising's image and its substance are one and the same," he said in remarks prepared for delivery before the Houston Ad Forum. He noted that great improvements have been made in recent years but stressed that the industry still faces the challenge of enlarging and refining the quality and responsibility of advertising.

"It is of tremendous credit to the advertising profession that it frankly has been undertaking many positive steps to accomplish just that," the NAB president said. He expressed special pride in the efforts of the NAB Code Authority to improve the quality and ethics of broadcast advertising.

There is such a thing, Gov. Collins said, as good taste in advertising in stressing that how a product is sold can be of just as much value as how much is sold. "Whether you want to put it in terms of a social obligation, a more intelligent assessment of the changing educational standards of the population, a hard-nosed dollar-and-cents business proposition—or all of these rolled together—advertising in this country is going to have to make some fundamental major improvements ... ."

Number 1 • Noting advertising's "phenomenal" growth in recent years, he predicted that broadcasting cannot escape becoming the Number 1 advertising medium in the future. And with this growth, he said, it is "little wonder that more and more thoughtful people these days are expressing a deeper interest in and concern about advertising."

The best way to answer attacks is not to advertise the good facets of advertising but to improve its quality, he said. What is most significant is the kind of advertising we have in the U.S., where advertising and the American economic system are forever mutually interdependent.

The governor, in his prepared text, did not mention cigarette advertising on TV, a subject which has caused him to become embroiled in controversy because of his past published beliefs (Broadcasting, Jan. 21, Dec. 3, 1962). However, he did point out a recent survey in which respondents felt that advertising has an unhealthy influence upon children and causes people to buy things they should not.

He criticized the "play-it-safe philosophy" which exists in the minds of many TV advertisers to avoid controversy. "This is unfortunate, for the American people are not childish," Gov. Collins said. "They can tell when they are being protected and programmed down to. I think both advertisers and broadcasters are going to find an increasing resentment [to such programming]. And those advertisers who are not afraid of backing programs which stimulate thought, arouse reactions and even step on toes are going to find themselves increasingly more and more respected by the public."

Warren forms N.Y. agency

Douglas Warren, former vice president and account supervisor, Smith & Greenland, New York, has formed his own advertising agency, Douglas Warren Agency, which absorbs Krukowski & Symington, advertising production house.

Members of new agency include Jan Krukowski, creative director; Thomas Symington, in charge of new business; and Joseph Supline, art director. Among accounts is Mettemunk Ltd., a Danish frozen pastry producer.
The search is on, and it offers you a chance to get a new Collins 20V-3 transmitter absolutely free. We're looking for the oldest Collins 1 KW (or less) AM transmitter still in use as primary broadcast transmitting equipment. If you have it, we'll swap a new 20V-3 for it — and it won't cost you a cent. We're even paying shipping charges on both transmitters. Your only expense will be installation of the new transmitter. So, if you have a Collins 1 KW (or less) transmitter, take a good close look at it. It could be the one we're after. Then write us a letter, describing its history and send along the type and serial numbers, if you know them. If yours is the oldest reported by the deadline date, we'll get the 20V-3 to you as soon as is practicable. Read the simple rules, then send a letter to J. L. Taylor, Dept. BC, Collins Radio Company, Cedar Rapids, Iowa.

**COLLINS RADIO COMPANY**
Cedar Rapids • Dallas • Los Angeles • New York • International, Dallas

Here are the simple rules:

1. Your transmitter must be 1 KW or less and be in primary service—not a standby.
2. It must be property of the original owner or be the original installation with no major modifications.
3. Collins will replace the transmitter with a new 20V-3, paying all shipping charges, but the winner must install the new transmitter at his own expense. The old transmitter becomes the property of Collins Radio Company. The winner, upon accepting the new transmitter, agrees to use of the owner's name and/or station name in subsequent promotional activities of Collins Radio Company.
4. Letters must be postmarked prior to midnight, March 1, 1963.
5. In case of tie, the first transmitter reported will be considered.
6. Offer is limited to the continental United States.
Different surveys, different results

AIR, PRINT ARGUMENT ON STRIKES' EFFECTS CONTINUE

The Bureau of Advertising of the American Newspaper Publishers Assn. and the Radio Advertising Bureau last week traded charges and countercharges over the effects of the newspaper strikes in New York and Cleveland on consumer spending.

The background to the dispute started several weeks ago when the Bureau of Advertising, using Federal Reserve Bank figures, said there was a dip in consumer spending in New York and Cleveland and indicated strongly that this decline was attributable to the newspaper strikes. Shortly thereafter, RAB issued a critique, based substantially on a commissioned survey, that the federal reserve declines resulted from stores spending in other media (radio, tv, magazines) only a fraction of what they normally would be spending for newspapers (Broadcasting, Feb. 11). RAB also stated that federal reserve figures reflect only department store sales and cannot measure wider sales patterns.

The Bureau of Advertising, citing RAB's pronouncements, issued a statement Feb. 12 claiming the RAB survey shows that the New York and Cleveland newspaper strikes appear to have a "significant impact even on consumer spending for necessities." The bureau claimed that RAB's study "unwittingly" proved the efficacy of the newspaper medium, adding that it is "evident from these figures [cited in the RAB survey] that women are consciously postponing their shopping for major purchase items for which newspaper advertising is relied upon strongly."

RAB struck back at the Bureau of Advertising's interpretation of its study on Wednesday (Feb. 13). RAB pointed out that it had acknowledged in its original announcement on Feb. 11 that "newspapers are an important part of any market's media mix," but insisted that the newspaper strikes have not affected consumer spending to the extent claimed by the Bureau of Advertising. It urged the newspaper bureau to stop "quibbling with others who have done field research" and suggested that the Bureau of Advertising conduct its own original research.

Chevy test may be key

How soon Detroit auto makers will make significant advertising investments in fm radio may be influenced by Chevrolet's current test of both stereo commercials and programs on WDTM (FM) Detroit. Chevrolet Advertising Manager Jack Izard said, "We will be watching this experiment in fm stereo with great interest."

Chevrolet has bought a 26-week series on WDTM in the Sunday 3-4:30 p.m. period featuring the Boston Symphony orchestra as stereo recorded during its regular performance in Boston. The automaker's agency, Campbell-Ewald Co., Detroit, is producing special commercials for the program to take full advantage of the stereo medium.

Mr. Izard observed that Chevrolet has "traditionally pioneered in the broadcasting field dating back to the early days of radio when we sponsored the first network radio shows." He noted that Chevrolet also was "one of the first to sponsor tv in its formative years."

NBC-TV reports sales in new Monday shows

NBC-TV's new Monday Night at the Movies (7:30-9) and the Art Linkletter Show are nearly sold out to advertisers, according to Don Durgin, vice president, NBC-TV sales. Movies, which made its debut Feb. 19, is 85% sold for its 32-week schedule, while the Linkletter show, which starts tonight (Feb. 18), is approximately 70% sold for its 30-week run.

New sponsors (and agencies) for Movies include Ford Motor Co. and Liggett & Myers (both through J. Walter Thompson); Leh & Fink (Geyer, Morey, Ballard); Beech-Nut (Young & Rubicam), and Claireol Inc. (Foote, Cone & Belding). Newly-announced advertisers in the Art Linkletter Show are Liggett & Myers (J. Walter Thompson) and Polaroid (Doyle Dane Bernbach).

Business briefly...

Procter & Gamble will sponsor the first telecast of San Francisco's Chinese national New Year's Parade on ABC-TV, Feb. 19, from 9:30-11 p.m., advertising Dash dog food and Thrill, new dishwashing liquid. Agency is Dancer-Fitzgerald-Sample, New York.

The Borden Foods Co., New York, has begun a short-term spot tv campaign

Stations DO Have Personality

IDENTIFICATION--Nine times out of ten, if a man says (anywhere in Michigan) "I'm from Paul Bunyan Network," the response is: "How is Les these days, say hello from me." Man after man, time after time, the immediate identification is with Les Biederman--an identification that personalizes the Paul Bunyan stations--that sells their products.

Les Biederman, President

Statistic--Retail sales in the area covered (Grade B) by WPBN-TV, Traverse City, & WTOM-TV, Cheboygan, total $531,362,000.

DOES THE IMPOSSIBLE
(for any other kind of national medium)

Now—
"TARGET-MARKETING"
concentrates your dollars
where market size
concentrates your customers!

Here is where the alert national marketer
can grab an advantage now possible only
through Parade—except at staggering cost!
The huge Parade Jumbo Network of 70
powerful newspapers—best buy for the full-
budget advertiser—can now be split by mar-
ket size to suit your marketing strategy.
We call it "Target-Marketing". And when
Parade hits, it hits with the cannonball im-
pact of power totally concentrated in the
market itself...not the buckshot spray of
zone diffusion.
Need extra impact in Nielsen "A" coun-
ties? The Parade Big Top Network of 18
newspapers gives you almost 6 million cir-
culation—81% of which is concentrated in
Nielsen "A" areas.

Or perhaps America's great and growing
"single-dwelling" markets, backbone of our
economy, are your best source of sales. The
Parade Bandwagon Network of 52 news-
papers reaches more than 5,000,000 homes
—2 out of 3 in Nielsen "B".
Best of all, if you are a national adver-
tiser with special needs, you can get all the
power of Parade Jumbo—and "heavy-up"
in whichever group of target-markets your
sales objectives demand, by using extra
space in Bandwagon or Big Top.
"Target-Marketing" gives you three ways
to buy each issue of Parade—and an infinite
number of combinations for your media
planning. This suggests a careful re-study of
the Sunday magazine field.

BROADCASTING, February 18, 1963
COMMERCIAL PREVIEW: Eveready batteries

Another in a series of Eveready battery “power to spare” commercials was filmed last week on a roof above Times Square, New York. (See Picture) Four Eveready alkaline batteries (penlight size) which are claimed to have been powering a transistor radio for 43 hours prior to demonstration, are shown firing 1,000 No. 5 photoflash bulbs arranged on a 12 x 14 foot frame. After this workout the batteries are replaced in the radio by announcer, Chris Schenkels, who then turns the radio on, showing “power to spare.”

The one-minute commercial is scheduled for viewing during May, June and July on CBS-TV’s Twilight Zone, Alfred Hitchcock, and Eyewitness; NBC-TV’s Saturday Night at the Movies and 11th Hour and ABC-TV’s 77 Sunset Strip and Combat. William Esty Co., New York, is agency for Union Carbide Consumer Products Co., division of Union Carbide Corp., which manufactures the batteries. Agency producer for the commercial is Robert Badenhausen and Robert Carlisle, president WCD Inc., the producer.

A-C’s competitive spot-buying plan

Compton Adv., Chicago, in behalf of Alberto-Culver Co., effective immediately is instituting a six-market test plan to buy spot availability competitively through both New York and Chicago station representatives to ensure getting the very best buys possible. The buying will continue to be coordinated through Chicago, however.

Alberto-Culver now is spending more than $1 million a month in spot tv purchases in 31 markets nationally. As explained by Charles A. Pratt, advertising director, the company wants to obtain the most efficient buys possible. Mr. Pratt indicated that while generalities do not apply to all representatives, it sometimes occurs that the New York office of a station representative may have a prime availability turn up through cancellation or some other cause which the Chicago office of the same representative does not have—and vice versa.

The test plan initially will involve Alberto-Culver buying of station availabilities in New York, Grand Rapids, Indianapolis, New Orleans, San Francisco and Seattle. Dick Brown has been assigned by Compton as the timebuyer in New York for the experiment while Cecilia Odziomek, Compton’s broadcast supervisor in Chicago, will continue to be chief timebuyer there and will coordinate the test.

The competitive buying experiment was explained to some two dozen Chicago station representative salesmen last week by Andrew E. Zeis, vice president and media director of Compton. All Alberto-Culver products handled by Compton will be involved in the test, he said. Alberto-Culver has been exclusively a tv advertiser and now is spending at the rate of more than $30 million annually in the medium.

Alberto-Culver’s other agency, BBDO, Chicago, is not involved in the test.

Agency appointments...

- Fuller Paint Div. of Hunt Foods has appointed Young & Rubicam, Los Angeles, as its agency, effective May 1. Young & Rubicam has handled the Hunt Foods’ advertising for 20 years and transfer of the recently acquired Fuller Paint Div. is in line with Hunt policy of placing all its advertising through a single agency.

- Iberia Air Lines of Spain, Madrid, appoints Lennen & Newell, New York, to handle its worldwide advertising. The 1963 advertising budget is $1.5 million. The airline services New York, Puerto Rico, Mexico, and principal cities in South America, Africa and Western Europe. The account previously had

on three New York stations, WOR-TV, WNEW-TV and WPIX (TV), for its cream cheese and Eagle brand condensed milk. The campaign was scheduled to substitute for newspaper advertising during the New York strike, a spokesman said. Agency: Young & Rubicam Inc., New York.

Chevrolet Dealers of Southern California, through Eisaman, Johns & laws, Los Angeles; Standard Oil of California, through BBDO, Los Angeles, and Brown & Williamson (Viceroy cigarettes), through Ted Bates, New York, will co-sponsor telecasts of 26 games of the Los Angeles Angels baseball team this year on KHJ-TV Los Angeles. The trio also sponsored the KHJ-TV Angels’ telecasts last year.

Heritage House Products Inc. (lawn seeds and lawn aids), Pittsburgh, is buying spot tv, a minimum of 20 and a maximum of 35 per week, in 36 markets. Starting dates for the spots, which are geared to a male audience, will be mid-March in southern markets and post-Easter in the north. Campaigns will be 6-8 weeks in major and 5 weeks in minor markets. Agency is Wener & Schorr Advertising, Philadelphia.

Schick ups ad budget 20%

Schick Inc., Lancaster, Pa., is increasing its 1963 advertising budget by 20%, Robert F. Draper, president, announced last Thursday.

Mr. Draper said the increase would be allocated to network and spot television as well as other media. Schick is a spot tv advertiser in 35 major markets.

While Schick spokesmen declined to comment on last year’s advertising budget, available figures on tv gross billing indicate the company spent $733,202 in network tv in the first 11 months and $50,450 in spot tv for the first nine months of 1962.

The cpm facts of life from F&S&R study

On a cost-per-thousand basis, network tv is the best buy with spot tv in a second place, according to Earl Timmons, western region research director for Fuller & Smith & Ross, in a study of comparative media costs.

Of the nine categories covered in the report, network tv was the only one showing a drop in cpm, with spot tv reporting the smallest increase.

The survey shows network tv’s cpm in 1961 was $86, compared to $100 in the base year 1955. Spot tv had a $103 cpm in 1961.

Network radio showed the only base cost decrease, going from $100 in base year 1955 to $88 in 1961. Spot radio’s base cost of $109 in 1961 was the smallest base cost increase.

The largest increase in the F&S&R survey was recorded by magazines, which went from the $100 base figure to $160 in 1961, with a cpm of $125. Newspapers had a base cost of $126 and cpm of $122.

The survey concludes that an advertiser trying to stay even today must increase his budget from 6%-10% a year, depending on his media mixture. “Continually growing budgets, it seems evident, must be provided from year to year if a client is to move ahead,” the survey notes.

been assigned to various agencies throughout the world for those areas serviced by Iberia.

• Kal Kan Foods, Los Angeles pet food manufacturer, to MacManus, John & Adams, Los Angeles, on March 1. Jim McTige, senior account executive, will be in charge. Kal Kan has been served by Fuller & Smith & Ross, and its predecessor agency, Stromberger, Lavene, McKenzie, since 1957.

• Glaser Brothers, San Francisco, tobacco and candy distributors to Garfield, Hoffman & Conner Inc., that city, effective immediately.

Stemmler, 3 others form new agency in St. Louis

Formation of a new advertising agency in St. Louis has been announced by George L. Stemmler Jr., president of the new firm, Stemmler, Bartram, Tsakis & Payne. All four principals were formerly with D’Arcy Adv. Co. in that city.

Other members of SBT&P are Larry Bartram, business manager and treasurer; Homer Tsakis, creative director, and Jack Payne, copy director and radio-tv producer. Headquarters will be at 317 N. 11th St.

Chrysler-Hope-NBC planning new series

Chrysler Corp. was reported last week to be close to signing with NBC-TV on a proposed new one-hour series for next season that would utilize the talents of comedian Bob Hope. The program would be scheduled on Friday, 8:30-9:30, preceded most likely by International Show Time.

It’s reported that Chrysler would assume the entire time and talent cost which is estimated at nearly $14 million (approximately $7.5 million for production, talent fees and other costs, $6.3-6.5 million for time).

Under the arrangement, which was still being negotiated but said to be “85% completed” as of Feb. 14, Bob Hope would perform in eight programs over the 52 weeks and act as host for 22 programs in an anthology series to be produced by Revue Productions. Young & Rubicam is the agency.

Rep appointments...

• WKIZ Kalamazoo, Mich.: Prestige Representation Organization, New York, as national sales representative.

• KWJJ Portland, Ore.: Venard, Torbet & McConnell, New York, as national representative.

• WAIV (FM) Indianapolis: Summer-Weed Inc., New York, as national representative.

• WAVI Dayton, Ohio: Mid-West Time Sales, Kansas City, Mo., as regional sales representative.

• WHAY Hartford-New Britain, and WLAD Danbury, both Connecticut: Bob Dore Assoc., New York, as national representative except in New England area.

FTC: the slices are thinner

National Bakers Inc. of Chicago has been told by the Federal Trade Commission to stop claiming in its advertising that Hollywood bread contains less calories than other breads. In its proposed order, the commission said that Hollywood bread contains just as many calories as other brands and that its claim of lower calories was based on thinner slices. The ruling is not final and is subject to appeal by National.
WHY YOUNG DETROIT PEOPLE STAY HOME SUNDAY AFTERNOONS

Famous singing star Brenda Lee with WXYZ-TV dee-jays Lee Allen and Joel Sebastian.

... to watch their show "Club 1270"* on WXYZ-TV! Overwhelming acceptance by Detroiters is making it one of the most popular television shows in Detroit. One reason: Guest shots by national recording stars like Brenda Lee and Dion ... resulting in outstanding ratings for "Club 1270." A special Trendex report showed the pilot for "Club 1270" viewed on New Year's Eve received 49.6 share of the audience, reached 267,800 homes and was watched by 1,499,600 people. An impressive rating of 24.0 put "Club 1270" far out in front of the competition. Proof that WXYZ-TV delivers the programming and personalities to reach the right people at the right time. When your media plan calls for concentrated television coverage let WXYZ-TV deliver for you.

CBS BLOCKS IN NIGHTTIME SCHEDULE

Gleason renewal fills in last remaining blank spot for fall

CBS-TV, as has been expected, is the first of the three tv networks to make final its preliminary nighttime program schedule for the next season.

The schedule as now fixed by CBS-TV for 1963-64 resembles the network lineup reported by Broadcasting on Feb. 11 but with a few changes in time periods.

Monday night: To Tell the Truth at 7:30, I've Got a Secret at 8, Lucy Show at 8:30, Danny Thomas at 9, Andy Griffith at 9:30, and East Side, West Side at 10-11.

Tuesday night: Marshall Dillon at 7:30, Red Skelton at 8, Whistle Stop (formerly titled Ozark Widow) at 9, Jack Benny at 9:30, and Garry Moore at 10-11.

Wednesday night: CBS Reports at 7:30, Real McCoys at 8:30, Beverly Hillbillies at 9, Dick Van Dyke at 9:30, and Danny Kaye at 10-11.

Thursday night: Password at 7:30, Rawhide at 8, Perry Mason at 9, and The Nurses at 10-11.

Friday night: The Free and the Brave at 7:30, Route 66 at 8:30, Twilight Zone (half-hour version) at 9:30, and Hitchcock at 10-11.

Saturday night: Jackie Gleason at 7:30, Phil Silvers at 8:30, The Defenders at 9, and Gunsmoke at 10-11.

The final word on how the schedule probably will look in the fall came with the definite renewal Feb. 13 on The Jackie Gleason Show: The American Scene Magazine for next season in its Saturday night period. CBS-TV president James T. Aubrey Jr. in announcing Mr. Gleason's show will return, said the program would take a summer vacation in June.

An apparent characteristic of next season's schedule will be the slotting of one-hour shows in the 10-11 period nearly each night of the week. This is true of CBS-TV except for Sunday.

Other Programming • In other programming moves preparing for the next season:

NBC-TV appeared to be making progress in its program scheduling. Latest development was a negotiation—still to be “100% confirmed” last week—involving Chrysler Corp., Bob Hope and Revue Productions (earlier MGM had negotiated but then declined) for a new one hour show that would be slotted Friday, 8:30-9:30 with Chrysler picking up the whole tab (see story, page 38).

Featured would be a Revue-produced anthology of 22 shows and eight Bob Hope specials. Cost for time and talent is estimated to be nearly $14 million, with Chrysler committing for all of the hour.

NBC-TV also seemed inclined to place Grindl (half-hour comedy starring Imogene Coca), a Screen Gems show, in the Sunday, 8:30-9 period, under the sponsorship of Procter & Gamble. Still in doubt was the Monday, 7:30-9 period where the network may yet decide to continue to program motion pictures.

‘Blasphemous’ NBC skit decried by congressmen, viewers

A satiric skit and an unusual rendition of the “Lord’s Prayer” on NBC-TV’s Today were labeled “a blasphemous betrayal of God” by protesting viewers and Southern congressmen last week.

The network was asked to apologize by a Mississippi affiliate which carried the program and congressmen asked the FCC to investigate.

NBC said as of Thursday (Feb. 14): “No comment.” (Network executives viewed a tape of the program on Thursday.)

The FCC last week asked NBC for a transcript of the controversial program segment and told complaining lawmakers that it would investigate. A transcript was provided the FCC, it was learned.

This is what happened:

In the 7-7:30 a.m. portion of the Feb. 8 broadcast of Today (7-9:00 a.m., EST, M-F) a group of satirists from a Greenwich Village revue called “The Premise” presented several “improvised” sketches. One portrayed the death of a Southern politician given the compound name “Fabus Rankin Barnett.” “Mr. Barnett” approached the gates of heaven where he was met by the Lord, represented as a Negro. Seeking admission “Mr. Barnett” was refused by the Lord and was banished to “utter darkness.”

This scene was followed by what protesting viewers described as a “jazzy ridiculing of the Lord’s Prayer.”

‘Worst’ Reaction • Before the performance ended protest calls began to reach WLBT (TV) Jackson, Miss. “It was one of the worst reactions to any nationally-televised program we’ve ever had,” said Fred L. Beard, general manager. “The network showed no respect for God,” Mr. Beard said.

Sen. James O. Eastland (D-Miss.) wired FCC Chairman Newton N. Minow: “If the FCC rules and regulations are not now sufficient to prohibit programs in such bad taste and so shocking to ethical and spiritual considerations, please advise me what steps will be necessary to prevent such blasphemous content in television programs hereafter.”

Rep. Arthur Winstead (D-Miss.) also protested the program to the FCC, seeking an investigation.

Rep. John Bell Williams (D-Miss.) ranking member of the House Commerce Committee, forwarded complaints sent him to Chairman Minow and asked his comments.

Apparently the producer and director were unaware of what was to be performed, Mr. Beard said, “As many things as a network does, they’re bound to make mistakes.” He added, “I always audition an act before I put it on the air.”

The WLBT manager said as soon as the protests were brought to his attention he telephoned NBC in New York to inform the network of the reaction. He was told to put the information in writing and address it to “Carl Lindemann,” of NBC News, which produces Today, Mr. Beard said. He did. Mr. Beard asked the network for either a tape recording or a transcript of the portion of the program involved.

In his wire to Chairman Minow (a copy of which was sent to NBC President Robert E. Kintner), Sen. Eastland forwarded a protest sent to him from the Women for Constitutional Government in Jackson. “I share the indignation of these incensed ladies and ask that the blasphemous content of this program be investigated by the FCC,” the senator said.

None of the protesting officials said they’d seen the broadcast themselves.
KTBS-TV is Your Best Buy

From the East Texas Oilfields To the Arkansas Timberlands

KTBS-TV reaches a 1.5 billion dollar market of 1.1 million buyers* ... beaming ABC exclusively to homes in southwestern Arkansas, southeastern Oklahoma, northwestern Louisiana and northeastern Texas, including famed Panola County in the heart of the East Texas oil country. The station's continued excellent coverage of this extensive and influential market is an important reason for you to specify KTBS-TV, Channel 3, Shreveport, Louisiana.

Local viewing opinions sought by ANTENNA

MORE QUERIES TO FOLLOW, IF FIRST IS SUCCESSFUL

Letters were in the mail last week to over 5,400 "informed and influential citizens" of 216 U.S. communities, asking their cooperation in a "research project of critical importance to the television industry."

The letters, written on letterheads of Daystar Productions, producer of the Stoney Burke series currently on ABC-TV, were signed by Leslie Stevens, executive producer. They read, in part: "Whether television will reach its great capacity is dependent in large part on the viewer and upon his viewing habits. Thus, it is proper for Daystar Productions, an independent television production company, to establish direct communication with the viewer and with local opinion-makers. To do this, Daystar has established Analysis of Nationwide Television Entertainment and News—a non-profit association; the project is called ANTENNA. You are one of 25 residents of your city to be contacted by ANTENNA. . . . Your response can be of significant value in helping television achieve its finest potential."

With the letters went questionnaires, four-page forms with 44 questions that probe the respondent's viewing habits and his opinions of what he watches on tv or what he would like to watch if it were available. In addition to questions about programs specially liked (and specially disliked), the ANTENNA questionnaire asks about tv's education-al value and how it might be increased; whether the respondent notices any significant difference in the programming of the three tv networks and, if so, which he prefers and why; whether his tv news viewing supplements or replaces his newspaper reading and which medium is the most unbiased and has the ablest reporters.

Too Much? • Other questions ask if the respondent thinks "there is an overemphasis on sex in television," or "an overemphasis on violence" and whether "some group outside the television industry (governmental or otherwise) should control television programming."

There are also questions about movie attendance and what the respondent thinks about pay tv. Probably the most important are the two final questions: "Is television, in general, living up to its potential?" and "Is television a force for good in the United States?" Each is given ample room for comment.

The names of the individuals to whom the letters were sent—civic and business leaders, educators, clergymen, newspaper editors, service club presidents, city officials and the like—were derived from lists sent Daystar by chambers of commerce in response to a query made last fall (Broadcasting, Oct. 22). "We wrote to 260 chambers and heard from 200 of them, with lists of up to 200 names, which we cut down to an average of 25," Mr. Stevens said last week.

The response to the questionnaires will be carefully analyzed, Mr. Stephens said, "If it's a hodge-podge, or a mass of contradictions, with no significant results, ANTENNA will dwindle and disappear. But if we find the answers significant, as we hope, we'll follow the first questionnaire with others, probably sending out one a month. This first questionnaire was purposely broad in scope. Future forms will narrow the field to discuss a specific topic, such as science fiction. It's a fact that 25% of the front pages of the newspapers are devoted to news with a scientific tie-in, such as the Polaris or the X-15 or Telstar. If the editors are right, the American public is vitally interested in science. Well, what we want to know as producers of tv programs is: Is there a potential audience for science fiction shows on tv? Or we might ask about shows that have gone off the air to the wails of tv columnists that they were too good to be dropped. What about it? Were these shows really so good? If they were brought back, perhaps in a different time slot, would they do any better the second time?

Then, after we've established a rapport with the people on our list and they've become accustomed to filling out our forms, we'll ask them to question the members of their own particular group about a specific program or program type. That way, we'll be turning our limited list of opinion leaders into a mass survey of the public at large."

Second Survey Started • Along with the national survey, Daystar is launching a second survey on the local level, with questionnaires going to 1,500 high school and college teachers in the Los Angeles metropolitan area. Asked why Daystar feels that the expense of conducting these surveys is justified, Mr. Stevens said: "We're a young, rich company.

"That may sound facetious, but I'm serious. We can afford to make the survey and, if we're right in our thinking, they'll pay for themselves over and over again. Research has long been considered an essential activity for any business which hopes to win the public
DENVER...

nation's fastest growing area!

Colorado, in the heart of the Rocky Mountain West, is a part of the fastest growing area in the United States.

Men such as Walter C. Crew and G. B. "Gus" Aydelott represent Denver-based companies contributing to Colorado's growth. In ten years the Denver & Rio Grande Western Railroad has located 115 new industries on its route. The Denver Union Stockyards, the largest sheep market in America and one of the world's most important livestock centers, exceeds $1 million in receipts each marketing day.

favor. Again and again you'll hear executives of big business concerns say that most of their revenue today comes from products that weren't in existence 10 years ago. In every business but show business, that is.

"Show business is completely frivolous. Instead of audience research, it spends its money on producers' hunches and it's no secret that even the most successful producers have their failures, far too many of them. Well, Daystar is going to be different. We feel it's just good business sense to do a little research to find out whether we're spending our production dollars as wisely as we might be."

'Hootenanny' replacing 'Mr. Smith' on ABC-TV

Folk music is coming to ABC-TV. The network announced that Hootenanny will be slotted in the 8:30-9 p.m. period on Saturday, starting April 6, with Jack Linkletter as host of the weekly show. It had been reported some months earlier that the series would be placed on ABC-TV probably as a replacement show. As such, it replaces Mr. Smith Goes to Washington, which made its entry this season.

Among the talent: The Limeliters, the Clancy Bros., Theodore Bikel, the Chad Mitchell Trio, Miriam Makeba and others. Advertisers are Chesebrough-Pond's Inc., through Norman, Craig & Kummel; Polaroid Corp., via Doyle Dane Bernbach, and the Procter & Gamble Co., through Dancer-Fitzgerald-Sample.

Embassy sales near $1 million in first week

Almost $1 million in sales were completed during the first week that the Embassy feature film package was offered generally to tv stations, Joseph E. Levine, president of Embassy Pictures Corp., announced last week. The sales were made to WNBQ (TV) Chicago, WXYZ-TV Detroit, WBNS-TV Columbus, WTIC-TV Hartford, WBAL-TV Baltimore, WTTV (TV) Indianapolis and WKZO-TV Kalama-zoo, Mich. Prior to the general release, the package of 33 features, which include Hercules and Attila, were sold to WOR-TV New York and KJH-TV Los Angeles.

NBC-TV renews Carson

Johnny Carson has signed for a renewal of his contract with NBC as host of the Tonight Show starring Johnny Carson for a year, effective April 1, Walter D. Scott, executive vice president of NBC-TV, announced last Wednesday (Feb. 13).

KXYZ changes format to suit listeners

'QUALITY PROGRAMMING' MOST REQUESTED IN HOUSTON

KXYZ-AM-FM Houston, anxious to cater to the programming desires of its community, asked listeners to state their preferences and pledged that it would abide by the decision of the majority. On two separate days KXYZ placed questionnaires in two Houston dailies and within a week 2,063 responses were in—with a majority clamoring for more "quality programming."

KXYZ has changed its programming accordingly.

The newspaper questionnaires listed 13 program categories, ranging from classical music to humor shows, and asked respondents to check columns marked "more," "less" or "leave unchanged." With responses still coming in, KXYZ reported that a "scant" 10% asked for top-40 fare, while the majority wanted classical, show tunes and standards.

Agricultural, religious and foreign language programming, in that order, were the categories least liked by respondents. Interest in humorous dialogue was also low, and true to its word KXYZ promptly switched a week-day light patter show, which it had begun only on Jan. 1, to a week-end slot.

A breakdown of the questionnaire received by Jack Carnegie, KXYZ manager, shows only 92 of the respondents were 18 or under. Over half of these wanted less top-40. A total of 1,087 males and 976 females mailed in their preferences, and three-fourths of questionnaires were from people in the 19-50 age bracket.

Boasting the slogan "the station that listens to its listeners," KXYZ has cut back talk programs, except for informational shows, and scheduled its news on an hourly rather than half-hourly basis. The station is putting an even heavier emphasis on its good music format.

"We went all out to determine the needs and requirements of our listening area," Mr. Carnegie said. "In this way we may be able to find out what our listeners really want, rather than operating on the basis of our estimates of their wishes, or the commission's views."

KXYZ began its questionnaire campaign partly to repackage its programming so it could cope with the FCC's license renewal forms.

Mars adds 18 stations to Dick Clark lineup

The Dick Clark Radio Show has added 18 new stations to its lineup in the past month.

The music-interview show, distributed by Mars Broadcasting, Stanford, Conn., is now broadcast in Cleveland, Cincinnati, Albany, Hartford, Conn., Atlantic City and Trenton, N.J., Washington, D.C., Richmond and Norfolk, Va., Winston-Salem, Mobile, Birmingham, Pittsburgh, Syracuse, N.Y., Knoxville, Tenn., Baltimore, Lancaster and Pitts- burg, Calif.

A new technique has been developed by Mars for the show which makes telephone interviews sound like face-to-face conversations. Both Mr. Clark and the interviewee speak into tape recorders while they are talking on the phone. When the interview is over, the tapes are spliced together in the studio.

'Let's Pretend' changes hands

Television rights to Let's Pretend, children's radio series that ran for 25 years on CBS and garnered more than 50 awards, have been acquired by E. Charles Straus for production by his Century Productions Co. as a half-hour tv series.

Maurissa Jaffe, who had obtained the original Let's Pretend radio scripts from the estate of the late Nila Mack, creator, writer and broadcaster of the radio programs, for tv use through her own production firm, Shadowvision Inc. (Broadcasting, Nov. 26, 1962), has relinquished her rights in Let's Pretend to Mr. Straus, she said last week, but is going ahead on plans to produce another fairy tale tv series utilizing the Shadowvision technique.

Mr. Straus has appointed Sam Neu-

**FINANCIAL REPORTS**

**CBS SETS RECORD INCOME**

1962 net earnings 32% better than '61; sales increase almost $35.5 million

CBS's net income and sales last year were the highest in the company's history, its chairman, William S. Paley, and president, Dr. Frank Stanton, announced last week.

The increase over 1961 alone was an impressive 32%. CBS reported consolidated net income in 1962 of $297,053,734, compared with $220,037,828 in 1961, an increase of $7,015,906.

CBS also reported that consolidated net sales moved upward from $473,843,945 in 1961, to $509,269,813, an increase of nearly $35.5 million.

CBS announced that per share earnings were $3.27 in 1962 as against $2.47 per share, a figure adjusted for stock dividend, that was earned the previous year. Cash dividends of $1.40 per share plus a stock dividend of 3% were paid in both years, the company noted.

The record earnings were announced Feb. 13, the same day that the company's board of directors declared a first quarter cash dividend of 35 cents per share on common stock, payable March 8, 1963, to stockholders of record at the close of business on Feb. 25, 1963.

**Ling-Temco-Vought seeks registration from SEC**

Ling-Temco-Vought Inc., Dallas, Tex. (electronics, aircraft, missiles, ...) has filed with the Securities & Exchange Commission seeking registration of $23,264,000 in 4 3/4% subordinated convertible debentures and $33,994,000 in 5 1/2% subordinated debentures.

The company proposes to offer these debentures in exchange for outstanding 5 1/2% convertible subordinated debentures and 5 1/4% convertible subordinated debentures both due October 1971, originally issued by Temco Aircraft Corp.

Under terms of the exchange offer, the company will issue $40 of the new convertible and $60 of the non-convertible debentures for each $100 of the old 5 1/2% debentures tendered for exchange, and $50 each of the new convertible and non-convertible debentures for each $100 of the outstanding 5 1/4% debentures. Lehman Bros. will form and act as manager for a group of dealers planning to handle the offering.

**NGC's first quarter down**

National General Corp., Beverly Hills, Calif., 38% owner of National Telefilm Assoc. and owner of five cab systems, reported net income for the first quarter of fiscal 1963 ended Dec. 25, 1962 of $269,828 (9.5 cents a share), compared with same 1962 quarter's $382,390 (13.5 cents a share). Last year's quarter, however, included a non-recurring gain of $411,270 from the sale of Cinemiracle production equipment, which resulted in an operating loss of $28,880. Total income for NGC's first quarter was $100,046,084, compared to $9,853,388 for the like quarter in the preceding year.

**Disney net profit down; tv revenues increased**

Walt Disney Productions had a net profit after taxes of $1,304,473 (76 cents a share) for the quarter ended Dec. 29, 1962. Lawrence E. Tryon, treasurer, told the annual stockholders' meeting Feb. 5. This compares with last year's first quarter net profits of $1,669,213 ($1 a share). Gross revenues for the quarter totaled $15.3 million, against a gross of $15.6 million for the same quarter of last year.

Tv revenues were up by $500,000, chiefly due to the syndication of Mickey Mouse Club; amusement park revenues were up by $200,000 and miscellaneous revenues by $500,000, but theatrical motion pictures brought in $1.5 million less than in that quarter a year ago.

**Financial notes ...**

Quarterly dividend • The board of directors of Chirurg & Cairns Inc., New York advertising agency, voted to declare a regular quarterly dividend of 12 1/2 cents per share, payable March 1, 1963, to stockholders of record on Feb. 1, 1963.

Six-month report • Wrather Corp., Los Angeles, whose subsidiaries include Muzak Corp. and tv and motion picture program properties, has reported six-month net income through Dec. 31, 1962, of $405,279 (23 cents per share). Gross income for the period was $6,-157,293. Figures for the same period of 1961 were: gross income $6,141,-145; net income, $301,504 (18 cents per share).
Radio-tv outlook good, no matter what

EVEN IF ECONOMY FALTERS BROADCASTING PROMISES GAINS IN BILLINGS

Students of business cycles are showing a certain amount of wariness these days, not because the national economy’s behavior is bad, but because they can’t quite explain it. In a way the same is true of the television economy and, to a lesser extent, radio’s.

Television and probably radio seem apt to show at least modest billings gains in 1963 no matter which way the economy bounces, but in some respects nothing seems to be working according to the usual rules.

- The general economy was supposed to sag a little the first of this year, but it didn’t.
- It previously had been given big doses of stimulant, especially in the form of government spending and tax-law revisions to encourage plant and equipment expansion, but it had not responded as it was expected to.
- Television, which came out of the 1958 recession with a noticeably reduced growth rate, theoretically should have emerged from 1960-61’s downturn with a rate of gain about equal to that of the “mature” media. Instead, it came out moving much faster than either its print brethren or its own 1958-60 track record, and has picked up steam ever since.
- Radio’s figures are a little vague, but after an uncertain third quarter of 1962 it steadied and then, while a first-of-the-year slack-off was still being predicted for the general economy, it began to rally and now seems off to the best first-of-the-year start in recent memory.

Such a collection of unpredictable performances is enough to make a soothsayer turn in his crystal ball and chicken entrails, but it has a bright side:

No matter what happens—unless all precedents prove meaningless—the economy stands to lose not much and maybe even gain a little, while television almost certainly, and radio probably, stand to gain at least a little and conceivably could gain a lot.

To some extent this appears to be the outlook for other major media, too. They seem to be enjoying at least some of the benefits—whatever causes they stem from—that are currently casting a warm glow over broadcasting. There is a body of opinion which holds that, even though precise reasons are hard to pin down, 1963 simply looks to be a good year for the entire advertising business.

Recession Is Possible * There is nothing to rule out a slight general recession even at this late date, and since the present fair weather followed predictions of cloudy weather, it is conceivable that the same hind-side-to phenomenon may lead the current mildly optimistic outlook into unexpected precipitation.

Even at worst, however, economists concerned with the broadcasting climate seem generally agreed on two points:

1. A general economic downturn, if one comes, will be mild; and
2. Television business probably would increase even in the face of a mild setback in the general economy, though it obviously would stand to gain more if the economy should rise or hold steady.

Authorities feel, however, that the range between top and bottom of what the economy is apt to do in the next few months is narrow. They don’t expect the trend-line to swing much either way, up or down, and thus there is not a big difference between the top and bottom of their predictions for television, either.

Dr. David Blank, head of the CBS Office of Economic Analysis, told the CBS management in a report last fall, when he and most other economists thought a mild recession would develop in early 1963, that he looked for 1963 tv billings gains of “four or five percent, maybe three.”

Revised Forecast * Now, since the bad weather has failed thus far to materialize, he has revised “four or five, maybe three,” to the slightly more op-
Upward and onward is the march of network television gross billings, shown in total in the top line and for the networks individually in the lines beneath. Though there have been occasional downturns, the trend thus far has always righted itself. The figures, adjusted to account for seasonal variations, cover the period from January 1956 through November 1962. Chart was prepared by CBS Office of Economic Analysis.

It's been downhill most of the way for network radio billings for more than decade, according to this index (1947-49 billings assumed to equal 100) by CBS. But authorities feel that, if general economy holds up, network radio may join spot radio in substantial 1963 gains. Seasonally adjusted data to third-quarter 1962.
Radio spot net time sales—seasonally adjusted quarterly figures, 1958-1962

Ups and downs of spot radio’s net time sales are shown here: dotted line depicts seasonal fluctuations in reported dollar figures; solid line shows trend with seasonal variations taken out. Figures for last half of 1962 have not been released; third quarter may have slipped but fourth quarter gained substantially.

Network radio, whose quarterly sales charts over the last 14 years resemble a series of rickety ski-jumps, is starting 1963 with more promise than is usual for this time of year. Some authorities believe that if the overall economy holds up during the first half of 1963 and advances during the second half, then network radio this year may show the first significant gain it has made in a decade and a half.

Favorable Factors * The factors favorable to the economy’s expanding over the next 12 to 18 months, assuming it gets through the next few months unharmed, are regarded as strong:

The wartime baby boom is today’s marriage boom, with more and more new families getting started; the domi-

Television spot gross billings—seasonally adjusted quarterly figures, 1956-1962

Steady rise in spot tv’s gross billings from 1956 through third quarter (latest available) of 1962 is depicted in this chart. “Total” lines show dollar figures as reported from quarter to quarter (dotted), and as those figures appear after adjustment to eliminate seasonal variations (black line). The lines beneath trace daytime and evening spot billings separately, after seasonal adjustments have been made. Chart is from CBS.

* In 1948 FCC reported only "total revenues" (from time, talent and services) from "network programs" and from business "sold directly by stations." Hence figures for that first year of television financial reporting are not comparable with figures for time sales in ensuing years.

† 1962 figures estimated by Broadcasting.

As the tables above and at right clearly show, 1962 was the comeback year for both radio and television. Neither medium had done especially well in 1961: television's curve had flattened out with a gain of only 1.2% over the year before, and radio's actually dipped in a decline of 0.9%.

But the curves were rising again in 1962. Television came in with total time sales nearly $117 million bigger than they were in 1961. Radio's sales rose a healthy $57 million.

These are Broadcasting estimates of net time sales after all frequency and promotional discounts but before deduction of commissions to advertising agencies and station representatives. They are comparable to the records compiled annually by the FCC. The FCC reports for 1962 will not be issued until late in 1963.

Television • There were no soft spots in television's totals in 1962. Network sales rose by $34 million, spot sales were up $60 million, local sales were up $22 million. In none of those categories had television shown an appreciable gain in 1961, and in one, local, volume had declined.

Radio • Local advertising, radio's biggest source of revenue, continued to rise faster than either network or spot. Local business was up $42 million over 1961, spot was up $12 million, network was up $3.5 million. The year before radio had slipped in both local and spot.

As 1963 got underway, all signs pointed toward an even stronger showing this year.

The 1962 Broadcasting estimates of radio and television time sales were compiled from a survey of stations, as they have been annually since 1935. Tabulations were prepared by the Washington firm of Sinrod & Tash, certified public accountants.

nant age group in the total population is becoming younger, shifting downward to the 20- to 25-year range where much new buying is done; apartment house construction is rising; the great volume of plant capacity built up a few years ago is being used up, and tax-law changes are conducive to new expansions of plants and equipment. On top of this comes the prospect of tax cuts this year. This likelihood probably contributed to the brightening of the economic psychology that occurred toward the end of 1962. If the tax cuts materialize they are expected to spark up the economy beginning in the closing months of 1963 (if they don't amount to much, however, reverse psychology may lower the clouds again).

As always, heavy government spending can be counted on as an ever-present stimulant. Perhaps it was more than coincidence that the economists' forecasts for 1963 began to get sunnier at about the time of the Cuban crisis last fall.

Perhaps, too—and this is regarded as mostly speculation—the change in economic psychology played as big a part as anything in the late-1962 improvement in the outlook for advertising in general and broadcasting in particular. It just may have led advertisers to conclude that, with the likelihood of a slump removed, they could go ahead and commit advertising budgets more confidently than would be the case otherwise.

National advertising as a whole was up a little in the third quarter of 1962—somewhat surprisingly and, once again, contradictorily, because the general economy was in one of its sluggish spells at that time. The consensus seemed to be that advertising's overall advance could be attributed in good part to television, which then as now

was performing impressively—more so than any other medium. If the economy can ride out the next few months—and the odds now seem to favor it—there is a consensus that it then will have done something it has never done before: escaped a recession after the usual signs pointed to one. For there is a prevalent belief that, beginning in the fall, things will be looking up for sure and that the chances then will favor a rising cycle until, say, about 1965. The somewhat greater strength which the economy is currently showing is regarded as making broadcasting gains as nearly a lead-pipe cinch as is apt to be found in the unpredictable art of economic prediction. But radio, and especially TV, have certain advantages going for them even if the economic weather turns bad—so long as it doesn't turn too bad. 

At the Worst = First, the effects of a very mild economic decline—and even the pessimists seem agreed that a downturn, on the off-chance that one should occur, would be no worse than very mild—usually are felt most at the production level rather than the consumer level. And mild declines have shown in the past that they hit the durable goods more than the non-durables.

This does not guarantee immunity to television and radio, as past recessions of a more serious nature have shown, but the high level of business that the broadcast media do in the non-durable lines—especially the foods, etc.—takes them out of the front ranks of probable recession victims.

They may not be recession-proof, but they have shown a comforting resilience. On that basis they seem justified in looking into the future with confidence—and, in view of the general economic forecast now, with at least modestly high hopes.

*Data not available.

BROADCASTING, February 18, 1963
Bunker's eye view of RAB's future

NEW PRESIDENT GIVES GLIMPSE OF WHAT'S IN STORE FOR TRADE GROUP

On March 1, for the first time in nine years, top management of Radio Advertising Bureau will change hands.

Kevin B. Sweeney, the colorful, tireless president whose name has been synonymous with RAB and radio since 1954, turned in his notice almost a year ago, effective the last day of this month. To succeed him was chosen, after a long search, Edmund C. Bunker, a suave salesman whose radio-tv experience encompasses all three elements of RAB membership: local station, network, station representation.

Ed Bunker has been on the job since August as president-elect, but during this introductory period he has been careful to keep his plans for RAB to himself. Here, in a tape-recorded interview with Broadcasting editors, he reveals many of those plans for the first time.

The man you are succeeding is a fairly spectacular operator. I wonder if you would outline generally your plans for RAB. Do you expect to do things differently?

The times call for a different approach. When Kevin Sweeney took over leadership of RAB, radio was somewhat demoralized. Some stations were more downbeat than the advertisers they were selling.

It was very much like a battlefield when your side is tecter-tottering between a frightened retreat and an orderly reorganization. Then along comes some officer who gets up on a tank wearing a top hat and waving a shillelagh—doing anything to get the troops' minds off running for the exit.

That can stem a retreat on a battlefield... and morale, esprit, feisty determination can do a great deal for an industry.

But 1963 isn't a time for improvised warfare and communiques designed with the morale of the men at the front in mind. This industry has reorganized and is now growing. It must have an orderly plan for faster growth and it must provide its 'troops' who are, after all, its salesmen, with the most modern weaponry available anywhere.

Excuse me for the rather military analogy but it seemed to lend itself to your question. To summarize, I know that if Kevin Sweeney were coming into the presidency of RAB on March 1 instead of Ed Bunker, Kevin today would use different tactics.

Kevin certainly recognized the changing times and implemented major programs as part of an over-all plan for radio growth. The Radio Test Plan, an ingenious conception which I enthusiastically support, is just part of the new national business-building strategy which had to be introduced as the times changed. The Department Store Challenge, which has been responsible for important gains in billings from all forms of local advertisers, is another of Kevin's major efforts in the modern selling of radio we have been discussing.

Certainly the industry acknowledges Kevin did a fantastic job of providing radio with color through his own color and with determination to be heard at a time when it was often difficult to get a hearing for radio.

What are some of the ways in which you intend to operate differently?

The changes will be in emphasis and in style of operation as well as in the development of a number of major new business-building projects.

I feel that there are limitations on what I can discuss before taking over and I might just as well start by being quite open about it—I don't know how much money I have to work with to provide added business-building projects.

If some of the major entities in the industry I have been talking to become a part of RAB and add their support to the many leaders in radio who are with us now, if we have the dollars, then RAB can remain the most advanced of all the media associations in its sales effectiveness. If we don't have all of the dollars at first that I and my associates believe we need to do the big job, then we will proceed more slowly.

From every indication that I have had we are going to have new and rather expanded support. But I prefer to be conservative and not make pronouncements until the facts are doted. I hope, in fact, to see RAB and radio generally emerge with what might be called a more conservative personality.

Would it be in keeping with that conservative personality to lift a corner of the curtain and mention where you would put some of the new dollars if they become available?

I have now broken the world's indoor record for the shortest length of

don't care if the industry throws money at us and inundates us with a budget double where we are now, RAB is never going to have the manpower to outlast an agency which is determined to change a client's thinking. We are either going to enthrone the agency, as well as the client, or we are going to find ourselves building castles in quicksand.

In the years since RAB was initially organized, advertising has changed enormously. We went from an advertising "economy" of $6 billion spent annually for all forms of advertising up to today's $12 billion.

Now that kind of growth means one thing: Everyone concerned in the advertising process has greater responsibility within the structure of business. Perhaps a substantial portion of decisions were made 11 or so years ago on the impulse of an individual; but the number of such decisions being made today is approaching a vanishing point.

We still have the one-man corporations today. I acknowledge that. But go back to those companies five years from now and see whether they remain "impulse-buyers" of advertising. We have to face up to the fact that business today is run by groups of people who combine their specialized knowledge—and their talents—to work out decisions which are large enough to make or break their companies. Companies organized on this operating philosophy—I'm hanged if I'll call it the "committee system" or the "team system"—use their agencies as an extension of themselves. If there isn't that fusion, then the account is "loose," as you say in the trade press. So we in radio either understand the business community as it is today and work with it or we are giving ourselves a handicap.

We don't need any handicaps. I am not going to manufacture any. In fact, I would rather export handicaps than import them—we're going to see if we can't give some of our competitive media a few handicaps to work with.

If we have the wherewithal to do it, RAB will substantially expand the size of its national sales staff so that we can cover agencies deeply as well as advertisers. We believe that more agencies will want us to go with them to their clients as we develop interest at agencies in both the media and the creative story of radio.

RAB has over the years dealt at the highest levels with clients and we're going to continue that basic tactic. The difference I hope to add is implicit in what I have been saying, at I'm afraid very great length, about the differences in business today compared with when RAB was young, back in the days when it was BAB.

So a very major step for us is agency coverage.

What other basic steps do you have in mind?

Another major step, and I regard it as basic to building business, is a breakthrough in radio research.

There's a great opportunity to sell radio now. RAB's Radio Test Plan and some of the research that has come out of it has already been extremely helpful. The carry-over effect of bringing
A typical Kansan? Maybe not. But neither is he the lean, hungry dust bowl inhabitant many people seem to remember.

Kansas is a BIG State, right in the BIG MIDDLE of the U.S.A. From K. C. to Kanorado, on the western border, it’s 410 miles. Kansas is BIG in food production, BIG in wheat, 1st in flour milling and 4th in meat packing. A BIG food market, too. Retail food sales last year were $2,652,979,000—billions, that is!

To sell this BIG market you have to come inside with WIBW air media. WIBW Radio delivers 69 counties, dominant coverage in 45 of them. WIBW-TV dominates in 32 leading Kansas counties. This is the rich, unified Topeka area. Ask Avery-Knodel to show you the big picture.
some blue-chips back into radio and introducing radio for the first time to other leaders through tests helps to stimulate buying action.

It's very clear how this happens. An example. . . . In one of the top two or three agencies RAB recently conducted a very successful test for one of their clients. Before the final stages of the test, as soon as its success was felt, the influence had begun to spread to other accounts. We could see it each time we came back by noticing who was "sat in" on the meetings.

We have some momentum—business is running well ahead now—but we need a major research project designed to document what everybody knows about radio—that it is bigger than any previous research has been able to show. I say everybody "knows" this about radio. They know it instinctively. But it is very difficult to put instinct into a computer.

Radio needs a measure of the total audience—not just "plug in" listening with patchwork additions of other forms of listening. This measure must define the total exposure and show how varying combinations of facilities deliver the audience.

Do you mean that RAB would provide ratings of individual stations or networks?

No, we could not enter that field. Our research can measure the reach of varying combinations of stations as a guide to principles of using the medium but it is certainly not our function to provide individual station or network data.

What is needed is a new yet very basic addition to radio research—pre-acceptance.

There's no wisdom in kidding ourselves. We need a measurement of radio whose methodology is approved in advance by leading agencies. From everything we know, it's apparent that soundly conducted research must benefit radio. With agency pre-acceptance—an agency role in constructing the research we provide—radio can take a new stance in its selling.

Undoubtedly there will always be a variety of rating services measuring radio. But what if each of them found it necessary to improve their measurement techniques and thereby report substantially increased audience? We know from our research that a several-fold increase in the audience ratings services report for radio is well within the bounds of probability. Research which agencies, and their clients, develop with us can have the stature to produce this side-effect on the ratings services. But its main purpose would be to justify larger use of radio which many today feel can be substantiated only by judgment.

I for one believe we already have more research in radio than most other media offer. But what I believe is not to the point. Our "consumer"—the agency and advertiser—doesn't always believe it and he pays the bills.

Do you believe agencies will help pay for such research?

It would be unrealistic to predict their reaction now. We anticipate that this can be the warranty, if you will, on pre-acceptance. We would like to see it work that way even if the expenditure from the agency side is minimal.

Do you see RAB placing more emphasis now on national business?

The business of RAB is to produce more business for radio. At the end of the year, when the profit dollars are counted up, no one cares as much about the percentage of those profit dollars as they do about the amount.

I believe local and national business have a very definite relationship. If we generate more national dollars through more productive selling efforts nationally—and through major research—the benefits are of direct local importance. The company which is sold nationally is unlikely to have a co-operative advertising policy which excludes or restricts use of co-op radio.

Moreover, the research I referred to just a few minutes ago is intended as a local sales tool as well as a national sales tool. Because of size of sample, it will be possible to demonstrate reach and frequency by varying market sizes down to the smaller cities as well as regionally.

Very definitely I don't intend to put all of RAB's emphasis on one source of dollars to the exclusion of another. As a matter of fact, I feel that we must step up our local selling effort through specialization. We plan to split RAB's operations into a "large-market" and a "smaller-market" division.

This will permit maximum utilization of the sales tools, sales ideas, and sales service RAB provides its members. Obviously not everything produced under our present operation can be pertinent to each market size and type of station. The local specialization we plan will adapt RAB more closely to needs of the different types of stations whose support an industry trade association must have. We must serve both the small markets and the large markets but the job isn't the same. I know that because I have sold radio in small cities as well as "on the street" in large markets.

You used the word "style" back a while ago. You said your "style" would be different. What is the Bunker style?

You've heard of Bunker Hill . . . We don't shoot until the Redcoats are close enough to hit. Seriously, I think style is a matter of individual personality. In my case it will not be the personality of just one man, not just of Ed Bunker. I don't run a one-man show. I have inherited a very able executive staff, perhaps a staff whose contributions were sometimes less visible than would have been the case if they were not operating on the lee side of a volcano.

I will use that staff to build and train greater depth of personnel. It is always a fiction that any organization is "just one man" and certainly so in the case of RAB as I have come to understand by working more or less in the ranks during my indoctrination period.

I see myself as free to operate on the highest level in major sales efforts and policy-making. I inherit in Miles David, as administrative vice president of RAB, an extremely effective and enthusiastic right-hand for both general management and creative planning. I plan to promote Robert Alter, presently manager of key account sales, to the new position of vice president and director of national sales. Bob has had a major role in selling on the national level which will expand as the staff expands. And to strengthen RAB's ability to bring in new station membership around the country, I have brought in Harry Averill as vice president and director of member development. Harry has had long experience in station operation in a variety of market sizes and has trained and put into the field a staff to represent RAB in major regions of the country.

What are some of the major business-building projects which are in the planning stages?

For a dyed-in-the-wool conservative
when you think
NEW YORK RADIO

think
wmca 570
just a few minutes ago, you sure want to put me out on the end of a branch. Actually, I am very glad to have the opportunity to do some curtain-lifting. We are very enthusiastic about the job there is to do in radio. But I very definitely want to promise less and deliver more. That's one reason that I hesitate to simply throw open the curtain and say, "This is the complete program." But assuming we have the funds to add the people and the investment, these are some of the major needs I see RAB filling.

1. A tangible RAB contribution to making radio easier to buy. Management consultant studies are needed on how radio is bought so that we can pinpoint archaic practices and sources of waste-motion. If radio is a greater predictor of costs for the agency, why is this so? Is it inherent in paperwork that "must" accompany buying? Or is there an element of inexperience in buying radio which creates cost?

It will take a systematic task-force effort with the advice of a committee of experienced national sales executives—plus management consultancy-style investigation—to make progress. If rate cards are too cumbersome for our customers, we must set a practical standardization goal. Of course, the industry will never get behind one type of rate card. But can we narrow it down to four basic types with a number of sub-types growing out of the four basic types? That would be a vast improvement over today's multiplicity of rate card philosophies.

I am referring here to the way in which the card is set up—not to the amount of the rates or to any other aspect of rate management. In other words, I am talking about the fundamental fact that it takes too much time to work with rate cards when there could be lots of standardization without impairing individual strengths of stations.

2. Published figures on advertiser expenditures in radio. All it takes to provide this vital and fundamental data is money. I believe we must have the facts or radio suffers badly even though the suffering is somewhat difficult to measure specifically. When other media's expenditures are shown in a listing and there's nothing for radio, we don't look like the Green Bay Packers.

3. Creative stimulation for agencies. Radio is the best way to sell that's ever been invented. Those who know how to create great radio commercials are doing the best creative advertising—bar none—of any done in all media. You can tell what it's like to relieve a cough, or paint with a certain color, or use longer-lasting motor oil, through direct impact on the imagination by radio.

But radio hasn't been the "in" medium at many major agencies. That's not their fault—it's ours. So what do we do? We certainly don't cry into our mugs of beer (today's beer commercials are some of the greatest). What we do is go out and stimulate creative use of radio by bathing agency creative men in examples of great radio salesmanship.

4. Computer-conscious research. Radio has a long lead on other media because we are already measuring consumers rather than bodies. RAB's on target research is the first practical measurement of customer media exposure. That's the kind of data that makes use of a computer worthwhile.

Our research will continue to emphasize consumption data. We are of the belief that media—as well as major agencies—will have to operate mathematical models for use in media reach-frequency-impact prediction. We have a leg up on others in the gathering of the appropriate computer-age data.

5. Development of the full potential of retail business. The surface hasn't been scratched yet in retail business expansion. The department store challenge provides radio with a great sales tool and one which has already created a tremendous amount of business. But there are still many areas in retailing which need measurement.

What does radio do for sales events specifically? How much does radio contribute to creation of new customers? These are new areas of research and proof for the future. The proof that radio sells items is not the full story, particularly when in their use of printed media stores are beginning to recognize the importance of so-called image-projection.

6. Many stations need a local copy service. Can we provide it? Perhaps we have to do the job. It is at any rate one of the projects we are considering.

7. A way to bring radio presentations to regional sales offices of major manufacturers is needed and RAB must lead without dissipating its own efforts. Realistically, we can't call at this level. But can we create big-league presentations in slide-and-tape form which stations can take to regional offices and jobber distributors? I believe we can. I believe we must add grass-roots pressure upward to what we do from the top down.

That's an ambitious program. How much traveling do you plan to do in order to implement the program and explain it?

I probably won't travel as much as Kevin Sweeney did but I will be on the road almost half the time. More important than travel alone, however, will be increased efforts on our part to communicate what we are doing to stations as well as agencies and advertisers. This was a somewhat under-developed area in RAB's past operations. It created unnecessary problems.

What has been your reaction to radio on coming back into the medium?

Actually, I have never been very far away. Even during the time I was with WBZ (TV I had a very lively contact with the radio business. It isn't generally known but I had an interest in a radio station in a small-to-medium market and that was just one of the respects in which I was able to follow the rapid changes in radio which occurred during the '50's.

I, at one time contemplated entering radio station operation, frankly because of the capital gains opportunities I felt were inherent in the medium for the operator who understands today's radio. And as executive vice president at the Froedert Malt Co. I tried to take the entire brewing industry into a heavy nationwide radio campaign and out of television. I made a thorough study of the potential of the two media I knew best and concluded that radio was the medium that offered the greatest sales effectiveness opportunity.

I believe that our competition with television, as with all other media, ought to be conducted on the highest level. But I think my former associates in television deserve fair warning that the punches will be rather frequent and from what I have seen about the available evidence on radio vs. tv effectiveness, I feel I got out of television just in time.

To be more serious, I do feel our medium is exciting and the biggest single opportunity for advertisers in the media spectrum. We are literally undiscovered because television has magnetized attention in disproportion to its media effectiveness—and because of the almost unbelievable inadequacy of radio ratings. I say that with some perspective and I intend to put my perspective about the inherent weaknesses of television to very active use.

What's going to happen is that as the understanding of radio begins to grow, a number of major corporations are going to make substantial entries into the medium. But I believe our future is in the best if not in the biggest budget from major advertisers—with use of radio as a major medium—and in numbers of accounts. We have to have both. We deserve both and we're going to get both. Radio must never again be in the position of having its business dominated by 30 accounts. But it also needs the blue-chips and...

can't depend entirely on the medium- and small-sized companies which have been the bulk of our national business in recent years.

Is so-called overpopulation of radio stations a problem?

It isn't RAB's function to concern itself with things we can't change. Sure it's a "problem." But our job is to make the problems into advantages. And in actuality the fact that there are lots of stations for advertisers to choose from is a major advantage of the medium. It gives the advertiser the opportunity to choose the right combination of stations for his type of product.

What RAB has to do is to make it clear how tremendously successful advertisers are when they take this tack so that we can cut through all of the loose talk about how the misery of choice is bad for advertisers. Its never "miserable" to choose when you appreciate that the results justify the effort.

So to the extent that RAB enlarges the market for radio we provide a larger pie for the stations to divide. That's our function and we either perform it or they need another crew to run it. I'll be that plain-spoken. If a station is in radio, it ought to be in RAB, and I am going to be making that point "with vigah" in lots of places over the next six months.

Can I put the pitch in here because I've been so conservative?

Is there any way you know that we can stop you?

No, because this is so important. I need the support of a rather diversified industry. I will work my tail off to do the job that needs doing. Miles David and Bob Alter and Harry Averill will work their tails off.

We are open and receptive to every constructive idea from any corner of the business. But its just plain economic imbecility for radio men to go off in 500 directions at once. Either get behind us or petition for a change in the management and get someone you can believe in!

I mean that straight from the shoulder. I'm appealing for unity and perhaps because I'm entering into RAB newly, I'm getting the fresh support we have to have. It's good to see the progress we've made so far.

But big growth for radio is a reality only if we stop fighting one another and charge right at television and newspapers and magazines and outdoor, in that order. RAB is the logical center and we believe the circle around us will get bigger rather rapidly.

FCC weather: no change in temperature

ALL SIGNS INDICATE REGULATORY OUTLOOK WILL CONTINUE BLEAK

"This is an activist commission," an FCC official said the other day, "We're not about to sit back and simply renew licenses automatically, then react only when the top blows off some scandal. We're determined to regulate broadcasting in the public interest."

Although this statement must be discounted for what the Federal Trade Commission would call "puffery"—after all, this FCC hasn't been able to do much about its backlog of cases; some stations are required to wait years for decisions which an "activist" commission should be able to reach in a matter of months—most broadcasters would agree there is considerable truth in it.

For more than two years, the FCC has been prodiging broadcasters on programming, even at the risk of what at least one commissioner, Rosel H. Hyde, considers to be censorship. It has held broadcasters to a strict accountability on the programming performances they make. It has cracked down as never before with license revocations and other sanctions on stations that broke its rules. And it has conjured up new rules and regulations that add to the problems of station managers and owners.

What's more, no one believes this to be a transitory phase that would end if, as reported last week, Chairman Newton N. Minow leaves Washington this spring to take a high executive position with the Encyclopaedia Britannica (Broadcasting, Feb. 11). The commission can be expected to be just as activist, its regulation just as tough, its interest in programming just as great.

Minow Image • Chairman Minow has been most closely identified in the mind of the public and the broadcasting industry with the commission's policies. He has been the most enthusiastic regulator on the commission, and his speeches and Capitol Hill appearances have won him a following among the public as well as the respect of a number of key congressmen.

Ultimately, however, responsibility for the tough line being pursued by the commission rests with President Kennedy. It was, after all, the President who appointed Mr. Minow and who, for the past two years, has given no indication of disapproval of Mr. Minow's criticism of the broadcasting industry and in his efforts to induce broadcasters to put on more public affairs programs, to reduce violence, and to institute better children's programming.

Additional evidence of the administration's interest in developing an aggressive FCC was provided last summer, during the debate over the communications satellite bill. One of the major arguments against the measure was that the commission wouldn't, or couldn't, discharge the responsibility it would have for regulating the newly proposed communications satellite corporation. Attorney General Robert Kennedy, appearing before the Senate Foreign Relations Committee to defend the bill, said if the commission isn't able to protect the public interest, the answer isn't new legislation but "new people on the FCC" (At Deadline, Aug. 6, 1962). New Appointments • The implication was that new people would be tougher administrators. And since then, the President has had the opportunity to make two new Democratic appointments—E. William Henry, who succeeded John S. Cross on Oct. 2, and Kenneth A. Cox, now chief of the Broadcast Bureau, who is due to replace T. A. M. Craven. Both are liberals who believe in broad regulation of the broadcasting industry.

The appointment of Mr. Cox was particularly chilling to sensitive broadcasters. As chief of the bureau, Mr. Cox favored adoption of a program reporting form that has been opposed by the industry. He has also played an important role in two controversial commission activities—its local-programming investigations in Chicago and Omaha and the staff inquiries into the programming policies of stations seeking renewal (Broadcasting, Dec. 3, 1962).

(One commission official, however, feels Mr. Cox might not turn out to be quite the "tiger" some broadcasters expect. "It's one thing to make recommendations while a member of the staff," he said, "and another to deal with these matters as a member of the commission where he'll have to face practical realities.")

Sheridan for Cox • Another pending appointment of considerable importance is that of James B. Sheridan, now special assistant to the chairman, to
The whole market... three states... one million plus homes... one billion plus consumer dollars.

WJAR-TV
When the New Frontier loses FCC Chairman Newton N. Minow (l) with his resignation in May there will still be two Kennedy appointees on the commission—Commissioner E. William Henry (c) and Commissioner Kenneth A. Cox (r). Although Chairman Minow has urged that Commissioner Henry be his successor, many believe the President may name a new commissioner both as a replacement for Mr. Minow and as chairman.

adopted to allow daytime broadcasters to sign on before sunrise. And unless it’s blocked by Congress the commission expects to implement its decision to duplicate 13 of the 25 clear channels.

There are a number of other issues, however, about which predictions are harder to come by—station filing fees, vhf drop-ins, loud commercials, adoption of NAB commercial codes as an FCC rule, and option time.

Programming Issue • Transcending all of these issues is the question of the commission’s interest in programming. This is expected to reach another critical phase when the commission completes work on its long-fought-over program reporting form. Outgoing Commissioner T. A. M. Craven sees this as “the big issue” of 1963 (Broadcasting, Feb. 4). The final shape the program form takes, he feels, will indicate if the commission intends only to determine whether broadcasters have made the necessary effort to assess community needs, or if it intends to substitute its judgment for that of the station operator in deciding what programs should be carried.

The commission in the past 12 months has run into heavy criticism for its excursions into the realm of station programming—its hearings in Chicago last year and in Omaha last month, and its staff’s letters inquiring into the programming policies of stations seeking renewal. The uproar over the local-programming hearings, particularly the one in Omaha, may have killed the FCC taste for any more road-shows. And the commission has already put a tighter reign on the staff’s authority in renewal matters.

But the commission will continue to keep an eye on programming. “If we’re to regulate broadcasting in the public interest,” said one FCC official, “what alternative do we have?” Commission officials realize that there is a possibility of censorship in such an examination. But they are confident that they can stay well back of the line where program dictation, or censorship, begins.

To charges the commission has already crossed that line, officials have a short answer, in the form of a challenge: “Take us to court.” This broadcasters are reluctant to do, and the last to try it, on programming grounds, lost. That was Suburban Broadcasting Co., which appealed an FCC decision denying its application for an fm grant in Elizabeth, N.J., because no effort was made to determine programming needs.

No Hope in Congress • There is little likelihood that broadcasters will find much sympathy on Capitol Hill for the view that the commission is overstep- ping its authority. The two most powerful senators in the area are Sen. O. Pastore (D-R.I.), chairman of the Senate Communications Sub-committee, and Warren G. Magnuson (D-Wash.), chairman of the parent Commerce Committee, and their two favorite administrators seem to be, respectively, Newton N. Minow and Kenneth A. Cox. Sen. Pastore never misses an opportunity to praise Mr. Minow’s leadership of the FCC. Sen. Magnuson, who first brought Mr. Cox to Washing- ton as a special consultant to the Commerce Committee in 1956, sponsored him for appointment to the FCC.

On the House side, Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, is not so enamored of the New Frontier types. But neither is he aware of any feeling that members of Congress are disturbed by the commission’s interest in programming. “If the commission steps too far out of line,” he said the other day, “there might be some reaction. But as of now, there’s no such feeling.”

Congress this year is expected to deal
Just as community leaders at the start of the century turned from the horse and buggy to the automobile—slowly at first, then faster and faster—so today in the Sixties, more and more discriminating Detroiter more and more discriminating Detroiter more and more discriminating Detroiter every day are turning their radio dials to the modern, yet "sound and solid" listening provided by Detroit’s W-CAR. Good Music, hourly News—complete Market Report—and daily Sportscasts—all at Dial 1130 are carried throughout the Eastern Great Lakes area by W-CAR’s 50,000 watts.
Any kind of one-night stand is easier

Because Air Express delivers overnight...anywhere in the USA

Props and costumes...TV tapes...musical instruments...whatever—Air Express will deliver them tomorrow...anywhere in the USA.

Here's how easy it is to assure dependable, on-time delivery of whatever must be sent in a hurry. Phone the local REA Express office for Air Express service. Then we'll pick up your shipment...put it on the first flight out...and our trucks deliver it where you want it the next day...anywhere in the USA.

Cost? Less than you think. For example, 10 lbs. travels 1,049 miles for only $5.06.

Air Express alone can offer this service, because only Air Express has scheduled service between 2,500 airport cities...plus scheduled surface express connections with another 21,000 off-airline cities. And Air Express shipments have official priority with all 38 scheduled airlines—first cargo aboard after air mail.

Specify Air Express always—for rush inbound or outbound shipments. Call your REA Express office for Air Express service.
with a number of issues of interest to broadcasters. But no one expects the 88th Congress to be as productive in communications legislation, as the 87th, which passed four major bills—FCC reorganization, the all-channel-receiver, aid-to-etv, and communications satellite acts.

The major issue left over from the 87th involves liberalization of the equal-time section of the Communications Act. Congress will, as a minimum, suspend the act, as it did in 1960, to exempt candidates for president and vice president. But how much further it will go is problematical. Certainly there is virtually no sentiment at this point for outright repeal. With their own political fortunes at stake, there aren't too many members of Congress ready to give broadcasters that much freedom.

Senate to Act First • Sen. Pastore, who has backed liberalization of the political broadcasting law, will take the lead in Sec. 315 legislation this year. In preparation for hearings to be held by his subcommittee, the FCC staff is compiling a report on political broadcasting in 1960 based on a survey of all broadcast licensees.

The two major items in the FCC's legislative program are catv regulation and direct-to-home satellite links. Neither one seems to have much chance of enactment. Mr. Harris has spoken out against catv regulation, at the con-

vention of community antenna tv operators in Washington last summer (Broadcasting, June 25, 1962), and his opposition alone should be enough to kill it. The other day, however, he seemed to soften his stand. "I'd want to see the proposed catv bill before taking a position on it," he said.

Sen. Pastore has practically assured the commission of a hearing on a proposal for network regulation, and the FCC can be counted on to make the strongest case it can for direct control of chain broadcasting, basing its case on its extensive study of network programming. But there doesn't seem to be the kind of interest in the proposal that's needed to push it through this year.

Another legislative proposal still under consideration by the commission would eliminate the "anti-Aveco" amendment which prohibits the commission from ordering competitive bidding in station sales. The FCC hasn't yet agreed on the final form of its proposed bill, but most commissioners reportedly feel the agency should have more freedom of action in deciding how to proceed in station transfers.

Other Issues • These aren't the only issues likely to involve broadcasters on Capitol Hill this year. For more than a year, investigators of the House Regulatory Agencies Subcommittee have been gathering information on broadcast rating services. Their material is now ready to form the basis of hearings that could, reportedly, produce charges of fraud, or ineptitude, on the part of some services. About all that's needed for the hearings to start is the setting of a date by Rep. Harris, subcommittee chairman. Another House subcommittee—the antitrust and monopoly unit—is scheduled to launch next month its long-heralded hearings on concentration of news-media ownership.

Still awaited, meanwhile, is the report of the Senate Juvenile Delinquency Subcommittee on its expensive investigation during the last Congress of sex and violence on television. The report, which Chairman Thomas J. Dodd (D. Conn.) has had in his possession for at least a month, reportedly says network officials have ordered programs spiced with sex violence to boost ratings, and recommends that any duplication of the networks by the FCC

It appears, then, that broadcasters looking to Washington these bleak February days, hoping to find a break in the regulatory weather, will be disappointed. Congress will continue to probe broadcasters, the FCC to prod them. The commission, moreover, will also continue to crack down on stations that violate its regulations, to urge broadcasters "to do better," and to express deep interest in local programming. For although Mr. Minow, the leading actor on the FCC stage, may leave the show in mid-run, the script that's been written over the past two years isn't going to be changed.

Advertising getting bigger and bigger, Doherty believes

What is the outlook for advertising in the next decade? According to Richard P. Doherty, president of TV-Radio Management Corp., Washington, advertising expenditures by 1973 will be approximately $18 billion to $18.5 billion compared to 1962's $12.45 billion.

Mr. Doherty, in a speech last week to the Television and Radio Advertising Club of Philadelphia, based his prediction on a projection of the Gross National Product (adjusted upward by expected cumulative inflation) by 1973 of $815 billion to $825 billion.

According to Mr. Doherty, all advertising in the past 10 years has stayed within a 2.2% to 2.4% range of the Gross National Product. He predicts that during the next 10 years, the U.S. will have an average annual economic growth rate of 3%. He qualifies this prediction with an allowance for cyclical variations. "During some periods, we should experience certain years with a 4% to 6% annual expansion but, likewise, there will be some years of economic decline or periods of relatively no statistical achievement.

Mr. Doherty sees no reason for advertising's 2.2% to 2.4% ratio of total advertising to GNP "to be altered materially.

For the more immediate future, he predicts that advertising will approximate $15.5 billion in 1968 (GNP for 1968 will be about $685 billion to $690 billion.)

A Warning • Mr. Doherty warned that his advertising predictions could be reduced if either one of two developments takes place: restrictive legislation against advertising in general or a given advertising medium, or an enlargement of the governmental sector (or percentage) of GNP due to an intensified cold war or hot war threats.

It's obvious to Mr. Doherty that expanded governmental economic activity does not directly generate larger advertising expenditures "except to the extent that governmental economic activity and governmental spending indirectly stimulates consumer income and consumer goods production." In a war economy, the private consumption sector is reduced so that in World War II, advertising fell to 1.3% of GNP (compared to the 2.2% to 2.4% of recent years).

Mr. Doherty believes, if advertising is to play a progressive role in the economic growth of the nation in the next 10 years, "drastic and substantial changes will be forced upon the advertising industry."

Advertising, Mr. Doherty concluded, "is a positive ingredient in the dynamics of American economic growth." If it is to serve its national purpose, "it must, itself, be dynamic, creative, aggressive and progressive and it must adapt itself to the habits and interests of the public."
Successes this year; which will they be?

THE HOT CAMPAIGNS OF 1962 SET MARKS FOR 1963 ADVERTISERS

What will be the big radio and television advertising success stories of 1963?

The field of prospective contestants for the honors is beginning to assemble, though it is still too early to tell which are apt to emerge at the end of the year with the winners' laurels.

In this contest there can be prizes for everyone, with rich purses—in the form of increased sales—not only for the winners, but even for the also-rans. A 10 or 15 or 30% sales increase can be as overwhelming for a little advertiser as for a giant.

The dark horses sometimes win the roses going away, as Lestoil did in television a few years back, and as countless advertisers have risen to prominence in radio down through the history of that medium. But the handicappers have to favor the known entrants, not because dark horses can't win, but because by definition they're largely unknown.

Thus in radio close followers of advertising planning rank these among the probably top spenders of 1963 and accordingly in contention for top returns in sales:

Pall Mall, Reynolds Tobacco and, in fact, practically all of the leading cigarettes; Humble Oil and Standard Oil of Indiana; Ford, Chrysler and General Motors; Budweiser, Carling, Balantine, Miller and Rheingold beers; Sterling Drug and Bristol-Myers; Campbell Soup, National Dairy and Accent; Tetley and Salada teas; Cream of Wheat cereal; Union Carbide and Du Pont, and American, Delta, TWA and United Airlines.

In television, authorities of the Television Bureau of Advertising attempted to sort out advertisers who seem apt to go deep into television in 1963 after relatively little or no tv activity in recent years.

Tv Nominations • Among their nominations are these: Georgia Pacific Lumber Co., John Hancock Mutual Life Insurance, Wheeling Steel, Upjohn's Unicap vitamins, Institute of Life Insurance (a deepening of its 1962 foray into television) and Borden Co. (probably for its food products, on the strength of tv successes for its Elmer's Glue).

The records of any year are replete with success stories for advertisers who have used television and radio, and 1962 had its share at all advertising levels, national spot, network and local items:

. . . Buick Div. of General Motors used local radio to improve product quality by improving employee morale.

. . . Bankers Life & Casualty Co., Chicago, reported additional gains from another year—its ninth—of sponsoring Paul Harvey and the News on ABC Radio.

. . . Central National Bank of Cleveland picked up a quarter of a million dollars in new deposits in two weeks by using radio and television in combination when the local papers were closed by strikes.

. . . CandyGrams ran out of candy in 10 cities after a St. Valentine's Day television campaign (and 30 days later ran out of red ink to the black).

. . . Allis-Chalmers stepped up the pace that now puts 98% of its advertising budget into television—and boosted sales from $25 million in 1961 to $55 million in 1962.

. . . Sunbeam Corp., after switching its advertising base from predominantly magazines to predominantly television, ran out of products so fast it had to enlist planes and helicopters to speed distribution.

Effectiveness of radio and television in reaching and moving people was demonstrated in many ways, noncommercial as well as commercial. Community chests, Red Cross chapters, other local organizations could cite their own successes to show that radio and television raised money, got the vote, made streets cleaner, promoted traffic safety, passed bond issues, collected blood.

Pascagoula Saga • One of the strongest entrants in the noncommercial proof-of-effectiveness category thus far in 1963 is Ira B. Harkey Jr.'s Pascagoula (Miss.) Chronicle. WNEW New York learned that editor Harkey's paper, in the Gulf Coast town of Pascagoula (pop. 10,800), was faced with economic boycott locally because of its opposition to Mississippi Gov. Ross Barnett's handling of the James Meredith integration case at the U. of Mississippi.

The story was reported on WNEW's early morning Klavan & Finch Show, and Dee Finch said he would buy a subscription to the Chronicle and suggested listeners support editor Harkey. William B. Williams repeated the story several times on his late-morning show, and by the time he left the air more than 500 telephone responses had been logged.

Stark Hubbard, president of International Fiberglass Corp., volunteered to take the $180 a week his company normally spends in the New York Times, then closed by strike, and put it into advertising in the Pascagoula paper. A 10-minute report was carried in an early-evening newscast and 250 more telephone calls came in. Several agencies reported plans to buy Chronicle.

**SHREVEPORT, LOUISIANA**

*Harrington, Righter and Parsons, Inc. National Representatives*
space for their clients.

Two weeks later came this testimonial from the clearly amazed editor Harkey: "Through yesterday, we have received 526 new subscriptions directly in response to your stories about the Chronicle. Total cash and checks, $2, 694.67.

"... heard from several old friends ... many letters from students, religious workers, writers. Much adulation that embarrasses me and I cannot read many of them at a sitting. Have been so snowed that I am unable to write my daily column for the editorial page.

"Most noticeable is fact that all of this mail has not been a single hate letter. I expected some, at least one. So far, none.

"Please pardon me for having thought a few weeks ago that radio was a languishing field. Wow!"

Radio 1962—Campaign 1: V-8 wows the market

Wowing the advertisers is an old story for radio. Among its notable users in 1962 were a vegetable juice that wanted to compete with tomato juices—and a tomato juice that kept its money on radio in fighting back. Other leading successes spanned many fields including automobiles, department stores, airlines and life insurance.

V-8 Story — By common consent one of the leading recent radio success stories is that of Campbell Soup Co.'s V-8 juice, which was having trouble establishing its individuality as contrasted to tomato juice.

While V-8 sales were good and the company satisfied with its magazine advertising for the product, consumer research showed that when people were questioned about the various juices they used, V-8 did not come quickly to mind. The biggest users of tomato juice were also the largest consumers of V-8 juice, the research indicated.

Campbell's agency, Needham, Louis & Brorby, New York, concluded there was need for more frequency in its V-8 advertising and a creative approach that was a "grabber."

A research team exposed homemakers to a new commercial along with three other food commercials in a 15-minute entertainment segment. The commercial voiced the theme: While V-8 may look like tomato juice—"Wow! It sure doesn't taste like tomato juice." The women were asked to indicate what they thought was pleasing and displeasing about the commercials.

Another test in Harrisburg, Pa., was set up and Campbell scheduled 70 V-8 spots a week. Prior to broadcasting, 317 phone interviews were conducted to establish awareness of advertising for the product. A month after the commercials were aired, 452 phone calls were made to see if there had been any changes in awareness.

Awareness Factor — The calls indicated that awareness rose from 40% to 52% as a result of the radio message.

V-8 commercials are now scheduled on CBS Radio and NBC Radio as well as stations in about 200 markets, and Campbell reports that sales results are "excellent."

While V-8 was turning to radio to help it compete better with tomato juices, a tomato juice was being propelled along by nothing but radio. Berceit Richards Packer Co., Sacramento, Calif., has been using radio exclusively for its Sacramento Tomato Juice in the New York area for the past seven years—a come-again record that leaves no doubt of the company's esteem.

Through Lawrence C. Gumbinner, New York, Sacramento begins each season with 15 to 40 spots a week in 13-to-20 week cycles on New York stations having "good" grocery store merchandising plans. It comes back with a 15- to-18-week flight depending on supply of crop.

A series of off-beat commercials with sound effects for the pouring of tomato juice uses copy theme: "So rich it plops when you pour it."

Radio 1962—Campaign 2: Delta ups its budget

Plopping money into radio can prove its richness for higher-priced goods and services, too.

Delightful Jingles — Delta Air Lines, which proclaims in its jingles that "It's delightful to fly Delta," apparently is most delighted with spot radio. It plans to spend an estimated $300,000 more in the medium in 1963 than was spent in 1962.

Delta, with headquarters in Atlanta, has been moving slowly but surely into the ranks of national radio advertisers over the past few years and in 1962 invested $1,191,999 in spot radio, according to George E. Bounds, director of advertising. This year will represent its biggest splurge in the medium.

Though Delta spent the bulk of its $5.4 million budget in newspapers in 1962 ($3.2 million), Mr. Bounds noted in a recent interview that "radio is catching up." Delta also invested about $200,000 in spot tv last year.

Through Burke Dowling Adams, Atlanta, Delta's spot radio campaigns are concentrated largely in 18 cities, though it uses the medium in 46 cities. Delta serves a total of 71 cities.

The spot commercials include jingles and background music with local announcer's copy. The sales points emphasized in the commercials for Delta are the airline's personal service, friendliness, dependability, convenience and comfort. Many of the Delta jingles were produced by orchestra leader Raymond Scott. The background music for many of the spots consists of Gilbert & Sullivan selections.

The commercials are scheduled between programs or within weather shows. Mr. Bounds reported they have utilized well-known sports names to advantage. These include golfer Arnold Palmer, football star Johnny Unitas and baseball luminary Stan Musial.

Delta's George Bounds "radio is catching up"

Delta's major markets, in which schedules are carried on several radio stations, are Atlanta, Chicago, Cincinnatii, Dallas, Dayton, Detroit, Houston, Los Angeles, Memphis, Miami, New Orleans, New York, Orlando, Philadelphia, San Francisco, Tampa, Washington, D. C. and Jacksonville, Fla. During the newspaper strike in New York, Delta has been spending about $7,000 a week on radio-tv there, a $2,000 weekly increase over its customary spending in the market.

Delta tests the efficiency of its commercials by asking listeners to call the local district sales manager by name for additional information about a particular flight or service, and, according to
Latest survey shows 84% of U.S. families save trading stamps

Each year the public opinion and marketing research firm of Benson & Benson, Inc., of Princeton, New Jersey, conducts a survey on trading stamps. The surveys are independent, impartial and scientifically constructed, based on accurate cross-sections of people across the nation.

Saving up 8% over 1961

In 1962 one or more members of 45,864,000 families in the United States saved stamps for redemption. This is 84% of the total number of families. It represents an increase of nearly 5,000,000 families over 1961.

Sizeable gains with all occupations
Stamps continued to grow in popularity with people of all occupations. Gains of anywhere from 5 to 15% over last year were registered in each of five major occupation groups covered by the survey, which ranged from professional and managerial to farm and farm labor.

Higher income groups biggest savers
In households with wage earners making under $3000, 75% saved stamps; in the $3000-4,999 group, 85% saved stamps; in the $5000-6999 group, 88% saved stamps, and where family income was $7000 and over, 86% saved stamps.

All regions save stamps
In the five major regions of the country, 78 to 87% of households saved stamps, with the highest percentages in West, Southwest and North Central regions. The Southeast was 78%; East, 83%; West, 85%; and Southwest and North Central, 87%.

Saving up 6% among farm families
In the nation's farm areas 4,162,000 households saved stamps, a gain of 6% over last year. This was 77% of all farm families.

Large families are big savers
Large families proved more inclined to save stamps than small families. Ninety percent of households with five or more persons saved stamps.

Variation by age groups
The greatest number of stamp savers were found in the 35-49 age group. Eighty-nine percent of the households polled in this category said they save stamps, an increase of 11% over 1961. Stamp savers in the 21-34 age group were at 85%, and in the 50 and over group at 78%.

Better educated people are bigger savers
Persons with high school and college educations were bigger stamp savers than those with grammar school only. Percentages were 87% for high school, 82% for college, 80% for grammar school.

Legislative control not favored
Despite major attacks by the commercial opponents of stamps, the vast majority of people continue to oppose legislation restricting trading stamps, with only 6%—the same figure as last year—saying they favored some legislative curb.

AN AMERICAN WAY OF THRIFT
SINCE 1896
SUCCESSES THIS YEAR; WHICH WILL THEY BE? continued

Mr. Bounds, "The results often are immediate and highly satisfactory."

**Radio 1962—Campaign 3: Dodge keeps theme simple**

In an even higher priced field, Chrysler's Dodge and Plymouth divisions both used radio to outstanding advantage in 1962—as have car dealers practically everywhere, on the local level.

Dodge used spot radio in a pattern it considers successful and will repeat this year: Various campaign flights throughout the year opened with spot tv and newspaper advertising, and several weeks thereafter, spot radio was used to hammer home the messages.

A. C. (Arnie) Thomson, advertising director for Dodge passenger cars, stressed that radio is not merely a "reminder medium," but provides reach and frequency that is vital in selling such a high-ticket commodity as an automobile. On radio, he said, Dodge tries to keep the sales theme simple and many of the spots center around the message: "Pick a price—Pick a Dodge."

Dodge's campaigns on radio were spread through the year, with flights in the winter, spring, early summer and fall. As many as 250 stations were used in the top 75 markets. Mr. Thomson estimated that Dodge allocated approximately $1.5 million to spot radio last year, BBDO, Detroit, is the agency.

Musical jingles were the predominant commercial form and generally they were slated on stations during peak traffic hours, during noon-time and Saturday morning and Sunday afternoon periods.

Mr. Thomson said sales for Dodge during the overall advertising campaign were "highly satisfactory," but noted it was difficult to single out any particular medium. But he emphasized that radio played an important part in Dodge's effort in 1962 and will continue to shoulder responsibility in 1963.

During 1962, radio money was concentrated in spot, Mr. Thomson said, but he added that the company in the past has used network and will consider using that medium in 1963 if the "appropriate program" can be bought.

During 1963, according to Mr. Thomson, Dodge's spot campaigns on both radio and tv will be set to the music of the popular song, "Accentuate the Positive." As in 1962, the various campaign flights will begin on tv and will be extended to radio.

"Our commercial messages as in the past will be simple and palatable," Mr. Thomson remarked. "We begin on tv this month and later we will continue with radio. It's a pattern that we have found most worthwhile in the past."

**Geared to Success** * "Success" is the key word in the Plymouth radio advertising campaign this year, thanks to a drive that got into high gear in 1962.

Plymouth, whose sales were 39% higher in the first four months of the 1963 model year than in the same period a year ago and greater than any comparable four months since 1958, is emphasizing this success as well as successes in service and performance in a radio campaign from December through February, according to William A. Hammond, manager of Plymouth advertising.

The Chrysler division is putting about 15 to 20% of its advertising budget into the radio campaign, Mr. Hammond noted.

In February, the radio commercials tell the story of recent competitive tests against Ford and Chevrolet at Riverside, Calif., in which Plymouth won eight out of ten events, conducted by the nationwide Consumer Testing Institute.

A total of 720 radio stations are carrying one-minute and 30-second spot commercials on the competitive test. Plymouth is using more than 400 stations of the Mutual network, 200 CBS radio stations and 80 additional stations in 30 key markets.

The Riverside success story is related on radio in six different commercials by Lindsey Nelson, Bud Palmer, Sid Collins, Quentin Reynolds, Gabriel Heatter and Westbrook Van Voorhis.

In December, two commercials rotated on a concentrated schedule in 64 major markets emphasized Plymouth's sales story and its warranty service.

The first commercial described the '63 Plymouth as the "instant success car" of 1963 and noted that "in just 10 short weeks, 98,000 new Plymouths have been ordered." The second commercial called Plymouth's new warranty, "America's longest and best warranty—five years or 50,000 miles."

**Radio 1962—Campaign 4: Equitable sells security**

The Equitable Life Assurance Society of the U. S., New York, is so pleased with the results of its use of spot radio last fall that it intends to almost double its ad budget in that medium in 1963 to over $1.3 million.

The company turned to spot radio to "get close" to its field representatives in 137 offices throughout the U. S.—as explained in some detail by Equitable advertising, publications and press relations vice president Charles R. Corcoran (MONDAY MEMO, Feb. 11). Other Equitable officials leave no doubt that they, too, like the way radio works.

Rather than use stations in the recognized top markets, Equitable placed spots on some 400 stations in 130 markets where it has branch offices. The last 10 seconds of every spot, all were one-minute—gave the name and telephone number of the local Equitable manager.

The spots, directed at men, were placed in evening time with emphasis on adjacencies to news, weather and sports shows. The tone of the ads expressed a theme of security, each one beginning with "secure sounds," such as the noise of children playing, before breaking into the sales pitch. A survey of Equitable office managers, which solicited reaction to the choice of programs, stations and messages, brought "the most enthusiastic reaction to any advertising campaign we ever used," reports Goldie Dietel, advertising manager for the insurance company.

The 16-week campaign cost Equitable $709,000.

In 1963, the company plans 13-week flights of spot radio, one in the spring and one in the fall. At $511,000 a week, it will be devoting over $1.3 million to radio. In choosing stations for the business, Equitable says that heaviest consideration is given to recommendations of its local office managers.

**Radio 1962—Campaign 5: Salada’s fresh approach**

Salada Tea, a product of Salada Foods Co., Woburn, Mass., is in its third year as a spot radio advertiser and is currently putting "almost all" of its advertising budget in the medium with a six-week campaign on 74 radio stations in 43 markets in various parts of the country.

Spots are aired for the most part on

BROADCASTING, February 18, 1963
NATURALLY... There was this chick from Egypt (no mummy!) settin' by the Nile, lookin' sloe-eyed at the Pyramids, thumbin' through the latest papyrus-bound. A real looker! —Along comes this musclebound roamer from Rome in his convertible chariot. And, bingo! It's love! Everybody knew that Cleo was the one with the Tony.

...but naturally

And just as naturally as Antony fell in love with Cleopatra, the TV viewers of the rich Rochester, New York, area have fallen in love with WHEC-TV. Just as Cleopatra had what it took to change the course of history, WHEC-TV has what it takes to win the eyes, and ears and hearts of the majority of folks in and around Rochester. A quick look at the ratings (any of the ratings!) will show you what we mean. Better sign up for some WHEC-TV CHANNEL TEN-SPOTS RIGHT NOW!
weekdays, and are especially heavy at the morning and evening rush hours. Frequency runs from 10 to 20 to 30 spots per station per week.

Salada first went into radio in the fall of 1961, hoping to reach a newer, younger group of tea drinkers by the use of humorous advertising. Stan Freberg, according to the advertiser, provided a “fresh approach” and a way to change Salada’s image from that of an “old, staid company” to a “modern, progressive” firm.

Initially, Salada bought into about 20 markets, increasing to 26 in 1962. That total was expanded this year to 43.

The increased number of markets being used, however, does not represent a substantial increase in spending, a Salada spokesman noted. The firm has attempted this year to gain “more exposure with a little less frequency.” Spot radio expenditures are reported at $750,000-$1 million annually.

The current radio drive will last six weeks. Another flight of six to eight weeks will follow in April, and another, scheduled for the summer, will promote iced tea.

A Salada spokesman said that store-level sales are “encouraging to us” and are “going up.” The company is planning negotiations with Mr. Freberg for 1964 radio campaigns.

Salada’s agency is Hoag & Provandie, Boston.

Tv 1962—Campaign 1: Chico sells for Santa Fe

Beneficiaries of television’s sales pull-and-push in 1962, like radio’s ranged from big advertisers to small. They included products that sell for dimes and products that can’t be bought (they’re leased).

Chico’s Commercial • All up and down the Atchison, Topeka and Santa Fe Railway these days you can overhear passengers and freight customers greeting company men with sing-song high voiced imitations of Chico, the little boy they’ve come to know and love on the railroad’s television commercials: “Santa Fe—all the way!”

They will argue good-naturedly with Santa Fe men, too, for an explanation of whether the little cartoon spokesman is “Injun” or “Mexican.” But it’s no avail. No one at Santa Fe has ever decided just who the little desert youngster really is and, anyway, no one is about to spoil the warmly human image with real-life specifics.

One thing Santa Fe officials are sure of however. The combination of Chico and television has produced a sure-fire formula for getting direct results at the ticket windows and freight offices all along the Santa Fe line. So the railroad is increasing its television spending accordingly.

This year the Santa Fe is spending $1.4 million for tv spot programs and announcements—setting the pace for the entire railroad industry in the use of tv, according to Arthur A. Dailey, Santa Fe’s general advertising manager in Chicago. It’s an expenditure that’s “more than that which is being spent in television by all the other railroads in the country combined.”

1963’s tv budget represents a jump over 1962’s $1 million tv investment and a considerable increase over the $3,000,000 plus spent in each of 1960-61.

Last year Santa Fe’s tv spending has grown to represent about 40% of the railroad’s total advertising budget. Mr. Dailey recalled, but this year tv is “a good 50%” of the total. Santa Fe’s agency is Leo Burnett Co., Chicago.

Old TV Customer • Santa Fe is not new to television. Its experience with the medium dates back to 1949. Most of this experience was confined to on-line market buys, however, from Chicago to the West. Today off-line markets like New York are Santa Fe targets too.

The railroad’s successful major use of tv began with the current Chico campaign. It started as a test of the tv character in Chicago in 1961. Chico’s friendly way caught the public heart right away, conveying Santa Fe’s desire to serve. Chico first appeared as a Santa Fe spokesman in a Life magazine ad in 1946.

The cartoon announcements are used now as the commercials on Santa Fe programs in several markets as well as the straight spots for which Santa Fe buys only the very best high-rate prime-time program adjacencies available.

As of last fall, Santa Fe was buying tv at the rate of about 40 prime spots weekly, scattered among stations in San Francisco, Fresno, Los Angeles, San Diego, Phoenix, Houston, Fort Worth-Dallas, Kansas City, Chicago and New York. Some markets included program buys too.

Currently Santa Fe is adding more off-line markets to this list. These include Philadelphia, Cincinnati, Cleveland and Washington, D.C.

If the top, very best availabilities can’t be obtained, Santa Fe waits until they are. “We don’t buy tv just for the sake of buying tv,” Mr. Dailey said. This also explains why Santa Fe has been in and out of the medium through the years, he indicated.

Although passenger-freight revenue

— the most respected call letters in broadcasting

WGN IS CHICAGO
SUCCESSES THIS YEAR; WHICH WILL THEY BE? continued

figures for the entire year 1962 are not yet available for analysis, Santa Fe can see the direct results of the impact of tv, Mr. Dailey stated. On the nights that Santa Fe is a sponsor of "Fahey Flynn and the News" at 10 p.m. on WBBM-TV Chicago, for example, he said, some 25-40 people phone right after the program to make firm reservations. Others visiting Santa Fe's ticket offices later mention tv too, he added, and this story is repeated all over the country where tv is used.

Direct orders for freight business can be traced to Santa Fe's New York tv exposure, Mr. Dailey said, while another railroad department has cited tv as helping win prospects for industrial sites along Santa Fe's tracks.

Santa Fe has been a radio advertiser for many years too, but it uses radio at the present time only on a local or regional basis to meet special needs, Mr. Dailey said.

Tv 1962—Campaign 2: does everything for Bic

The advertising track that led to sales success for the Santa Fe did no less for Waterman-Bic's Bic ballpoint pen.

"Television has done everything for us," That's the summation of tv's effectiveness for Bic, according to Seymour J. Radzwiller, vice president and Bic account supervisor at the Ted Bates & Co. agency. And, said Mr. Radzwiller, this year Bic's tv advertising expenditures will "more than double" 1962's.

Last year's 31-market East Coast campaign would have billed at the annual rate of $3.7-4 million if the campaign was national, the executive noted.

On Feb. 1 of this year a 13-week campaign began in 31 Eastern markets (similar to the 1962 drive). It will be followed on March 1 by a new, 39-market, 13-week schedule west to St. Louis.

Bic pens were first introduced in postwar Paris and became "best sellers" in many areas of the world. In 1960, Waterman-Bic asked Bates to introduce the ballpoints in the U. S.

Stressed in advertising copy were the durability and reliability of the point—made of tungsten carbide—even though the pens sold for 19 cents and 29 cents.

In the commercial, a Bic ballpoint is mounted in an electric drill and run through a piece of wallboard to demonstrate its strength. The copy theme: "Bic will write the first time every time."

The drill-test idea was received enthusiastically, it was noted, by dealers in point-of-purchase displays featuring Bic pens grouped around drills.

Now solidly established in the U. S., Bic's rate of sale in its price category has reached 30% of the industry's rate.

Tv 1962—Campaign 3: Swingline sells staplers

Another mass product that has made a name for itself through television is Swingline Inc.'s "Home-Handy 101 Staple Gun."

Owen Ward, Swingline's director of advertising, said the company's "highly successful" investment in spot tv in 1961-62 will "definitely" cause it to increase tv budget in 1963—perhaps to twice the 1962 expenditure of $200,000.

Swingline, a former all-print advertiser, needed to reach both jobbers and homemakers—and at the same time with suppliers and widespread prestige for the sponsoring stores.

A prime example of successful fashion programming was presented by D. H. Holmes, New Orleans department store, last Sept. 12, in prime time over WDSU-TV. A half-hour color film directed by the store's co-coordinator brought immediate response from national sellers, style magazines and the store's customers.

According to a Holmes official, using local matrons and college girls rather than professional models and placing them in area settings such as the city's French Quarter, college campuses and a country estate, were essential ingredients for the show's success. The department store underwrote all production expenses of the film and was the sole advertiser in its television presentation. Sales pick-up at the department store following the show was largely due to an increasing number of teen-age customers, authorities reported.

Macy's New York is another of the growing number of department stores getting good mileage out of fashion promotion via tv. Macy's fashion department reported unit sales up three times and dollar sales up four times as a result of a single show last year.

Since 1960, Macy's has co-sponsored a semi-annual "line for line" show presenting its women's fashion. The store used "name" personalities to emcee its shows and is currently negotiating for the services of Peter Ustinov to introduce its next program.

Macy's technique has been to telescast each of its fashion productions twice within the same week. In accordance with this pattern the next show is scheduled for initial appearance March 10 (11:15-11:45 p.m.) on WNBC-TV and reshowing March 15 (7:30 p.m.) over the same station. A Macy's official estimated that each of the 1962 programs had audiences in excess of 2 million, based on Nielsen share of audience figures.

Tv 1962—Campaign 5: Xerox rents copiers

Then there is the case of Xerox Corp.'s 914 Office Copier, which can't be bought at all—it must be rented.

Xerox more than doubled its tv expenditure last fall when it bought into NBC's "Chet Holmes and the News". A half-hour color film directed by the Xerox vice president of advertising, Chet Holmes and the News' "Chet Holmes and the News".

Xerox, now a two-year veteran of network television advertising, went into the medium in search of a selected audience—business executives and decision makers who would be interested

in the Xerox 914 copier (Broadcasting, June 18, 1962).

An inter-office memo at Xerox's agency, Papert, Koenig, Lois, noted that documentary or public service TV is an "ideal vehicle" for the 914 "in terms of the selective audience reached, ability to demonstrate the machine and the corollary benefit of building a Xerox corporate image."

Bob Muir, Xerox account executive at Papert, Koenig, Lois, said last week, "We consider that television is very important to our total media strategy."

He also noted that in the future, "TV will help educate the public to the broader corporate nature of Xerox, in addition to advertising the 914 copier.

Next season? More of the same for TV

LITTLE NEW OFFERED ALTHOUGH PERCENTAGES VARY AS PLANS CHANGE

It's February and the voices of program salesmen at their persuasive best still ring loud and clear as pilots are screened in agency viewing rooms the length of Madison Avenue. The start of the 1963-64 TV season is still eight months away. There is plenty of time for changes to be made and there's no doubt that many will be. But the general outline of the new season is emerging with increasing clarity in the penciled notations on the program charts of the TV networks.

What does it show? First, that next season will look very much like the current one, only more so. Comedies have been doing very well this season, so they will be given 43% more evening network time next year, according to the winter book. Now, in the prime time period of 7:30-11 p.m., 11 hours and 30 minutes are devoted to comedy programming. Next season, if the final schedule bears out the advance plans, there will be 16 hours and 30 minutes of prime time comedy.

Short Format • Most of the comedy programs are half-hours, unlike the dramas, action-adventure programs and almost every other type of show except game shows, which like comedy adhere to the traditional 30-minute format. There are exceptions, however. Danny Kaye will be on for an hour each week and Jerry Lewis for two hours (although there have been rumors that perhaps this is too long, even for so active a performer as he, and that his Saturday night performance may be cut to 90 minutes). Should the George Gobel Show become a part of the 1963-64 schedule, it would add another hour-long period to comedy's share of prime network time. Phil Silvers (CBS-TV) and Ethel Merman (Desilu pilot as yet unplaced) will stay with the traditional half-hour length.

The anticipated flock of corn Cob comedy imitators of The Beverly Hillbillies has not materialized. Even the new series starring Bea Benaderet which will be spun off TBH for another CBS-TV half-hour spot, will not be cut from the same homespun cloth. And the winter book indicates that the veteran rural comedy series, The Real McCoys, won't be back in the fall, although there's lots of time for changes between now and then. But there will be a wide variety of comedies, even without any more of the Chic Sale type. MGM-TV's Harry's Girls, which is due for an NBC-TV berth this year after failing to connect in two previous pilot seasons, will combine beautiful femininity with European scenery in relating the misadventures of a showman and his dancing girls. There's way-out comedy, such as Chertok's My Favorite Martian (slated for CBS-TV), and a Desilu pilot, as yet unsold, carries it a bit farther as I Married a Martian..

Dramatic programming is also on the increase, from 12 hours of prime network time a week this season to 19 hours next year. If the present plans materialize, a gain of 58%. Much of the dramatic fare will be serious, designed to give the audience a measure of education while they are being entertained. CBS-TV, for example, has commissioned John Houseman to produce a new series based on incidents, both famous and little known, of American history.

Less Adventure • Action-adventure programming, unlike comedy and drama, is in for a drastic curtailment as evening entertainment on the networks during 1963-64, provided the agenda now drafted for next season is not changed to a major degree. The cur-

George C. Scott is a social worker in UA-TV's "East Side, West Side" (CBS-TV); Dean Jagger and James Franciscus are the young teacher and the veteran principal in MGM-TV's "Mr. Novak," (NBC-TV); Robert Taylor works for the Dept. of Health, Education & Welfare in the Four Star series (NBC-TV); Dan O'Herlihy is the father and Kurt Russell the son in MGM-TV's "The Travels of Jaimie McPheeters (ABC-TV)."
THE DEADLINES THAT NEVER END

News-makers and decision-makers are not clock-watchers for the news can and does break at any time. Total news coverage, therefore, is definitely out of the 9 to 5 job category. It's a demanding task for talented and dedicated professionals.

We have these people.

WCAU Radio News and the CBS News staff with its hundreds of reporters throughout the world, including the world's top correspondents, enjoy the challenges of reporting constant change; meet the deadlines that never end.

OUR LOG:

Nearly 300 WCAU Radio and CBS News broadcasts weekly, including news on every hour • CBS Radio NetALERT around the clock • WCAU NEWS CONFERENCE at 12:15 PM daily with listener phone participation • Two hours of news, sports, and commentary nightly at 5 on EVENING EDITION • Two WCAU Radio-Atlantic Refining GO PATROL helicopter teams with a minimum of 18 daily traffic and road condition reports • Two weather services providing special long-range and local forecasts • WCAU Radio editorials on matters of community importance

TOTAL NEWS COVERAGE...one of the major reasons why WCAU Radio is the information and entertainment center in Philadelphia

WCAU RADIO

The CBS Owned Station in Philadelphia
Represented by CBS Radio Spot Sales
rent season's prime time includes 22 hours and 30 minutes of action-adventure shows; next season's total time allotted to this kind of program is only 15 hours, a drop of 33%. And even in this type of show, producers are endeavoring to implant a moral or a lesson, to leave viewers with something to think about after the show has ended.

Educators will join the doctors and lawyers as tv heroes next fall. A college instructor and his dean are the leading characters of Revue's *The Young and the Bold* (which was titled *The Best Years* when the pilot was shown on *Alcoa Premiere*). And three pilots have been made for series with high school settings: MGM-TV's *Mr. Novak*, which NBC-TV will carry; Warner-Webb-Skelton's *Giant Step* for CBS-TV; and Screen Gems' *Turning Point*, which is not yet set despite the endorsement of the National Education Assn. Whether *Leave It to Beaver* will be around next season to represent the grade school set has not been finally decided.

Social workers also will come in for tv glorification. George Scott will portray one in UA-TV's *East Side, West Side* (CBS-TV); Dick Clark stars as a policeman working with juvenile delinquents in Daystar's *Kincaid* (ABC-TV); Robert Taylor works for the federal government's Dept. of Health, Education & Welfare in the series *Four Star* is producing for NBC-TV. *Four Star's Settlement House* is looking for a network address.

**Something New** The outstanding innovation of the new season, ABC-TV hopefully expects, will be * Arrest and Trial*, 90-minute series being produced by Revue. Actually, it will be two 45-minute programs with two stars, Chuck Connors and Ben Gazzara. In the first half, the police will search for a criminal, capture and arrest a suspect; the second half will deal with his trial. District attorneys will get the limelight in Warner Brothers' *Ready for the People*, the man on the bench in *Four Star's The Judge* (spun off the *Dick Powell Theatre*). Neither of those has been scheduled yet, nor have two prison series pilots, Warner Brothers' *The Key* and Bing Crosby Productions' *The Warden*. *Perry Mason* and *The Defenders* will be back on CBS-TV next season, but it's a toss-up whether *Sam Benedict* will show up on NBC-TV's fall schedule.

There will be three 90-minute programs on the air this fall: *The Virginian*, first series of this length, which continues on NBC-TV: *Wagon Train*, which is being extended from 60 to 90 minutes on ABC-TV; and *Arrest and Trial*, also on ABC-TV. All three are being produced by Revue, which continues to be unchallenged as Hollywood's top producer of tv programs, with 8 hours and 30 minutes of network prime time firm for fall and possibly as much more. Revue produces *The Jack Benny Show*, which continues on CBS-TV, and has five shows set for ABC-TV in addition to *Arrest and Trial* and *Wagon Train*: the hour-long college series, *The Young and the Bold; The Music Makers*, also 60 minutes, starring John Forsythe as the a and r man for a large record company; and three half-hour comedy series. These are: *Mchale's Navy*, continued from this season; *Butterball Brown*, with a baseball setting; and *Lollypop Louie*, a sort of Damon Runyon character played by Aldo Rey.

*Astaire Leaves* Revue will also produce this summer's replacement for Perry Como, *Kraft's Summer Theatre*, a 60-minute mystery series. Fred Astaire, host of ABC-TV's *Alcoa Premiere* and *Premiere*, will not return next season and the 60-minute weekly anthology series is likely to leave with him. This will be hard on Revue, which has used the series as a showplace for many pilots, including, this season: *The Lab*, a medical research series; *Hornblower*, the British naval hero of C. S. Forester's historical novels; *The Hat of Sergeant Martin*, about Marines in Latin America; *Blow Hard, Blow Clear*, *Nightfall* and *All Ashore*. *The Young and the Bold, The Music Makers* and *Lollypop Louie* and also Alcoa spinoffs.

The Hitchcock series, from which *Diagnosis: Danger is a spinoff, is another* Revue series whose return is doubtful, along with *Laramie* and *Wide Country*, both on NBC-TV this season. Revue is producing the daytime *Challenge Golf* series for NBC-TV, however, and is optimistic about the George Gobel comedy-variety program.

*MGM-TV* is another hot studio, this wise this year. Two NBC-TV series, *Dr. Kildare* and its spinoff *Eighth Hour*, are certain to be back in the fall, when they will be joined on that network by *The Lieutenant*, 60-minute series about the Marines in peacetime; *Mr. Novak*, also an hour, and the half-hour *Harry's Girls*. For ABC-TV, *MGM-TV* is producing the *Travels of Jamie McPheeters*, 60-minute series based on the Pulitzer Prize novel about a boy and his father during the gold rush days, and *The Human Comedy*, 30-minute program adapted from the motion picture of that title; and up to six hours of prime time for 1963-64.

Three other hour-long dramatic series: *Time of Decision, Sister Mike* and *The Mosaic*, and two half-hour comedies, *How to Make Money* and *Men*, based on the Shepard Mead book, and *Ship's Doctor*, have places on MGM-TV's future book, but none of these are expected to be included in the 1963-64 line-up.

**Selmur Shriners** Another man-and-boy series on the ABC-TV agenda is Selmur's *Thunderhead*, whose pilot is being filmed in color although the 60-minute series will be made in monochrome, according to present plans. Selmur's *Combat*, currently in its first season on ABC-TV, and *Cousins*, a 30-minute comedy series (formerly called *Me and September*) with Chill Wills, will also be on the network season, giving Selmur two and a half hours of evening time. Selmur's *Day in Court* may be joined on ABC-TV with another half-hour, five-a-week daytime series, *General Hospital*, which would bring the total network time of this ABC-owned production company to seven hours and 30 minutes a week.

Daystar, whose *Stoney Burke* hour-long rodeo series currently on ABC-TV but not set yet for next season, has two new series which are on the ABC-TV fall agenda: *Mr. Kingston*, 60-minute suspense series starring Walter Pidgeon as the captain of an ocean liner, and *Please Stand By*, half-hour science fiction program, plus high hopes for *Mr. Kincaid*, the Dick Clark juvenile police officer series. Daystar pilots also include three *Stoney Burke* spinoffs: *Tack Reynolds*, with a stock car racing background; *Point of Entry*, the cooperation of Mexican and American police to prevent crime on the border, and *Mark Vickers*, a weapons expert called on to solve crimes in all parts of the world.

**Desilu's Greatest Show on Earth** hour-long circus series, will be seen on ABC-TV this fall, but the studio's *The Untouchables* is not expected to return to that network for a fifth year. *The Lucy Show* will be back on CBS-TV for a second season. Desilu pilots include four 30-minute comedies: *Trader

*Gary Lockwood stars as Lt. Bill Rice in the MGM-TV series "The Lieutenant" scheduled on NBC-TV this fall.*
Brown, with Ethel Merman; I Married a Martian, Careful, My Love, and A-OK O'Shea. Fair Exchange returns to CBS-TV in March as a half-hour show after cancellation of the hour-long version broadcast last fall, but its future after this season is questionable.

Losers One - Four Star Television loses one hour, The Dick Powell Theatre, on NBC-TV, but gets back the time for its new Robert Taylor HEW series on that network. The half-hour Lloyd Bridges Show on CBS-TV and The Rifleman (also 30 minutes) on ABC-TV, both seem unlikely to return. Saints and Sinners lost its NBC-TV hour in January. Two other Four Star network shows, Ensign O'Toole and McKeever and the Colonel, both half-hour comedies, are broadcast before prime time. On Four Star's pilot list are three spinoffs from the Dick Powell Theatre: Amos Burke (millionaire police officer), The Losers (comedy Western) and The Judge; a half-hour comedy, The World of Charlie Springer; Settlement House, 60-minute drama.

Screen Gems will have Hazel back on NBC-TV for the third year and The Donna Reed Show back on ABC-TV for its sixth consecutive season; but a third SG half-hour comedy series, Dennis the Menace will not return to CBS-TV next fall, nor will Route 66. Fate of ABC-TV's Naked City is uncertain. The hour-long modern Western, Empire, is undergoing a change of structure in the spring, with its future beyond this season unknown. Two new half-hours: Postmarked: Jim Fletcher and Archie are slated for ABC-TV come fall. Other SG offerings include: Wings for Hire, an Empire spinoff, four half-hour comedies: Rockabye the Infantry, The Farmer's Daughter, Grindl and Mr. Deeds Goes to Town; also Turning Point, with Mike Connors as a high school teacher.

Twentieth Century-Fox has had only one series on the networks this season, Dobie Gillis, half-hour teen-age comedy, on CBS-TV; but the company has a number of programs it hopes to get into the 1963-64 schedules. They include The Young Lions, based on the novel; Eden Hill, formerly Peyton Place; Cress Delehanty, 12 O'Clock High, suspense, and a Western, The Unholy Three, all hour-long.

Warner Brothers' 77 Sunset Strip is scheduled to be back on ABC-TV for another season, while Hawaiian Eye will not be and Gallant Men is uncertain and it's too early to say what may happen to The Dakotas, which was a January replacement. All are hour-long shows, as are these which Warner Brothers is offering for next season: Ready for the People, The Key, Giant Step (high school drama which seems set on CBS-TV), and Jetport.

Note: Dollar volume figures represent total considerations reported for all transactions, whether majority or minority interests were involved. In many transactions involving joint radio-television properties, individual values were not assigned to the radio and television stations. Such sales are reported in the column headed “Combined Radio-Tv.”

Radio stations hot item in sales market

SLOW TV CHANGES BRING GRAND TOTALS DOWN SUBSTANTIALLY IN YEAR

Changing ownership of radio and tv stations in 1962 slid below 1961 levels, but despite this overall downward movement, transactions involving radio stations increased last year. Moving along at a good clip is 1963 which already has nine transactions on the books which involve $1 million or more in purchase price.

Radio sales in dollar volume reached a three year peak in 1962. There were 306 radio stations which completely changed hands (24 more than in 1961) and the total dollar volume was $59,912,520, up 8% over 1961's radio trading volume of $55,532,516. This was the best year since 1959 when 436 radio stations changed ownership and the amount involved reached $65,544,653.

Always sensitive to the general economic climate, station sales in the aggregate slipped back somewhat from the previous year. For all types of sales in 1962, the total reached $101,742,903—about $27 million below the 1961 figure which was the peak volume year of the past nine years.

Dollar volume for tv only sales slumped to $23,007,638, down about $8 million from peak 1961's $31,167,943.

The sale of combined radio-tv outlets plummeted to a nine-year low: $18,822,745, compared to the 1961 total of $42,103,708 and a one-fourth of the top year in the nine-year period, 1956's $65,212,055.

Washington Climate • One of the key elements in the softening of the station sales market was the climate in Washington—particularly the get tough attitude of the FCC.

This factor specifically is seen as holding down greater activity in the buying and selling of broadcast properties in 1963—although all indicators show that this year should be equal to 1962.

According to station brokers, who eat, drink and sleep station sales, these are some of the government factors which have adversely affected the buying and selling market:

The three-year rule. Fines. Revocation proceedings. Chicago and Omaha type hearings. More and more program controls.

Even worse in the view of some is the FCC's consideration, according to rumor, of reinstituting an Avco-type rule which would, as it did for a few years up to 1952 when it was outlawed by Congress, open up station transfers to bidders who can match the price arranged by the seller and a specific buyer.

None of the brokers are actually pessimistic about 1963; after all, it is in the nature of their business that they be sanguine. The consensus is that 1963 will be as good as 1962. And, if it weren't for the FCC and Newton N. Minow and all that he stands for, 1963 would be better than 1962.

There is general agreement, however, the day of the eight-figure, multi-station sale may be well past. Tv, according to those who think this way, has now reached a period of stability and maturity where ownership is interested less in station turnover than in long term investment.

Or, as broker Howard Stark puts it: "Like all new businesses, tv has run the gamut. First stations were owned by individuals willing to take a chance. Then, as they grew in size, complexity and dollar volume, a corporation took over. And now, as tv has boomed to its present billion dollar annual level,
CLOBBER COMPETITION

Competition is no longer a knock down, drag out race between television and radio. With the advent of the 60's and the installation of computer techniques in more and more media buying offices, few sophisticated buyers make their choice of one over the other. The trend is an intelligent blend of both, with the dollars going where the numbers are. Today, more than ever, when the choice narrows down to which of the radio stations available will be selected to carry the largest share of the radio broadcast budget, it is of major importance that you assure your advertiser of an audience that dominates your market.

Mr. Oberfelder

KRAM, Las Vegas, Nev., reports, "Surrounding Sound is all you claim it to be. Easy to implement, great to hear. Improves the sound of existing programming. Production uses nearly unlimited."

The Broadcaster by Surrounding Sound puts a wholly new concept of dimension and presence into sound whether it be voice or music. The station that enriches and enhances its signal by the use of the technological advances made possible exclusively through Surrounding Sound will go a long way toward capturing the lion's share of the listening audience, regardless of the format of the programming.

So rich, so full, so real is this remarkable concept which envelops the listener with the beauty of true-to-life sound that those stations now making full use of Surrounding Sound have gained recognition as first in choice of audience approval and, naturally, first in choice of sponsor approval.

E. Z. Jones, exec. v.p., WBIB, Burlington, North Carolina, says, "Entirely satisfied with new dimension given WBIB by Surrounding Sound. Has operated perfectly since March 15, 1962. Audience and program reception amazing. Competition has tried unsuccessfully to imitate installation. Meets with approval of entire staff! Select the dimension you want, then listen to the difference on an auto or small handset and you'll know why we like Surrounding Sound."

Clobber Competition! Now, you, too, can give your ratings a hypo with Surrounding Sound. Move your rating right to the top whether your call letters represent a "powerful" 250 watt or a clear channel with 50,000 watts of sheer muscle. The zest, the appeal, the concert tone that your program will gain when Surrounding Sound goes out through your transmitter will capture an ever increasing share of your potential audience. You'll deliver more homes, more portables than your competition... and your reps will capture the profitable contracts. Surrounding Sound will enable you to clobber competition... but good!

Do fringe areas present a problem? Surrounding Sound puts beef into your signal safely... Stan Wilson of KFJZ Ft. Worth, Texas writes: "Feel Surrounding Sound has given us best technical sound in our history. Modulation definitely improved. Recommend it highly." D. A. Burton of WLBC, Muncie, Indiana says, "We are exceptionally pleased with the distinctive high fidelity sound obtained through Surrounding Sound equipment."

The Broadcaster by Surrounding Sound makes any station an all-out production and sound laboratory. Each and every trick of the trade can be emulated, amplified and made more potent. Your engineers will discover an entire new repertoire of unusual effects that can put solid sell into your commercials! Controlled delay? Reverbs? Progressive decay? You name it... or dream it up... and Surrounding Sound will make it possible with punch, force and vigor and appealing novelty.

WRITE, WIRE OR PHONE FOR A COMPLETE LIST OF SATISFIED STATIONS USING SURROUNDING SOUND

AM AND FM OWNERS AC-CLAIM SURROUNDING SOUND

There's excitement in the air waves!

Excitement caused by the new concept in sound that brings in bigger audiences and bigger incomes to FM and AM stations in every section of the country. The next sound you will hear on stations whose ratings are mounting up and UP is "SURROUNDING SOUND."

It's attention getting, it's audience holding... it's sheer magic out of an electronic black box that puts your listener smack dab in the solid center of pleasing sound, then holds him there because he's spellbound by depth, beauty and fidelity. Old records come to life with sparkle and brilliance; new recordings gain dimension and presence. News broadcasts sound more authoritative, commercials ring out with the authentic touch of sincerity.

AN OPEN INVITATION TO ALL BROADCAST MEN

To describe the total effect made possible when the Broadcaster by Surrounding Sound is installed in your station is almost impossible. There is no substitute for an actual listening session. Should business (or pleasure) bring you to Los Angeles, you are cordially invited to visit with us and judge for yourself the sheer enjoyment in sound with which you can thrill your listeners. If you're a foresighted businessman, like Ernie Spencer, pres., KWIZ, Santa Ana, California, you, too, will be impressed by the dynamic possibilities of holding and increasing your audience. A 30-minute demonstration convinced Spencer that Surrounding Sound was the soundest means of facing increased competition with a powerful weapon. On February 15th, three weeks after his initial contact with the versatility of this unit, KWIZ is providing the richness, the fullness and the beauty of Surrounding Sound to its listeners.

SURROUNDING SOUND, INC.

Milton Brucker, President

5757 Santa Monica Blvd., Hollywood 38, Calif.

Area Code: 213 Hollywood 6-3301
stations are owned by chain broadcasters, whose interest is in the long haul.

**Three-Year Rule** • Of most concern to brokers is the impact the three-year rule has had on sellers. Apparently buyers are still in good supply. James D. Blackburn of the Blackburn & Co. brokerage firm is concerned about this regulation which requires a hearing if a station is sold by an owner who has held the station for less than three years. Not only does this interfere with the broadcaster's freedom to dispose of his property, Mr. Blackburn contends, but it is in many instances unfair.

For example, Mr. Blackburn knows of one broadcaster who owns a small market tv outlet. He has owned it for only one year, and in that 12-month period he dropped $50,000. "But, because he hasn't held the station for three years, he's going to have to lose money for another two years until he can sell it without having to undergo a three-year hearing," Mr. Blackburn says. The broadcaster, Mr. Blackburn adds, doesn't feel that he can persuade the FCC to waive the regulation in his case.

The three-year rule, however, is not without its defenders. Ray Hamilton, of the Hamilton-Landis broker organization, feels it has served one useful purpose:

"It has driven the 'ribbon clerks' out of the business," he says.

**Impact on Finances** • All brokers agree that the FCC's activities have had a definite effect on the availability of funds for broadcast investment. Whereas in previous years financial institutions were excited about the growth potential of broadcasting, particularly television, they now have cooled somewhat. This is due, not only to the FCC's more stringent regulatory policies, but also to the fact that television, the glamour sector of broadcasting, has reached maturity.

Edwin Tornberg, who heads his own brokerage firm, explains that this has become evident among small business investment company lending firms. They have grown skeptical of broadcast investments, he says, whereas a year or two ago they were extremely interested in them. Now, Mr. Tornberg recounts, "the SBICs are reticent about commitments in broadcasting."

A contrary view is expressed by Mr. Stark. He points to the increasing interest in recent years of insurance companies in putting money into broadcasting. This, he acknowledges, is specifically directed to major market television properties, and emphasizes the long-term investment potentials of television.

This whole trend toward long term holdings and investment paints in clear outline the changing picture in station sales—less and less turnover in ownership.

Buyers are still plentiful, according to brokers, but many sellers have lost their enthusiasm. Many station owners feel that now is not the right time to sell.

For one thing property values have leveled off and broadcasters feel they ought to hold on to their stations until an upswing is discernible.

Countering this general attitude, how-

*Note: In computing the number of stations in the trading an am-fm facility was counted as one radio unit; an am-only or fm-only transaction similarly was counted as one radio unit.
Sound Control with Sony

Sony CR-4 Wireless Microphone - The perfect transistorized microphone and pocket-size transmitter for active singers, dancers and TV performers to give complete freedom from entangling cables and obstructing Mike stands. Mike and transmitter together weigh only 13½ ounces. Complete with transmitter, receiver and carrying case: $250.

Sony EM-1 Newscaster Portable - A full track, all transistorized portable recorder designed for rugged service and dependable performance in remote locations. Meeting NARTB specifications, the EM-1 is ideal for on-the-spot interviews and sound recording.

• Governor controlled, constant speed spring wound motor
• Rewind while recording
• 13½ pound weight. Complete with microphone and accessories: $495.

Sony C-37A Condenser Microphone - Remarkably smooth and uncolored natural response through the full range of recorded frequencies has earned the C-37A the title of "world's most perfect microphone." • Adjustable for omni-directional or uni-directional • Frequency response ±2 db 20-18,000 cps • Signal to noise—more than 55 db for signal of 1 micro-bar at 1000 cps. Complete with CP-3 Power Supply, carrying case and 30 feet of cable: $295.

Sony C-17B Condenser Microphone - A miniaturized, uni-directional companion to the famous Sony C-37A Microphone. With outstanding background isolation characteristics, the uni-directional cardioid pattern is ideal for TV, night club and solo voice stereo recording application. The slim ¾” diameter size minimizes visual problems. Complete with CP-3 Power Supply, carrying case and 30 feet of cable: $350.

Sony CP-3 Power Supply — For the C-37A and the C-17B microphones, the CP-3 features: Switch for 3 positions of low frequency attenuation; special high cut filter switch for all frequencies above 10,000 cps.

For more complete specifications and name of nearest dealer, write Superscope, Inc., Dept. 3, Sun Valley, California.

In New York, visit the Sony Fifth Avenue Salon, 585 Fifth Avenue.

All Sony Stereocorders are Multiplex Ready!
The case for ‘escape entertainment’ on television

The critics who deplore the prevalence of escape entertainment on television are going to have to go right on deploiring, because there is going to be more, rather than less, of this type of program fare in the months ahead, in the expert opinion of Sheldon Leonard.

The word “expert” is used advisedly. Mr. Leonard is executive producer (and co-owner with Danny Thomas) of T & L Productions, whose three current shows (The Danny Thomas Show, The Dick Van Dyke Show, The Andy Griffith Show) are all firmly set for another season in prime evening time on CBS-TV. T & L’s new series, The Bill Dana Show, is also set for next season on NBC-TV. Four prime time shows is enough to qualify anyone for the title of “expert,” but Mr. Leonard has an even greater qualification; he has the unique distinction of having directed the pilots for 10 tv series, all of which were sold.

“The desire for the kind of entertainment that will let us forget for a little while the myriad pressures of today’s world is a symptom of the kind of world we live in,” Mr. Leonard said last week. “It is a response to our current social climate, just as the Renaissance was a response to the set of social conditions that prevailed at that time.”

The coming tv season is likely to see more far-out comedy programs, Mr. Leonard expects. The top rating achieved by the Beverly Hillbillies, the rural family who struck it rich and moved to a mansion in Beverly Hills without changing their country ways, proves the public appetite for entertainment that is closer to fantasy than to realism and we can look for many other examples in the 1963-64 season.

“These new shows won’t necessarily try to imitate the Beverly Hillbillies formula exactly, but they will latch on to the underlying idea of putting a group of people into incongruous surroundings.” A good example might be a program dealing with the adventures of a man from outer space transported to Earth, such as My Favorite Martian, which has just been purchased by CBS-TV on the strength of a Leonard-directed pilot.

“There are many types of escapist entertainment,” Mr. Leonard commented, “all of them waiting for the proper presentation on tv to start new viewing trends.” As an example, he cited the James Bond detective novels, reported to be favorite relaxation reading for President John F. Kennedy. “Here is the fantasy approach, the gentleman detective with savoir faire, not the brutality sordid Mike Hammer approach, although, come to think of it, that isn’t too realistic either. But it does lack the true escapist attraction that is inherent in James Bond.”

Location filming • Mr. Leonard also anticipates “an increasing flight from the sound stages to film stories in the locales they are supposedly taking place, as is done in Route 66 and Naked City. Too much of television is designed as if we were still in the era of the seven-inch screen, when closeups were all the viewer saw and attention paid to backgrounds was a waste of time. Producers should remember that the tv screens are bigger now and backgrounds can be seen and enjoyed. That’s why we did eight Danny Thomas shows in Europe last summer.”

Costume drama, period programming, is just waiting for tv to discover that it has a wide appeal, Mr. Leonard said. “It’s tremendous escapist entertainment. Look at the success ‘School for Scandal’ is having on Broadway today. Remember ‘The Scarlet Pimpernel’ and ‘Monsieur Beaucaire’ and innumerable Douglas Fairbanks pictures. It would be just as great on television and you don’t even have to wait for color, although that will help, of course.”

The first responsibility of any form of entertainment, any medium of communications, “is to survive,” Mr. Leonard declared, “and you can’t survive without an audience. No matter how important your message, it doesn’t mean much if nobody hears it. But we can’t sit back complacently with pure escapism and say smugly that we’re giving the public what it wants. We’ve got to do better than that. To not only survive but to progress, television has got to give the viewers not what they want but what they don’t know yet that they want. Like ‘School for Scandal’ on Broadway, we can appeal to escapism without degrading our standards.”

Mr. Leonard

ever, is the feeling among some station owners that the present plateau in station values may plummet. When the FCC cracks the am freeze, there may be a surge of additional stations in markets that now make for profitable station operation under cover of the numbers restriction. Many feel the same is true for tv as the FCC seemingly pushes along with drop-ins and the promotion of uhf outlets.

Highlights of 1962 • Despite the less than boom approach to 1963 and the reasons given for the drag in 1962, the year just passed continued to see well-rounded prices paid for good tv andradio properties. Like:

- $10,6 million for 50% of WTAE (TV) Pittsburgh by the Hearst Corp. which already was a half owner.
- $10 million for WINS New York by Westinghouse.
- $6 1/2 million for 63% of KENS-AM-TV San Antonio by the Harte-Hanks Newspaper interests which owned 37% and which later sold off KENS for $700,000.
- $6 1/4 million for KOGO-AM-TV San Diego by Time-Life Broadcast Inc.
- $5,720,820 for 51.4% for the Honolulu Star-Bulletin, which includes KGMB-AM-TV Honolulu, KHBC Hilo and KMAU-TV Waikiki. This move was by a group of Honolulu businessmen who bought out the Farrington interests in the publishing company.

- In the $2-3 million range, the following stations changed ownership— KCRA-AM-FM-TV Sacramento, Calif., bought for $2.8 million by the estate of the late Ewing C. Kelley; WNTA-AM-FM Newark, N. J., bought by Communications Industries (Lazar Emanuel) and WNCT (TV) Greenville, N. C., bought by Roy H. Park, each for $2.5 million; WLWA (TV) Atlanta, bought for $2.25 million by the Fairbanks interests (WIBC Indianapolis) in an ar-
What compact can do everything a console recorder can? AMPEX PR-10

The Ampex PR-10 gives you all the features, all the performance of a console recorder. Even remote control. And it's all wrapped up in a suitcase-sized package. That means you can take a complete recording studio out into the field, into the school, the church, industry — anywhere you need it. The PR-10 features positive push-button controls; record-safe switch; and separate erase, record and playback heads. And there's room for an optional 4-track stereo or additional playback head. There's also a new electro-dynamic clutch system to give you fast, gentle starts and lower braking tension. If you want to monitor on-the-spot, the PR-10 has A-B switches, VU meters, phone jacks, output circuits. Moreover, electrical alignment controls are accessible through the front panel. You get all this plus a new Ampex "Four Star" one-year warranty. For data write the only company with recorders, tape & memory devices for every application: Ampex Corp., 934 Charter St., Redwood City, Calif. Worldwide sales, service.
RADIO STATIONS HOT ITEM in Sales Market continued

rangement which saw WIBC withdraw from its battle to secure the Crosley-operated WLWI (TV) channel in Indianapolis; WEAU-TV Eau Claire, Wis., bought by the Appleton (Wis.) Post-Crescent for $2.1 million; KFAC-AM-FM Los Angeles, bought by the Cleveland Broadcasting interests (Ray T. Miller) for $2 million.

- In the $1-2 million class—KODE-AM-TV Joplin, Mo., bought by James S. Gilmore Jr., for $1,850,000; WDOK-AM-FM Cleveland, bought by Transcontinental Television Corp. for $1.4 million; KYA-AM-FM San Francisco, by Golden West Broadcasters (Gene Autry), for $1¼ million; WAPA-TV San Juan, P. R., by Screen Gems Inc. for $1.5 million; WHAM and WHFM (FM) Rochester, N. Y., by Communi-
cations Industries, for $1.3 million; and a trio of Kansas area stations [KCKT (TV) Great Bend, KGLD (TV) Garden City, and KOMC (TV) McCook, Neb.], by George M. Brown and associates (KARD-TV Wichita), for $1 million.

Other major station ownership transfers: KGHL-AM-TV Billings, Mont., bought by Paul Crain and associates, for $745,000, after which KGHL was sold to George Hatch interests for $204,285; KFBB-TV Great Falls, Mont., by Harriscospe Broadcasting group for $610,000; KEX Portland Ore., by Gene Autry's Golden West Broadcasting for $900,000; KTVT (TV) Fort Worth, Tex., by WKY Tele-
vision System, for $800,000.

Three Threes • Interestingly, in three
cities a trio of stations changed hands during 1962:
In Chicago, WGES (now WYR) was bought by Barton and Gordon Mc-
Lendon for $2 million; WAIF by Mau-
rice Rosenfield and associates, for $1 million; and WHFC Cicero and WEHS (FM) Chicago by record distributors Louis and Phil Chess for $1 million.
In Louisville, WAKY went to Fred 
Gegg and associates for $1,350,000; 
WINN to Gravis Kincaid for $500,000, and WKY to Producers Inc. for 
$305,300.
In Tulsa, KACK was bought by Pub-
lic Radio for $575,000; KRMG by the 
Swango group for $500,000 and KFMJ by the Oral Roberts organization for 
$300,000.

New Group • Through the purchase of four tv stations in 1962 (three in North Dakota), Producers Inc. became a major group owner. A combination of Ferris Traylor and family and the 
Polaris Co., a diversified investment company, Producers Inc. bought 
WTVW (TV) Evansville, Ind. (in 
which Mr. Traylor had an interest), for 
$514,800; KXGO-TV Fargo for $390-
000; KCND-TV Peminsa for $190,200 
and KNOX-TV Grand Forks for $90-
279. Pending FCC approval is its latest 
purchase, that of KXOA Sacramento, Calif., for $750,000.

New Year Deals • These levels are 
still being maintained in 1963. The fol-
lowing stations have been sold and are 
awating FCC approval:
- KTTV (TV) Los Angeles, bought by 
Metromedia for $10 million.
- WREC-AM-TV Memphis, pur-
chased by Cowles Magazines & Broad-
casting, for $8 million.
- WDBO-AM-FM-TV Orlando, Fla., 
bought by The Outlet Co. (WJAR-AM-
TV Providence, R. I.) for $6 million.
- WREX-TV Rockford, Ill., sold to 
Gannett Co. for $3,420,000.
- KSYD-TV Wichita Falls, Tex., 
purchased by Paul Harron and associ-
ates for $2,350,000.
- WMAZ-AM-FM-TV Macon, Ga., 
bought by WMRC Inc. (owner of 
WFBC-AM-TV Greenville, S. C., and 
of WBIR-AM-TV Knoxville, Tenn.) 
for $2,094,750.
- KKKV (TV) and KFMH (FM) 
Colorado Springs, and KGKF Pueblo, 
both Colorado, bought by Tele-Broad-
casters, for $1 million.
And already approved by the FCC 
a short month ago were the transfers of 
KOAT-AM Albuquerque and KVQA-
TV Tucson to the Steinman Stations 
group for $3,250,000 and of KCPX-
AM-FM-TV Salt Lake City, to Screen 
Gems Inc. from Columbia Pictures for 
$2,400,000—but Columbia Pictures 
owns 89% of Screen Gems.
These indicate a pretty good start 
1963 in station sales.

Oregon governor reports to people on tv

A Report to the People by Oregon 
Gov. Mark O. Hatfield (R) is being 
carried bi-weekly on a six-station state-
wide tv network. The program, 
which originates in the studios of 
KOIN-TV Portland, began Monday, 
Jan. 14, and will continue for the 
duration of the current state legis-
slative assembly, probably until mid-
spring.

The series is similar to one con-
ducted four years ago by Gov. Hat-
field's predecessor, Gov. Robert 
Holmes (D).

The opening program dealt with 
the governor's inauguration and the 
opening of the legislature. Last 
Monday's (Feb. 11) program had 
Gov. Hatfield in an informal con-
versation with three newsmen. Sub-
sequent shows will deal with items of 
legislative interest and talks with 
department heads.

A request for equal time to pre-
sent the Democratic-controlled legis-
late's point of view on the gover-
nor's comments was given a quali-
ied reply by C. Howard Lane, man-
aging director of KOIN-TV.

Mr. Lane told State Sen. Walter 
Pearson "if specific programs neces-
sitate, in our judgment, the applica-
tion of the principle of fairness, we 
will be glad to make time available 
to responsible representatives of the 
legislature so that their viewpoint 
can be represented." To date, no 
such rebuttal programs have been 
presented.

Other stations carrying the gov-
ernor's program are: KVAL-TV 
Eugene, KCBY (TV) Coos Bay, 
KPIC (TV) Roseburg, KRES-TV 
Medford, KOTI (TV) Klamath Falls.
Two Great Wirephoto Networks
Linked by Cable

Associated Press Photos
from EUROPE to NORTH AMERICA
by EXCLUSIVE CABLE!

Delivery direct to television stations
VIA PHOTOFAX

Better Pictures
Faster and Farther

The First Transatlantic Photo Cable
Ever Leased by a News Service
on a 24-hour Basis

The Associated Press now sends pictures—on its own leased transatlantic photo cable circuit—on a 'round-the-clock schedule to and from North America and Europe.

This is the first and only transatlantic picture transmission facility ever leased by any news service.

It links AP's two great Wirephoto networks—its constantly expanding European network and its North American Wirephoto network of more than 40,000 miles of leased wire across the United States and into Canada.

AP's pictures move into more than 650 newspapers and television stations in North America and into Great Britain, France, Germany, Italy, Belgium, Holland, Finland, Norway, Sweden and Denmark.

Leasing of the transatlantic photo cable circuit is another step in AP's consistent policy of utilizing the most advanced technical means to bring the best possible news and photo report to its members.
Radio-tv rescues Cleveland charity drive

STRIKE-BOUND NEWSPAPERS HAD POSED PROBLEM

Even without newspapers, Clevelanders have out-done themselves in supporting one of the city's major charities. Television and radio got the lion's share of the credit.

The event was the Cleveland Press Charity's annual mid-America boat show, held Jan. 22-28 with proceeds going to local charities through the Cleveland Welfare Federation. With Cleveland newspapers closed by strikes—as they have been since late last year—the customary heavy newspaper promotion was out of the question.

Local stations marched into this breach. Storer Broadcasting's WJW-TV offered to (and did) originate its daily one-hour Dale Young Time from the boat show, in addition to giving advance and concurrent promotion. Other stations got behind the show by contributing extensive schedules before and during the event.

The result: attendance this newspaperless year reached 115,600, as against 104,300 a year ago when the newspapers were operating.

Richard O. Overmyer, associate director of the welfare federation, wrote to WJW-TV specifically but spoke of Cleveland broadcasters generally when he said the fund "is deeply indebted to the radio and television industry . . .

many thousands of Clevelanders will have a happier Christmas next year because of the exhibition's success, made possible by your foresight and spirit of civic responsibility."

Drive starts March 1 for Radio Free Europe

Committee members include S. L. Adler, Paramount TV Productions; John P. Blair, Blair & Co.; Leonard Golden- son, American Broadcasting-Paramount Theatres; Payson Hall, Meredith Broadcast- ing; Robert F. Hurleigh, Mutual; Robert W. Sarnoff, NBC; Loyd C. Sig- mon; Golden West Broadcasters; Frank Stanton, CBS; R. Peter Straus, WMCA New York, and John F. White, National Educational Television & Radio Center.

L.A. disc jockeys play for benefit of charities

Giving their all for charity, Los Angeles disc jockeys both bowled and played basketball yesterday (Feb. 17). The bowling took place at 5-6 p.m. before the cameras of KTTV (TV) for the benefit of the Los Angeles County and Bud Baker Memorial Heart funds. Ira Cook, personality at KMPC, was chairman of the event, third annual competition in honor of Bud Baker, who died of a heart attack Sept. 21, 1959, while conducting a contest at the Los Angeles County Fair.

The basketball game pitted a deejay team from KFWB against one composed of record industry promoters. It was staged in the city's Memorial Sports Arena, with the proceeds to go to Radio-Television, Recording & Advertising Charities of Hollywood.

KPRC entertains admen with listeners' valentines

More than 200 Houston agency executives were entertained last Thursday (Feb. 14) with a Valentine Day party at the KPRC studios.

Brightening their day were the returns from the station's annual contest, in which more than 2,000 listeners submitted home-made and, in some instances, hand-carved valentines.

Since no store-bought articles were acceptable, the KPRC listeners spent two weeks fashioning the clever, imaginative and sometimes very warm valentines,

KFDM takes agency men duck huntin'

KFDM Beaumont, Tex., used a rare sales decoy recently when it invited a group of agency men to a weekend duck hunt. Here, receiving a "real" decoy for a prize is hunter Charles Cooper, account executive, Glenn Advertising, Dallas. Others in picture (br): Howard Teitler, Dr. Pepper Co.; John Butler, Peters, Griffin, Woodward, KFDM's rep; Larry Cugini, Grant Adv., Dal- las, and Mrs. Lynne Dower, PGW.

Follow that Leader

A "playful and gentle" lioness named Leader padded about the streets of Chattanooga, Tenn., for 9 hours after escaping from new owners at WFLI in that city. She was finally found unharmed in an alley late at night.

WFLI bought Leader, a 50-pound, 5-month-old cub, as a promotional gimmick to go with a lion's roar on station breaks. Ron Dailey, WFLI disc jockey, was driving her to a high school for a personal appearance when Leader escaped, and lion-hearted Bill Hall and Bill Warren were assigned the task of tracking her down.

Mohammed replaces Mogubgb

When Fred Mogubgb left the film-making company Ferro Mogubgb & Schwartz last October he took his name along with him and left a gaping hole in the company's title, &. In search of a name as catchy as Mogubgb to fill the gap, the firm held a competition inviting contestants to submit three syllable names beginning with the letter M to form a new corporate title. Out of such entries as Martini, Mao Tse Tsung, Motherhood and Moglumgub emerged the winner, Mohammed, submitted by Robert T. Wolf of the Benton & Bowles agency.

FMK is still FM&S, but now it's Ferro, Mohammed & Schwartz. It's located at 249 East 49th St., New York.

Music ... music ... music • In less than three months after the premiere of "Stoney Burke" on ABC-TV (Mon., 9-9:30 p.m.), three companies have issued records on the theme music of the series. The companies which have issued the recordings, based on the music composed by Dominic Frontiere, are United Artists Records, Roulette Records and Capitol Records.

TIO presentation • The Television Information Office is distributing a 25-minute color slide presentation, "Television: Advertising," to its station members, for showing to community groups and station personnel. The presentation is the fourth and last in a series designed as community educational aids for broadcasters. The other three are "Television: Dimensions," "Television: Programming," and "In the Public Interest."

Award • The American Municipal Assn.'s "International" award has been presented to KTVU (TV) San Francisco-Oakland for furthering international understanding through its "Bridge to the Orient" films, which depicted the sister-city ties between Oakland and Fukuoka, Japan, and San Francisco-Osaka. The award was presented by Oakland Mayor John C. Houlihan.

Theory substantiated • WWDC Washington personality Carroll James tested his theory that people do listen to commercials by using a recent recording by the Boston Pops Orchestra. He held a contest asking listeners to identify every commercial in an orchestral medley of familiar commercial jingles. In the hundreds of letters received, at least 90% of the commercials were identified correctly.

Keller award to WBZ • World Without Sight, a documentary aired on WBZ Boston last November, was given the annual Helen Keller Award by the American Foundation for the Blind.

Mid-season CBS-TV promotion

According to CBS-TV, a new mid-season program promotion campaign the network and its affiliates are planning—which is about to get underway—is "probably the most extensive ever undertaken by a network at this time of year."

The network has distributed promotional aids packed in a 10-pound kit to affiliates. Included are trailers, slides, glossy prints, photographs, on-the-air announcement copy, and other such materials. The promotion is in behalf of CBS-TV's nighttime schedule.

Book marks WFGA-TV's fifth

WFGA-TV Jacksonville, Fla., has produced a 26-page color booklet commemorating the station's fifth anniversary. Affiliated with NBC and ABC, WFGA-TV shows over two-thirds of all local and network shows in color.

Two pages of the booklet are devoted to the station's activities at Cape Canaveral where it originated the first live telecast. WFGA-TV has since originated more network and pool programs from the Cape than all other stations combined.

INTERNATIONAL

BBC's second tv network to start in 1964

WILL USE 625-LINE TRANSMISSION SYSTEM

The BBC's second television network, to be known as BBC2, is now planning to start operations in April 1964. It will use the 625-line transmission system.

Weekly program output on BBC2 will start at about 25 hours of new programming. BBC-TV's present program production is about 60 hours a week. It is provided by 10 outside broadcast units, five regional production studios, eight major studios in London, the news operation in Alexandra Palace and regional news rooms and the world's largest tv film unit at Ealing Film Studios. BBC-TV programming is supplemented with syndicated film programs.

To start BBC2 with a 25-hour weekly schedule at least three more London studios will be needed, and a fourth will have to be found to expand the schedule to 30 hours a week. BBC2 plans to expand to 30 hours after about 15 months.

Color tv, which will start before the end of 1964, will be developed at a slower pace than originally planned. BBC-TV's first color tv studios at Television Center will begin operation in late 1965, and more color tv studios are planned for 1967.

Two thirds of Britain's population will be able to receive BBC2 by 1966.

Holland discusses commercial television

The Dutch government has endorsed the introduction of a second tv network in Holland. The proposed network would be operated on a commercial basis in contrast to the existing service which is non-commercial. It would be forced, however, to provide a considerable part of its air time to a non-commercial broadcasting organization.

The government plan is opposed by

existing broadcasting organizations in Holland. The discussion is expected to go on (partly in the courts) for some time, but the government has indicated it is convinced that by 1969 not two but three independent TV networks will exist in Holland. It's still undecided who would run the additional Dutch TV networks. There are several business groups indicating interest in commercial TV. Among them is an organization of 47 Dutch publishing houses.

Total weekly on-air time for the commercial (second) TV network in Holland would be about 30 hours at the start. Out of the total, 20 hours will be devoted to normal commercial TV while 10 hours will go to non-commercial programs handled by non-profit organizations.

No date has been set for introduction of the additional Dutch TV services.

Site picked for CBC building

A site has been chosen in Montreal for a $10 million headquarters for the Canadian Broadcasting Corp., to be built by 1968. The 25-acre site is bounded by Dorchester St. East, Papineau, Craig and Wolfe Streets. It is to be cleared of all buildings by the city of Montreal by Oct. 1. The Canadian government will pay Montreal $4,160,000 for expropriation and services on the property. The new headquarters will be an administrative center for CBC's Quebec provincial operations. CBC now has several properties in use in Montreal, including a former 17-story hotel.

Annual license fee needed by BBC

BBC Director-General Hugh Carleton Greene said in London that BBC needs the proceeds of a $14 annual license fee now or a $16.80 one in 1965. Speaking to the Parliamentary Press Gallery Lunch Club, Mr. Greene thought that the government now recognized that the only right way of financing BBC was by the license fee. “What we need to get us through the end of the 1960's is the full proceeds of a [S$14] license as from April 1, 1963.”

The present annual fee payable by every household with a TV set is $11.20 but the government keeps $2.80 of this as tax.

The director-general said that if BBC gets all the money of the current fee it could carry on until 1965 with the aid of its borrowing powers. At that point BBC would need a $16.80 license because of the delay and the extra costs involved in borrowing.

Reds add 700 hours to radio propaganda

The weekly “foreign radio service” broadcasts from 13 Communist-ruled countries have increased 700 hours to approximately 4,000 hours in 63 languages, according to the president of Free Europe Committee Inc., John Richardson Jr.

The Communist broadcasts include Esperanto, Mr. Richardson said in an address to the New York State Publishers Assn.

The work of Radio Free Europe since it was organized in 1949 has kept the Soviet Union off balance in the latter's program to dominate the minds of Europeans, Mr. Richardson said, and so has justified the wisdom of its founders.

The “quickening pace” of West European “unity” and the “conflicts apparent” in the world Communist movement now offer Radio Free Europe its “greatest challenge and opportunity,” he said.

Mr. Richardson said the Soviet Union now broadcasts 1,300 hours weekly of radio programs abroad and Red China broadcasts 700 hours; others, in order: East Germany, Cuba, Czechoslovakia and Poland (tied for fifth place), Romania, Bulgaria and Hungary. The extent of Communist monitoring of Radio Free Europe leaves “no doubt” that the Communists “deeply respect and fear our influence, our ability to break their internal monopoly of communications,” Mr. Richardson said.

Mr. Richardson said Radio Free Europe is the “single most important” channel of communication to Communist-dominated countries.

CBC schedules free political broadcasts

The Canadian Broadcasting Corp.'s English and French language television and radio networks will each provide five hours of free time for political broadcasts for the April 8 general election. Total of twenty hours will be divided into fifteen minute periods to provide 28 periods for the Conservative Party, 24 for the Liberal Party, and 14 for the New Democratic and Social Credit parties.

During last June's general election 26 hours of free time were provided. Distribution of the time was arranged by the CBC and the four political parties and was approved by the Board of Broadcast Governors.
Vast wasteland

Now do you think we shoot buffalo from train windows?

The battleship anchored in the river is Municipal Island, with the county courthouse and City Hall. Top center complex is Quaker Oats plant (right of dam), world's vastest oatery.

X marks WMT Radio's studios, surrounded by 105,000 city folk. Although residents of the nation's wealthiest agricultural state, they help the state produce industrial income that's twice as great as farm income. They also help make WMT Eastern Iowa's habit.

‘Miracle’ is the word used by this commercial tv company

There’s been something of a “miracle” in the way the number of Japan’s tv sets have increased over the past 10 years following the start of tv in that country. At mid-year of 1962, for example, the total of registered tv receivers already had reached 11,223,000, or second in set count only to that of the United States.

Impressive as this figure might appear, it actually is conservative and hardly as accurate or realistic as the 15,263,000 total used by set manufacturers and exporters to indicate set totals.

They arrive at this higher figure by a compensating formula—multiplying the “official” registration figure by 1.36. The formula was constructed after a study of the people’s habits.

In Japan, the government supports its own broadcast system (NHK) and in the financing imposes a compulsory levy of 300 yen (5.84) per month on each television set.

The study of set registration indicated many new set owners fail to register or otherwise conceal ownership to avoid the government levy. Hence the formula used for estimating sets.

Though an estimate, these figures usually are considered more reliable than ones with which Americans are advised to work. It is also the basis on which we would recommend that Americans question the source when presented with figures said to represent total tv set counts in Japan.

**Second to U.S.** • Set growth continues. Last July, Japan produced 390,-000 receivers, of which some 30,000 were earmarked for export, and the remaining, larger number absorbed by domestic purchases, or an increase in Japan of some 12,000 sets each day.

One projection had total sets in Japan at the 17 million level by Christ-
The same power goes in...

but so much more comes out of a Zenith!

Any portable transistor radio depends on a battery for its power. But how a radio performs—that’s a different story. That depends on the radio itself.

A Zenith portable gives you the most out of a battery—because a Zenith is carefully crafted, precision engineered to more exacting standards. Every component is carefully selected and installed by hand.

And this makes a difference you can hear in any Zenith radio you buy.

To be sure, it costs more to build a radio this way, but you get a lot more radio for your money.

If quality is important to you, as it is to most people—choose a Zenith. The same power goes in... but so much more comes out!

To give you greater economy, all Zenith Portables are powered by ordinary flashlight batteries. They cost less than battery packs. They are available almost everywhere. And for even greater savings, a special Battery Saver Switch on several luggage style portables can actually double battery life!
Producers of broadcast commercials in 12 countries outside the United States have entered 174 tv and radio commercials in the third annual International Broadcasting Awards competition of the Hollywood Ad Club. This is roughly one-eighth of the 1,400 entries, 1,000 of them for tv.

Among nations which entered commercials in the IBA competition, Great Britain leads with 92. Canada ranks second with 36, followed by Japan with 10. Other countries are: West Germany, 9; Australia, 7; Spain, 6; Jamaica, W.I., 4; New Zealand, 3; Ceylon, Kenya, East Africa, and The Union of South Africa, 2 each; and the Philippines with one entry.

Henry J. Kaiser, chairman-founder of Kaiser Industries and Kaiser Foundation Hospitals, has been named the recipient of the new “IBA Free Enterprise Award,” which will be presented at the banquet by Thomas W. Sarnoff, NBC West Coast Division vice president, and general chairman of this year’s IBA. Mr. Kaiser will also address the dinner, speaking on “Free Enterprise—the True Foundation of a Free World.”

Canadian set sales show increase in ’62

Sales of made-in-Canada radio and television receivers were up in the first 11 months of 1962 against the same period in 1961, according to figures released by the Dominion Bureau of Statistics. Domestically produced radio receiver sales totaled 600,914 units against 540,382 in 1961, while Canadian-made tv receiver sales totaled 390,812 units compared with 325,502 in the January-November 1961 period.

The major increase in radio receiver sales was in automobile sets, while there was a drop in domestic portable set sales. Transistor receivers were largely imported as the Dominion Bureau of Statistics reported 371,804 units valued at $4,224,667 in the first seven months of 1962.

Pearson to rep in U.S. for All-Canada stations

Canadian tv and radio stations represented in Canada by All-Canada Radio & Television Ltd. have appointed Pearson National Representatives, New York, to handle that function in the U. S. Announcement of the appointment was made last week by All-Canada President J. Stuart Mackay and Joseph Savalli, president of Pearson.

Of 43 stations on the All-Canada list, 23 have signed the agreement and 20 are tentatively committed.

Pearson offices in San Francisco, Los Angeles, Dallas and Atlanta will be directly active in representing the Canadian stations.

New Canadian tv plans April start

CJPM-TV Chicoitumi, Que., is to begin operations April 1. The station is owned by lumberman John Murdock and his sons Craig and Paul. It will operate as an independent station on ch. 6 with 68 kw video and 34 kw audio. Its beginning schedule will be 70 hours a week with about 20 hours of programming provided by CFTM-TV Montreal.

Paul J. Audette, former manager of CKRS-TV Jonquiere, Que., is general manager of CJPM-TV. Claude Blain, previously with CKRS-TV and CKTM-TV Three Rivers, Que., is assistant general manager. Paul L’Anlais Inc., Toronto, represents the station in Canada. Forjoe & Co., is U. S. representative.

Help to Nigerian tv

S. O. Adebo, Nigerian Ambassador to the United Nations, receives a desk model of Telstar presented by AB-PT President Leonard H. Goldenson. ABC International Television, whose affiliates include WNTV (TV) in western Nigeria, has negotiated with eight U. S. program distributors for 38 series to be programmed on the Nigerian outlet. Among the programs are The Defenders, The Lucy Show, Dennis the Menace, Leave It To Beaver, One Step Beyond, The Eleventh Hour, You Are There and Robert Herridge Theater. The latest count of ABC International affiliates is 35 stations in 18 different countries.

Canadian women’s habits

A survey of the listening and viewing habits of the wives of members of the Toronto Sales Research Club, made early in February, showed that in case of a disaster 75% of the women would turn to radio for information; 50% of the ladies tune in afternoon television dramatic shows, mostly from Buffalo, N. Y., and they listen on an average of 3 hours daily to radio during the daytime, with news a principal interest.

The survey was made by Andy Mc Dermott of Radio & Television Sales Inc., Toronto station representation firm, before taking part in a panel discussion at the Toronto Sales Research Club.

MGM makes Mexican sale

MGM-TV has concluded its first major license deal in Mexico with the sale of four series and 187 cartoons and short subjects to Televisa’s Mexican network.

The series licensed by Televisa are The Eleventh Hour, Zero One, The Thin Man and Father of the Bride. Short subjects are 52 Our Gang comedies and the 135-subject MGM cartoon library.
17,000 Good Neighbors!

Through city, town and country, there are more than 17,000 neighborly Cities Service Dealers waiting to serve you...with the best in petroleum products.

Out front in Quality...Out front in Service, too!
Rise in film imports predicted for Japan

The outlook is optimistic in 1963-64 for U. S. distributors exporting TV films to Japan, the Tokyo office of the Motion Picture Export Assn. reported last week.

Irving Maas, MPEA vice president in Tokyo, said the Japanese finance ministry had notified him on Feb. 4 that a decision would be made shortly on the country's policy for the fiscal year beginning April 1. Mr. Maas noted that for the fiscal year which ends on March 31, Japanese TV film buyers could spend $3.3 million for the purchase of programs from overseas sources, which are largely American.

He said he has been assured that the import budget for 1963-64 will be "greatly increased," adding that in recent months the Japanese finance ministry has been considering an increase to approximately $7 million for the next fiscal year.

The association has been attempting to persuade the Japanese finance ministry to eliminate restrictions on TV remittances, Mr. Maas added. He stressed that dollar allocation has risen steadily from $1.1 million in 1959-60 to the current $3.3 million.

Canadian TV penetration is 89%

There are 4,157,700 television households in Canada, equivalent to 89% of all households in Canada, according to an estimate of the Bureau of Broadcast Measurement, Toronto, Ont., based on its fall survey. The new estimates show that in Quebec province 93% of all households have television. Lowest concentration is in Newfoundland with 66% of television households.

In metropolitan Montreal with a population of 1,967,400 and 518,300 households, 95% or 492,400 households have television. In metropolitan Toronto with a population of 1,664,800 and 439,000 households, 95% or 417,100 of the households have television.

In metropolitan Vancouver, Canada's third largest city, with population of 812,400, there are 218,900 or 91% of all households with television equipment. In metropolitan Winnipeg the population is 485,100 and 93% or 121,600 households have television.

Columbia Records buys French record company

Columbia Records, a division of CBS, has introduced Disques CBS in France, according to Goddard Liebenson, president. Columbia acquired control of Arteco, an independent record firm in France, which currently markets its catalog under the Odeon label. All products will be transferred to the CBS label.

Bernard Taylor, director general of Arteco, has been appointed to a similar position with Disques CBS. Mr. Taylor reports to Peter de Rougemont, vice president, European operations, CRI International.

Columbia Records first introduced its label overseas in May 1962 in England and Ireland. It now has agreements with foreign record firms in Japan, Latin America, Greece, Spain, The Netherlands, Denmark, Norway, Sweden, Finland, Italy, Belgium and Luxembourg.

Women want membership on Canada's BBG

One of the last briefs to be presented to Premier John Diefenbaker at Ottawa before dissolution of the Canadian Parliament on Feb. 6, was one from the National Council of Women, asking for the appointment of four women to the Board of Broadcast Governors.

One of the four would be a permanent member of the BBG if the National Council of Women's brief is accepted. The other three would be members of the BBG who attend only the six or seven meetings of the full 15-member board held annually.

At present there is only one woman on the BBG, Dr. Mabel Connell of Prince Albert, Sask. There were two women members when the BBG was formed in 1958. There are three permanent members of the BBG, Chairman Dr. Andrew Stewart, Vice-Chairman Carlyle Allison and former broadcaster Bernard Goulet.

The National Council of Women represents 700,000 members across Canada.

Abroad in brief...

CBS-TV sponsor • Clairol Inc., Toronto, Ont., has started partial sponsorship of two half-hour afternoon programs on CBS-TV. The 52-week contract started on Feb. 5 on The Loretta Young Show and the Canadian program Scarlett Hill, both on five times weekly basis. Agency is Foote, Cone & Belding (Canada) Ltd., Toronto.

CKCO joins ABC • CKCO-TV Kitchener, Ont., is first Canadian television station to become an associate member of the Audit Bureau of Circulation.

Representative appointed • Owners of WBNB-TV St. Thomas, Virgin Islands, and its new radio sister, WBNB-AM, have appointed Mrs. Fred Selden, 300 E. 51st St, New York, as U.S. national representative. WBNB operates full-time on 1000 kc with 1 kw. New York telephone is Plaza 9-5063.

BROADCASTING, February 18, 1963
WHAS TO JOIN ABC RADIO
Is the sixth 50-kw station to affiliate with network during the past year

WHAS Louisville, one of the country’s best-known radio stations, joins ABC Radio as an affiliate on March 4, Robert R. Pauley, president of the network, announced last week.

WHAS had been a CBS radio affiliate for 28 years but turned independent a few years ago in protest against that network’s then-new “Program Consolidation Plan.” Mr. Pauley said WHAS is the sixth 50 kw station to join ABC Radio in less than a year, and he forecast that within the next six months, three additional 50 kw outlets would sign up.

The station operates on 840 kc and is owned by WHAS Inc., of which Victor Sholis is vice president and director. WHAS Inc. is owned by the Louisville Courier-Journal and Times. Mr. Sholis said the WHAS management has been “impressed by the aggressive manner in which ABC manages its radio network.” He added that the affiliation will “enable us to expand program services to our listeners.”

Mr. Pauley said the signing of WHAS places ABC Radio “another important step closer” to its goal of a “balanced” network. He explained this to mean a network composed of both 50 kw and smaller stations to bring programming to the widest number of people.

Changing hands...
ANNOUNCED • The following sale of station interests was reported last week subject to FCC approval:

- WLLH-AM-FM Lowell-Lawrence, Mass.: Sold by Gerald Harrison and associates to Arnold S. and Daniel M. Lerner and Joseph M. Mufson for $275,000. Buyers own WADK New- port, R. I. WLLH is a fulltime station operating on 1400 kc with 500 w day-time and 250 w nighttime. WLLH-FM is on 99.5 mc with 12.2 kw. Broker was Blackburn & Co.

Victor Sholis, vice president and director of WHAS Louisville, signs an affiliation contract with ABC radio. Looking on are James H. Topmiller Jr. (I), WHAS sales director and Earl Mullin, ABC vp in charge of station relations for the radio network.

Kudos for NAB’s public service school
Praise and thanks poured into the NAB last week from non-profit organizations which participated in the association’s first institute on public service broadcasting in Washington 10 days ago (Broadcasting, Feb. 11).

It was so well received that a spokesman for the Assn. for Professional Broadcasting Education has asked the NAB to promote and sponsor similar seminars across the country in cooperation with state associations. Typical of the comments was that of William B. Bloom of the Department of Agriculture who wrote the NAB: “Each of us who attended came away with a much better understanding of the problems associated with public service broadcasting.”

The institute, directed by NAB Manager of Public Relations John M. Couric, was designed to help public service institutions in seeking free time from commercial stations; to understand the problem involved, and to prepare spots and programs for airing.

Louis G. Buttrill of the National Foundation, wrote the NAB that “all of us felt it was an outstanding program. The institute was one of the best...
planned, best executed and most interesting programs I have ever attended. The information it provided for those of us who work regularly with broadcasters was invaluable." William Ruder, president of the New York public relations firm of Ruder & Finn and principal speaker at the institute banquet, said the idea "was absolutely superb."

"For the first time around, the public service institute was a bell ringer," wrote Frank X. Kelly of the American Legion. "The program provided much valuable information for those of us who are just becoming involved with the broadcast media," said Rita A. Bunin of the American Nurses Assn.

NAB President LeRoy Collins noted the institute was one of many public relations projects in this area and said the NAB would "continue the momentum" started by the institute with varied activities. "We are pleased that it was so successful," he said. "We regard our continuing liaison with public service, charitable and civic organizations as one of the major areas of NAB public relations activity."

WCBS-TV sets ad rates for early morning shows

WCBS-TV New York, which will start around-the-clock telecasting on Feb. 26, last week released information on costs to advertisers. Feature films will be carried in the early morning period, beginning at approximately 3:30 a.m. and continuing until about 5:45 a.m. each day.

The station will schedule two feature films each morning, although on some weekend mornings there may be three, since sign-on time presently is 5:45 a.m. on weekdays and 7:15 a.m. on Saturdays and Sundays. Various forms of sponsorship are available, including full sponsorship of the complete early morning period or a minimum of 1/12 sponsorship, which provides two commercial minutes during each daily presentation.

Twenty-four commercial minutes are offered each morning. The rates to advertisers decline, depending on the number of days and the percentage of sponsorship. For example, an advertiser wishing to buy the entire time period, seven days a week, would spend $1,080 each night; four to six days, $1,320 per night and one to three days, $1,560 per night. On the other hand, an advertiser buying 1/12 sponsorship, entitling him to two commercials per night, would spend $170 per night if he buys one to three days; $150 per night for four to six days and $130 per night for seven days.

If completely sold out, the schedule will bring in to WCBS-TV revenue ranging from approximately $7,000 to $14,000 weekly.

A new trade group is formed in Washington

ASSN. ON BROADCASTING STANDARDS DEFINES GOALS

A new trade organization, the Assn. on Broadcasting Standards Inc., was formed by executives from 50 regional radio stations at a meeting in Washington Feb. 8 (CLOSED CIRCUIT, Jan. 28). E. K. Hartenbower, vice president-general manager of KCMO Kansas City, is president of the new group, which plans to establish Washington offices with a full-time executive secretary.

The association's purpose, as defined at the first meeting, is "to assist the appropriate government authorities and the industry in assuring optimum radio service for the people of the U. S. and to follow the intent of Congress in the Communications Act." Membership has been extended to any station "with a sincere desire to carry out this purpose" but the organizers were representatives of Class III regional stations. A spokesman for ABSI said that its appeal would fall primarily within that class of stations.

The association will study engineering problems and represent the industry in technical matters before the FCC and Congress. Two of the first problems facing the association, and discussed at the organizational meeting, are the FCC's pre-sunrise rulemaking and daytime stations' demands for 6 a.m. to 6 p.m. operation and (2) moves by clear channel stations for operation with powers in excess of 50 kw.

George Comte, vice president-general manager of WMJ Milwaukee, was elected vice president of ABS. Frederick Houwink, vice president-general manager of WMAL Washington, was elected secretary and Andrew Haley of the Washington law firm of Haley, Bader & Potts, general counsel. Messrs. Hartenbower, Comte, Houwink and Haley make up the association's executive committee and have been commissioned to hire an executive secretary. Several names are being considered and a selection is expected in the near future, it was announced.

Office Space • Temporary office space for the association has been donated by WMAL and Mr. Houwink said that interested broadcasters should correspond with him at the station, 4461 Connecticut Ave., N.W., Washington 8, D. C. The following were elected directors of ABSI, in addition to the members of the executive committee:

Lionel F. Baxter, Storer Broadcasting

ATTRACTION

WESTERN BUYS!

Full time radio station in attractive far west market. Land and building valued at $50,000.00 included in sale. Making money on gross of $70,000.00-plus showing good annual increases. Priced at $140,000.00 on basis of $40,000.00 down and a payout running approximately 13 years. Another H & L Exclusive.

* * *

Excellent power, daytime-only radio station serving marketing area of 200,000. Heavy fixed assets. Grossing $75,000.00 monthly and capable of doing much better. Priced at $175,000.00 with $50,000.00 down and balance over ten years. Another H & L Exclusive.
Quarton, good await an designate Little Sanberg, in budget 122 midnight, Co.; George C. Hatch, KALL Salt Lake City; W. B. Quarton, WMT Cedar Rapids, Iowa; James Schiavone, WWJ Detroit; Lester M. Smith, KJR Seattle; Ben Strouse, WWDC Washington; Allen M. Woodall, WDAK Columbus, Ga., and Jay W. Wright, KGW Portland, Ore.

Mr. Wright was appointed chairman of an engineering committee to work with the firm of Jansky & Bailey Inc., Washington, in formulating the association's technical positions and presentations. In addition, former FCC commissioner John S. Cross was retained as a special engineering consultant to the association.

Mr. Houwink was named chairman of the finance committee and directed to prepare a budget and schedule of membership dues. ABSI will hold its second membership meeting April 1 in Chicago in conjunction with the NAB convention.

**Austin catv franchise is second in 2 weeks**

A second franchise for a community antenna tv system has been granted by the Austin, Tex., city council—just two weeks after another company, in which

**Discount chain uses simulcast to fight blue laws**

The crowds turned out on a Sunday for a one-hour simulcast on WCHS-AM-TV Charleston, W. Va. The remote originated at Heck's Inc., a discount house, which used the time to interview patrons about a proposed Sunday closing law.

Fred Haddad, president of the discount chain, said he used the simulcast "to reach the greatest possible audience. We also felt that this was a good way to bring our story to the attention of the legislators." Mr. Haddad also gave the stations a check to pay for equal time for proponents of the blue laws.

**Vice President Lyndon Johnson's wife has an interest, received a non-exclusive grant**

The latest successful bidder was TV Cable of Austin Inc., owned by John Campbell, operator of a catv in Mineral Wells, Tex. Earlier, Capital Cable Co. signed a contract with the Austin city council to install a community tv system. Capital is a subsidiary of Midwest Video Inc., which operates a group of systems with headquarters in Little Rock, Ark. (see story, page 46).

LBJ Co., licensee of KTBC-TV, Austin's only tv station, has an option to purchase 50% of Capital Cable. Mrs. Lyndon B. Johnson is the principal owner of LBJ Co.

**Oklahoma association plans FCC ‘seminar’**

Oklahoma broadcasters are going back to school to learn the facts of life about the FCC and its rules and regulations.

The Oklahoma Broadcasters Assn. has scheduled a two-day seminar, March 9-10, in cooperation with the U. of Oklahoma, at Norman. Guest "lecturers" will include Vincent Wasielwiski, executive vice president of the NAB, Kenneth A. Cox, chief of the FCC Broadcast Bureau who is awaiting Senate confirmation as an FCC commissioner, and Clee Fitzgerald, Stillwater, Okla., attorney for OBA.

Commissioner-designate Cox will make the featured address and will conduct classes on "Introduction to FCC Rules and Regulations" and "Program Logging," William S. Morgan, general manager of KNOR Norman and president-elect of OBA, said the studies will be devoted to federal requirements "that control daily operations of commercial radio stations." He said the seminar is...
National population prepared for "The BFC's Broadcasting," and with the exclusive adver-sing agency personnel and leading educators and students have been invited to attend.

BFC adopts '63 budget of $586,070 for radio-tv

The Broadcasting and Film Commission of the National Council of Churches has adopted a 1963 budget of $586,070, exclusive of designated funds for production. The BFC works with the three television networks on religious programming, and has, in addition, three non-network tv programs, three network radio programs, and four children's tv programs.

Robert C. Currie Jr., associate executive director for programs, speaking at BFC's annual meeting Feb. 7-8, said "The availability of time and facilities for our broadcasts is something staggering to behold. Above all we must be prepared to take bold and far-reaching steps."

NBC protests its Moscow walking papers

SEEKS HELP FROM STATE DEPT. AND KRUSHCHEV

Expulsion of NBC News correspondent Russell Jones from Moscow by the Soviet government and an order to close the NBC News bureau there last week brought immediate protest from NBC President Robert E. Kintner.

In a telegram sent Feb. 12 to Secretary of State Dean Rusk, Mr. Kintner denied the action of "anti-Soviet" nature of NBC-TV's White Paper documentaries, "The Death of Stalin" and "The Rise of Krushchev" broadcast respectively on Jan. 27 and Feb. 3.

According to the Soviet news agency "Tass," the step was taken in connection with "a recent series of malicious anti-Soviet broadcasts by (NBC) which grossly distorted Soviet reality" and which were meant to "arouse in the U. S. population hostility toward the Soviet Union."

Meanwhile, William R. McAndrew, executive vice president, NBC News, announced the network intends to continue its four-part White Paper series on Soviet politics. Next program in the group is "Who Goes There?—A Primer on Communism" to be broadcast on March 1. Final program in the series, "Encyclopedia of Communism" will be shown on April 10 as a 90-minute evening show.

In Washington, the State Dept. press officer, Lincoln White, said: "The United States government deplores the expulsion of NBC's correspondent from the U.S.S.R. The act is obviously an attempt by the Soviet Government to exercise indirect censorship on an American communications network."

NBC was not alone in its protest. CBS News President Richard S. Salant also voiced concern with the Soviet move. In a cable to Mr. Zamyatin, Mr. Salant said that CBS News was distressed to learn of the affair and that it represented "a serious blow to the
Another NBC newsman gets temporary heave-ho

Robert Asman (l), producer of "This Is NBC News," and correspondent Ray Scherer (r), host of the program, look at the once full—now blank film which arrived from Pakistan last week.

Expulsion appeared to be the keynote for NBC newsmen last week. Almost coincidentally to the expulsion of its correspondent from Russia (see story, page 123), Welles Hangen was ordered to leave Pakistan.

Mr. Hangen had asked Pakistan Foreign Minister Zulfiquar Bhutto if someone had tampered with 3,400 feet of film the newsman shot during an interview with Pakistan President Mohammed Ayub Khan.

When the film arrived in Washington for use on "This Is NBC News", it was discovered that not only was the film completely exposed, but the magnetic sound track had been erased.

The newsman, noting that the shipment had been held up for two days and that NBC representatives in Karachi had not even tried to ship the film to Washington, complained to Minister Bhutto. The minister then ordered Mr. Hangen to leave the country.

However, the Pakistan government later in the week rescinded the order, after Mr. Hangen apologized to Minister Bhutto, and arrangements began for another interview.

The controversial film dealt with the Pakistani position in negotiations with India over the Kashmir dispute. Minister Bhutto reportedly had told Mr. Hangen earlier that he feared President Ayub Khan had given away important Pakistani bargaining points during the interview.

ADVICE AND PROPHECY

Better radio program types may return if buyers found

Don't get nostalgic and wish back the old radio days; some of the programming was pretty bad. Radio's better program forms, however, may return, if advertisers express interest in them.

The advice and prophecy was offered Feb. 9 by William Kalund, national program manager of Westinghouse Broadcasting, at the first in a series of three workshops, scheduled by the New York chapter of the American Women in Radio & Television.

Harold Fair, tv-radio vice president of Bozell & Jacobs Advertising, advised radio programmers to consider audience needs and requirements in program planning. Advertiser support will follow, he added.

A third panelist at the "Radio . . . Now!" workshop session, Mary McKenna, vice president, research and sales development, Metromedia Inc., emphasized the need for better audience measurement of radio—measurement of "who within the family listens" to various programs.

Later, she said that WNEW and six other New York radio stations are participating in a homes-by-income-bracket and people-by-age-group radio research project in cooperation with The Pulse Inc.

Other speakers at the AWRT workshop (which included two other panels, "My Money—Whatever Became of It?" and "Don't Make Waves") included Sylvia Dowling, Benton & Bowles; Beverly Smith, McCann-Marschalk; Allan Kalmus, The Kalmus Co.; Gerald Dickler, attorney; Betty Furness, radio-tv personality, and Margaret James, Brooklyn review staff, Bureau of Internal Revenue.

March 9 and April 6 are the dates for the other two AWRT panels, which will be held, at 10 a.m., at McCann-Erickson Inc.'s offices, 485 Lexington Ave., New York.

CAMART OPTICAL FX UNIT AND PRISMS

For 16mm — 35mm — TV Cameras Live TV, Animation, Motion Pictures

More than 27 variations in optical effects, montages, and distortions with expensive opticals. Images may be photographed in still motion or forward and reverse rotation.

Complete unit consists of a four surface prism, mount revolving housing and camera base assembly.

Advance registrations pouring into NAB
FILM EXHIBITORS ADDING TO RUSH FOR FLOOR SPACE

The “biggest ever” NAB convention is in prospect for Chicago March 31-April 3 as advance registration of delegates and reservation of space by exhibitors is coming into NAB Washington headquarters in near record numbers.

Adding to the “big” label this year is the return of film exhibitors who are associate members of NAB after an absence of several years.

Everett E. Revercomb, NAB secretary-treasurer and convention manager, said that 760 broadcasters had pre-registered as of last Thursday (Feb. 14) for the convention in Chicago's Conrad Hilton Hotel. Registration in Washington closes March 18 with early signing delegates getting preference in convention hotel accommodations and luncheon and banquet tickets. Also, it costs $30 to register in Chicago and only $27.50 for early signers.

The engineering exhibit in the Hilton's huge basement showroom already has attracted 56 manufacturers of broadcast equipment, Mr. Revercomb said, assuring a record allotment of floor space. The 1962 exhibit, requiring 28,000 square feet of floor space, was the largest ever assembled, he said.

TV program producers and syndicators will show their wares in the Pick-Congress Hotel, with 17 reserving space to date. Beginning in 1964, the film people will return to the main NAB exhibit hall for the first time since 1955. They have continued to run their own exhibits in conjunction with the convention but not as an official part of the NAB show. They have, however, maintained hospitality suites over the years and will continue to do so, the NAB said.

Sydney Metzger, RCA space scientist, will address the April 1 luncheon session of the Broadcast Engineering Conference, running concurrently with the convention and under the auspices of the NAB. Mr. Metzger, in RCA's Astro-Electronics Div. at Heightstown, N.J., was in charge of the development of early radio equipment for Project Score and Tiros, the weather satellite.

He also was manager of communications systems for Project Relay, RCA-built communications satellite which now is in orbit. Speakers for the April 2 and 3 engineering luncheons are expected to be named this week.

Both separate and joint sessions for radio and TV engineers are planned, according to George Bartlett, NAB manager for engineering. Highlight of the conference will be the presentation of the 1963 Engineering Achievement Award to Dr. George R. Town, dean of engineering at Iowa State U. (BROADCASTING, Feb. 4).

Equipment problems delay WOOK-TV

WOOK-TV (ch. 14) Washington, D.C., the first television station programmed primarily for a Negro audience, was beset by a variety of technical and ethnic problems last week. By week's end, however, the station was hopeful all difficulties would be cleared away.

The technical difficulties—in the station's transmitter—prevented WOOK-TV from meeting its advertised on-air target date of Monday, Feb. 11. And by Thursday the station was still not broadcasting.

The ethnic problems involved the complaints of prominent Washington community Negroes, including representatives of the Urban League and the

AMST directors plan Chicago meeting during NAB convention

Members of the Board of Directors and the staff of the Assn. of Maximum Service Telecasters Inc. met at New Orleans on Feb. 8. Plans were made for the annual membership meeting, which will be held in Chicago at 9:30 a.m. on Sunday morning, March 31, at the Conrad Hilton Hotel. Present at the meeting were (l. to r., front row): Lester W. Lindow, executive director, AMST; John H. DeWitt, president, WSM-TV Nashville; Lawrence H. Rogers II, executive vice president, Taft Broadcasting Stations, Cincinnati; Jack Harris, president of AMST and vice president of KPRC-TV Houston; Charles H. Crutchfield, president, Jefferson Standard Broadcasting Co., Charlotte, N.C.; C. Wrede Petersmeyer, president, Corinthian Broadcasting Corp., New York; Harold V. Hough, vice president, WBAP-TV Fort Worth; (second row) James M. Moroney Jr., vice president, WFAA-TV Dallas; Harold C. Stuart, president, KVOO-TV Tulsa, Okla.; Roger W. Clipp, vice president, Triangle Stations, Philadelphia; Edgar F. Czarra Jr., Covington & Burling, Washington; Carter M. Parham, president, WDEF-TV Chattanooga; C. Howard Lane, president, KOIN-TV Portland, Ore.; Ernest W. Jennes, Covington & Burling, Washington; Howard T. Head, A. D. King & Assoc., Washington; A. Louis Read, executive vice president, WDSU-TV New Orleans; Ward L. Quaal, executive vice president, WGN-TV Chicago; Joseph B. Epperson, engineering vice president, Scripps-Howard Broadcasting Co., Cleveland; D. L. Provost, vice president, The Hearst Corp., New York; Carl J. Meyers, vice president, WGN-TV Chicago; Edgar B. Stern Jr., president, WDSU-TV New Orleans.
Bishop Sheen proposes a 'Science Sunday'
TELLS WASHINGTON MEDIA GROUP TO PUSH THE IDEA

A Science Sunday, a re-awakening of love of country and using television to educate the world, were offered to the Catholic Apostolate of Mass Media, as contributions the group could make to the media.

The ideas came from Bishop Fulton J. Sheen of New York, National Director of the Society for the Propagation of the Faith, at the second annual CAMM Communion breakfast in Washington, Feb. 10.

Bishop Sheen likened radio and television to the Old and New Testaments, respectively, and referred to television of today as the Roman roads were to the spread of Christianity in the early centuries—"a means of prolonging The Word."

The idea for a Science Sunday, the Bishop explained, is to publicly thank God for "these great blessings of our technical, material civilization."

The second suggestion of piety was offered with particular relationship to patriotism. Bishop Sheen asked in rhetoric, "Why is it that we do not have in our national media anything that awakens a strong love of this great country of ours?—Can it be that we are united more when there is a hate outside than by a love inside?"

He asked for a national program to remind us of "our history, our liberties, our rights and our great heroes."

He suggested TV's use in helping educate the world, "Because we do not always bring in through mass media the best influences."

The Bishop concluded his talk by reminding CAMM members that America "is on the kind of a way of the Cross—carrying the burden of a starving, hungry world. And the long arm of providence is reaching out to the shoulders of the United States and saying, 'Take that burden. Carry it! Bear it! Bear it in a way that is morally responsible.'"

"And we may take it up, for we are carrying a nobler burden than we know, we are carrying even a greater burden than we deserve."

Bishop Sheen was introduced by FCC Chairman Newton Minow, who referred to the speaker as one who has "truly irrigated the wasteland." Chairman Minow was introduced by Robert E. Lee, FCC commissioner and CAMM president.

Vincent Wasilewski, NAB, was named chairman of the program com-

KMPC spots on KGBS

It's not very often that one radio station buys time on another radio station in its own home town, or that the other station will agree to sell time to a rival who wants to woo its listeners. But it has happened—and in the highly competitive community of Los Angeles, where KMPC, which broadcasts around the clock, is using announcements on KGBS, a daytime station, to invite KGBS listeners to switch to KMPC after KGBS signs off.

The deal was set by Loyd C. Sigmun, executive vice president of KMPC, and Wendell B. Campbell, vice president and general manager of KGBS.

National Assn. for the Advancement of Colored People, that the new tv station would carry the segregation problem to the airwaves.

The Negro leaders, who said they feared the station would show the Negro "in the tap-dancing, shooting type of program" followed in Negro radio programming, carried their protest in person to FCC Chairman Newton N. Minow.

At a meeting in the chairman's office Tuesday, which was also attended by Commissioner Robert E. Lee, the leaders said they shouldn't be forced to rely on segregated stations for Negro representation on television.

National Problem is racist. They also made it clear they weren't concerned only with WOOK-TV. They said they considered the problem to be national.

The chairman reportedly told them that if they wanted to raise the question nationally, they could request the commission to institute an appropriate rule-making. Regarding WOOK-TV, he suggested they discuss the matter directly with station management.

The Negro leaders took his advice and met with Richard Eaton, president of United Broadcasting Co., licensee of WOOK-TV—and reportedly, got some satisfaction. Mr. Eaton assured them that the station would not program anything "distasteful" to them.

Moreover, John Panagos, vice president of UBC, said Mr. Eaton and the Negro leaders have agreed to "sit down every five or six weeks to see if anything on the station was distasteful."

Although the technical problems were still unsolved as of Thursday, Mr. Panagos said it was "hoped" the station would be able to get on the air with its premier program—a five-hour "musical extravaganza"—by Friday or Saturday (Feb. 15 or 16).

Staying in touch is media responsibility

Gene Wilkey, vice president and general manager, KMOX-TV St. Louis, last week called on mass media to keep in touch with the people of America as well as with developments and new trends abroad.

Mr. Wilkey spoke to the St. Louis Rotary Club on Feb. 14. In his talk, Mr. Wilkey reviewed current "challenges" in communication.

One, he said, is an obligation of mass communications media to act as a "receiver" to watch and listen to what's going on in the world.

Another challenge is the necessity of "remaining free," he said noting the current relationship of government and broadcasting and suggesting that inevitable effects of increased government regulation could be an "increasing uniformity."

Mr. Wilkey also warned that a challenge presents itself to mass communications media in assessing "high-cultural ground" by raising sights at a rate that doesn't outdistance the capacity of people served. Thus, a companion challenge is for the mass communications media in the U. S. "to stay popular...to keep in touch with the public." By accepting what is the popular regard for entertainment on TV or in newspapers, media then won't assume "a complete intellectual collapse is just around the corner."

Communication, response sought in Chicago survey

WBBM-TV Chicago is conducting a survey to evaluate its ability to "communicate to specific parts of its audience and get a significant response." During a recent half hour of the station's Late Show, devoted to films of Chicago's transportation facilities, viewers were asked questions about their personal transportation problems.

Prior to the show, ballots with various transportation questions were printed in four Chicago newspapers and other ballots distributed to commuters. Ten of these printed questions were asked during the program so viewers had to watch the show to answer properly.

WBBM-TV has given the returned ballots to psychologist, Dr. Gary Stein. He will feed their results to computers to ascertain viewer habits and a public analysis of commuting problems.
Advertising 1980: will it be legal then?

FONDREN WARNS AGAINST ANTI-ADVERTISING TRENDS

The FCC’s Omaha tv probe is just another step along the road toward “advertising 1980” when businessmen may have to get together to find ways to have advertising made legal once more. This was the warning sounded by Lee Fondren, station manager-sales director, KLZ Denver, in a talk Tuesday before the Broadcast Advertising Club of Chicago.

The present trend not only by the FCC but also by other government agencies and Congress itself, Mr. Fondren cautioned, would seem to indicate that by 1980 there will be no advertising at all. By that date it would appear all advertising will have been eliminated through progressive lawmaking and regulating “in the public interest.” Program control and advertising control go hand in hand, he indicated.

Mr. Fondren first warned of this trend in his talks under the same title of “Advertising 1980” while he was president of the Advertising Assn. of the West in 1961-62.

Speaking as though he were in 1980 and reminiscing, Mr. Fondren “recalled” how broadcasters went along with government suggestions to clean up programs and air more and more noncommercial features “until one day the balance was lost. Between the increasing demands for more and more free time for culture and the pressure to reduce the number of commercials on the air, there wasn’t enough money from commercial time left to support the good education features.”

Still recalling in “1980,” Mr. Fondren said that “most of us failed to see in these developments the foretelling of things to come for all mass media.” If total destruction of advertising “as we knew it” was not the goal, he continued, “then whittling away at its foundations must have been.”

Getting back into 1963, Mr. Fondren emphasized that the only way to stop the trend is to tell the truth about advertising to congressmen and senators “when you find the time and place” to do so.

Tv information shows now in 3rd, ‘active’ stage

Television informational programming has entered a “third stage” in its development and advertisers are showing their confidence with sponsorship.

John Karol, CBS-TV vice president, outlined the changes in what he calls “non-fictional” programs in a speech Feb. 12 before the Advertising Club of Terre Haute.

Mr. Karol noted the list of advertisers backing CBS-TV information and news programs and commented, “more and more advertisers are becoming increasingly aware of the fact that non-fiction programs cannot only be as compatible as any other type but can also bring many corollary values of public awareness and goodwill to the sponsoring company.”

The three-stage development of news-information on tv as depicted by Mr. Karol: In tv’s early years, news was reported as a “kind of illustrated slide lecture” (and in many instances still is), a second stage was entered with the Great Debates of 1960 and the addition of “non-fiction” programming as a permanent part of prime nighttime schedules on the networks, and a third stage which he describes as a “product revolution.”

Mr. Karol said the essence of the new stage is a shift to an “active, aggressive search for new forms of non-fiction programming.” Examples, he said, would include the White House tour on TV that “created” a non-fiction broadcast using the presence of the TV camera and such programming as the five-part treatment of the American economy (Money Talks).

The breakfast and speech were carried live on WTTG (TV) Washington and was re-broadcast yesterday (Feb. 17) on WNEW-TV New York.

At CAMM breakfast (l to r): FCC Commissioner Robert E. Lee, CAMM president; Rev. Leonard F. Hurley, moderator of the apostolate; Bishop Fulton J. Sheen, and FCC Chairman Newton N. Minow.
SYNCOM GOES UP—BUT DOESN'T WORK

NASA baffled as to reason for the malfunction

There's a Syncom in space, but it's not talking. Or at least it ceased operating about five hours after it was injected into the first of a two-step orbit and as of Thursday night the communications satellite was still voiceless.

The so-called stationary satellite was launched successfully in the first half-hour of Thursday morning. At 6 a.m., a small rocket inside the satellite was fired to stabilize Syncom into a 22,300 mile high equatorial orbit over the Atlantic Ocean. It was at this point that communication was lost.

Late Thursday, National Aeronautics & Space Administration officials acknowledged they were baffled as to the cause of the malfunction. Since telemetry had ceased, there was no way to determine whether the satellite was in the proper orbit or not (it's too small for ordinary radar to locate). There was speculation, also, that the satellite perhaps was correctly in orbit but its attitude (position in relation to the earth) was wrong. This would place the transmitting antenna in a position facing away from earth.

Syncom, an acronym for synchronous communications, is the latest in a series of space communications experiments undertaken by the federal space agency. It is also considered the ultimate, since its assigned orbit would cause it to revolve around the earth exactly in time with the earth's rotation.

To a person on earth this would make it appear to hover over the same point continuously. To cover 90% of the world, only three Syncoms would be required; communication satellites in lower orbits would require 30-40 satellites to maintain continuous operation.

The 86-pound Syncom was built for NASA by Hughes Aircraft Co. It is the fourth space relay unit to be launched. The first was the Echo balloon, considered a passive relay since radio signals are reflected from its 100-ft. surface; the others, all active relays, were Telstar, built by AT&T which paid for its launching, and Relax, built for NASA by RCA.

Radio, tv set sales report banner '62

The best year since 1956 in the sale of tv receivers—and a record year in radio sales—were reported last week by Electronic Industries Assn. in announcing distributor sales and production figures for tv and radio for the 12 months of 1962.

Output of tv receivers at the manufacturer level was the highest since 1956. Radio production fell just short of the record peak set 15 years ago.

In December, distributor sales of radios to retailers reached 1,587,590, the record month for last year. Television sales for the final month of 1962 totaled 635,973, the year's second highest month.

Sales and production figures for 1962:

**Uhf mobile measurements announced by FCC**

A report on the mobile field strength measurements made by FCC engineers during the uhf test in New York City last year was made public by the commission last week.

The measurements show, Daniel B. Hutton, FCC engineer in charge of the mobile surveys, says, that television signal strength drops faster with distance on uhf than it does on vhf; that where signals are weak, uhf is less subject to man-made noise than vhf; that high vhf-band signal variations resemble uhf variations more than they do low vhf-band variations; that the difference between winter and summer propagation of tv signals on either vhf or uhf on the average is less than plus or minus 1 db.

Included are measurements taken from a ch. 77 translator, installed on the George Washington Bridge by Adler Electronics Inc. The translator, which rebroadcast the ch. 31 uhf signals received from the Empire State Bldg., operated with a visual peak power of approximately 1.65 kw, using 16 stacked dipoles with a reflector. The translator signals were received for measurement as far as 20 miles from the bridge, Mr. Hutton says.

Demodulator success likened to crystal set

A major breakthrough in laser technology was announced last week with the development a laser demodulator by the National Engineering Science Co. and Douglas Aircraft Co. The demodulator is the element of a receiver that strips off the intelligence impressed on the carrier frequency.

Instead of radio frequencies, lasers use “coherent” light beams and are said to be capable in principle of carrying 100 million television programs on one pencil-thick laser beam. The demodulator development has been likened to the introduction of the crystal set in the early days of radio broadcasting.

RCA makes transistor advance

A new semiconductor device, capable of amplifying electric voltages in a manner analogous to a pentode vacuum tube, has been developed by RCA.

Called a metal oxide semiconductor transistor, it is made of silicon and should make possible, Dr. James Hil- lier, RCA Labs. vice president, said, portable, battery-operated, high speed computers: lightweight, high performance communications systems, and a new generation of tactical and industrial equipment. The new solid-state element is the result of a two-year research effort sponsored jointly by the U. S. Air Force and RCA.

Technical topics...

New Sony office • Sony Corp. of America opened new executive offices on Feb. 11 at 580 Fifth Ave., New York. Among the departments in the new offices are sales, advertising and accounting. Warehousing and service facilities will continue at Sony's old offices at 514 Broadway, New York.

Model TCA3

Camera Amplifier

Model TCA3 is a compact, completely transistorized camera amplifier that

replaces vacuum tube preamplifiers now used in all image orthicon cam-

eras. The TCA3 quickly mounts within available space in camera... vacuum

tube amplifier need not be permanently disabled.

Operating voltage is obtained from 285-volt source within camera and is

regulated within the TCA3. A built-in protective device protects unit if

high voltage blocking capacitor at the image orthicon anode short circuits.

Signal connectors are BNC type, as well as solder-terminals. Dimensions:

3½ x 3½ x 1¼ inches.

The TCA3 has been fully on-the-air tested for over a year. It is factory

guaranteed to give years of completely trouble-free service and is priced

below all present vacuum tube models.

Your inquiries for additional information will receive our prompt attention.

NOTE: SEE THE TCA3 AT BOOTH 32 AT THE NAB CONVENTION

BROADCASTING, February 18, 1963 129
Dallas reps elect new officers

The Broadcast Representatives Assn. of Dallas goes into its second year with a new slate of officers. Clyde Melville (standing-r), president of the Clyde Melville Co., will serve as president. Other officers include (seated left to right) Robert Dalchau, H-R Representatives, secretary; Steve Beard, The Blair Co., member of board of directors; and Frank Carter, John Blair & Co., vice president. Standing (l-r) are Barney Broiles, Edward Petry & Co., member of board of directors; David Rutledge (past president), The Katz Agency, member of board of directors; Tom Murphy, The Boling Co., treasurer; and Mr. Melville.

N. W. Ayer & Son, Philadelphia, as account executive.

Willis J. Davis, since 1955 with tv-radio commercial production and creative staffs of Needham, Louis & Borby, Chicago, promoted to executive producer of agency. Mr. Davis also becomes officer of company in his new position.

Newton Frank, former group research manager for household products division of Colgate-Palmolive Co., New York, joins Fuller & Smith & Ross, that city, as senior project director.

Raymond M. Anrig, former vp and account executive at Charles W. Hoyt Co., New York advertising agency, joins S. A. Schonbrunn & Co. (Savarin and Medaglia D'Oro coffee), Bellingham, N. J., as advertising manager.

William J. Slattery, chief product advertising manager for John H. Breck Inc. (hair preparations firm), Springfield, Mass., promoted to newly created position of product manager. In his new assignment, Mr. Slattery will be responsible for overall marketing of specific number of Breck preparations and will direct sales, advertising, promotion, packaging and research for these preparations.

Harry Kinzie, vp-creative director of MacFarland, Aveyard & Co., Chicago, promoted to senior vp and coordinator of creative functions of tv-radio, art and copy departments. Also promoted to senior vps were George Stokes and Cecil Sanders, both formerly vp-account supervisors. Earl Collings, copy chief, elected vp. Hays MacFarland Jr., vp-account executive, named assistant to president.

Peggy Greenfield, former copy group head at McCann-Erickson, San Francisco, joins creative department of Fletcher Richards, Calkins & Holden, that city.

Mrs. Edith Roberts, pr director of Kettering Family Foundation for last five years, joins pr staff of J. Walter Thompson Co., Chicago.

Natalie Gast, formerly with Ziff-Davis Publishing Co., New York, appointed assistant pr director of Newman-Martin, advertising and marketing agency, Bloomfield, N. J.

Robert A. Flynn, former associate editor of Modern Lithography, joins public relations department of N. W. Ayer & Son, New York.

William T. Schoyer named pr director for Pittsburgh office of Fuller & Smith & Ross.

Robert L. Barta, account executive at Buchen Adv., Chicago-New York agency, elected vp. Mr. Barta has been with agency 16 years.

David W. Gifford, former sales manager of WHIM-AM-FM Providence, R. I., named director of newly created department of business development and research at Bo Bernstein & Co., advertising and pr agency, that city.

David B. Grimm, former vp and secretary of Thomas Advertising, Peoria, Ill., joins Geyer, Morey, Ballard, New York, as account executive in Racine, Wis., office.

David E. Grant appointed creative director of Phillips-Ramsey Inc., San Diego advertising and pr firm.

THE MEDIA

H. V. Sherrill, senior partner of Shields & Co., New York investment banking firm, elected chairman of board of directors of Chris-Craft Industries (formerly Nafi Corp.), Oakland, Calif., succeeding Paul V. Shields, who died Dec. 24, 1962. Mr. Sherrill, who joined Shields & Co. in 1948, was named partner in 1950. He has been a director of Chris-Craft Industries since 1956, and a director of Chris-Craft Corp., since that company's acquisition by Nafi in 1960. Chris-Craft Industries, world's largest builder of motor boats, owns KCOP (TV) Los Angeles and KPTV (TV) Portland, Ore.

Richard L. Beach named general manager of WSCH (FM) Hartford.

John Condon, assistant manager, promoted to manager of KTAC Tacoma, Wash., succeeding Jerry Geehan, who assumes duties of general manager of all Tacoma Broadcasters' operations.

John R. DiMeo, manager of KAYO Seattle, joins KPSG Bellingham, 130 (FATES & FORTUNES)
ARF's technical vp

Dr. James J. Brophy, noted Chicago physicist, elected vp for technical development at Armour Research Foundation of Illinois Institute of Technology. Dr. Brophy had been serving as director of technical development since 1961, when Dr. Richard J. Humphreys resigned to become president of Cooper Union College in New York. Dr. Brophy is best known for his work in fields of semiconductors and solid state physics.

Robert S. Smith, vp and director of programs for WOR-AM-FM-TV New York, named vp and general manager. Mr. Smith joined WOR-AM-FM as program manager in 1956. He became program manager for WOR-TV in 1958 and was elected vp and director of programs for both stations in 1959. Prior to joining WOR, Mr. Smith was program manager of WINS New York.

Frank Engelfried, account executive, promoted to sales manager of WALB-TV Albany, Ga.

Vic Piano, a vp in the radio division of Peters, Griffen, Woodward, New York, resigns to open his own radio-tv representative company, Vic Piano Assoc., effective March 1. Headquarters will be at 211 E. 53rd St., New York. Mr. Piano has been with PGW since 1959 and earlier was director of promotion-research and sales development for The Meeker Co. for six years and was with WSB-AM-TV Atlanta for six years.

Clark D. Vilas, account executive with Ward-Griffith Co., joins KNBC-TV Los Angeles as administrator for advertising and promotion.

Joseph S. Rank, account executive at Blair-Tv, Los Angeles, transferred to New York office in same capacity.

Ben Falber Jr., vp and operations director of WTHI-TV Terre Haute, named vp in charge of public information for 1963 United Fund Campaign of Vigo County (Indiana). Tipton C. Kindel, WTHI-FM staff announcer, transfers to WTHI news department as assistant to news director. Richard Laughlin, Arthur Motycka and Jack Wellman join fm outlet as announcers.

Joseph P. Constantino, promotion director of KTVU (TV) San Francisco-Oakland, named general chairman of 1963 Broadcasters' Promotion Assn. convention to be held Nov. 17-20 at Jack Tarr Hotel in San Francisco. Other BPA convention appointments include: George Rodman, KGO-TV, facilities chairman; Dick Robertson, KRON-TV, program chairman; Bob Nashick, KPIX (TV), special events; Ron Wren, KGO-AM-FM, local publicity; and Bill Sweeney, KFRC, all San Francisco, local membership. Sacramento, Calif., coordinator is Tony Bachman, KXTV (TV); Los Angeles coordinator is Don Allen, NBC.

John R. Long Jr. of Springfield, Tenn., former State Commissioner of Insurance and Banking, joins WISX Inc. (WSIX-AM-FM-TV Nashville) as assistant to Louis R. Draughon, WSIX president. Mr. Long will represent broadcasting company in pr capacity and serve as administrative assistant to Mr. Draughon, who has been connected with stations since WSIX was established in Springfield in 1927. In 1947 Mr. Long was elected mayor of Springfield and served for an unprecedented six consecutive two-year terms. He served in state senate in 1951 and 1953, representing 15th Senatorial District. Mr. Long was appointed in 1959 to four-year term as State Commissioner of Insurance and Banking by Gov. Buford Ellington.

Sydney A. Abrams appointed merchandising director of KIRO-AM-FM-TV Seattle.

Dana Crowell and Del Doyle join KIXZ Amarillo, Tex., as traffic manager and continuity director, respectively. Mike Davenport joins station’s announcing staff.

Ken Barnes, formerly with KUSM St. Joseph, Mo., joins KOOL-AM-FM Phoenix as disc jockey.

Dale Kelly, formerly with WPOP Hartford, Conn., joins WOLF Syracuse, N. Y., as air personality and music director.

Ivan Shaner named promotion director of WHAT-AM-FM Philadelphia.

Al Pruitt, air personality with WDNC Durham, N. C., joins WPTF Raleigh, N. C., in similar capacity.

Hugh Smith, former news editor of WHAS Louisville, Ky., appointed news director of KVTV (TV) Sioux City, Iowa.

Leo Willette named director of public affairs for WLW-TV New Orleans.

Bill Calder, formerly with KPRC Houston, joins KJH-AM-FM Los Angeles as disc jockey.

**PROGRAMMING**

Phil Williams, executive vp of John Scott Fones Public Relations Co., New York, joins production firm of Louis de Rochemont Assoc., that city, as vp in charge of planning. Mr. Williams previously was with March of Time and Fortune divisions of Time Inc. for 15 years. Earlier he served as assistant director of tv for 20th Century-Fox Television Productions: sales manager for United Artists Television; and vp of syndication sales for ABC Films.

Herbert W. Browar elected vp in charge of production for Filmways TV Production, New York. He has been with corporation since its inception in

---

The "three band system" makes it much easier to tune in adjacent shortwave stations on the Mitsubishi Electric 9X-900S. The "band spread" of the smartlooking 9X-900S is twice that of ordinary models since shortwave frequencies have been divided into upper and lower hands (Band 1: 4 MC-9 MC; Band 2: 9 MC-18.5 MC) so that "clustered" stations are much further apart on the dial. The fine-tuning adjustment, 9-transistor circuit and "three band system of the 9X-900S make its receptivity something spectacular. Ask your nearest dealer for a demonstration.
Other officers: John M. Kennedy, first vp; Ted de Corsia, second vp; Don Rickles, third vp; and Vincent Pelleter, fourth vp. Alice Backes was named recording secretary, and Stanley Farrar, treasurer.

**EQUIPMENT & ENGINEERING**

Douglas Y. Smith, vp and general manager of RCA's electronic tube division since 1954, named to newly created post of vp and general manager of RCA's electronic components and devices. He'll be responsible for management and direction of electron tube and semiconductor and materials divisions and continue as electronic tube division's executive head. Mr. Smith, who joined RCA in 1930 as engineer, has had prominent role in both monochrome and color tv picture tube development and in introduction of thimble-size inverter electron tube. His climb at RCA included posts of manager of Lanchester, Pa., manufacturing plant in 1944, manager of sales operation in 1951 and vice presidency three years later. Dr. Alan M. Glover continues as vp and general manager of semiconductor and material division, reporting to Mr. Smith.

John A. Henning named manager of quality standards for Allied Radio Corp., Chicago. Prior to joining electronic parts distributor, Mr. Henning was senior associate with management consulting firm of Cresap, McCormick & Pagel, Chicago and New York, and before that treasurer of Wright, Campbell & Suits, Chicago advertising agency.

Joseph E. Baker appointed manager of distributor sales for industrial products division of Adler Electronics, New Rochelle, N.Y. Mr. Baker formerly was field sales engineer in this division which markets uhf tv broadcasting systems and educational tv systems.

Robert Cobler, former director of engineering for Skeleton Studios, joins Acme Film Labs, Hollywood, as technical consultant. Mr. Cobler's initial project will be development of color display unit capable of reproducing high-quality color tv film recordings from original source or video tape.

Albert Floersheimer Jr., former pr director of Theatre Owners of America, New York, rejoins Walter Reade-Stirling, that city, as director of advertising and publicity. Mr. Floersheimer served with Walter Reade as vp-advertising, publicity and exploitation from 1947 to 1955 and as vp for catering from 1955 to 1957.

Nicholas F. Pensiero, administrator for staff marketing at RCA, appointed to new post of manager of marketing services for company's defense electronics products.

Richard Tschudin, production manager of Filmways of California, elected vp. He will be succeeded by Les Guthrie. Filmways also appointed George Vieria and Bud Townsend to head staff of directors. George Foley joins Filmways as cinematographer.

Gabriel Scognamiglio, Free-Lance artist, joins Gerald Schnitzer Productions, Hollywood, as art director, Mr. Scognamiglio has been associated with MGM, Universal-International, Warner Bros., Paramount and Brauberger-Richebe Studios in Paris.

**INTERNATIONAL**

Carrell E. Longmore, b.c.;rd chairman of McKim Adv. Ltd., Toronto, and C. D. Dennis Jr., executive vp, have retired, but remain as consultants. Mr. Longmore has been with McKim for 39 years, became president in 1953.

Dec. 18, 1962, grant of application of KTBS TV, Inc. for mod. of op. to increase antenna height of KTBS-TV Shreveport, La., an additional 200 ft., to 1,700 ft. Pending petitions by KTAL-TV for reconsideration and to vacate order and deny KTBS-TV application will be considered at later time. Action Feb. 12.

By order, commission granted petition by South Texas Telecasting Inc. (KVDC), and extended time to Feb. 14 to file replies to exceptions to initial decision in Corpus Christi, Tex., tv ch. 3 proceeding. Action Feb. 6.

By memorandum opinion & order in proceeding on applications of City of Jacksonville, Florida-Georgia TV Inc. (WFGA-TV), and Jacksonville Bestg. Corp. for new tv stations on ch. 12 in Jacksonville, Fla., in Docs. 10855-6, denied motion by Florida-Georgia TV Inc. to strike notice of appearance filed by Jacksonville Bestg. Corp. Action Feb. 7.

Routine review

**ACTIONS BY REVIEW BOARD**

- By memorandum opinion & order in proceeding on applications of Charles County Inc. and Dorlen Bests. for new am stations in La Plata and Waldorf, respectively, both Maryland, in Docs. 1448-8, 11 denied motion to enlarge issues to determine whether grant of Charles County application would be likely to cause economic injury to Dorlen's WSMD (FM) Waldorf and, if so, whether such injury is likely to cause WSMD to cease operations and thus deprive Charles County, Md., of its only full-time local service; (2) denied request by Charles County for enlargement of issues to add "strike" issue to applicant Dorlen; (3) granted Dorlen motion to strike Charles County pleading; and (4) on own motion, added issue to determine whether Dorlen's application was filed for principal or incidental purpose of obstructing or delaying establishment of am facility at La Plata. Board Member Pincock dissented and issued statement. Action Feb. 8.

- Granted petition by Mountain View Bestg. Co. for waiver of hearing and extension of time to file statement to extent of extending to March 8 time to file statement to mitigate or justify circumstances and conduct complained of in order to show cause why license for WBM7 Black Mountain, N. C., should not be revoked. Board Member Pincock absent. Action Feb. 8.

- By memorandum opinion & order in proceeding on applications for new am stations of Eastern Bestg. System Inc., Bristo, Conn., Colonial Bestg. Co. and George F. O'Brien, both New Milford, Connecticut, and Fairfield Bestg. Co., Easton, Conn., in Docs. 14106 et al., directed hearing examiner to proceed to resolve issues 11 through 11 concerning character qualifications as to applicant Fairfield and issue initial decision on those matters; parties wishing to file exceptions must do so with Review Board within 30 days after release of partial initial decision. (Pending before Review Board is joint request by applicants for approval of agreement looking toward disposal of Colonial, Fairfield, and Fairfield applications; payment by Eastern, Colonial, and Mr. Lapina to Mr. Fairfield of $12,000 [one third each] as partial reimbursement of expenses incurred by latter in processing its application: grant of Eastern application and assignment of that cp to new corporation in which Eastern will own 10% and Colonial and Mr. O'Brien each 30%) Action Feb. 8.

- Granted motion by Denver Area Bests. (KDAB), Arvada, Colo., and extended to Feb. 7 time to file oppositions to motions to enlarge issues filed by Lakewood Bestg. Service Inc. (KLAJK), Lakewood, in proceeding on Denver's am application, et al. Action Feb. 7.

- By memorandum opinion, held in abeyance ruling on petition by respondents Cornwell Bestg. Inc. and Pincock Bestg. Corp. for extension of time to file petitions to reconsider Review Board's refusal to permit by hearing examiner in proceeding on application of Triangle Publications Inc. (WNIC-TV), New Haven, Conn., pending service of instant pleading upon other parties a required Sec. 202 reply, it was determined required proof of service is not filed within 5 days, petition will be dismissed. Action Feb. 5.

- Granted petition by 1540 Radio Inc. Richmond, Va., and extended to Feb. 19 time to reply to opposition to petition to reopen record filed by Elades Broadcast Co., Hopewell, Va., in proceeding on their am applications. Action Feb. 5.

**ACTIONS ON MOTIONS**

- Commission granted petitions by Ralph D. Epperson and Valley Bestg. Co. to extend deadline from March 4 to March 12 to file comments and from March 18 to April 17 for replies in matter of revision of fm broadcast rules, particularly as to allocation and technical standards. Action Feb. 7.

- Granted petition for the extension of the hours of operation of the transmitters of the station, KTVN (TV) in Reno, Nev., for the period ending April 30.

- Granted petition for the extension of the hours of operation of the transmitters of the station, KTVN (TV) in Reno, Nev., for the period ending April 30.
All about time...
in 12 hours

Involved in time buying?
Broadcast sales? Traffic? Work
in New York for a rep, network, agency or advertiser?
Chances are you’ve got problems. We’ve got answers—in the 1962-'63
Time Buying and Selling Seminar. The new TB & SS is “all about time.”
It’s a one-of-its-kind, 12-hour course in the business side of broadcasting, designed
to help make your work easier and provide the know-how that can mean faster advancement.
Curriculum: Covers everything from the basics to the nuances of time buying and selling.
Sessions: Eight, 5:30 to 7:00 p.m., every Monday starting February 25. Instructors: Industry
executives representing advertiser, rep, agency and network operations.
Enrollment is limited to 75. So use the coupon below today to reserve your place. (The check you send is
tax-deductible. But then it’s probably also a step toward a higher tax bracket.)
If you prefer to first see a program listing the Seminar subjects, call Claude Barrere, International
Radio and Television Society, PL 8-2450.

Enroll me immediately in the Spring '63 IRTS Time Buying and Selling Seminar (Fee: $15)

Independent tv stations aren't 'must' buys

During his undergraduate days at Syracuse U., John E. McArdle specialized in portrait painting in the fine arts curriculum. Away from his studies, he won renown as an amateur boxer, capturing the Eastern Intercollegiate Conference championships in 1943 as a light heavyweight and in 1947 as a heavyweight.

Mr. McArdle, who is vice president and general manager of WNEW-TV New York, cannot be certain today that these aesthetic and athletic inclinations exerted a significant influence on his career in advertising and broadcasting, but he explains with a quick smile:

"I knew, of course, there wasn't too much money in boxing. And you can get hurt. Portrait painting is a most difficult way to earn a living. It's a long road. Since I married before I got my degree, I realized I had to get out into the business world quickly.

"My ambition was to get into the advertising field because I felt my art training would be of help, particularly in the publications area. And I believed I could make it in the sales end because I enjoy meeting people and am considered a pretty persuasive speaker."

Trucker - Following his graduation from Syracuse U. in February 1948, Mr. McArdle accepted a position with his father's trucking business in Jersey City, although he still had his sights set on an advertising sales post. This goal was to elude him for several years as he acquired sales background with Hallmark Cards Inc. from 1949-52 and with a printing company in New York from 1952-53.

His first advertising sales assignment was with the Ziff-Davis Publishing Co. in 1953, Mr. McArdle had made several efforts to break into television, and in May 1954 he was hired by Matthew (Joe) Culligan, currently president and chief executive officer of Curtis Publishing Co. and then sales manager of NBC-TV's Today-Home-Tonight unit. He transferred to NBC Spot Sales in 1956 and the next year joined the sales staff of Metropolitan Broadcasting's WABD (TV) New York, now WNEW-TV.

After 10 months in New York, Mr. McArdle was assigned to Metropolitan's Washington, D.C., station WTTG (TV) as general manager. He remained there for three years and in May 1961 he was re-assigned to New York as vice president and tv sales manager of Metropolitan. In September 1961 he was named vice president and general manager of WNEW-TV.

Mr. McArdle cuts an impressive figure. He stands six feet, three inches, and carries more than 200 pounds well on a ruggedly built frame. His distinctive appearance is enhanced by prematurely gray hair, set off by a ruddy complexion. He is an articulate, self-assured person who has amassed a vast knowledge of television in the comparatively short time he has been active in the medium.

John Edward McArdle was born on Manhattan's West Side on July 11, 1922, but was reared in New Jersey, largely in Jersey City. He was graduated from St. Peter's Preparatory School in Jersey City in 1940 and entered Syracuse that fall. He was active in various extra-curricular activities at college, in addition to boxing, and was president of the senior class and a member of the junior and senior honor societies.

Army Stretch - In 1943, at the conclusion of his junior year, Mr. McArdle enlisted in the U. S. Army. He served in the Corps of Engineers and was released in August 1946 as a first lieutenant following occupations duty in Japan. He returned to Syracuse after his Army tenure to receive a Bachelor of Fine Arts Degree in February 1948.

Mr. McArdle finds an independent television operation, as is WNEW-TV, "extremely exciting" and "a challenge." He spends most of his time on selling functions and observes:

"When selling for an independent station, you have to practice a kind of 'commercial brinksmanship.' Without a network providing dollars and programs you have to do it all yourself. An independent station is never a 'must buy.'"

Mr. McArdle is delighted that 1962 was "substantially ahead" of 1961, both in terms of sales and audience, and reports that this "momentum is carrying on into the first part of 1963."

WNEW-TV's Programming - The station's programming philosophy, according to Mr. McArdle, is to offer a well-balanced schedule of entertainment and public affairs-cultural programming. He believes WNEW-TV is among the largest users of off-network programs, pointing out that there is a substantial audience which has not viewed such series during their network cycles.

"Our other plusses," Mr. McArdle said, "include our strong schedule of children's programs featuring Sonny Fox, Sandy Becker and Fred Hall, and shows such as Mickey Mouse Club and Felix The Wizard. We are also proud of such programs as Open End, the Boston Symphony Specials, The Columbia series, the Festival of Performing Arts and special documentary and public affairs shows."

This programming approach has been "most successful" for WNEW-TV, Mr. McArdle asserts, and adds:

"We're happy to say that we are now the third station in the area—only behind two of the network-owned stations. That statement is based on recent ARB figures. Our strongest sales point is to hammer away to advertisers that by using WNEW-TV they can reach 100% of the market."

Better Taste - Mr. McArdle acknowledges that he would like to see a higher level of program tastes reflected on the part of viewers, but points out that this upgrading of taste must begin when the viewer is young and in school.

Mr. McArdle is a "big family." He and his wife, the former Joyce Wind of Whiteboro, N. Y., whom he met at Syracuse U., have seven children. They are Kathleen, 14; Christine, 13; Patrick, 12; Timothy, 10; Terence, 6; Mary Ellen, 4 and John, four months.

The family home is in Greenwich, Conn., where Mr. McArdle attends St. Mary's Church and is on the membership committee of the new Burning Tree Golf Club being built in Greenwich. He is a member of the International Radio & Television Society, the Mayor's Committee of Industrial Leaders for Youth and a director of the New York Alumni Club of Syracuse U. and CARTA.

Mr. McArdle is a sports buff and likes to play and attend games—with his wife and children.

Commercial brinksmanship

BROADCASTING, February 18, 1963
EDITORIALS

Time to step on the gas

THE extensive evidence collected in the Perspective section of this issue indicates that radio and television revenue is rising on an ascending curve. Absent a severe downturn in the general economy, 1963 will be a better year for broadcasting than 1962, as 1962 was a better year than 1961.

But these business prospects, however promising, give little reason for complacency. Both radio and television need better selling if they are to maintain, let alone improve, their share of advertising revenue. Both are targets of sales efforts by rival media that are getting more intense every day.

Magazines and newspapers are caught in a cost-profit squeeze from which they can obtain relief only by enlarging their revenues.

The targets at which magazines are shooting are network advertising and national spot. The newspapers are shooting at the whole range of radio and television business sources.

In addition to being targets for the print media, radio and television are unavoidably engaged in intra-family competition. Especially in the area of national advertising radio and television sell against each other, as indeed they must.

Survival in all this competition will depend upon enlightened and energetic salesmanship, by stations and their representatives, by networks and by the sales promotion cooperatives, RAB and TVB. The improvement of selling must start with improvement of selling tools. Research that goes far deeper than mere head-counts of the audience is now essential.

Both radio and television possess great strengths as advertising media. Each must spend more time and money than either is spending now to discover and explain its individual advantages.

No business can expect to ride a rising curve unless it provides most of its own propulsion.

News game

THERE is an important—almost frightening—significance to broadcasters in an observation made the other day by President Kennedy on the Cuban crisis. It was all but ignored by the newspaper and magazine press and by the columnists; and was underplayed by radio and television.

As we reported last week, the President told a news conference that the administration felt obliged to use television to convey the "truth" about Cuba to the people. This was the two-hour telecast on Feb. 6 by Secretary of Defense McNamara and an intelligence officer calculated to refute contentions that there are offensive weapons in Cuba.

Mr. Kennedy cited a story in a "prominent" newspaper which played up on Page 1 a report of a congressman about the presence of missiles in Cuba, which had no "supporting evidence." The statement of the Secretary of Defense, which the President said gave "very clear details," was on Page 10.

"I think it is important that the American people have an understanding and not compel, because of these various rumors and speculations, the Secretary of Defense to go on television for two hours to try to get the truth to the American people and in the course of it give a good deal of information which we are rather reluctant to give about our intelligence gathering facilities."

No elaboration is needed to assess the tremendous responsibility the administration places upon broadcasting. It also explains why the administration, through the FCC and otherwise, is keeping the pressure on television. It yields a clue as to the salient reason for the Celler committee inquiry on concentration of ownership in newspaper field to begin March 13. FCC Chairman Newton N. Minow, as the first witness, will testify on the influence of newspapers over the radio and television stations they own. This buttresses the notion that the administration regards broadcasting as the most important and sensitive of the mass media, which must not get into "improper" hands.

Sauce for the goose

THE Russians are up to their old tricks. Because Kremlin propagandists, acting on the advice of their embassy propagandists in Washington, didn't relish the recent NBC-TV specials on Stalin and Khrushchev (which we thought superb), the Soviet government has ordered NBC to close down its Moscow bureau.

The reason given, as reported by Tass, is that the programs were "anti-Soviet" and had the "obvious purpose" of arousing in the United States hostility toward the Soviet.

If this had been the first time the Soviet had thrown out an American newsman it would be big news. CBS had its bureau closed in 1958 after it telecast a Stalin special. The New York Times, Time magazine and other news media in recent years have suffered the same fate only to be permitted back in when it suited the convenience of the totalitarian overlords.

Our State Department has "deplored" the action against NBC as an attempt to "exercise indirect censorship." But we do not recall any recent State Department protests against the anti-American propaganda broadcasts emanating from Russia and calculated to humiliate and undermine the good name of the United States throughout the world.

Worthy of note is the fact that Tass announced the expulsion of NBC. Tass is a part of the Soviet foreign office. Tass has two newsmen accredited in our congressional press galleries—aside from those stationed in other large U.S. centers. (U.S. newsmen are practically confined to Moscow.)

Isn't it about time that we retaliated by closing down the Tass bureau in Washington (and perhaps in other places) because of the lies and distortions published by the Soviet press and transmitted over their broadcast facilities supplied by reporters who work directly for the Soviet government?

"WOF-TV sent it over. A fifth of scotch for me and a quart of grade A oil for the computer!"

COMPLETE INDEX PAGE 7

Abie’s Irish Rose: 2,327 performances
My Fair Lady: 2,717 performances
Tobacco Road: 3,182 performances
Life with Father: 3,224 performances

4,327 performances!
New York’s biggest hit, bigger than ever!

In all showbusiness there’s never been a hit like THE LATE SHOW. When New York’s favorite late-evening television show marks its twelfth anniversary on February 26, it will have played 4,327 performances—far outdistancing even the greatest of Broadway’s longest-running hits. And with good reason. For twelve years THE LATE SHOW has presented more of what audiences like best-star-packed motion pictures, many of them New York television premieres. What’s more, late movies on Channel 2 keep building. This past November, for example, “Mr. Roberts” soared to the highest rating ever recorded for a feature film on New York television. (More people stayed up far past midnight to see this single performance than saw “Life with Father” during its entire Broadway run!) In all, an average weekly audience six million strong has the Channel 2 habit “after eleven.” What’s ahead? More and better. “No Time for Sergeants,” “Sayonara,” “The Lost Weekend,” “Member of the Wedding,” “A Face in the Crowd” and “The Last Hurrah.” And many more blockbusters to guarantee that New York’s biggest hit will be...bigger than ever!
Love that Late Show
(especially when my family shows up)

Congratulations WCBS-TV from Metro-Goldwyn-Mayer Television, producer and distributor of many of the greatest hours of pre-'48 film entertainment presented to New Yorkers on the Late Show.
HOUSTON AT NIGHT

City of destiny, already marked with Greatness—Oil and Space Capital of the World, shown here from atop new 45 story Humble Building.

WGAL-TV delivers a loyal, responsive audience. This unequalled viewer following results from fourteen years of pioneering, finest facilities, and the most complete and modern equipment in the area. Channel 8 is the only single medium in this entire region that assures full sales power for your advertising dollars.
Out of the hat

Who's being talked about to succeed Newton N. Minow as FCC member but not necessarily as chairman? If choice is political, to curry electoral favor in 1964: Former Gov. Mike DiSalle, defeated last November in Ohio, one of pivotal states. If it's Bobby Kennedy favorite: Harold F. Reis, office of legal counsel, Department of Justice, native New Yorker and Jewish (Mr. Minow is FCC's only Jewish member). If it's merit promotion: FCC General Counsel Max Paglin, also from New York and Jewish. If it's to fill need for engineer to replace T. A. M. Craven (who will retire any day now): James Barr, chief, FCC Safety and Special Radio Services, or William H. Watkins, chief, Frequency Allocation & Treaty Division. Added starter: William A. Geoghegan, 38, assistant deputy attorney general, native of Cincinnati and son of former judge active in Democratic party.

With chairman Minow returning this week after 10 days in Europe (CLOSED CIRCUIT, Feb. 18) clarification should be forthcoming on time of intended departure to join Encyclopaedia Brittanica in Chicago as high officer and chief legal counsel. His intention had been to leave June 1 but developments in wake of disclosure in BROADCASTING Feb. 11 of resignation could bring change—perhaps advancement—in timing. No further word on successor as chairman beyond Mr. Minow's recommendation of Commissioner E. William Henry, but if Mike DiSalle gets appointment, it's assumed as matter of practical politics he would snap top job.

Lunch breaks (for press)

Silent protests against snubbing of broadcasters at White House luncheons while press has been feted 17 times, took tangible form last week. Jack Williams, executive secretary of Georgia Assn. of Broadcasters, wrote Pierre Salinger (with copies to Georgia congressmen) that stations in his state "were very disturbed" over "favored treatment" being given newspapers by "exclusive invitations on a statewide basis to dine at the White House." And White House announced last week it's planning another series of luncheons for publishers. Some broadcasters have argued that smaller publishers have used White House visits advantageously business-wise.

NBC's big pictures

NBC-TV sales and programming executives are debating whether to extend network's Monday evening movie series into 1963-64 season. Expectation date of present package is next September. Right now sales department tends to favor extension because of client interest. Programmers, however, wonder whether ratings—which have been good for pictures shown so far—will hold up. It's big decision, involving two prime hours—7:30-9:30 p.m.—that are key to network's whole Monday night schedule.

Omaha backfire

Some legislators are just waiting for chance to question FCC on its local program policy. Democratic member of House Commerce Committee said last week he would like FCC to explain when it adopted program policy described in TV hearings in Omaha by presiding Commissioner E. William Henry. At least one congressman is preparing series of questions for Chairman Newton N. Minow.

Member of Senate Commerce Committee also has prepared lengthy dossier on same subject, and NAB has been suggesting to members of Congress that Omaha-type hearings ought to be stopped. LeRoy Collins, NAB president, and Paul Comstock, government affairs vice president, met with Sen. J. Howard Edmondson (D-Okla.) last Thursday to senator's request to brief him on reasons association opposes shotgun inquiries into local programming. Sen. Edmondson plans meeting this week with Oklahoma broadcasters (CLOSED CIRCUIT, Feb. 18) after receiving numerous complaints against practice. NAB officials say nearly every member of Congress they've talked to feels FCC stepped over bounds in Omaha TV program hearing.

Anti-editorialists

Group of broadcasters, self-identified as Republicans, is ringing doorbells on Capitol Hill trying to collect support for their opposition to FCC's policy urging licensees to editorialize. They say GOP-oriented broadcasters now refrain from editorializing to avoid need to give opposing views equal time under FCC's "fairness" doctrine. Broadcasters, group of three, are striving to retain anonymity for now.

Man on the move

Watch Paul Comstock. That's word being spread around NAB since Florida attorney became vice president in charge of government relations last September. His embattled presentation to joint NAB board at its meeting in Phoenix last January, assailing FCC for off-limits probing into programming and business affairs, made deep impression. And he's largely credited with influencing NAB President LeRoy Collins' shift to stronger stance in dealing with FCC regulatory issues.

Buddying up

Closer liaison between Broadcasters Promotion Assn. and National Assn. of Broadcasters is expected to result from conference last week between LeRoy Collins, NAB president, and Dan Bellus, head of BPA and promotion director of Transcontinental Television. Formal proposals outlining areas in which two organizations may work on parallel planes are being drafted for further consideration. Others at initial meeting were Howard Bell and John Courie of NAB and Clark Grant, BPA first vice president and promotion director of WOOD-TV Grand Rapids.

Softening-up campaign

Extensive mailings by British Broadcasting Corp. to U. S. TV stations in past few months reported to be part of stepped-up effort to dispel image of BBC as government-shackled operation. Ultimate objective is to make U. S. stations more receptive to BBC program offerings. BBC is expected to create new sales position in its New York office to accelerate station-by-station syndication of its programs.

Transistor therapy

Transistor radio rather than television constitutes only effective means of getting democracy's story into Central and South America and West Indies to counteract "red menace." This is crux of communication to USIA Director Edward R. Murrow from Jose Ramon Quirones, owner of WAPA San Juan, and member of board of Inter-American Assn. of Broadcasters. TV market, he said, is limited to minority of "well-to-do and educated people" because of high price and low rate of exchange.

Mr. Quirones suggested that private enterprise might organize through Alliance of Progress corporation that could sell transistors on small-profit margin to reach low and middle classes in Latin America, many of whom are illiterate and are not newspaper readers. "Upper crust" knows communist propaganda, he said, but masses are not being reached.
WE'VE GOT A WAY WITH WOMEN
and with Daddies, too!

Daddy says when I want to see lions and tigers, he’ll take me to the zoo, but when HE wants to see Lions and Tigers, he turns on Channel 2.

Watching WJBK-TV is a happy habit for dads (and mothers, too) in sports-minded Southeastern Michigan. And Channel 2's Detroit Tiger baseball, Detroit Lions football and Big Ten basketball keep 'em happy all year round.

To score with more sales in the big spending 5th market, call your STS man.
WEEK IN BRIEF

Oren Harris probe of broadcast rating services begins this week. "Exposes" hinted by House committee members. Collins and network representatives will lead off to tell how research is used. See . . .

RATINGS BLAST PROMISED . . . 25

Tv network selling drive for 1963-64 season booming along at higher pace than ever before. Spur is early completion of buying schedules by blue-chip advertisers and sell-out by CBS-TV. See . . .

NET SALES SET RECORD . . . 28

Radio license committee serves notice it is looking for "substantial" reduction in fees paid to ASCAP and BMI. Mason warns negotiations are complex and may prove to be long drawn out. See . . .

SEEK DROP IN MUSIC FEES . . . 52

FCC renews licenses of 23 network-owned radio and tv stations after payola charges fail to stand up. But licenses of 27 others are still in limbo for a variety of reasons. All pending since 1960. See . . .

O&Os ARE RENEWED . . . 40

Newsmen to talk over charges of managed news policies with Salinger and other administration information men at meeting April 5-6. Invitations extended to radio-tv, newspaper, magazine groups. See . . .

NEWS ‘DIALOGUE’ IS SET . . . 65

Senate committee studies troubles with communications satellites. Syncom feared destroyed by internal explosion. Pastore questions continued government outlays for space communications. See . . .

SILENT VOICES EXPLAINED . . . 46

President tells Minow government-industry cooperation is imperative to make all-channel law work. Uhf development committee moves another step forward; meeting is set for next month in Washington. See . . .

JFK BACKS UHF GROUP . . . 50

CBS Radio affiliates hear good news; network is running 20% ahead in first quarter this year and this means stations will benefit. Network cites promotional activities for radio shows. See . . .

CBS RUNNING STRONG . . . 62

New method of receiving and projecting color tv for large screen theatrical use is reported ready. GE is said to have worked out system which National General will use in its chain of motion picture theatres. See . . .

COLOR TV FOR THEATRES . . . 66

Survey of Mexican-American groups shows homogeneity of Latin American market. Most listen to Spanish-language radio stations, but reverse is true in tv. Study covers "Latin-American Crescent." See . . .

MEXICAN-AMERICAN MARKET . . . 32

BROADCASTING, February 25, 1963

[Image of broadcast logo and subscription information]
HOW DO YOU MEASURE A BROADCASTING STATION?

Only a shadow serves as the symbol of a person with a strange addiction. The other person is WTIC-TV News reporter Stan Simon who helped uncover the addiction of hundreds of youths of the Hartford area to easily obtained cough preparations. The upshot was the startling WTIC-TV documentary, “Warning: May Be Habit Forming” which, for the first time, revealed that youngsters are becoming addicted to narcotics which can be obtained at local drug stores for as little as $1.25 a bottle. A videotape of the program has been requested by the Hartford educational station for in-school showing so that thousands of youngsters may be forewarned.

Surveys, such as ARB and A. C. Nielsen, clearly define WTIC-TV’s outstanding audience leadership in southern New England . . . but a documentary such as “Warning: May Be Habit Forming” tells of another kind of leadership we prize even more highly.

Broadcast House, 3 Constitution Plaza, Hartford 15, Connecticut

WTIC-TV is represented by Harrington, Righter & Parsons, Inc.
House ban, Sec. 315 face NAB state heads

Two long-standing broadcasting legislative problems—political broadcasting law and House ban on radio-tv coverage of hearings—will play prominent roles in discussions at NAB state presidents' conference in Washington tomorrow (Tuesday) and Wednesday.

Featured speaker Sen. Vance Hartke (D-Ind.), who sponsored bill in last Congress calling for repeal of political equal time law, will again call for action on measure in present Congress and plans to reintroduce bill. Sen. Hartke is a member of Senate Commerce Committee and its Communications Subcommittee.

Assured that House leadership does not oppose removal of radio-tv ban, NAB will make strong pitch to state associations to rally support from their congressmen. House Speaker John McCormack (D-Mass.) has stated that he will not actively push for action, but Rep. Howard Smith (D-Va.) has promised NAB that his Rules Committee will hold hearings on currently pending resolutions to permit cameras and microphones in hearing rooms.

All but one active state association is represented among 73 broadcasting executives who pre-registered for conference in Shoreham Hotel. Delegates are coming from 47 states and Puerto Rico.

'Today' in New Orleans defended by NBC-TV

NBC has defended its role in controversy that developed over use of public funds to help defray costs of Today show during its stay in New Orleans.

That city's Times-Picayune has been critical of New Orleans public agencies and private businesses for contributing $30,000 to help support show, which is originating in southern city every day this week.

In letter to newspaper, Carl Lindeman Jr., NBC vice president, said proposal to produce show in New Orleans was initiated by that city's Tourist Commission.

He said funds would be used to pay additional costs involved in producing show in New Orleans rather than New York, and not for salaries, transportation or profit to NBC.

Letter also said programs produced in New Orleans would, in accordance with network standards and Communications Act requirements, indicate that local groups helped defray expenses. In follow-up telegram, network listed "major contributors" among city's public agencies and private businesses that would be included in program credit.

Both letter and telegram were printed in Times-Picayune Friday.

Earlier reply to newspaper's criticism was voiced by officials of WDSU-TV, NBC affiliate in New Orleans. Edgar B. Stern Jr., president, and A. Louis Read, executive vice president, expressed "shock and dismay" at newspaper's opposition to undertaking to promote "city's educational, cultural and industrial advantages."

Time Inc. editor Luce claims tv cooling off

Television's hot pace is cooling off and magazines and newspapers are entering new expansion era, Henry R. Luce, Time Inc. editor-in-chief, declared at Chicago ceremonies re-naming publishing firm's subscription center there at 540 N. Michigan Ave. as Time & Life Building.

Mr. Luce explained more and more people want to know more and more things, and, as scientists use term "critical mass," there is about to be explosive popular demand for knowledge.

Andrew Heiskell, Time Inc. board chairman, claimed balance has been reached between TV's pre-emption of public's leisure time and that available for reading. As for advertising, years 1959 or 1960 marked "first time in many years that the magazine pot grew by a larger percentage than TV did," he said, claiming "it certainly is true that TV's tremendous spurt has levelled off."

There are "only so many hours in the day," Mr. Heiskell said, contending that "TV audiences are declining now and the cost of buying time continues to go up."

Canadian agency revenue: gross up, net down

Though gross billings of Canadian advertising agencies were up in 1961 over 1960, net revenue was down, according to preliminary figures released by Dominion Bureau of Statistics, Ottawa. Gross billings were up from $272,739,802 in 1960 to $282,430,458 in 1961. Billings for market surveys, research and production work by agency personnel accounted for about $5 million of total.

Television accounted for $75,663,406 with 21.6% for production. Radio accounted for $29,125,396 with 10% for production costs. All publications accounted for $154,602,472 of total, with 18.3% for production costs.

Harris names witnesses for ratings inquiry

Initial list of witnesses being called for House Special Investigations Subcommittee probe of broadcast ratings (see page 25) was released last Friday (Feb. 22) by Chairman Oren Harris (D-Ark.).

Following March 5 appearance of NAB President LeRoy Collins will be (not necessarily in this order) Thomas W. Moore, vice president, ABC-TV; Robert Pauley, president, ABC Radio; James T. Aubrey; president, CBS-TV; Arthur Hull Hayes, president, CBS Radio; Walter D. Scott, executive vice president, NBC-TV; William K. McDaniel, executive vice president, NBC Radio; Robert F. Hurleigh, president, MBS and Paul Rand Dixon, chairman, Federal Trade Commission.

Subcommittee also expects to hear spokesmen for local stations and other persons "connected with import of ratings."

Hearing, expected to run for at least three weeks, is culmination of over 18 months of intensive investigation by

more AT DEADLINE page 10
Jack Webb, independent producer at Warner Bros., named head of studio's TV production, replacing William T. Orr, who moves into production of high-budget theatrical films (see page 54).

Ken C. Banes, assistant radio-TV director of D. P. Brother & Co., Detroit, appointed vp in charge of TV commercial production and sales for Jerry Fairbanks & Assoc., new organization formed to work in conjunction with Jerry Fairbanks Productions of California, pioneer Hollywood movie and TV production firm. Frank J. Westbrook, vp and TV creative director of North Adv., Chicago, named president of Jerry Fairbanks of Illinois and will head new Chicago sales office. Also as part of Fairbanks reorganization, Robert Scrivner was promoted to vp in charge of industrial films at Hollywood studio.

Joseph H. McConnell, president of NBC in early '50s and later president of Colgate-Palmolive, elected president and chief administrative officer of Reynolds Metals Co., succeeding Richard S. Reynolds Jr., who moved up to board chairman and chief executive officer. Mr. McConnell had been executive vp and counsel of Reynolds.

William E. Conner named vp and manager of Chicago radio-TV department of North Adv., it is to be announced today (Monday) by North President Don T. Nathanson. Mr. Conner has been vp of BBDO in New York and Minneapolis offices where he was TV-radio executive on General Mills' Betty Crocker account. Mr. Conner, with BBDO 13 years, organized that agency's Minneapolis broadcast department. His other broadcast accounts there included Hormel, Cream of Wheat, Minnesota Mining and Northern Pacific Railroad.

For other personnel changes of the week see FATES & FORTUNES

subcommittee staffers Bob Richardson and Rex Sparger. After development of how ratings are used by networks and stations in determining programming, inquiry will turn to operations of individual services. This phase of public testimony is expected to consume major portion of hearings.

FCC urged to ignore anti-renewal petition

TelePrompTer Transmission of Kansas Inc. asked FCC last week to ignore petition urging denial of its application for renewal of licenses for microwave facilities of its Liberal catv system.

Request that applications be denied was made by KTVC (TV) Ensign, Kan. TelePrompTer said station has not established material evidence that Liberal catv threatens existence of regular TV service in area. This was basis on which FCC denied microwave application in Carter Mountain case (Broadcasting, Dec. 18, 1961).

TelePrompTer said KTVC's opposition to its operation and improvements in catv facility has deprived residents of Liberal of proper TV service.

KTVC is 52 miles from Liberal, which is situated on perimeter of station's grade B contour, and quality of KTVC's actual service to Liberal is questionable. TelePrompTer said.

Capital Cities shows 45% net increase in '62

Increase of 45% in net income for 1962 has been reported by Capital Cities Broadcasting Corp. Net income for year was $1,576,320 ($1.33 a share), compared to 1961's $1,088,197 (92 cents a share).

Cash flow jumped $1 million, from $1,880,434 in 1961 to $2,904,812 last year. Gross revenues in 1962 amounted to $17,825,467, up $6 million from 1961's $11,803,781.

Phoenix not interested in most disliked teacher

Efforts by KRIZ Phoenix disc jockey to find city's most disliked teacher resulted in complaint being filed with FCC by Arizona Education Assn. Frank Flynn, KRIZ general manager, said Friday he ordered program off air as soon as he heard about it. But, reportedly, disc jockey Bob Randall mentioned names of at least three teachers before program was stopped.

Newhouse to help select distinguished Americans

Publisher-broadcaster Samuel I. Newhouse was one of five persons named by President Kennedy last Friday (Feb. 22) to comprise "Distinguished Citizen Service Awards Board."

Board will honor Americans who "contribute to national security, world peace or to cultural or other significant public or private endeavors."

BFA to screen entries for Eurovision contest

National Educational Television & Radio Center has announced that its international division, Broadcasting Foundation of America, will screen American entries for Eurovision Grand Prix of Television Films 1963.

Purpose of contest is to promote cooperation between broadcasting and film industries. Only films produced expressly for TV are eligible. Competition is part of International Film Festival in Cannes.

Entries must have been produced not more than 18 months before May festival. They will be accepted for screening until March 15.

Radio outracing Stork into U.S. homes--RAB

Radio set sales are moving at faster pace than birth rate, according to Kevin B. Sweeney, president, Radio Advertising Bureau.

Mr. Sweeney said last week radio set is sold in United States every 1.3 seconds compared with birth rate of a baby born every 7.5 seconds.

Three radio set records were made in 1962, Mr. Sweeney said: Radios exceeded U.S. population figures for first time (200,258,000 radios compared to 199,947,000 Americans, as of Jan. 1); total sales hit record of 24 million, up from 22 million in previous year; and portable sales reached high of more than 11 million.

Better tv criticism sought

Call for higher standards of TV criticism to equal that given to other popular arts such as new forms of jazz music and motion pictures sounded Friday (Feb. 22) by Roy Danah, director of Television Information Office. Mr. Danish spoke of TV's educational values at annual banquet of Western Television & Radio Conference held in Los Angeles.
Now, an exciting TV series about the "Stagers", a daring breed of men who risk their lives along the 2,325 mile stage route between Missouri and 'Frisco, and the men and women who join them as passengers. No other western drama available today offers the continuing appearance of an appealing 12 year old boy within its format. STAGECOACH WEST delivers this unique element with "Davey", who portrays Simon Kane's son and brings added warmth and human drama to every episode. Here's a series that truly has everything! Adventure, romance and suspense for ADULTS ... fun, thrills and authentic Americana for CHILDREN ... colorful guest stars for ALL. Yes, all the elements for programming success are yours with STAGECOACH WEST.

ONE OF THE NATION'S GREAT STATIONS

A calendar of important meetings and events in the field of communications
*Indicates first or revised listing

FEBRUARY
Feb. 25—Third annual Mike Award banquet of Broadcast Pioneers, Imperial Ballroom, Americans Memorial Hall, New York City. Cocktails at 6:30 p.m. in the Versailles Ballroom; dinner at 7:30 p.m. in the Imperial Ballroom.
Feb. 26—Hoaring on NBC-RKO General station transfers resumes.

*March 26—Conference on emergency broadcasting, Governor's Conference Room, State Capitol Building, Sacramento, Calif. State Industry Advisory Committee, Governor's Public Information Committee, FCC, Dept. of Defense, California Public Safety Agency and California Disaster Office will be represented.

Feb. 26-27—NAB conference of the state association presidents, Shoreham Hotel, Washington, D. C.
Feb. 27-March 1—Western Assn. of Broadcasters Engineers, division meeting, McDonald Hotel, Edmonton, Alta.
Feb. 28—Academy of Television Arts & Sciences, Hollywood chapter, 8 p.m., "Meet the Creative Team" session with the producers of The Eleventh Hour. U. of California, Los Angeles.
Feb. 28—Ad Club of Minneapolis meeting, Normandy Hotel. "Creativity: The New Word in Radio," speech-clinic. Featured speaker will be Maurice Webster, vice president and general manager of CBS Radio spot sales.

MARCH
March 4—Hollywood Ad Club, Hollywood Roosevelt Hotel, Gail Smith, executive director of advertising and market research, General Motors, will speak on "Advertising in the Total Market Scheme."
March 6— Assn. of National Advertisers workshop on tv advertising to discuss new techniques for testing commercials, allocation of media budgets, participation vs. spot announcements and predicting tv success. Speakers will be David Mahoney, executive vice president of Colgate Palmolive; Herbert Zeltner, vice president and media director of Lennen & Newell; Henry Brenner, president of Home Testing Institute and Eric Marder, president of Eric Marder Assoc. Hotel Plaza, Philadelphia.
March 7—California Broadcasters Assn., Mark Hopkins Hotel, San Francisco. FCC Commissioner Robert E. Lee to speak on "The Washington Scene or How to Keep Your License"; NAB General Counsel Doug Anello to discuss editorializing and CEA Legislative Counsel James Garbadil will report on the California legislature.
March 8-10—Annual Radio-TV Conference and Clinic, U. of Oklahoma, Norman. It will be combined with the Seminar in Station Operations, sponsored by the Oklahoma Broadcasters Assn.
March 9-10—Oklahoma Broadcasters Assn. seminar on FCC rules and regulations, Oklahoma Center for Continuing Education, U. of Oklahoma, Norman. Speakers will include FCC Commissioner-designate Kenneth Cox and NAB Executive Vice President Vincent Wisselien.
March 9—American Women in Radio & Television, Projection '63 workshop, 10 a.m.-12:30 p.m., tv wing, McCann-Erickson Adv., 499 Lexington Ave., New York.
March 11—Florida Assn. of Broadcasters, U. of Florida broadcasting day, Gainesville.
March 11—Deadline for filing proposed findings in Grand Rapids, Mich., ch. 13 proceedings.
March 11—Florida Assn. of Broadcasters, Broadcasters Day, U. of Florida broadcasting day, Gainesville. "Let Me Speak to the Manager" panelists include Melvin A. Goldberg, vice president and director of r&d. Dr. Sidney Rosow, president of Pulse Inc. and Sol Talshoff, editor and publisher of BROADCASTING.
March 12—Puerto Rico Assn. of Broadcasters, San Juan. Howard Bell, NAB vice president, will speak.
March 12-15—Audio Engineering Society's West Coast spring convention, Hollywood Roosevelt Hotel, Los Angeles. FM stereo broadcasting, disc recording and reproduction, microphones and earphones and audio applications in the space age are among topics to be dealt with in technical papers.
March 15—Louisiana Assn. of Broadcasters, Opelousas Inn, Opelousas.
March 15—Deadline for comments on FCC proposed rulemaking to allow daytime stations to go on the air at 6 a.m. or sunrise, whichever is earlier.
March 15-16—Institute of Electrical & Electronics Engineers, Pacific computer conference, California Institute of Technology.
March 17-19—National Assn. of Educational Broadcasters, Region III meeting, Kellogg Center, U. of Chicago.
March 18—Extended deadline for comments in FCC Inquiry into the objectionable loudness of commercial announcements and commercial continuity over am, fm and tv stations.
March 18—Reply comments to FCC's proposed fm allocations table.
March 20-22—National Educational Television and Radio Center, spring meeting of program managers and station managers of affiliated non-commercial educational television stations. Park Sheraton Hotel, New York.
March 22-23—Spring convention of Arkansas Broadcasters Assn., Sam Peck Hotel, Little Rock. Speakers will be Blair Vedder, member of the U.S. Senate's Joint Committee on the Arts, Louis & Brorby and Roy Moore, special agent, FBI's Little Rock office.
March 22-23—Arkansas AP Broadcasters Convention, Little Rock Hotel.
March 25-28—Institute of Electrical & Electronics Engineers, convention, New York

BROADCASTING, February 25, 1963
What is the Bell System?

The Bell System is cables and radio relay and laboratories and manufacturing plants and local operating companies and millions of telephones in every part of the country.

The Bell System is people... hundreds of thousands of employees and more than two million men and women who have invested their savings in the business.

It is more than that.

The Bell System is an idea.

It is an idea that starts with the policy of providing you with the best possible communications services at the lowest possible price. But desire is not enough. Bright dreams and high hopes need to be brought to earth and made to work.

You could have all the equipment and still not have the service you know today.

You could have all the separate parts of the Bell System and not have the benefits of all those parts fitted together in a nationwide whole.

It's the time-proved combination of research, manufacturing and operations in one organization — with close teamwork between all three — that results in good service, low cost, and constant improvements in the scope and usefulness of your telephone.

No matter whether it is one of the many tasks of everyday operation — or the special skills needed to invent the transistor, the solar battery, or, with Telstar, to pioneer space communication — the Bell System has the will and the way to get it done.

And a spirit of courtesy and service which has come to be a most important part of the Bell System idea.

BELL TELEPHONE SYSTEM
(We did it!)
Efforts to equate the proverbial apples and oranges of the advertising world have finally borne fruit. For the first time a major research undertaking compares the efficiency of two different advertising media on an even footing—in this case magazines and network television. The CBS Television Network, which developed this precedent-setting research, has revealed its findings in an equally advanced animated film and in a detailed book. To attend a viewing of the film, where you will receive a copy of the book, contact your advertising agency or the CBS Television Network Research Department, 485 Madison Avenue, New York 22, N.Y.
If There's a Screw Loose at Your House, Chances Are It Came From Rockford

And, chances are, this is only one of the many products you use each day that bear the "made in Rockford" label. Rockford's 400 factories produce more than 300 different products, ranging from metal fasteners (5,000,000,000 yearly) to chewing gum.

Rockford is the core city of the vast Rock River Valley industrial complex, ranging from Edgerton, Janesville and Beloit, Wisconsin in the north to Oregon, Dixon, Sterling and Rock Falls, Illinois to the South. To effectively cover this prosperous and expanding market, buy WREX-TV.

April 29-May 1—Assn. of Canadian Advertisers, Royal York Hotel, Toronto.

April 29-May 4—"Rose d'Or" Contest; May 20-25, 1963—Television Symposium and Tv Equipment Exhibition. The two events are part of the Third International Television Festival announced by The City of Mont-
puzzle:

How Doth the Busy Keith McBee?

WMAL-TV's six news cruisers are manned during the day-shift by Keith McBee, Ed Meyer, Larry Krebs, Mal LaPlace, Bob Gneiser and Jim Clark, who prowl the town taking the motion picture footage that makes our news shows the livest and liveliest in D.C.

At 5 p.m. each day the cruisers rendezvous with a station messenger who drives down to pick up the films for the studio. The messenger averages 30 mph each way.*

One day this winter, the news cruisers arrived at their trysting place at 3:30 and stalled there in one of the gigantic traffic snarls that regularly follow WMAL meteorologist Louis Allen's announcement of "possible snow flurries with little or no accumulation." With downtown traffic immobilized and no assurance that the messenger would arrive and less that he would be able to get back if he did, the men decided to invoke Snow Emergency Regulation #364-221C.

Intrepid newsman McBee lost the straw draw and promptly at 4 p.m., he tucked the reels under his arm and started hoofing it toward the station. (Our news always gets through.)

When he had walked some distance he encountered the messenger car, which had in fact started out at its regular time. McBee, messenger and movies then headed back to the station and arrived 15 minutes ahead of schedule. Assuming that the messenger car averaged its usual 30 mph each way and that nobody stopped for coffee, how fast did McBee walk? Correct computations earn an award.

*Rain or snow, your sales message travels at the standard 186,000 miles/second when you beam it on WMAL-TV's Evening Report, a full hour of news coverage 6:30 to 7:30 p.m., Monday through Friday. Try it for lively sales results. Check Harrington, Righter and Parsons, Inc. for availabilities.

Whether buying or selling

EDITOR: I think you have done a superb job on the 1963 Yearbook and at this time see no room for improvement.—George Gribben, chairman, Young & Rubicam, New York.

EDITOR: Every year I make considerable use of this valuable reference work. In my opinion, it is the most comprehensive material within one volume published anywhere in the industry.—Rollo W. Hunter, vice president & director of television & radio, Erwin Wasey, Ruthrauff & Ryan, New York.

EDITOR: It amazes me how you always make the new Yearbook even better than the wonderful one of the previous year. The 1963 Yearbook issue is the greatest!—H. W. Cassill, Blackburn & Co., Chicago.

EDITOR: I have never seen anything on the broadcasting industry so complete and in so much detail as the Yearbook.—Harold V. Lauth, manager, public relations, Washington office, Kaiser Industries Corp.

EDITOR: The 1963 Broadcasting Yearbook is a superb publication.—Raymond F. Blasser, vice president, Union Commerce Bank, Cleveland.

EDITOR: Now that I have become the southeastern representative for the Marcus Assoc., Inc., of Cleveland...here is another five buck for the vital-

ly necessary Yearbook. Can't do business without it!—Leonard L. Asch, 127 Huron Ave., Davis Island, Tampa, Fla.

Agency wants more

EDITOR: Please send me a couple of teasersheets of the Jan. 28 country and western music article.—Sinclair Jacobs, vice president & director in charge of media and tv programming, Daniel & Charles, New York.

No connection

EDITOR: I read your Closed Circuit, Feb. 18 issue, concerning the study being made for the CBS-TV Affiliates Board. Just to keep the record straight, I have no connection with the U. of Minnesota. I have been associated with the faculties of New York U. and, briefly, the U. of Minnesota, but this was many years ago. And...I am not a former CBS economist: rather held various positions in the research department at CBS dating back to 1939, none of which were designated as economist.

These are very trivial points, but I am anxious to avoid any appearance that I am attempting any unwarranted association with the U. of Minnesota.—Charles H. Smith, president, Charles Harriman Smith Assoc., Inc., Minneapolis.

Spotlight on Sunday show

EDITOR: Ray Scherer and I were delighted with the story on Welles Hangen's Pakistan film episode [Media, Feb. 18]. This Is NBC News has been,
Boston Advertisers, buying in their home market, place more dollars on WHDH Radio than any other Boston Radio Station.

Like radio time buyers everywhere, Boston time buyers know they must get top results for their clients' money. They know that buying time on a responsible station, with progressive policies, top programming and loyal listeners is the way to get extra sales.

*Buy Boston like a Bostonian and you'll buy...*

we feel, a successful program, but because of the awkward Sunday afternoon hour, our audience is not as large as we would like it to be. Therefore, we are even more grateful for such mention.—Robert Asman, producer, NBC, Washington, D. C.

Got kicks out of Hix

EDITOR: I would like permission to reprint the Feb. 11 Sid Hix cartoon. We would like to use it in Muzak's Product

"I'm in advertising, really... that's just to keep TV repair men on their toes!"

Pointers, an engineering newsletter which goes to all engineers in the Muzak franchiser organization.—David Bain, manager, Production Division, Muzak Corp., New York.

[Permission has been granted]

Each in its rightful pew

EDITOR: I have long admired the accuracy of your news and feature articles, your attention to detail, and your comprehensive documentation of current events as well as longer-range trends. I have disagreed with many of your editorials. I took particular exception to what I felt was an indefensible attempt to exonerate KRLA [Los Angeles] and WDKD [Kingstree, S. C.] in their recent license revocations. This, to me, weakened the stature of your editorial position because the operation of those two stations constituted an insult to the many conscientious broadcasters who deserved to be better represented by you against such regrettable malpractices.

But, in this case, as always, you clearly stated your judgment on the editorial page and had every right to do so. A major article elsewhere in the same issue presented the details of the FCC action without attempting to interpret those facts for your readers.

My similar reaction to some of your editorial comments about Gov. Collins immediately after his cigarettes-and-youth statement was again softened by the objective accuracy of your factual reporting of the incident elsewhere in Broadcasting.—Rev. James A. Brown, S. J., U. of Southern California, Los Angeles.
Two favorite sights in Philadelphia

Philadelphians love a parade! Particularly "The Mummers' Parade," a jubilant, spectacular New Year's Day classic that's high, wide and handsome as Broad Street itself, and just as much part of the local Philadelphia scene. That's why TV 10's annual coverage, capturing all the high-stepping excitement of the parade, is eagerly anticipated, widely viewed: this year, more than 1,000,000 Philadelphians tuned to the 4½-hour broadcast of the celebration. Bringing Philadelphians what they want to see most is something CBS-Owned WCAU-TV does best. And one of the things Philadelphians want to see most is WCAU-TV, the number one television station according to both Nielsen and ARB.
MONDAY MEMO
from Benjamin J. Green, Geyer, Morey, Ballard Inc., Chicago

The three-way stretch to more effective broadcast selling

Those of you at the top level of station management, I am sure, have an understanding of the problems of many of your advertisers that makes them seek your personal service and counsel. Certainly each of you is highly qualified in some areas of selling where you have had unusual contact and have made special study.

Those of us served by your representatives often have to struggle through a morass of poorly related information and face very little preparation by your reps for helping to solve our client's sales problem at hand. Much of the time our contact men and media departments decide to go it alone without becoming involved in a discussion of advertising approach with your people.

This is a weakness of the agency operation. It should be part of our responsibility to help you develop effective sales methods. Methods that would contribute to our own successes. I am afraid we're lazy in that direction.

**Market Data**
Let me be specific. I will be so bold as to mention a dirty word — newspapers. Newspapers, because they are dealing with retail stores. They have access to the men who understand selling face-to-face with the consumer. They accumulate a good understanding of their markets to such a degree that in buying radio or TV we often rely on newspaper information to help evaluate a broadcast buy. We are more likely to depend on data supplied by newspapers to evaluate a market than we are on data supplied, if available, by a radio or TV station.

Just before the strike we were attacking a problem in New York City, for example. We challenged one of the evening newspapers there with the statement that there was no combination of New York papers that could do the coverage job of the New York News at a comparable cost. This stimulated one press contact into a very thoughtful presentation in which he proposed a most unusual combination. He accurately and carefully put together a coverage plan which involved the use of three of his competitors. This had been common practice earlier in Chicago too before newspaper mergers.

**Empathy**
I cannot recall a situation in which a single radio or TV station approached us with a sales plan which, for example, might have said: “We understand your problem, your need for reaching the largest number of housewives between 18 and 40 with the greatest frequency. We think we can demonstrate to you that our station reaches 60% of that market with greatest efficiency. Here’s how you can reach the other 40%.”

I believe that the burden of creating this buying atmosphere has remained with the clients and agencies and that for the most part broadcasters have been a reluctant party to divided station schedules even though they might agree privately that this was the better way to manage the client’s problem.

**Bugaboo of Bigness**
It also seems that the broadcasting industry could provide more assistance at the local level than it has provided as part of its service up to this time. One of the things which has plagued me personally in buying is what I consider unrealistic rate cards. Bigness always has been a virtue in the broadcasting business. It’s still true that if I wanted to buy radio spots in Detroit for Mrs. Grass’ soups I might pay more for the same number of spots than Lipton soups if Lipton happens to be advertising its tea also.

The big company with multiple products gets advertising advantages because the lump sum of the advertising for its combined products overwhelms the poor fellow who is making a living from one brand or one category. We solved this problem on one major station in a metropolitan market where we discovered we had one food broker handling six lines that could be advertising on the same station. We made a bulk deal on an annual basis through the broker which the station helped to work out.

The deal is in its eighth year of operation and has totalled $1 million in annual volume. Only a small percentage of this I am sure would have gone to that station normally. Also, all of these six different companies obtained benefits from the common situation.

**Merchandising**
Once we have received some help from the station in planning our strategy in the market and have a realistic approach to rates, we still have the problem of getting some effective help in awakening the trade to the fact that a product is being advertised. I’m sure you’ve heard this to the point of irritation over and over again—that grocery buyers don’t pay any attention to broadcasting schedules in planning merchandising, especially radio. So the advertiser says, “I’ve got to put my ads where the buyers can see them.”

In most cases I consider this shortsighted. I do not believe in buying advertising to get merchandising. I believe advertising should be purchased basically for its ability to deliver messages to the consumer.

But I do believe that once that decision has been achieved, every conceivable effort should be made to dramatize this advertising to make certain that its potential is described fully to the industry in as many interesting ways as it is possible.

One of the best plans that we ever hit on was in New York on WNBC when we employed the Tex and Jinx program for Broadcast corned beef hash. We suggested that the heads of the grocery chains be interviewed and proposed in exchange to have pictures of Tex and Jinx taken in the stores involved. The result was tremendous publicity for Tex and Jinx and giant promotions for the product. It also resulted in development of NBC’s Chain Lighting and later CBS’s Supermerketing, where unsold time was swapped for feature displays.

In the three areas I’ve discussed briefly I’m urging stations to cooperate with an advertiser within the limits of propriety. The more willingly stations help agencies, the more likely it is that campaigns will succeed and keep all concerned happy for a longer time.

Ben Green is vice president in charge of the food and grocery product division of Geyer, Morey, Ballard Inc., western division, Chicago. He joined the agency last year after a 15-year tenure with Arthur Meyerhoff & Assoc., Chicago, where he also was vice president. Prior to that he was with H. W. Kastor & Sons there. Mr. Green is a native of New York City. He attended the U. of Illinois and U. of Chicago and began his career as a newspaper reporter and editor.

WELI/960 THE SOUND OF NEW HAVEN / 5000 WATTS / 960 KC
These days, when Hoosiers argue politics, you often hear, "The Senator said so... on television!" Reason: The Communicana Group stations in Fort Wayne and South Bend-Elkhart are televising the top two state legislators in vigorous discussions of the issues now before Indiana's 93rd General Assembly. "61 Days of Decision" the public service series is called. It is widely quoted all over the state following every broadcast.

For thirty lively minutes, Senator D. Russell Bontrager, Republican President Pro Tem of the Indiana Senate, meets with Senator Marshall F. Kizer, Democratic Floor Leader. Moderator is John F. Dille, Jr., a member of the N.A.B. Editorializing Committee, and president of The Communicana Group. All the explosive issues are examined. Taxes! Reapportionment! Education! The Burns Ditch Deep-sea Port! Viewers are prodded into taking sides, taking action.

It is vigilant, vibrant programming like this which has caused Northern Indiana viewers to look so loyally to The Communicana Group stations, WSJV-TV and WKJG-TV... and to their advertisers, as well. Ask Advertising Time Sales for the revealing details.

RATINGS PROBE BIG BLAST PROMISED

■ Committee member hints disclosures to come will be ‘hot’ news
■ Collins, then network executives scheduled to appear March 5
■ After use of ratings is established the services will be called

The fruits of 18 months of intensive investigation into the inner workings of the radio and television rating services will be exposed to public view beginning next Tuesday (March 5) by the Special Subcommittee on Investigations of the House Commerce Committee.

Rep. Oren Harris (D-Ark.), chairman of both committees, announced the hearings last week at the same time he announced the formation of the new subcommittee (BROADCASTING, Feb. 18).

At its organizational meeting last Tuesday (Feb. 19), the special subcommittee heard an oral report on the investigation from three staff members and a warning from Chairman Harris and the ranking minority member present, Rep. William Springer (R-Ill.), to keep the information secret.

One subcommittee member, in predicting that disclosures to be made will be “hot,” said that nothing was presented in writing by the staff. It is understood that no direct charges of “fraud” were made by the staff but that, after hearing the presentation, members questioned whether some of the rating surveys are handled “honestly” and “ethically.”

Another congressman who heard the staff presentation predicted the hearings will be “mighty revealing [and] could very well get some attention . . .” in the newspapers.

Collins Leads Off ■ The subcommittee announced over the weekend that NAB President LeRoy Collins will be the first witness with most of the testimony next week to be devoted to the “use” made of ratings. Two years ago in a speech to the combined boards of the NAB, Gov. Collins charged that broadcasting, by relying too heavily on ratings, has allowed “an outsider to become master of its own house” (BROADCASTING, Feb. 13, 1961).

Executives of the three tv networks and four radio networks will follow the NAB to the stand to explain the use they make of ratings in deciding program schedules. ABC witnesses are expected to be Thomas W. Moore, vice president in charge of ABC-TV, and Robert Pauley, president of ABC Radio.

At week’s end, it was not definitely established who would represent CBS-TV and NBC-TV. It was understood that originally the subcommittee had requested that both Frank Stanton, president of CBS Inc., and Robert Kintner, president of NBC, appear in Washington. Both, however, are scheduled to make speeches elsewhere on March 5, the day network officials have been called.

NBC and CBS disclosed that they had received letters from the subcommittee late last week requesting that their principal witnesses be prepared, and authorized, to testify concerning previous statements made by both Messrs. Stanton and Kintner and several other executives who spoke for the two networks.

If Dr. Stanton, acknowledged industry expert on ratings, is not able to testify, CBS-TV President James T. Aubrey Jr. is expected to be the principal witness, along with Arthur Hull Hayes, president of CBS Radio. Probable chief spokesman for NBC-TV will be Executive Vice President Walter D. Scott with William K. McDaniel, execu-
A long build-up to the new investigation of the raters

Broadcast rating services—which will be the subject of a full-dress House subcommittee hearing that begins next week—have been under government scrutiny off and on for some five years.

The Senate Commerce Committee undertook a modest investigation of the raters in 1957-58—largely at the urging of Sen. A. S. Mike Monroney (D-Okla.), and then and now a committee member. Executives of the major rating services appeared before the committee June 26, 1958 for a one-day session—the only public hearing on the subject to date (BROADCASTING, June 30, 1958). Sen. Monroney sought further hearings but none materialized. Generally, the ratings people won an impressive story during the June sitting of how they conduct their businesses, and senatorial interest diminished for a while. (A special counsel to the committee was Kenneth A. Cox, who is presently chief of the FCC's Broadcast Bureau and is awaiting Senate confirmation to be an FCC commissioner.)

In anticipation that the hearings would continue, the committee sent questionnaires to advertising agencies asking how they use ratings in buying and placing TV shows (BROADCASTING, Feb. 2, 1959).

Then Quiet • The subject lay dormant on Capitol Hill until mid-1960 when Rep. Oren Harris (D-Ark.), chairman of the House Oversight Subcommittee, appointed a special committee of research experts to study the rating services and bring in a report. The committee, headed by William G. Madow of the Stanford Research Institute, had just wound up its work when the ratings popped up again during a Senate confirmation hearing for Federal Trade Commission Chairman Paul Rand Dixon in March 1961. While questioning Mr. Dixon, Sen. Warren G. Magnuson (D-Wash.), chairman of the Commerce Committee, revealed that data collected during the 1958 committee investigation had been turned over to the FTC in 1960 for action. Mr. Dixon was asked to check into the status of the agency’s investigation. He promised an early look at the subject (BROADCASTING, March 20, 1961).

Only a week later came the Madow Report. It made 12 specific recommendations for improvement of rating services.

Subcommittee Chairman Harris, who is heading the investigation which opens next week, said two of the Madow Report's findings were especially important: One urged publication by the services of how they get their information; the other said the services should provide their clients with capsule information on the accuracy of their estimates (BROADCASTING, March 27, 1961).

The individual services said that they have been contacted during the past week by the subcommittee and told to appear in Washington either the week of March 11 or March 18. They were told, as were the networks and NAB, to submit prepared statements in advance if they desired.

One ratings president said he was at a loss as to what to be prepared to testify about because he had no idea what the subcommittee has in mind.

Other Witnesses • Also expected to be called next week, ahead of the individual services, are several broadcasters, program producers, major advertisers and possibly agency executives. A subcommittee member said that he expected many persons will request an opportunity to testify after the hearing is publicized.

It is understood that many top program men, who have publicly criticized ratings in the past, are reluctant to testify because of fear of economic reprisals. One top supplier of network programs in past years, who admitted that he had been interviewed by the subcommittee staff, named three currently unemployed program creators in explaining why he did not plan to appear before the Harris subcommittee.

Future witnesses will be announced on a day-to-day basis, it was reported, to keep them from being exposed to “outside pressures.” A member of the committee said that an element of surprise is intended in some instances and that it just would not be a good idea to announce the names in advance.

Three different subcommittee members praised Messrs. Sparger and Richardson, both 30-years-old and former members of the Oklahoma House of Representatives, for the thoroughness of their investigation, during which “hundreds” of persons were interviewed.

Samples Criticized • One congressman, who said the subcommittee is vitally interested in determining just howpendent the broadcasting industry is on ratings, said the two have done an “exhaustive job.” The hearings, he predicted, will show among other things that the samples reported in surveys are not as represented.

In promising that the hearings will be objective, Chairman Harris also praised the preparatory work of Messers. Sparger and Richardson and Charles Howze, chief counsel of the subcommittee. Contrary to a report published here last week, Chairman Harris said the hearings will probably continue through to completion without interruption beginning next week.
Inc., Sindlinger & Co. and C. E. Hooper Inc.) "are doing a reasonably good technical piece of work for the purposes to be served."

A New Course • Events to date indicate 1963 may be the year the rating services take their lumps.

The Federal Trade Commission concluded six months of negotiations with three of the largest rating firms and announced the companies had signed consent orders with the agency in January (Broadcasting, Jan. 7).

The services agreed their audience estimates were not 100% accurate, and said they would supplement their rating reports with additional statistical data.

Reaction to the orders on Capitol Hill indicated the services may have gotten off easy. Word from the House unit which had been preparing for next week's hearings since the Madow Report was released almost two years ago indicated the FTC orders "just scratched the surface," or else they were as good as far as they went, but did not go far enough. Plainly the Harris Subcommittee intends to take it from there.

"I have no disposition to drag this out," he said. "In my judgment, it would be better to continue straight through the investigation once we have started."

Young Veterans • Mr. Howze, 34, will probably do most of the questioning of witnesses as chief counsel. A native of Washington, D.C., he was in private practice in Boston before joining the staff of the old Legislative Oversight Subcommittee (grandfather of the new subcommittee) in April 1959. At the start of the 87th Congress, he became chief counsel of the Subcommittee on Regulatory Agencies in April 1961 when that group succeeded the Oversight Subcommittee. The new Special Subcommittee on Investigations is the successor to the Regulatory Agencies Subcommittee.

Mr. Howze was active in the investigations which led to the 1960 disclosures of the rigged tv quiz shows and payola.

Mr. Sparger joined the Oversight staff in February 1960 as a protege of House Majority Leader Carl Albert (D-Okla.). During his tenure in the Oklahoma Legislature, he was chairman of the House Investigative Subcommittee. Mr. Sparger gave the oral report on the ratings investigation last week.

He has resigned from the staff, effective with the completion of the ratings hearings, to return to Oklahoma. Mr. Sparger said that he hoped to keep his hand in state politics. Before his election to the state legislature, he was sports and regional editor of the Ardmore (Oklahoma) Daily Ardmoreite.

Mr. Richardson, who served with Mr. Sparger in the Oklahoma Legislature, came to Washington in 1959 on a Prettyman Fellowship to study advanced law at George Washington U. He also during this time worked as a defense of accused persons without funds and received wide publicity when he succeeded in getting release of several prisoners who were jailed in violation of a 100-year-old law.

He has an L.L. M. from GWU and an L.L. B. from the U. of Oklahoma. He joined the subcommittee staff in 1961 with the start of the ratings investigation.

The Purpose • In announcing the ratings hearings, the subcommittee said it will explore their use, "their importance in determining what is broadcast to the public and the accuracy of ratings." Rep. Harris said the hearings are the result of the field investigation which began in August 1961, which, itself was an outgrowth of the Madow study. This study was made by a special three-man committee of the ASA under commisson of the Legislative Oversight Subcommittee. It was chaired by William G. Madow of the Stanford Research Institute.

Hunting at developments to come, Rep. Harris said the 1961 study left some "grey areas" and that in probing these grey areas, the subcommittee "developed additional information which extended the investigation." He said the Madow report was unable to determine "specific techniques of using the ratings" which, after further investigation by Messrs. Sparger and Richardson, opened new vistas of inquiry.

A second phase of the investigation, Rep. Harris said, has been to determine whether the rating services, "in fact, do what they say they do. . . . The rating services have for many years engaged in a business apparently conducted, insofar as subscribers and users are concerned, largely on faith."

In his first talk to the NAB combined boards after becoming president of the association, Gov. Collins had this to say about ratings in February 1961: "There is another matter I feel should be of grave concern to broadcasters—that is the development of the various audience-measurement or program-rating businesses.

"Now, I do not here quarrel with the validity of these services, but I am shocked by their far-reaching influence

The new Subcommittee on Investigations which will begin a new round of hearings on radio-tv rating services March 5 will be under the guidance of old hand Rep. Oren Harris (D-Ark.) whose Legislative Oversight Subcommittee made headlines on the same subject for years. Members of the committee, shown here, include Democrats John Moss (Calif.), Paul Rogers (Fla.), Gillis Long (La.) and W. R. Hull Jr. (Mo.). Republicans are John Bennett (Mich.), William Springer (Ill.), J. Arthur Younger (Calif.), and Donald G. Brotzman (Colo.).

Chmn. Harris
in the whole broadcasting industry. In effect, their reporting is determining in large measure not only what the American broadcasting diet will be but also at what times the meals will be served.

"And yet, NAB has no check-rein or oversee-status whatever over what the raters do, or how they do it. Broadcasting, therefore, is allowing an outsider to become master of its own house and does not even check his health card."

Network executives have repeatedly testified in past appearances before Congress and the FCC that ratings results are just one of many factors that go into the selection and scheduling of programming. Independent producers whose low-rated network shows have been canceled, have just as repeatedly maintained that their programs have gone on the casualty list solely because of ratings.

Harris tells Kennedy about ratings probe

The man who will lead the congressional investigation of rating services next week (see page 25) made sure his party boss got the word last week.

Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee and the Special Investigations Subcommittee which will conduct the hearings, told President Kennedy about the probe "in passing" during an hour's private conference with the Chief Executive on Thursday (Feb. 21).

Rep. Harris revealed to reporters later that it was the President who had requested he submit legislation to suspend equal time provisions of the Communications Act as they apply to the presidential and vice presidential races in the 1964 election (see page 42).

The chairman refused to say whether he and the President had discussed candidates for a possible vacancy on the FCC, but, he said—and this after talking with the President—he had no reason not to believe reports Chairman Newton N. Minow is resigning (BROADCASTING, Feb. 11).

President Kennedy has been consulting with key committee chairmen on Capitol Hill in an effort to ensure sufficient support for the many administration measures and proposals that are being sent to the current congress.

BROADCAST ADVERTISING

NETWORK SALES SET RECORD PACE

Many big advertisers already committed for 1963-'64; solid CBS-TV position speeds selling by other networks as well

Major tv advertisers are expected to tie down network commitments for the next season earlier this year than ever before.

Paced by the drive of the blue-chip advertisers, tv network selling for the 1963-64 season is far advanced for February.

The step-up in major advertiser purchases of network tv presages a new record in tv billing this year.

As of last week, such bellwether network advertisers as Procter & Gamble, General Foods, Liggett & Myers, Brown & Williamson, Philip Morris, P. Lorillard, Lever Bros., Kellogg, S & H Green Stamps and Chrysler Corp. had orders placed for 1963-64. Some of these—P & G, General Foods, Philip Morris and Chrysler in particular—established a pattern by having nearly completed their list of purchases for the new season.

The selling spurt among the well-heeled and multi-product advertisers is set against this background:

- Network tv gross billings are at a higher point than in any previous year. It is expected that the total for 1962—and formal release of figures is being made this week—will come in at a near-$800 million level, about 12% increase over 1961. Nighttime network tv alone accounted for 68% of the total, or nearly $550 million. An estimate for this year: At least another 5% gain in gross time billings if current buying continues.

- The billings rise in 1962 is the largest yearly percentage increase in network tv since 1956.

- The momentum which has caused a speed-up in advertiser advance buying of new tv shows was provided in large part by CBS-TV's unusual performance this season.

CBS-TV's Move • The actual lock-up at CBS-TV occurred some 10 days to two weeks ago (BROADCASTING, Feb. 18). That network led the way as a result of program success and good business. The network finished 1962 showing a whopping percentage gain. The story, both for programming and economics, was so good that CBS-TV president James T. Aubrey Jr., has announced the next season's prime-time schedule to affiliated stations (CLOSED CIRCUIT, Feb. 18).

In his letter, Mr. Aubrey noted that "never before has CBS-TV—or any network—locked up a new season's schedule so early in the year." He also wrote, "with such a schedule it is not surprising advertisers already have placed an unprecedented volume of business next fall."

A fundamental qualification is provided by the nature of the tv business. Big advertiser purchases of new shows provide but one barometer. The other indicator is the renewal rate of continuing shows.

Traditionally contracts contain renewal options, and networks send out notice to advertisers on Feb. 15. Usually these renewals begin coming back to the networks about March 1. This is why many decisions for next season are held in abeyance until after March 1. A few sales trends, however, are already apparent. Some of these:

- CBS-TV is making an effort to limit the number of shows sold on a minute participation basis. Both ABC-TV and NBC-TV would like to follow this lead.

- As one astute broadcasting executive analyzed the sales period: "It is like a game of poker. CBS-TV is standing pat on its hand of hits, and except for modifications, is waiting for renewals. NBC-TV is playing it safe and playing along with movies and anthologies, lacking in programming as it makes 'advertiser sales.' ABC-TV has drawn a new hand with some new programming concepts, and is aiming for young housewives."

The NBC-TV drive for sales has resulted in the contract with Chrysler involving some $18 million in a Bob Hope-Revue anthology for next season (Fridays, 8:30-9:30), its DuPont series and General Electric anthology hour on Sundays at 10 p.m., and a newly announced

28

BROADCASTING, February 25, 1963
"Our use of WSOC-TV over 5 years has drawn a tremendous number of our customers from as far as 70 miles away. This big plus volume is the "extra" that has helped our two stores capture nearly 12% of Charlotte's $81 million retail grocery business."

CHAS. N. REID, Pres.
Park 'N Shop,
Charlotte, N.C.

Among metro areas of the Southeast, Charlotte is first in retail sales per family. Its 75-mile radius population is the largest in the Southeast. This density of free-spending consumers within the friendly persuasion of WSOC-TV keeps a lot of our advertisers wonderfully happy. See Mr. Reid. Let the plus volume WSOC-TV will produce for your schedule make you happy, too. One of the great area stations of the nation.
S&H cautious

to
the
Travel of Jannie McPhleetes, Liggett & Myers of Arrest & Trial, Fire-
stone will sponsor all of its half-hour Voice, all on ABC-TV.
Kellogg and Toni appear set for My Favorite Martian. Renewals appear as-
sured on Ed Sullivan. There are at least three advertisers certain for Judy
Garland Show (Menley & James, American Tobacco and General Mills). Leer
and Bristol-Myers seem set again for Candid Camera and renewals look good
for What's My Line?, all on CBS-TV.

NBC-TV's lineup indicates RCA & Eastman Kodak will renew Walt Disney,
Procter & Gamble is set with Grindil, Chevrolet with Bonanza, and Dupont
and GE in the 10-11 p.m. period.

Monday-Saturday • Other nights on the schedule are not that complete but
here is the present status at each network:
CBS on Monday already anticipates renewals from 7:30-10, and picking up
with 10, East Side, West Side is half-
sold (Philip Morris and American Home
Products). On CBS-TV, too, Tuesday is a "renewal" night except for Whistle
Stop (formerly called Ozark Widow) which has Procter & Gamble as a spon-
or. On CBS-TV Wednesday night,

Travelers Insurance reportedly has picked up two-thirds of CBS Reports
and the remainder will be participating advertisers: American Tobacco has a
half of Real McCoys, renewals are ex-
pected for Hillbillies, Dick Van Dyke,
and Danny Kaye Show at 10-11 is half
sold to Armstrong (U. S. Steel has
dropped its network tv sponsorship.)

Thursday night sales on CBS-TV hinge mostly on renewals. Friday night
has an hour open (The Free and The
Brave, 7:30-8:30), and renewals antici-
pated for the other shows (Rawhide
and Perry Mason in the past have had
participations). On Saturday, Philip
Morris already has signed for Jackie
Gleason and renewals are expected, the
new Phil Silvers Show has General
Foods, Defenders has Lever renewing,
and other advertisers are expected to
pick up portions. Procter & Gamble is
set for Gunsmoke along with other re-
newing advertisers.

On NBC-TV Monday night is still
an open question for advertisers (and
programming from 7:30-10, with
Mitch Miller set at 10-11), but a late
report indicated that the network may
continue to show motion picture fea-
tures that night.

Little of Tuesday night on NBC-TV
is firm, though Bristol-Myers is reported
to have bought spots on Mr. Novak
(7:30:9:30) and the 10-11 p.m. period
has the 12 Andy Williams specials, and
AT&T (Bell Telephone Hour). Wednes-
day's The Virginian has P&G and
Liggett & Myers penciled in. Kraft
Foods is certain though it may shift its
time period, and some or all of Eleventh
Hour is expected to be renewed.

On NBC-TV Thursday, L & M is in
Dr. Kildare and other renewals are ex-
pected. Ford is reported to be signing
for Hazel and Lorillard (Kent) and
Menley & James seem assured for Jack
Paar. A. C. Gilbert and renewals are
seen for International Showtime. On
Friday, Chrysler has its hour set, Col-
gate-Palmolive is sponsor of Harry's
Girls and Lorillard has an alternate half-
hour of the new Joey Bishop Show.
There is little to report on Saturday
though Union Carbide seems assured
as one of the advertisers in the movie
block.

ABC-TV is cautious in reporting
sales, but renewals are expected in
Wagon Train (now 90 minutes), and
Brown & Williamson has an alternate
half-hour in The Breaking Point, both
on Monday; American Gas Assn. and
American Dairy Assn. are sponsors of
Ozzie & Harriet at 7:30-8 on Wednes-
day, P & G continues with its sponsor-
ship in Ben Casey and L & M is an
advance advertiser in The Young & The
Bold. Brown & Williamson and P & G
are advertisers in The Fugitive on
Thursday, Gillette is set for Friday
ights, L & M is in the new Jerry Lewis
Show on Saturday.

ABC-TV at last report is said to be
considering Price is Right at 8-8:30 on
Saturday if it obtains the show that's
now on NBC-TV.

Understandably strong optimism for
the new season emanates from CBS-TV
where one top sales executive char-
acterized the current "selling momen-
tum" as the "greatest since late 1949
or the early 1950's."

COMMERCIAL PREVIEW: Chooz antacid gum

In preparing a commercial to dem-
strate "the flow of soothing relief"
of Chooz, an antacid chewing gum
developed by Pharmaco, Kenilworth,
N. J., the W. N. Ayer agency decided
to emphasize the product's difference
from capsule-type antacids.

Ayer enlisted the services of an
x-ray technician to obtain graphic
proof of the difference. Actual x-ray
films reportedly showed that ordinary
tables "taken with water, simply fell
to the pit of the stomach..." while
Chooz "bathed the heartburn zone
with a constant flow of soothing rel-
ief." A radiologist reviewed the film
for the agency and attested to its
authenticity. For fear of upsetting
"sensitive psyches" with the realistic
evidence, Ayer turned the x-ray story
into an animated sequence.

X-ray motion pictures were taken
to compare Chooz antacid chewing
gum with capsule-type antacids.

The commercial will be used on
NBC-TV's Mere Griffin Show and
"a variety of ABC-TV and CBS-TV
daytime programs," according to
Ayer spokesmen.

S&H buys NBC specials

Sperry & Hutchinson Co. (S&H
Green Stamps), New York, and
NBC-TV were reported late last
week to be committed next sea-
sion to a series of 12 specials, each
one hour in length, that will fea-
ture singer Andy Williams. Sulli-
vian, Stautler, Colwell & Bayles,
New York, is S&H's agency.
The contract, it was estimated, represents some $2.5-3 million in
time and talent. The specials
would be placed in the Tuesday,
10-11 p.m. segment, over a period
from October through May 1964,
Andy Williams this season appears
in a regular series. Barnaby Pro-
ductions is designated as the pro-
duction company. The series is to
be produced in Hollywood.
We still got a few availabilities!

This is just to remind you that even though WDAY-TV is possibly the most nearly-sold-out station in the Northwest, this situation changes back and forth almost constantly.

Even in our extremely popular “Party Line” (late afternoon) — even in our News, Weather and Sports (and at Noontime) — we can often come up with a real BANG for you!

NOW might be the very time to ask PGW. How ’bout it?

THE 'MEXICAN-AMERICAN' MARKET

Survey of 500 housewives shows their media preferences

The homogeneity of Mexican-American families in the five-state "Latin Crescent" has been borne out in a re
search survey just published by Belden Assoc., market research firm of Dallas and Mexico City.

The report was compiled to meet the need for reliable marketing data on the Spanish-language, Mexican-American population of the United States.

"The Mexican-American Market in the United States" was made in 12 com
munity areas of 40,000 or more Mexi
Can-Americans in Texas, Arizona, New
Mexico, Colorado and California. These
areas represent 1,214,576 or about 33%
of all Mexican-Americans (3,666,278)
living in the five states, making it the
largest homogeneous Latin-American
group in the United States.

Housewives, considered best equipped to accurately answer the survey, were
contacted personally with all questions
asked in Spanish by a bi-lingual inter
viewer. Of the 500 women surveyed, 43.
9% or 219 came from Los Angeles and
San Antonio, the most heavily Latin
of the 12 areas in the study.

Migrants? • In its major general find-
ing, the survey does away with the
"migratory" tag commonly connected
with Mexican-American families. This
characteristic may be true among some
whose livelihood is farm labor, the sur
vey notes, but it does not necessarily
apply to urban residents.

In 11% of the families someone had
left the city in the preceding 12 months
to work temporarily in another place.
Of this number, only 3% took the whole
family with them. Thus the survey
shows that the overwhelming majority
(86%) have home roots and stay with
their friends and jobs.

Illustration of this point is shown in
the figures on home ownership. Fifty-
three per cent reported they owned their
own homes and 47% said they rented.
Of the home-owners, 31% bought new
homes.

The survey included 70% American-
born respondents, with 27% Mexican-
born. Spanish, was reported as the lan
guage most spoken in the homes (40%).
English is spoken most in 24% and in
36% of the homes English and Spanish
speaking is about equal.

Spanish Radio • When it came to
radio listening, however, the survey
showed that 52% of the respondents
list mostly to stations broadcasting in
Spanish, while 31% said they listen to
stations mostly in English.

Marked preference was shown for
English-language newspapers, 78% say
ing they read them mostly, and 73%
reporting they mostly read English-
language magazines. These figures were
based on the 69% and 64% who said
they read daily newspapers and maga
zines, respectively.

The Belden study covers 28 different
economic and social categories from
air conditioning ownership to occupa
tion of the head of the family; the aver
age family being 5.2 members.

Education • Only 2% of the heads
of family graduated college. Another
3% attended college but did not gradu
ate. Twelve per cent graduated high
school, while 19% attended but did not
graduate.

The majority of family heads were
employed as craftsmen, skilled workers,
operatives and laborers (58%). Only
4% were listed in the professional and
technical fields.

The income varied from 11% who
reported earning less than $1,500 a year
to 1%, earning more than $10,000 per
year; 19% were in the $2,000-2,999
bracket, 20% between $3,000-3,999, 14%
between $4,000-4,999 and 16% reported
$5,000-6,999.

Appended to the family study, the
Belden reports contains an extensive
section on population. Between the 1950
and 1960 census, an increase of 51.3%
in the incidence of Spanish surnames in
the five states was noted.

The study was originated and execut
ed by Belden as an independent re
search firm. The initial studies were
ordered by The Quaker Oats Co., who
used a portion of the questionnaire for
other market research. Belden expanded
the survey on its own and expects to
defray the additional costs through sales
of the volume at $5 each. The initial
subscriber was the five-station Sombrebo
Texas Group of KCOR San Antonio,
XELO El Paso, KGBT Harlingen,
KUNO Corpus Christi and XEK
Laredo.

SIN opens new office

The Spanish International Net
work has announced an expan
sion of its sales activity in New
York. Rene Anselmo, vice presi
dent of SIN, is now operating the
new sales office at 247 Park Ave.
The network consists of seven
full-time, all-Spanish language tv
stations, five in Mexico and two
in the U. S. (KMEX [TV] Los
Angeles and KWEX [TV] San
Antonio).

Richard O'Connell (l), executive direc
tor and New York representative of the Sombrero Texas Group, and Joe
Belden, president of Belden Assoc.,
Dallas, discuss the new Mexican
American Survey.
Says Al Constant:  
Station Manager, KRON-TV

"Viewers in San Francisco are sold on KRON-TV, and we are sold on Seven Arts!"

"As the number-one station in the San Francisco market, we naturally must present the best in TV entertainment. We purchased Volumes 3, 4, and 5 of 'Films of the 50's' from Seven Arts because we felt these features were the very best available for programming in our new weekend movie showcases—'Great Movies' which debuts Saturday, February 23rd, will run from 6:00 to 7:30 P.M. and 'Sunday Night Movie' which will debut Sunday, February 24th will run from 11:10 P.M. to conclusion. In addition to these 2 new feature film time slots, Seven Arts' 'Films of the 50's' will also be telecast on KRON-TV's 'Saturday Night Movie' from 11:10 P.M. to conclusion."

If you lived in San Francisco... you'd see Seven Arts' Volumes 3, 4, & 5 on KRON-TV
CHRYSLER SEeks deal for dealers

It wants its own tv discounts applied to local groups

The Chrysler Corp., Detroit, is planning to intensify its dealer groups' participation in television, but the method it hopes to use is viewed with dismay by some television station operators.

Chrysler has asked television stations to incorporate into the Chrysler Corp.'s overall blanket contract any television that might be purchased by any local dealer group. Some station operators view this move as a "dangerous precedent" that might lead other national advertisers to request the combination for any local group to earn maximum discounts.

A Chrysler official confirmed that the request had been made but declined to say whether it was a general mailing to all stations or only to some or whether this would constitute a general policy for the future. His view was that Chrysler was merely making a proposal that a station could accept or reject.

The opposition to the Chrysler plan by some stations is keyed to the conviction that less revenue would accrue to stations if the dealer and Chrysler buys are combined for maximum discounts.

But this attitude is by no means unanimous. One highly placed broadcasting official said that some TV stations find it difficult to compete with newspapers for local automobile dealer group funds, and the Chrysler strategy is "above-board, straight-forward and reasonable." He said that it is a decision that each individual station should make, depending on its local competitive position. In the long run, he added, many stations stand to benefit from this offer, even with the larger discounts.

It is known that Chrysler, which has improved its sales position substantially in the past two years, hopes to stimulate increases in dealer group advertising and its latest offering is one step in this direction. Chrysler assertedly hopes to bring up dealer TV participation closer to the levels of Ford and General Motors.

The more active spending by Ford and General Motors dealers in national and regional spot TV is pointed up by figures available from the Television Bureau of Advertising. In 1962, according to TVB, Chrysler dealers spent approximately $2.7 million, as compared with $4.5 million for General Motors dealers and $5.1 million for Ford dealers.

Tupperware plans test

A musical commercial for Tupperware Home Parties Inc., Orlando, Fla., will be tested in a group of radio markets next month to promote the asserted "sealed airtight" quality of the company's plastic containers. BBDO, New York, is the agency.

An original musical score by jazz artist Eddie Manson attempts to blend the product quality with music (simulating the air whoosh). One chorus goes: "Save work and time. Save money too. Our secret we'll share. (SHH!) Don't throw away leftover food. Keep it in Tupperware."

Buick, Dodge start major spot campaign

New Detroit auto money—from Buick and Dodge—is being invested in broadcast advertising, including local spot, as the auto industry continues to enjoy another brisk selling year. Buick is buying radio, Dodge is already in a heavy TV drive.

General Motors' Buick, through McCann-Erickson, Detroit, will start a heavy radio spot drive March 25 to run until mid-May on schedules of up to 221 stations plus the ABC, MBS and NBC radio networks as part of a major dealer showroom traffic promotion.

The campaign centers on distribution of hundreds of thousands of copies of a Buick record album, "The Sound of Tomorrow," produced exclusively for the auto maker by RCA Victor. The Buick campaign also will use magazines, newspapers and NBC-TV's satellite Miller show.

Chrysler Corp.'s Dodge, which also continues to be a heavy radio spot advertiser, last week embarked on a heavy spot TV drive. Placed through BBDO, Detroit, Dodge on Feb. 16 began local minute spots on stations in the top 35 markets for periods running up to six weeks. Participations on ABC-TV and NBC-TV also are being used.

Dodge new-car sales nationally for the current model season have been running 50% or better than the year before, with the Detroit area claimed to be an industry-record increase of 123%. Detroit Dodge dealers also are running a new intensive local TV-radio drive through BBDO.

A. C. (Arnie) Thomson, advertising director for Dodge passenger cars, has stressed that radio is not merely a "reminder medium," but provides reach and frequency that are vital in selling a

NBC Radio is back in the RAB fold

NBC Radio, after an absence of approximately a year, is rejoining the Radio Advertising Bureau on March 1. With NBC Radio's addition, all the radio networks will be represented in the trade group's membership.

William K. McDaniel, executive vice president of NBC Radio, announced the move and praised the RAB's plans to boost radio standards of salesmanship and research. In addition to the network, NBC owned and operated radio stations also become RAB members. RAB president-designate Edmund C. Bunker (left in photo) welcomes Mr. McDaniel.
The most complete, most exciting Radio Programming Service ever offered!
high-priced product such as a car (Broadcasting, Feb. 18). In Chicago last week for the auto show there Mr. Thomson explained that both tv and radio spot work together to provide the flexible communication link that is necessary in today's highly competitive all-media battle to win "a share of the consumer's mind."

Mr. Thomson explained that while network programs and participations do an effective job in covering the nation as a whole, local spot must be added in the top major markets in order to augment network coverage. It is in these major centers, he said, where the prospective customer is bombarded with messages from a multiplicity of media and hence the extra exposure weight is needed to capture a share of his attention.

Because of Dodge's big sales gains, Mr. Thomson said, budgets for all media have been increased considerably, including tv and radio. The current Dodge drive is "one of the most concentrated spot tv campaigns in our history," he added.

Dodge's parent, Chrysler Corp., in a new corporate purchase through Young & Rubicam, has signed for an $18 million weekly hour package built around Bob Hope that will begin next season on NBC-TV (At Deadline, Feb. 18).

**Blair announces 'top 10' radio spots**

Blair Radio last week released a "top 10" list of radio commercials which the station rep said are the ones "liked best" by listeners throughout the U. S. To pick the 10 commercials, along with eight runners-up, The Pulse Inc. conducted a 2,000-home sample during regular interviews.

The winners, listed alphabetically:

- Chevrolet (Campbell-Ewald, Detroit)
- Coca-Cola (McCann-Erickson, New York)
- Dodge (BBDO, New York)
- Ford (J. Walter Thompson, New York)
- Kellogg's Corn Flakes (Leo Burnett, Chicago)
- Pall Mall (Sullivan, Stauffer, Colwell & Bayles, New York)
- Park's sausages (Leon Shaffer Golnick, Baltimore)
- Pepsi-Cola (BBDO, New York)
- V-8 Juice (Needham, Louis & Brosby, Chicago, and William Esty, New York)

Runners-up included: Acent (NLKB, Chicago); Carling's Black Label beer (Lang, Fisher & Shatshower, Cleveland); Chesterfield (JWT, New York); L&M (JWT, New York); Pontiac (MacManus, John & Adams, Detroit); Rambler (Geyer, Morey & Ballard, Detroit); Salada Tea (Hoag &

**Tongue-in-cheek spots selling staid 'Times' on West Coast**

The newspaper strike has deprived New Yorkers of their daily newspapers, but the Western edition of the New York Times is flourishing, thanks in part to a radio campaign which began mid-January in Los Angeles and San Francisco. The one-minute spots, created by Carson/Roberts, Los Angeles, are currently broadcast by KNX and KFI Los Angeles; KNBR, KCBS and KGO San Francisco in an initial 13-week subscription campaign.

Most of the spots are based on the adventures of Mr. Peebles, the mailman, who delivers the New York Times to Western subscribers. Typical is his conversation with Mrs. Dumont, who is so anxious to get her Times that she kisses him when he hands it to her with the rest of her mail. When she raves about all the New York Times world-famous columnists like James Reston and Arthur Krock and Sulzberger and Taubman and, oh, just everybody.

The postman asks which is her favorite.

"Well," she says hesitatingly, "I like Taubman on the theatre. But Rupert's favorite is James Reston."

"Rupert," asks Mr. Peebles, "I thought your husband's name was Cyril."

"It is," she responds.

"So who's Rupert?"

"My prize mynah bird."

"You mean...?"

"Yes. I line Rupert's cage with the New York Times, Reston's column facing up."

"You mean to say you use the most distinguished newspaper in the world to line a mynah bird's cage?"

"That's right. But when that bird talks—you listen!"

In another of the spots, a little girl amazes Postman Peebles by telling him that the New York Times he is delivering is not for her mother, but for herself. "What's so strange?" she asks. "After all I'm six years old... Can I help it if I dig James Reston and Arthur Krock?"

The embarrassed postman replies:

"Certainly not, but I thought little girls just liked to play with dolls, and the little girl says: 'We do,' and shows him her talking doll. "Does she say 'I love you' and 'Go bye bye,'?" he asks.

She snaps back: "Are you kidding? Listen—. There is the sound of a doll ring pull and the doll's voice says 'Shall we discuss the Congo situation.' "You see," the little girl explains, "she reads the New York Times too."

Ken Sullet (l), Carson/Roberts copy chief discusses script approach to "New York Times" Western edition spots with cast members Arte Johnson, June Foray and Howard McNear during recording session.
MARK CENTURY CORPORATION
P R E S E N T S

Radio à la Carte

What is Radio à la Carte?
Radio à la Carte is a complete radio production service. It is a continuing service. It gives the AM or FM broadcaster everything he needs in radio programming. It is the finest service available. Never before have so many top talents contributed so much to radio production services. Laugh at the talk and humor prepared by the finest comedy talents. Hear public service announcements so well produced, so compelling, so sponsorable! Listen to the sample commercials and imagine your station offering these unusual announcements to your sponsors. The contests are unusual...and that's something, considering the contest field today. And the production music is the most exciting available to radio. It's the sound of the future.

Who is Radio à la Carte?
Mark Century Corporation, the producers, are radio veterans who are expert at giving broadcasters what they need and want. They believe in money-making programming. They produce a ready-mixed service, prepared to your taste. Music Makers, Inc. is the creative arm to Mark Century. This company has won more awards in the communications field than any other of its kind. It created many new ideas for Radio à la Carte.

Milton M. Herson
President

Why is Radio à la Carte different?
It was meant to be completely different from anything ever offered. Mark Century spent a long time surveying radio needs. They produced something entirely new. The ideas are original. The music is specially written and arranged. Production is the greatest. The sound is unusual, too. Full stereo throughout. It's the first available in monaural or stereo...the first that can be adapted for multiplex. The rich, full tone is full of surprises for the listener.

What will Radio à la Carte do for you?
Plenty. It's designed for radio's tastemakers; the broadcasters who shape the sound of radio. It will build audience. It will increase listener response. Most important...it will sell your unsold time. Radio has long needed such a service. It helps production while it brings in dollars.

What do they say about Radio à la Carte?
"Long overdue...Radio has needed this." George Mooney, WKGN, Knoxville, Tenn. "It's a gas...and a Money-Maker, too." Jack Stapp, WKDA, Nashville, Tenn.
"Something refreshingly different...smart programming...sets a Station apart." Irv Lichtenstein, WWDC, Washington, D.C.

Marvin A. Kempner

Mark Century Corporation, 6 West 57th Street, New York 19, N.Y. Circle 5-3741
Schaefer adds eighth station to 'Award Theatre' lineup

On Friday (Feb. 22) the Schaefer Award Theatre entered Cleveland with a showing of "Born Yesterday" on KYW-TV. This represented one more jump in a steady television success story which began back in 1959. Conceived in that year as a one-market experiment on WCBS-TV New York, Award Theatre has since spread to eight stations throughout Schaefer's eastern market area.

A Measure of Success • To quench the public thirst in 1962, F & M Schaefer Brewing Co., Brooklyn, N. Y., filled 361,000 more beer barrels than the previous year, a sales volume increase of 11.4%. A good portion of this success must be attributed to Schaefer's use of television and more specifically to the Award Theatre.

A recent trade survey put Schaefer's television budget at close to $1.5 million for the first nine months of 1962. Projected to the full year the figure approximates $2 million. And Award Theatre, which now gets about 20% of the Schaefer TV budget, or in the neighborhood of $400,000, is due for a larger share.

The philosophy behind the program is creation of an "institution" to sell an institution's product and to turn Award Theatre into an institution of public stature.

Schaefer, with its agency BBDO, adopted this plan: Pick high quality first-run feature films from the station's library, place them, uncut in the late show time slot (11:16 p.m.), interrupt them with a minimum number of commercial breaks (four) and give them heavy advance promotion. Since inception, Schaefer has followed this pattern and indications are it's content to stick with a good thing.

Irregular scheduling of Award Theatre, generally about six weeks apart, requires heavy advance public notice for each film. To accomplish

A visually and musically strong commercial, but with no "voice message," goes on the air at the end of this month for Schaefer beer. The unusual commercial was prepared in 20-second and one-minute lengths. Only words heard are in the Schaefer jingle sung near the commercial's end. Visually the commercial centers on a "cast" that consists only of a Schaefer bottle, a bottle opener and a glass. The "action" is provided by the camera that explores from various angles the pouring of a glass of beer. The commercial will be seen in some 15 key markets. Photographer Ben Somoroff served as consultant; BBDO is the agency.

Business briefly...

Pepsi-Cola Co. introduced a new low calorie cola drink—Patio Diet Cola—in Greenville, S. C. last week and advertised the product on radio and in newspapers in that city. Additional market testing will begin in the Philadelphia area in early March and in other cities at a later date. Pepsi-Cola's agency, BBDO, will supply local bottlers with commercials, and the bottlers will make the time purchases.

Transit Casualty Co., St. Louis, in its first use of radio, will begin a spot radio campaign in communities adjoining Chicago, St. Louis and Kansas City, Mo., this spring to spotlight their services in the insurance field available through local agents. The number of markets is not yet determined. The campaign will be placed direct.

Shultz Inc., New York, for its Technique Div. has bought a campaign of prime time minutes on CBS-TV and NBC-TV from March through July. Shows are Dobie Gillis and Fair Exchange on CBS-TV and Jack Paar Show, Joey Bishop Show and Andy Williams Show on NBC-TV. Agency: Papert, Koenig, Lois, New York.

Scott Paper Co., Philadelphia, through J. Walter Thompson, New York has purchased a participatory schedule in NBC-TV's Monday-Friday The Match Game (4:43 p.m.), making the show sold out. Other advertisers are Procter & Gamble, Sterling Drug, P. Lorillard Co., H. J. Heinz, Grove Labs, Ralston Purina, Thomas Leeming & Co., Armstrong Cork Co., and Campbell Soup.

Bakers Franchise Corp., New York, has begun a new flight of spot radio
this in the New York area Schaefer uses about 80 radio spots spread over six stations, newspaper ads and tunes in notices on the station carrying the show (WCBS-TV) beginning two weeks before actual presentation.

Tom Villante, account supervisor for Schaefer at BBDO, explains that *Award Theatre* features are broken by only four two-minute commercials whereas a normal late show feature might be interrupted with as many as 20 individual announcements. The premise is that the public is more receptive to a few relatively long commercials than a lot of short ones. “We don’t beat them over the head,” says Mr. Villante.

Soft Line • In line with its “public esteem” campaign Schaefer uses commercials with a soft approach. On *Award Theatre* it currently employs one which tells the story of the Schaefer Co. and parallels this with the development of baseball.

*Award Theatre* pictures have included “For Whom the Bell Tolls,” “The Caine Mutiny,” “Mr. Roberts,” “Twelve Angry Men” and “Young Man with a Horn.” When moving into a new market, the advertiser asks the station for complete list of its first run features from which it picks the “top” films for *Award Theatre*.

Following its success in New York, Schaefer moved in 1960 to WCAU-TV Philadelphia and WBBZ-TV Boston and later to WNDE-TV Scranton; WHEN-TV Syracuse; WINR-TV Binghamton and WPTZ (TV) Plattsburgh, N.Y.

With favorable past results as a guide, Mike Carty, media planning manager at Schaefer, hints at still further expansion of the program following its Cleveland debut.

& Bowles, New York, to handle advertising for Burma Shave, which the tobacco company acquired last week. The account formerly was handled by R. Jack Scott, Chicago.

NEW CONSUMER STUDY

Negro-directed spots show brand preference increases

Advertisers wanting to know how well they are reaching the Negro market have a new Negro consumer report from Rollins Broadcasting Co. to give them the answer.

Rollins, which includes five Negro-oriented radio stations among its holdings, surveyed the brand preferences of 7,691 Negro consumers in New York-Newark, Los Angeles, Chicago, Indianapolis and Norfolk, Va. The report in the first three consumer categories and lists a total of 4,009 brands used by Negroes. (1,846 brands were listed on the survey, with an additional 2,163 write-ins from 53% of the respondents.)

The study was made by the research department of Continental Broadcasting, the Rollins division representing the five Negro-programmed stations.

A comparison of the survey with a similar one conducted by Rollins in 1958 shows that advertisers who have directed their sales messages to the Negro market have shown sharp brand preference increases. Among them:

Blue Bonnet margarine, 66.6% of users in Norfolk in 1956 vs. 21.8% in 1958; Tide, 58.9% in Norfolk vs. 24.5% in 1958; Pepsi-Cola, 25.3% in New York vs. 17.5% in 1958; RiceLand Rice, 43.5% in Chicago as 7.4% in 1958. A more detailed comparison of the two studies is available to advertisers and agencies upon request.

Rollins stations are: WJNJ Newark; KDAY Los Angeles; WBEE Chicago, and WRAP Norfolk (all programmed to the Negro audience): WGEE Indianapolis (which directs a portion of its programming to the Negro); WCHS-AM-TV Charleston, W. Va.; WAMS Washington, Del.; WEAR-TV Mobile, Ala.; Pensacola, Fla., and WPTZ-TV Plattsburgh, N. Y.

**Tv gains outdistance other media in survey**

**Tv led all advertising media in gains made last year over 1961**, according to McCann-Erickson Inc.’s media research department. The M-E estimates compiled each year for *Printer’s Ink* were reported in the Feb. 15 issue.

The advertising expenditures study placed the total at $12.258 billion, a gain of 3.5%, for all media (newspapers, magazines, tv, radio, farm publications, direct mail, outdoor, and miscellaneous) and includes national and local business.

Television’s total gain was reported at 10%; network up 7%, spot 14%, and local 11%. The dollar figures respectively: $1.74 billion, $836.7 million, $608.1 million, and $300 million.

Radio’s total was estimated at $709 million, an increase of 3.8%; network at $41.4 million, a 4% decline; spot at $228.5 million, a 5% climb, and local at $439.4 million, a 4% gain.

According to these estimates, magazines were next to tv in total gains (5.4%), followed by farm and newspapers, and then radio.

**Commercials in production**

 Listings include new commercials being made for national or large-region al radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager, and approximate cost of commercial when available.

Filways of California, MGM Studios, Culver City, Calif.

Network o&o's get license renewals

FCC NO LONGER CONSIDERS PAYOLA DETERMINING FACTOR

The FCC last week renewed the licenses of 23 network-owned-and-operated stations and, in the process, washed out charges of payola that had been hanging over them since 1960. The licenses of all o&o stations had been held up since that year, in part because of charges made before the House Legislative Oversight Subcommittee during its payola investigation. The commission's action last week was the result of an investigation which indicated that the charges no longer provided sufficient basis for deferring renewal.

Sixteen of the stations renewed are owned by CBS, four by NBC and three by ABC. But the renewals of 27 other o&o stations—13 owned by ABC, 12 by NBC and two by CBS—are still being held up for a variety of other reasons. The renewal action was taken by the Broadcast Bureau, on authority delegated by the commission. But it was understood the bureau had submitted its investigative reports to the commission members and informed them in advance of the action it planned to take.

Networks' Record Companies. Kenneth A. Cox, chief of the bureau, said renewal of the network stations had been held up because each of the chains have record company affiliates that had been accused of making payola payments prior to 1960, when Congress enacted legislation banning such payments. CBS's record company affiliate is Columbia Records, NBC's is RCA Victor and ABC's is ABC-Paramount. Since then, he said, staff investigators have found nothing further to link the record affiliates with payola and have not received any additional complaints against them. As a result, he said, it was decided there was no point in holding up renewals on the basis of ancient history.

Another commission official said that it could also be inferred from the bureau's action that the commission members found the questions concerning pre-1960 payola charges involving the networks had been "satisfactorily resolved." Mr. Cox said he believes the commission will act on renewal of the remaining o&o stations "in the next 60 days." The CBS stations renewed are KMOX St. Louis, KNX-AM-FM Los Angeles, WEEI-AM-FM Boston, WCBS-AM-FM-TV New York, WCAU-AM-FM-TV Philadelphia, WBBM-AM-FM-TV Chicago, KCBS-AM-FM San Francisco. The NBC stations renewed are WNBC-AM-FM New York, WJAS-AM-FM Pittsburgh; and the ABC stations, WBKB (TV) and WENR-FM Chicago and KQV Pittsburgh.

Conditions Attached. As it has in the past, the commission attached conditions to the renewals. It said the renewals were "without prejudice" to action the commission might take as a result of the conclusions and recommendations in the report of the Network Study Staff and any related studies being conducted by the commission.

In addition, the CBS and NBC renewals were conditioned on the outcome of pending antitrust matters involving the networks. The Justice Dept. has filed an antitrust suit against CBS-TV as a result of its affiliate compensation plan. NBC is required by a Justice Dept. consent decree to divest itself of its Philadelphia stations. CBS' affiliate compensation plan was the basis of yet another condition attached to the renewal of its stations. The commission said its renewal of the stations was "without prejudice" to any action it might take as a result of the plan. The commission has directed CBS to abandon it, on the ground it discourages affiliates from taking programming from other sources. CBS has appealed this order to the courts, but it has not put the plan into effect.

Ignorance, no excuse; KVOB, KVOC fined

KVOM Bastrop, La., and KVOC Casper, Wyo., were cited for $1,000 and $1,500 respectively, by the FCC last week for violations of the Communications Act and commission rules. KVOB was notified of its $1,000 fine for making "teaser" announcements without identifying either the sponsor or the product. The commission said that the following announcement was made for Newcomer Motor Co., that city: "Legal stealing days are coming at Bastrop, Shhh-hh, be ready for legal stealing days." The one sentence announcements were made "20 times a day for eight days by... KVOC before the product or sponsor was identified," the commission said.

During an FCC inquiry KVOC said that the violations were unintentional and occurred because of ignorance of rules. "The commission does not consider ignorance of the law as a valid excuse..." the agency told the station. KVOC was charged with making equipment and program tests without telling the commission or gaining its approval, and for operating station at 1 kw which is over the 5 kw margin allowed by commission rules. Duane Simons, one of KVOC's owners, admitted to the FCC that the charges were true. Mr. Simons told the commission that KVOC began daytime operation at 1 kw on August 11, 1961, and continued to do so until March 12, 1962.

Court sticks with FCC on engineering

When it comes to engineering, it's the FCC all the way—or almost all the way.

This is the import of a U. S. Court of Appeals ruling last week upholding the FCC's decision in the WLOU Louisville, Ky., case. Daytimer WLOU, on 1350 kc with 5 kw, has asked the FCC to permit nighttime operation with the same facilities and a directional antenna. The FCC denied this request last June, claiming the nighttime service rendered by WEZY Coca, Fla. (also on 1350 kc with 500 w daytime and 1 kw nighttime) would be affected. In its appeal WLOU claimed that the FCC's method of calculating the interference to WEZY listeners was erroneous (Broadcasting, Feb. 11).

In the unanimous three-judge decision issued last Thursday, Circuit Judge Wilbur K. Miller said that "Deciding where the public interest lies in such a situation is a primary duty of the commission..." He also quoted from a 1959 appeals court decision which stated that "...In this highly technical field the commission's construction and application of its own rules and standards of engineering practice should be entitled to great weight..."

Judge Miller was joined in his decision last week by Circuit Judges George T. Washington and John A. Danaher.

KTVH IS KANSAS TELEVISION WITH TALL TOWER POWER!

KTVH coverage is now more than doubled in area with its new 1,503-foot transmitting tower.

KTVH now reaches 1,182,600 people—over 43% more than its next ranking competitor.

MORE TV HOMES BY 37%

The 327,070 TV homes reached by KTVH exceed the number reached by any other Central Kansas TV station by 37%.

KTVH New Tall Tower Power provides available viewing pleasure for the MAJORITY OF KANSANS. TO SELL KANSAS...BUY KTVH!
DELETION OF HISS MENTIONS NOT NEWS DISTORTION

The FCC, which two months ago defended ABC's right to use convicted perjurer Alger Hiss on a network program, has now defended the right of stations which refused to carry the show.

The commission in December notified some 2,000 complaining viewers that ABC was "well within its discretion" in permitting Mr. Hiss to appear on "The Political Obituary of Richard Nixon," narrated by Howard K. Smith, on Nov. 12 (BROADCASTING, Dec. 17, 1962).

Last week, the commission said it had informed 35 complainants that, in its view, Triangle Publications Inc. was within its discretion in directing two of its stations, WFIL-TV Philadelphia and WNHC-TV New Haven, not to broadcast the program.

The commission also said it doesn't believe the deletion by the stations of subsequent news program references to the Smith program was a deliberate attempt to distort the news, as claimed by some Triangle critics.

In its letter, the commission quoted Triangle as stating it had ordered the pre-emption of the Smith program because: "It was our opinion that the use on television of a man convicted of perjury in a trial involving treason against the United States was in bad taste ... especially when that man was to comment on the career of a distinguished American who had served this country in high office. We believe we have acted in accordance with our obligations under the regulations of the commission and the code of the National Assn. of Broadcasters."

Triangle Within Rights - The commission said "it is clear" that Triangle's action "involved a decision well within its discretion. Nor has any information been brought to the commission which indicates anything other than an attempt by the licensee to exercise its programming judgment in a manner deemed by it to be in the public interest."

Regarding the alleged news blackout, the commission said Triangle held that it didn't want its stations to show indirectly what they had been ordered not to show directly. Accordingly, Triangle ordered them not to carry any film clips or tapes of the Smith program on local or network news programs.

However, the commission said, because of a misunderstanding on the part of an employee, network newscasts merely referring to the Smith program were deleted on Nov. 12 and 13. But on Nov. 16, the commission added, the stations carried a complete news wrap-up on the show, including a portion of the Nov. 12 newscast that had been omitted.

It doesn't appear, the commission said, that "the deletion by the licensee of certain references ... was a deliberate attempt to distort the news and, accordingly, no further action by the commission in this matter is warranted."

Court refuses to reopen WSPA-TV antenna case

A federal court in Washington has dismissed a petition to reopen the WSPA-TV Spartanburg, S. C., case.

The court, in an unsigned decision, said that Wilton E. Hall (WAIM-TV Anderson, S. C.), could make his charges of off-the-record contacts by principals of WSPA-TV in additional proceedings now before the FCC. WSPA-TV has an application pending to move its antenna site to Caesar's Head, WAIM-TV has filed a protest against this move.

In its petition filed last December, WAIM-TV alleged that the FCC refused to permit it to introduce evidence on the ex parte charges (BROADCASTING, Dec. 24, 1962).

Just a month before this, the FCC issued its final decision in the eight-year-old antenna change case. The commission exonerated Walter J. Brown, principal owner of WSPA-TV, of charges he misrepresented the facts in the proceedings, but revoked permission for WSPA-TV to put its antenna on Paris Mt. (BROADCASTING, Dec. 3, 1962).

FCC report challenged in ch. 9 court case

An opposition to the FCC's report on the Orlando, Fla., ch. 9 case, which involved allegations of off-the-record dealings with former FCC Commissioner Richard A. Mack, was filed last week by WORZ Inc. (the unsuccessful applicant for the tv channel) with the U.S. Court of Appeals in Washington.

WORZ challenged the FCC report which found Mid-Florida Television Corp. (WFTV [TV] Orlando) not guilty of engaging in ex parte contacts with the former Florida commissioner (BROADCASTING, Jan. 14). The commission also said that it would reconsider the 1957 grant to Mid-Florida because Mr. Mack should have disqualified himself. Chairman Newton N. Minow dissented from the commission's majority report, and Commissioners T. A. M. Craven and E. William Henry did not participate.

In last week's objection, WORZ claimed that the FCC cannot reverse the findings of its chief hearing examiner, James D. Cunningham, particularly as they relate to the creditability of witnesses. Mr. Cunningham held that WFTV principals knew of the approaches to Mr. Mack and should, therefore, be disqualified.

The Orlando ch. 9 case was sent back to the FCC by the appeals court after charges of improper pressures on commission members made several years ago to the House Legislative Oversight Subcommittee. It had been returned to the appeals court by the U.S. Supreme Court on the same basis.

WORZ Inc. principals own WKIS-AM-FM in Orlando (formerly WORZ). WFTV was formerly WLOF-TV.

Equal time hearings to start March 4

Rep. Walter E. Rogers (D-Tex.) was appointed chairman of the House Communications and Power Subcommittee last week and immediately announced hearings would begin March 4 on legislation to partially suspend equal time provisions of the Communications Act in the 1964 elections.

The new chairman gave up a seat on the old Regulatory Agencies Subcommittee to serve in his new post. That group has been reconstituted as the Special Investigations Subcommittee, and will be steered by Rep. Oren Harris (D-Ark.), chairman of the parent House Commerce Committee.

Rep. Rogers succeeds former Rep. Morgan M. Moulard (D-Mo.), now retired. He is serving his 13th year in the House and represents Texas' 18th Congressional District, which includes Amarillo.

Rep. Hull is new to the Commerce Committee, but is serving his seventh year in Congress. Reps. Cunningham and Broyhill also are new to the committee, but the former is a veteran congressman; Rep. Broyhill is a freshman.

The President's Bill - Author of the proposal to suspend equal time provisions during the 1964 presidential and vice presidential campaigns is Rep. Harris, who revealed last week the President asked him to offer the bill (see page 28). It would provide the same ground rules for equal time in 1964 which prevailed during a similar suspension in 1960 (BROADCASTING, Feb. 18).
THE PRICE IS RIGHT and TO TELL THE TRUTH
Music by ROBERT COBERT

and there are 103 other regular network programs which use **BMI** music.

ROBERT COBERT is one of the most widely performed young composers in TV. He is the composer of "Festival of Performing Arts"; a regular contributor to the DuPont Show, Armstrong Circle Theatre and Family Classics and also conducts the themes and scores he composes. He has worked in films and the theatre and has been active in TV for the past five years. Upcoming TV dramas with music by Cobert are "Hedda Gabler," with Ingrid Bergman, and "House of Hope," the daily half hour Omnibus series.

BROADCASTING, February 25, 1963
Tv support for FCC's proposed catv rule

COMMENTS SAY IT HAS LEGAL RIGHT TO REGULATE

Strong support for the FCC's proposed rulemaking to restrict the use of business radio services (microwave) by catv systems (Broadcasting, Dec. 17, 1962) was expressed in comments filed with the commission last week. Outstanding among more than 20 comments were the views of NAB, ABC, NBC, and the Assn. for Competitive TV supporting the commission's legal right to regulate catv. The National Community TV Assn. had recently told the FCC that the agency had no authority or legal right to make catv regulations (At Deadline, Feb. 11). There were only two dissenting comments last week.

The NAB not only backed the commission's power to regulate catv but suggested that the agency consider a further rule which would require catv operators to gain the written permission of tv stations before they could rebroadcast tv station signals. NAB also upheld the FCC's proposal that catv be barred from duplicating the programs of a local tv station and that catv operators be required to carry the local tv signal on its system if it is requested to do so by the local service.

"We recognize that the issue of censorship will be introduced in connection with this proposal. In accordance with our traditional position, we are opposed to censorship in any form. We do not, however, believe that this proposal involves such questions," NAB said.

ABC and NBC concurred with the NAB argument against duplication of programming without permission. ABC said that the Carter Mountain case is enough to give the FCC grounds denying duplication and demanding that local tv outlets be placed on catv systems.

The Carter Mountain decision made by FCC (Broadcasting, Dec. 18, 1961) was first time commission denied a microwave grant to a catv on grounds that it would be harmful to local tv stations.

Courts or FCC? A NAB told the commission that it should not shy away from following through on its proposed rule on the grounds that the question of broadcasters' rights to their signals is for the courts to decide. "There is a substantial difference between the existence of a right concerning which an administrative agency may take cognizance in the exercise of its licensing powers, and the liability that might be incurred through the appropriation of that right, illegally or otherwise," the NAB advised.

"That the broadcaster has an inherent right in the signal he puts on the air is, we believe, beyond question. It is his signal," the NAB concluded.

NAB told the commission that at times catv systems bring tv to areas which would otherwise not have any service, but, on the other hand catv can be adverse to local tv service. The network said that conflicts of interest arise between catv and regular tv because of the unauthorized nature of the former. The FCC should regulate catv in the same manner that it regulates tv translator service, NBC said.

ABC said that the attachments put on a catv subscriber's tv set interfere with direct reception of local stations. ABC also said that local tv stations are particularly dependent on network programming because of a lack of local talent for local shows. If catv systems block out network programs, the local station's advertising revenues are going to be adversely affected.

ABC also charged catv with interfering with "the implementation of the commission's television station assignment and program policies—of providing off-the-air local tv service to rural as well as urban viewers."

The Assn. for Competitive TV said that the proposed rule's condition for the operation of a catv system should be broadened to the exclusion of the grade B contour as well as the grade A contour. ACT said that grade B viewers are as economically important to a tv station as are those viewers in the grade A contour. Operation of a catv "subtracts from the public purpose which the licensee seeks to serve" ACT said. The association also told the FCC that to make it necessary for a tv station to give a catv operator notice 30 days in advance of the airing of a program would be a burden to stations. ABC argued the same and questioned what was to be done in the case of special programs and news events.

Catv View • Entron Inc., a manufacturer of catv equipment and owner of microwave systems for catv use, told the commission that the proposed rule would impede development of catv in communities where it is needed and where it does not interfere with regular tv service. Entron backed NCTA's opinion that the FCC lacks the authority to regulate catv.

Entron told the commission that the agency could assign and grant tv stations, but it could not protect them from competition. Such regulation is not stated in the Communications Act, the company said. This is also true of transmission by tv competitors on cable and by off-the-air pick-up, according to Entron.

Catv operator Midwest Video Corp., whose catv system in Clavis, N. M., has been termed detrimental to the continued operation of KICA-TV in that city (Broadcasting, Feb. 18), said the proposed regulation is unlawful and would interfere with the contractual relation of community antenna tv operators to their customers.

Capitol Hill concerned over new line rates

The new FCC-approved rates for users of private, leased telegraphic services of AT&T and Western Union, raising the cost of the line services by about 20%, caused some concern on Capitol Hill last week.

Sen. A. S. Mike Monroney (D-Okl.), in a Senate Communications Subcommittee hearing at which FCC Acting Chairman Rosel H. Hyde and Commissioner T. A. M. Craven were present, expressed concern that the rate hike would seriously injure small newspapers, radio and tv stations.

The 20% raise will be passed across the board as about a 7-8% increase for subscribers to the AP and UPI news services, according to an FCC source. The same source said that the commission has no control over the charges which the news services levy on their subscribers. However, he said that he did not feel small broadcast stations would be seriously affected unless they are already in financial difficulties.

The American Newspaper Publishers Assn. and UPI have announced that they will request the FCC to reconsider the line rate increase and AP will file data as part of ANPA petition.
To: Jack Schatz

What happened? You told me WYN-R would be in first place all day long in the newest December Chicago City Pulse.

We are only second overall. The top station has 18 percent share, WYN-R has 17 and the third station 14. It's true that we are only one point out of first and that we are first in the afternoons, but that's not an overall first. What do we tell H-R?

GPM
SILENT VOICES EXPLAINED

Details of Telstar, Relay, Syncom failures presented to Senate Communications Subcommittee

Radiation and an overheated transistor were blamed in a Senate hearing last week as the main reasons Telstar and Relay—both experimental communications satellites—lost their voices in space. Syncom, a high altitude experimental satellite, was believed last week to have been destroyed by a rocket motor explosion.

During a wide-ranging hearing Feb. 18-19 concerned with why these experiments have had troubles, the Senate Communications Subcommittee questioned the FCC, the National Aeronautics & Space Administration and two giant electronics firms about space, undersea telephone cables, phone rates and when international television may become operational.

Chairman John O. Pastore (D-R.I.) said he was concerned that public funds are being spent on research and development programs from which private industry alone, particularly the Communications Satellite Corp., would reap profits. The FCC was asked to return Wednesday (Feb. 27) to present progress reports on the effects of all-channel set legislation and educational television.

Last week’s hearings produced these answers:

1. Telstar, built by Bell Telephone Laboratories (AT&T) and launched into a low-level orbit by NASA July 10, 1962, lost its voice because radiation inside the satellite was “as much as 100 times greater than anticipated.”

2. Relay, built by Radio Corp. of America and launched into a medium-level orbit by the space agency Dec. 13, 1962, lost its power almost immediately due to an over-heated voltage regulator switch transistor.

(Both Telstar and Relay became operable Jan. 3 [BROADCASTING, Jan. 7].)

3. Syncom, a synchronous satellite built for NASA by Hughes Aircraft Co., was placed in a high-level orbit Feb. 14 but was lost to all monitoring installations about five hours after launch (BROADCASTING, Feb. 18). It is thought a stabilizing rocket built into the satellite exploded.

4. The chief executive of AT&T said international television could be transmitted by undersea cable by about 1966.

5. The FCC was asked to justify new long distance telephone and news wire leasing rates.

Space Detectives • Government and industry scientists detailed for the committee how they determined the satellites’ faults. Scientists examined telemetry and manipulations of their satellites’ command systems, previously unheard of in laboratory tests, witnesses said.

Eugene F. O’Neill, director of AT&T’s Satellite Communications Laboratory, said efforts would be made to develop materials better resistant to the effects of radiation. He pointed out that while radiation has decreased the efficiency of Telstar’s solar cells, they will be adequate to power “experimental operations for at least two years”

Lt. Col. Robert E. Warren, Deputy Director of NASA communications systems, explained he would recommend design changes in Relay’s voltage regulation system which would separate switching and regulating functions. Relay’s radiation monitoring equipment has worked well, the colonel reported.

Col. Warren said that NASA ground stations would continue to search for Syncom, which ceased transmission 1.1 seconds before its stabilizing rocket motor was scheduled to cut off. Dr. Hugh L. Dryden, deputy administrator of NASA, explaining that he was not “bound to facts” as Col. Warren was, said that space agency scientists speculated the motor exploded.

Tv Undersea • James Dingman, executive vice president of AT&T, responding to a question from Sen. Norris Cotton (R-N.H.), said a new transistor version of an undersea cable would carry 720 voice circuits or one broadband tv channel when available in 1966. Sen. Cotton said he was interested in the cable as an alternative for the transmission of international tv if a space system should fail.

Sen. Ralph W. Yarborough (D-Tex.) questioned Acting FCC Chairman Rosel H. Hyde whether the agency was acting in the public interest in approving new long distance telephone rate hikes of five and ten cents on calls placed under distances of 800 miles. Commissioner Hyde said the increases were small and were made at the request of telephone companies when the FCC asked the firms to reduce station-to-station rates to $1 after 9 p.m. The new rates are to go into effect April 1.

Sen. A. S. Mike Monroney (D-Okl.) challenged new rates approved by the FCC for private or leased teleprinter circuits and said they would probably put small newspapers out of business and hurt small radio and television stations, too (see page 44).

Examiner satisfied—seven years after filing

Seven years after he filed for renewal of his am and fm licenses, a Texas broadcaster had the satisfaction last week of knowing that an FCC hearing examiner believes the renewals should be granted.

Howard W. Davis filed for renewal of KMAC and KISS (FM), both San Antonio, in 1956. Three years later, the commission designated the applications for hearing to determine, among other things, whether Mr. Davis was financially qualified and if he had the character qualifications to be a licensee.

In his initial decision, Hearing Examiner Walther W. Guenther held Mr. Davis has the “requisite character qualifications and financially qualified to operate his stations.

Mr. Davis’s difficulties with the commission date back to a 1954 comparative hearing in which he sought a television grant in San Antonio. In rejecting his tv bid, the commission held that Mr. Davis failed to establish his financial qualifications and said he had misrepresented his financial position during the hearing. These assertions became the basis of the issues on which the renewal hearing was ordered.

Faulty Memory • In his initial decision, Mr. Guenther concluded that any misrepresentations made by Mr. Davis in the 1954 hearing were the result of his willingness to testify about complicated accounting matters from memory, rather than relying on documents. The examiner concluded that Mr. Davis,
Is U.S. spending too much on communications satellites?

The senator who was floor manager in the fight for legislation which produced the Communications Satellite Corp. is worried that too much public money may be going into research and development of the privately-owned firm.

Sen. John O. Pastore (D-R.I.), chairman of the Senate Communications Subcommittee, said Congress ought to take a “very hard look” at plans for more federal spending on space communications experiments which are providing vital data for the private space corporation.

The senator has proposed a government-industry conference to establish clear lines along which both may help develop a world-wide communications system, which would include international television. But Sen. Pastore emphasized he thinks private industry ought to be financing a greater share of the research and development.

“This is not a dispute,” the senator said in an interview Thursday (Feb. 21). It is an area that needs more attention, he said, and very likely it will come up again when the 12 men nominated by President Kennedy to be incorporators of the satellite firm are brought before the full Commerce Committee for confirmation hearings March 11 (BROADCASTING, Feb. 18).

Mr. Dryden  Sen. Pastore  Sen. Monroney  Sen. Yarborough  The witness and the senators

The U. S. is interested in byproducts of these experiments for other space aims, explained Dr. Hugh L. Dryden, deputy administrator of the National Aeronautics & Space Administration.

“The government is probably going to have to spend money for many, many years” in space communications, Dr. Dryden said. He pointed out that the government’s involvement in this development might be compared to its broad assistance in developing safety measures in aviation, also in the public interest.

But Dr. Dryden told the subcommittee that NASA would be very interested in whatever guidelines the senators might establish.

Sen. Pastore’s suggestion for a conference, which would bring together NASA, the FCC, the satellite corporation and possibly the budget bureau, was heard by the space firm’s new chairman, Sam Harris, who was present for the hearings.

Subcommittee Support  Other subcommittee members expressed their concern about the government’s involvement in developing a private communications system.

Sen. A. S. Mike Monroney (D-Okla.) said he had supported the space legislation during its bitter course through a Senate battle last year because he thought U. S. private enterprise would take the initiative in development of a world-wide system. He said other senators who lent their support to the legislation were under a similar impression, and he hoped industry would take a greater responsibility in the system development.

Sen. Ralph W. Yarborough (D-Tex.), one of a hard-core of senators who fought the legislation, said he “wasn’t fooled for a minute” last year and that he knew the private corporation proposal (rather than a government-owned firm) was “a giveaway.”

whom he described as “a harried witness” in 1954, didn’t intend to mislead the commission.

The examiner, who was favorably impressed by Mr. Davis’s broadcast record, said that the Texan’s record and the evidence regarding his candor as a licensee “sufficiently mitigate against any transgressions” he may have committed during the 1954 hearing.

“Since this occurred eight years ago,” the examiner continued, “... it would indeed be harsh ... even if all doubts were not resolved against Davis, to deprive him of his licenses where he had been a licensee for so many years and his record ... has been commendable for over a decade.”

In resolving the financial issue in Mr. Davis’s favor, the examiner held that the applicant’s problems were completely different in 1954 from those he currently faces. In 1954, the examiner said, Mr. Davis needed additional funds to build a new television station. At the present time, the only question is whether Mr. Davis has the funds to continue operating KMIC and KISS (FM)—and, the examiner said, the record indicates that he does.

BROADCASTING, February 25, 1963
District court to rule on Bayer commercial
FTC SEEKS INJUNCTION TO STOP 'MISREPRESENTATION'

A decision is expected this week by the U. S. District Court for the Southern District of New York on a motion by the Federal Trade Commission for a preliminary injunction against Sterling Drug Co.'s Bayer Aspirin tv commercials and print advertisements which refer to a research study commissioned and supported by the FTC.

Argument was heard last week before U. S. District Judge Archie O. Dawson, who reserved decision. The FTC earlier had sought and been denied a temporary restraining order on Feb. 7.

Named as defendants in the current proceeding along with Sterling, were Thompson-Koch Co., a subsidiary of Sterling that handles placement of newspaper ads for the parent company, and Dancer-Fitzgerald-Sample agency.

The FTC complaints stem from the use by Sterling of findings of a research study, which compared the effects of five analgesic compounds. With FTC permission, results of the study were published in the Dec. 29, 1962 issue of the Journal of the American Medical Assn.

The FTC position, presented by attorney Harold D. Rhynedance, was based on claims made by Sterling in a page advertisement which appeared in Life magazine (Jan. 25) and which referred to the AMA journal's article.

Net Impression • Copies of the ad subsequently appeared as part of a Bayer tv commercial according to Mr. Rhynedance. The ad, he testified, gave a "net impression" that the government and the AMA "endorsed the findings" of the study. He claimed further that the ad misrepresented the findings of the study. Specifically he took exception to the statement that Bayer was "as gentle to the stomach as a plain sugar pill." The FTC attorney further claimed that failure to mention Bufferin in one of the ad's comparative claims was a distortion by omission and that speed and strength claims put stress on a test score which had been explained in the study as not statistically significant.

A brief submitted to the court by defendant Sterling Drug, pointed to the fact that prior to publication of the report in the AMA journal, the "AMA itself, had distributed to several thousand newspapers and other communications media a press release which summarized the report."

Answering specific FTC charges, counsel for Sterling stated that in the face of years of "speed and strength" claims by Bayer's competitors it is interesting that the study's figures in this category favor Bayer, even if they have no statistical significance.

FCC proposal to give Pennsylvania 5 tvs

The FCC last week announced a proposed rulemaking that would assign one uhf and four vhf channels for non-commercial educational use in Pennsylvania, and took several other actions regarding channel assignments.

Comments are invited by April 1 on a petition by the Pennsylvania Educational Network Study which would reserve ch. 39, presently commercial, in Allentown, assign ch. 36 to Altoona, ch. 3 to Clearfield, ch. 65 to Harrisburg, and ch. 68 to Scranton. Ch. 71 would be substituted for ch. 65 which is presently assigned in Shamokin. Because these channel assignments are less than 250 miles from the United States-Canadian border, no final decision can be made until concurrence from Canadian authorities is obtained, the commission said.

The commission denied petition by Upper Valley Broadcasters to reconsider the deletion of ch. 26 from Hanover, N. H., and its reassignment to Windsor, Vt. Reassignment is important to development of a Vermont tv network, the commission said.

In a separate action, the commission proposed addition of uhf channel in Hanover area by (1) making educational ch. 20 in that city commercial, (2) assigning ch. 39 in Lebanon (about 7 miles from Hanover) by deleting it from Glen Falls N. Y., and ch. 24 from Littleton, or (3) by assigning ch. 74 to Hanover. Concurrence from Canadian authorities is needed.

Comments are due April 1 on proposal to add ch. 18 to Gaithersburg, Md. as requested by Dixon Industries Inc., an electronics manufacturing company. Dixon will apply for a new station on the channel.

The commission denied opposing petitions by State of Kansas on Education to a petition by KTUL-TV (ch. 8) Tulsa, Okla., for reconsideration of assignment of ch. 8 as an educational channel in Hutchinson, Kan. The commission also set March 22 for filing oppositions to KTUL-TV counter-proposal which suggests channel shifts or short-spacing for ch. 8 in Hutchinson as a means of removing objections to KTUL-TV's application to change its transmitter site.

AMST bases opposition on FCC's lack of data

The Assn. of Maximum Service Telecasters Inc. has filed a "partial opposition" to a midwest group's request for an FCC rulemaking involving the use of uhf channels in an airborne educational television project (Broadcasting, Jan. 21). AMST said the commission should have additional engineering data before acting on the request.

The rulemaking requested by Midwest Program on Airborne Television Instruction would regularize the use of uhf channels for airborne etv in six midwest states, modify commission rules governing airborne etv, and allocate six uhf channels for MPATI. The group is now operating an experimental etv project on two channels.

AMST takes no position on the question of airborne etv. But it said it opposes institution of rulemaking proceedings at this time because of "a lack of adequate technical data."

AMST said the MPATI proposal involves the question of mileage separations required between ground-based and airborne stations, as well as between two airborne stations, and the overall question of channel allocation for ground and airborne use.

FCC dismisses Beachview plea

The FCC last week granted a petition by Tidewater Teleradio Inc., licensee of WAVY-TV (ch. 10) Portsmouth, Va., and dismissed a Beachview Broadcasting Corp. request that the commission either revoke WAVY-TV's license or reopen comparative hearing between Beachview and Tidewater for the channel (Broadcasting, Jan. 7).

Beachview's petition, its latest move in a 10-year battle with Tidewater, questioned WAVY-TV's promise vs. performance record. Commissioner Robert E. Lee didn't participate in the decision to dismiss Beachview's petition. Commissioner William Henry concurred and issued a statement in which Commissioner T. A. M. Craven joined.
RCA CARTRIDGE TAPE SYSTEM

Automatically Triggers Playback Units, Tape Recorders, Turntables, and Other Devices

Here's a unique built-in feature! The Recording Amplifier of the RT-7B Cartridge Tape System generates two kinds of cue signals. One is used to automatically cue up each tape, at the beginning of a program, the same as in ordinary units. The other signal, a special Trip-Cue, can be placed anywhere on the tape. This will cause the playback unit to trip and start other station equipments.

You can preset two, or a dozen or more RCA tape units, to play sequentially. You can play back a series of spots or musical selections, activate tape recorders, turntables, or other devices capable of being remotely started. (In TV use Trip-Cue is ideal for slide commercials. Tape announcements can be cued to advance the slide projector.)

You'll like the RT-7B's automatic, silent operation, its compactness, high styling, perfect reproduction. Cartridge is selected, placed in playback unit, forgotten until "air" time, then instantly played. Cueing and threading are eliminated. Cue fluffs are a thing of the past!

Transistor circuitry, good regulation for precise timing, low power consumption, are among other valuable features.

See your RCA Broadcast Representative for the complete story. Or write RCA Broadcast and Television Equipment, Dept. SD-22, Building 15-5, Camden, N.J.

THE MOST TRUSTED NAME IN ELECTRONICS
JFK lends support to uhf development committee

The government-industry committee to foster development of uhf television proposed by the FCC earlier this month (Broadcasting, Feb. 11) moved a step closer to formation last week, propelled in part by words of encouragement from President Kennedy.

The FCC announced last week that a meeting would be held in Washington March 12 to organize the committee, whose complete name is the Committee for the Full Development of Uhf Broadcasting. As previously indicated, Commissioner Robert E. Lee will chair the first meeting and Commissioner E. William Henry will be vice-chairman.

A long list of organizations with interest in the development of uhf, government and industry alike, have been invited to the meeting, but the FCC emphasized that any and all are welcome.

Shortly after the commission proposed the committee, President Kennedy praised the idea in a letter to FCC Chairman Newton N. Minow. The President noted that government and industry must cooperate in order to implement the all-channel receiver law passed by Congress last year and said the "committee you have established is an excellent forum for industry-government cooperative efforts."

The commission proposed that the first meeting of the committee be devoted to forming sub-committees. Three suggested by the FCC were (1) Subcommittee on Technical Development, (2) Subcommittee on UHF Broadcast Station Operation and (3) Subcommittee on Consumer Information. Proposals for other sub-committees, the commission said, should be submitted by letter to Commissioner Lee at least one week prior to the meeting.

The meeting will be held at 10 a.m. March 12 in the Departmental Auditorium, Constitution Ave. between 12th and 13th Sts., N.W.

Invited to attend were: U.S. Dept. of Commerce; U.S. Dept. of Health, Education, and Welfare; Assn. for Competitive Television; Assn. of Federal Communications Consulting Engineers; Assn. of Maximum Service Telecasters; Chamber of Commerce of U.S.A.; Electronic Industries Assn.; National Alliance of Television-Electronic Service Organizations; National Appliance & Radio-TV Dealers Assn.; National Assn. of Broadcasters; National Assn. of Educational Broadcasters; National Educational Television & Radio Center; National Community Television Assn.; National Retail Merchants Assn.

WFTL charges that WLOD uses false ID

WFTL Ft. Lauderdale, Fla., charged last week that WLOD in nearby Pompano Beach, has identified itself over the last two years with Ft. Lauderdale rather than with its proper assignment in Pompano Beach. WFTL requested that the FCC order WLOD to cease these identifications.

In making its complaint, WFTL said that the following typical identifications were gathered while monitoring WLOD:

• "WLOD Ft. Lauderdale temperature . . . 72°."
• "Hey, it's Sunny Ft. Lauderdale, the city of the Los Angeles Chamber of Commerce never talks about. WLOD time 2:07 p.m."

WFTL said that in August 1961, the commission acting on an informal complaint warned WLOD not to attempt identification with Ft. Lauderdale. However, WFTL charged, WLOD soon resumed its old habit with such announcements as: "980 on your Ft. Lauderdale dial" and "WLOD, Box 108, Ft. Lauderdale."

Very recently the FCC reaffirmed a $2,000 fine for KISN Vancouver, Wash. The station had similarly attempted to identify itself in a city (Portland) other than its assignment while giving weather forecasts (Broadcasting, Jan. 28).

WFTL said "WLOD has established a deliberate and supplementary pattern of hiding its assignment to Pompano Beach and stressing its alleged assignment to Ft. Lauderdale."

WFTL noted that WLOD is not listed in the Pompano Beach telephone directory, but is in Ft. Lauderdale's listing. WLOD has hired attractive young girls to walk about Ft. Lauderdale streets carrying signs reading "WLOD unfair to other Ft. Lauderdale stations."

It was further claimed by WFTL that WLOD maintains its business and executive offices in Ft. Lauderdale.

WLOD's attempts to identify itself with Ft. Lauderdale and its programming towards that city violates the station's original program proposals, WFTL said. According to WFTL, the Pompano Beach station was granted on a proposal to fulfill the local needs of Pompano Beach.

KTLA (TV) sued for libel

KTLA (TV) Los Angeles and Clete Roberts, news reporter on that station have been named as defendants in a $500,000 libel suit filed in Los Angeles Superior Court by Dr. Abraham A. Abarbanel. The chief of police and two members of the police force of Beverly Hills, Calif., are also named in the complaint, which charges false imprisonment, assault and trespass and invasion of privacy.

Dr. Abarbanel alleges that after his arrest last September he was interviewed by Mr. Roberts about "abortion and other criminal acts" and that Mr. Roberts subsequently broadcast a report on KTLA which the defendants knew would embarrass the doctor and injure his professional reputation.

Delay sought in daytime case

The Assn. for Broadcast Standards Inc. asked the FCC last week for an extension of the deadline for comments on commission's proposal to allow daytime am stations to go on the air at sunrise or 6 a.m., whichever is earliest, in areas where there are no fulltime sta-
voices grow louder in vhf drop-in plan

fcc decision on 8 markets scheduled this week

skirmishing over the FCC proposal to drop vhf channels at standard separations in eight two-station markets increased in intensity last week in anticipation of commission action on the matter this week.

the assn. for maximum service telecasters urged the commission to deny the drop-in proposals. the association said the drop-ins would be contrary to “the national television allocations policy of fostering uhf development side by side with vhf as directed by the congress” in its enactment of the all-channel receiver bill.

taff broadcasting co. requested a rulemaking to reassign ch. 44 from fiqua, ohio, to dayton, one of the cities marked for a drop-in. taft previously told the FCC it would file for a uhf channel in dayton if a vhf were not added there.

springfield television corp. has also asked for an additional uhf channel (38) for dayton (broadcasting, Feb. 18), and the commission has received a letter from an individual who said he will apply for a uhf channel in jacksonville if a vhf is not dropped-in there, as currently proposed.

but against these pro-uhf moves were six petitions from potential applicants for some of the proposed drop-ins, urging the commission to proceed with the plan to add a third vhf network outlet in the eight markets.

miami valley telecasting corp., gem city television co. and wone inc. (licensee of wone-am-fm dayton), all of whom have supported the proposed addition of ch. 11 to dayton, opposed taft’s pro-uhf comments.

WONE and Miami (formed a year and a half ago to apply for ch. 11) charged taft with seeking a uhf channel in dayton solely to protect its vhf station in Cincinnati, wkrc-TV (ch. 12). WONE, asked that the allocation of ch. 11 be conditioned so as to require all applicants to propose a simultaneous uhf operation.

four opposed • south central broadcasting corp. (wtvx [tv] knoxville, Tenn.), rivoli realty co. (ward-TV johnstown, Pa.) and, in a joint filing, century advertising co. and Miami valley telecasting, opposed the petition of the assn. for competitive television asking additional time in which to file comments (broadcasting, Feb. 18). ACT is a uhf group.

South central, which now operates on ch. 26, said that unless the commission allocates ch. 8 to knoxville, as proposed, that city will not have fully competitive tv “for years to come.” South central said it must operate on a vhf channel if it is to be competitive with the two ‘vhf’s in knoxville.

Similarly, rivoli, which operates on ch. 56, said it can’t survive as a uhf station “in this vhf market.” The FCC has proposed adding ch. 8 in johnstown.

Century and Miami noted that the deadline for comments in the matter had passed almost a year ago, and deadline for reply comments, more than six months ago.

The commission, which discussed the proposal at its meeting two weeks ago, and was divided on the matter, with Commissioners Frederick W. Ford, Rosel H. Hyde and T. A. M. Craven supporting it and Chairman Newton N. Minow, along with Commissioners Robert E. Lee and Robert T. Bartley opposing it. Commissioner-designate Kenneth A. Cox, now chief of the Broadcast Bureau, who is due to replace Commissioner Craven, is also believed to favor the proposal.

Commissioner E. William Henry, who was undecided on the matter at the commission meeting two weeks ago, last week expressed the dilemma facing him, and the other commissioners, this way:

“Congress stated a policy in passing the all-channel receiver act. I think we should do everything we can to foster that policy, which to me means encouragement of the purchase of all-channel sets and construction of uhf tv stations. therefore... I’ve got to weigh my responsibility for fostering uhf against the desirability of bringing in a third uhf service in the eight communities.”

The commission is scheduled to attempt to resolve this dilemma at its meeting this week.

The FCC last week...

• was requested by the National Educational TV & Radio Center to reserve ch. 20 in santa barbara, Calif., for noncommercial educational use. NET said that steps are being taken to create a community organization to operate a tv station on the channel.

• received request from Tampa bay tv co. for reallocation of uhf ch. 32 to Tampa-st. Peterssburg and deletion of the channel from Clearwater, both Florida. Tampa Bay said that all channels presently assigned to Tampa-st. Petersburg are occupied and the company wishes to apply for ch. 32 in the area. There are two channels now assigned to Clearwater, chs. 32 and 50, so if ch. 32 is reassigned Clearwater will still have a vacant facility, Tampa Bay said.
DANCING WITH THE ANGELS

The committee to negotiate new radio station music licenses served notice last week that it feels "a substantial reduction" in current license fees is in order.

This objective was announced by Robert T. Mason of WMRN Marion, Ohio, chairman of the All-Industry Radio Music License Committee, after a meeting of the committee Tuesday.

The meeting focused particularly on licenses granted by the American Society of Composers, Authors & Publishers and by Broadcast Music Inc., Mr. Mason said, because these licenses come up for renewal next year. He said the committee also "re-examined the situation relating to SESAC licenses," which come up for renewal at different times for different stations.

Current ASCAP radio licenses expire Dec. 31 of this year; BMI licenses expire March 11, 1964. In the last negotiations, Mr. Mason's committee won reductions averaging about 9% in both ASCAP and BMI contract terms.

The radio committee's meeting came at a time when its television counterpart, a committee headed by Hamilton Shear of WSVA-TV Harrisonburg, Va., is locked with ASCAP in a court battle over new tv music license terms—a battle that seems apt to continue for several months (BROADCASTING, Jan. 21).

Complicated Deals • The complexity of these negotiations is indicated by the time they require. The current tv dispute with ASCAP has been in progress for approximately 16 months; the last radio negotiations took two years to complete.

If usual procedure is followed, Mr. Mason's committee probably will begin preliminary talks with ASCAP next summer and then, as prescribed by the consent decree under which ASCAP operates, will formally ask ASCAP to state its terms for new licenses. If these are not acceptable to radio broadcasters, negotiations will follow and, if necessary, legal action seeking court determination of fair fees.

Emanuel Dannett of McGoldrick, Dannett, Horowitz and Golub, New York counsel to the committee, and Bernard Buchholz, his associate, participated in last Tuesday's meeting.

Committee members in addition to Chairman Mason are George W. Armstrong, Storz Stations, vice chairman; Elliott M. Sanger, WQXR New York, treasurer; Robert D. Enoch, WXLL Indianapolis, secretary, and Thomas E. Carroll, Time-Life stations; Herbert E. Evans, Peoples Broadcasting Co. stations; John J. Heywood, WLW Cincinnati; J. Allen Jensen, KID Idaho Falls, Idaho; William S. Morgan Jr., McLendon stations, and Calvin J. Smith, KFAC Los Angeles.

Film sales...

Cavalcade of the 60's, Group 1 (Allied Artists Tv): Sold to KHJ-TV Los Angeles; CKLW-TV Windsor-Detroit; WANE-TV Ft. Wayne; WISH-TV Indianapolis; KNBC (TV) Los Angeles and WDAU-TV Scranton. Now in 65 markets.

Maverick (Warner Bros. Tv): Sold to WCHS-TV Charleston, W. Va.; WLVA-TV Lynchburg; WVVE-TV Norfolk; WBRZ (TV) Baton Rouge; WTVR (TV) Richmond; WHHL-TV Johnson City-Bristol, Tenn. and to Rinks Bargain City for WCP0-TV Cincinnati; WIMA-TV Lima and WHIZ-TV Zanesville, all Ohio. Now in 47 markets.

Sugarfoot (Warner Bros. Tv): Sold to WCHS-TV Charleston, W. Va.; WLVA-TV Lynchburg; WTVR (TV) Richmond; WRGP-TV Chattanooga and WHHL-TV Johnson City-Bristol, Tenn. Now in 35 markets.

Bronco (Warner Bros. Tv): Sold to WLVA-TV Lynchburg; WRGP-TV Chattanooga and WHHL-TV Johnson City-Bristol, Tenn. Now in 22 markets.

AP opens new photo circuit

The Associated Press, which has formally opened the link between its North American and European wire-photo networks on a 24-hour-a-day basis, becomes the first wire service to lease a transatlantic photo circuit for full time operation, making simultaneous two-way transmission possible. AP's 'round-the-clock photo facsimile facilities now extend from San Francisco to Rome.
We build cars, too.

Of course, You know that. But did you know that Chrysler Corporation has been a prime contractor in the U.S. space program for over ten years? Chrysler was deeply involved with Redstone, then Jupiter. And engineers of Chrysler Corporation are now working on the big Saturn booster. It may not have any direct connection with our cars, but it shows the respect good engineering earns, in space, too.

Jack Webb to head tv production at Warners

SUCCEEDS WILLIAM ORR WHO SWITCHES TO MOVIES

In a move to establish Warner Bros. as Hollywood's leading producer of filmed programs for television, Jack Webb was named last week to head the studio's tv production (Also see WEEK'S HEADLINERS, page 10).

Mr. Webb, whose Dragnet series was one of the early success stories on television after a long run on radio, succeeds William T. Orr who had charge of tv production at the studio for seven years. Mr. Orr now moves into the production of high-budget theatrical films for Warner Bros.

Michael Meshekoff will become executive associate to Mr. Webb, with all appointments effective March 4.

In announcing the new appointments, Jack L. Warner, president of the studio, described the move as the beginning of a retooling of the company's tv operations, with the goal of establishing Warner Bros. as Hollywood's top

tv film producer.

After Dragnet - After Mark VII Productions, the Webb-owned tv program production firm, suspended operations, Mr. Webb moved to the Warner lot in Burbank last year as an independent producer. There he developed his True series, which General Electric Co., through BBDO, New York, has sponsored this season on CBS-TV. Mr. Webb, Warner Bros. and Red Skelton's production company have also jointly developed a high school series, The Giant Step, with a pilot for CBS-TV.

Mr. Webb will start immediately on the development of new programs, in addition to carrying on those already in production. Warner Bros.' current line-up includes The Dakotas, 77 Sunset Strip, Hawaiian Eye and The Gallant Men, all on ABC-TV plus True on CBS-TV.

At this time only The Dakotas is penciled in on next fall's nighttime schedule. Hugh Benson, executive assistant to Mr. Orr in the tv department since its inception, has resigned to enter independent production of tv programs. His first project is a comedy series, A Lot of Living, from an original story by Jerry Davis.

IATSE, studios settle; SDIG picketing Niles

Settlement of strikes of cameramen, film editors and film technicians at various midwestern studios was announced Thursday by the International Alliance of Theatrical Stage Employees. The union said two of its locals won greater pay increases than those sought in negotiations prior to the walkouts, which began Feb. 7.

Settlement pattern was established Feb. 16 at Jam Handy Organization, Detroit, which signed without a strike, it was explained last week by Bernard M. Mamey, Chicago attorney representing the unions. Workers have returned in Chicago at Wilding Inc., Fred Niles Communications Centers, George W. Colburn Labs., Atlas Film Corp. and Filmack Studios and in Minneapolis at Reid-Ray Studios.

Film technicians won weekly increase of $11.50, editors $13.50, assistant cameramen $20 and cameramen $32. Under new contract, for example, if a cameraman works 30 consecutive weeks he will receive $285 weekly maximum; if less than 30 weeks, he will receive $338 weekly maximum. Former weekly pay was $253.

Meanwhile, the Screen Directors International Guild began picketing of Niles Studios in Chicago last Monday charging firm has refused to negotiate a contract. A Niles spokesman said the guild is not a recognized union there either by NLRB or AFL-CIO. SDIG said it already represents directors at other Chicago studios.

Freedom series planned as CBS-TV specials

CBS News has announced plans for a series of light hour-long tv specials to be known as The Roots of Freedom, which will examine the development of Western history with emphasis on institutions that have led to present American legal and ethical codes. The programs will be filmed at sites of historical interest in the various countries where American institutions have their origins.

Most of the specials will be walking interviews similar to CBS-TV's White House tour with Mrs. Kennedy, although some will consist of film essays using professional actors.

‘British Calendar’ now seen in 105 markets

ROYAL FAMILY TOUR DEPICTED IN CURRENT SERIES

A tv series on life in Britain and the Commonwealth today called British Calendar is used in 105 U. S. markets, Alan J. Waple, director of the news division of the British Information Services in New York, reports.

The series began as a once-a-month, quarter-hour presentation four years ago and was expanded to a twice-a-month quarter-hour program two years ago, according to Mr. Waple. In its first two years, approximately 30 stations were carrying British Calendar but it has steadily acquired additional distribution coincident with the expanded programming, he added.

"What we attempt to do with the series," Mr. Waple explained, "is to give the viewer, over a period of time, a rounded picture of various facets of life in Britain. We touch on politics, sports, current events, science and history. In a 15-minute segment we may cover several subjects or devote it to one topic, as we are doing with the current tour of the Royal Family in Australia, New Zealand and the Fiji Islands. We try to keep the programs topical and in the months ahead we will cover such events as the Grand National Steeplechase and the Conservative and Labor Party conferences."

The series, Mr. Waple said, must be "tailored" for American audiences and accordingly is a co-production project involving BIS New York, the Central Office of Information in London and Film Authors Inc., a New York production company which provides the script. BIS also produces Latin American, Commonwealth and Japanese versions of British Calendar.

The programs are available to stations free of charge (except for mailing costs) but BIS stipulates that the films, if ordered, be scheduled, Mr. Waple said. Bookings may be made through the BIS office in New York at 45 Rockefeller Plaza.

E. F. MacDonald and Wilding Inc. to merge

An agreement for the merger of E. F. MacDonald Co., Dayton, Ohio, and Wilding Inc., Chicago, has been announced by the principals of both firms. Wilding, a pioneer in the audiovisual field and tv commercial producer, would retain its name, autonomy and present management under the plan which is subject to stockholder approval.

The MacDonald firm is a major operator in the merchandise incentive and travel fields. The company produces and distributes Plaid and SAA and operates the Happiness tours. E. F. MacDonald is board chairman of the company. H. William Hammar is president of Wilding. Terms of the merger were not disclosed but Wilding’s annual gross is about $11 million and MacDonald’s about $115 million.

FREEDOM FOUNDATION

Annual radio-tv awards given at Valley Forge

Top radio-tv award of the Freedom Foundation, Valley Forge, Pa., the "en
cased" George Washington honor medal, was presented last week to the Lutheran Church, Missouri Synod, St. Louis, for Destination Unknown from the This is the Life television series and to NBC and New York U. for its Democracy in America series.

Presenters of George Washington honor medals for tv work were:

Aluminum Co. of America, Pittsburgh; "The Man With the Shine on His Shoes" from Alcoa Premiere (ABC-TV); American Motors, Let Freedom Ring; American Savings & Loan Assn., Washington, D.C. For Which We Stand; Chevrolet, "Look to the Stars!" from Bonanza (NBC-TV); Crown Stations, Seattle, Killer in Court; Kimberly-Clark Corp., "The Iron Man" from The Defenders (CBS-TV); Pittsburgh Plate Glass, "Honor Guard" from David Brinkley's Journal (NBC-TV); Radio & Tv Commission and Southern Baptist Convention, Ft. Worth, Tex., "Survival Shelter" from The American series; Purex Corp., The World of Jimmy Dowdellie (NBC-TV); Union Central Life Insurance, Cinn., Ohio, The Story of Woodrow Wilson; WGBS-Boston, "The Freedom Trail" from Complex Community series; WABC-TV, New York, "Bunker Hill" from American Treasure Chest; WPRO-TV, Providence, R.I., A Hero Next Door" from Close-Up series; WRC-TV Philadelphia, Old Independence; and WSB-TV Atlanta, Salute to America.

Radio-only winners of the medal are:

Falk Corp., Milwaukee, Wis., Sunday Edition of Bob Siegrist; KFMM (FM) Abilene, Tex., Festival of Freedom; Knight Quality Station, Boston, Judicial Compensa-
tion; KYW Cleveland, Harvey Morgan's Gettysburg—An American Tradition, Chicago, Portland, Ore., Message For Americans; Ray Starr, Tallahassee, Fla., Florida At Work; Washington Federal Savings & Loan, Miami Beach, Fla., July 4, 1776; WBAC Cleveland, Teln., untitled spot announce-
ments of editorial comment urging Americ-
anes to exercise their right to vote and accept an active role in government affairs; WBNS Columbus, Ohio, Irwin Johnson's Tuesday Talks; WEIM Fitchburg, Mass., Sounds of Freedom; WFTL Philadelphia (Temple U. Radio); WPX Philadelphia (public schools), America; WGBS Miami, Fla., J. Am. an American; WMAJ-Broadhead, Pa., The House You Live In; WMAL-Washington, D.C., A Man Called Abe; WONE Day-
ton, Ohio, America; WRCV Philadelphia, You Have A Place In Politics; WRUL Scalate, Mass., Great Moments in History; WABC Atlanta, Elmer Elijah's Fourth of July Letter to My Children; and WWJ Detroit, Great Voices of Freedom.

Distinguished service awards went to Standard Oil Co. of Calif. for two radio shows, Music and Passport to World Series and to NBC and New York U., for its Democracy in America series.

Nutrition broadcaster Fredericks in ‘comeback’

Nutrition broadcaster Carlton Fredericks is making a “comeback” after a year of reduced activity. His programs now are carried on 15 radio stations; ABC Radio presents a 90-second featurette three times a week, and Epic Records is issuing a long-playing album titled “Calories Do Count.”

Mr. Fredericks, in New York recently on a business trip, reported his Living Should Be Fun radio program was carried on more than 50 stations a year ago. At that time the FCC sent letters to the stations notifying them that some medical and nutrition authorities considered the Fredericks program “controversial” and suggested stations consider carrying another nutrition program offering opinions different from Mr. Fredericks’ (Broadcasting, Dec. 18, 1961).

His station list dwindled to nine over the next few months, Mr. Fredericks said, although he retained a few large stations such as WOR New York and KABC Los Angeles. He says: “I was never served with papers of any kind nor was I the subject of any accusation. But stations were fearful; I was deemed controversial, and therefore I was dropped.”

Mr. Fredericks said he has added six stations to his list over the past few weeks without solicitation. Last June he started his 90-minute, thrice-weekly show on 290 stations of ABC Radio.

These encouraging signs, he said, have prompted him to begin an advertising campaign for new station subscribers for his nutrition programs, which he currently is offering in 15-, 30- and 45-minute versions. His headquarters: 350 Lincoln Road, Miami, Fla.

CBS STILL COLOR SHY
Sponsors must cover color tab for network to schedule show

There’s no indication that CBS-TV will compete with NBC-TV or ABC-TV next season, with regular color series.

For CBS-TV the policy, as updated by a spokesman last week, is to continue to program in color only when advertisers order it and pay the extra freight.

Some extra costs for color were approved by advertisers this season but for occasional exposure. In February, for example, the Princess Grace tour of Monaco special was in color and earlier this winter a girl scout jamboree special also was shown in the medium. Each was a one-shot on the network, the Monaco program on the full network, and the jamboree in only 5-7 markets (filmed in color). Ford and Chemstrand were advertisers on the Feb. 17 Grace Kelly program.

Also picking up a color tab on CBS-TV this season is Campbell Soup Co., which through BBDO is the sponsor of a four-part Lassie (Sunday, 7-7:30 p.m. EST) colorcast on four successive weeks. The series started Feb. 17. The drama was filmed in color and technically is the first regular series to be colorcast on the network in three years since occasional colorcasting of the Red Skelton Show was stopped.

An enunciation of the CBS-TV color policy was presented in detail at the regular fall meeting of the CBS-TV Network Affiliates Assn. Advisory Board at Palm Springs, Calif., earlier in the winter (Broadcasting, Dec. 10, 1962).

At that meeting, William B. Lodge, CBS-TV’s vice president for affiliate relations and engineering, noted a decided disinterest on the part of advertisers to pay nominal surcharges for the cost of colorcasting even though the network offered several advertisers the opportunity to originate color.

B&J Productions to make tv travel spectaculars

B&J Productions, specializing in the production of 90-minute travel and travel-adventure spectaculars, has been formed by Bill Burrud and Victor Jory. In addition to producing the color films, Messrs. Burrud and Jory will appear as hosts-narrators and are seeking top personalities to co-produce similar specials with B&J. First star signed is Lloyd Nolan, who will film and star in British Adventure for the company.

Gene McCabe, general manager of Bill Burrud Enterprises, is serving in a similar post for the new company.

‘Marilyn’ special to be on ABC-TV

The sale by Official Films of its half-hour actuality special, “Marilyn Monroe,” to ABC-TV was announced last week by Seymour Reed, president, coincident with the appointment of Johnny Johnston as director of national sales of Official.

Mr. Reed noted that in his first week on the job Mr. Johnston, a former Metro-Goldwyn-Mayer and Paramount Pictures performer, sold the special program to the network. The special, ABC-TV said, has been bought by the Whitehall Div., American Home Products Corp., through the Wm. Esty Co., New York, and will be scheduled on March 24, 9:30-10 p.m.

Mr. Johnston’s post, a newly-created one, involves the development and sales of entertainment and sports programs for networks and stations. An immediate project is the creation of a weekly magazine for a series on pocket billiards. Mr. Johnston will continue as host for the current ABC-TV bowling program, Make That Spare.

Program notes...

UA buys Mirisch • United Artists Corp. reports it will acquire Mirisch Co., an independent film company, on March 1 in exchange for 62,069 shares of UA Class B common stock, valued in the neighborhood of $1.8 million. The transaction will give UA proprietary rights to 20 feature films, including “The Apartment,” “Some Like It Hot,” “Children’s Hour,” “Toys In The Attic” and “Kid Galahad,” which will become available for tv distribution following their theatrical runs.

Tv show on mental health • A special one hour program on the experiences of a mentally disturbed child, “The Rebirth of Jonny,” will be carried on WTTG (TV) Washington on March 11, 8-9 p.m., and will be telecast subsequently by other Metropolitan Broadcasting stations, including WNEW-TV New York, KMBC-TV Kansas City, KOVR (TV) Sacramento-Stockton, WTVH (TV) Peoria, Ill., and WTVP (TV) Decatur, Ill. The program is part of Metropolitan Broadcasting’s A Question of Life documentary series which explores various
We'll swap, Even up!

The search is on, and it offers you a chance to get a new Collins 20V-3 transmitter absolutely free. We're looking for the oldest Collins 1 KW (or less) AM transmitter still in use as primary broadcast transmitting equipment. If you have it, we'll swap a new 20V-3 for it — and it won't cost you a cent. We're even paying shipping charges on both transmitters. Your only expense will be installation of the new transmitter. So, if you have a Collins 1 KW (or less) transmitter, take a good close look at it. It could be the one we're after. Then write us a letter, describing its history and send along the type and serial numbers, if you know them. If yours is the oldest reported by the deadline date, we'll get the 20V-3 to you as soon as is practicable. Read the simple rules, then send a letter to J. L. Taylor, Dept. BC, Collins Radio Company, Cedar Rapids, Iowa.

COLLINS RADIO COMPANY
Cedar Rapids • Dallas • Los Angeles • New York • International, Dallas

Here are the simple rules:
1. Your transmitter must be 1 KW or less and be in primary service — not a standby.
2. It must be property of the original owner OR be the original installation with no major modifications.
3. Collins will replace the transmitter with a new 20V-3, paying all shipping charges, but the winner must install the new transmitter at his own expense.
4. The old transmitter becomes the property of Collins Radio Company. The winner, upon accepting the new transmitter, agrees to use of the owner's name and/or station name in subsequent promotional activities of Collins Radio Company.
5. Letters must be postmarked prior to midnight, March 1, 1963.
6. In case of tie, the first transmitter reported will be considered.
7. Offer is limited to the continental United States.
phases of health. The programs are offered for syndication to other stations.

Desilu gets Hutton • Desilu Sales has acquired world distribution rights to 30 episodes of the Betty Hutton Show from Betty Hutton Productions. Negotiations for sale of the series are currently being closed in Australia, the Philippines and Japan.

Feller to do sports show • Bob Feller, the former Cleveland Indians pitcher, has signed a three-year contract with Andre Productions Ltd., Chicago, to do a 5-a-week, 52-week sports show for radio syndication. The show is scheduled to start on the opening day of the baseball season, April 8th.

Free lunar series • A continuing series of radio programs on America's race for the moon is being offered free of charge by KXYZ Houston, Tex. The 15-minute programs have been recorded by KXYZ since August last year and combine latest information on current developments in the space program plus interviews with astronomers, scientists, and administrative managers of the Mercury, Gemini and Apollo projects now housed at the Houston Space Center. Series' host is Jeff Thompson, KXYZ public affairs director.

'Red ink' railways • A documentary produced by WKY-TV Oklahoma City on the deterioration of the great American railway empires has been accepted for inclusion in the Television Affiliates Corp. (TAC) library for distribution to member stations. Titled The Ride to Red Ink, the program traces the causes of railway obsolescence and discusses what lies ahead in the future.

FINANCIAL REPORTS

ASCAP's '62 gross over $35 million

American Society of Composers, Authors and Publishers had gross revenues of $35,279,033 in 1962, according to a treasurer's report made to a West Coast membership meeting on Wednesday (Feb. 20). Virtually all of the amount—$34,841,911—came from license fees paid by the users of music controlled by ASCAP members, and nearly all of the license fees were paid by radio and tv stations and networks. With a 20% deduction for expenses of the society's home office in New York and 23 branches throughout the country, $28,221,023 was left for distribution to members. The ASCAP membership now totals 5,858 active writers, 2,074 active publishers and 880 non-participating writer members. Stanley Adams ASCAP president, reported that the society is "healthy, vibrant and very much aware of the world" in which it functions and for which it licenses "billions of performances" on ASCAP music each year.

The dispute over tv licenses, now pending in the courts; the resistance of educational broadcasters toward ASCAP's attempts to license them as well as the commercial broadcasters; the anti-ASCAP legislation introduced in Idaho, and other examples of conflict between ASCAP and its broadcast clients were touched on lightly in the report.

Ampex sales, earnings, orders at new high

Record net earnings, sales and incoming orders were announced by Ampex Corp. (video and sound tape recorders and accessories as well as computers and other electronics items) in reporting for the first nine months of fiscal 1963.

Net earnings after taxes for the nine months of the fiscal year ended Jan. 31 were $3,163,000 (40 cents a share), up 141% over the previous year's period of $1,311,000 (17 cents a share).

Total sales for the three quarters totaled $66,789,000, up 13% from the 1962 nine months figures of $58,808,000.

Incoming orders total $74,809,000, 31% ahead of orders on hand at the same time last year which totaled $57,132,000.

William E. Roberts, Ampex president, said last week that for the full year "we will top $100 million in incoming orders for the first time in our history, and will exceed our earlier estimate of a 10% sales increase and substantially improved earnings."

Wrather Corp.'s 6-month net income shows gain

Consolidated net earnings of the Wrather Corp. and subsidiaries for the six months ended Dec. 31, 1962, totaled $405,279 (23 cents a share).

Net for the corresponding period of 1961 was $310,504 (18 cents a share). The figures do not include earnings of the A. C. Gilbert Co., of which Wrather Corp. acquired approximately 50% in January 1962.

Gross income for the six-month period was $6,167,293 compared to $6,142,145 for the same period of the year before.

General Precision has drop in net income

General Precision Equipment Corp., Tarrytown, N. Y. (electronics manufacturer which also makes tv cameras and associated equipment), reported consolidated net sales for the year ended Dec. 31 of $222,862,126 and net income after federal taxes of $4,373,504 ($2.40 a share).

This compares with 1961's sales of $234,620,431 and net income of $5,321,108 ($3.10 a share).

During the year, GP acquired full ownership of Royal Precision Inc. It had owned this computer firm jointly with Royal McBee Corp. A charge of $4.8 million has been made against consolidated earned surplus for this acquisition, but the 1962 operations have not been consolidated in the year-end statement. The firm is now the Commercial Computer Div. of General Precision Inc.

Screen Gems has best half-year in its history

Representing the best six months earning figures in the history of the company, Screen Gems Inc., reported a net profit after taxes for the first half of its fiscal year ended Dec. 29, 1962 of $1,655,508 (65 cents a share). This compares to net earnings for the same period in 1961 of $1,372,727 (54 cents a share). Both figures are based on 2,538,400 shares outstanding.

Profit before taxes for the six month period was $3,262,826. This compares to $2,744,741 for the previous year's half-year mark.

Eitel-McCullough profit up 54%, sales up 9%

Eitel-McCullough Inc., San Carlos, Calif. (electronic tubes, etc.), reported a 54% increase in profits on a 9% increase in sales for calendar 1962.

Profits were $750,000 (40 cents a share), compared to 1961's $486,671 (26 cents a share). Outstanding at the end of 1962 were 1,842,913 shares.

Net sales last year amounted to $29.6 million, compared to the previous year's $27,109,945.

Unfilled orders rose from $6.7 million at the end of 1961 to $7.7 million at the end of 1962.

AB-PT declares dividend

American Broadcasting-Paramount Theaters board of directors declared a first quarter dividend of 25 cents per share on the company's outstanding common stock. The dividend is payable to stockholders of record Feb. 25, 1963 on March 15.

BROADCASTING, February 25, 1963
The first comprehensive—often surprising—study of how the American viewer actually feels about TV and the uses he makes of it.

**THE PEOPLE LOOK AT TELEVISION**

A Study of Audience Attitudes

How has television affected the American home? What do viewers think about this extraordinary medium of communication? And—perhaps most important of all—how do their opinions about television relate to their viewing habits?

The present study is the first comprehensive and definitive effort to provide some factual and objective information on these and other issues, by examining and reporting how Americans use the medium and what they think about it. It is based on one of the most thorough national surveys ever undertaken. Conducted at the Bureau of Applied Social Research of Columbia University, the survey employs the most advanced techniques of modern social research.

Are Americans generally satisfied or dissatisfied with the programs they see on television? What about the present ratio of entertainment to informa-

by GARY A. STEINER

tion? Do they watch selectively and, if so, what do they select? How do they feel about the amount of time they spend in front of the set? What are their concerns about their children's viewing?

These are some of the provocative and fascinating areas of opinion and behavior that are illuminated by Dr. Gary A. Steiner in this study. It provides a factual platform from which the great debate about television must subsequently go forward...and it is important, and absorbing, reading not only for social scientists and the broadcasting community but for the general public.

_with a Foreword by Bernard Berelson, former director, and an Afterword by Paul F. Lazarsfeld, founder and currently associate director, Bureau of Applied Social Research, Columbia University_

CBS RUNNING STRONG

First quarter business 20% ahead of last year exceeds network's own projection for period

An optimistic statement was issued last week following a meeting in New York of the CBS Radio Affiliates Assn.'s board of directors and network executives.

E. K. Hartenbower, KCMO Kansas City, chairman of the affiliates board, keying the statement to financial strength points this year, noting that at the meeting "there was no jockeying for economic position as between affiliates and the network."

CBS Radio's first-quarter business, he said, has been running 20% ahead of last year's similar period "which is even better than the network's own projection."

"As a result, station payments to affiliates will be at an unexpectedly gratifying level for the current quarter" and the affiliates board is "confident that our prospect for the coming months is bright."

**Audience Levels** The statement also pointed to an increased average audience for sponsored programs and CBS news coverage on the network, along with expansion of Dimension—additions of *Dear Abby, Marvin Kalb Reports* and an expected new format featuring Walter Cronkite.

The board also noted that CBS Radio is the only network with a consistent, large-scale advertising campaign in national consumer and broadcasting trade publications, and lauded new promotional support efforts (new "stationized" technique in which messages from CBS Radio personalities are prepared for each affiliate with call letters integrated on ready-to-broadcast tapes).

CBS Radio officials present at the New York meeting:

Arthur Hull Hayes, president; James M. Seward, executive vice president; Richard S. Salant, CBS News president; news correspondent Marvin Kalb; George Akedis, vice president, network sales; W. Thomas Dawson, vice president, information services; George Perkins, vice president, network programs; William A. Schadt Jr., vice president, affiliate relations; Fred Ruegg, vice president, station administration; David- son M. Vorhes, vice president, operations; Andrew Subbiondo, director, administrative operations; Harper Car- raine, director, research; Geraldine Zorbaugh, general attorney, CBS Inc.; William Green, assistant general attor- ney, CBS Inc.; Alfred Greenberg, field manager, affiliate relations; Robert Skedgell, assistant general manager, CBS News (radio).

**WBT beams news show to Russians in Cuba**

A daily, 15-minute program in Russian will be broadcast over WBT Charlotte, N. C., to Russian citizens residing and working in Cuba, starting today (Feb. 25).

The program to be beamed by the 50-kw station to Cuba will be prepared by Radio Liberty, a privately sponsored organization that has been broadcasting for 10 years to the Soviet Union from transmitters in West Germany, Spain and Formosa. The nightly program will be fed by landlines from Radio Liberty's New York bureau to WBT and will consist of news and background on international events and on developments within the Soviet Union. It will be scheduled from 10:10-10:25 p.m.

Howland T. Sargeant, president of the American Committee for Liberation, which operates Radio Liberty, said the broadcasts will continue as long as "significant numbers of Soviet nationals remain in Cuba."

Charles H. Crutchfield, president of Jefferson Standard Broadcasting Co., which owns and operates WBT, commented that the programs may well supply the Russians in Cuba "with a current, undistorted view of international affairs ... perhaps for the first time." During the Cuban crisis last fall WBT was one of a group of stations used by the U. S. Information Agency to broadcast news to the Cuban people.

**Baron offers to air N.Y. strike sessions**

A proposal that the issues in the newspaper strike in New York be carried on radio or television was made last week by Sydney S. Baron, head of his own public relations organization in New York.

Mr. Baron said that he could obtain financing from businessmen for the buying of radio-tv time, if that is necessary, for a broadcast and/or telecast of negotiating sessions. He indicated that if the issues are brought out openly, consider-
AUSTIN SLAPS 21 MUSTS ON CATV

Antenna leaders concerned over 'restrictive' regulations

Community antenna leaders have expressed a “new wave of concern” over “highly restrictive, FCC-inspired” regulations being placed over catv systems by local communities as the price for a franchise.

Latest case cited is in Austin, Tex., where the city council placed 21 conditions on two companies granted permits to operate systems. National Community Tv Assn. reserved comment on the Austin restrictions “pending a complete study.”

In its 21-point policy statement, the council announced that non-exclusive franchises will be granted for a city-wide cable service only for which no charge may be made except for “authorized service fees.” This service fee was set by the city council at $4.95 per month, with a connection charge prohibited, no additional charge for special programs such as a heavyweight championship fight.

The system must be able to distribute signals on at least eight channels simultaneously and repeat all tv signals originating in Travis County (in which Austin is located). The council specified that any Austin catv must repeat the signals of educational KLKN (TV) (ch. 9) San Antonio (Bexar County).

Under the policy statement, Austin systems also must “continuously distribute” a satisfactory weather service and be prepared to make announcements requested by civil defense and disaster authorities. To meet this last requirement, a system operating in Austin must have the capability to immediately interrupt its signals on all channels simultaneously or any one channel individually. This, the council noted, would also guard against the rebroadcast of defamatory and obscene programs.

The two Austin contracts—to Cat Cable of Austin Inc. (Broadcasting, Feb. 18) and Capital Cable Co. (Broadcasting, Feb. 4)—are for 20 years but may be cancelled by the city council “unless diligence is exercised in expanding the system” after the start of operations.

The Austin systems are required to extend their lines up to 100 feet beyond already established cables to anyone who requests service. The systems are required to pay the city a rental of $3.00 per pole annually and a tax of

Reaction Favorable • Meanwhile National Community Television Assn. officials have been meeting with representative catv groups during the last week to get a sounding on reaction to the NCTA board's decision earlier this month to seek "simple" legislation from Congress giving the FCC authority to regulate cable companies (Broadcasting, Feb. 18). This is a 180-degree reversal of the previous NCTA stand opposing any and all regulation.

In three or four meetings last week, NCTA officials found that the group's new position on legislation is being accepted favorably. These meetings will be completed by the end of March. All talks thus far are "exploratory," it was explained.

**Tv right at hearings defended by NAB**

The NAB has filed a "friend of the court" brief in the dispute between three Los Angeles tv stations and two state administrative agencies—the government bodies having banned tv cameras from public proceedings last month (Broadcasting Feb. 4).

Pointing out the sessions involved are administrative rather than judicial in nature, the NAB replied in the Superior Court of California to an injunction sought by John C. Sobieski, California commissioner of corporations, which would ban tv cameras and microphones from hearings of the Public Utilities Commission. KABC-TV, KTTV (TV) and KTLA (TV) all attempted to cover a hearing last month which halted because of the presence of the tv cameras.

NAB said the utilities commission proceedings are primarily concerned with the general welfare of the public at large rather than with particular individuals. "Since the public itself is the party with the greatest interest, all available methods of communications should be utilized to ensure that the public is informed ..." NAB said.

The court has scheduled a hearing on the requested injunction against radio-tv for today (Monday). The commission plans an announcement on the ban two days later (Wednesday).

**Galveston papers sold**

The Houston Post Co. last week bought the Galveston Daily News and Tribune and the Texas City Sun. The price was not disclosed. The Houston Post Co. is the publisher of the Houston Post and the licensee of KPRC-AM-TV that city. W. P. Hobby, publisher of the Houston newspaper, also owns 27.5% of KFDM-TV Beaumont.

**'CALL FOR ACTION'**

WMCA, volunteers working on N.Y. housing questions

Two dozen civic-minded, women volunteers started taking calls Feb. 19 from New York citizens who need help on a housing problem. The sponsoring organization: WMCA-Call for Action, a new pilot project initiated by R. Peter Straus, WMCA Inc. president.

Five phone stations were "manned" on a rotation schedule by the 24 women on a Mon.-Fri. basis, two hours on the phones and a couple of additional hours for keeping records. Most of the women were recruited from an orientation leadership class given by a New York citizens committee.

More than 300 calls were received in the project's first two-hour period.

Planning of the new WMCA phone project started last November, but even earlier—more than a year ago—the station had determined housing to be New York's No. 1 community problem. As a result of that decision, the station began a series of 25-minute weekly documentaries called 'The Housing That Haunts New York.' The series started Feb. 11 and will be heard each Monday at 11:05-11:30 p.m. through March 25. First of the seven programs was a composite, introductory show, the Feb. 18 "Call for Action" episode heralded the launching of the phone information service.

The documentaries are prepared by WMCA's news and public affairs department in association with Woody Kline, an award-winning reporter (New York World Telegram & Sun) who has written various series on New York's housing problems. The series will include interviews with Gov. Rockefeller and the city's Mayor Wagner, building commissioners and inspectors among others. Barry Gray will narrate.

**Changing hands ...**

ANNOUNCED • The following sale of station interests was reported last week subject to FCC approval:

**APPROVED** • The following transfers of station interests were among those approved by the FCC last week (for
other commission activities see FOR THE RECORD, page 74).

- KOL-AM-FM Seattle, Wash.: Sold by Archie Taft Jr., Mrs. Marie S. Taft and William L. Simpson to F-V Productions Inc. for $850,000 and agreement not to compete. F-V Productions Inc. is principally owned by Mark Goodson and William S. Todman, owners of the Goodson-Todman TV packaging firm. Commissioner Robert T. Bartley concurred in the decision, but would have granted a waiver of the three-year rule on grounds other than those accepted by the FCC majority. KOL is a fulltime independent operating on 1300 kc with 5 kw. KOL-FM operates on 94.1 mc with 5.8 kw.

- KRE-AM-FM Berkeley, Calif.: Sold by Central California Broadcasters Inc. to KPAT Inc. for $500,000 and agreement not to compete. KPAT Inc. is principally owned by Dickens J. Wright and Paul Bauman. Mr. Wright was a principal owner of WPAT Paterson, N. J., sold in 1961 to Capital Cities Broadcasting Corp for $5,350,000. KRE founded in 1922, operates on 1400 kc with 1 kw daytime and 250 w nighttime.

- KITE Terrell Hills (San Antonio), Tex.: Sold by trustee in bankruptcy for Townsend Growth Fund Inc. to Southwest States Inc. for $450,000. Southwest States is principally owned by Cecil L. Trigg and Jack C. Vaughn who also own KOSA-AM-TV Odessa, KROD-AM-TV El Paso and KVII (TV) Amarillo, all Texas, and just recently bought the 10,000 subscriber Tyler, Tex., community antenna system (BROADCASTING, Feb. 4). KITE is a fulltime station, operating on 930 kc with 5 kw days and 1 kw nights.

**KTBS-TV to build new tallest tower**

KTBS-TV Shreveport, La., has announced that the station will soon have the world's tallest tower for its antenna. KTBS-TV said that it has signed a contract with RCA, Camden, N. J., and the Kline Iron & Steel Co., Columbus, S. C., for construction of a proposed 1,800 ft. tower.

In its announcement the station said that permission to build such a tall tower was the result of three years of engineering work and application to the Federal Aviation Agency and the FCC. At the present time the FCC reports that the tallest tower is the joint tower of WRBL-TV and WTVN (TV) Columbus, Ga., which is 1,749 ft., and the tallest existing man-made structure.

KTBS-TV said that the cost of the tower will be approximately $500,000 and it will take 22 weeks to build.

**NEWS MANAGEMENT’ TO BE DISCUSSED**

Government, media meet in April for mutual benefit

Top government information men and representatives of radio-tv, newspapers and magazines are going to sit down for a weekend of discussion and the hope is that each will learn more about the others' problems.

The meeting, announced last week by Pierre Salinger, news secretary to the President, will take place April 5-6 at Airlie House in Warrenton, Va. Airlie House is owned by Airlie Foundation and has been used on occasion for private "think" meetings.

The plan was first broached to Mr. Salinger last December by the NAB Freedom of Information Committee (BROADCASTING, Dec. 17, 1962).

Invited to send two representatives each were:

The invitation requests the White House and State Department groups and SDX to name at least one of their two representatives from the broadcast medium.

Government public information men who will attend the meeting, in addition to Mr. Salinger, are:

Robert J. Manning, Assistant Secre-

**WGN-TV camera follows Chicago cop decoys**

The long night vigils and extremely difficult back-alley natural light photographic problems of the news staff of WGN-TV Chicago make up a story almost as unique as that of the news documentary produced by WGN-TV about the Chicago Police Dept.'s TUF Unit (tactical under-cover function) in its operations of decoying and capturing jack-rollers and street muggers. WGN-TV's full-hour film was aired Feb. 4, 9-10 p.m.

Audience reaction was so good, according to the station, that sponsor Sears, Roebuck & Co. bought a Sunday afternoon repeat (Feb. 10),

over indications of "news management" by the Kennedy administration. It suggested that a meeting be held with newsmen for a full discussion of government information policies.

The statement was delivered to Mr. Salinger by Frank Fogarty, chairman of the NAB group. Howard H. Bell, NAB vice president, carried on the negotiations with Mr. Salinger and the other groups. Mr. Salinger accepted the idea immediately.

**Intermountain forms farm group division**

The Inter-Valley Farm Group has been formed by 15 Intermountain Network affiliated stations. This division is comprised of KMON Great Falls, KOJM Havre, KGZ Kalispell, KYSS Missoula, KGHL Billings (all Montana); KGEM Boise, KLIX Twin Falls, KIPI Idaho Falls (all Idaho); KVNU Logan, KLO Ogden, KOVO Provo, KSVC Richfield (all Utah); KPW Powell, Wy.; KNEB Scottsbluff, Neb. and KYOU Greeley, Colo.

All farm group members employ full-time farm directors with each station originating its own specialized farm programming. Intermountain provides a number of daily network programs including livestock reports, weather reports and special service programming.

Edward Petry Co., representatives of Intermountain, will also act as representatives of Inter-Valley.

---

**EQUIPMENT & ENGINEERING**

**Color tv system for theatres revealed**

**NATIONAL GENERAL CORP. EXPECTED TO ANNOUNCE NEW GE EQUIPMENT**

A new television receiving system which permits the projection of tv pictures onto theatre-size screens in color as well as black and white, in much the same way as movies on film are projected, has been perfected by General Electric Co. and is ready for practical use in theatres, Broadcasting learned last week. It was also learned that GE has contracted to install this new equipment in about 100 of the motion picture theatres owned and operated by National General Corp.

The exact cost of the multi-theatre installations could not be learned last week, but it is expected to run into several million dollars.

Reports that something of this nature was in the works have been persistent in Hollywood since Feb. 4, when Lucille Ball, president of Desilu Productions as well as its brightest star, told the Hollywood Ad Club that Eugene Klein, NGC president, had come to her with a plan to put "Wildcat," the show she had started in on Broadway last year, into his theatres through closed circuit tv.

No confirmation has been forthcoming, either from NGC or GE, which was reported to be making the equipment to be used by NGC. At the NGC annual stockholders' meeting in Hollywood Tuesday (Feb. 19), several questions about these stories were directed to Mr. Klein, who parried them all with the reply that the company expected to make a major announcement before the end of February and would not reveal its nature in advance.

Late last week, newsmen of the general and trade press received invitations to a news conference to be held this morning (Monday, Feb. 25) at 9:45 a.m. at the Waldorf Astoria, New York, under the joint auspices of General Electric and NGC. This would appear to bear out the reports of the tv pro-
High-Power Light • The GE projector is said to be similar to a standard motion picture projector in that it also uses a high-power light source and a system of lenses to direct the light beam, which, in the case of motion pictures, passes through the film to produce an image on the screen. The GE tv projection system does not use conventional movie film, however, but a very thin transparent layer of a viscous control fluid. This control layer acts in much the same way as the phosphor face of a conventional tv receiving tube. An electron gun continuously scans the surface of the control layer. But instead of producing a picture directly on the layer, as it would on the face of the tv tube, the electron beam in the GE system causes the layer to control the light so as to project the picture onto the theatre screen.

The key to the new projection system was the development of this special control fluid, which is believed to be the result of research into thermoplastic recording in which GE scientists have been engaged for a number of years. A progress report was given in New York a little more than three years ago (Broadcasting, Jan. 18, 1959), at which Dr. William E. Glenn of GE’s research laboratory, inventor of the TPR system, demonstrated a laboratory model which recorded a tv sequence picked up off the air and played back via an 8 mm projector onto a screen. An observer described the quality of the projected image at that time as about on a par with “an early-history kinescope.”

GE officials at the demonstration stressed the fact that the system was still in the experimental stage and called for further developmental work in the laboratory before it would be ready for commercial use. This developmental stage has been completed and a practical, workable system will be announced and perhaps demonstrated today, if Broadcasting’s information is correct.

At the time of the 1960 demonstration, the GE system of thermoplastic recording and playback was described as combining the processing speed of video-tape recording, permitting immediate playback, plus the storage capacity of photographic film. Like film and tape, the GE TPR system was said to be able to reproduce pictures in either monochrome or full color, but without requiring the processing of film. Like video-tape, the thermoplastic recording can be erased and re-used as desired.

Another key factor in the GE projection system for theatre television is the light valve projector. This new unit is understood to employ a novel light-gathering system which focuses the extremely high light output of an arc lamp into a dual-beam scanning system that transmits the picture virtually instantaneously upon reception of the tv signal through the viscous fluid and onto the theatre screen.

No Comment • Mr. Klein and other officials of National General Corp. last week would not even admit that they were considering the idea of tv projection installations in the NGC theatres, let alone discuss the use they plan to make of this equipment. From Miss Ball’s remark, however, it seems certain that the presentation of Broadway dramas and musical productions, done live and transmitted instantaneously to the screens of NGC theatres (hopefully packed with paying customers), is one type of closed circuit entertainment that has been contemplated by the theatre organization.

Prize fights and other major sports events will undoubtedly be among the closed circuit tv attractions by which NGC will attempt to augment its standard motion picture fare to attract attendance at its theatres. It is understood that a search has already begun for a top echelon executive in the tv programming field to head this phase of the NGC operation.

At last Tuesday’s stockholders’ meeting, President Klein’s report covered the company’s previously announced diversification program which has taken the theatre-based organization into such allied fields as vending machines for theatre lobbies and “nut ‘n’ knot shoppe” refreshment centers in quarters adjoining the theatres but available to passers-by as well as to theatre patrons, real estate and, most recently, the trailer field through acquisition of Mobile Rentals Corp.

Mobile Rentals Corp.’s president and board chairman, M. E. Hersch, and

RCA ups prices 5%

Radio Corp. of America’s Broadcast & Communications Products Div. has announced a price increase of approximately 5% in its line of major tv and radio equipment.

An RCA official reported that the increase was not across-the-board but did include items in each major product category, including amplifiers, am, fm and tv transmitters, studio cameras, audio and visual tape recorders and switching equipment.

Causes of the higher prices were said to be higher manufacturing costs and improvements in current-model equipment.
Seymour F. Simon, attorney and president of the board of commissioners of Cook County, Ill., were added to the NGC board by vote of the stockholders, who also re-elected Mr. Klein: Irving H. Levin, executive vice president; Alan May, vice president and treasurer, and Robert W. Selig, vice president, to the NGC board, along with Lloyd Drexler, partner in Northern Illinois Steel Co.: Jack M. Ostrow, attorney and CPA, and Edward Patterson, associate of Allen & Co., New York investment bankers.

RCA develops new high frequency tube

A new electron tube whose amplification potential is 30 times that of a regular tv transmitter tube has been developed for use near frequencies of infrared light.

The beam-plasma tube was developed by RCA under the sponsorship of the U.S. Air Force. It uses the interaction of a pulsating electron beam and ionized cesium gas or plasma to amplify radio signals that oscillate up to 23 billion times per second. The top tv channel, ch. 83, occupies a band between 884 mc and 890 mc.

Although amplifier tubes for the millimeter-wave region of the spectrum are not new, the use of plasma for amplification permits the tube to be larger, more rugged, capable of handling larger powers and of operating continuously over longer periods without damage, according to Dr. James Hillier, RCA Labs, vice president. He added that when perfected such tubes could become the basis for new communications, radar and control systems which would operate at frequencies well above the present microwave ceiling.

50% of radio-tv sets receive fm stereo

Almost half of all radio-tv and radio-phonograph combinations produced in 1962 were capable of receiving fm stereo broadcasting, the Electronic Industries Assn. reported last week.

In the radio-tv combination field, 162,208 of the 296,816 total manufactured last year, or 54.6%, had an fm stereo capability. Among the 1,380,569 radio-phonograph combinations made last year, 43.85% or 605,331, were capable of receiving fm stereo.

The figures are based on a special report issued by EIA's marketing services department.

No figures are available for radio-only receivers, it was said at the manufacturers trade association.

FATES & FORTUNES

BROADCAST ADVERTISING

Louis F. Bantle, who joined U. S. Tobacco Co., New York, in November 1962 to direct 1963 newspaper and tv advertising program, appointed to newly formed advertising position of advertising manager of company's two food divisions, Circus Foods and Lummis & Co. Circus manufactures canned and packaged nut products in San Francisco, and Lummis also processes its own nut product line in Philadelphia. Mr. Bantle was formerly account executive at Donahue & Coe, New York.

Robert J. Murphy elected vp of Dennis, Parsons & Cook, Jacksonville, Fla., advertising agency. Mr. Murphy will continue in his capacity as director of agency's pr division.

William J. Kennedy, formerly a media director and manager of media department of Ted Bates & Co., New York, named executive director of Bates' new "planning committee" that will direct operations of newly organized media and program department (WEEK'S HEADLINERS, Feb. 18). Richard A. R. Pinkham, senior vp in charge of media and programs, heads planning committee as chairman.

Peter Finney, founder and former president of Southern Adv., Miami, Fla., and more recently head of Peter Finney & Co., that city, joins Dennis, Parsons & Cook, Jacksonville, Fla., advertising agency, as vp.

William P. Reilly named manager of San Francisco office of Young & Rubicam, replacing George B. Richardson, who has resigned effective April 1. Mr. Reilly joined Y&R in 1953 after 16 years of advertising and selling with Standard Brands Inc. He was placed in charge of merchandising in San Francisco in 1957 and following year elected vp. In 1959, Mr. Reilly joined agency's contact department as account supervisor.

John P. Street, executive vp of Hart-Conway Co., Rochester, N.Y., advertising agency; elected president, succeeding H. Lyman Hart, president of company since it was founded in 1924, who becomes board chairman. John M. Nixon and E. Ward Phillips were re-elected vps; James V. Mannhardt, secretary; and Ann Louise Kearns, comptroller.

Genevieve Hazzard, in charge of women's program on Chevrolet Motor Div. advertising account at Campbell-Ewald Co., Detroit, elected vp. Miss Hazzard, who joined C-E in 1950, is first woman vp in 50-year history of agency. Other new C-E vps: Stoffer J. Rozema, who has been secretary, will assume new duties as vp-administration; James C. Beavers, of radio-tv Chevrolet programming; Jeremiah M. Moynihan, assistant media director; and Walter S. McLean, supervisor on agency's Rockwell-Standard Corp. account. At same time, Edward M. Talbert was named secretary-treasurer, and David R. Platt made assistant treasurer and comptroller.

Charles J. Leibold, copy group head at Geyer, Morey, Ballard, New York, elected vp. Mr. Leibold joined Geyer in service, production and traffic, and left to join Sherman & Marquette in 1945 as assistant production manager. He went to Morse International in 1948 as copywriter and returned to Geyer in 1953.

George Finnegan, former general manager of WTVH-TV Peoria, Ill., and vp of parent Metromedia Inc., and more recently with KFDA-TV Amarillo, Tex., appointed account executive and assistant general manager of Advertising Inc., Amarillo.

John T. Hancock, former marketing services manager for North American division of Air France, joins Foote, Cone & Belding, New York, as senior account executive on Trans World Airlines domestic account. Mr. Hancock served with Young & Rubicam and United Air Lines prior to joining Air France.

John Earle Loog, independent tv and motion picture producer, appointed na...
tional advertising manager of Proctor-Silex Corp., (electrical appliances and glassware), Philadelphia. Prior to becoming producer, Mr. Loog was head of broadcast advertising for RCA Sales Corp. and national advertising manager of RCA Victor Television Div.

Peter A. Berla, media supervisor at Ogilvy, Benson & Mather since 1959, joins Carl Ally Inc., advertising agency, that city, in same capacity. At OB&M, Mr. Berla was supervisor on such accounts as General Foods, Bristol-Myers, Sears Roebuck, among others. He also was formerly media buyer at Benton & Bowles, New York.

Robert F. Finnegan, media and research director of The Bresnick Co., Boston advertising agency, elected vp. Mr. Finnegan joined Bresnick in 1959 from General Electric Co.

Joe Woods, former supervisor on Caterpillar account at N. W. Ayer & Son, Chicago, joins Foote, Cone & Belding, that city, as executive on new International Harvester account. Larry Harris, formerly with Meldrum & FeWsmith, Detroit, joins F&C&B as copy group supervisor on IH account. F&C&B also adds to IH account copywriters R. D. Atkins, formerly with FC&B in San Francisco; Scott Smith, previously with Meldrum & FeWsmith, Detroit, and John Ward, formerly with Leo Burnett Co., Chicago. Catherine Thiel, formerly with Daniel J. Edelman & Assoc., joins FC&B as copywriter on Kimberly-Clark educational activities.

Wallace Lepkin, former director of research and marketing supervisor of MacManus, John & Adams, New York, joins Foote, Cone & Belding, that city, as research department manager. Mr. Lepkin has also served as director of research and member for plans board of Erwin Wasey, Ruthrauff & Ryan, New York.

Charles Fryer, Edward Gellert and Donald Marshman named account supervisors at Young & Rubicam, New York. Mr. Fryer joined Y&R in research department in 1953, and was named account executive in 1959. Mr. Gellert came to agency as account executive in 1959, from Compton. Mr. Marshman was vp for advertising and promotion at Warner Bros. Co. of Bridgeport, Conn., before he joined Y&R in 1961.

Don Lawrence joins creative staff of Hill, Rogers, Mason & Scott, Chicago, as tv director and producer.

William H. Lyman, copywriter with Leo Burnett Co., Chicago, since 1957, promoted to copy supervisor. Before joining agency, Mr. Lyman was with advertising department of Kraft Foods.

Robert R. Schroeder, director of pr services, promoted to pr director of Griswold-Eshleman Co., Cleveland-based advertising, pr and publicity firm.

Harold B. Rorke, director of broadcast programming for J. Walter Thompson Co., Chicago, resigns to become editor of Good Taste magazine, Los Angeles.

Edward J. Mitchell, creative consultant, joins Geyer, Morey, Ballard, Los Angeles, as art director.

Ronald H. Beights joins creative art staff of Frank Block Assoc., St. Louis advertising agency.

Bill A. Dunagan, member of sales staff of KLIF-FM Dallas, joins Wright, Allen & Ryan Adv., that city.
Oklahomans elect officers

William S. Morgan, general manager of KNOR Norman, elected president of Oklahoma Broadcasters Assn., succeeding Ran Van Hooser, president-general manager of KNED McAlester. Other newly elected OBA officers: C. Hewel Jones, KJEM Oklahoma City, vp; Lee Allan Smith, WKY Oklahoma City, secretary-treasurer. Elected to board for three-year terms were Jack Sampson of KOMA Oklahoma City and Tom Reddell of KSWO Lawton.

Richard Kersting, assistant manager of KEST Boise, Idaho, promoted to manager, succeeding Lee Norton, who assumes position of operations manager of KAPT Salem, Ore. Phil Holman and Frank Pennock appointed sales manager and program director, respectively, of KSHA Medford, Ore. Dolph Janes, for 22 years with KORE Eugene, Ore., joins KATR, that city, as news director. Pacific Adult Radio Stations are KAPT Salem, KATR Eugene, and KSHA Medford, all Oregon, and KEST Boise, Idaho.

Richard N. Jacobson, assistant general sales manager of WOR-TV New York, named sales manager for ch. 9 outlet, reporting to Burt Lambert, vp and director of sales. William McNicol Jr., assistant sales manager of WOR-AM-FM, named sales manager of radio outlets. Mr. Jacobson, prior to joining WOR-TV, served as national sales manager of KJH-TV Los Angeles. Both stations are owned by RKO General Inc.

Earl Morgenroth, sales manager of KGVO Missoula, Mont., promoted to assistant manager-operating director.

Benjamin F. Mayo, station manager of WGAC Augusta, Ga., elected vp of Twin States Broadcasting Co., owner and operator of station.

John Pfeiffer, formerly with Moloney, Regan & Schmitt, newspaper representatives, as account executive in firm's New York, San Francisco and Chicago offices for eight years, appointed marketing manager for central division of Edward Perry & Co., Chicago. Working for both radio and tv departments, Mr. Pfeiffer will help provide direct line of communication between Perry-repre-sented stations and their clients.

Robert Bennett and Charles Young elected vps of Times Mirror Broadcasting Co., licensee of KTTV (TV) Los Angeles. Mr. Bennett, local sales manager for past four years, is now vp in charge of local sales, and Mr. Young, national sales manager also for four years, becomes vp in charge of national sales. Metromedia Inc. recently purchased KTTV from Times Mirror Co. (Broadcasting, Jan. 14, 21), subject to FCC approval.

Donald L. Phinney, formerly with WSEE-TV Erie, Pa., joins sales department of WGR-TV Buffalo, N. Y.

Perry S. Samuels, general manager of WPTR Albany, N. Y., elected vp and member of board of directors of Patroon Broadcasting Co., owner and operator of station.

Jack Bray, formerly with Metro Broadcast Sales, joins radio sales staff of The Katz Agency, New York.

Alan Barrows, former timebuyer with J. Walter Thompson Co., New York,
named to new position of sales development representative for WFAA-TV Dallas-Fort Worth, Tex. Mr. Barrows will be responsible for directing station's marketing and research activities.

**Ralph M. Hansen**, assistant general manager of KTVI (TV) St. Louis, elected to board of directors of Signal Hill Telecasting Corp., owner and operator of ch. 2 outlet. Mr. Hansen, who has served in his present capacity since March 1962, was formerly with KSD St. Louis, WHAS-TV Louisville, KYW-AM-TV Cleveland, and WJK-TV Detroit.

**Paul Wischmeyer**, formerly in sales post at KMOX-TV St. Louis, joins Peters, Griffin, Woodward, that city, as tv account executive.

**Herb Davis**, air personality and host of *The Herb Davis Show* on WAVA-AM-FM Arlington, Va., assumes added duties as vp in charge of programming.

**Scott Bishop** appointed program director of WCKR, WIOD-FM Miami.

**Richard M. Brescia**, former station manager of WDEV Westfield, Mass., joins Mutual Broadcasting System as station relations representative.

**Raymond R. Kaelin**, former account executive at Peters, Griffin, Woodward, New York, joins new radio-vi representative firm of Vic Piano Assoc., that city, as vp. Mr. Kaelin previously served as account executive with Advertising Time Sales and held sales and marketing posts with Scott Paper Co., Chilton Co. and Container Corp. of America.

**Bonnie Ann Gardner**, formerly with KGMI Bellingham, Wash., joins KPUG, that city, as operations director.

**Robert M. Williams**, former account executive with CBS Television Sales, joins Television Advertising Representatives, New York, in sales department. Prior to serving with CBS Television Sales, Mr. Williams was on staff of CBS-TV Spot Sales.

**Ken Gaughran** resigns as dj-program director of WWCO-AM-FM Waterbury, Conn., to join announcing staff of WVOX-AM-FM New Rochelle, N. Y., effective March 4. Ken Gaughran Productions, an independent firm which originated and produces *Miss America Pageant Reports* and *Today's the Day,* will announce shortly new address in New Rochelle, but also maintains its current Waterbury address until end of year.

**James H. Topmiller** appointed sales director of WHAS Louisville, Ky., replacing **John M. Fouts,** who resigned to become Detroit manager of Henry I. Christal Co., national radio sales representatives, effective end of March. Mr. Topmiller has been with WHAS sales since 1953, and prior to that was commercial manager of WKCT Bowling Green, Ky. Mr. Fouts succeeds **Joseph R. Spadea,** who resigned fortnight ago to join Detroit office of Meredith Publishing Co. as manager.

**Gary Waller,** promotion manager of KCOP (TV) Los Angeles, promoted to program director, succeeding **Bob Guy,** who resigned to join Storer Broadcasting Co. as program development manager for five Storer TV stations: WJBK-TV Detroit, WSPD-TV Toledo-WAGA-TV Atlanta, WJTW-TV Cleveland, and WTTI-TV Milwaukee.

**Murphy Martin,** formerly of WFAA-TV Dallas, joins ABC-TV as anchor-man of *ABC News Final.* **Bill Shadel,** news editor and editor of program since 1961, has been assigned to ABC's Washington news bureau as senior correspondent.

**Ben Tipton** 3rd joins staff of KBYE Oklahoma City as host of gospel and spiritual music programs twice daily, and rhythm and blues show.

**Bob Patt**, manager of promotion and advertising for WNBC-AM-FM-TV New York, joins Blair Television, that city, as sales promotion and marketing director.

**Dick Gideon,** former assistant director of research in charge of broadcast media at Young & Rubicam, joins Blair TV as manager of research.

**John P. Twaddle** named program director of WHYY-TV (educational ch. 35) Philadelphia.

**Dick Lawrence** named operations-program manager of WFLA-AM-FM Tampa, Fla.

**Sylvie Saint Clair** joins personality staff of WCAU-AM-FM Philadelphia as hostess of *Sylvie by Night* program, 9 p.m.-1 a.m., EST, Mon.-Fri.

**Donn E. Winther,** advertising and sales promotion manager of WBZ-TV Boston, promoted to assistant sales manager of Westinghouse Broadcasting outlet, replacing **Ted Wrobel,** who resigned. Mr. Winther is succeeded by **Robert Hudson,** WBZ-TV's assistant advertising and sales promotion manager. **George Gaglino,** general services supervisor, transfers to advertising and sales promotion department as assistant. **Thomas Larson,** with Technical Operations, Burlington, Mass., research firm, succeeds Mr. Gaglino as general services supervisor.

**Dan Blume** joins staff of WBMI...
Walter Kingston, head of tv-radio division of UCLA's Department of Theatre Arts, resumes duties as host of Musical Milestones and Crossroads of evening music broadcasts on KFAC, Los Angeles, following eight-month leave of absence to serve United Nations in Israel.

Jim Ameche, veteran radio personality, signs with WHN New York to conduct Monday through Friday program, 9 a.m.-2 p.m., starting March 4. Mr. Ameche moves from KGBS Los Angeles, which like WHN, is Storer Broadcasting-owned radio station.

Mike Bradley named news director of KMEO and KQAL-FM Omaha. Both stations are owned by National Weekly Inc.

Jon Poston, formerly with news staff of KFEQ St. Joseph, Mo., named news director of KTIV (TV) Sioux City, Iowa, succeeding David Schoumacher, who resigned.

King Elliott, WBAM-FM Atlanta newsmen, promoted to news director, replacing Aubrey Morris, who resigns effective March 1 to become public information director of Fulton County Commission.

Fernando Traversari, noted matador, joins KMEX-TV Los Angeles as live commentator for station's Sunday night bull fights.

Harold Woolley, sales director of KCPX-TV Salt Lake City for past eight years and associated with station for 13 years, promoted to assistant general manager. Mr. Woolley will continue to serve as director of sales for KCPX-TV along with his new assignment of duties.

Siegmund Smith, one-time sports director of WGR Buffalo, KOGO-TV and XETV (TV) San Diego, joins staff of San Diego Congressman Lionel Van Deenrt as administrative assistant in Washington.

Robert C. Miller, director of news and sports for WOHJ-AM-FM East Liverpool, Ohio, joins staff of WMRN-AM-FM Marion, Ohio.

Charles Price, former news reporter with WMAM-AM-TV Macon, Ga., joins WFPG-TV Jacksonville, Fla., as news editor.

Gene Baker joins announcing staff of KCPX-AM-FM Salt Lake City.

Bill Fannin and Ted Lawrence join KXOL-FM Fort Worth as music hosts.

Lee Peer joins KGW Portland, Ore., as air personality.

Ben Grauer, commentator with NBC, appointed chairman of broadcasting committee for Salvation Army's 1963 appeal.

Al Jarvis, veteran disc jockey at KFWB Los Angeles, joins KEZY Anaheim, Calif., both as air personality, conducting his Make Believe Ballroom from 10 a.m. to 1 p.m. daily, and as member of KEZY management team.

Gerald Taylor, who joined CBS-TV promotion staff in 1956 and is manager of on-air production in New York, succeeds Daniel Taylor.

Keith Davidson, former writer-producer for Canadian Broadcasting Corp.'s tv network in Toronto, joins news staff of WTVP (TV) Miami, Fla., as reporter and cameraman.

Thomas Martin, newsmen who from 1956 to 1960 served as Southwest bureau chief for Time, Life and Fortune, joins KFCA-TV Amarillo, Tex., as editorial director.

Bob Gallagher, newsmen, named full-time state house reporter for WEEI-AM-FM Boston.

Sterling W. Wright, program director of WSOC-TV Charlotte, N. C., named client relations director.

Pat Williams, food publicist formerly with J. Walter Thompson Co., Chicago, appointed promotion and public relations director of WCKY Cincinnati, replacing Vicki Pigeon, who resigned. Mrs. Williams will also have five-minute women's program on station every Mon.-Fri. called News for Women.

PROGRAMMING

Martin Davis, director of advertising and publicity for Paramount Pictures, New York, elected vp of Paramount Film Distributing Corp. His jurisdiction includes all Paramount television activities and International Telemeter Co. Prior to joining Paramount in 1958, Mr. Davis was eastern director of advertising and publicity for Allied Artists Corp.

David I. Kelmenson, producer and director of tv commercials at Robert H. Klaeger Assoc., New York, where he was associate and senior vp, resigns to form his own production company. New firm, Kelmenson Productions Inc.,
VOA's Loomis cited

Henry Loomis, director of Voice of America of U. S. Information Agency, was given agency's highest award.

The Distinguished Service Award was presented to Mr. Loomis by Edward R. Murrow, agency director, during ceremonies dedicating 4.8 megawatt Voice of America transmitter installation at Greenville, N. C. (BROADCASTING, Feb. 18).

Citation reads: “For distinguished service, inspiring dedication to duty, and especially for his demonstration of remarkable foresight, knowledge and outstanding leadership in making the Voice of America a more effective instrument of national policy.”

is expected to concern itself solely with production of tv commercials. It's located at 75 W. 45th St., New York. Robert Drucker, vp in charge of Klaeger's west coast company, resigns also to join Don Fedderson Commercial Productions, Hollywood, as vp. Mr. Drucker, veteran tv commercial production executive, was formerly executive producer of MGM's tv commercial and industrial-film department. Robert P. Chenault, who joined DFCP last year, elected vp and studio production manager. Peck Prior, DFCP vice president, resigns.

Edward J. Pfister, writer in public information department of National Educational Television & Radio Center, New York, named to newly created post of information services chief.

Dick Wasson has resigned from new products division of Revue Studios to join Filmmways Tv Productions as writer-producer-director. His first assignment is to assist Paul Henning in writing scripts for The Beverly Hillbillies. Mr. Wasson had previously received co-writer credit with Mr. Henning when latter was producing Bob Cummings Show.

Charles Adams, tv director and producer, joins ATU Productions, New York, as producer of tv commercials and feature films.

EQUIPMENT & ENGINEERING

Robert B. Sampson, administrator for distributor finances at RCA, New York, appointed to newly created position of head of market development activity for distributor products of electron tube division in Harrison, N. J. Herbert Taber, administrator for marketing development at RCA, named manager of marketing research for electron tube division.

Bernard Wise, founder and former president of ITA Electronics Corp., Philadelphia, has formed new electronics firm, CCA Electronics Corp., Yeadon, Pa., which will specialize in "advanced-design broadcast and communications transmitters for world-wide distribution." Mr. Wise stated that arrangements for marketing his equipment internationally had been concluded with Telesco International, New York. Sales to U. S. broadcasters and to government are expected to be handled by staff engineers and manufacturers representatives.

John S. Kane, assistant director of operations for International Resistance Co., Philadelphia, elected vp of Reeves Soundcraft Corp., New York, and general manager of firm's magnetic tape division in Danbury, Conn. He succeeds Frank B. Rogers Jr., executive vp, who resigns effective March 9, but will continue as consultant to company. Mr. Kane is former vp and general manager of RCA Electronics, Sepulveda, Calif.

Paul W. Wheaton elected vp of Noble-Oak Ltd., Japan-based tv tuner producer which is jointly owned by Oak Manufacturing Co., Crystal Lake, Ill., and Teikoku Tsushin Ltd., Tokyo. N. Y., which is in consolidated proceeding in Dec. 14617-14621), to extent of (1) holding that hearing thus far held is nullity insofar as Genkar application is concerned; (2) authorizing petitioner to seek from chief hearing examiner new "time and place of hearing" and to thereafter effect required publication setting forth original issues and those added since date of hearing order; and (3) authorizing hearing examiner to admit by proper motion any previously submitted testimony subject to condition that rights of any interested persons be not prejudiced thereby, Action Feb. 13.

By order, commission granted petition by Ulster County Bestg. Co. and extended to March 6 time to file replies to exceptions to petition in proceeding reduce application and those of Catskills Bestg. Co. and amendment changes. By separate memoranda in proceeding on applications for new stations in Ellenville, N. Y., Action Feb. 13.

By order, commission stayed until March 3 effective date of its Dec. 17, 1962 order which revoked license of Mandan Radio Ass'n, Inc. and which ordered it to, on Feb. 17, cease operation of KBOM (1270 kc, 1 kw-LS, 220 w-N) Bismarck-Mandan, N. D. This was done at request of KBOM to avoid disruption of service. (Application by Capital Bestg. Inc. for cp for present facilities of KBOM was granted by commission by separate action subject to condition that rights of any interested person not prejudiced thereby, May 10 am freeze order.) Action Feb. 13.

By memorandum opinion & order, commission, on petition by Capital Cities Bestg. Corp. denied move mileage-separation requirement of Sec. 3.610 of rules and granted its application to move trans. of WTEM (ch. 16) Vail Mills, N. Y. from 0.7 miles northeast of city to about 31 miles from Beaver Dam Road, Helderberg Mountain, New Scotland (near Albany), increase vis. ERP from 14 kw to 28 kw, reduce ant. height from 1,270 ft to 1,000 ft., and make equipment changes. By separate memorandum opinion & order, commission took similar action on application of Van Curler Bestg. Corp. to move trans. of WAST (ch. 13) Albany, N. Y. about 33 miles south southeast of present location on Spruce Mountain to site about 12 miles north northeast of center of Albany (towards Troy), reduces horizontal distance, height from 1,250 to 1,210 ft., and add station to SCA. Petitions against both applications filed by Assn. of Maximum Service Televisors Inc. were denied. On above actions, Comr. Sowerby conferred and issued written opinion. Comr. Lee dissented and issued statement. Action Feb. 13.

Routine roundup

"By memorandum opinion & order, denied on exceptions filed in Bureau to enlarge issues in consolidated proceeding on applications of Tipton County Bestg. Corp. and Consolidated Tennessee Bestg. Inc. OUR RESPECTS to Robert William Dillon

You build listener loyalty by being loyal to people

The sequence of paintings of the Old West will catch your eye quickly as you enter the spacious office of Robert Dillon, vice president and general manager of KRNT-AM-TV Des Moines and the KRNT Theatre for Cowles Magazines & Broadcasting Inc. But Mr. Dillon will have to inform you they are only prints as he arms you with a hot cup of coffee before you are scarcely seated. He broke horses when he was young, the conversation discloses, and he's still a western buff.

Warm hospitality and frankness. These are midwestern qualities that Mr. Dillon generously applies to his own affairs and instills in his staff too. "This is the greatest organization you ever saw," he proudly states, explaining how all executives "double in brass" in each of the three media—radio, tv and theatre—and have learned their varied roles so well that "they could just about run anything."

Leadership • There is no secret to the system in Mr. Dillon's mind. You build listener loyalty through strong personalities and service features, good music, lots of news and community involvement. But this intimate people-to-people link of responsiveness, responsibility and respect must start right at the top internally. Management must set the example, he says.

There is no separation of functions between the KRNT-AM-TV staffs. Newsmen report for both radio and tv. Salesmen sell for both media. Radio personalities appear regularly on their own tv shows. "The inter-media motivation factor" is the term Mr. Dillon uses. It pays off handsomely with the audience, he explains, making KRNT folks "neighbors" all over the area.

Box Office Doesn't Lie • The KRNT Theatre, boasting 4,300 seats and chink to the world's largest legitimate house today, regularly presents everything "from grand opera to the Grand Ole Opry," Mr. Dillon says. "And they kid you not at that box office," he notes, citing lessons of audience loyalty helpful in radio-tv too.

Robert William Dillon was born July 6, 1905, at Adel, Iowa, a small farming community about 20 miles west of Des Moines. Growing up on the family farm is no snap for most boys because of the many chores to be done, but it sure has its compensations, Mr. Dillon recalls. Like fishing in Raccoon River or the many other streams near home. Or hunting ducks, pheasants and rabbits.

"A gun was an everyday thing around the farm," Mr. Dillon says. He learned to shoot well, too, winning a trap shoot when only 12. There were other sports interests during school and high school at Adel, including football, but as a student he also showed proclivity to writing.

All young writers must explore the outside world. So during the summer young Bob Dillon and his buddy took their car and followed the harvests—"we got clear up into Canada." The experiences were expanding but the money earned took more immediate importance. It helped him to study journalism for several years at Iowa State U. at Ames. He also helped pay the way by coaching boxing and wrestling at night at high school in Ames.

Media Salesman • When the hard economics of the day prevented him from finishing college, Mr. Dillon went to work for the Des Moines Register and Tribune selling classified advertising. Later he switched to the advertising staff of a Des Moines-based farm magazine, Wallace's Farmer, which ultimately went out of business during the depression. In 1935 he joined WOC Davenport, Iowa, as a salesman.

It was at WOC that Mr. Dillon's talents for showmanship came to life. The new medium of radio quickly taught him some basic principles of operation that have remained with him ever since. He soon discovered that "people are loyal to people" and that strong listener loyalty can be built by promoting the right personalities.

After several years at WOC, Mr. Dillon joined KSTP St. Paul-Minneapolis but this association proved to be brief. He was lured back to Des Moines by the Register and Tribune which wanted him to sell for KSO and KRNT there, both of which he was owned by the Cowles interests. His salesman-ship apparently was as good as his showmanship because by 1940 he was promoted to sales manager of the KSO-KRNT combination.

WAC Recruiter • Mr. Dillon was drafted shortly after Pearl Harbor and was enrolled in the officer candidate school for the Army Air Corps at Miami Beach. "I was probably the oldest second lieutenant in the business," Mr. Dillon recalls. After graduation he was assigned initially to public relations for the Eighth Service Command in Texas but later he was assigned to a variety of jobs. One such hitch was recruiting for the Women's Army Corps and he travelled the country armed with movies and sales presentations which he developed.

Upon release from the service Mr. Dillon returned to KRNT as general sales manager (KSO was sold by Cowles pursuant to the FCC's duopoly policy) and in 1948 he was promoted to his present position as vice president and general manager of both the broadcasting and the theatre operations there. Later he assumed the same executive responsibilities for KRNT-TV which took the air in mid-1955.

Mr. Dillon is not a joiner for the mere sake of association. When he does affiliate with a group he is an active worker, however, an attitude that he is always encouraging among the employees at KRNT. About a decade ago Mr. Dillon organized the Iowa Broadcasters Assn. through a mail campaign directed to his fellow broadcasters. He has served on the IBA board. Presently he is vice president of Des Moines' Junior Achievement.

Still Fishin' • Mr. Dillon married Mary Hayne of Des Moines in 1936. The couple had met while both worked for Wallace's Farmer earlier. They have no children. Mrs. Dillon joins her husband for the deep sea fishing trips he likes to take in the Caribbean or off the coasts of Panama or Mexico. They both share an interest in gardening.

With home located only 10 minutes from the office, Mr. Dillon starts early and often works late, going back after supper to check the theatre. Who wouldn't want to, Mr. Dillon asks. "This is the friendliest place you ever walked into."

Mr. Dillon
Hospitality and frankness

Don't underestimate Harris

We have a hunch (and enough evidence to encourage it) that Oren Harris' investigation of broadcast rating services will be lively, to say the least. As reported here last week, Rep. Harris, chairman of the House Commerce Committee and its new Subcommittee on Investigations, expects to begin hearings next month.

So far Mr. Harris has kept quiet about his intentions, although in private conversations he has hinted that he has interesting disclosures in mind. If memory serves, he said little about television quiz programs before his committee put Charles Van Doren on the stand and not very much about payola until witnesses began explaining how it worked. These historical references are not intended to suggest that Mr. Harris will find fraud among the rating services. He does have a knack, however, for turning up information that will catch the public eye.

Ratings are a subject that Mr. Harris has dealt with before. Indeed a thorough analysis of the major rating services was produced two years ago by a committee of research specialists appointed by Mr. Harris. The Madow Report (named for Dr. William G. Madow of Stanford Research Institute, the chairman of the special committee) found numerous imperfections in existing services but none serious enough to warrant sweeping changes.

The Madow Report was issued by Mr. Harris' own Commerce Committee in March 1961. We may only wonder what has come to Mr. Harris' attention since then to revive his interest in the subject.

Several months ago the major rating services signed consent judgments with the Federal Trade Commission to conclude an investigation by that agency. Under the judgments the services agreed to be more specific in describing the nature and probable accuracy of their reports, but there were no admissions or accusations of more serious nature.

Does Mr. Harris, or his staff, know something the FTC didn't find out?

For the moment we may only speculate.

Control by committee

BROADCASTERS would be well advised to approach with caution the proposal of the FCC to create a government-industry committee to stimulate growth of uhf.

If the past is prologue, one has only to look into the recent events in fm to discern the pitfalls of government intervention in an area in which it does not belong. Fifteen years ago another FCC went all out for fm, to alleviate the "scarcity" in aural broadcasting. It practically rammed fm down the throats of broadcasters. Many licensees felt if they didn't apply they might be subjected to sanctions. The upshot was that hundreds of am stations filed for fm.

In the succeeding 10 years many of these construction permits were turned back. There was little "market" for fm. The medium suffered because of government overstimulation. It was not allowed to develop in the give-and-take of free enterprise. Only now is fm coming into its own.

The interplay of competition was the answer, although the FCC recently has hobbled further development through imposition of a freeze.

The fear is that the fm experience might be repeated if government intervenes in the uhf development beyond the purely technical phases. The problems of uhf will predominantly relate to economics and programming and these can be no proper concern of government. It doesn't matter how many members the projected "Committee for the Full Development of Uhf Broadcasting" may have. The two gov-

ernment members—Commissioners Robert E. Lee and E. William Henry, who would be chairman and vice chairman—would prevail. They would bear the badges of authority. Lamentably, neither has shied away from control over programming.

The idea for the committee originated with the Electronic Industries Assn., which first vigorously opposed and then reluctantly accepted the all-channel receiver legislation to foster uhf's development. EIA cannot be blamed for wanting government and broadcasters to share responsibility if the public should complain about increased cost of all-channel receivers and if other troubles develop.

FCC Commissioner Frederick W. Ford, in dissenting, felt that by sponsoring such a committee, the commission departed from its proper role as a regulatory body to assume the function of a trade association in promoting a business. We agree.

The organization meeting of the proposed committee will be held in Washington March 12. Suggestions in advance have been solicited by the FCC. The best suggestion would be to keep this committee confined to purely technical matters.

20-20 hindsight

It is fascinating to compare the facts of television viewing with the assumptions eggheads make about the medium and its audience. An especially fascinating comparison in that line is now available with the publication of The People Look at Television, the massive study commissioned by CBS, conducted by the Bureau of Applied Social Research of Columbia U. and described in this publication last week.

This study charted the public's attitudes toward television in the spring of 1960. It found, not surprisingly, that the great mass of viewers at that time were at worst uncritical and at best extremely pleased and that those with better education and higher incomes, although somewhat more critical, tended to enjoy the same programs that the mass enjoyed. It failed to find any evidence of revolt against television.

These, as we say, are the facts—as uncovered in the deepest survey ever made of the television audience. It is interesting to contrast them with the appraisals of television that were being made at the time by critics, both professional and amateur. It was in 1960 that anti-television criticism was beginning the swell that reached flood tide in Newton Minow's maiden speech to the NAB in May 1961.

Now we know how few really thought that television was a wasteland.

"It's full of nickels, He's been telling his playmates we have pay tv!"
The stars shine (in color) every day on KSTP-TV's "TREASURE CHEST" SHOW

"TREASURE CHEST" Host Jim Hutton talks with NBC Star Mitch Miller during recent color show.

JOHN RAITT, PATRICE MUNSEL, TOM EWELL, JUNE CHRISTY, MITCH MILLER, VIVECA LINDFORS, JOHNNY MATHIS, GORDON MACRAE, CARLA ALBERGHETTI . . .

. . . these are a few of the famous guests who have appeared on "TREASURE CHEST" within the last month.

Now in its seventh successful year, TREASURE CHEST is produced in living color every weekday (12:20-1:00 pm) before an enthusiastic, live audience of 100 to 150 studio guests. Talented Jim Hutton who has emceed the show since its beginning dispenses prizes for audience games and contests and, of course, interviews the visiting guest stars.

The finest color facilities in the nation add prestige to this proven-successful variety show . . . the only one of its kind in this major market.

For information on availabilities, contact a KSTP-TV representative or your nearest Petry office.
In the 40's we saw radio explode out of living rooms into cars, pockets, shops, ships, offices and factories. We saw that radio would never be fully valued until "plug-out" audience could be measured. In 1950 we found a way so suitable it won us the American Marketing Association (N. Y. Chapter) award that year. And out-of-home has never been out-of-our sight since.

1962. Suddenly press, air and mail are filled with gurgles of discovery. "Radio is under-valued." "Why doesn't somebody measure the out-of-home audience?" "Let's try to attach a device to transistor radios." It's enough to evoke an immodest ad like this one.

But we're not concerned about pride of discovery. What we do want you to know is that Pulse regularly measures out-of-home in 266 markets, and reports the data to more than 1,000 agencies, advertisers and stations. Results are incorporated in each station's rating—not given simply as a total for the whole market. We can do this because we ask people at home, face-to-face, in personal interviews. They don't carry meters, diaries or phones around. But they do come home, where they can readily tell Pulse interviewers what they heard (and where) in the preceding few hours. So don't ask "Why isn't somebody measuring out-of-home." Instead, ask a Pulse a/e to tell you more about Pulse's 13-year-old out-of-home coverage, in radio and tv—or about other aspects of our expanding research service to marketers and broadcasters.

St. Louis takes entertainment as a basic of good living. With a long tradition as one of the nation’s entertainment innovators, the St. Louisan has an in-bred sophistication in his television selection. Meeting this taste-level is a challenge. Part of our response is:

The Steve Allen Show
10:15 p.m. Mon.-Fri.
and
Total Information News
6:00 p.m. Mon.-Fri.

Allen is entertainment for the sheer fun of it. Total Information News is for active viewing; news-films show the local stories. This selective programming blended with ABC’s line-up, reaches the selective St. Louisan—eager to enjoy, ready to buy.

See what’s on KTVI; the growing station buy in St. Louis!
From 4 to 6 pm in the Dallas-Fort Worth market, KRLD-TV, with 70,876* ADULTS per average quarter-hour in its viewing audience, leads its three competing outlets by substantial margins — 18,665 more adults than Station B, 25,508 more than Station C, and 52,363 more than Station D.

BROADCASTING, March 4, 1963
The first family

Bound to make headlines if FCC approves VHF drive-ins in eight markets will be application of group headed by Harry W. Bennett Jr., New York agency and pr executive and father-in-law of Sen. Edward M. (Ted) Kennedy (D-Mass.) for ch. 10 in Jacksonville. Tip-off came in society page report in Jacksonville that Bennett family will move from Bronxville, N. Y., to Jacksonville "for business reasons." He's slated to become majority stockholder in group to apply for ch. 10, proposed to be dropped in, with other stockholders principally local citizens, including one Negro leader. Mr. Bennett is minority stockholder in Veterans Broadcasting Co. (WROC-AM-TV Rochester, KTVE [TV] El Dorado, Ark.).

FCC did not consider eight-market drop-in proposals last week. Despite strong opposition from AMST, as well as UHF interests, there's still feeling that sufficient majority can be mustered to approve third station in these two-station markets but with provision for ultimate switch to UHF—possibly in seven or eight years. Besides Jacksonville, markets include Baton Rouge, Birmingham, Charlotte, Dayton, Johnstown-Altoona, Knoxville and Oklahoma City.

Move against beer, tobacco

Rep. Morris K. Udall (D-Ariz.) intends to meet this week with NAB and other broadcast officials to discuss possibility of ban on beer, wine and tobacco commercials before 8 p.m. Rep. Udall polled constituents and found "strong interest" in ban. Tabulation of about 5,500 replies shows 55% favor, 35% oppose, 10% have no opinion. Question was one of 20 in January questionnaire on broad range of legislative subjects. Rep. Udall says he is unsure whether he would introduce ban bill, but says he thinks "straws in the wind show a lot of people are not particularly happy" with some advertising of this kind.

Blue chip testing

In its first year RAB's Radio Test Plan has had nine major advertiser participants (currently running or completed) spending total of about $1.3 million to test radio's sales punch. This is word RAB members are getting in report from headquarters, which places RTP test business and does proof-of-performance research for which it collects 10% of RTP billings. This advertiser group, representing more than the $30 million per year in potential new radio business which is RTP's objective, consists of Eastman Kodak, Swift & Co., Brillo Mfg., Colgate-Palmolive, Continental Baking, Campbell Soup, Corn Products, P. Ballantine & Sons, and Burnham & Morrill. They've been testing radio for brands that hadn't used it. Dozen other papers reportedly are close to signing for try-outs representing estimated $1 million in test billings in next six months.

Writer's itch

Newton N. Minow is toying with proposals that he write book about his experiences as FCC chairman ("My Life and Times in the Wasteland"). One of several publishers that have expressed interest is Random House which is headed by Bennett Cerf, regular panelist on What's My Line? and chairman of judging committee that gave Mr. Minow Peabody Award last year. Mr. Minow has said he won't write book until he leaves FCC.

Color's extra kick

Fuller & Smith & Ross Inc., New York, is conducting long-range study of impact and effectiveness of commercials placed in color programs. Three surveys, with total sample of about 2,500 homes, have been conducted so far. One more later this year, will complete study. Results based on samples already taken seem to indicate commercials in color programs deliver much more attentive audience, whether spot itself is both in color or in black-and-white.

NBC eyes Wolper series

Strong contender for Monday, 9:30-10, one of few slots open in NBC-TV's 1963-64 nighttime schedule, is new pilot produced for United Artists TV by David Wolper. It's based on two-way-produced specials on Hollywood movie stars telecast by NBC-TV recently. Series, as being considered by NBC-TV, would spotlight filmdom "greats" in categories, such as gangsters (Edward G. Robinson, George Raft, Humphrey Bogart), "vamps" (Clara Bow, Marilyn Monroe, Theda Bara) etc. NBC-TV's current thinking is Wolper series would be logical sequence to feature films now slated 7:30-9:30 (see story, page 63).

Out of the deep freeze

FCC staff has recommended license renewal for some 30 far west television stations whose applications have been deferred because of questions about local live programming in prime time (Broadcasting, Dec. 3, 1961). Recommendation came up at commission meeting Friday, but no action was taken. Missing from staff's recommendation were some 70 other western stations whose renewals have been held up for same programming question. Inference is that staff feels these stations' performance requires further study. If commission does go along, these stations might receive additional letters of inquiry.

Stations recommended for renewal presumably made showing comparable to that of WKY-TV Oklahoma City and WFAA-TV Dallas. Both had been in trouble with staff because of alleged lack of local live programs in their schedule. However, their record convinced commission that policy of preempting prime-time shows for local programming could meet community needs.

Correspondence that curdles

FCC is about to learn that members of Congress recent getting FCC form letters signed "Ben F. Waples, acting secretary." Congressmen have received such replies from FCC to their inquiries about Rev. Carl McIntire (Broadcasting, Feb. 18). Several said they expect courtesy of reply by chairman and are indignant because form letters failed to discuss questions they had asked. Broadcast "sermons" of Rev. McIntire are being checked by FCC under "fairness doctrine.""
ABC Owned Radio Stations communicate with millions of people in six of America's major markets.

Who knows best what radio listeners want to hear? Listeners themselves. That's why the six ABC Owned Radio Stations listen so attentively to their audiences. As a result of this unique station-listener communication, each station is constantly aware of the problems and needs of the community in which it performs a vital communication's service. Whether it's a newspaper strike in New York, a commuter problem in San Francisco, the need for driver training in Pittsburgh high schools, a furor over increased Blue Cross rates in Detroit, the effects Chicago's medical research facilities have on patient care, or a means of informing Los Angeles residents of a new industry project, the ABC Owned Radio Stations respond quickly and effectively in order to reach the very heart of each of their communities... the people. Why? Because ABC Owned Radio Stations just don't broadcast... they communicate!

YOU MAY NEVER SEE THE BIGGEST SHOVEL*

BUT... WKZO-TV Scoops Up The Most Homes in Greater Western Michigan!

If you're digging for customers, you can unearth more of them with WKZO-TV than any other Michigan station outside Detroit. It's this way every day, every night, and every week!

It's all dredged up in NCS '61: WKZO-TV has weekly circulation in 456,320 homes in 30 counties in Western Michigan and Northern Indiana. And there's gold in these here diggin's: SRDS credits the area with annual consumer spendable income of well over four billion dollars.

Get the complete scoop from Avery-Knodel. And if you want all the rest of outstate Michigan worth having, add WWTV/WWUP-TV, Cadillac-Sault Ste. Marie, to your WKZO-TV schedule.

*A strip-mining shovel at Paradise, Ky., has a dipper with 115 cubic yards' capacity.
NAB BOARD ELECTION
13 win 2-year terms, including 6 incumbents

Six NAB Radio Board incumbents have been re-elected for two-year terms beginning April 3. They were board members who were eligible and who sought re-election.

In seven instances, new members were chosen because incumbents either were ineligible or chose not to run.

Election results, involving odd-numbered and at-large districts only, were announced by NAB Friday (losing candidates in parenthesis):

District 1—Carleton D. Brown, WTVL Waterville, Me., incumbent (Richard E. Adams, WKOX Framingham, Mass.).

District 3—Cecil Woodland, WEJL Scranton, Pa., replacing John S. Booth, WCHA Chambersburg, Pa., ineligible (Roy E. Morgan, WILK Wilkes-Barre, Pa., and Mrs. Jason T. Pate, WASA Havre de Grace, Md.).

District 5—Kenneth R. Giddens, WKRG Mobile, Ala., replacing James L. Howe, WIRA Fort Pierce, Fla., not candidate (Hugh M. Smith, WCOV Montgomery, Ala.).

District 7—Gene Trace, WBBW Youngstown, Ohio, replacing Hugh O. Potter, WOMI Owensboro, Ky., ineligible (Paul F. Braden, WPFB Middletown, Ohio).

District 9—George T. Frechette, WFHR Wisconsin Rapids, Wis., incumbent (Edward Allen Jr., WDOR Sturgeon Bay, Wis.).

District 11—John H. Lemme, KLTF Little Falls, Minn., replacing Odim S. Ramsland, KDAL Duluth, Minn., ineligible (N. L. Bentson, WLOL Minneapolis and Helen S. Duhamel, KOTA Rapid City, S.D.).

District 13—John J. Coyle, KVIL Dallas, Tex., replacing A. Boyd Kelley, KRRV Sherman, Tex., ineligible (Bill Dahlsten, KAWA Waco, Wendell Mayes, KBWD Brownwood and David H. Morris, KNUZ Houston, all Texas).

District 15—Hugh Turner, KTIM San Rafael, Calif., replacing B. Floyd Farr, KEEN San Jose, Calif., not candidate (Ellsworth Peck, KWWP Merced, and Ned Richardson, KPAY Chico, both California).

District 17—Ray Johnson, KMED Medford, Ore., incumbent (Lee Bishop, KORE Eugene, Ore.: Hale Bondurant, KIXI Seattle, Wash.: Lester M. Smith, KXL Portland, Ore.).

Class B Markets—William Schroeder, WOOD Grand Rapids, Mich., incumbent (Merrill Lindsay, WSOY Decatur, Ill.).

Class C Markets—Ben B. Sanders, KICD Spencer, Iowa, incumbent, (George J. Volger, KWPC Muscatine, Iowa).

$48 million in billings signed by NBC for fall

NBC-TV today (March 4) will announce business for next fall season representing more than $48.3 million in billing. Network said highlights include SRO for The Virginian and Dr. Kildare plus substantial orders for Richard Boone Show, Jack Paar Show, and buys in motion picture periods on both Saturday and Monday nights.

Sponsors include: Carnation, Procter & Gamble, Alberto-Culver, Miles Labs, Liggett & Myers, Bristol-Myers and Noxema in Virginian; all six current advertisers renewing Dr. Kildare; Reynolds Metals alternates-week in new Richard Boone Show; Miles Labs, Hertz Co., Speidel, Noxema and P. Lorillard in Paar; Brown & Williams, Warner Lambert and Scott Paper in Eleventh Hour; S&H Green Stamps for Andy Williams specials (BROADCASTING, Feb. 25) and R. J. Reynolds and Thomas Leeming Co. in movies.

Rep. O'Konski gets cp for ch. 12 in Hurley

FCC Friday (March 1) granted Rep. Alvin E. O'Konski (R-Wis.) construction permit for new tv station on ch. 12 in Hurley, Wis. Station will have proposed power of 1.7 kw.

Although Rep. O'Konski doesn't have any broadcast station at present, he formerly owned WOSA Wausau and WLIN (FM) Merrill, both Wisconsin. He also held construction permit for WOSA-TV, which was later deleted.

Rep. O'Konski represents 10th Congressional District of Wisconsin.

Penalty ‘too drastic,’ revoked WLOV-FM pleads

WLOV-FM Cranston, R.I., asked FCC Friday to reconsider order revoking its license (BROADCASTING, Feb. 4). Station said punishment—for alleged misrepresentations, technical violations and financial irresponsibility—was too drastic. Station also said commission had ignored FCC decisions in similar cases in which stations had been dealt with more leniently.

Short-term license given to KTVU(TV)

KTVU (TV) Oakland, Calif., which has been operating on construction permit since 1958, was given one-year license by FCC Friday. Commission said decision to grant short-term renewal stemmed from agency's dissatisfaction with KTVU's promise-vs.-performance record.

FCC released copy of letter to ch. 2 station which noted that commission, on Feb. 26, 1960, had questioned station about its performance compared to promises it made in comparative hearing. Letter also recalled that KTVU later amended its application to indicate it had "upgraded" its programming.

Quoting its decision in KORD Pasco, Wash., case (BROADCASTING, July 17, 1961), FCC said "licensee cannot disregard its proposals in the hope that he will simply be permitted to 'upgrade' when called to account." FCC added, however, that since KTVU's license application was filed three years before KORD decision, Oakland station should be treated in same manner KORD was—that is, be given short-term grant.

One of top officials of KTVU is William Pabst, chairman of NAB TV.

Sweeney goes out selling

Kevin Sweeney, who in nine years as RAB president earned reputation as 24-hour-a-day salesman, did nothing to tarnish that image in his exit from job.

Officially leaving as of close of business last Friday, he scheduled final appointment to make major radio presentation late Friday afternoon—to Leonard Lavin, president of big-tv-sporier Alberto-Culver. Lateeness of hour made it inevitable his last pitch would run well past normal business hours.

Mr. Sweeney, who gave notice almost year ago that he planned to leave RAB presidency on Feb. 28, plans to spend next few weeks at his home in California before announcing new plans.
The Embassy of Portugal

His Excellency Dr. Pedro Theotónio Pereira, Ambassador of Portugal to the United States, and Mr. and Mrs. Carlos Marques de Sousa, daughter and son-in-law of the Ambassador, in the entrance of the Embassy... another in the WTOP-TV series on the Washington diplomatic scene.
Universal TV Tape Recorder
The Basic Compact with Provisions for Adding PixLock, Cue, ATC and Color

The Universal model enables you to obtain in one compact unit very high standards of performance, reliability and interchangeability... at lowest cost. You buy this basic unit and add exactly what you want in the way of accessories to achieve your desired type of operation.

The availability of a complete line of accessories provides programming flexibility and operating convenience, making the TR-2 an excellent choice for many applications. Circuits of proved performance are utilized throughout. Transistors are employed where they do the most good in achieving materially improved performance and significant savings in space.

STUDIO AND MOBILE MODELS. The studio model is available in a single (3-rack) cabinet 70" wide, 84" high, and 24" deep. It requires less than 10 square feet of space. For mobile applications the TR-2 is housed in two separate cabinets each measuring 66" high, 24" deep, and 50" wide. Both models are designed for adding color.

ACCESSORIES. The wide range of accessories which can be integrated in the basic TR-2 include: Air Bearing Headwheel, PixLock, Picture Monitor, Waveform Monitor, Audio Cue Channel, Automatic Timing Corrector (ATC), Two-speed operation, and Color.

See your Broadcast Representative for complete details. Or write to RCA Broadcast and Television Equipment, Building 15-5, Camden, New Jersey.

Outstanding Features
- Lowest Priced Compatible Quadruplex Recorder
- Optional Two-Speed Operation
- Electronic Quadrature Control
- Designed for Adding Color
- Complete Line of Accessories

The Most Trusted Name in Television
DATEBOOK
A calendar of important meetings and events in the field of communications

*Indicates first or revised listing

MARCH

*March 4—House Communications and Power Subcommittee opens hearings on partial suspension of Sec. 315 in 1964 general elections.

*March 4—Hollywood Ad Club, Hollywood Roosevelt Hotel, Gail Smith, director of advertising and market research, General Motors, will speak on "Advertising in the Total Market Scheme."

*March 5—New York State Broadcasters Assn., annual dinner, Sheraton Ten Eyck Hotel, Albany. Dr. Frank Stanton, CBS Inc., president, is featured speaker.

*March 5—Start of Special House Subcommittee on Investigations hearings into radio and television rating services.

March 6—Assn. of National Advertisers workshop on tv advertising to discuss new techniques for testing commercials, allocation of media budgets, participation vs. spot announcements and predicting tv success. Speakers will be David Mahoney, executive vice president of Colgate Palmolive; Herbert Zeltner, vice president and media director of Lennen & Newell; Henry Brenner, president of Home Testing Institute and Eric Marder, president of Eric Marder Assoc. Hotel Plaza, New York.

March 7—California Broadcasters Assn., Mark Hopkins Hotel, San Francisco. FCC Commissioner Robert E. Lee to speak on "The Washington Scene—or-How to Keep Your License"; NAB General Counsel Doug Anello to discuss editorializing and CBA Legislative Counsel Judge James Garibaldi will report on the California legislature.

March 8-10—Annual Radio-Tv Conference and Clinic, U. of Oklahoma, Norman. It will be combined with the Seminar on Station Operations, sponsored by the Oklahoma Broadcasters Assn.

March 9-10—Oklahoma Broadcasters Assn. seminar on FCC rules and regulations, Oklahoma Center for Continuing Education, U. of Oklahoma, Norman. Speakers will include FCC Commissioner-designate Kenneth Cox and NAB Executive Vice President Vincent Wastlowski.

March 9—American Women in Radio & Television, Projection '63 workshop, 10 a.m.-12:30 p.m., tv wing, McCann-Erickson Adv., 485 Lexington Ave., New York.

March 11—Deadline for filing proposed findings in Grand Rapids, Mich., ch. 13 proceedings.

*March 11—Florida Assn. of Broadcasters' fifth annual Broadcasting Day, U. of Florida, Gainesville "Let Me Speak to The Manager" panel program at 2:30 p.m. at McCarthy Auditorium. Out-of-state participants are: Thomas H. Wall, partner in Dow, Lohnes & Albertson, Washington; Robert L. Heald, partner in Spearman & Roberson, Washington; Dr. Sydney Rosow, president of The Pulse Inc., New York; Melvin A. Goldberg, NAB vice president in charge of research, New York; William K. McDaniel, executive vice president of NBC Radio, New York; Robert C. Hitchins, director of sales planning for NBC, New York; Mike Shapiro, vice president and general manager of WFAA-AM-FM-TV Dallas, Tex.; Harold L. Kraftstein, president of Plough Broadcasting Stations, Memphis, Tenn.; and Sol Taishoff, editor and publisher of Broadcasting, Washington.

*March 12—Organizational meeting of newly formed government-industry "Committee for the Full Development of Uhf Broadcasting." Meeting will be held in Depart-
an informed electorate is WHL's business

L.I. Station Is Victor
In Fight to Crumble
Equal Access Bars

Another important victory has been scored in the equal access fight, being waged with increased force by the broadcasting industry, with the editorial backing of Radio Daily.

In Nassau County, Long Island, the seven-man Board of Supervisors yesterday reversed its policy of barring all radio, broadcast and recording equipment from public hearings. In December, Bill Nelson of WHLI, Hempstead, was banned from recording the proceedings of the public hearing on the proposed '63 Nassau County budget.

At that time, station president and general manager Paul Godofsky attacked the board for what he termed "a blatant disservice to the public and a denial of the people's right to know."

In reviewing their earlier decision yesterday, the board stated unanimously that broadcasts of its proceedings would be allowed in terms of giving the public full and complete information on activities of the county government through all media.

mental Auditorium, Constitution Ave. between 12th and 14th Sts. N.W., Wash., D. C.

March 12—Puerto Rico Assn. of Broadcasters, San Juan. Howard Bell, NAB vice president, will speak.

March 13—House Antitrust and Monopoly Subcommittee opens hearings on concentration of ownership in news media. FCC Chairman Newton N. Minow is lead-off witness.

March 13-15—Audio Engineering Society's West Coast spring convention, Hollywood Roosevelt Hotel, Los Angeles. Fin stereo broadcasting, disc recording and reproduction, microphones and earphones and audio applications in the space age are among topics to be dealt with in technical papers.

March 15—Louisiana Assn. of Broadcasters, Opelousas Inn, Opelousas.

March 15—Deadline for comments on FCC proposed rulemaking to allow daytime stations to go on the air at 6 a.m. or sunrise, whichever is earlier.

March 15-16—Institute of Electrical & Electronic Engineers, Pacific computer conference, California Institute of Technology.

March 17-19—National Assn. of Educational Broadcasters, Region III, meeting, Kellogg Center, U. of Chicago.

March 18—Extended deadline for comments in FCC inquiry into the objectionable loudness of commercial announcements and commercial continuity over am, fm and tv stations.

March 18—Reply comments to FCC's proposed fm allocations table.

March 20-22—National Educational Television and Radio Center, spring meeting of program managers and station managers of affiliated non-commercial educational television stations. Park Sheraton Hotel, New York.

March 22-23—Spring convention of Arkansas Broadcasters Assn., Sam Peck Hotel, Little Rock. Speakers will be Blair Vard, vice president and media director of Needham, Louis & Brorby and Roy Moore, special agent, Little Rock office.

March 22-23—Arkansas AP Broadcasters Assn. meeting, Little Rock.

March 23—Twenty-fourth annual convention of Intercollegiate Broadcasting System, New York University. This convention follows the IRTS conference, March 21-22.

March 26—Final date for the filing of applications for ch. 5 in Boston. Applications will compete competitively with present occupant WHDH-TV.

March 26—Board of Broadcast Governors hearing, Ottawa.

March 27—Eleventh annual Management Conference of U. of Chicago, McCormick Place, Chicago. The one-day conference is sponsored by the Graduate School of Business and the university's Executive Program Club. Charles G. Mortimer, chairman of General Foods Corp., New York, N. Y., will speak at the evening conference banquet on "Developing a Climate Conducive to a New Product."

March 29—Advertising Women of New York Foundation, World's Fair Ball, Grand Ballroom, Waldorf-Astoria Hotel, New York City. Cocktail service, 6:30 p.m.; dinner, 8:00 p.m.; dancing to Lester Lanin's orchestra from 8:00 p.m. to 2:00 a.m.

March 29-30—National Assn. of Educational Broadcasters Region 11 conference, Tampa, Fla. Program includes conference chairman in person, the speakers are William Henry, NAEB president, and Richard Hull, of Ohio State U., NAEB board chairman.

March 31—Assn. of Maximum Service Telecasters annual membership meeting, Conrad Hilton Hotel, Chicago.

March 31-April 3—Annual NAB convention, Conrad Hilton Hotel, Chicago.

APRIL

April 1—Deadline for comments on FCC proposed rulemaking to reserve ch. 39 in Allentown for tv use.

April 2—Premium Advertising Conference, conducted by Premium Brands Assn. of America, McCormick Place, Chicago. The theme of the conference, which is held in conjunction with the National Premium Buyers' Exposition (see above) is "Operation Greater Economic Growth Through More Productive Advertising and Sales Promotion."

April 3—Annual Conclave of Broadcast Executives Assn.; Richard F. Tomlinson, president of Food Products & Frozen Food Distributors; Daniel L. Goldy, U. S. Dept. of Commerce; and William Dunham, president of Premium Advertising Assn. of America.

April 5-5—Assn. of National Advertisers' West Coast meeting, Statler-Hilton Hotel, Santa Barbara, Calif.

April 6—American Women in Radio & Television, Projection '63 workshop, 10 a.m.-12:30 p.m., tv wing, McCormick-Erickson Ave., 405 Lexington Ave., New York.

April 6—Georgia AP Broadcasters Assn. meeting, Atlanta.

April 11—Seminar on radio broadcasting and community leadership under joint auspices of Southern California Broadcasters Assn. and U. of Southern California Dept. of Telecommunications, USC campus.

April 11—Deadline for reply comments to proposed FCC proposals.

April 17—Deadline for reply comments on FCC proposed fm allocations table.

April 18—Assn. of National Advertisers, workshop on international advertising, Hotel Plaza, New York.

April 18-20—Twentieth annual Alpha Ep- silon Rho convention, Hotel President, Kansas City, Mo. Delegation of students of broadcasting from 32 universities.
"My client's got a right to justice even tho' I'd rather punch him in the nose."

Abraham Lincoln Jones, Attorney-at-Law

The Law and Mr. Jones

Starring James Whitmore as Abraham Lincoln Jones, Attorney-at-Law

Co-starring Janet DeGore and Conlan Carter

Here is superior television drama, the generously humorous, sometimes explosive stories of an impulsive, forceful lawyer dedicated to the principal that the law is the foundation of our freedom. His concern is more for justice than for a lucrative corporate law practice.

Joining the regular cast of Janet DeGore and Conlan Carter are distinguished guest stars like Otto Kruger, Dick Powell, Lyle Bettger, Jean Hagen, Hugh Marlowe, Robert Middleton, Arthur Franz and others.

This series was so popular that when it was taken off the ABC network more than 400,000 letters of protest caused its return to complete its network run... an unprecedented event in the annals of TV history.

Now available on an individual market basis, 45 half-hour episodes of The Law and Mr. Jones.

"Proven-Programming" from Four Star Distribution Corp.

Also in distribution: The Detectives / Target: The Corruptors / Stagecoach West / Dick Powell's Zane Grey Theatre.
OPEN MIKE

No time for modesty

EDITOR: Hats off to Marshall Hawks who criticized the way New York radio and tv stations worshiped the struck newspaper workers (Open Mike, Feb. 18). The situation is no better in Cleveland where few reports were aired about the fact that the Cleveland auto dealers had the biggest January in history, despite the newspaper strike. Few reports were heard about the Cleveland Boat Show (a newspaper promotion) drawing the biggest crowds in its history in the middle of the newspaper strike.

Let broadcasters forget the papers, take the newspaper columnists off the air and promote radio—Joel Rose, program director, WCUE, Akron, Ohio.

(Story on how radio-tv rescued the Cleveland Boat Show was carried in that same Feb. 18 issue)

A case for radio drama

EDITOR: Maybe I’m living in the past, but I’m still looking forward to the day when I might turn on the radio and find a bit of drama. Drama is not out of place on radio if programmed in the right time period...

I talked with local merchants. Of 15 interviewed, 14 indicated a desire to advertise with prestige radio that offered drama.

Although each now spends most of his money in tv, they said they would turn more to radio if offered what they wanted. One would like to buy a 15-minute drama in the late evening for second-shift workers. Another indicated a desire to buy radio drama after midnight “when tv is off.”

These business men were not from the old school. One didn’t even remember The Shadow on radio. Even so he spends a large part of his ad dollars in radio.

What about ratings?... Soap operas in early afternoon would definitely draw the housewife who doesn’t have time to watch tv. The children’s program on Sunday morning is not to be forgotten. Sunday evening is a good place for radio drama.

Program it right and I say it will pay.

—John Stolz, Peoria, III.

‘Wallace’ still thriving

EDITOR: Your otherwise fine Our Respects on Robert William Dillon in the Feb. 25 issue was marred by reference to the “passing” of Wallace’s Farmer during the depression. This fine farm publication was founded in 1885 and has been going strong ever since. George R. Cook, for many years with WLS Chicago, is now president of Wallace’s Farmer.—Harold E. Flint, president, Harold E. Flint & Assoc., Fargo, N.D.

GREAT INSTITUTIONS

...characterized by creativity

THE ART INSTITUTE OF CHICAGO

KWTV OKLAHOMA CITY

KWTV-OKLAHOMA CITY Represented nationally by Edward Petry & Company, Inc.
We must view with profound respect the infinite capacity of the human mind to resist the introduction of useful knowledge."

THOMAS RAYNESFORD LOUNSBURY
(American scholar and educator, 1833-1915)

Well, maybe.

But a lot depends on how that useful knowledge is introduced. For instance, during the last quarter of 1962, NBC News specials presented in evening time covered such diverse actualities as the Cuban crisis, the Berlin Wall, and the world of William Shakespeare. These programs attracted an average audience of 7,800,000 families—an audience virtually as large as the average audience for all regularly scheduled nighttime programs.

It is clear that people today do not "resist the introduction of useful knowledge"—at least when it comes to them by way of special programs produced by NBC News.

It has been the custom to boast that factual programs attract small but select audiences. These audiences are still select, but for NBC they are no longer small. Potential sponsors may take note that more such special programs are taking shape at the network. For unlike Mr. Lounsbury, we at NBC "...view with profound respect the infinite capacity of the human mind." Period.

*Less than one rating point apart.
The computer is a tool—not a system

The computer is the hottest tool in the advertising business.

But like so many other things, everybody thinks it can do everything under the sun.

The truth is that in advertising, the computer is losing its perspective as a tool and is being talked about as a system—and it is not a system! It is a tool to be incorporated in systems.

And in conjunction with this, it's often asked in advertising whether or not computers can select the media combination for a most effective use of available advertising dollars, or is this process still a matter of judgment and experience.

This is an active area in simulation (simulation is a process in which an actual market situation is set up that simulates or gives a representation of the types of people to whom the advertiser seeks to sell).

A specific formula can be followed, as for example, x number of people of x characteristics, read Life. You know their income, where they live, the kind of clothing they buy and their general habits, and other details available in terms of media statistics.

Also let's assume that on the Dick Clark Show there's x number of people of a certain sex, in certain age brackets, who have certain disposable income, and who have certain interests, hobbies, etc. If one knows all these characteristics, one should be able to pump into a computer one's objectives for advertising, pump into that same computer all the demographic characteristics for Life and the Dick Clark Show.

And then one should come out with an answer as to whether it should be one-page black-and-white in Life vs. three spots on Dick Clark, etc.

Or it might be to use the show for the first three months, then cut it off; use Life for the next four months, cut that off, or use the show exclusively, or even not use either.

But you can't do it!

No Comparisons. There are no comparable media statistics to give you an answer in black and white. Comparable media statistics can be analyzed today—and various data of this type has existed for almost 20 years—usually by a media analyst who throws in that indelible factor known as judgment.

But computers can be programmed with judgment. Two advertising agencies are programming in a judgment factor, meaning they are nearly putting a media analyst into the machine.

His judgment, along with characteristics of a combination of media selections, is being put into the computer and the output is supposed to give the magic answer.

It isn't quite that simple, and even the agencies attempting the process stress the inherent limitations and the limited adaptability.

The further one can go with a computer is to eliminate "overlap and duplication" characteristics in the different media.

Obvious things, such as a high dollar expenditure for a low per-thousand relationship, can be eliminated, but beyond that the judgment factor becomes too highly subjective and the computer an inefficient tool for this relationship.

Where does Kudner fit in with the computer? Though some other advertising agencies have made substantial investments in computers in recent months, Kudner is not expected to.

At the present, we use the IBM Service Corp. and Simulmatics Corp. on a service fee basis.

We could not rent, nor could either of my agency colleagues, the number of models and facilities IBM Service, for example, already has made available to us. We can use any bank of computers, set of programmers at any time on the fee basis arrangement.

We have been using computers at the Kudner Agency for three-and-a-half years in making media analysis, modified market simulation, and special market tests.

We have used computers extensively in media analysis and market analysis for some clients, for others we have never used them.

The particular clients for whom we used computers had intricate problems, and also the basic research data required to make the computer an effective tool.

There are certain functions which computers can perform, and others they cannot. But how about the future—what can we expect from computers?

**Needed Information**

If we can get the following data we then through simulation could develop a marketing program by which we should be able to accurately determine media mix.

The information: Demographic media characteristics that are objective and upon which the whole industry can agree. The agreement must be among radio, television, billboard, magazine, newspaper advertising people.

And these statistics must be uniform and must describe the audience characteristics and all other necessary information that's involved.

It should then be possible to program a computer with full media data, marketing and advertising objects and budget.

As a result, one can develop the best possible combination.

I personally think this development is about 10 years away.

When it does come, it isn't going to be accepted rapidly. This is obvious. Somebody is going to get hurt in any one of these combinations.

Objectivity is going to be questioned. Marketing data, media data and advertising objectives—the objectives of the whole mix—will be questioned.

But question as they may, this is the path of the future. Rough or smooth, this is the road, the direction toward which we are now moving.

The computer is a tool that is going to become more important in advertising as each day passes.

It is a tool that we're going to get a lot more mileage out of, but this is a tool and not a system. Its major limitation is the subjectivity in advertising. But we are getting more objective about our subjectivity!

BROADCASTING, March 4, 1963
WESTERN ELECTRIC AND ITS BELL SYSTEM TEAMMATES

To help the Bell telephone companies serve their vast number of subscribers, Western Electric has major manufacturing locations in 13 cities, distribution centers in 34 cities, 17 installation areas and 4 systems equipment engineering headquarters. People? A total of over 140,000 men and women.

But it takes more than physical and human resources to do our job. It takes the Bell System’s special kind of teamwork.

Western Electric works closely with the American Telephone & Telegraph Company and the Bell telephone companies so that we can keep in constant touch with the changing needs of their customers.

We also work with the engineers of Bell Telephone Laboratories—who design and develop many of the products we make—to assure the high quality and manufacturability of these products.

Together, these Bell System teammates are constantly working toward their common goal of providing America with the best possible communications at the lowest possible cost.

We work best because we work together.

At Western Electric's Allentown Works, W.E. engineer Dave Ports (left) and William Moberg of Bell Laboratories examine a greatly magnified thin film circuit. This product is the result of Western Electric-Bell Laboratories teamwork...will help bring further miniaturization and more economical manufacture of telephone components.
“Operation Cutover” at Southern Bell Telephone Company is the culmination of months of cooperative work involving Southern Bell and Western Electric installers and engineers. These recently expanded facilities in Atlanta, Ga., will help serve the growing communications needs of the Southeast.

Bell Telephone Laboratories and Western Electric engineers worked together in perfecting this new cordless switchboard console which gives modern push-button convenience in a compact shape. A new console is examined by W.E. Planning Engineer Harold Haynes (right) and B.T.L. Design Engineer Robert Wirsching at Western Electric’s Indianapolis Works.

Research and Development on new products and techniques for the Bell System must progress at a rapid pace to keep up with America’s communications needs. To help achieve this goal, W. E. operates three Graduate Engineering Training Centers. Here, in a class at the New York Coliseum, instructor Frank Doyle discusses new developments in telephone circuitry.
movers and shapers of the
dynamic twin cities

Roy W. Larsen, president of the half-billion-dollar Twin City Federal Savings and Loan Association... Edwin William Rawlings, former 4-star Air Force general and now head of General Mills... Allen S. King president of the Northern States Power Company... These dynamic leaders, and dozens like them, have moved and shaped the vital Twin Cities of Minneapolis/St. Paul into a vibrant marketplace on-the-go. They make it move; they make it prosper. Instantly communicating with the moving and prospering Minneapolis/St. Paul audience are the Time-Life Broadcast stations, WTCN Radio and WTCN Television. The troubled business of broadcast audience research, already under fire from the outside, got a new jolt last week—from the inside.

On the eve of a new congressional investigation of radio and tv ratings services, President Norman E. Cash of the Television Bureau of Advertising issued a statement saying "refinement" of tv research tools and methodology is "overdue."

So far as could be determined, a congressional version of this same belief is one of the forces behind the ratings services hearings to be started tomorrow (Tuesday) by the Special Subcommittee on Investigations of the House Commerce Committee (Broadcasting, Feb. 18, 25; also see below).

Mr. Cash's statement, distributed for release yesterday (Sunday), was greeted by a wide range of reaction, from enthusiastic endorsement to mild agreement, indifference and, at the farthest extreme, a sort of derelict contempt.

The reaction also brought to light an inter-agency split in efforts already under way to get general agency agreement on the kinds of audience data needed for media buying decisions.

The research committee of the American Assn. of Advertising Agencies has been working on this problem for almost a year, not for television alone but for major media generally. In addition, it was learned, a group of major agencies who for the present wish to remain anonymous has initiated a similar or related consensus-gathering project.

'Mystery Group' - Spokesmen for each of these groups—the AAAA committee and the so-called "mystery group," which reportedly includes J. Walter Thompson Co. and McCann-Erickson authorities, indicated their respective jobs were nearing completion. A "mystery group" member expressed confidence that eventually his group's findings would be merged or meshed with those of the AAAA group.

The need for an agency consensus on audience-data requirement was a major part of Mr. Cash's plea. He tied his statement to the growing use of computers among agencies, the resultant demand by agencies for more and more demographic data on tv audiences, and what he called an urgent need for "a meeting of the minds" on which of this information is really needed and which is not.

He left no doubt, however, that he considered the problem bigger than that. He cited the Federal Trade Commission consent orders signed by A. C. Nielsen Co., The Pulse Inc. and American Research Bureau among other factors making "a meeting of the minds" urgently necessary. The need for immediate refinements in research techniques was No. 1 on his list of questions needing study.

Cash Proposal - His specific proposal: "An industry group made up of agencies, advertisers and the television medium, through an organization such as the Advertising Research Foundation, must work with the rating serv-

NAB, network executives lead parade of ratings witnesses

The House Commerce Committee Special Subcommittee on Investigations begins hearings tomorrow (Tuesday) to learn whether broadcast rating services do what they say they do and whether their findings are reliable.

NAB President LeRoy Collins, who has criticized broadcasters for their reliance on ratings without requiring checks on the services' competence, will be the first witness. He will be followed this week by representatives of all major radio and television networks.

The following persons had been named as witnesses at week's end: Thomas W. Moore, vice president, ABC-TV; Robert Pauley, president, ABC Radio; James T. Aubrey, president, CBS-TV; Arthur Hull Hayes, president, CBS Radio; Mort Werner, vice president of NBC-TV programs (replacing NBC-TV Executive Vice President Walter D. Scott, reported unavailable because of illness); William K. McDaniel, executive vice president, NBC Radio; Robert F. Hurleigh, president, MBS and Paul Rand Dixon, chairman, Federal Trade Commission.

Representatives of rating firms and other witnesses will be called in the weeks to follow. Their names will be released on a day-by-day basis to avoid "outside pressure," said Rep. Oren Harris (D-Ark.), chairman of both the parent commerce committee and the investigating subcommittee.

Long Preparation - Broadcast rating services have been under intensive subcommittee investigation for the past 18 months (At Deadline, Feb. 25).

Three major rating firms signed consent decrees with the Federal Trade Commission in January (Broadcasting, Jan. 7) and agreed their estimates were not infallible. Two subcommittee staffers, Rex Sparger and Bob Richardson, have interviewed several hundred persons who use and conduct ratings. Between September 1961 and December 1962 they wrote more than 4000 pages of confidential memorandum for the subcommittee and are known to have visited broadcasters, rating services, advertising agencies and advertisers in many cities including Chicago and New York (both many times), Philadelphia, Louisville, Tucson, Los Angeles, Milwaukee, Kansas City, Miami, Tampa, Oklahoma City and St. Louis.

Some broadcasters, it was learned last week, have been reluctant to talk to staff investigators. However, recent news stories in trade publications have brought forth several with information for the subcommittee.
RESEARCH BOMBED ON HEARING EVE continued

tices to determine:

1. What basic refinements in sampling and survey techniques must be made now to have more sensitive (research) tools.

2. What specifically is needed in the way of audience characteristics and what sample sizes will be required to meet the needs.

3. What it will all cost.

Mr. Cash added: “If these or similar steps are not taken before any additional audience-characteristic data are supplied by the rating services, who can possibly recognize the computers demand for this type of information?”

ARF Agrees • The Advertising Research Foundation was quick to agree with the TVB chief. A statement by ARF chairman Lyndon O. Brown, of Dancer-Fitzgerald-Sample, and ARF President Al W. Lehman said the foundation “agrees with Mr. Cash that ‘refinement of tv research tools and methodology is overdue’ and welcomes his suggestion wholeheartedly.”

The ARF leaders said a number of their committees had stressed the need for basic research and reported “a real need for a re-examination on an industry-wide basis of the determination and reporting of demographic characteristics.” They added:

“ARF would be glad to have an opportunity to participate since it recognizes its responsibility in this area. As the organization which has had the most experience in mobilizing impartial research experts, it is prepared to play an important role in any impartial research the industry desires.”

Most of the agency, network, and other radio-tv research authorities queried also indicated willingness to participate in a joint project of the sort prescribed by Mr. Cash. But some were more enthusiastic than others, while a few expressed doubts about the productivity of such an undertaking and one went so far as to suggest that TVB seemed to be “grandstanding for headlines.”

The principal hesitancy among agencies centered around a belief that the two projects currently underway, both inside and outside the AAAA, shortly will solve one of the major problems cited by Mr. Cash. They felt that his plan is not untimely but expressed a wish that he had held off a little while, until one or both of these projects is completed.

AAAA Study • The AAAA study is being conducted by the association’s research committee, headed by Donald Kanter of Tatham-Laird, Chicago, and a media research subcommittee under Bill Weilacher of Dancer-Fitzgerald-Sample, New York.

One major agency executive took the position that the need is not for “new” information but for an understanding of “how to use what we already have.” He said several agencies were participating in the so-called “mystery group” project and have made “copious progress.” TVB, he charged, has been turning “a tin ear” to what this group is doing.

Some broadcast station representatives contended, however, that agencies have shown little response to their pleas for clarification of what sort of information the agencies want from stations.

Radio’s Role • Several observers felt that Mr. Cash’s plan, cast in terms of television only, should be equally applicable to radio. It has been suggested that the increasing use of computers among agencies will be especially helpful to radio.

Edmund C. Bunker, who officially took over the presidency of the Radio Advertising Bureau last Friday, had this to say:

“Radio’s problem is different. We of course need an organized approach to the demographic material furnished for the computer age. But first we need better research. There’s no point in worrying about the color of the airplane before we design one that flies better.”

“RAB is working to stimulate better radio research that will be capable of measuring radio’s full size and at the same time will provide qualitative data necessary for the computer age. We regard this as the major need in radio today, although by no means the only answer to achieving accelerated sales progress.”

Lawrence Webb, managing director of Station Representatives Assoc., was one of those who thought TVB’s proposal should be as applicable to radio as to tv. Of Mr. Cash’s statement he said: “This is all just great, but what we need is action. If TVB can spearhead a conference such as this, we will be happy to participate.”

It was reliably reported that SRA has been quietly but methodically seeking some sort of agreement on computer-era research needs. Mr. Webb declined to confirm these reports, however.

There also have been other approaches to some of the goals singled out by Mr. Cash. It is known, for instance, that NAB research vice president Melvin Goldberg has conferred with research authorities of the networks and with leading rating services on the question of improving the services’ methodology. A report on these activities may be given in this week’s congressional hearing.

Among network experts, reactions to the Cash statement uniformly favored participation in any such cooperative study, but there was considerable concern about “what the agencies are going to do with all this audience data when they get it.” There was also some concern about “what they’re doing with what they already have.”

These reservations related to fears that agencies will overlook—or are overlooking—essential subjective knowledge “in their haste to fill these big machines with figures”; that they may “throw in everything they can get” without stopping to analyze what it means; or that they may sacrifice quality for quantity in computerizing mountainous piles of data.

There was a feeling, too, that the broadcast media already furnish more data about themselves than other media.

Some broadcast authorities questioned the extent to which some of the rating services break down their demographic information without increasing sample sizes. They felt that a sample that may be adequate to show total audiences and some audience-composition characteristics is not necessarily adequate—and may be inadequate—to show finer shadings of demographic information.

“I’m afraid,” one expert said, “that the services have tended to over-sell their resources in order to supply all the information the agencies are asking for.”

A spokesman for A. C. Nielsen Co., one of the leading rating services, offered this reaction to the TVB plan:

“We haven’t seen the actual TVB proposal, but it sounds like an interesting and constructive idea. Any plan which can help us to provide the industry with better local research, or make the industry more certain and articulate about its own research needs, deserves a try.”

Mr. Cash offered the services of TVB’s television research standards & practices committee to help implement
It's no accident that the shortest distance between the sell and the sale is the station your prospects believe in. Take over 40 years' broadcasting experience, add management and personnel with a keen sense of civic responsibility and you have one more reason why WFAA-TV is closest to the Dallas, Ft.Worth market.
Harper wants effect on buying measured

The subject of advertising research was approached from another direction last week by Marion Harper, board chairman-president of Interpublic Inc., who urged support by all media for a study in the field of advertising accountability.

Accountability, as used by Mr. Harper, refers to the determination of an advertising campaign's impact, not only in terms of numbers and types of people reached but also of its effect on the buying habits of those reached.

Over the past few years, Mr. Harper said, "the collective effort in this area is quite meager indeed." He noted that agencies have been reluctant to make commitments for such analytical measurements.

He discounted the school of thought which passes off the "accountability" thesis as a passing "fad." He suggested that more advertisers are aware of the need for more subtle measurement techniques but many still remain content with the measurement figures that the media and agencies offer them. Accountability, which is currently viewed as a "research cost," must achieve the status of an "advertising cost," Mr. Harper asserted.

Advertising, in general, will be less subject to skepticism, he said, when accountability research proves itself and the pinpointing of the effectiveness of an ad budget becomes an accepted reality.

Refinement of such methods will lead to new theories of advertising compensation, he predicted. One result which Mr. Harper envisions is that the rewards of advertising agencies will be commensurate with the success of their campaigns.

his plan. The committee is under the chairmanship of Martin L. Nieman of Edward Petry & Co.

Last summer the committee, then under the chairmanship of Don L. Kearney of Corinthian Broadcasting, got into an open squabble with ARB over ARB's plans to add audience age data to its local tv market reports (Broadcasting, June 18, July 2, 1962). ARB said its move was intended to meet "a growing demand" from advertisers and agencies, but the TVB group claimed it had found no widespread demand among agencies, at least not for this specific information prepared in this specific form.

The TVB committee then said it had found agreement among agencies on the need for more demographic data—but no agreement on what kinds of data are most needed.

In the statement last week TVB was again talking about local audience research, not national.

Agency and advertiser reliance on electronic-data processing equipment in reaching local marketing and advertising decisions, Mr. Cash said, has "greatly heightened demand for new research data." He continued:

"The computers are hungry for information, and agency requests for tv research data—of all sorts on a market-by-market basis—has mushroomed in recent months. The agencies are already being given a great deal of information, not available for other local media, on television's audiences, time spent, its reach among men, among women, among teen-agers, among children, etc.

"But they now want and ask for, individually rather than collectively, more demographic data such as income, family size, educational levels, number of children in the household, age breakdowns of individuals, even product consumption among television's audiences.

"Television has always led other media in meeting the needs of advertisers. It is a medium without peer among media in the scope and dimensions of its self-examination, its in-depth research. And television is well-researched for good reason. The more advertisers know about television, we have shown, the more they will use it.

In proposing an industry-wide study to sharpen the data-gathering process he said: "despite the scope and dimensions of television research . . . there comes a time when the research tools the agencies—and the industry—are using are just not fine enough."

Media men get reminder of radio story need

Edmund C. Bunker, who officially became president of Radio Advertising Bureau March 1, reminded media people last week of the "great comparative story" to be told about the "effectiveness of radio against other media." In support of his argument he pointed to the more than 200 million radio sets now in the U. S.

In a speech before the Jacksonville Advertising Club, Mr. Bunker iterated many of his plans for RAB which he had outlined earlier in a special interview (Broadcasting Feb. 18).

Essential elements of RAB policy emphasized by Mr. Bunker are: continued attention to "computer-consci-ous" research; publication of spot radio budget figures; increased efforts to sell agencies and advertisers on radio, and renewed attempts to develop ways of expediting the radio timebuying process.

Business briefly . . .

Purex Corp., through Edward H. Weiss & Co., Chicago, has added two more NBC-TV nighttime specials to its spring schedule: The Business of Gambling, Sun., April 28, 10-11 p.m., with Chet Huntley as narrator, and The Quiet Revolution, Fri., May 24, 10-11 p.m. Other NBC-TV Purex programs this season include The World of . . . series and daytime repeats of the Purex women's programs.

Sunbeam Corp., Chicago, has bought a special two-month campaign on ABC TV's American Bandstand, from March 4 through May 1. The campaign is for Lady Sunbeam hair dryers. Agency: Perrin & Assoc., Chicago.

Metropolitan Life Insurance Co. March 6 will sponsor CBS-TV's Where We Stand: Ten Years After Stalin (Wed., 7:30-8:30 p.m. EST). Agency: Young & Rubicam, New York.

John Morrell & Co., Chicago, producers of Broadcast canned meats, has begun a spot tv campaign mainly in the Midwest but covering other markets as well. The buy was described as a "long-range" drive by Geyer, Morey, Ballard Inc., New York, Morrell's agency.

Rep appointments . . .

- KSXX Salt Lake City and WBHP Huntsville, Ala.: Hal Walton & Co. as national representative.

- KBEA Kansas City, Mo.: Gill-Perna Inc., New York, as exclusive national representative.

Lockheed buys radio time

Lockheed Aircraft Corp., Burbank, Calif., beginning today (March 4) will sponsor a morning broadcast of science and engineering news on WGMS Washington, D. C., and KFI Los Angeles. The program will be called Lockheed Digest, and be heard on WGMS from 7:35 to 7:40 a.m. and on KFI from 6:55 to 7 a.m.

Lockheed Digest will feature Orval Anderson, science and engineering news analyst, and will be aimed at "work-bound engineers in government and industry." The company also said that the program will have interviews with "top military, industry and government leaders."
The South’s pioneer station extends deep and sincere appreciation to the Broadcast Pioneers and the entire industry for this distinguished award in recognition of WSB’s forty-one years of broadcasting service.
THE CREAM OF THE COMMERCIALS

Guinness Stout entry from England the best in tv, Boston ice cream commercial tops in radio, say IBA judges

The best tv commercial produced anywhere in the world during 1962 came from an English advertising agency and a French production firm, according to the judges of the third International Broadcasting Awards competition of the Hollywood Advertising Club. And the world’s best radio commercial was produced in Boston.

An animated spot for Guinness Stout with S. H. Benson Ltd. of London, the advertising agency, and Les Cineastes Associes, the production company, was given the IBA sweepstakes award as the world’s best tv commercial Tuesday (Feb. 26) at the IBA banquet. And a radio spot for Hood Banana Split ice cream, with Kenyon & Eckhardt, Boston, the agency, and Ace Recording of that city, the production house, was adjudged the best radio commercial of the year.

In the individual tv category awards, Spain surprisingly took three, all produced by Estudios Moro, Madrid. The “Galeria” commercial for Caldo Potax, whose agency is Publicidad Ruescas, Madrid, won the IBA trophy as the best animated spot of less than 60 seconds. The same agency’s spot for Cigarrillos Camel was voted the best combination live action and animation commercial, and a commercial for Sherry Tio Pepe de Gonzales Byass, whose agency is Publicidad Rasco, won top honors in the stop motion class.

Other foreign entries to win IBA trophies were the Guinness spot (best animation of 60 seconds or over) and a commercial for Macleans toothpaste, which got a special technical award for the best black-and-white photography. The agency was S. H. Benson Ltd., London; the production company, Guild Television Service Ltd., London.

Award-winning tv commercials created and produced in the U.S. were:

- Live action 60 seconds: Laura Scudder, a subsidiary of Pet Milk Co., for
Laura Scudder potato chips, Agency, Doyle Dane Bernbach, New York; production company, Elliot Unger Elliot, New York.

**Radio Awards** • All eight radio award-winners were American. In addition to the ice cream sweepstakes winner, which also was honored as the best humorous commercial of 60 seconds or over, the top radio spots were:

---

*Great Western Savings*  
*Ford Motor's 'Peanuts'*  
*Red Ball Tennis Shoes*  
*Olin Mathieson Research*
Mr. Sarnoff pointed out that "in the largest sense, the influence of advertising on broadcasting is expansive and not restrictive, because it makes possible the resources for all we do, sponsored or unsponsored."

Mr. Sarnoff, West Coast vice president of NBC, stated: "Whatever may be the specific goal of the advertiser and whatever vehicle he may choose to reach it, he must make certain that his message is directed there with optimum effectiveness consistent with good taste. The International Broadcasting Awards competition was devised to give proper recognition to this principle."

Art Linkletter served as master of ceremonies for the presentation dinner at which a dozen or more Hollywood celebrities, including Danny Kaye, Laraine Day and Robert Young did the presenting. Don Fedderson and Fred Brogger co-produced the program, with entertainment by Pat Buttram, Gisele McKenzie, John Conte, Randy Sparks and the New Christy Minstrels, with Paul Weston and his orchestra.

Agency appointments...

- National Oil Fuel Institute has appointed Fuller & Smith & Ross, New York, to handle national and regional advertising. Account, which has never had an agency before, will bill $500,000 annually. Media strategy has not yet been decided.

- Anderson, Clayton & Co. Foods Div., Dallas, has appointed Benton & Bowles Inc. as advertising agency for Seven Seas salad dressings, currently marketed in Chicago and Cleveland.

TvB 'Selectroniscope' to aid spot tv buyers

Agencies and advertisers may have their spot tv buying problems considerably lessened this spring with the publication of Television Bureau of Advertising’s "Selectroniscope 1001," an audit of the audiences and costs of spot tv.

Selectroniscope is designed to give the marketer information on timing of seasonal campaigns, heavy saturation campaigns, bolstering weak markets, launching new products, pre-testing national campaigns, concentrating on special audiences, counteracting competitors’ efforts and building local dealer cooperation.

TvB is accepting orders for the Selectroniscope, successor to the "Television Sampler" published five years ago by the organization. The Selectroniscope, with the "Rapid Computer," costs $10 and can be ordered through TvB, 1 Rockefeller Plaza, New York 20, N. Y.
And television's funniest program is really packing them in! ARB data shows The Steve Allen Show in first place, or tied for first, in markets like: Los Angeles (5 rating, 33% share in 7-station market) Pittsburgh, Kansas City (10 rating, 39% share in 3-station market), Baltimore, Washington (5 rating, 33% share in 4-station market) and Cleveland!

In fifteen markets surveyed by ARB in October and again in November, the average market showed a 30% increase in rating and a 21% increase in share of audience for The Steve Allen Show in a month's time!

Let us show you a sample of the series which Cecil Smith of the Los Angeles Times called: "wild, uninhibited fun"; fill you in on its outstanding rating performance; and present several other succinct reasons why The Steve Allen Show should be on your station. Interested? Get in touch with Al Sussman.

Source: ARB Reports, October and November, 1962. Average 30 min. rating in Steve Allen time period.
1962 tv billings topped $1.5 billion

TVB REPORTS SPOT WAS UP 17% AND NETWORK INCREASED 12.2%

Gross time billings in television network and spot totaled more than $1.52 billion in 1962, according to Television Bureau of Advertising.

Network totals, compiled by individual networks for the year, were released last week. TVB also announced fourth quarter spot totals and breakdown. An earlier report (Broadcasting, Feb. 18) by TVB had placed spot billing for 1962 at $712,212,000, an increase of 17% over the $617,398,000 in time billings in 1961. The network increase was 12.2%.

Spot tv gross time billings in the fourth quarter of 1962: $197,759,000. This represents an 11.2% increase over the previous like period on basis of dollar volume, and a 9.5% gain according to an analysis of the 313 stations reporting in both the fourth quarter 1962 and 1961.

Of the networks, CBS-TV recorded the greatest annual gain (16%), NBC-TV was next with 11.5% and ABC-TV had 7.7% more. The billing figures for both network and spot:

BROADCASTING, March 4, 1963
"Carroll...it really works!" WFMY-TV's Women's Director and her friend discover there's plenty of life... and water... left in the old pump yet, one of the many picturesque tourist attractions in the Moravian settlement of Old Salem, located near the center of modern Winston-Salem. From this early-day village, founded almost two centuries ago, came the beginning for today's vibrant Winston-Salem, North Carolina's third largest city and the world's largest producer of tobacco products, with a record 10 year payroll increase of 147%. WFMY-TV is now in its 14th year of bringing CBS and aggressive local programming to the Winston-Salem, Greensboro and High Point area, the largest metropolitan TV market in the Carolinas and the heart of our 51 county coverage area. WFMY-TV... it really works, too.

Represented nationally by Harrington, Righter & Parsons, Inc.

Gift Stars starts radio-tv test

Gift Stars Inc., Minneapolis, will start a test-market advertising campaign on radio and tv stations in 10 western states on April 1, to introduce its new gift coupon program.

Schedules on 62 radio and 21 tv stations will run for 10 weeks, 2 for a one-year, all-media test. Howard Wilson, advertising director of Gift Stars, said the new gift stamp program would invest about $500,000 in all media for the first two months of the one-year test. Gift Stars expects to spend a total of $20 million in introductory advertising over a period of time (Broadcasting, Oct. 22, 1962).

Gift Stars operates this way: housewives will buy products of manufacturers participating in the program. The shopper will save the coupons, which will be packed with the product, until she trades them in for free gifts.

Curtis L. Carlson, president of Gift Stars, noted the coupons do not compete with trading stamps. The coupons are designed to foster product allegiance rather than store loyalty, as in the case of trading stamps.

Gift Stars' introductory schedule, according to Mr. Wilson, is placed in a "controlled" test area: 21.5% of the total U.S. It covers all of Colorado and Utah, and parts of eight other states.

The schedule calls for a radio campaign of 30-60 spots per week per station, consisting of 1D's and minutes. The tv drive in major markets will consist of 20-25 spots per week total. Minor or tv markets will have 12-15 spots total spots per week. In tv, minutes, 20's and 1D's will be used.

Only one manufacturer in each product category will be accepted for participation in the new Gift Stars broadcast program.

Package designers should keep television in mind

Closer cooperation between tv commercial producers, advertising agencies and designers of product packages was urged by a panel of speakers during a meeting of the eastern chapter of the Package Designers Council in New York last week.

This suggestion was raised by John Lanigan, executive vice president, Videotape Productions of New York, and was echoed by other speakers. Mr. Lanigan claimed that many advertisers, though pleased with their commercial generally, often believe that their package "looks terrible" on tv. He urged package designers to consult with the commercial producers, to test the package on a tv monitor during exploratory and trial stages that a maximum effect can be achieved.

Other panelists expressed a similar view and claimed they did their best to make packages entertaining on tv. The panel also included William Duffy, senior art director, McCann-Erickson; Carroll Martin, art director, J. Walter Thompson; Lee Savage, art director, Elektra Productions, and John Murtha, Sandgran & Murtha.

Storm Adv. acquires Padco

Storm Adv. Inc. of Rochester, N. Y., and St. Louis has acquired the Padco Adv. Agency also in St. Louis. The Storm company said that Padco President Paul D. Kranzberg and Louis H. Enkelmann, vice president, will both become vice presidents of the Storm agency.

Storm said that other Padco personnel will also join Storm offices in St. Louis under the direction of Gerald P. Deppe, executive vice president. Office space in St. Louis has been expanded to handle new personnel, the agency said.

Campbell-Mithun unveils new offices

NEW MINNEAPOLIS LAYOUT FEATURES ‘TRAFFIC-LOOP’ SPACE DESIGN

Campbell-Mithun Inc. held open house in Minneapolis last week to show off its new custom-designed agency headquarters in the city’s equality-new Northstar Center, a $25-million office-hotel-shopping complex that is part of a vast downtown redevelopment program. Campbell-Mithun is part owner-investor in Northstar Center.

The agency has two-plus floors in the center with the office layout featuring an unusual traffic loop design. With Campbell-Mithun spending nearly one-half of its more than $50 million annual billings in the broadcast media (11% radio, 36% television, of which more than half is local spot), a key highlight of the new headquarters is the agency’s tv-radio production facilities, audition theatre and closed-circuit tv system.

Broadcast clients include Hamm’s beer, Chun King, Northwest Orient Airlines, Pillsbury, Malt-o-Meal, Bubble-Up and American Dairy Assn. among others.

Dubbed Campbell-Mithun’s “first” news conference since the agency’s founding 30 years ago, the open house event Monday represented the only time that insiders could recall that Raymond O. Mithun, co-founder and board chairman, has disclosed publicly the basic operating philosophy of the agency. Mr. Mithun emphasized that the most powerful force in the world of advertising and marketing is an idea. For this reason, he explained, computers or machine technology could never replace creative talents or substitute for human judgment.

Albert R. Whitman, Campbell-Mithun president, pointed out that while computers will assist in cutting down work detail, the “answers” that come out of the machines can never be any better that the quality of the data that is fed into them. The human judgment factor is constantly involved in evaluating this data, he noted.

An executive committee of the agency has been studying the application of computers to media selection and buying for more than a year. The computer center in the new headquarters presently is devoted chiefly to streamlining internal paperwork and administrative functions, but starting in April it will be used for experimental media application. New York consultant Ira Rubel is assisting the agency in development of computer uses, Mr. Mithun said.

Campbell-Mithun “has found great reward in working with tough-minded but fair clients,” Mr. Mithun said. The demanding client keeps both his people and those of the agency “on their toes,” he added. Their chief goal: helping clients grow. The result has been a sixfold growth in billing volume for the agency during the past decade, with 70% of this coming from clients already served.

“No one is going to make intelligent progress in our agency unless he has great innate desire,” Mr. Mithun said. The agency has long used an industrial psychologist to test employees’ qualifications, he said, but the one quality that can’t be measured “is the depth of fire in a man—the desire to win for a client.” While Campbell-Mithun demands this zeal of its people, it must be disciplined and in line with the “golden rule,” he explained.

Campbell-Mithun also believes in “pioneer ideas” which are joined together in a total marketing program to produce “cog wheel power,” Mr. Mithun said. As an example he cited how the basic theme of Hamm’s beer is expressed and reinforced throughout all major media as well as labels, trucks, point-of-purchase, menus, napkins, etc.

“We start with the creative idea decision first,” he explained, “and then we find the media.” However, Northwest Orient Airlines highly successful venture into saturation radio in 1958 with its “gong” commercial was an application of the pioneer idea to media, he indicated. Before that the airlines believed newspapers were the only way they could advertise effectively, he recalled, but the “gong” and radio combined to give Northwest high consumer...

identification in a new way.

Pioneer ideas as applied to marketing and advertising problems also can involve development of new products, unique product qualities, product improvement or new product use, Mr. Mithun said, as well as pricing, packaging, distribution, sales promotion plans, public relations and advertising. When products like bread and beer mature and competitive product differences lessen it is often the advertising innovations that spell the significant difference in consumer image, he noted.

Campbell-Mithun occupies both the 10th and 11th floors of the 16-story Northstar Center. Mr. Mithun's corner office off the 10th floor main reception lobby is the only one with outside windows. All other offices for the 350-some Minneapolis employees are inside units constructed of movable floor-to-ceiling metal acoustical walls.

These modules can be quickly altered to meet client requirements which always are changing, often on short notice. One wall of each office is ripple glass, facing the outside walkways circling the floors. Magnets hold shelves, pictures or working papers to the walls.

The traffic-flow concept of office layout and design was chosen after careful study of typical modern agency offices all over the country. Broadcast centers also were studied for ideas to incorporate in the tv theatre, studio, control and closed-circuit tv facilities.

Since the agency "product" is ideas, the office layout pattern involves "loops" flowing out from and back to a central hub. In the 11th floor creative department, for example, specific projects move from the single traffic-and-production center through the appropriate creative team and back again to traffic-production which is responsible for seeing that the work is done on time.

Another highlight of the "loop" involves placement of the research department next to the creative department since all ideas must begin with facts. This arrangement allows the idea flow to run from research through creative, into task-force conference, back to research for pre-testing and back again for post testing, the agency explained.

Campbell-Mithun's tv theatre seats 50 and includes both monochrome and color monitors. The closed circuit tv system feeds the theatre and six other locations within the agency. The master control center was custom built by Illinois Electronic Systems Inc., Chicago, midwest representative for General Precision Labs.

In one sub-level of Northstar Center the agency houses its library, data processing center, duplicating and mail services, telephone-teletypewriter center, creative kitchen and employe lunchroom.

Campbell-Mithun also has offices in Chicago, Hollywood and Baltimore and employs approximately 500 people to service the agency's diversified list of 42 different clients.

NAB's record questioned at conference

STATE PRESIDENTS ROAM WIDE AREAS DURING 2-DAY NAB MEETING

What kind of leadership is the NAB providing for radio and tv stations? Is the NAB effectively working to improve broadcasting's public image; fighting an FCC reaching for more and more pow-

er; coordinating activities of state associations? Is the NAB too weak? Does it actively and effectively stand up for the broadcasting industry?

These were questions raised from the floor and discussed spiritedly by delegates to the NAB's 8th Annual Conference of State Assn. Presidents in Washington's Shoreham Hotel last Tuesday and Wednesday (Feb. 26-27).

The controversial discussion centering around NAB President LeRoy Collins was put to the floor during a Wednesday morning roundtable discussion open to any subject. Over a dozen state presidents—some not members of NAB—spoke up, with pro and anti-Collins views about equally divided among those who entered the discussion.

Many, while defending Gov. Collins, asked the NAB for closer liaison with state groups and for action in specific areas.

Gov. Collins was not present and made no comment on the debate. He and the NAB were defended by panel moderator Vincent Wasilewski, NAB executive vice president; Howard Bell, NAB vice president for planning and development and conference coordinator, as well as several broadcasters.

C. Van Haften, of KTUC Tucson, and president of the Arizona Broadcasters Assn., broached the subject with an attack on the NAB's alleged lack of leadership without mentioning Gov. Collins by name. He charged the NAB leadership is weak and must be made stronger. It does not help individual stations and state associations and the NAB's public relations activities are unsatisfactory, Mr. Van Haften, whose station is not a member of the NAB.

---

Alvis H. Temple (l), WKCT Bowling Green and secretary-treasurer of the Kentucky Broadcasters Assn., explains a radio problem at the NAB conference to Rep. Walter Rogers (c) (D-Tex.), chairman of the House Communications Subcommittee, and FCC Commissioner Rosel H. Hyde.
“Yes, we deliver,” say Tom Garten1 and John Sinclair2.
“We deliver Charleston, Huntington and 72 counties!”

Supermarket Station WSAZ-TV delivers all of Supermarket (conveniently listed in data books as the Charleston-Huntington Market). Including its four-state four-billion-dollar payroll; its 2,302,000* consumers; its 495,700** TV homes; and its $2,011,372,000* in retail sales!

What’s more, WSAZ-TV is the only station that delivers Supermarket!

WSAZ-TV has the tallest tower and the lowest channel number. A perfect combination for reaching over giant mountain tops to TV antennas tucked deep in valley towns...to reach all of Supermarket all at one time.

And Supermarket TV fans are so loyal to WSAZ-TV. You see, with twin studios in Charleston and Huntington and correspondents in cities all over Supermarket, WSAZ-TV really serves the area. Now that you know how we deliver—and how much—how long can you afford to put off a chat with your Katz Agency man?

WSAZ-TV, Channel 3, an NBC Primary Affiliate, Division: The Goodwill Stations, Inc.

1. Vice President, General Manager, WSAZ-TV. 2. Manager, Charleston Operation, WSAZ-TV.

*SRDS (July, 1962) **ARB Coverage Study (Fall, 1960)
A congressman, a commissioner and a broadcaster discuss what's ahead for radio at the state president's conference: (l to r) Odis Echols Jr., general manager of KCLV Clovis and president of New Mexico broadcasters; Rep. J. Arthur Younger (R-Calif.), ranking minority member of the House Communications Subcommittee, and FCC member Frederick W. Ford.

Rep. William Avery (r) (R-Kan.), member of House Rules Committee which will sit for hearings on resolutions to remove the House ban on radio-tv coverage, gives the word on the subject to FCC Commissioner Robert E. Lee (l) and Joseph Baudino, Washington vice president for Westinghouse Broadcasting Co., at last week's NAB conference of state presidents.

charged. He said later that he did not know a reporter was present when he made his remarks.

NAB Reply - Mr. Wasilewski immediately answered the Arizona broadcaster and expressed regret that Gov. Collins was not present to personally reply. The No. 2 man at the NAB strongly defended the approach and activities of the association—which he said is faced with a changing government ever trying to exert more control over radio-tv. He maintained the NAB is fighting as vigorously as possible: "We have done our best to fight these government inroads," he said.

Later in the discussion and in answer to another critic of the NAB, Mr. Wasilewski said: "I'll be damned if I'll say that our staff isn't as good as the personnel at any trade association." The quality of the NAB's personnel is "the highest and all are dedicated to their jobs," he said.

Morton Henkin, KSOO Sioux Falls and president of South Dakota broadcasters, and Florida President Joseph H. Field Jr., WIRK West Palm Beach, both entered strong defense of the NAB and its president. "We should decide what we can do for NAB and not what NAB can do for us," Mr. Field said.

Mr. Henkin took the same position in criticizing state associations for not helping the national association more. "Before we complain about the leadership of the NAB, we should examine our own positions," he said. Answering earlier statements from state presidents that they had picked up nothing worthwhile from the conference to take home, Mr. Henkin said "I'm taking a whole lot of information back . . ." to South Dakota.

Not Wanted - Colorado President Bob Martin, KMOR Littleton (non-NAB member), said that he was instructed by his association not to invite anybody from the NAB to speak at the Colorado convention in June because "they are not interested in anything the NAB has to say." He charged that Gov. Collins is ineffective because he is not a broadcaster, never has been and never will be.

"He is going in one direction and we are going in another," Mr. Martin said. "I go home with the feeling that Gov. Collins is one of the nicest guys in Washington but if I sat down and talked to him, he wouldn't know me very well and I wouldn't know him when we finished talking."

Mr. Wasilewski invited Mr. Martin to meet with the NAB president, expressing confidence that afterward the Coloradan would change his opinion.

The New Jersey president, Fred M. Wood of WMVB Millville, agreed with Mr. Van Haafken's criticism.

RCA FIELD-MESH IMAGE ORTHICONS

FOR BLACK-and-WHITE TV

RCA-7293A, 7295A and 8093A are but three of RCA's broad family of Image Orthicons. For fast delivery of these and others in the line, see your Authorized RCA Distributor of Broadcast Tubes.

RCA's Family of 3" Diameter Image Orthicons for Black-and-White TV programming includes:

RCA-7293A—Field mesh type utilizing special anti-ghost design; recognized for its reduced edge effects and corner focus features.

RCA-7295A—Field mesh, anti-ghost type with wide dynamic range and high signal-to-noise ratio, making it ideal for tape recording with TV cameras designed for 3-inch diameter image orthicons.

RCA-8093A—Sensitive, high-performance tube for low-light-level broadcast quality black-and-white pickup where scene illumination is less than 10 footcandles and depth of focus conditions require operating the lens at f/8 or higher.

FOR FAST SERVICE ON THESE TYPES CALL YOUR RCA DISTRIBUTOR OF BROADCAST TUBES

The Most Trusted Name in Television
Sen. Hartke wants Sec. 315 ‘straitjacket’ removed

The grown-up, affluent and responsible broadcast industry has "had long enough to learn its obligations in the straitjacket of regulation and ought now be turned as loose as possible," Sen. Vance Hartke (D-Ind.) told the NAB's State President's Conference in Washington last week (see page 42).

Sen. Hartke made his remarks in promising to push for repeal of Sec. 315 of the Communications Act which requires broadcasters to provide equal time for all political candidates. However, he tempered his plea for freedom with a proposal for "continuous study of broadcasting operations without Sec. 315; closer government scrutiny of license renewal applications, and endorsement of the often-expressed position that the licensee holds a "valuable commodity" which belongs to the people and which he only borrows.

There is no reason why broadcasting laws should "shackle coverage of any campaign or any news for that matter," the member of the Senate Commerce Committee and its Communications Subcommittee said. "The final decisions on news value and coverage should be left to the experts in the newsrooms."

Noting that Sec. 315 was suspended in 1960 for the presidential campaign, Sen. Hartke said it's obvious that a law which "needs to be lifted in whole or part from time to time is not a good law. I think if the suspension can be afforded in the contest for the highest office in the land, it can be for all contests for all offices."

Sen. Hartke announced that he planned to reintroduce a bill he sponsored in the last Congress calling for the repeal of Sec. 315. Hearings begin today (Monday) before the House Communications Subcommittee on a bill to suspend equal time requirements during the 1964 campaign (see page 62).

Too Many Specialists • The senator said that too many radio stations are turning toward specialization in one type of programming to the exclusion of all other program varieties. "I certainly don't think it is necessary for a station to cater exclusively to devotees of rock-and-roll, long-hair music or anything else," Sen. Hartke said. "I prefer my news and public affairs to be varied with entertainment of various kinds."

No hard and fast rules should be passed on specialization, he said, in conceding it may be desirable in certain markets.

Sen. Hartke put in a kind word in the flight of daytime stations to get minimum hours of 6 a.m. to 6 p.m. If a high-powered station is going to claim "some kind of squatter's rights over a vast territory, it ought to be prepared to serve that vast territory and not just with entertainment or even news of national interest," he said. "I think the public service obligation grows with the area being served. After all, the commercial possibilities and the rates grow with the size of the area."

In his opening remarks, Sen. Hartke had high praise for the leadership provided broadcasters by NAB President LeRoy Collins. "The NAB is fortunate to have Gov. Collins as president," he said. "Everyone on Capitol Hill respects him and he has brought a lot of prestige to the industry."

dent from WCBS New York, said that while he did not subscribe to the anti-Collins sentiment, many upstate New York broadcasters have a low opinion of Gov. Collins' leadership of the broadcasting industry. This anti-NAB sentiment is the association's own fault, Mr. Slate said.

Mississippi State Sen. W. M. Jones, also vice president of that state's broadcasters from WCHJ Brookhaven, said that he had "apprehensions" about Gov. Collins until the NAB president made his speech before the Nebraska broadcasters attacking the Omaha TV hearing (Broadcasting, Jan. 28). "In the Omaha situation, I think he found his way out of the woods," Mr. Jones said.

'Confusion' • Another defense of the NAB and its president was given by Cleatus O. Brazzell, South Carolina president from WELP Easley. He said the national association has an able leader and that the industry is in a "state of confusion" because of heavy pressures from government. The state groups are not using the leadership offered by NAB, Mr. Brazzell said, and the states should take the lead in fighting government controls.

Hamilton Shear, WSVA Harrisonburg and president of Virginia broadcasters, had a different complaint. He said that the conference of state presidents had been unproductive as far as giving the state associations a common project to work for. "I don't have much to really take home and put the boys to work on," he said. He suggested the NAB, in future conferences, select three or four major projects and let the delegates select one or two for all states to push collectively during the year.

This brought several comments on what had been the major project discussed at last week's sessions. Mr. Bell said it was the mandate to work for freedom of information on the state level. Robert H. Williams, Pennsyl-
If you could choose the slot where your tax money goes...

you would probably pick defense, or space exploration, or some other vital government job. It isn't likely that you'd pick a job for which there is no need for government to spend your tax money.

Yet some people keep urging the federal government to pour a lot of your tax money into federally owned electric power plants and lines, where $5½ billion dollars are already invested.

There's not the slightest need for this kind of spending. The nation's more than 300 investor-owned electric light and power companies can supply all the additional power a growing America will need.

Needless spending of your tax money would be senseless at any time, but it's downright dangerous today when so many billions are needed for essential jobs only the federal government can do.

regulation, freedom of information hearings, the ratings investigation and hearings beginning next week before the House Antitrust Subcommittee on concentration of ownership in news media.

General Counsel Douglas Anello discussed the FCC and its "disturbing" encroachments into the freedom of broadcasting. He said the FCC made 2,366 inspections of radio stations in 1962, the highest number on record. During a question-and-answer session which followed, several complaints were made against FCC inspectors' actions at individual stations.

These were directed primarily against one alleged demand by an FCC field man for a station's checkbook, and inspections on Sundays. (The FCC said later the checkbook incident involved a request for check stubs to determine if the station employed full-time a first class engineer.)

Mr. Bell said that freedom of the press usually means freedom from government restrictions. He said the NAB has taken the lead in the fight for equal access because the public relies more on broadcasting for news and information than any other medium. He reported on the upcoming news media confer-

Changing hands...

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• WCCM, WGHJ (FM) Lawrence, Mass.: Sold by Mrs. Eileen M. Jaspert to Curt Gowdy for $325,000. Mr. Gowdy is a nationally known sports-caster, having broadcast the Boston Red Sox baseball games since 1951, and the NCAA Game of the Week and AFL football over ABC-TV last season. He lives in Wellesley Hills, Mass. WCCM, founded in 1947 by the late George H. Jaspert, operates daytime only on 800 kc with 1 kw. WGHJ operates on 93.7 mc with 1.35 kw. Broker was Hamilton-Landis & Assoc.

• WBBR-AM-FM East St. Louis, Ill.: Sold by Larry Picius to Paul Adams for $317,000. Mr. Adams is chief engineer of WCPX-TV Cincinnati. Mr. Picius owns WOBS Jacksonville, Fla. WBBR is a fulltime station on 1490 kc with 500 w daytime and 250 w nighttime. Broker was Hamilton-Landis & Assoc.

• KENO Las Vegas, Nev.: Sold by Maxwell Hurst and associates to VRA Enterprises for $275,000. VRA Enterprises is headed by M. D. Buchen, who is president of KNEZ Lompoc and KAVR Apple Valley, and is general manager of KRKD Los Angeles, all California. KENO operates fulltime on

ence with White House officials on freedom of information (see page 60).

Mr. Bell detailed the NAB's six-year fight against the American Bar Assn.'s Canon 35 barring cameras and microphones from the courtroom. He charged the ABA has not given broadcasting a "fair trial" and urged the state groups to take up the fight. He outlined a program to be waged by broadcasters on the local level to remove radio-TV from "second-class citizenship" in news gathering.

Successful Programs • During the Tuesday afternoon session, five presidents of state associations presented reports on successful projects in their states. Thomas C. Boscic, KIMA Yakima and president of the Washington State Assn. of Broadcasters, detailed successful efforts to win some of the state's legal advertising for radio-TV. He said $70,000 in 1962 had been channeled to radio-TV for advertising proposed amendments to the state constitution—money that formerly went into newspapers.

Jack Starke, WBAG Burlington and president of the North Carolina association, said his association "gained stature and prestige" through the establishment of a permanent office in Raleigh, the state capital. He explained many benefits through closer liaison with the state government and said that members' dues were raised from $15 to $100 to finance the NCAB activities.

NAB Radio Board Chairman William Schroeder (WOOD Grand Rapids), who also is president of the Michigan association, explained a college training program to be started in his state next month. College students from three state universities will spend 10 weeks at participating stations, he said, to work in all phases of radio-TV operations. The students will be paid $50 weekly and will receive college credits while detailed to the stations. Emphasis will be placed on management spending considerable time with the students, Mr. Schroeder said, and they "will not be used as mimeograph operators or janitors." He said the student program was started because of a feeling the top college students were not turning to broadcasting for careers and those that did were not properly trained.

Don C. Dailey of KGBX Springfield and president of the Missouri Broadcasters Assn., said that broadcasters in his state had tapped $100,000 in advertising from non-profit groups by establishment of a central billing system. Through this system, for the past 10 years Missouri stations have received revenues normally devoted to print media, he said. MBA will not place advertising for regular commercial accounts and retains the regular 15% commission for its services to stations, he said.

He said the association employs a full-time lawyer and legislative expert in addition to an executive secretary and started charging members dues only last year, operating for nine years on commissions from the non-profit advertising.

Jack C. Michael, president of the Tennessee Assn. of Broadcasters from WREC Memphis, explained three successful state-wide promotions of TAB. These included scholarships, high school speech and drama leagues and a 1962 campaign on behalf of state parks. The latter drive resulted in an increase for 1962 of $90,000 in attendance at state parks, he said.

Who Makes Rules? • Charles Stone, manager for the NAB Radio Code, urged the state association heads to join and support self-regulatory efforts with this warning: "help make the rules or be ruled" by government.

"The industry must become convinced that lashing itself to the wheel of its own ship to avoid being washed away by the force of outside elements" makes good sense, Mr. Stone said. The tenets of the code were conceived for the betterment of radio, he said, and

1460 kc with 1 kw. Broker was Wilt Gunzendorder & Assoc.

• KAVE-AM-TV Carlsbad, N. M.: Sold by Ed Talbott and associates to John Dome for $250,000. Mr. Dome owns WINF Hartford, Conn. Mr. Talbott and group retain ownership of KROD-TV El Paso, Tex. KAVE is a fulltimer on 1240 kc with 250 w. KAVE-TV operates on ch. 6 with 11.7 kw. Broker was Hamilton-Landis.

• WKLC St. Albans, W. Va.: Sold by Raymond I. Kandel to D. L. Rike & Co. for $91,000. Rike company is an investment house in Toledo, Ohio, and owns WOHF Bellefontaine, Ohio. John J. Cote is president of the buying group. WKLC is a daytimer on 1300 kc with 1 kw. Broker was R. C. Crisler & Co.

• KILE Galveston, Tex.: Sold by David Nathan and associates to Radio Galveston Inc. for $165,000. Radio Galveston is headed by Frank Jumell of Lubbock, Tex. KILE is a fulltime 250 watter on 1400 kc. Broker was Hamilton-Landis & Assoc.

• WARN-AM-FM Fort Pierce, Fla.: Sold by Randolf Compton and group to Charles Amory for $117,000. Mr. Amory is with Wesley Assoc., New York advertising agency. Mr. Compton's group retains WKDN Camden, N. J. WARN operates fulltime on 1330 kc with 1 kw day and 500 w night. WARN-FM is on 98.7 mc with 1.3 kw. Broker was Hamilton-Landis.

**ATTRACTIVE STATION BUYS!**

**EAST COAST—**Network affiliated VHF-TV station operating in the black. Good physical facilities. Total price of $650,000.00 on terms to be negotiated.

**FAR WEST—**Excellent power, daytime-only radio station serving marketing area of 200,000. Heavy fixed assets. Grossing $78,000.00 monthly and capable of doing much better. Priced at $175,000.00 with $50,000.00 down and balance over ten years.
'Qualified broadcaster' wanted on FCC

Appointment of a "qualified broadcaster" to the next available vacancy on the FCC was urged last week in a petition to President Kennedy adopted unanimously by the delegates to the NAB-sponsored Conference of State Broadcasters' Association Presidents.

The resolution was entered into the Congressional Record by Sen. Jennings Randolph (D-W, Va.) and sent to members of Congress in addition to the President. It states: "The undersigned representatives of State Broadcasters' Associations gathered at the Eighth Annual Conference of State Association Presidents do respectfully call to the attention of the President of the United States that none of his appointees to the Federal Communications Commission has been a person with special training and experience in the broadcast profession.

"The need to maintain a sense of balance, and, for broad expertise in the regulation of this vitally important medium of communication, makes it advisable and desirable that serious consideration be given to the appointment of a qualified broadcaster to the next vacancy that occurs on the Federal Communications Commission."

they were motivated by a desire to be of greater service to all interests of broadcasting.

"We must remain in a position to make our own standards and change them when circumstances change—as opposed to having them made for us, which rules may or may not change regardless of circumstances," Mr. Stone said.

Glenn B. Sanberg, executive vice president of the American Society of Assn. Executives, told the state presidents that voluntary associations of trade and professional men could hold the key to meeting the challenges facing the world. He said trade and professional groups must stir from their lethargy. "It’s about time that we stood up on our hind legs and started talking about the things we’re doing to lift the level of living in America," he said. "I think we've been sleeping too long."

The conference concluded Wednesday afternoon with a meeting of state association executive secretaries presided over by Jack Williams of the Georgia Assn. of Broadcasters.

Over half the states indicated that they now have fulltime executive secretaries and many of the remainder announced plans to obtain secretaries in the future.

Highlight of the conference was a Tuesday evening reception and buffet supper hosted by Gov. Collins and the NAB. Among the guests were 25 U. S. senators, 60 congressmen and six members of the FCC. Sen. Vance Hartke (D-Ind.) urged repeal of Sec. 315 of the Communications Act in a luncheon address (see page 46).

COLOR ON BLACK-AND-WHITE SETS

Stations use special systems giving tint illusion

Television viewers in six major markets are seeing color on their black and white sets. It's no gag, it's true.

A method of impressing an illusion of color on monochrome receivers is being used on all five of the stations owned by Storer Broadcasting Co. (Atlanta, Cleveland, Detroit, Toledo and Milwaukee) and by Taft's WKRC-TV Cincinnati.

The system, which makes use of a special complex preparation of video tape, shows up as pulsating diagonal lines covering about one-third of the TV screen. In the center third of the screen a regular black and white commercial is used. The outer third of the screen remains in a "black" condition.

Both Storer and Taft, with other stations and advertising agencies evincing serious interest, are using an Austrian invention licensed in the United States to General Television Network, Ferndale, Mich.

General Television Network is a subsidiary of Meilink Steel Safe Co., Toledo, Ohio. Meilink, one of the largest steel safe makers in the country, also manufactures large screen TV projectors. General Television Network was established five years ago to handle commercial and program production and closed circuit production. It is one of the largest TV production service organizations in the Midwest, according to sales manager John Mayer.

Not Color TV - General Television, Storer and Taft emphasize that the "color effect" process is not a substitute for regular color TV. This is stressed in all on-the-air and newspaper announcements.

Theoretically it is possible to use the system in a slide series, for commercials or for cartoons, Mr. Mayer says.

Noting that the process is being used now as an attention getter only, Bill Michaels, Storer vice president, added: "I personally don’t think it will develop much beyond the slide or limited animation use for quite some time, if ever."

But, he added, the color effect may stimulate viewers to think about regular, full-scale color TV.

Viewers are urged to use normal lighting in their viewing rooms, and to increase contrast and reduce brightness. This makes the color effect more vivid, it is said.

Users must submit their art work to General Television Network, Mr. Mayer said. It is then transferred to TV tape using the unidentified patented process.

GEL offers 'Autolog' to stations

A new system for the automatic recording of transmitter data has been introduced by General Electronic Labs Inc., Cambridge, Mass. The "Autolog" system appears to meet the new ruling by the FCC allowing automatic logging of transmitter readings, according to GEL (Broadcasting, Feb. 25).

Four to nine strip-chart recording channels are available for remote or local use. Recording of parameters for plate voltage, plate current, antenna current and carrier frequency are provided for on 31-day strip chart rolls.

A working Autolog system was first demonstrated by GEL at the 1962 NAB convention.

Accident delays KAIT-TV

There has been a "slight delay" in getting KAIT-TV Jonesboro, Ark. on the air.

The 525,000 antenna for the new ch. 8 television station fell to the ground as workmen were positioning it atop the station’s 300-foot tower. No one was injured and station manager, Rubin Masters, said the delay would be slight. KAIT-TV is expected to begin telecasting within 60 days.

Color on black and white TV
Who has a recorder to fill every broadcast need?

Ampex offers the widest selection of professional broadcast recorders today. Each providing superior performance. Each providing maximum reliability. There's the Ampex 351, standard of the broadcast industry. The Ampex 352, reproducer for monophonic or stereophonic sound. The Ampex 354, recorder/reproducer designed for stereophonic sound. The Ampex 601, professional quality portable recorder/reproducer. The Ampex PR-10, suitcase-size recorder/reproducer with capabilities of a studio console. And the Ampex 3200 duplicator, master/slave combination for high quality tape duplicating at low cost. Most Ampex recorders have stereophonic versions. The 350 and PR-10 Series offer 4-track playback. All are dependable, flexible, easy to operate. And all carry the Ampex "Four Star" one-year warranty. Ampex also makes 600 series professional tape noted for long life and constant performance. For more details write the only company providing recorders, tapes and memory devices for every application: Ampex Corporation, 934 Charter St., Redwood City, California. Sales and service engineers throughout the world.
Do the critics understand television?

TIO’S DANISH CALLS FOR MORE KNOWLEDGE OF MEDIUM

The nature of criticism directed against television, the shape of television itself and perhaps the future of the American people may be determined by the extent to which the critics and public understand how television works.

This view was advanced by Roy Danish, director of the Television Information Office, in a speech urging participants in the Western Radio & Television Conference, held Feb. 21-23 at Los Angeles, “to join forces with the broadcaster to improve people's understanding of the medium—of all mass media, for that matter.”

“I would like, in fact, to enlist you as staff members of TIO,” Mr. Danish said. “Your assignment is to ferret out the hard-core critic who would rather be vehement than informed, and to convince him that his first obligation is to know the score, and his second is to attempt, at least, to make a positive contribution if he expects to be taken seriously.”

Talk of “improving television,” he said, must take into account television’s nature as a mass medium, its need for mass audiences in order to survive and in order to reach them with programs of the type demanded by people “who are concerned with raising the sights of our society.”

“The state of television in the future,” Mr. Danish said, “may well be determined by the extent to which its viewers understand the medium and demonstrate that understanding through discriminating use and thoughtful, helpful criticism.

“The other half of the equation concerns the viewer, not the medium, and is perhaps even more significant. It says that much of what we learn and think about and feel comes to us by means other than the printed word and that the uses we learn to make of television, the shape we help it assume, may well determine what in the long run will become of us—as individuals and as a people.”

No Drop • There would be no let-

down in public service programming on the commercial TV stations of Los Angeles, should an educational TV station enter the area, a panel of station managers and program directors told the conference.

The broadcasters reported on the variety of public affairs programming they are already presenting and asked the educators in the audience to let them know what they’d be interested in seeing that is not now on the air. Somewhat bitterly, they cited the research finding that the intellectuals who criticize TV the most are usually those who watch it least and urged parents, teachers, ministers and newspaper critics, anyone who can influence the viewing of others, to support the good programs as well as condemning those they do not like.

Panel members included the managers of the three Los Angeles network-owned TV stations: Bob Wood, KNXT (TV); Tom McGrav, KNBC (TV); Elton Rule, KABC-TV; Mal Klein, manager of KJH-TV, with no network affiliation; Jack Brembeck, public affairs director, KABC-TV; Howard Sturm, public affairs manager, KNBC; Leon Drew, program director, KNXT; and a lone representative of radio, Harfield Weedin, program director, KNX.

IOWA STATE NETWORK FORMED

WOI Ames, Iowa, owned by Iowa State U., has formed a new 18-station statewide radio network—the Iowa State University Radio Concert Network. The programs aired by the network, which will broadcast on a twice-a-month basis until July 1, will consist of concerts by Iowa State organizations taped on campus.

The first concert, featuring the symphonic band, has been distributed for broadcast at the convenience of member station directors in the network area: KFGO Boone, MRB Burlington, KJIB Marshalltown, KSIB Creston, KDPS (FM) Des Moines, KWMT Ft. Dodge, KCHE Cherokee, KBWB Boone, KROS Clinton, KMCD Fairfield, KGLO Mason City, KCMC Carroll, KCUJ Pella, KRIB Mason City, KWAR (FM) Waverly, KCFD Ft. Dodge, KWWL Waterloo, and KDKN Denison.

NEW CBS RADIO SPOT OFFICE

CBS Radio Spot Sales is opening a new office in Philadelphia today (March 4) to be headed by Gene Myers, sales manager. It is located at City and Monument Avenues, Philadelphia 31. Telephone number is Tennyson 9-7000. Mr. Myers has been with CBS Radio Spot Sales for 10 years in Chicago, St. Louis and New York. In his new post, he will cover the Philadelphia-Baltimore-Washington areas.
To paraphrase the old “Don’t-look-now,—BUT” admonition, urgency compels us to say: DO look—BECAUSE this year’s NAB Convention is almost at hand! March 31-April 3.

As always, it will attract an attendance from all segments of the broadcast advertising business...and an attention from TV and radio executives in every corner of the nation.

As always, too, Broadcasting Magazine will serve this widespread interest with three of the most heavily-read issues it publishes each year: (1) pre-Convention on March 25; (2) during the Convention, April 1; and (3) post-Convention, April 8, rounding up everything that made news.

To accomplish this with the authoritative completeness that only Broadcasting can, a full-scale news room is being set up in Chicago—staffed with a dozen of Broadcasting's most experienced editors, equipped with direct lines to the Broadcasting headquarters in Washington. These facilities (more extensive than those of all other TV-radio journals purporting to cover the Convention) assure Broadcasting readers of thorough reports on every meeting, every committee session, every social affair. They’ll probe out the trends and tenor of the Convention, its unexpected developments, underrcurrents, and color. Skillfully edited, the result is the most authentic, comprehensive panorama of NAB’s 1963 conclave anywhere—and indispensable as a guide to what’s happening.

It adds up to a triple-barreled opportunity, too, for anyone with an advertising message that’s aimed at TV-&-radio’s busiest decision-makers. You get the year’s biggest bonus of attention with each of these three big issues, and at no increase in rates.

If you haven’t reserved your space yet, this is the hour to get cracking! It’s only days to deadlines—so wire or phone the nearest Broadcasting office today. 27,000 circulation.
Kennedy congratulates WSB on 'Golden Mike'

WSB Atlanta received the Mike Award, a gold-plated ribbon microphone, and radio-tv got a tribute from the President of the U. S. last week.

The award was presented at a banquet in New York at which FCC members and prominent broadcast executives helped make up a total attendance of more than 1,000.

Station executives honored included James M. Cox Jr., board chairman of James M. Cox Stations, and J. Leonard Reinsch, executive director; Frank Gaither, WSB general manager, and Marcus Bartlett, WSB-TV general manager. Cox stations also include WHIO-AM-FM-TV Dayton; WSOC-AM-FM-TV Charlotte, and WCKR-WIOD-FM Miami.

The Broadcasters' Foundation presented the award under auspices of the Broadcast Pioneers of which Ward L. Quaal, WGN-TV Chicago, is president. Arthur Simon is president of the foundation.

In a wire of congratulations, President Kennedy said that WSB merited the award “on numerous counts,” noting that he was “personally acquainted with its distinguished record” for leadership of projects “for the public good” in the South and nationally. He singled out for praise WSB’s role in providing radio facilities for Voice of America broadcasts during the Cuban crisis.

Said Mr. Kennedy: “This event transcends tribute to one station. It be-
tokens the vast contribution to the public good made by the broadcast arts—television along with radio—in keeping the American public the best informed in the world.”

The Atlanta outlet became the first station in the South to receive the award which honors pioneer stations contributing most to the tradition of the broadcasting industry. Previous winners: WLW Cincinnati in 1961, and WGN Chicago in 1962.

FCC Commissioners present were Robert E. Lev, E. William Henry, Frederick W. Ford, Kenneth Cox, Robert T. Bartley, and Rosel Hyde. The foundation benefits those in the industry in need of financial help because of illness or other emergency.

The award acknowledges “dedicated adherence to quality, integrity and responsibility in programming and management.”

WCKY is joining ABC Radio network

WCKY Cincinnati, which has operated without a network affiliation for 15 years, has joined ABC Radio.

The 50 kw station, whose last network association was with CBS Radio, has been an independent station since 1948. The station is owned and operated by L. B. Wilson Inc., of which C. H. Topmiller is president.

The affiliation of WCKY with ABC Radio is being announced jointly today (March 4) by Robert R. Pauley, ABC Radio president, and Mrs. Jeanette Heinzle, vice president and general manager of the station. Mrs. Heinzle said that WCKY will carry ABC Radio programs exclusively in the Cincinnati market “not later than Jan. 1” and would begin to broadcast some network program offerings within the next few weeks.

Mr. Pauley said WCKY will replace WLW as the network’s affiliate in Cincinnati. WLW had carried both ABC and NBC programs. Mr. Pauley noted the affiliation marks the first time in almost seven years that ABC Radio will have an exclusive outlet in the Cincinnati area.

WCKY is the second 50 kw to join ABC Radio in two weeks and the seventh within the past year. Two weeks ago ABC Radio announced the signing of 50 kw WHAS Louisville as a network affiliate (Broadcasting, Feb. 18).

WCKY operates on 1530 kc. L. B. James M. Cox Jr. (l) and J. Leonard Reinsch with WSB's 'Golden Mike.' The award is given annually to honor pioneer stations contributing most to the tradition of the industry.

After an absence of 15 years from network affiliation, WCKY joins ABC Radio. Signing the affiliation agreement is Mrs. Jeanette Heinzle, vice president and general manager of the 50-kw station. Earl Mullin (l), ABC vice president in charge of station relations for the radio network, and Paul Miller, WCKY station manager, participate in the signing ceremony.

Wilson Inc. also is licensee of WLBW-TV Miami (ch. 10).
The finest
in college basketball

Sports Network, Incorporated will televise all games of the 1963 Tournament, starting with the first round on March 9 and continuing through the championship game of March 23. The games will be televised on a regional basis to suit the various sections of the country. THE CHAMPIONSHIP GAME ON MARCH 23 WILL BE TELEVISED NATIONALLY.

Minow sidesteps the big question—again

FCC Chairman Newton N. Minow passed up a ripe opportunity last week to short circuit what he calls "wishful thinking" that he will resign his post later this year.

Instead, his carefully chosen words seemed to add to speculation that published reports (BROADCASTING, Feb. 11) of his impending departure are accurate.

Sen. John O. Pastore (D-R.I.), chairman of the Communications Subcommittee, welcomed Mr. Minow to a hearing Wednesday which was intended to bring the subcommittee up to date on FCC activities (also see story below).

Noting that Chairman Minow had just returned from conferences in Switzerland, Sen. Pastore told the chairman, then seated as a subcommittee witness, it might be appropriate to get the facts "straight from the horse's mouth."

"I assure you," Mr. Minow replied, "that when I've made any decision about my future you will learn it from me and not have to get it from the trade press."

"Said like a true statesman," Sen. Pastore said, and added with a sweep of his hand "—but not responsive!"

"The fact of the matter is," Chairman Minow said deliberately, "that I've made no decision."

Sen. Pastore and other subcommittee members praised the FCC chairman and his work and said they hoped he would continue to serve the commission.

A Similar Tune • Last week's colloquy was not the first time Mr. Minow had failed to be completely responsive in telling the Senate about his commission plans.

During his nomination hearing before the Commerce Committee Feb. 8, 1961, Mr. Minow was told by Sen. Warren G. Magnuson, committee chairman, that since the passage of a resolution in 1960 the Senate has asked each person nominated to a regulatory commission by the President to indicate whether he intends to serve a full term.

"Is that your intention?" Mr. Minow was asked.

"It is, Mr. Chairman. I think I would be happy to serve as long as President Kennedy wants me."

Chairman Magnuson said, "We understand that there are some rare, special circumstances, maybe of health or something like that; but not to go down to the agency and serve a while, get the experience and then go out in the industry. That has been abused in the past."

"That is not my intention," Mr. Minow answered.

---

FCC HEAD SEEKS UPBEAT FOR UHF, ETV

Also tells Senate group about his Geneva trip

The FCC told a Senate hearing last week that the agency is optimistic about increased growth of educational television and uhf which has been spurred by enactment of assisting legislation in both fields last year.

Chairman Newton N. Minow, accompanied by five fellow commissioners and a team of bureau chiefs, concluded testimony Wednesday (Feb. 27) before the Senate Communications Subcommittee on etv, all-channel tv sets and telephone rates. The hearings were continued from the week before when Commissioner Rosel H. Hyde appeared for Chairman Minow who attended scientific conferences in Geneva (BROADCASTING, Feb. 25).

Chairman Minow did not deny reports he would be leaving the commission for a job with Encyclopaedia Britannica later this year (see story above and BROADCASTING, Feb. 18, 11). He and the commission were praised by the subcommittee for the manner in which the agency has administered the Communications Act.

Since January, when technical standards for all-channel tv sets and an April 30, 1964 compliance deadline were set (BROADCASTING, Nov. 26, 1962), there have been signs the set manufacturers are "moving ahead in advance of that deadline," Chairman Minow reported.

No Etv Money • Congress failed to provide the money for federal grants to states authorized by Public Law 87-477, but regulations subsequently have been worked out for the processing of fund applications in anticipation the money is forthcoming, the chairman said. A special office for liaison between the agency, educators and the Dept. of Health, Education & Welfare (which will dispense the etv funds) has been set up by the FCC.

Pointing to new interest in uhf since the all-channel law, Mr. Minow said the number of authorized uhf stations increased from 134 in December 1961 to 153 a year later. The number of operating stations went up from 85 to 91 in the same period and the number of pending uhf applications increased from 17 to 29, with a definite upturn in the last couple of months, he said.

On etv, he said, the number of authorized etv stations has jumped from 80 to 95 in two years, and the number of those in operation increased from
Now, a solid-state video distribution amplifier with four outputs at less than the price previously paid for two outputs. The new VDA4-S is a compact plug-in module that is completely solid state — with resulting long life, high reliability and low power consumption. Drawing only 3½ watts of power, the VDA4-S features less than 1° differential phase and less than 1% differential gain. Frequency response is within ±0.5 db to 10 mc. Each unit has an adjustable gain control on the front panel. Yet, eight of these amplifiers, each with its own built-in power supply and supplied with their own mounting frame, require only 3½" of standard 19" rack space.

With all these features the new VDA4-S saves you money — in original price and in maintenance and operating costs. Compared to most tube type amplifiers the multiple savings of the VDA4-S enables it to actually pay for itself within a year.

Also available is the new PAT-4, a four output pulse regenerating distribution amplifier with the same basic features as the VDA4-S.

Find out for yourself — write now for complete details.

House keepers tighten committee budgets

House committees, including those which handle legislation affecting broadcasting, will operate under new reform regulations in the 88th Congress.

Complaints of loose spending and overseas junkets brought demands for check-reins on all committees. All will operate with one-year budgets instead of the usual two-year appropriations.

The House Administration Committee will keep a tight check on committee expenditures and will rule on investigation proposals to prevent overlap and duplication.

The budget of five committees normally handling legislation associated with broadcasting:
- Government Operations (freedom of information, etc.): $600,000 approved ($750,000 requested).
- Commerce (Communications Subcommittee, etc.): $245,950.
- Judiciary (antitrust, advertising): $200,000.
- Science and Astronautics (space communications): $150,000 approved ($300,000 requested).
- Small Business: $275,000 approved ($614,000 requested for two years).

62 to 76 with a total of 324 channels reserved for etv.

Chairman Minow also reported on his trip to Geneva with FCC Chief Engineer Edward W. Allen where they met with delegates to the International Telegraphic Union for discussions of U.S. technical recommendations for allocation of space communications systems. The chairman said he was presently optimistic that U.S. recommendations on permanent allocations may be adopted at an October conference. He did not say whether the Soviet Union was in agreement with U.S. proposals.

Leased Wire Rates • Asked about the FCC's approval of increased rates for users of private, leased telegraphic services of AT&T and Western Union, Chairman Minow said the FCC would be sympathetic to petitions from broadcasters and newspaper owners that the rate hikes be held up.

"It may be that the press should have a special rate, a preferential rate," he said. "This is an open decision. It is not yet finally determined."

Deadline for filings is April 1, Mr. Minow noted.

"However, our initial decision found no cost justification for a specially low press rate," he said.

Poller perjury indictment dropped by government

A perjury indictment against Lou Poller, former Milwaukee television broadcaster, has been dismissed on motion of the Dept. of Justice.

A federal judge in Washington granted the motion after the government moved for dismissal on the ground that Mr. Poller had, "purged himself of the perjury voluntarily." This means, it was explained, that Mr. Poller had voluntarily appeared again before a federal grand jury and testified about a meeting between officials of a Florida bank (of which Mr. Poller was an officer) and Teamsters Union executives. The indictment was based on Mr. Poller's claim that he could not recall the meeting (BROADCASTING, Aug. 6, 1962). The grand jury is investigating loans made by the Teamsters pension fund.

Mr. Poller still holds a permit for ch. 24 WCAN-TV Milwaukee. He has also filed a $4.3 million treble damage suit against CBS Inc. This involves the 1954 purchase by CBS of ch. 19 WOKY-TV in Milwaukee and the equipment and studios of Mr. Poller's WCAN-TV.

COX NOMINATION

Committee ready to confirm but Thurmond has questions

The Senate Commerce Committee is ready to confirm Kenneth A. Cox, FCC Broadcast Bureau chief, as a commissioner, Chairman Warren G. Magnuson (D-Wash.) said last week.

But a request by Sen. Strom Thurmond (D-S.C.) for an executive session is holding up approval.

The committee will meet tomorrow (Tuesday) to organize itself and it is likely Mr. Thurmond may tell members what he wants to ask Mr. Cox. Asked about his questions by a reporter Thursday (Feb. 28), Sen. Thurmond said he had not yet spoken about them to Chairman Magnuson, who has been out of town.

Sen. Thurmond would not say whether he opposed Mr. Cox's nomination, nor would he say what questions he had for Mr. Cox.

Other committee members present at the nomination hearing Jan. 31 spoke favorably of the nominee, but a vote has been held up for Sen. Thurmond's inquiry (BROADCASTING, Feb. 4).

Other committee business Thursday may include reassignment of some members to subcommittees, especially the communications unit, headed by Sen. John O. Pastore (D-R.I.). Two new Democratic and a new Republican member of the full committee must be assigned to subcommittee posts. A Republican vacancy exists on the communications group (left by Sen. Kenneth B. Keating [R-N.Y.]), and a new ratio of Democrats to Republicans (was 11:6, now 12:5) is certain to have an effect on subcommittee size.

The committee also may consider whether to continue its special Freedom of Communications Subcommittee which reported last year on 1960's suspension of equal time provisions for the presidential campaign.

The full committee is scheduled to hear nominations of incorporators of the Communications Satellite Corp. March 11, at which time further questions may be raised about federal spending on experimental communications satellites which benefits the to-be-privately-held firm (BROADCASTING, Feb. 25).

Two new incorporators were nominated by President Kennedy last week (see page 62).

New York requests 17 etv channels

The Board of Regents of New York requested last week that the FCC institute a rulemaking that would reallocate and reserve 17 uhf channels for noncommercial educational use for a statewide etv network.

New York state presently has six channels granted for noncommercial educational use— in Binghamton, Buffalo, Ithaca, New York, Rochester, and Syracuse. The Board of Regents said these channels are not being used because of a lack of funds for construction.

According to the Board of Regents, the requested channels are designed to serve about 100 colleges and universities, secondary schools and rural areas with educational television. Work on the development of the statewide network would begin in Hudson and Mohawk River valley communities. The second phase of the plan would be aimed at areas where the population is relatively heavy and educational needs are pressing. The final stage of the plan would cover the remaining populous areas.

Use of Channels • The Board of Regents said the state's proposal calls for 500 kw for the future stations with as much as 1,000 kw in heavily populated areas. The following is the sequence in which the channels would be activated according to the three-part plan.

• Part one: Chs. 13 and 15 in New
York; ch. 53 in Hempstead; ch. 21 in Poughkeepsie; ch. 17 in Albany; ch. 25 in Utica; ch. 43 in Syracuse; ch. 21 in Rochester; and chs. 17 and 23 in Buffalo.

* Part two: ch. 52 in Amsterdam-Gloversville; ch. 46 in Binghamton; ch. 30 in Corning-Eldira; ch. 58 in Jamestown; ch. 75 in Patchogue-Riverhead; ch. 28 in Plattsburg; and ch. 20 in Watertown.

* Part three: ch. 23 in Albany-Schenectady-Troy; ch. 79 in Batavia; ch. 56 in Boonville-Lowville; ch. 46 in Dunkirk; ch. 39 in Glens Falls; ch. 50 in Hornell; ch. 14 in Ithaca; ch. 18 in Saranac Lake-Lake Placid; ch. 66 in Malone; ch. 14 in Muskegon; ch. 24 in Ogdensburg; ch. 54 in Olean; and ch. 42 in Oneonta.

In addition there are 18 other communities which will ultimately have ctw.

The Board of Regents said that production facilities already existing in New York, Albany-Schenectady-Troy and Buffalo could provide sufficient programming for the beginning of the network. The board also said that more production studios are planned for cities in parts one and two of the plan.

The channels must be reserved now, according to the Board of Regents, for future use. Present funds do not allow their immediate use but the channels will be needed.

HARRIS PROPOSES TO LIFT HOUSE BAN
Resolution would allow radio-tv in committee hearings

Rep. Oren Harris (D-Ark.) has thrown his support behind broadcaster efforts to air House committee sessions.

A resolution to change the rules was introduced by Rep. Harris on Monday (Feb. 25). It has been endorsed as a proper approach by Speaker John W. McCormack (D-Mass.) and other members of the House leadership team.

Rules Committee Chairman Howard W. Smith (D-Va.), a key man in any change of House procedures, has scheduled a hearing on Rep. Harris’ proposal for tomorrow (Tuesday) at 10:30 a.m.

House rules have been interpreted under Democratic Speakers McCormack and Rayburn as prohibiting broadcasts, and both men refused to alter that interpretation without a mandate from the House membership.

Earlier access proposals by other members of Congress have been unsuccessful. Reps. George Meader (R-Mich.) and Mrs. Martha W. Griffiths (D-Mich.) have bills pending in this session (Broadcasting, Jan. 14).

Here is what Rep. Harris’ H. Res. 263 would provide:

1. That any committee may by its own majority vote “permit the broadcasting and telecasting of public hearings conducted by it or any of its subcommittees, or the recording thereof for later broadcasting and telecasting.”

2. “No witness may be required, against his will, to give evidence or testimony” during live broadcasts or during recordings for later use.

3. These broadcasts may not be used for commercial purposes, but this would not prevent “the broadcasting or telecasting of any such hearing in connection with a bona fide newscast, bona fide news documentary, or on-the-spot coverage of any such hearing as a bona fide news event.”

4. Committee chairmen would be responsible for supervision of all broadcasts and recordings.

Cleared At The Top • Rep. Harris, who had not offered access legislation in the past, said Thursday (Feb. 28) he has explored the subject with broadcasters, the Speaker, the House parliamentarian and other members of Congress “and came up with this approach in order that there be no delusion and uncertainty” about access limitations and protection for witnesses.

Rep. Harris, who is chairman of the Commerce Committee, which handles

A QUESTION ABOUT DEPRECIATION

Westinghouse takes affiliation contract to Supreme Court

A 9½-year-old tax case involving the question of whether network affiliation contracts can be depreciated is before the U. S. Supreme Court.

The case is the Westinghouse Broadcasting Co. attack on the contention of the Internal Revenue Service that it cannot amortize $5 million allocated to network affiliation in 1953 when WBC bought ch. 3 WPTZ (TV) Philadelphia from the Philco Corp. for a total of $8.5 million.

WBC has lost its claim in the U. S. Tax Court and in the U. S. Court of Appeals. It has asked the Supreme Court to review the case.

The WBC petition for certiorari is opposed by the Dept of Justice in behalf of the Internal Revenue Service.

If Westinghouse fails to prevail it will have to pay almost $1 million in taxes for the disputed years. This amounts to $363,371.95 for 1953, and $622,410.13 for 1954.

The major point of contention between Westinghouse and IRS is whether network affiliation contracts have a "determinable" length. WBC claims that such contracts cannot be made longer than two-year terms, under FCC regulations. It stresses that there is no reasonable certainty that such contracts will be renewed, and points out that between 1953 and 1960 a total of 266 affiliation agreements were not renewed. It stresses that business prudence requires that a broadcaster must not count on more than two renewals.

No End - IRS insists that affiliation contracts almost always are renewed and therefore there is no way of telling when they come to an end. A tax court ruling was upheld by an appeals court last October (Broadcasting, Oct. 22, 1962).

While WBC owned WPTZ, the affiliation with NBC was renewed once, to expire Jan. 1, 1956. At that time, however, WBC and NBC exchanged stations: the network's Cleveland outlets for WBC's Philadelphia properties plus $3 million to WBC.

In its federal income tax returns for 1953 and 1954, WBC assumed a 5-month useful life for the affiliation—seven months of the contract originally signed with Philco in 1952 plus an assumed two renewals of 24 months each. After the WBC-NBC transaction, WBC scaled this down to a 31-month useful life which was the actual life of the contracts enjoyed by WBC.

There are six other tax cases involving network depreciation which are being held in abeyance in the U. S. Tax Court and/or the U. S. Court of Claims awaiting a final decision in the Westinghouse matter. Those involved include Time-Life; Corinthian, Meredith, Triangle, Cowles and Northern Pacific TV Corp.
NO ANSWER YET ON VHF DROP-INS

Minow hopes for compromise solution to break deadlock

The tension held last week for actual and would-be broadcasters who have been waiting 19 months for the FCC to decide whether to drop vhf channels at substandard spacing in eight two-station markets.

The commission had been scheduled to consider the matter at its meeting last week. But it had to cancel that meeting to keep a date on Capitol Hill (see story page 56), and the proposal was not expected to be taken up at an abbreviated session Friday (March 1).

The proposal, first offered as a proposed rulemaking in July 1961 (Broadcating, July 31, 1961), has split the commission. Indications are that the vote will be 4-3, whichever way it goes.

FCC Chairman Newton N. Minow hopes a compromise can be reached that would be acceptable to a more substantial majority. But so far no such compromise is in sight.

Chairman Minow has suggested, as a possible solution, that the drop-ins be approved, with the proviso that those who are granted the channels be required to surrender them in return for uhf facilities after a certain number of years (Broadcasting, Feb. 18).

Under another possible compromise being discussed within the commission, the proposal would be adopted, but with the express understanding that no future drop-ins would be approved.

Neither proposal, however, appears to have attracted much support.

Those favoring the drop-in proposal see it as providing an urgently needed third vhf network (ABC) service to the eight markets. Those opposing it fear it would set back the development of uhf television—at a time when Congress, through enactment of the all-channel-receiver act, and the FCC itself are attempting to foster uhf television's growth.

ABC Urges Drop-ins • Last week, ABC and potential applicants for the vhf drop-ins filed 10 petitions in a last-ditch effort to nudge the commission into approval of the proposal. All urged the FCC to disregard pleadings of the Assn. for Competitive Television, a uhf group which asked for additional time to comment on the drop-in proposal, and Taft Broadcasting Co., which said it would apply for a uhf channel in Dayton, Ohio, if a third vhf is not added there, as proposed (Broadcasting, Feb. 18). Taft last week filed for ch. 44 in that city.

The pro-drop-in petitions struck at the argument that the all-channel-set legislation—by increasing the sale of sets capable of receiving uhf signals—will enable uhf stations to survive and provide the needed service.

ABC, which hopes to gain vhf affiliates if the drop-in proposal is adopted, said the act can't provide the answer to the "urgent need" for service in the eight markets or improve the opportunities for a more effective network competition on a national basis.

The network also said those who think it would switch its programs from the vhf stations, where it shares time with the other networks, to a new uhf facility are mistaken. ABC said it is already suffering from a lack of vhf outlets and added, "It would be unfair to expect ABC and its advertisers to add to this burden."

Eight Markets • The eight markets marked for drop-ins are Baton Rouge, La.; Birmingham, Ala.; Charlotte, N. C.; Dayton, Ohio; Jacksonville, Fla.; Knoxville, Tenn.; Johnstown, Pa.; and Oklahoma City (a shift of ch. 5 from Enid).

The potential applicants who filed petitions last week are Alabama Telecasting Corp., Birmingham Tv Corp.,

Harry Mopp, of the dry hair ads, didn't make the Tricorn Club

Harry wasn't in the lifeless scalp commercials. He just buys TV spots for them. He just didn't know that North Carolina's No. 1 metropolitan market is the prosperous three-city Golden Triangle ... Winston-Salem, Greensboro, High Point ... No. 1 in population, households and retail sales. Knowing those facts is all it takes to crack this exclusive club, Harry. Then schedule WSJS Television, of course — which is the No. 1 way to saturate the Golden Triangle Market (and the surrounding rich area thrown in). You get a club hat with feathers, Harry, if you also remember North Carolina is the 12th state in population ... and that no self-respecting spot schedule can ignore the No. 1 market in the No. 12 state! You'll be a real smoothie with clients and account execs, Harry, when you join the Tricorn Club — provided our official hat can fit onto your tousled wig.

SCIENTIST MADE HEAD OF COMSAT

Group establishes $5 million line of credit with banks

A 42-year-old scientist has been elected principal operating head of the Communications Satellite Corp., the space age communications company.

Dr. Joseph V. Charyk, undersecretary of the Air Force and an expert in high speed aerodynamics and jet propulsion, was elected president of Comsat last Thursday (CLOSED CIRCUIT, Jan. 28).

The board of incorporators also chose Leo D. Welch, chairman of Standard Oil Co. (New Jersey), to be chairman and chief executive officer of the corporation.

Dr. Charyk's salary will be $80,000 yearly, and Mr. Welch's $125,000, it was understood.

President Kennedy nominated the two to be incorporators of the space communications firm the same day. They will join the 12 present incorporators as the first board of the company until stockholders elect their own directors in about a year.

The Comsat board also announced last week that it had established a $5 million line of credit with 10 banks to meet financial requirements prior to the initial public issue of stock by the company. First borrowing is expected to be $500,000.

Charyk was born, but now an American citizen, Dr. Charyk acquired an engineering degree from the U. of Alberta in 1942, a master of science degree in 1943 and a PhD. magna cum laude in 1946 from the California Institute of Technology. He was a professor of aeronautics at Princeton U. from 1946 to 1955.

In 1955 he became director of the aerophysics and chemistry laboratory of Lockheed Aircraft's missile systems division, and later general manager of the Ford Motor Co.'s space technology division.

President Eisenhower appointed Dr. Charyk to be assistant secretary of the Air Force in charge of research and development in 1959, and undersecretary in 1960. He was retained in this position by President Kennedy.

Banker-Oilman: A native of Rochester, N. Y., Mr. Welch was graduated from the U. of Rochester in 1919 and joined the First National City Bank of New York, becoming supervisor of the Chile, Argentina and Uruguay and later vice president in charge of the bank's Caribbean area operations.

He joined Standard Oil as treasurer in 1944, became a vice president in 1956, executive vice president and member of the executive committee in 1958 and chairman of the board in 1960. He is a trustee of the Committee on Economic Development at the U. of Rochester and a director and treasurer of the Commonwealth Fund.

Dr. Charyk has already resigned his government post. Mr. Welch will be retired from Standard Oil March 31; he is also resigning as a director of International Telephone & Telegraph Co.

Loan Agreement: The loan agreement between Comsat and the banks provides repayment on Feb. 28, 1964 or after the corporation receives the proceeds of the public sale of stock.

TELESTAR NOT TELLING

Satellite again silent; radiation believed villain

Telstar, AT&T's space relay satellite, once again has fallen silent. For the past week, Bell Telephone Labs' scientists said, the communications satellite has failed to respond to commands. They expressed belief that transistors were being affected by higher intensities of radiation as the satellite moves into the heavier concentrations of the Van Allen Belt.

The same problem occurred last October when the satellite was inoperative for 40 days. Communications were restored on Jan. 3. This may mean, the AT&T scientists said, that such failures may be expected every three months since the satellite's orbit takes it into heavy radiation concentrations every 90 days.

4 more o&o's get renewals

The FCC last week granted renewal of the licenses of four network-owned stations—NBC's WRC-AM-FM-TV Washington and WBBM-AM-FM-TV Chicago—among the 27 the owned station licenses renewed within the last fortnight (BROADCASTING, Feb. 25).

All the renewals had been held up since 1960. Last week's actions brought the total renewals to 17 for CBS, 7 for NBC and 3 for ABC. Renewal for 23 other network-owned stations is still being held up.

BROADCASTING, March 6, 1963
**PROGRAMMING**

**NBC-TV STICKS WITH MOVIES**

Signs for new MGM, 20th Century-Fox packages for use in present Saturday, Monday slots

NBC-TV will program motion pictures on both Saturday and Monday nights next season.

The move comes close to filling the full nighttime schedule on NBC-TV for 1963-64.

The network made its decision by closing deals with Metro-Goldwyn-Mayer and 20th Century-Fox for 30 movies from each. An announcement from NBC-TV's Walter D. Scott, executive vice president, described the arrangement as "long-term, multi-million dollar." Other sources, however, indicated that the MGM and 20th Century-Fox deals involve a commitment of some $12-13 million. The MGM pact has the customary provision of options for another 30 pictures to be run in the following season.

As yet, the network has not indicated in which night each of the packages will be inserted. The Monday hours are 7:30-9:30 p.m. and on Saturday, 9-11 p.m.

Initially, the network had maintained that its current Monday run of motion picture teletcasts, which started on Feb. 4, would be discontinued after September and the start of the new season in the fall of 1963.

But early ratings and sales strength of the Monday movie block soon changed the mind of network executives, despite some apparent early misgivings of programming additional motion pictures on the NBC-TV schedule (CLOSED CIRCUIT, Feb. 25).

**Most in Color** - Most of the new feature films were released to theaters from 1955 to 1960 and the majority of them are in color.

Mr. Scott said the films represent "the finest group ever assembled for showing on television." 20th Century-Fox had supplied NBC-TV with motion pictures for the Saturday night run this season and in the year before. This is MGM's first release-to-network of any of its features.

The MGM selection is impressive. Titles released follow (though both MGM and NBC-TV stressed that these are representative, indicating that a selection will be made that will include only some):

**Movie Titles** - "Adams Rib" (Spencer Tracy, Katherine Hepburn, Tom Ewell, Judy Holliday); "Annie Get Your Gun" (Betty Hutton); "The Brothers Karamazov" (Yul Brynner, Maria Schell); "Bad Day at Black Rock" (Spencer Tracy, Robert Ryan, Walter Brennan); "Battleground" (Van Johnson, John Hodiak, George Murphy) and "Tunnel of Love" (Doris Day).

The 20th Century-Fox films will be selected from among such pictures as: "Daddy Longlegs" (Fred Astaire, Terry Moore, Leslie Caron); "The Rains of Ranchipur" (Lana Turner, Richard Burton); "Seven-Year Itch" (Marilyn Monroe, Tom Ewell); "The Diary of Anne Frank" (Joseph Schildkraut, Millie Perkins); "Wild River" (Montgomery Clift, Lee Remick);

"Rally Round the Flag, Boys" (Paul Newman, Joanne Woodward, Joan Collins); "The Tall Men" (Clark Gable, Robert Ryan); "We're Not Married" (Marilyn Monroe).

**Audience Figures** - Mr. Scott cited what he called "dramatic evidence" of the "prestige" film appeal on the Monday showings, claiming an "unprecedented shift" in audience on Feb. 4, the first night the motion pictures were scheduled.

He noted that when "The Enemy Below" was presented on Feb. 4, six million more homes (compared to Jan. 28) tuned in to NBC-TV during the two-hour period starting at 7:30 p.m., an audience share increase of 130%.

This material was based on first national Nielsen ratings, and comes from a study of the figures by NBC's researchers. Their study had indicated that "The Enemy Below" was on 140 stations compared to 189 outlets that were carrying the Lucy show (8:30-9 p.m.) on CBS-TV.

The figures: on Jan. 28, NBC's Man's World and Saints & Sinners (7:30-9:30) rated 9.3 in average audience, but on Feb. 4 NBC-TV had increased to 21.3; CBS-TV at 29.6 went to 25.9, and ABC-TV at 21.3 went to 16.5. Shares of audience: NBC-TV went up from 13.7 to 30.9; CBS-TV down from 43.5 to 37.5, and ABC-TV, from 31.3 to 23.9.

"Watchdog" group to keep eye on AP broadcast wire

Formation of a "watchdog committee" to survey the "coverage and presentation" of the Associated Press broadcast wire was announced in New York last week by Dwight Martin, president of the news service's radio

**What do you have to lose?**

Her Majesty Marie Antoinette, A lady who had everything to lose—and did. In the early days of kinescope, producers also had quite a bit to lose, due to poor quality process and transfer work of their productions. Today, the trick is not to lose everything, but to keep loss of original quality to a minimum. At Acme Film Laboratories, it is possible to obtain "live" film quality due to Acme's revolutionary techniques and technological advances. For complete information and prices, write: Acme Film Laboratories, 1181 No. Highland Ave., Hollywood 38, Calif.
and television association.

Mr. Martin, vice president, WDSL-TV New Orleans, appointed Dave Kelly, tv news director KDKA-TV Pittsburgh, as chairman of the committee. Other newsman named to the group are Clayton Edwards, WTAR-AM-FM-TV Norfolk; Lee White, KROS Clinton, Iowa; Carroll McGaughy, WSOC-TV Charlotte; Al Hansen, WFDF Flint, Mich.; Dave Davis, WKRS Waukegan, III; George Brown, WOR-AM-TV New York and Carl Sisskin, WIBW-AM-TV Topeka, Kan.

Mr. Martin also announced the formation of a subcommittee to support the watchdog group. Under the direction of Robert Gamble, news director WFBM-AM-TV Indianapolis, the subcommittee will conduct research to determine the effectiveness of AP's broadcast wire in meeting the needs of broadcasters.

VICTORY AND DEFEAT
Newsmen win hearing in one case; slapped in another

Television newsmen won a partial victory and suffered a partial defeat last week in their long-drawn battle for equal access to public hearings for them and their electronic gear with newspaper reporters and their pads and pencils. Both concerned California state agency hearings. Both occurred in Los Angeles.

The partial victory was an agreement by the California Public Utilities Commission to listen to argument on changing its present policy of not admitting cameras and microphones into its hearings. George C. Grover, commission president, said that argument on the question of opening the commission’s administrative hearings to tv and radio would be held in San Francisco shortly, with the date to be announced. With this promise, the tv newsmen on Wednesday kept their equipment outside the room in which the PUC was hearing a Pacific Telephone & Telegraph rate case. Their presence at an earlier hearing had caused it to be recessed (Broadcasting, Feb. 4).

The partial defeat came Monday, when Judge Macklin Fleming of the Los Angeles Superior Court granted California Corporations Commissioner John G. Sobieski a preliminary injunction barring cameras and microphones from the commission’s hearing on a controversial harbor oil case. As with the PUC, several tv news crews set up their cameras in the hearing room and refused to leave when ordered to do so, with a postponement of the hearing resulting (Broadcasting, Feb. 4).

Judge Fleming, in his decision to grant a temporary injunction, made it plain that he was ruling on the particular case only and not issuing a blanket injunction to bar tv cameras from all hearings of California administrative agencies.

Counsel for the Los Angeles broadcasters included Robert P. Myers, representing KABC-TV; Harry Warner, for KTLA (TV); Bruce Baumeister, for KTTV (TV); and Robert Neub for the individual newsmen (through the Radio-Television News Directors Assn.). NAB had filed a brief as a friend of the court (Broadcasting, Feb. 25).

Film sales...

606 cartoons from Out of the Inkwell, Warner Bros. Cartoons and Popeye (all dubbed in French) (Seven Arts Assoc.) Sold to CPM-AM-TV Chicoutimi, Quebec.

506 cartoons from Popeye and Warner Bros. Cartoons (all dubbed in French) (Seven Arts Assoc.) Sold to CFCM-AM-TV Quebec City.

Is pay tv's place in the theatres?

General Electric Co. and National General Corp., Beverly Hills, Calif., announced jointly last Monday (Feb. 26) the development of a GE color television system for projection of tv entertainment on theatre-size screens as well as establishment of a tv network for use of the equipment in theatres (BROADCASTING, Feb. 25).

Eugene V. Klein, president of NGC, told a news conference in New York, that the motion picture chain has received exclusive distribution rights to the GE projector for commercial theatrical entertainment. He said that NGC placed a multi-million dollar order with GE for equipment and service contracts for initial use of the projector in its own key theatres.

A programming schedule currently being developed by NGC will begin in a minimum of 100 NGC theatres in early 1964, he said. NGC will also distribute the projectors to other exhibitors in the U.S., he added.

The new projector, called the Talaria (meaning winged feet of Mercury), makes possible for the first time, Mr. Klein pointed out, the origination of a tv network providing live Broadway shows, and major sports, entertainment and cultural events at popular prices. The National Teletheatre, as NGC calls the new operation, will provide simultaneous, daily, closed circuit televising to theatres, coast to coast, he said. The project, with the equipment, will cost about $10 million, Mr. Klein said.

Preparation Begun • NGC will develop its own programs for the network as well as presenting events provided by Broadway. The theatre chain is preparing a program schedule and is negotiating with top talent in the entertainment world, he indicated.

Mr. Klein broke down the entertainment being developed for the new network as follows:

1. Theatrical stage shows to be shown on a daily basis.
2. Educational programs to be presented to a more limited audience in alternate time periods each day.
3. Sporting events which will be televised in alternate time periods on a less than daily basis.
4. Industrial and commercial shows which will be shown to meet specific audiovisual requirements.
5. Closed circuit conventions.
6. Public service events.
7. Children’s shows.

How It Works • The Talaria projector has a high-power light source and an optical projection system similar to conventional motion picture projectors, according to Robert L. Casselberry, general manager of GE’s technical products operation.

Viewing a Talaria demonstration at Electronics Park, Syracuse, N. Y. (l to r): Eugene V. Klein, National General president, Richard L. Shettler, general manager of GE’s command systems division, and Robert L. Casselberry, general manager of GE’s technical products operation.

large screen in full color and brightness. The use of a 5-kw xenon lamp at the source of light for the projected picture and an electric picture signal to control or modulate the light overcomes limitations normally encountered regarding screen brightness and picture size.

Mr. Casselberry said full scale demonstration of equipment and performance will be presented in 90 to 120 days on the West Coast and possibly simultaneously in New York.
BASEBALL REVENUE LEVELS OFF

Radio-television rights and advertising revenues reach plateau after several years of big increases; majors to split $13.1 million

The spectacular growth patterns of the past two years were not matched, but broadcasters and baseball got together again in 1963 to reach a new financial plateau, according to Broadcasting's annual survey of ball clubs, stations and advertisers.

Exclusive of network weekend telecasts, the World Series and All-Star Game, the 20 major league teams are splitting $13.1 million pie, up $325,-000 from the adjusted rights estimate for 1962—$12,775,000.

The World Series and All-Star Game will bring an additional $3.5 million this year, a drop of $500,000 from 1962. The decrease follows the players' decision to return to one All-Star Game. The two specials, both to be shown in color over NBC-TV, under a long-term contract, will be sponsored by Gillette through Maxon and Chrysler through Young & Rubicam.

Sponsor billings, which reached an estimated $83 million in 1962, reflected the smaller increase in rights and inched upward to $84 million.

Notable in the smaller increases was the leveling off of the major leagues at 20 teams, following two years of expansion, the number of stations in individual club networks, and the number of games scheduled for tv.

R. J. Reynolds through William Esty Co., New York, and American Tobacco through Lawrence Gumbiner and BBDO, both New York, again took individual sponsor honors. Reynolds bought into sponsorship of eight teams and American Tobacco into six. Brown & Williamson Tobacco through Ted Bates & Co., New York, was the only other cigarette sponsor in the picture, buying into two teams.

Again the brewing companies took their share, with purchases of 17 teams' games. This year 14 breweries are in the lineup with P. Ballantine & Son through Esty and Theo. Hamm Brewing Co. through Campbell-Mithun picking up three teams each.

More than 550 radio stations and 50 television stations are already committed to the various team networks. Many of these will also carry packaged pre-game and post-game programs, or will originate their own local sponsorship.

Sports Network Inc. this year will handle 500 baseball games on television and more than 3,500 games on radio.

In its seventh year, SNI arranges regional networks for baseball broadcasts on radio and tv, and furnishes remote pickups and allied services.

While SNI has several mobile color tv units available this season, a spokesman for the organization could not comment on the amount of games to be televised in color.

In Proportion • One thing that does appear imminent based on this year's survey is that there will be no more yearly skyrocketing of rights costs followed by fantastic billing increases.

Though the unsold portions are small compared to the overall picture, they do pinpoint the advertisers' caution and in some cases reluctance to simply keep paying more. The agency men indicate that brakes are being applied and that fear of not being sold out will keep the teams and stations in line when prices are brought up again next year.

Next year all clubs in the majors may find the networks easier to deal with than they have been in the past. There is a concerted move on the part of several American League club owners to force CBS-TV and NBC-TV into dealing with the league rather than individual teams. The present system provides the home teams with all the proceeds from the network telecasts and the visiting teams don't like the arrangement. Cries of "foul" are also coming from teams whose home parks aren't visited by the network cameras and lose out on the estimated $25,000 per telecast. (See story page 70.)

This year CBS-TV and NBC-TV will pay about $2,225,000 to teletcast a total of 95 major league games from the home fields of ten teams. (They had 98 games scheduled last year.)

Coast to Coast • The new season will mark the first time home games from the West Coast will be televised more than once by a network during the regular season. NBC-TV has signed the Los Angeles Dodgers and San Francisco Giants.

NBC-TV, which has 48 Saturday and Sunday games scheduled in its Major League Baseball series, has contracts with the Chicago White Sox and Cleveland Indians in the American League and Milwaukee Braves, Cincinnati Reds and Pittsburgh Pirates as well as the two West Coast teams in the National League.

A total of 47 games has been contracted for by CBS-TV's Baseball Game of the Week with the New York Yankees, Baltimore Orioles in the American League and St. Louis Cardinals, Chicago Cubs and Philadelphia Phillies in the National League.

The games will begin on both networks the weekend of April 13-14. NBC-TV has a schedule of 24 Saturday games and a like number of Sunday ballgames. CBS-TV will present its games on 25 Saturdays and 22 Sundays.

Sponsors signed by NBC are Humble Oil through McCann-Erickson with 3/16; P. Lorillard through Grey Advertising with 1/8; and Hartfort Insur- ance Group via McCann-Marschalk with 1/16.

Falstaff Brewing Corp. through Dancer-Fitzgerald-Sample has signed for one-half sponsorship of the games on CBS-TV. Other sponsors are Simoniz (D-F-S); Philip Morris (Leo Burnett); General Mills (Knox-

**N. L. TOTAL** | **6,450,000** | **6,225,000***

**MAJOR LEAGUE TOTALS** | **$13,100,000** | **$12,775,000***

Rights figures are Broadcasting estimates. Asterisk following the 1962 figure denotes a revised estimate of that club’s rights. The figures do not include rights paid by CBS and NBC for nationally televised games. Originating stations for TV and radio are listed with number of stations in parentheses.
Reeves); Aqua Velva (Parkson Adv.); Colgate-Palmolive (Ted Bates); Bristol-Myers (Doherty, Clifford, Steers & Shenfeld); Texaco (Benton & Bowles); Vaseline Hair Tonic (Norman, Craig & Kummel); and Carter Products (Sullivan, Staufer, Colwell & Bayles).

Dizzy Dean and Pee Wee Reese will again be the sportscasters of the games on CBS-TV while Joe Garagiola and Bob Wolff will comment for NBC-TV.

**AMERICAN LEAGUE**

**Baltimore Orioles** • WBAL-AM-TV
Baltimore will again be the originating stations for the Orioles. WBAL-TV will carry 20 regular season games and two exhibition contests. Only six of the televised games will be home contests. A three-station TV network will cover Maryland and Pennsylvania. On radio side, WBAL will feed the 162-game season schedule and some exhibition games to a 23-station network in Maryland, Delaware, Pennsylvania and Virginia. Chuck Thompson and Joe Croghan will do the play-by-play.

**Boston Red Sox** • WHDH-AM-TV
Boston will originate Red Sox games again this year. A six-station TV network in Massachusetts, Maine, Rhode Island and Connecticut will carry 33 home and 21 road games. The full league schedule plus some exhibition contests will be fed to a New England radio network of about 45 stations. Curt Gowdy, Art Gleeson and Ned Martin will do the play-by-play.

**Chicago White Sox** • WCL-F-AM-TV
The largest radio lineup of any American League club again belongs to the White Sox. WCL-F Chicago will originate the 162-game schedule and pre-season contests in an 82-station network throughout the Midwest and Southwest. WGN-TV Chicago is tentatively set to carry all home games of the Sox. The road game picture is still clouded, but 18 games, the same as last year, have been penciled in. Bob Elson, assisted by Milo Hamilton, will be back on radio TV play-by-play.

**Cleveland Indians** • The Indians' 50-game TV schedule this year is down six from 1962. WJW-AM Cleveland will carry 24 home and 26 away contests, all on weekends. Pre-game shows will be handled by Bob Neal. WERE Cleveland will feed weekend exhibitions and the regular schedule to 36 stations in Ohio, Pennsylvania, New York and West Virginia. Ken Coleman and Mr. Neal will be the radio TV team.

**Detroit Tigers** • A 41-game TV schedule, the same as last year, will be seen over eight stations in Michigan, Ohio and Indiana with WJBK-TV Detroit originating. Ten games will be home contests. A 48-station radio network will carry the Tigers' pre-season and regular league schedule. WKMH Dearborn will again originate with WWJ Detroit taking day games and WJR Detroit taking the night contests. Ernie Harwell and George Kell will cover the team on radio and TV.

**Kansas City Athletics** • The Athletics' TV exposure will be up 33% this year with WDAF-TV Kansas City carrying 40 games against 30 in the 1962 season. After the home opener, the remaining 39 will all be road games. The full league schedule plus 24 pre-season contests for a 10-station network in Missouri, Kansas, Nebraska and Oklahoma. Monte Moore and George Bryson will do the play-by-play.

**Los Angeles Angels** • The Angels' 1963 broadcasting operations are as identical to 1962 as any club's in the majors. WSAH Radio Los Angeles is originating the games for a 16-station network in California, Nevada and Arizona. In addition to the 162-game schedule, 16 pre-season games will be aired. A five-minute interview commentary, Bill Rigney Reports, will precede the Angel Warmup before each game. Also set are the post-game Angel Report and Angel Clubhouse, a between double-headers interview. KHJ-TV Los Angeles will televise 26 games, all on the road, including six exhibitions. Buddy Blatter and Don Wells call the play-by-play.

**Minnesota Twins** • WTCN-TV Minneapolis is the key station for the Twins and will carry 50 games this season, 46 of them road contests. A 14-station TV network covers Minnesota, North Dakota, South Dakota, Iowa and Wisconsin. WCCO Minneapolis will originate nine exhibition games and the regular season schedule to a 31-station network in Minnesota, North Dakota, Phillips broadcasting team. Mr. Colemen, the ex-Yankee who had a CBS network radio show, now joins the Yankee broadcasting team, where his old field teammate Phil Rizzuto is ensconced. Other ex-ball players on major league broadcasting teams include: Ralph Kiner-Mets, Buddy Blatter-Angels, Frank McCormick, Waite Hoyt-Reds, George Kell-Detroit, Lou Boudreau-Cubs, Dizzy Dean and Pee Wee Reese (left and right, respectively, in photo)-CBS-TV and Joe Garagiola-NBC-TV.

From spikes to mikes

Not too many years back when Father Time thumbed the ball player out of the game, the veteran trudged back to the farm. Nowadays, more and more of the fading stars simply climb the steps to the broadcasting booth. The latest to join the radio TV clan are Richie Ashburn and Jerry Coleman. Mr. Ashburn, who played with the Philadelphia Phillies for over 10 years and played for the New York Mets last year, has become a member of the...
South Dakota, Iowa, Nebraska, Wisconsin and Montana. Ray Scott, Halsey Hall and Herb Carneal will broadcast on both radio and TV.

New York Yankees • For the 12th straight year, WPIX (TV) New York will televise Yankee games, with 126 regular season games on the schedule: 81 at home and 45 on the road. Negotiations are in progress for a New York State and New England regional TV network. WCBS New York will carry radio broadcasts and originate the entire 162-game schedule for the "Home of Champions" 40-station network in New York, Pennsylvania, Connecticut and Massachusetts. Broadcasters Mel Allen, Red Barber and Phil Rizzuto are being joined by another former Yankee, Jerry Coleman.

Washington Senators • The Senators this year is the only team in the American League without a radio network at present. WTOP-AM-TV Washington will be the sole outlet for the club. WTOP-TV has scheduled 30 games, the same as last year, with 19 on the road and 11 at home. WTOP-AM will cover four exhibition games in addition to the regular season. Dan Daniels and John MacLean are again handling the radio-TV air work.

NATIONAL LEAGUE

Chicago Cubs • WGN-AM-TV Chicago will cover the Cubs again in 1963 without special networks, according to present plans. The Cubs' home schedule of 81 day games will be seen in color over WGN-TV. The number of road games to be seen in black-and-white is still uncertain. Jack Brickhouse and Vince Lloyd will do the play-by-play. On radio, the full 162-game schedule plus exhibition contests will be broadcast by Jack Quinlan and Lou Boudreau.

Cincinnati Reds • The Reds will again be among the most colorful teams in the majors with 23 home games to be teled in color from WLWT (TV) Cincinnati. Thirty road games are also scheduled for the six-station network in Ohio, Indiana, Kentucky and West Virginia. WKRC Cincinnati is originating station for a 50-station radio network in five-states. The radio broadcasts will be handled by Waite Hoyt and Gene Kelly with Ed Kennedy and Frank McCormick handling TV.

Houston Colt .45s • The Colts this year departed from the usual major league pattern of rights buying and selling, by creating the Houston Sports Assn., which is the parent of the new Colt .45 Network. HSA has done all the selling and is packaging the Colts’ broadcast operations. KPBC Houston, will be the key station for the Colts’ 18-station Texas and Louisiana network. A total of 191 games, including all 29 exhibition contests, will be heard. KTVT (TV) Ft. Worth-Dallas, will originate Colt games for the six-station TV network in Texas and Louisiana, with KTRK-TV Houston, the key station. Only 14 road games are scheduled to be teled. Gene Elston and Lowell Passe will work radio and TV play-by-play with Guy Savage on tv only.

Los Angeles Dodgers • KFI Los Angeles, will originate Dodger games over a 21-station three-state network, with 10 stations also carrying the exhibition games. KTTV (TV) will televise the nine Dodger-Giant games from San Francisco. Vin Scully and Jerry Doggett will again do radio-TV.

Milwaukee Braves • 1963 marks more than just new ownership for the Braves. For the first time in the club's history, home games will be televised, with five Saturday contests and 21 road games scheduled. The 26-game total to be seen over WTMJ-TV Milwaukee, and a three-station network is 11 games more than were televised last year. WEMP Milwaukee gets sole radio rights in the city for the first time and will feed 31 stations in Wisconsin and Minnesota the 162-game schedule plus 16 exhibitions. Mike Walden and Blaine Walsh will handle TV with Earl Gillespie and Tom Collins on radio.

New York Mets • Although down five games from last year, the Mets will still televise more games this year than any other major league club. A total of 128 regular season contests will be shown: 76 at home, 52 away, plus three exhibition games. WOR-TV New York, will originate the games for a four-station New York State network. On radio, WABC New York, will air the entire Mets' schedule from the first pre-season contest in Florida through the 162-game regular schedule, a total of 189 games. Lindsey Nelson, Bob Murphy and Ralph Kiner will again handle the play-by-play.

Philadelphia Phillies • The Phillies will telescast 60 games this season, up from last year's 56, over a four-station Pennsylvania network. WFIL-TV Philadelphia will originate the games including 44 weekend contests. A 23-station radio network in Pennsylvania, New Jersey and Delaware will be fed pre-season and regular league games by WFIL-AM. Byrum Saam, veteran Phillies broadcaster will be joined this year by Bill Campbell and ex-Phillies star Richie Ashburn.

Pittsburgh Pirates • KDKA-AM-TV

Q: can I separate AM and FM profitably?

A: YES! WITH O-VATION MUSIC AND PROGRAMATIC AUTOMATION

Others are doing it. Without any full-time FM personnel, KFAB Omaha, separates 20 hours a day, seven days a week — and still provides as many as 10 hours of weekly local live. Find out how you can save on manpower, save on music, save on time and build a separate FM audience with O-Vation Music, automated on Programatic Equipment.

BROADCASTING, March 4, 1963
Pittsburgh are carrying the Pirates again this year. KDKA-TV will feed a five-station network in Pennsylvania, Ohio and West Virginia a minimum of 33 road games. (No home games are scheduled for tv). KDKA-AM will feed a three-state radio network, which numbered 21 last Friday. Eight pre-season weekend games will lead off the radio schedule. Bob Prince and Jim Woods, veteran Pirate broadcasters, are joined this year by Claude Haring, who formerly broadcast Philadelphia games.

San Francisco Giants: The defending National League champions have exactly the same broadcasting operation for 1963 that they had in '62. KSFO San Francisco, will originate the team's full schedule plus a number of exhibition games for the Golden West Network. The telecasts over KTVU (TV) San Francisco, include two pre-season contests with Cleveland and the nine Giant games against the Dodgers in Los Angeles. Russ Hodges and Lon Simmons will do the play-by-play.

St. Louis Cardinals: KMOX and KSD-TV St. Louis, are carrying Cardinal games again this season. KMOX has over 60 stations in its network now and says the total may reach 100 by the season's opener. The network extends over a 12-state area. KSD-TV is carrying 21 road games. Harry Caray and Jack Buck are handling the air coverage for radio-tv.

Baseball in color helps sell tint sets

DEALER SAYS IT'S HIS BIGGEST SELLING SEASON

The fourth consecutive year of color-casting of baseball by WGN-TV Chicago this season will delight more than just sponsors and fans. The color broadcasts of the daytime home games of the Chicago Cubs and White Sox will put real push into the sale of color tv sets too.

Sol Polk, president of Polk Bros., major Chicago chain, said Thursday that when the color games start in the spring they help kick off his biggest selling season of the year for color tv sets—bigger than the Christmas season. Polk Bros. claims to be the world's largest retailer of color sets.

Mr. Polk said he expects that color set sales in his stores this year will jump 50% over 1962. He felt that color baseball programs not only give existing color set owners new enjoyment from their sets and stimulate new-set owners to buy color, but they also help whet the appetite of the home viewer to go back to the ballpark and see the games live. The glory of color works wonders for everyone in the cycle, he explained.

WGN-TV airs all Cubs and Sox day home games in color but night games of the Sox are in black and white. The Cubs do not play at night in Chicago since Wrigley Field is not equipped with lights.

It was not known late last week just what proportion of commercials will be aired in color this season, but it was assumed that the WGN-TV sponsors will once again take advantage of the color dimension as much as possible although some commercials are still expected to be monochrome. WGN-TV has no extra charges for color.

WGN-TV will again feed some games to tv stations in other cities when their teams play the two Chicago teams and these feeds will be in color during the daytime.

INTERNATIONAL

Bevins asks bigger fees from contractors

The British government, in a proposal presented to the House of Commons last Monday (Feb. 25) by Postmaster General Reginald Bevins, will increase by more than 100% its share of the profit Britain's commercial tv system is piling up.

Mr. Bevins told Commons he wants 18 million pounds ($50.4 million) a year from the network—slightly more than double the present take—by raising the fee the British television program contractors pay for using government transmitters.

Britain has two television networks—the British Broadcasting Corp. which is financed by annual license fees paid by owners of tv sets, and the commercial system (Independent Television Authority) run by 15 companies located throughout Great Britain. The commercial tv companies have been earning approximately $420 million a year from advertisements, with yearly profits of about $70 million.

Radio NW pays $1 million for CHEK-TV Victoria

Sale of CHEK-TV Victoria, B. C., by David M. Armstrong and group to Radio NW Ltd. for about $1 million was announced last week.

Radio NW is headed by Frank Griffiths. It owns CKNW Westminster, B. C., and CJOB Winnipeg, Man. CHEK-TV operates on ch. 6 with 100 kw and is affiliated with CBC.

Two satellite transmitters on Vancouver Island, now owned by community groups, will become part of CHEK-TV next November.

The purchase must be approved by the Board of Broadcast Governors. A ruling is expected on March 26.

Experimental television started in Singapore

Experimental television program transmissions have begun in Singapore. This is the first stage of a project by the broadcasting division of the Singapore government's Ministry of Culture to provide a comprehensive tv network

Should teams share network tv rights?

The telecasts scheduled this year by CBS-TV's Game of the Week prompted Calvin Griffith, president of the Minnesota Twins, to repeat his proposal that visiting clubs should receive a share of the tv proceeds.

Mr. Griffith said he plans to bring this subject up for action at the annual meetings of the ball clubs in the summer or next winter. He pointed out that support from at least three other American League clubs would prevent approval for teams to negotiate separate contracts with networks. Approval demands support from seven clubs.

He said that at least 40 to 50% of the tv proceeds should be received by visiting clubs, and the amount of the individual shares should depend on the club's standing in the league.

Selection for home ball clubs represented on CBS-TV's weekend games has to "follow public interest," said William C. McPhail, vice president CBS TV Sports.

Mr. McPhail, referring to charges of favoritism in selecting ball clubs for CBS weekend telecasts, pointed out that New York Yankee games have consistently given the network a higher Nielsen rating.

The CBS-TV contract with the Yankee always for all weekend games at home except the last three in September. CBS also has contracts for home games of the Philadelphia Phillies, St. Louis Cardinals, Baltimore Orioles and Chicago Cubs.

Mr. McPhail indicated that present contractual agreements were not for life. He pointed out that when other teams become a top attraction, they will be considered by CBS-TV.
for the Southeast Asia island.

Initial facilities consist of one studio, an announcer's booth and control rooms. Transmitters are sited at Bukit Batok situated in the middle of the area. The surrounding terrain is flat, except for another hill to the west of Bukit Batok, and has a high density population. The studio is at Caldecott Hill alongside Radio Singapore studios. The complete station will carry programs in four languages: Malay, Mandarin Chinese, Tamil and English.

**Abroad in brief...**

'Biography' in Spanish • During the first six weeks that the Spanish-dubbed version of the half-hour *Biography* series was in release, it was sold in nine countries—Venezuela on the Venevision Network; Colombia on TV Nacional; Ecuador on HCP-TV; Panama on TV-2; Guatemala on TV-BOL-TV; Costa Rica on TI-TVC; El Salvador on YSEB-TV; Honduras on HRTG-TV and Nicaragua on YNSA-TV. Fremonde International, which handles overseas distribution, reports it has sold *Biography* in 20 foreign markets. The series is syndicated in the United States by Official Films.

MGM-TV's 'Iron Curtain' sale • MGM-TV has licensed to the Hungarian television network (Magyar Radio Ez Televisio), *The Islanders* and its 135-subject cartoon library. The transaction, first for MGM-TV behind the Iron Curtain, was consummated by John Spies, supervisor of United Kingdom-European sales, and Hungarofilms, Hungarian purchasing company in tv film and theatrical field. *Islanders* is a one-hour series.

**Canadian survey** • Spring survey of the Bureau of Broadcast Measurement, industry co-operative organization, will be held across Canada March 18-24. The BBM Toronto headquarters is sending out 109,000 logs for respondents to fill out that week showing listening and viewing by half-hour periods.

---

**FINANCIAL REPORTS**

**RCA net shows gain of 45% in '62**

SALES AND PROFITS HIGHEST SINCE COMPANY FOUNDED IN 1919

RCA reported last week that its sales and profits in 1962 reached the highest levels since the company's founding in 1919.

RCA's annual report also disclosed that its $1.75 billion in sales in 1962 included $379,197,000 from the tv and radio operations of subsidiary NBC.

The $1.75 billion in sales represented a hefty 13% increase over RCA's 1961 record high of $1.54 billion. Net profit (after federal income taxes) rose to a record $51.5 million, a 45% increase over last year's $35.5 million.

The NBC operation accounted for 22% of RCA total sales, the report indicated.

From operating income, RCA earnings per share of common stock were $2.84, compared with $1.95 in 1961 (and on the average, the report noted, there was a larger number of shares outstanding in 1962).

**Future Rosy** • A month ago, RCA management had predicted that first-quarter sales and earnings this year would surpass even the record start of 1962. That picture was presented before the New York Society of Security Analysts (Broadcasting, Jan. 28).

In the talk to analysts, RCA management had noted that NBC has increased sales in each of the past 15 years and expects to continue upward in 1963.

The annual report highlighted color tv and the affect of RCA's sale of common shares in Whirlpool Corp.

Color tv: Color set sales doubled over the previous year, profits increased fivefold, color tube production doubled, and color saved profit-squeezed dealers.

The report, issued by RCA Chairman David Sarnoff and President Elmer W. Engstrom, noted that as an industry, color tv produced revenues in excess...
of $200 million last year, and its rate of growth "suggests that it will surpass $400 million this year." Color sets and tubes were the largest profit contributors of any products sold by RCA in 1962, they said.

Whirlpool: In 1962, a capital gain of $6.96 million was realized from the sale of 991,816 shares of Whirlpool common, a nonrecurring income that added 41 cents per share of common stock to the operating earnings.

Other vital tax statistics: Profit before federal income taxes hit $107.9 million; manufacturing and service (commercial) account for 41% of the total sales, and in government, 35%; 2% came from radiotelegraph operations.

In the development, production, and sales of broadcast and communications equipment, RCA's business gains in the year were led by sales to an "expanding market for color and uhf tv stations, apparatus," the report stated.

The division (Broadcast and Communications Products) had a threefold increase in the sale of color film cameras, introduced new types of equipment for stations and accelerated its development of additional and improved color apparatus which will be introduced this year and in the future.

**Oak foresees increasing profits; '62 net up 63%**

The coming increase in uhf tv tuner volume holds an opportunity for Oak Manufacturing Co., E. A. Carter, president of the Crystal Lake components manufacturer, reported last week in announcing sales and net increases for 1962.

Not only must all tv receivers be equipped for uhf by April 1964, Mr. Carter pointed out, but the company is planning on introducing a new model uhf tuner soon.

Oak Manufacturing reported a net income after taxes of $907,031 ($1.32 a share) for the year. This is 63% over 1961's $557,662 (85 cents a share).

Oak also owns McCoy Electronics Co. and Delta-f Inc., manufacturers of quartz crystals and crystal control systems, and Hart Mfg. Co., producer of appliance controls and relays.

**Rollins' earnings up 24% for 9 months**

A 24% increase in earnings and an advance of 27% in revenues for the nine months ended Jan. 31 was reported last week by Rollins Broadcasting Inc.

Total revenues for the three-quarter period were $5,915,663, compared to the same 1962 period's $4,661,990. Net earnings after taxes amounted to $436,419 (46 cents a share) in this period, compared to $356,186 (37 cents a share) for the same time in 1962.

Cash flow for the nine months equalled $1,437,228, up almost $300,000 over the $1,140,133 for the same period in 1962.

The company's earnings for the first nine months of the current fiscal year, O. Wayne Rollins, president and treasurer of the company, reported, already equals the earnings for the entire last fiscal year.

At a meeting of the Rollins board Feb. 25, a regular quarterly dividend of 10 cents a common share and of 5 cents a Class B common share was declared. Payment will be made April 25 to stockholders of record March 25.

Rollins stations are WAMS Wilmington, Del.; WNJR Newark, N.J.; KDY Santa Monica, Calif.; WBEE Harvey, Ill.; WRAP Norfolk, Va.; WGEF Indianapolis, Ind.; WCHS-AM-TV Charleston, W. Va.; WEAT-TV Pensacola, Fla., and WPTZ-TV Plattsburgh, N.Y. Rollins also owns an outdoor advertising company based in San Antonio, Tex., and 10,000 acres of land in Okeechobee County, Fla.

**MGM’s lion to roar louder in future**

A brighter financial picture for Metro-Goldwyn-Mayer Inc. accompanied by a step-up in its television operations, was forecast by Robert H. O'Brien, president of MGM, at the company's annual meeting of stockholders in New York last Thursday (Feb. 28).

Mr. O'Brien reported that for 1963-64 the company will be represented on the television networks by six series, totalling 5½ hours of weekly time, approximately double the present amount of programming. Television, he added, is helping the company by supplying "a significant volume" of predictable production for the studios, thereby lowering the unit cost of MGM productions (features plus television).

He told stockholders that MGM intends to re-group and re-release to tv 700 pre-'49 films, noting that many of the station licenses are expiring. Another source of income, he pointed out, is its supply of post-'48 features which will be released to tv in limited numbers. MGM last week contracted with NBC-TV for use of 30 post-'48 films in 1963-64 (see story, page 63).

He acknowledged that a favorable financial position may not be achieved until later in this fiscal year but said he looked forward to increasing profits in fiscal 1963-64.

Jason Rabinovitz, general manager and director of business affairs, MGM-TV, was elected treasurer of MGM Inc. by the board of directors following the annual meeting.

**Record year in '62 reported by Zenith**

Zenith Radio Corp., Chicago, announced Thursday that preliminary figures show 1962 was another record-breaking year in both earnings and sales. The set maker has continued to make a new record for five of the past six years.

Net consolidated earnings for 1962 amounted to more than $19.6 million ($2.16 a share) after provision for income taxes of $2.1 million. This is a 9% increase over 1961's previous record earnings of $18 million (1.99 a share). 1962 sales of $312.2 plus million were 14% above 1961 sales of nearly $274.2 million, the previous record.

Zenith's earnings have more than doubled since 1957, with earnings for 1962 up 140% on a sales increase of 95%, the company said. Color tv "played an important part in Zenith's increased unit and dollar sales volume," the firm reported. 1962 was Zenith's...
first full color year.

Zenith said production and shipment of its black and white tv sets were at an all-time high in 1962, topping a million units for the fourth straight year. Radio set sales also continued to set records. 1963 sales look equally promising. Zenith said, since January factory shipments of both color and monochrome tv sets marked record highs for any month in the company's history.

Zenith reported that color tv tube production has been started on a pilot basis by its subsidiary, Rauland Corp., in a new addition to Rauland's main plant in Chicago. Zenith said Rauland expects to be in "full production" of color tv tubes by mid-1963.

Tv-Electronics Fund net assets up 13.7%

Total net assets of Television-Electronics Fund Inc., Chicago investment company, increased by 13.7% in the first quarter of the fiscal year, ended Jan. 31, to $376.3 million, the fund reported last week. At the same period last year, assets stood at $331 million.

Net asset value of each share of the fund rose from $6.59 to $7.31 in the quarter; a gain of 14.9% after adjustment for the capital gains distribution made in November 1962.

Among changes in holdings, the fund reported, were reductions in common stock ownership in the following broadcast and tv-radio manufacturing companies, among others: American Broadcast-Paramount Theatres Inc., CBS Inc., General Tire & Rubber Co. (RKO General Inc.), Storer Broadcasting Co., and Zenith Radio Corp.

Financial notes . . .

Dime dividend • The board of directors of Emerson Radio & Phonograph Corp., Jersey City, N. J., has voted a 10 cent a share cash dividend, payable March 20, 1963, to stockholders of record on March 6, 1963.

MPO report • MPO Videotronics Inc., New York, at its annual stockholders' meeting Feb. 25, reported first quarter sales for the period ended Jan. 31, 1963, were approximately 24% ahead of the same quarter a year ago. The tv commercial production company told stockholders that preliminary estimates indicate the sales increase has resulted in more than doubling the before-tax profits for the similar fiscal period a year ago.

Quarterly dividend • United Artists Corp., New York, has declared a regular quarterly dividend of 50 cents per common share to stockholders of record March 15, payable March 29.

Storer shows 43% increase in '62 net

EARNINGS HIT $2.61 A SHARE, FIRM'S HIGHEST

Storer Broadcasting Co. has reported an increase of 43% in net earnings on sales increases of 19% for 1962.

Net earnings after taxes for 1962 were $6,353,326 ($2.61 a share). This compares to net income of $4,453,681 ($1.80 a share) in 1961.

The 1962 profits include a non-recurring capital gain of $911,459 net after taxes from the sale of WWVA-AM-FM Wheeling, W. Va., to Ira Herbert, Bernice Judis and Emil Mogul for $1.3 million.

The 1962 earning per share are the highest in the history of the Storer company, it was reported. The previous high was in 1957 when $2.58 a share was earned. The 1957 earning included also a non-recurring capital gain of $1,966,122 from the sale of WBRC-AM-TV Birmingham, Ala., to the Taft Stations for $6,350,000.

Net sales before taxes in 1962 reached $13,186,654, compared to $9,848,333 in 1961. Gross sales in 1962 were $37,086,198; in 1961 they were $31,160,791.

3M net shows gain for eleventh year

Increases in both sales and earnings were reported for the 11th consecutive year by Minnesota Mining & Mfg. Co., in announcing 1962 financial figures last week. 3M owns Mutual Broadcasting System.

Consolidated sales in 1962 reached $687,085,773, up 12% from the previous year's $613,896,221.

Net income last year was $83,690,090 ($1.61 a share). This compares to 1961 net income of $75,171,837 ($1.45 a share). Dividends in 1962 came to 80 cents a share, compared to 1961 dividends totalling 65 cents a share.

Tape and allied products accounted for 16% of sales volume, 3M reported. Total current assets at the end of 1962 were $315,244,335. At the end of 1961 this was $269,920,850.
Put your walkin’ shoes on, Lucy

RADIO-TV PEOPLE JOIN LATEST NATIONAL FAD–HIKES

The New Frontier’s physical fitness fad for long-distance hikes has resulted in a plethora of walking expeditions by radio-tv personalities.

Perhaps the most spectacular of those reported to date was the 28-mile hike of KDKA Pittsburgh d.j. Clark Race. He was accompanied, at the beginning, by about 5,000 people. About 2,000 of them finished the Sunday (Feb. 17) stroll from Pittsburgh’s Gateway Center to the campus of Washington & Jefferson College in Washington, Pa.

In Boston, WBZ’s “other Bob Kennedy” (host of the station’s Program PM) tried to outwalk Attorney General Robert Kennedy, who hiked 50 miles in 17 hours 15 minutes. WBZ’s Mr. Kennedy was to be accompanied by a news wagon, an ambulance, and a “Heart Fund Trailer” to collect funds. At preствие, no word of Mr. Kennedy’s fate had been received from WBZ.

Also in Boston, WCOP-AM-FM’s Bud Kelly challenged Dave Sennett of WPRO Providence, R. I., to a hiking contest. Both were to walk for five hours with the one walking the furthest the winner. Listeners of both stations were invited to guess how far each would walk in the five-hour period. First prize is a pedometer and a pair of walking shoes.

Joe Templeton, WJZ-TV Baltimore assistant news director hiked the 36 miles from Baltimore to Washington at an average speed of 4½ miles per hour.

Wayne Brown, WBAP-TV Ft. Worth, Tex., reporter-cameraman, walked the 50 miles from Ft. Worth to Glen Rose, Tex., in 13 hours 15 minutes.

WFUN Miami also planned a 50 mile hike by its seven d.j.s.

The disc jockeys were joined by Mayor Robert King, marines, soldiers, two mailmen and a troop of Boy Scouts for their trek.

Tv executives from WTEV (TV) Providence, R. I., managed to walk between 25 miles and 35½ miles.

KFMB-TV San Diego had Bob Mills walk the 50-mile distance in the competition.

Part of 5,000 who followed KDKA’s Clark Race on 28-mile jaunt leave Pittsburgh headed for Washington, Pa.

awarded to about 200 who walked at least 30 miles.

Other stations announcing hikes include: KMPC Los Angeles; KOGO San Diego; WDGY Minneapolis; WJOY Burlington, Vt.; KBOX Dallas.

To answer the walking craze, KCBS San Francisco personality Dave McElhatton conducted a 20-hour “resta-thon” from a makeshift bed in the back of the station’s news station wagon.

Perhaps the next physical fitness fad will be triggered by the publication last week of a 1909 letter from President Theodore Roosevelt, in which he approved three-day 100 mile horseback rides as part of the physical fitness training for the armed forces. (Anyone for a 100-mile Merry-Go-Round ride?)

How heavy is ‘Pebbles’

Screen Gems Inc. reports that at the conclusion of the March 8 episode of The Flintstones program on ABC-TV, the name of the winner of its “Pebbles” contest will be announced. Who is “Pebbles?” She is the baby that was born on the Flintstones episode Feb. 22. The viewer who guesses the weight of “Pebbles” most accurately will win a pair of first-class, round-the-world tickets on British Overseas Airways with stops in 31 cities: $2,000 in cash to cover expenses, and a “Pebbles” doll.

Drumbeats...

In or out? • Officials of WFBR Baltimore have been awarded gold keys—to the Maryland State Penitentiary. The keys honor the station’s participation in the penitentiary’s education program.

Scrap metal • KING Seattle collected over a ton of old license plates for the benefit of the Children’s Orthopedic Hospital. The plates will be sold as scrap metal with proceeds going to the hospital.

Weather on the channel • WICC Bridgeport, Conn., will send its weather boat, “Channel 60” out in Long Island Sound for from-the-water marine reports this year, each weekend during the boating season. The boat will cruise between New York City and Montauk Point giving hourly reports on conditions in the sound.

Housewife-copywriter • A Brooklyn, N. Y., housewife, winner of a Strauss Broadcasting Group commercial writing contest, won a $50 bond and the chance to hear her commercial on WMCA New York. The Strauss station conducted the contest for client Vick’s cough drops.
BROADCAST ADVERTISING

David Inouye, former vp of Marplan Div. of McCann-Erickson, New York, joins Dancer-Fitzgerald-Sample, that city, as vp and director of research.

Lee Lauffer, vp and radio-tv director of Robinson & Haynes, Los Angeles advertising agency, resigns to join Donahue & Coe, that city, as account supervisor and director of new business activities.

Kennard B. Caflfe, former president of Stallion Productions, Baltimore tv production firm, joins Cargill, Wilson & Acree, Richmond and Charlotte advertising agency, as radio-tv director. Mr. Caflfe previously served as producer-director at WJZ-TV Baltimore for eight years.

Harold G. Dickey appointed copy chief at Fletcher, Wessel & Enright, St. Joseph, Mo., advertising agency.

THE MEDIA

Murray Arnold, program director of WPEN-AM-FM Philadelphia, promoted to general manager, succeeding William B. Caskey, executive vp and general manager, who has been appointed to position of general consultant to Wn. Penn Broadcasting Co. (licensee of stations) and Mustrone, a background music service. Mr. Caskey, hearing his doctor's advice, plans to locate permanently in Florida. He will keep in close contact with station and its executives and represent company at various conventions and other affairs. Mr. Arnold has been station manager and responsible for WPEN's programming since joining station in 1954.

Stanley LeVine, sales manager of KSAN San Francisco, promoted to general manager, succeeding J. Walter Carroll, who was recently appointed station's national sales manager.

Charles A. Scruggs named KSAN program director.

Shorty King, air personality at WJEJ-AM-FM Hagerstown, Md., resigns to become station manager of WWDS, new daytime outlet in Everett, Pa., with target date of March 15.

Gene Sutorius, formerly of Del Wood Assoc., New York, joins Vic Pirano Assoc., radio-tv representative firm, that city, as vp for business development.

Lad F. Hlavaty, chief engineer of KCRG-AM-TV Cedar Rapids, Iowa, appointed chief engineer of new ch. 8 WQAD-TV Moline, III., which has target date of Aug. 1. Announcement was made by Frank Schreiber, vp-general manager of WQAD-TV which will become ABC-TV outlet in Quad-City market.

James M. King, formerly with Television Advertising Representatives in Chicago and New York, appointed sales manager of KDKA-TV Pittsburgh, replacing Henry V. Greene Jr., who recently was named national tv sales manager for Westinghouse Broad-

casting Co. Prior to joining TwAR, Mr. King was associated with Peters, Griffin, Woodward and George P. Hollingsbery Co., New York.

Bill McBride, program director of WOW-TV Omaha, Neb., for past 10 years, named station manager, replacing C. A. (Al) Larson, who resigned last week. Mr. McBride joined WOW in October 1947 as radio announcer.

Richard C. Shepard, station manager of WGR-AM-FM Buffalo, N. Y., resigns to become local-regional sales manager of WKBW-TV, that city.

Dick Novak appointed sales manager of KGVO Missoula, Mont. Other KGVO appointments: Dave McNair, program director; Marge Elting, office manager; Howard McDonald, traffic director; Dolores Nelson, women's director; and Ken Hansen, chief engineer.

James Kilian, former account executive with WJZ-TV Baltimore, and Charles Stewart, director of sales for...
Romper Room Inc., joins WTTG (TV) Washington as account executives.

Dick Newman, formerly with WVOX New Rochelle, N. Y., joins WLEE Richmond, Va., as account executive.

Mike Jarvis appointed sales service director of WLWC (TV) Columbus, Ohio, succeeding Jim Lackey, who has been promoted to account executive.

A. P. (Mac) McKin and Art Vogel join sales staff of WKAT-AM-FM Miami Beach, Fla. John Clark, Jack Porter, Bob Bonner and Bud Lee join station's news staff; Bob Smith named WKAT sports announcer, and Bill Deane to outlets' announcing staff.

Edwin Cohen, associate director of national instructional television library of National Educational Television & Radio Center, New York, appointed director of that unit.

John Abernathy, account executive at KOGO-TV San Diego, Calif., named merchandising manager. Burke Ormsby, KOGO-TV program director, elected president of board of San Diego Employers Assn., numbering more than 200 of city's business firms.

Charles H. Hughes, former sports announcer and weatherman for WMAL-TV (ABC) Washington, joins Washington bureau of ABC News as staff and commercial announcer. Mr. Hughes will also produce and direct Washington origination for network news unit. Prior to joining WMAL-TV, he produced and hosted American Airlines' Music 'Til Dawn show on WTOP-AM-FM Washington. Currently, Mr. Hughes is news-caster with Voice of America and announces nationally syndicated U. S. Air Force show Serenade in Blue.

Brent Hill, announcer at WSB-AM-FM Atlanta, named operations manager, replacing Ted Hightower, who resigned effective March 15 to join public information office of U. S. Department of Agriculture.

Ted Austin appointed program director of WSOV-AM-Charlotte, N. C. Robert McCourt, production manager, assumes added duties in close cooperation with Mr. Austin.

Howard B. Mouatt, chief engineer of WHEC-AM-TV Rochester, N. Y., resigns to accept position with Space

KDKA manager dies

Lester R. Rawlins, 54, general manager of KDKA-AM-FM Pittsburgh, died Feb. 23 at St. Francis Hospital, that city. Mr. Rawlins joined Westinghouse organization in March 1942 as supervisor of employment at Louisville (Ky.) Ordnance Div., and in November 1943 was advanced to supervisor of industrial relations, handling all of division's labor negotiations and contracts. In April 1946 he was transferred to Philadelphia as manager of industrial relations with primary assignment of coordination of industrial relations policies and procedures for what was then known as Westinghouse Radio Stations Inc. Mr. Rawlins was named manager of KYW Philadelphia (call letters later were moved to Cleveland) in 1950 and assumed general management of KDKA in 1952.

Mr. Rawlins

Mr. Hughes

Mr. Holmes

Mr. Rawlins

Thurston S. Holmes appointed director of promotion and public relations for KERO-TV Bakersfield, Calif.

Dick Masterman, formerly with WGAW Gardner and WORC Worcester, both Mass., announces his resignation as chief of staff of WTSR Brattleboro, Vt.

Robert A. Brennan and Arthur E. Patterson named associate producers at CBS Newsfilm, New York. Mr. Brennan formerly was news editor for CBS-owned KMOX-TV St. Louis. Mr. Patterson has been assistant producer at Newsfilm since 1959. Stanley Zeitlin, member of Newsfilm department, promoted to assistant producer.

INTERNATIONAL

Brian T. Brolly, of Telefis Eireann, Dublin, Ireland, appointed head of Review Productions, Toronto, Canada, effective in June, and also will join Music Corp. of America to develop further their international activities. Mr. Brolly formerly represented MCA in United Kingdom and Europe before joining Telefis Eireann two years ago.

Ray Hazan, national manager of radio news for Canadian Broadcasting Corp., Toronto, promoted to tv news manager Charles Gunning named radio news manager at CBC, Toronto.

Seymour Joly de Lotbiniere, controller of BBC-TV program services, appointed controller of BBC Western Region, effective Aug. I. Mr. de Lotbiniere replaces Frank Gillard, who succeeds Sir Lindsay Wellington as BBC director of sound broadcasting.

EQUIPMENT & ENGINEERING

Louis R. Wanner, chief engineer of Sylvania Electric Products' parts division in Warren, Pa., appointed chief engineer of company's receiving tube operation in Emporium, Pa. Rudolph E. Carlson Jr. named product planning manager for Sylvania Home & Commercial Electronics Corp., Batavia, N. Y. Mr. Carlson, who will be responsible for product planning of Sylvania's entire line of tv, stereophonic high-fidelity phonographs, and radios, was formerly with Motorola Inc. for seven years as assistant director of tv engineering and more recently as assistant product planning manager. Mr. Wanner joined Sylvania in 1948 and was named to his present post in 1959.

PROGRAMMING

John Clark, formerly with ABC, ap-
pointed sales director of Mel Blanc Assoc., Hollywood production firm.

Michael M. Sillerman, formerly partner and executive vp in charge of sales of Programs for Television Inc., New York, joins sales staff of Four Star Distribution Corp., that city. Earlier, in 1953, Mr. Sillerman helped organize Television Programs of America Inc., New York, and served as its executive vp in charge of sales.

DEATHS

Eugene Peter O'Fallon, 72, Colorado radio-tv pioneer, died Feb. 16 at St. Joseph's Hospital in Denver of kidney ailment after three-week illness. Mr. O'Fallon started KFEL (now KIMN) Denver in 1932 that became KFEL-TV (now KTVR [TV]) in 1952, Denver's first television station and first post "tv-allocations-freeze" station in U. S.

Freeze was in effect through early 1950's. He also was pioneer Im radio broadcaster, having started Muzak Electronic Network in that area and was one of founders of Broadcast Music Inc. He was sales manager of KVOD (now KHOW) Denver when that station shared air time with KFEL.

Crosley President Dunville dies at 57

Robert Edwin Dunville, 57, president of Crosley Broadcasting Corp., Cincinnati, died last Thursday (Feb. 28) at Bethesda Hospital, that city, where he had been patient for two weeks previously. He underwent serious operation last year. Mr. Dunville entered broadcast sales work in 1930s following graduation from U. of Missouri School of Journalism and stint as advertising manager for St. Louis automobile company. It was in St. Louis that Mr. Dunville became acquainted with James D. Shouse, then manager of CBS-owned KMOX there, and with whom he joined as member of sales staff. When Mr. Shouse left St. Louis to take over management of Crosley's WLW Cincinnati, Mr. Dunville joined him in move. He became sales manager of station and with expansion of Crosley into television (in Cincinnati, Dayton, Columbus and Indianapolis), Mr. Dunville became sales director for whole group. In 1949, when Mr. Shouse was named chairman of Crosley group, Mr. Dunville was named president and general manager of Crosley Broadcasting Corp. Crosley Stations are WLW and WLWT (TV) Cincinnati, WWDN (TV) Dayton and WLWC (TV) Columbus, all Ohio, and WLWI (TV) Indianapolis, Ind.

Mr. Dunville

Mr. O'Fallon

RADIO

Situations Wanted—Management

RADIO AND/OR TV
MANAGER AVAILABLE

EXPERIENCE: Practical Radio and
TV Management in Metro, medium and
farm markets since early forties. Mostly
with two major Publishing/Broadcasting
organizations—Cokes and Time Inc.

WHY AVAILABLE? Resigned pos-
tion of Vice President/General Man-
ger of Time's largest metro market radio
and TV stations 2½ years ago to op-
erate own business (a major
orange franchise). Have just closed out
this business due to citrus freeze that
caused a regional business recession.
No serious loss to me.

Looking for Radio and/or TV manage-
ment opportunity, preferably southwest
or west coast. Personal interview will
convince you of my mature abilities to
profitably operate your broadcast prop-
gerty in a manner in which you can en-
joy pride of ownership. Best of refer-
ences.

Help Wanted—Management

CALIFORNIA OPPORTUNITY

Top flight program director-operations manager with experience in all phases of operation
needed now for growing CBS network. Department is small so must be able to double in trandi-
as well as delegate, follow up, train personnel, control and supervise program department
with strong emphasis on creative production for local sales as well as expansion of news
operation.
Regardless of your position in radio or television, if you have considered changing from your
present position to a better opportunity we would like to hear from you. Because of expansion in
radio and television, we will have future openings in traffic, sales, continuity and art. If you are
versatile and have experience in any phase of broadcasting we would like to hear from you.
Good salary, excellent working conditions and fringe benefits. Give complete in-
formation in first letter with samples of work where applicable.

Rules & Standards

AMENDED

a. Commission amended its rules to extend permissive use of automatic devices for keeping operating logs, also provision for remote maintenance logging, and consolidating all logging requirements under single sections of rules. New rules are substantially the same as those proposed June 6, 1962. In adopting them, commission directed by National Assn. of Broadcast Employees for hearing since it is not making any changes in present operator requirements. Action Feb. 20.

PROPOSED

a. Commission invites comments by April 1 for proposed rule making based on petition by Pennsylvania Educational Network Study on behalf of Dept. of Public Instruction, which would add new rules for establishment of channels for educational use in that state. It would reserve chs. 39 through 49 for educational use in downtown and assign educational chs. 56 to Altoona, 57 to Clearfield, 58 to Altoona, and 68 to Scranton. Commercial chs. 71 would be substituted for ch. 65 in Shannone. Assignment of channels proposed would require concurrence of Canadian authorities. Action Feb. 20.

b. Commission invites comments by April 1 to notice of proposed rulemaking looking toward amending tv table of assignments to add uhf ch. 18 to Gaithersburg, Md., for tv antenna use. Also addition of two electrical equipment manufacturing firms in Gaithersburg, petitioning for license and stated it proposed to file application for requested channel. Action Feb. 20.

PETITION FOR RULEMAKING FILED
Tat Best, Co., Dayton, Ohio—Requests amendment of table of tv assignments so as to delete ch. 41 from Piqua, Ohio, and add it to Dayton and assign ch. 57 to Piqua. Received Feb. 18.

(For the Record) 87
THIS PIECE OF CLOTH SILENCED 1000 GUNS!

Almost a hundred years ago a doctor wearing a Red Cross armband stepped out on a battlefield in Europe. As he moved between the lines caring for the wounded, the guns of both armies fell silent. From that moment on the Red Cross has been a respected symbol of mercy for all men.

Today Red Cross nurses and doctors are still bringing relief to people suffering from disaster, disease and war. In order to continue this vital work, the American Red Cross must turn to you for support. Don't let it down!

THIS TELEVISION FILM

100 YEARS YOUNG

9 minutes — 16mm — black and white — sound — cleared for TV

100 YEARS YOUNG salutes the 100th worldwide anniversary of the Red Cross movement. The first 4½ minutes depict the birth of the Red Cross idea when Henri Dunant witnessed the Battle of Solferino. The second 4½ minutes show that idea in action on today's international scene—plus dramatic scenes of Red Cross services on the home front. The film can be shown as a 9-minute TV feature or as two 4½-minute programs.

Action scenes of: President Kennedy, Battle of Solferino, Guam Typhoon, Algerian Relief, Congo Relief, East Coast Storm.

THESE TV SPOTS

GORDON AND SHEILA MacRAE, THE AIR FORCE SYMPHONY, and the SINGING SERGEANTS present a new song by Alvy West — “ALWAYS THERE” — as art depicts worldwide Red Cross services. Available in COLOR and BLACK and WHITE. 16mm and 35mm.

Also COLOR SLIDES, TEOPS, FLIP CARDS, with voice over copy.

OUR RESPECTS to Salvatore Joseph Iannucci Jr.

Negotiating program contracts—slow and complicated

The hat may make the man and the program the network. But a hat is simply purchased: if it looks good and fits, a sale can be easily consummated. And there the similarity of the hat and program ends.

There’s seldom a quick, uncomplicated way for a network to contract for a television program. This is true particularly in today’s competitive television market.

In negotiating for a new network program, people such as CBS-TV’s Salvatore J. Iannucci will tell you, it’s necessary to take into consideration the needs and responsibilities of the network, the plans of and effect upon sales and programming, and the interests of station relations.

There are many facets in acquiring a program, Mr. Iannucci, who volunteered the analogy of hat and program, explains from his austere, impressive 19th floor office at 485 Madison Ave. in New York. This executive reflects a cool, calm personality in the surroundings in which he works. The desk top is swept clean, and indirect lighting envelops the wall facing the visitor and to the back of Mr. Iannucci.

Contract Cornerstone • Reflecting his training in law, Mr. Iannucci says a program contract must “reflect and fill all the needs of the company (the network). The contract must cover and protect all interests.”

Salvatore Joseph Iannucci Jr. is vice president-business affairs, CBS Television Network, a title received officially nearly a year ago, on May 29, 1962.

CBS-TV this season has had conspicuous success with its nighttime schedule, and Mr. Iannucci inevitably must come to the foreground in any serious discussion of the current television season.

(And CBS-TV hasn’t stopped with this season. It’s the first of the networks to wrap up a firm nighttime program schedule for 1963-64 and is ready to go except for a full roster of advertisers—and that appears to be no special problem.)

The business affairs function attempts to translate contractually what the network, producer and talent agree through negotiation, to be the best arrangement covering all parties involved in a network tv program deal.

A concise man, Mr. Iannucci answers the question of his department’s workload by noting that it’s a year-round job, but particularly in December through March with the lining up of talent and of making new and renewed program arrangements for the coming television season.

Family in Law • The Iannuccis might be said to be a family of lawyers—he’s one of three attorneys in his immediate family. His father has a practice in New York City, and a brother, Joseph, is a tax attorney who has represented show business people (talent and producers). Another brother (Robert Iannucci) is an agency account executive.

A young network executive—he is probably the youngest in network history to have achieved such a title and degree of responsibility in his area—Mr. Iannucci obtained a degree from Harvard Law School only 10 years ago. In 1950, he graduated from New York U. with a Bachelor of Arts in Political Science. He was born in Brooklyn on Sept. 24, 1927.

Except for an urge for politics—he dabbled a bit after law school at the Lexington (New York City) Democratic Club—Mr. Iannucci’s objective in life is as clear as a carefully drawn contract. He has always wanted to be in law but in the capacity of working for big business—at a corporation—as contrasted to a private practice.

Inevitably, the Harvard graduate who sought a taste of big business and saw his possibilities in the dramatic, competitive dynamism of an expanding tv medium, he gravitated toward broadcasting. From RCA’s patent division (licensing of patents), Mr. Iannucci moved on to ABC and its legal department and only two years after graduating from Harvard he went to CBS’s business affairs department.

Eight years after he joined CBS, Mr. Iannucci had become one of the top executives of its television network—he served for a year (1959) as director of contracts-talent and rights, and two years (1960-62) as director of business affairs.

On the Beach • Mr. Iannucci’s job has an adhesive quality but when he manages to get unstuck for awhile—“when they get me off”—he’s prone to just “beach it.” “I’m a beach lounger,” he explains. “I’m a theater-goer and the usual summer athlete who swims, golfs and plays tennis. I do play some squash and work out a bit at the gym.” He has a place at West Hampton on Long Island where he can unwind and enjoy the family.

But actually, he notes, it’s “hard to have interests” on his job.

His wife is the former Aileen O’Hara who was a secretary at Young & Rubicam. They were married on Feb. 2, 1957, and have three children: Tommy, Peter and Helene, the latter born last April.

Interests apart from the immediate: Mr. Iannucci speaks of looking forward to his making a contribution to community service, possibly in politics or in the arts. He has an appreciation of art and of people for he enjoys being with and communicating with people.

What special talent does Mr. Iannucci’s position require? Aside from the usual legal skills, there are many intangibles. Among them: not being deceived by what appears on just the surface of a proposed deal. It is necessary, according to Mr. Iannucci, to get to the “core” of a proposal and to do so quickly. He points out that television, with its competitive nature and time schedules demands fast decisions and fast action. He adds that it’s necessary to be realistic about the television business—recognizing its “true values and true needs.”

Business affairs is entrusted with budgeting or pricing-out all shows, including network produced programs and “outside” packages. It counsels and consults with programming people and the sales department. Moreover, business affairs must be cognizant of the network and advertiser rights as well as the program’s costs to advertisers.

Mr. Iannucci recognizes a challenge: the most stimulating is the sales agent he continually deals with—a breed he finds with “lots of savvy,” and providing a good deal of excitement as “they know the business.”

BROADCASTING, March 4, 1963
Merrily it rolls along

TELVISION has been a bandwagon operation from the start, but this year’s model seems apt to be bigger and roll faster—and collect more fares—than even its most successful predecessors. Two months after the end of a year in which they invested unprecedented millions in television, advertisers are getting down on the dotted line again with an enthusiasm sometimes hard to distinguish from eagerness.

Take the networks. Their big, bellwether advertisers are signing into the coming season’s schedule faster than ever before at this point in the calendar (BROADCASTING, Feb. 11, 25). By all the standard indicators, national spot and local business are also moving along at a pace uncommonly swift for this time of year.

The purpose of getting on a bandwagon, of course, is to be ahead of the pack on what hopefully will be a short ride to a sure thing. Television comes closer to serving this purpose than any other advertising conveyance except, possibly, radio. If it had not proved the power of its performance, its list of buyers would be shorter and its prospects less interested.

But bandwagons do break down sometimes, as happened to the subliminal-projection calliope a few years ago, and even if they don’t grind to a halt they can’t be expected to maintain speed on old momentum alone. Television’s immediate prospects were never brighter, but in contemplating this happy fact its programmers and salesmen would be smart to resist any temptation to ease up. It’s easier to stay on top than to get there, but only if you work at it.

Equal freedoms

BROADCAST journalism will be given two important chances to assert itself in congressional consideration of bills to modify the political broadcasting law and to open House committee hearings to television and radio broadcasts. The chances must be exploited fully.

Hearings will be held today by the House Communications Subcommittee on a proposal to suspend the application of Sec. 315, the equal time law, to presidential and vice presidential campaigns in 1964. It may be presumed that broadcast leaders will argue for stronger measures, including repeal of the law.

Hearings will be held later by the House Rules Committee on a proposal to permit radio and television coverage of House committee sessions. Only congressmen may appear as witnesses at Rules Committee hearings, but there is much that broadcasters can do outside the hearing room to encourage favorable action.

Both bills were introduced by Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, and both seem to have a good chance of adoption. Mr. Harris is not one to back losing causes.

His bill to open committee hearings to broadcast coverage deserves all the support that broadcasters can muster. The exclusion of radio and television from House proceedings is an anachronism and has imposed on broadcasters a second-class status in the company of media covering the Congress. Broadcasters ought to advise their congressmen of the need to lift the outdated rule against modern journalism.

The bill to suspend Sec. 315 for the 1964 presidential and vice presidential campaigns falls far short of the relief that broadcasters must obtain if radio and television are to grow as journalistic forces. This bill will face little opposition, for the record of broadcasting in the 1960 campaign, during which a similar suspension of Sec. 315 was in effect, gave no reason for opposition. Repeal of Sec. 315, how-

ever, will be another matter. Only a massive and extended campaign by a fully united front of broadcasters can force the Congress to kill a law that many congressmen believe guarantees them access to radio and television.

It will not be enough for broadcast witnesses to make the case for repeal of Sec. 315, no matter how eloquent they may be. The case for repeal must be carried to every member of the Senate and House by broadcasters from their own districts. In this cause broadcasters have some valuable allies, including Sen. Vance Hartke (D-Ind.) who pledged his support last week in a speech to the conference of presidents of state broadcaster associations.

One good measurement of any journalism medium is the vigor with which it seeks maximum freedom to operate. The measurement of broadcast journalism will be taken in the fight for repeal of Sec. 315 and for admission to House hearings.

Temporary chairman

CANDOR is a quality that the FCC demands of all its licensees. At the mere suspicion of a lack of it, the commission is apt to start disciplinary action.

If candor is to be required of licensees, as indeed it ought to be, no less must be expected of the commission itself—and especially of its chairman. Candor has not been among Newton N. Minow’s more conspicuous qualities since BROADCASTING on Feb. 11 broke the story of his plans to resign.

Mr. Minow has made two public statements on the subject, the first released by the public information office of the FCC on the day BROADCASTING’s story appeared and the second delivered by himself last Wednesday in answer to a direct question by Sen. John Pastore, chairman of the Senate Communications Subcommittee. In neither statement has Mr. Minow denied the truth of BROADCASTING’s report.

In effect Mr. Minow’s comments have confirmed his intention to leave the commission but have left unsettled the date on which he will leave. His present status of uncertainty puts the FCC in the awkward position of having a leader who is expected to quit any time. The longer this condition prevails the more disorganization will set in. Things move slowly enough at the FCC under stable management.

PEOPLES BROADCASTING CORPORATION

Sioux City, Iowa, Sioux Falls and Yankton, South Dakota
Represented by Katz
Almost 2 million South Florida residents and 5 million visitors each year see Channel 7, WCKT, NBC-Miami. Visiting viewers return home to spread the word about what they’ve seen in South Florida, while residents become “7-regulars,” attracted by top-notch NBC programming and the many in-depth, locally originated, informative and entertaining shows. These include:

**CAMERA 7** — Sundays 5:30 to 6 p.m.
A most interesting documentary series that penetrates local glamour and glitter for a candid view of South Florida people — their problems, projects and ideals.

**FLORIDA FORUM** — Sundays 6:30 to 7 p.m.
Weekly town-meeting series in which a panel of experts explores timely issues of interest to South Florida and answers questions from the audience. Educational and entertaining, too!

**OUTLOOK** — Mondays 10:30 to 11 p.m.
A local news documentary that probes the facets behind current South Florida problems, as presented by those most closely involved. An informative program produced in a manner to offer interest and entertainment to our viewers.
WGAL-TV delivers a loyal, responsive audience. This unequaled viewer following results from fourteen years of pioneering, finest facilities, and the most complete and modern equipment in the area. Channel 8 is the only single medium in this entire region that assures full sales power for your advertising dollars.

WGAL-TV
Channel 8
Lancaster, Pa.
STEINMAN STATION • Clair McCollough, Pres.
New FCC name

Add W. Ervin (Red) James, 52, to list of those being urged for appointment to FCC to replace Newton N. Minow. Mr. James, now Houston attorney in law firm headed by Roy Hofheinz (former Houston mayor and station owner), is liberal Democrat and no stranger to Washington. Native of Alabama, he first served as legal assistant to one of FCC’s most controversial members, Clifford J. Durr (1941-1948), was assistant secretary and assistant to general counsel before entering Navy in 1944, and returned to FCC in 1946 as legal assistant to then Chairman Paul A. Porter. He would have backing of Vice President Lyndon B. Johnson and probably of Texas Sen. Yarborough and Alabama Sens. Hill and Sparkman.

Still no further word on departure of Chairman Minow, but best bet seems to be by June 1 with announcement of swan song at NAB convention in Chicago next month. It’s likely that FCC Broadcast Bureau Chief Ken Cox will be favorably reported by Senate Commerce Committee tomorrow (March 12) to succeed Commissioner T. A. M. Craven and that he will assume his commissionership following week.

Colorado sale

Deal to sell ch. 11 KKTU (TV) and KFMH (FM) Colorado Springs and KGHF Pueblo, Colo., for $1,100,000 has been made but not to Tele-Broadcasters Corp., with whom original negotiations had been undertaken. Purchaser is Willard W. Garvey, Wichita, Kan., who has grain and oil interests in Midwest and recently started weekly newspaper, World, in Washington, D. C. James D. Russell, president and general manager of station, and Robert D. Ellis, commercial manager (both minority stockholders), will continue with purchaser under five-year contract. Majority stockholder of sellers is Gifford Phillips. Mr. Russell disclosed last week that negotiations with Tele-Broadcasters Corp., headed by H. Scott Killgore, had been terminated some time ago.

Double trouble

Broadcast rating services, already under attack in Washington, D. C. (see story, page 62), face another problem in California. That state’s tax people are contending that rating reports are published as booklets which are commodities and therefore subject to 4% state sales tax. Similar theory was advanced two years ago in effort to levy sales tax not only on art work and other “tangible property” purchased or produced by advertising agencies, but also on all research, copy and other agency services rendered in connection with such “tangible property.” Western States Advertising Agencies Assn. squelched that move by patient explanation that unlike retailers who sell things to customers, advertising agencies buy things for clients (BROADCASTING, June 19, 1961).

Frozen assets

When Voice of America’s giant shortwave transmitting facility in Greenville, N. C., began operating earlier this year, agency found itself with omelet that needed unscrambling. Problem involved CBS-owned shortwave transmitting stations in Wayne, N. J., and Brentwood, N. Y., and, to lesser extent, General Electric station in Schenectady, N. Y. Voice had been renting them since World War II and, over years, had put considerable amount of equipment into them. With Greenville station operating, VOA wanted to give up all three stations, but it couldn’t walk away from millions of dollars of government-owned antennas and transmitters, even if it wanted to. So long as equipment is on privately owned sites, VOA has to pay rent. And carting stuff off for use elsewhere was considered uneconomic.

Decision reached, according to VOA Director Henry Loomis, is to leave onelet scrambled, and attempt to sell equipment, as it stands, as government surplus. Purchaser would have to make arrangements with CBS and GE and get licenses from FCC before using equipment. But that wouldn’t be VOA’s problem.

Dual spots

Problem has arisen in catv situation which may plague both tv stations and cable operators. Cable company in southern city carries outside station and local station on two channels of its system. Both stations are affiliated with same network, so cable customers get same programs on two channels of system. But cable company has arrangement with local station permitting station to delete commercials from outside station and substituting its own commercials. What happens then is local station’s commercials appear on both channels of cable system. Query: How about years-old contention by catv operators that all they do is pick up tv signal and deliver it untouched to customers?

Tape export

Syndicators of programs overseas are said to be making strenuous efforts to place more of their taped shows in foreign markets. One obstacle that has been overcome is satisfactory kinescope from tape (tape cannot be used abroad because of different line standards). Another problem has been American Federation of Television & Radio Artists’ contract provision stipulating payments for use abroad, which syndicators regard as excessive. Negotiations now underway with AFTRA are aimed at reaching agreement with union so that certain “prestige” taped shows may be carried in foreign markets under more economical pay formula.

Color on the move

Color set boom, stimulated almost single-handedly by RCA and its broadcasting subsidiary, NBC, has precipitated shortage in color tubes with RCA itself involved in rationing. RCA is only current producer of color tube and is supplying other color manufacturers. With stepped-up demand, company has found it necessary to evolve equitable allocation until other manufacturers produce acceptable product. Projected color set production in 1963 is 700,000, with number now in use pegged at 1,000,000.

NBC-TV is completing new color improvement project that carries total estimated cost of over $1 million. Plan includes engineering modifications and improvements of film, tape and live studio equipment and transmission facilities. As part of overall project, NBC-TV is holding six-city regional seminar series starting in May to acquaint broadcasters with project and its ramifications. Meetings will cover engineering modifications, showing how local stations can improve facilities. Cities are Princeton, Atlanta, Chicago, Dallas, Los Angeles and Seattle.

Short-wave freeze?

Although no announcement has been made, FCC has imposed something akin to freeze on grants of applications for new international shortwave stations. Three applications, oldest on file since last March 1, are now pending, with no prospect of early action. Reason, reportedly, is that FCC, along with State Dept., is concerned about implications of international broadcasts by private U. S. citizens. Some members of FCC staff have been assigned task of redefining purposes and objectives of international broadcasting.
Judgement in programming makes WJW-TV Cleveland's most powerful selling vehicle. Top syndicated properties, as part of a balanced local programming concept and complimented by Channel 8's strong CBS affiliation are reasons why compared to the top 15 markets, WJW-TV Cleveland delivers up to twice the spot audience on a CPMH basis... on Prime Shows.
WEEK IN BRIEF

Tv's second largest buyer calls for guaranteed circulation at ANA meeting. Colgate-Palmolive's Mahoney suggests that if a program falls short of the guarantee, extra time should be made available. See . . .

CIRCULATION GUARANTEE? . . . 31

Commercial future of tv examined by ANA panel which sees challenges ahead on commercial effectiveness, justification for mounting costs, changes in market strategies and betterment of program decisions. See . . .

CHALLENGES AHEAD FOR TV . . . 34

Pre-registration for the NAB convention in Chicago is running ahead of last year, it is reported. The biggest exhibits yet being firmed up as the association draws up a final agenda for the meeting. See . . .

AGENDA NEAR COMPLETION . . . 42

Hints, questions by congressmen indicate the big ratings popoff may come this week. The word "fraud" is used. Network spokesmen, however, insist ratings are only one factor in considering a program's worth. See . . .

RATINGS TROUBLE LOOMS . . . 62

Short space drop-in proposals for seven two-station markets are expected to be denied according to a close, preliminary FCC vote. Commission, however, told staff to write order approving ch. 5 to Oklahoma City. See . . .

DROP-INS APPEAR DOOMED . . . 76

Suspension of Sec. 315 for the 1964 presidential campaign is seen sure following congressional hearing in Washington. Congressmen are cool, however, to suggestions that the equal time rule be abolished entirely. See . . .

SUSPENSION LIKELY FOR 315 . . . 72

The FCC has control over programming and advertising, the Justice Dept. says in a brief filed with the Supreme Court. The case involves New Mexico law and radio stations. Argument is scheduled for March 25. See . . .

FCC AND PROGRAM CONTROLS . . . 78

Will radio-tv be permitted to cover House hearings? Strong support by Harris seems nullified by a "lack of enthusiasm" by senior members of the powerful Rules Committee. A vote is not expected soon. See . . .

HOUSE ACCESS IN TROUBLE . . . 80

Move is underway to revise video-tape import duties. Led by Spanish International Network, campaign seeks changes because, for same program time, tape is twice as long as film and duties are levied on footage. See . . .

TARIFF HUBUB OVER TAPE . . . 82

One of the most serious charges ever laid against a broadcaster has been leveled at WALA-AM-TV Mobile, Ala. FCC says that owners demanded "large sum of money" to refrain from editorial attacks. See . . .

ACCUSED OF SEEKING PAYOFFS . . . 74

Last month one man bought 75 $2.00 tickets to WSM's Grand Ole Opry... FOR APRIL 25, 1964!

Normally you don't have to get your tickets a year in advance for the Opry. Dave Macon just wanted to be absolutely sure that none of his 75 convention delegates would have to return home without seeing it.

3,207 people see the Opry every Saturday night. No telling how many millions have heard it during its 37-year stand. And yet it's just one cog in the machinery that built and controls the mighty WSMpire.

Get the full story on the station that delivers more listeners than all other Nashville stations combined. Any Christal Man or WSM's Len Hensel.
PROBERS, WITNESSES CHARGE FRAUD
Rating firms to answer in testimony this week

With week of preliminaries out of way, House subcommittee investigating radio-tv audience measurements gets down to rough business today (Monday) with start of testimony from rating services themselves.

Special Subcommittee on Investigations of House Commerce Committee heard six broadcasters Friday to cap week of testimony on use made of ratings (see earlier story, page 62). Chairman Oren Harris (D-Ark.) observed Friday that “record is beginning to show more and more abuse. It calls for some very serious consideration as to what can be done” to correct abuses.

First rating service on stand will be Robert S. Conlon Assoc. Inc., which is to testify today. Others will appear in this order, subcommittee announced Friday: Videodex Inc., ARB, C. E. Hooper Inc., The Pulse Inc., Trendex and A. C. Nielsen Co. Some broadcaster witnesses who testified last week will be recalled, possibly this week.

Murry Woroner, manager, WAME Miami, accused broadcasters who “hyp” ratings and rating firms, which publish information purported as facts but derived from surveys which allegedly did not take place as perpetrated fraud on advertisers and the public.

He could learn in Miami who Pulse interviewers were, when and where they would work, Mr. Woroner said.

Ratings investigation gave WAME courage to find out whether being subscriber affects station ratings, Mr. Woroner said, explaining that station advised Nielsen, Pulse and Hooper on March 1 it was cancelling services pending outcome of hearings.

Broadcasters cannot remedy rating mess, Mr. Woroner told subcommittee. He urged House unit to pass legislation to regulate rating firms to “protect the broadcasting industry.”

Mr. Harris said of Mr. Woroner’s testimony, “It was precisely one of these situations” which was called to his attention by colleagues and lead to preliminary, then full investigation.

Robert F. Hurleigh, president of Mutual, said Nielsen radio measurements leave “much to be desired.” He said Nielsen samples in only 32 major markets for its network ratings, using sample of about 1,100 and “therefore cannot possibly come up with accurate and reliable figures as to the size of Mutual’s audience which is to be found in 513 markets.” During questioning of Mutual president, it was brought out that Nielsen has no sample homes in Mountain Time Zone where network has some 50 affiliates.

Mr. Hurleigh said control of only 10 or 12 Nielsen homes would give network increase in ratings of 1 point and this would mean extra $1.5 million in annual billings. However, he said, he was not questioning basic integrity of services, but methodology.

Rep. John Moss (D-Calif.) labeled Nielsen radio measurements “a fantasy” and completely unreliable.

Meaningless Absurdity • Gordon McLendon, president of six radio stations in major markets, called Nielsen ratings “a colossal and meaningless absurdity.” He said there are many instances at McLendon stations where “traceable damage has been done” by Nielsen.

Ratings, he stressed, are major factor in purchase of time on stations and many agencies use only Nielsen.

McLendon formerly owned Louisville station and Mr. McLendon said that station’s billings showed “tremendous increase” of over 3,000% when rating was raised from last to first in market.

Arthur Mundorff, CBS official for 18 years and now owner of WPIN St. Petersburg, Fla., said that his ratings average from 1-3 points. This has caused national advertisers to refuse him business, he said, despite desires of local distributors. Recounting several trips to New York seeking accounts (WPIN’s national billing is 0.5% of total), he said he was told he would receive no business until he acquired top ratings.

Non-Subscriber • C. Van Hauften, president of KTUC Tucson, Ariz., said his station does not subscribe to or use ratings but that it has not been hurt because it remains No. 2-3 in 10-station market. KTUC has not subscribed to service, he said, because of belief ratings are inaccurate. He said that Nielsen, to his knowledge, has never taken survey in Tucson. Pulse and Hooper are used by other stations.

R. Peter Straus, president, WMNY New York, asked by subcommittee for estimate of value of one rating point in that city, said that figure would be “several hundred thousand dollars” (see earlier story, page 70).

Unfair labor practices charged against WYNR

Charges of unfair labor practices have been filed against McLendon Corp.'s WYNR Chicago with regional office of NLRB, Chicago Local 1220 of IBEW said Friday. Union claims WYNR fired James Clark for his activities in behalf of Local 1220 and since last fall has refused to bargain collectively in good faith even though new three-year contract was signed.

IBEW said part of issue involves WYNR program changes. WYNR declined comment until it can study charges. FCC earlier in week expanded issues in WYNR hearing called to determine whether McLendon Corp. had been candid in informing commission of its programming plans when it acquired station (then WGES) last August (BROADCASTING, Jan. 28).

House Rules to hear NAB on radio-tv ban

Gov. LeRoy Collins, NAB president, will testify this week before House Rules Committee on resolutions to permit radio-tv coverage of House Committee hearings (see story page 80).

Committee agreed Friday (March 8) to grant Gov. Collins’ request to be heard before action is taken on proposals. No date was set, but committee aide said NAB official would be invited to appear this week.

Committee agreement to hear Gov. Collins marks departure from its customary practice of taking testimony only from members of Congress.

FCC power questioned in U.S. Court of Appeals

FCC’s power to protect local tv stations from intrusions of community antenna systems through licensing power over common carrier microwave systems was called into question Friday in
WEEK’S HEADLINERS

George C. Oswald, executive committee member of Geyer, Morey, Ballard, New York, promoted to senior vp-account management. He continues in charge of regional offices and in new position is responsible for agency’s “relationship with all its clients.” Mr. Oswald, who joined GMB in 1961 as senior vp, is former vp and account supervisor at Kenyon & Eckhardt, New York.

Pierre Marquis, director of advertising and sales planning; Berton Schneider, treasurer, and Russell Karp, secretary, elected vps of Screen Gems Inc., New York. They will continue to serve in their present capacities for TV program production firm. Mr. Marquis, who has been with SG since 1956 in various advertising and sales planning executive posts, was formerly with NBC-TV as supervisor of network sales presentations and with MCA as research and sales promotion director. Mr. Schneider joined company in 1954 and served as director of business affairs before being named treasurer in 1960. Mr. Karp began in SG’s legal department in 1957 and became assistant treasurer in 1960 and secretary in 1961.

Russ W. Johnson, advertising and sales promotion manager of Westinghouse Broadcasting Co., named director of advertising for Ideal Toyz Corp. He will supervise toymaker’s advertising programs from offices in Ideal’s New York City headquarters. Prior to joining Westinghouse in 1955, Mr. Johnson served as sales promotion manager of Dumont Television for two years and held various management posts with U. S. Rubber during previous five-year period.

Freeman Keyes, board chairman of Keyes, Madden & Jones, Chicago, named board chairman of Post-Keyes-Gardner there, new agency formed last week upon merger with Post, Morr & Gardner (see story, page 40). Carl M. Post, PM&G president, assumes same title with new agency.

Robert H. Alter, director of key account sales for Radio Advertising Bureau, New York, elected vp for national sales. Mr. Alter joined RAB in 1957 as national account executive. He was named regional sales manager following year and in 1959 was promoted to manager of sales administration. In new post, Mr. Alter will direct RAB’s national sales effort.

For other personnel changes of the week see FATES & FORTUNES

argument before three-judge panel of U. S. Court of Appeals in Washington.

Case involves refusal of commission to grant added facilities to Carter Mountain Transmission Corp. Carter Mt., under common carrier authorization, brings Denver, Salt Lake City and Billings, Mont., tv signals to catv system serving north central Wyoming.

Denial was based on FCC’s view that microwave additions would aid catv in competition with KWRB-TV, only local station in Riverton-Lander-Thermopolis-Worland area, to extent station might cease operations.

CBS-TV still heads fall program sales

Late sales reports at week’s end show networks steadily hiking percentages of schedules now sold to advertisers for next fall season. CBS-TV is far ahead of other networks, about 85% of prime-time (7:30-11 p.m.) tied to advertisers.

NBC-TV is about 75% sold, and ABC-TV about 40% of nighttime schedule sold, according to known sales, though percentage actually may be well over 60% because of holds on show options and other business not yet identified for competitive reasons. At affiliates board meeting Friday at Point Clear, Ala., NBC-TV reported 44% of next season’s schedule sold on non-cancelable basis.

Quality Radio plans exchange of information

Programming executives from seven stations of Quality Radio Group met in Chicago last Thursday (March 7) to hear tapes of typical programs they air and to exchange production and programming ideas.

QRG President Al Bland, vice president-programming, WLW and WLWT (TV) Cincinnati, announced plans for regular newsletter to exchange ideas and information. Similar meeting for sales managers will be held in July. Stations represented at last week’s meeting included KCMO Kansas City, WGBS Miami, WGN Chicago, WHO Des Moines, WLW Cincinnati, WOW Omaha and WSM Nashville.

Universal to release post-48s to television

Universal Pictures Corp., New York, is announcing today (March 11) that it is seeking tv distributor in U. S. and Canada for 215 of its post-1948 feature films.

Milton E. Rackmil, president, said Universal would grant seven-year exclusive distribution rights for $21.5 million (approximately one-third at time of agreement), plus percentage not in excess of 50% of proceeds after expenses.

Sidelight to Universal plan is fact that MCA Inc., distributor of syndicated series and feature films, owns controlling interest in Decca Records, which, in turn, owns controlling interest in Universal. MCA, under terms of consent decree entered into with Justice Dept. last October in connection with its acquisition of controlling interest in Decca and its divestiture of talent representation, was enjoined from distributing Universal package in U. S. and Canada. It is presumed that MCA can distribute Universal features abroad.
It's called the "good time town." It should be called the "good times town." While other cities progress in one or two directions, New Orleans moves forward dynamically on all fronts.
A big, bold complex right on the Mississippi River will—more than ever—make the Port of New Orleans a magnet for businessmen around the world. Here will be the expanded International Trade Mart, displaying products of thirty-one nations. It represents an expansion of the first such Mart in the world—established in New Orleans in 1946. The Exhibitions and Convention Building will provide acres of space for the year-round meetings that make New Orleans the convention city of the Americas.

National Aeronautics and Space Administration has selected the Michoud plant (2,000,000 sq. ft.) for assembly of Saturn boosters. Chrysler will assemble 21 boosters (cost $222,605,066) and Boeing 24 advanced boosters (cost $300,000,000).

"New Orleans East," 50 sq. mi. adjacent to the plant, is now being developed as a "city within a city." 15 minutes from downtown, it represents one-fourth of city's total area. Here is room, room, room—for more scientists and technicians, for our burgeoning population, for new, varied industries, for numberless stores and service centers required to supply them.

...AND EVER INCREASING...

In the New Orleans area WDSU-TV continues its leadership—in programming, in personalities, in facilities. WDSU-TV gives you the most direct route to a market with an annual buying income of almost two billion dollars. New Orleans represents a tremendous unrealized potential—with less competition for your advertising dollar than in any comparable market.
The port continues to be the greatest contributor to New Orleans prosperity. In 1961, over 61,000,000 tons of water-borne commerce through New Orleans gave an increase of 8.2%—the greatest tonnage ever handled in any Gulf port, re-establishing New Orleans as the nation’s second port, and representing, in imports and exports, a vast variety of products—from asphalt to zebras.

Smart, aggressive promotions, by individual firms and in community-wide projects, continue to increase retail volume here. Bank clearings up 28.8% in four years. Effective buying income up 8.1% in one year. Residential contract awards up 17% in one year. New Orleans’ balanced economy is providing money to spend. And the Retail Merchants Bureau says, “They are spending it.”
New 1963 Ayer Directory
Just Off the Press...

A RESERVOIR OF NEW INFORMATION

479 new publications. 725,000 instant facts.
1600 pages. 70 maps. New Canadian Census.

New 95th Annual Edition of the most complete and authoritative single source of information on the newspapers and magazines of the United States and its territories. Also Canada, Bermuda, Panama and the Philippine Islands.

More than 21,900 publications with names and addresses, editors and publishers, subscription prices, circulation figures, sizes and other working data. This includes over 9500 periodicals and 12,400 daily, weekly, semi-weekly and tri-weekly newspapers.

Profitable marketing facts: Easy-to-find details include industries and agricultural products of every town and city listed. Banking information, motor vehicle registration, number of telephones and other valuable data on larger market areas.

Under each listing, you will find the available transportation facilities and the distance from the nearest larger community. Also an airline map and rail maps for every state and province.

Groups with special interests: Periodicals for college, fraternal, labor, religious, trade and technical groups. Also lists of publications covering 38 foreign languages, 15 hobbies, 21 sports.

A word of appreciation to those who ordered the 1962 Edition. Our sincere regrets to the hundreds whose orders came in too late. Last year's Edition was sold out earlier than usual despite the largest printing in history. Please order your 1963 copy of the Ayer Directory as early as possible.

DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing

MARCH

March 11—FCC deadline for filing proposed findings in Grand Rapids, Mich., ch. 13 proceedings.

*March 11—Senate Commerce Committee hearing on nominations of incorporators of Communications Corp. of America.

March 12—Organizational meeting of newly formed government-industry “Committee for the Full Development of UHF Broadcasting.” Meeting will be held in Departmental Auditorium, Constitution Ave., between 15th and 16th Sts. N.W., Wash., D. C.

March 12—Puerto Rico Assn. of Broadcasters, San Juan. Howard Bell, NAB vice president, will speak.

March 13—House Antitrust and Monopoly Subcommittee opens hearings on concentration of ownership in news media. FCC Chairman Newton N. Minow is lead-off witness.

March 13-15—Audio Engineering Society’s West Coast spring convention, Hollywood Roosevelt Hotel, Los Angeles. FM stereo broadcasting, disc recording and reproduction, microphones and earphones and audio applications in broadcasting, one-day seminars and discussions, to be heard in technical papers.

March 15—Louisiana Assn. of Broadcasters, Opeoues Inn, Opelousas.

March 15-16—Institute of Electrical & Electronic Engineers, Pacific computer conference, California Institute of Technology.

March 17-19—National Assn. of Educational Broadcasters, Region III meeting, Kelllogg Center, U. of Chicago.

March 18—Extended deadline for comments in FCC inquiry into the objectionable loudness of commercial announcements and commercial continuity over am, fm and tv stations.

March 18—Reply comments to FCC’s proposed fm allocations table.

*March 19—Hollywood Ad Club luncheon meeting on color tv at NBC color studios in Burbank, Calif. Jack M. Williams, RCA Sales Corp., vp for advertising and sales promotion, will discuss color tv. Luncheon will be followed by a tour of the color production. Door prize is a color tv set.

March 20-22—National Educational Television and Radio Center, spring meeting of program managers and station managers of associated non-commercial educational television stations, Park Sheraton Hotel, New York.

March 21—Southern California Broadcasters Assn. Luncheon, 12 noon, Michael’s restaurant, Hollywood. Dan Scully, account executive at Leo Burnett, Chicago, will discuss Kellogg’s radio advertising.

March 22-23—Spring convention of Arkansas Broadcasters Assn., Sam Fox Hotel, Little Rock. Speakers will be Blair Vedder, vice president and media director of Needham, Louis, Lamb & Roy Moore, special agent, FBI’s Little Rock office.

March 22-23—Arkansas AP Broadcasters Assn. meeting, Little Rock.

March 23—Twenty-fourth annual convention of Intercollegiate Broadcasting System, New York U. This convention follows the IRBS conference, March 21-22.

March 26—Final date for the filing of applications for ch. 8 in Boston. Applications will compete comparatively with present occupant WHDH-TV.

March 26—Board of Broadcast Governors hearing, Ottawa.

March 27—Eleventh annual Management Conference of U. of Chicago, McCormick Place, Chicago. The one-day conference is sponsored by the Graduate School of Business and the university’s Executive Program Club. Charles G. Mortimer, chairman of General Foods Corp., White Plains, N. Y., will open at the evening conference banquet on “Developing a Climate Conducive to a Growing Economy.”

March 29—Advertising Women of New York Foundation, World’s Fair Ballroom, Waldorf-Astoria Hotel, New York City. Cocktail service, 6:30 p.m.; dinner, 8:00 p.m.; dancing to Lester Langin’s orchestra from 8:30 p.m. to 2:00 a.m.

*March 29-30—Spring conference of Sixth District (Illinois, Indiana and Michigan) of Advertising Federation of America, Sherman-Chicago Hotel, Chicago. National Federation, Chicago Federate Advertising Club, extends welcome to broadcasters. Speakers include AFA Board Chairman George Head, National Cash Register Co. and AFA’s new president, Mark F. Cooper. Celebrity reception is scheduled March 29, 6-8 p.m., at Mid-America Club.

March 29-30—National Assn. of Educational Broadcasters Region II conference, Tampa, Fla. WEDU (TV) Tampa-St. Petersburg Educational ch. 3 is host station for conference and its general manager, LeRoy Lastinger, is conference chairman. Among the speakers are William Harlow, NAB president, and Richard Hull, of Ohio State U., NAB executive board chairman.

March 31—Assn. of Maximum Service Tele-

The theme of the conference, which is held in conjunction with the National Premium Buyers’ Exposition is “Operation Greater Economic Growth Through More Productive Advertising and Sales Promotion.” Featured speakers are Dr. Arno Johnson, vice president and senior economist at J. Walter Thompson Co.; Stanley Goodman, president of Sales Promotion Executives Assn.; Richard A. Tomlinson, president, Food Field Reporter and Food Topics; Daniel L. Golden, U. S. Dept. of Commerce; and Richard Dunham, president of Premium Advertising Assn. of America.

April 3-5—Assn. of National Advertisers West Coast meeting, Santa Barbara Biltmore Hotel, Santa Barbara, Calif.

April 6—American Women in Radio & Television, Projection Room 63 workshop, 10 a.m.-12:30 p.m., tv wing, McCann-Erickson Inc., 485 Lexington Ave., New York.

*April 6—Georgia AP Broadcasters Assn. meeting, Atlanta. News clinic featuring specialists in various phases of broadcast news coverage. Awards banquet at night, with AP Assistant General Manager Louis Kramp speaking.

April 11—Seminar on radio broadcasting and community leadership under joint auspices of Southern California Broadcasters Assn. and U. of Southern California Dept. of Telecommunications, USC campus, Los Angeles.

April 11—FCC deadline for reply comments to proposed findings in Grand Rapids, Mich., ch. 13 proceedings.

*April 15-16—Pan Pacific Television Festival of tv programming from 17 Pacific basin nations to be held in San Francisco under auspices of San Francisco chapter of Academy of Television Arts & Sciences, place to be announced. Shirley Temple Black is honorary chairman and official hostess.

April 17—Deadline for reply comments on FCC’s proposed fm allocations table.

April 18—Assn. of National Advertisers, workshop on International advertising, Hotel Plaza, New York.

April 20-21—Annual Mississippi Broadcasters Assn., Broadmoor Beach Hotel, Biloxi, Golf tournament on 18th. First business session at 1 p.m. on the 19th.

April 20—Michigan AP Broadcasters Assn. meeting, Lansing.

April 20-22—Annual convention of New Mexico Broadcasters Assn., Alvarado Hotel, Albuquerque. NAB President LeRoy Collins will be principal speaker.

April 23—Third convention of Society of Motion Picture & Television Engineers, Traymore Hotel, Atlantic City.

*April 25-27—Annual conference of Fourth District Federation of America, Cherry Plaza Hotel, Orlando, Fla. Speakers include: Dalston H. Coffin, RCA, New York; Mark Cooper, APA president; Whit Hobbs, BBDO, New York; Margo Herman, McCann-Erickson, New York; Hobbs, VAPB, Journal and Constitution; Thomas Moore, ABC-TV, New York.

April 26—Pennsylvania AP Broadcasters meeting in Pittsburgh.

April 26—15th anniversary ball of Bedside Network of Veterans Hospitals Radio & TV Guild, Plaza Hotel, New York.

*April 26-27—Ninth annual Oregon Broadcasting Conference, Oregon Assn. of Broadcasters, Village Green Motor Hotel, Cottage Grove, Ore.

April 26-27—Virginia AP Broadcasters meeting, Executive Motor Hotel, Richmond. Awards in the VAFB Broadcast of the Month contest and broadcast contests for public service will be presented on first night at the banquet.

*April 27-28—Spring meeting of Kansas AP Radio-TV Assn., Baker Hotel, Hutchinson.

April 28-May 1—Assn. of Canadian Advertisers, Royal York Hotel, Toronto.

April 29-May 4—“Rose d’Or” Contest; May 20-25, 1965—Television Symposium and Equipment Exhibition. The two events are part of the Third International Television Festival announced by The City of Montreux, Switzerland. For further information write to Box 97, Montreux.

MAY

*May 1—New deadline for comments on FCC proposed rulemaking to allow daytime stations to go on the air at 6 a.m. or sunrise whichever is earlier.

*May 1—Canadian Assn. of Broadcasters annual convention, Royal York Hotel, Toronto. CAB convention was formerly scheduled for April 1-3.

May 1-3—Illinois Broadcasters Assn. spring convention, Springfield.

May 2-3—Illinois Institute of Technology conference on present and future communications satellites. Sponsored jointly by the Committee for Economic and Cultural Development of Chicago, the National Aeronautics and Space Administration, ITT and its Armour Research Institute, the meeting is part of the 3rd National Conference on the Peaceful Uses of Space to be held in Chicago May 1-9. Some 400 scientists and engineers are expected at the ITT conference, entitled “Technical Aspects of Communication Satellites.” In the institute’s Grover M. Sherman Hall, 33rd and Dearborn Sts., keynote address by Dr. Leonard Jaffe, NASA.

*May 2-4—Spring convention of Alabama Broadcasters Assn., Holiday Inn, Florence. Featured speakers include Governor George Wallace and NAB President LeRoy Collins.

May 3—Indiana U. Radio and Television Department banquet, Bloomington, Ind. Julian Goodman, vice president for news, NBC, will be guest speaker.

May 5-7—Television Conference annual meeting (formerly SWAPDT), Chateau Hotel, New York.
RCA-6166A/7007

New Design...New Performance

Improvements in RCA-6166A/7007 practically make it a new tube. This is the result of thorough evaluation of design, materials, and techniques—a continuing process at RCA. This relentless search to improve tubes has increased the life expectancy and provided new performance capability for this grooved ceramic tetrode—outstanding for medium and high power VHF-TV.

RCA-6166A/7007 includes significant improvements in exhaust vacuum firing, screen support structure, and filament processing. The tube is easier to drive. Moreover, with less load on the driver, you can expect better-than-ever performance and longer tube life.

Designed by tube engineers working with transmitter designers, RCA-6166A/7007 operates on all channels, fits into the driver stage without modifications in the transmitter. Try it next time you have need of tubes for radio or TV.

casters meeting, Lafayette, La.

May 18—Florida AP Broadcasters annual 
meeting, Cape Colony Inn, Cocoa Beach, 
Fla. News presidents and advertising chair-
men, afternoon tour of Cape Canaveral and 
an awards dinner at night.

May 19-21—Assn. of National Advertisers, 
spring meeting, Waldorf-Astoria Hotel, New 
York.

May 20—Georgia Radio Day, Atlanta Ad-
vertising Club, Atlanta.

May 20-22—Electronics Parts Distributors 
Show, Conrad Hilton Hotel, Chicago.

May 22—Annual spring managers meeting, 
New Jersey Broadcasters Assn., Rutgers U., 
New Brunswick, N. J.

May 26—Academy of Television Arts & 
Sciences, "Emmy" awards telecast. NBC-
TV, 10-11:30 p.m. EDT.

May 27-29—15th annual conference of 
International Advertising Assn., Stockhol-
men, Sweden. Theme is "How to Sell in 
World Markets." Among the speakers are: Sher-
wood Dodge, vice president of Colgate-
Palmolive Co., "Advertising's role in the 
engineering of preference;" William Delson, 
director of research survey unit at London 
School of Economics and Political Science, 
"Recent progress in audience measure-
ment;" and Alfred W. de Jonge, vice presi-
dent for international operations of Benton 
& Bowles, "Advertising in the eyes of agencies 
abroad—the leaders or the led."

JUNE

June 1—UPI Broadcasters of Illinois, Hotel 
Jefferson, Peoria.

June 4—Board of Broadcast Governors hear-
ing, Ottawa.

June 7-14—Annual convention of National 
Community TV Assn., Olympic Hotel, 
Seattle.

June 8-11—Georgia Assn. of Broadcasters 
annual convention, Callaway Gardens, Ga.

June 10-21—Radio Workshop, co-sponsored 
by Abilen Christian College and Texas 
Assn. of Broadcasters, Abilene Christian 
campus.

June 11-13—Western Assn. of Broadcasters 
caravans, Jasper Park Lodge, Alta., 
Canada.

June 12-14—Thirty-third annual Institute 
for Education by Radio-Television, Columbus, 
Ohio.

June 15-19—Annual convention. Advertising 
Federation of America, Atlanta, Ga.

June 17-19—Forty-sixth national confer-
ence of American Marketing Assn., Statler 
Hotel, Washington, D. C. Conference theme 
is "Innovation: Key to Marketing Progress."

June 18-20—Annual convention of Elec-
tronic Industries Assn., Plek-Congress 
Hotel, Chicago.

Largest audience of affluent adults

Among Southern California radio stations, KPOL delivers 
the biggest audience of affluent adults at the lowest cost—47c per 
thousand. The size of the KPOL audience always ranks near the 
top among all radio stations in the area...and is by far the 
largest compared to the four Los Angeles good music stations. 
Pulse data shows KPOL's audience 80% bigger than the second 
good music station...larger than the second and third 
stations combined...and seven times larger than the fourth 
station. This big audience is 
affluent, with family income substantially higher than the 
Los Angeles county average. Advertising addressed to 
this high concentration of prospective 
successes produces outstanding results. For details call Fred 
Custer at WE 8-2345.
Eastern Iowa Pastoral

Cows graze upper right. That's a cornfield top center. Ditto right center. The smog lies 1,900 miles to the left. Oriented?

Center: The 300,000 sq. ft. modern factory of Amana Refrigeration, Inc.,* a thriving non-bucolic enterprise which annually consumes 24 million pounds of steel, 4 million pounds of aluminum, 26 million board feet of fiber glass insulation, and 200,000 gallons of paint in the process of making some of the nation's finest air conditioners and home freezers.

Iowa's total personal income from agriculture is about a billion dollars annually.

From non-agricultural activities (there are 3,681 manufacturing establishments in Iowa) the total is about five billion dollars annually.

Go ahead—think of Iowa as a farm state. But don't overlook Iowa industry—it's even more significant.

Claims figures mislead

EDITOR: The Belden report on the Mexican-Spanish market (Broadcasting, Feb. 25) has several inconsistencies in connection with our market. Laredo, one of the 12 areas studied, has the highest percentage of Spanish surnames (85%).

The Belden report was a sampling of only 500 with 12 communities studied; 219 were from Los Angeles and San Antonio. This left only 281 interviews among the 10 remaining communities. I don't believe you can have an accurate sampling of listening and buying habits by interviewing, say, 28 people in Laredo (population 62,000).

Mr. Belden reports that 52% listen mostly to radio stations broadcasting in Spanish while 31% said they listen to stations mostly in English. He did not indicate that this 52% is split between seven Spanish-language stations while the balance listen to the two English-speaking stations in Laredo. —Bill Harrell, vice president & general manager, KVOZ Laredo, Tex.

Chevrolet bought on two

EDITOR: On page 54 of the Feb. 18 issue of your very fine magazine you have an item relating to the Chevrolet buy on WDTM (FM) Detroit.

... Actually this was a two-station buy, on both WLDM (FM) and WDTM. And speaking for WLDM, you may be further interested to know that Chevrolet and Campbell-Ewald are highly pleased with the way our program, Discoveries in Stereo, is getting off to a flying start.

We were informed as recently as yesterday that, based on a continuing study being made, this program has had a very amazing impact in the Detroit area. —Harold J. Tanner, president & general manager, WLDM Detroit.

Heart Fund help

EDITOR: Thank you for the full-page Heart Fund ad in Broadcasting Feb. 25. Your cooperation enabled us to reach broadcasters throughout the country and further stimulate support of our radio-TV efforts in the 1963 Heart Fund drive. —Hal Marc Arden, national radio-TV film director, American Heart Assn., New York.

BOOK NOTES

Subtitled "How Successful Marketers Use Scientific Methods," this is the fourth in Mr. Cheskin's series on marketing, and deals primarily with the pre-advertising stages of a product.

In a sense it is an indictment of agency executives who ignore scientific research evidence when it varies from their own opinions. Mr. Cheskin considers the majority of ad men as "imbued with the idea that continuous advertising is both the backbone and life-blood of marketing." He disavows this theory claiming that advertising, while an integral part of success stories, is not the sole answer.

A veteran of nearly 20 years in controlled motivation research, Mr. Cheskin deals primarily with print media and today's advertising principles which are mostly "sheer gambling...much advertising does little or nothing to promote the products it researches."

Although critical of the openness of present-day advertising, Mr. Cheskin says success can be assured when clients and agencies relate creativity and communication, and eliminate the all too prevalent subjective attitude.
CYRIL MOCKRIDGE followed a career as a musical comedy arranger-pianist with one in Hollywood, where he wrote background scores for more than 25 major films since 1931. Turning to TV, he has composed music for "Wagon Train," "Bachelor Father," "G.E. Theatre" and "Adventures in Paradise," and currently is credited with both themes and all of the background scores of "Laramie" and "Going My Way."

Medium on the Move

About 14 or 15 years ago, no one could have accused television of straying too far for its settings. In fact, much of that era’s viewing could have been described as “several people in a living room watching several other people in a studio designed to look like a living room.” Remember? The change has been tremendous—not merely in terms of camera mobility in news-and-actuality programs but in the versatility of settings for studio-based drama shows. Just how much more of the world is part of today’s televiewing becomes globally clear as we recall a few of this season’s outstanding NBC Television Network programs:

AFRICA—“The River Nile,” a full-hour color special tracing the Nile from Central Africa to the Mediterranean, evoked about 4,000 miles of superlatives for the NBC News camera crew and Producer Lou Hazam’s inspired script.

LONDON—A London hotel room was the setting for our-man-Huntley’s interview with outspoken Russian poet Yevgeny Yevtushenko, Soviet version of an angry young man, on “Chet Huntley Reporting.”

STRATFORD—Not only the Bard’s own backgrounds in Stratford on Avon and London, but several of his plays’ locales in England, Scotland, Wales and France were the colorful backdrops for “Shakespeare: Soul of an Age.” A voice-only British cast, headed by Sir Michael Redgrave and Sir Ralph Richardson, helped make it as festive for the ear as it was for the eye. The viewer beheld “a stunning fu-
sion of journalism and theater that, on the home screen at least, could be construed as very nearly a new dimension in dramatic expression." These were the words of the New York Times' Jack Gould.

OKINAWA—With the tangible assistance of Warren Clymer's sets, the twain (meaning Okinawan villagers and the U.S. Marines) did meet in our Brooklyn color studio for Hallmark Hall of Fame's "Teaouse of the August Moon." Critics hailed the production for its "charm, compassion and fanciful humor."

NEW YORK CITY—Early this fall DuPont Show of the Week presented "Fire Rescue," a real-life film account of the operations of Rescue Company One, a trouble-shooting unit from the city's Fire Department. The extraordinary footage was recorded by the ultramobile cameras of Creative Projects, NBC News.

Later this season, the DuPont series (again working with the Creative Projects unit under the supervision of Executive Producer Irving Gitlin) screened "Emergency Ward," the chronicle of a 26-year-old intern at Bellevue Hospital. No viewer will soon forget the young man's physically and emotionally grueling assignments.

COAST-TO-COAST—True, our 1962 election-night coverage was centered in Manhattan's Studio 8-H. But we also set up remote camera locations at such places as the computer system center at Cherry Hill, N.J.; the Democrat and Republican National Committee headquarters in Washington, D.C.; and the respective gubernatorial campaign headquarters in Michigan, New York and California. This was just part of the technique that earned for NBC-TV an election night audience bigger than that of the other two networks combined.

THE UNIVERSE—Although our "Exploring" series (for children age 5-11) is produced in our Rockefeller Center studios, its subject matter ranges throughout the world, covers the heavens above, and spans the boundaries of time. The purpose of "Exploring," whose host is scientist-educator Dr. Albert R. Hibbs, is to stimulate children's minds. It has already been cited as "the best children's program in television" by the Thomas Alva Edison Foundation. Show Magazine calls it "imaginative, stimulating, informative, consistently interesting and, above all, entertaining...."

FLATBUSH—If a ball club they called "the bums" could once put on airs here, why not a pretty Cockney girl? NBC's Brooklyn Color studio was the scene, Julie Harris and James Donald the stars, for the touching transformation of flower girl to lady of fashion in George Bernard Shaw's "Pygmalion," the latest 90-minute production by the Hallmark Hall of Fame.

MOSCOW—With the Kremlin as a backdrop, "The Death of Stalin" illustrated anew how that television documentaries needn't be dull. This January NBC News special was the (Iron) curtain-raiser in a four-part Profile on Communism. The sequel, "The Rise of Khrushchev," followed one week later and brought the melodramatic story of the Moscow power struggle up to the present. This month, Part III — "Who Goes There?"—reviewed development of Communism from Marx through Lenin and Stalin, and in April, Part IV—"An Encyclopedia of Communism"—assesses Red strength throughout the world.

Look to NBC for the best combination of news, entertainment and information
It was obvious from the outset that our position as an advertiser selling new and used cars was quite different from that of most dealers. The difference lay, primarily, in the fact that people "knew" me. Not personally, but for years they had seen me in their homes on Dragnet and the intimacy and impact of television are such that the viewer unconsciously takes the attitude that he knows the performer.

There was an additional factor. The character I played on this program, that of officer Frank Smith, was a nice guy—a good cop dedicated to duty—but a nice guy with a wife, kids and just about the same domestic problems as bestest viewermaters.

Cop Into Salesman • This image, plus the fact that Frank Smith was a weekly visitor and some of our auto commercials appear during the course of Dragnet itself, meant that even if we wanted to, we could not follow the pattern many car dealers do and go the hard-sell route. Accordingly, we decided to use a soft approach, emphasizing humor and the fact that the viewer did know me. Since I do the commercials, they had to maintain to a considerable extent the nice-guy character of officer Frank Smith. But even with this gentle approach, so much in contrast with the majority of tv auto commercials in California, our commercials had to be attention-getters.

One of the most powerful tools we found to capture people's attention and to make our commercials stand out was to talk about our competitors. This I do regularly, and if they are mentioned by name, quite often I will show a photo of a competitive dealer's lot behind me, pretending it's a photo of one of our five Ford agencies. The reaction is instantaneous. Phone calls flood the station; we get wires and letters and, most happily, the next day when people come into our showroom they invariably say something like: "Did you know the station had the wrong picture on your commercial last night?"

We also tailor commercials to the program on which they appear and to the primary audience to which that program appeals. In San Francisco-Oakland, we sponsor three programs: Dragnet, a Dixieland jazz show and an amateur talent program.

On Dragnet, of course, I identify myself as the actor who is playing in the program who also happens to sell autos. On the jazz show, which appeals primarily to the urban residents, a more sophisticated approach is taken; on the talent show the commercials verge on being corn pone in their approach.

I often kid myself too, which people seem to like. On Dragnet, for example, in the opening commercial I might say something about the fact that I blew my lines four or five times in making that particular episode and that Jack Webb threatened to throw me in the jug if I did it again. Or I might tell the audience, "You're going to like this show. I get shot five times."

L.A. Is Different • We use a different approach in Los Angeles, where we also sponsor Dragnet, for the simple reason we have found that what goes in Northern California does not work in the far more spread-out Los Angeles area. To get to those sections in Hollywood and Los Angeles where the car dealers are clustered you must drive—unless you're one of those rarities who lives in a business loft building. So the commercials for the new Ford agency we've just taken over in Hollywood point out that it is easily accessible. Then I also make note that if, by some chance, the viewer doesn't like our deal, there are another half-dozen or more dealers within a block or two.

Our showroom traffic invariably zooms upward the day after we are on the air. One farm couple told us they'd see our talent show, got up at 4 a.m. and drove to our San Francisco agency just because they liked what I said the night before. They bought a pickup truck and so did the farmer's brother-in-law, who originally had just come along for the ride.

Seven Rules • This was especially interesting to observe because they could have bought the same car outside San Francisco and closer to home for less money. The fact that they had driven all those miles and were willing to spend more money made me realize more than ever before that commercials must perform many functions.

Commercials must create traffic, as the sale eventually will be made on a personal basis. They must establish a specific identity for the sponsor. They must be believable, command attention and possess an ingredient which makes people remember them (you don't dash out after a car commercial and buy just-like-that). They must avoid becoming caricatures of themselves, as so many commercials are. And, without qualification, they must strike a responsive chord in the viewer to whom they are directed.

Doing all these things is not easy, especially in so fiercely a competitive field as selling cars. It also is not easy when there are definite budget limitations. I believe I am accurate in saying that our television budget, which is now averaging around $6,000 a week for San Francisco and Los Angeles combined, is far less than the allocations of the majority of my competitors. I like to think the difference in dollars is made up by the difference in technique with its pronounced individuality.

We have individualized our commercials to the program surrounding them and regionalized them according to the market in which they are being aired. It may be impractical, but it has occurred to me from time to time that using the same commercial nationally may not work as well for a national advertiser as tailoring his copy to regional habits and conditions.

This was brought home to me quite forcibly one afternoon just a few weeks ago when I heard a commercial for an anti-freeze. True, it was the month of February, but this was Southern California. The temperature stood at 68 degrees. Seemed to me the commercial might have sold more product in Southern California had the stress been not on cold weather protection, but on cooling system protection.

Ben Alexander made his first movie appearance when he was four-years-old. Subsequently, he became one of Hollywood's most famous child stars, a character actor and one of the top network radio announcers and m.c.'s. His latter day fame came from his role as Officer Frank Smith on tv's 'Dragnet.' He began his business activities before World War II and now owns five Ford agencies, gas stations and other interests with a gross of over $20 million in 1962.

BROADCASTING, March 11, 1963
This provocative headline is more than a facetious approach to a marketing problem. If you presently have distribution in and are exerting advertising pressure on the Indianapolis market, then consideration of the Terre Haute market is of vital importance to your sales success.

HERE'S WHY:

1. Terre Haute is closely linked to Indianapolis for its distribution.
2. Two of the Leading Supermarket Chains in the Terre Haute-Indianapolis coverage area credit the WTHI-TV area with more than one fourth of their total area sales.
3. Indianapolis Television, even when extensively used, misses 80% of the Terre Haute metro area.
4. Combining WTHI-TV with any Indianapolis television develops sizeable, additional penetration without additional cost.
5. The combination of WTHI-TV with an Indianapolis effort reduces excessive duplication, substituting new potential customers.
6. The Terre Haute-Indianapolis media approach does not reduce the level of impact in metro Indianapolis.

These facts were revealed through a series of special studies conducted by ARB. These are presented in detail and are available through your Edward Petry Man.

C. P. PERSONS, Jr., General Manager
The loudest call yet issued for "guaranteed circulation" in the television business was sounded last week by television's second-biggest customer, the Colgate-Palmolive Co.

The call, voiced by Colgate's executive vice president, David J. Mahoney, before an assembly of the country's leading advertisers, alerted foes as well as allies for what could become a major controversy.

Mr. Mahoney in effect asked television broadcasters to guarantee that their programs would reach specified audience levels. If a program fell short of its guaranteed minimum, its sponsors would get "free" time to make up the deficit.

Speaking at an Assn. of National Advertisers tv advertising workshop held March 6 in New York, Mr. Mahoney presented his point of view as one of a few means to reduce the "risk" in network sponsorship.

Mr. Mahoney emphasized that Colgate-Palmolive presumed it could "offer constructive criticism" because "we are partners" with the tv industry. He said Colgate recognized tv's value. If it had not, he said, the company "would not be the second largest television advertiser in the U. S."

Colgate-Palmolive, according to the best estimates available, is second to Procter & Gamble in tv spending. Its total for 1962 has been estimated at more than $49 million in gross billing, network and spot. More than half of this billing is estimated to be in network.

Direct Appeal • Mr. Mahoney's reference to guaranteed circulation was clear-cut. He said:

"I firmly believe the time has come for the television industry to adopt an Audit Bureau of Circulations technique and guarantee audiences." (The italics are Mr. Mahoney's.)

As Mr. Mahoney's remarks became known to tv advertising executives, there appeared to be varying degrees of resentment and resistance on one side of the scale and some advertiser support on the other.

A typical network comment, given privately, opened a new question for the advertiser: Assuming a network accepted the principle of audience guarantees, would the advertiser then be willing to pay additional money when the actual delivered audience exceeded the guaranteed level? Is the advertiser's budget that flexible?

Specifically, it was suggested, take an unexpected hit show such as Beverly Hillbillies, which on CBS-TV this season gained an unusual audience swell that placed it first in the network ratings. Would an advertiser in the program be willing to pay increases proportionate to the jumps in audience above the originally anticipated level?

Mixed Reactions • It was indicated that Mr. Mahoney's recommendation will find shades of differences even among major tv advertisers themselves.

Knowledgeable sources close to companies that have products competing with Colgate-Palmolive and are also of importance in network tv shifted the discussion to a comparison of a measurement of impact to guaranteed circulation.

A company official expressed it this way: "How do we measure the impact of television against the cold fact of guaranteed circulation? There is no reason for us to wish to buy television on guaranteed circulation or cost-per-thousand only, so long as we believe the medium delivers an impact—and an impact that cannot be measured."

But there can be few doubts that Mr. Mahoney's approach will find receptiveness among several other advertisers and their agencies.

Ayer's 'Elephant' • Just a day before his speech, and apparently coincidentally, the Mahoney thinking was being

The circulation measurers under the gun

The cry for guaranteed circulation in television was revived last week as the rating services that presumably would measure the circulation to be guaranteed were put under intensive scrutiny in a House committee hearing in Washington.

Full-dress hearings were begun by the House Subcommittee on Investigations, whose staff members have been quietly investigating the raters for the past 18 months. The chairman of the subcommittee is Rep. Oren Harris (D-Ark.) who headed another subcommittee that in 1959 and 1960 exposed television quiz rigging and radio payola.

Last week's sessions of the subcommittee were a warm-up for the main event. The witnesses were broadcasters, who were called to testify to the influence and reliability of ratings. The sum of their testimony was that ratings were of significant importance in programming decisions and the sale of broadcast advertising, and some of the broadcasters were critical of the way ratings are obtained.

Next week, however, the rating services themselves will take the stand, and the questioning is expected to be relentless.

Story begins page 62
TV CIRCULATION GUARANTEE NEXT? continued

duplicated to a degree at N. W. Ayer & Son. A two-page news memorandum prepared by Ayer's radio-tv department signed off a programming-sales analysis of the new, 1963-64 network tv season with this comment:

“One subject that keeps rearing its head these days, much to network embarrassment, is that of a guaranteed cost-per-thousand.

“This, like the so-called magazine concept of sponsorship which, to all intents and purposes, is the current pattern, is something the broadcasting business is getting into with all the grace of an elephant backing into a telephone booth.

“It is as inevitable in broadcasting as it is in print, but it’s probable that the elephant won’t admit he’s inside until he finds himself stuck there.”

Richard A. R. Pinkham, senior vice president in charge of media and programs at Ted Bates & Co., a Colgate-Palmolive agency, said he backed Mr. Mahoney’s sentiments “100%.” He said he could go further and surmise that one of the “great things that would emerge if the networks went to a guaranteed cost-per-thousand would be to free them from restrictions” now surrounding types of shows the networks find hard to sell.

Cultural Explosion • Mr. Pinkman said he believes the networks in this way would be in a better position to achieve a balanced schedule and upgrade the public’s taste. “Guaranteed circulation,” he said, “inevitably would lead to a cultural explosion” on tv.

It was Ted Bates that earlier this year helped place into effect an unusual arrangement between American Home Products, Colgate-Palmolive and ABC-TV for a single show—the Jetsons, a new half-hour “adult cartoon” series placed at the start of this season in the Sunday, 7:30-8 period.

Many people in tv advertising single out this deal as the first breakthrough toward actual audience (or circulation) guarantees in tv networking, a credit that ABC-TV vigorously decries as misleading.

But it is a fact that the network in offering the program to the Bates clients at the start of the current season took a position that the program would deliver more adults than, say, the competing Dennis the Menace on CBS-TV, or the Walt Disney show on NBC-TV.

When the program failed to hit the mark of adults in the make up of the audience, the advertisers received compensatory commercial “minutes.”

ABC-TV denies this constituted any sort of “breakthrough” in audience guarantees because the deal did not include any cost-per-thousand bases. Network officials also indicated that there was little chance for a repetition of this type of arrangement.

Mr. Pinkham has never confirmed the arrangement on the Jetsons but he has predicted in the past that eventually television will come to some sort of guaranteed circulation arrangement.

Several agency buyers contend that television now is going in that direction under camouflage, and that when a show declines in ratings, after the first 13-week cycle, a network will reduce price to save it. This contention also underlines the obvious result of lower audience and lowered price leading to a new C-P-M that is in line with audience.

Not Black, Nor White • At least one top network executive interprets as “unrealistic” much of the thinking of Colgate-Palmolive, Bales and other like-minded advertisers and agencies.

Says this official: A network has fixed costs—it cannot, for example, eliminate station compensation, nor can it halt the normal progression of costs in production and in commercial time (through station rate increases).

Hence, he finds the tendency of any tv advertiser to “set a C-P-M figure” to be a “false delusion.” This executive also asks whether an advertiser, if guaranteed an audience size for a program, would pay more if the level of circulation increased substantially; conversely assuming an audience of “next to nothing” to be ridiculous—would the advertiser then pay nothing?

In other words, he asks, “how high is high and how low is the base? What criteria are the network and the advertiser to use?” Mr. Mahoney, he said, would use the criteria of circulation only, but he added, “tv economics dictate that as reach goes up, costs must go up as well.”

This executive, however, admits that if a “constant” were reached and with 52-week firm orders necessary on the networks perhaps there might be an understandable search on the part of the advertiser to squeeze out some of his risk.

Risk Big • The networks maintain that guaranteed circulation is “an old story,” but one executive acknowledged that advertisers are shouldering a “larger risk” in tv than is the industry. It was his belief that the industry would resist this practice as long as it could because it preferred, naturally enough, not to assume the “larger risk.”

He claims there would be problems if guaranteed circulation were adopted. He raised these questions: could advertisers agree on one rating service to take these measurements, and if so, could this not lead to further criticism of alleged monopoly in the rating services field?

But some national advertisers contend, though with tongue-in-check, that the slide rule of cost-per-thousands and guarantees would intrude on individual buying abilities.

Said Charles Pratt, advertising director of Alberto-Culver Co., “what are you trying to do, take all the fun out of television? There isn’t any room left for horse trading, isn’t there?”

Mr. Pratt directs his fire to the ratings situation in this way: guaranteed circulation, he noted, leaves the advertisers “completely at the mercy of the ratings.” And, he added, ratings always come after the fact, which would mean that for an analysis for a guarantee, based on ratings, one would have a substantial lag in time.

Finally, Mr. Pratt asked what would happen to the volume buyer and the discount benefit, noting that guaranteed circulation would have the effect of penalizing the top-rate buyer and unfairy helping the poor buyer, placing them on a more equal footing.

Many voices have been sounded, though not so clear and sharp as Mr. Mahoney’s, on guaranteed circulation. Fairfax Cone of Foote, Cone & Belding, acknowledged last week that guaranteed circulation is an element of the “magazine” concept he has been actively supporting since 1960. Mr. Cone believes the tv advertiser should pay only for the audience delivered. As conceived in his initial group program buying plan, an advertiser would place a certain sum on a network in return for which he would obtain commercial extraturnal programming, thus assuring disposition on both entertainment and culivery of an audience that is averaged despite the “highs” and the “lows.”

Past History • The subject of guaranteed circulation in television was brought up briefly during the October 1961 hearings of the FCC on network practices. That hearing was held in New York, during a period of nine days, more than 40 tv advertisers testified. The references:

Samuel Thurm, Lever Bros. advertising vice president, pointed out the problems in network tv of buying without knowledge of how high the circulation figure might go.

Edwin W. Ebel, vice president-advertising services, General Foods Corp., said, however, that he envisioned some type of “circulation assurance” but he warned the mechanical operation is not available in tv to the extent of the preexisting claims of network or magazine circulation measurement.

Albert Brown, vice president of advertising, Corn Products Co., Best Foods, in citing the need to make 52-week firm contracts on the networks at substantial investment, told FCC his
Mahoney wants free time to make up for lagging audiences

Three broad proposals for industry action to minimize the risk of an advertiser's investment were suggested at an Assn. of National Advertisers television workshop in New York last week.

Made by David J. Mahoney, executive vice president of Colgate-Palmolive Co., one of the largest television advertisers, the suggestions included:

* The tv industry adopt an Audit Bureau of Circulation technique and guarantee audiences. If a particular show does not deliver agreed-upon ratings and audiences, the advertiser should be offered additional time free of charge until the original levels are met. With the fixed costs of tv rising, the advertiser must be given some assurances, as are provided by other media. If the networks insist on 52 weeks firm with high prices, no guarantee of the same period, or even that the show will return, then an audience should be guaranteed.

* New shows, which represent a great risk to advertisers, should be audience-sampled, perhaps through an on-the-air test of the pilot film, followed by depth interviews of subsequent scripts.

* In the new product area, there is need to test products on a regional basis, rather than in a single market. Networks should develop satisfactory programming to be offered regionally to advertisers at a reasonable price.

Mr. Mahoney, who remarked on several occasions that the advertiser bears the brunt of the risk in tv, concentrated his fire on "guaranteed circulation." He noted that networks have often raised prices when a show is a success, and added with obvious sarcasm: "For example, Dr. Kildare (on NBC-TV) has risen 73% in three seasons, with a corresponding 94% loss in efficiency. That can hardly be called an example of success. A certain lawyer moved from Saturday to Thursday this season [Perry Mason on CBS-TV]. Net result: costs up; audience down; 21% poorer efficiency. A bearded musical director [Mitch Miller on NBC-TV] had the same experience. New time period: higher costs; ratings off. Result: 44% less efficiency for the advertiser. And all this has happened with established shows. Think of the chances with brand new ones. Examples such as these are typical of many others on each of the television networks."

Mr. Mahoney also urged advertisers to undertake research to help in the task of making tv advertising "profitably rewarding." He suggested that more research be conducted during the pre-production of commercials so that the message may have a "reasonable chance" of success. Mr. Mahoney also proposed that research should be intensified to (1) ascertain the specific characteristics of a particular brand and (2) determine the television vehicle which will deliver the message primarily to the most responsive audience.

company would "welcome" any new development that would give it a "guaranteed audience at minimum cost and would equalize the cost-per-thousands of large-audience and small-audience programs."

But there is the question of what's an acceptable or "efficient" figure for a cost-per-thousand in network tv. On that point, testimony was gathered from several tv advertising executives at the FCC hearing and the few specifics given fell in a dollar "range."

In an obvious reference to the now-revived impact vs. c-p-m argument, Mr. Ebel told the FCC: "some programs that are very expensive programs are designed to bring about a maximum impact, and it is unfair to judge those programs on the basis of pure cost-per-thousand return."

AFA forms study committee

Advertising Federation of America last week announced the formation of a Committee to Study the Structure and Policies of AFA. The committee will study the present AFA organization as defined in its by-laws and make recommendations for improvement.

The committee, which has already begun operation, is preparing a questionnaire for local clubs asking for their comments on AFA operations.

Business briefly...

Mohawk Carpet Mills, New York, will sponsor an Easter Sunday musical special in color, The Fred Waring Easter Show, on NBC-TV April 14, 4:30-5:30 p.m. EST. Roger Gimbel will produce and Clark Jones will direct the show. Agency: Maxon Inc., New York.

Arrow Co. and Travelers Insurance, both through Young & Rubicam Inc., New York, will sponsor CBS-TV's live coverage of the Masters Golf Tournament April 6 (5-6 p.m. EST).

Armour Agricultural Chemical Co., Atlanta, plans expanded use of broadcast and print media, with latter getting major portion of company's record ad budget. Armour Commercial Verta-green (fertilizer) will be featured in commercials on 131 radio stations east of the Rockies during spring and fall planting seasons. Liller, Neal, Battle & Lindsey, Atlanta, is agency.

Chevrolet Motors Div., General Motors Corp., Detroit, through Campbell-Ewald Inc., Detroit, has renewed its full sponsorship of Bonanza on NBC-TV (Sun., 9-10 p.m.) for the 1963-64 season.

Gulf Oil Corp., Pittsburgh, will sponsor NBC-TV's half-hour special on President Kennedy's conference with six Central American countries in Costa Rica (Tue., March 19, 10:30-11 p.m. EST). The program will be broadcast on the second day of the three-day meeting. Producer will be Chet Hagan. Agency: Young & Rubicam, New York.

L. B. Labs, through Sitemap/Broder Adv., Los Angeles, has assumed co-sponsorship of Sports West with Hank Weaver on 116 stations of ABC Radio West, Monday-Friday, 5-45-5:55 p.m. in a regional campaign for L. B. Hair Products in the 11 western states, starting March 18. The show's other sponsor is Farmers Insurance Group, through Honig-Cooper & Harrington, Los Angeles.
CHALLENGES AHEAD FOR TV
ANA speakers say they are: mounting costs, proof of commercial effectiveness, plans for future

Television programming and commercial announcements were placed under a microscope and examined by a panel of speakers at the Assn. of National Advertisers Television Workshop in New York last Wednesday (March 6).

Topics ranged from media planning and television advertising, and pre-evaluating television commercials to making better programming decisions. Speakers suggested that although television has not tapped all of its resources, it faces challenges in the years ahead in justifying the medium's mounting costs; in offering proof of commercial effectiveness and in planning for changes in the buying, selling and measuring of the medium.

The critical tone of the meeting was in a speech by David J. Mahoney, executive vice president, Colgate-Palmolive Co., who urged the television industry to adopt an Audit Bureau of Circulation technique and guarantee circulation to counterbalance what he called TV's rising costs and advertiser's risks in sponsoring programs that do not attain anticipated audiences and ratings (see story, page 31).

Herbert Zeltner, senior vice president and director of media for Lennen & Newell, New York, who discussed media planning and television advertising, suggested that the key to success for TV particularly lies in "concentration." He said this goal of concentration can be accomplished by geographic region, by urbanization, by season of the year, by media form, or by type of customer, either present or potential.

Untapped Opportunity • Expanding this thesis, Mr. Zeltner said that networks have an area of opportunity, relatively untapped, in the regional and seasonal sponsorship categories. He predicted there will be expansion in these directions as advertisers become increasingly aware of their need to pinpoint their efforts more precisely. He observed that the smaller, single product advertiser may well participate in network TV, concentrating their advertising in a specific region or during a particular season of the year.

He indicated that concentration for some advertisers could be achieved effectively in daytime TV—both local and national—and added: "It would be interesting to see a major experiment in which some advertiser applied to daytime the costlier program values and more restrained commercial scheduling of nighttime—still halving his cost-per-thousand, but materially heightening the visibility of his advertising."

The type of customer to whom television must appeal will be examined more carefully by the media planner, Mr. Zeltner suggested, with particular attention to the concentration within the total audience of such special groups as children under and above certain ages, women of various age brackets, and upper income families, among others.

He indicated that media planners are going to require more precise information on the selling effectiveness of varying intensities of the frequency of commercials and raised the question: "Is it the third or fourth or fifth or sixth commercial which makes the major change in attitude and effectively penetrates the consciousness of the viewer?"

"Real-Life" Conditions • Eric Marder, president, President & Marder Assoc. Inc., New York, reported on a technique the research organization has been using to measure the effectiveness of TV commercials under "real-life" condition of exposure. He suggested that other methods, which test commercials in terms of the reaction to the message only and under conditions he considers "artificial," are inadequate.

The Marder organization, he said, is "product-centered" and attempts to measure the effects produced by the commercial message, and not the reaction to it. Marder seeks to find the extent to which the message changed people's feelings or behavior with respect to the product (how it influenced purchasing, shopping, product preferences and attitudes), according to the speaker.

Mr. Marder asserted that there is a dilution of value in tests in which the respondents know they are being tested (in theaters, in homes via portable projectors). The Marder method involves two telephone calls to two different groups within a sample of respondents—once before the program is on the air and again the day after the show has been telecast. In each instance, Mr. Marder noted, respondents are questioned about their attitudes toward two products—each group on both days on different products. At the conclusion they are asked casually if they witnessed a particular show and if the commercial affected their attitude toward buying the product.

The subject of the performance of commercials within program versus station break positions was discussed by L. E. Purvis, president and board chairman of Gallup & Robinson, Princeton, N. J. Mr. Purvis offered no conclusions, but outlined the procedure and techniques G&P is utilizing on this subject in a $250,000 survey the firm has been conducting in Philadelphia since last October on behalf of 16 advertisers. Called the Total Prime Time research program, the project involves the monitoring of commercial usage in Philadelphia on 28 nights in an effort to compare the commercial performance of spots within programs and those in station breaks. It is not known when the results of the TPT research will be made public.

At one point, Mr. Purvis asked those in attendance at the ANA session to vote on this proposition: Assuming there are three TV programs which are equal in audience ratings and audience composition, which would you prefer—within a program, outside a program (station break) or makes no difference? There was an overwhelming vote for "within a program."

Henry Brenner, president of Home
WHO Radio's daily listenership is greater than that of all the other five radio stations in Des Moines COMBINED! It is far greater than any other station in the state. Actually, WHO's coverage of 808,480 homes* gives WHO Radio the nation's twenty-third largest radio market.

Compare WHO Radio's audience (and the cost of reaching it) with any other medium in the state. And remember that WHO Radio's audience facts are far more significant than they might seem at first glimpse, because radio listeners do not twirl the dial from half-hour to half-hour—when they tune to their favorite radio station, they stay with it! (Whan Surveys, available for the asking, can give you some startling figures on that.)

WHO Radio's "Iowa Plus" is one of the fabulous radio markets in the nation. Ask PGW for details.

TvB to produce commercials for local use

FIRST FILM IS 'MAT' SERVICE FOR SHOPPING CENTERS

The Television Bureau of Advertising, which previously has confined its services in the field of tv commercial production to written materials, has moved into the area of actual production of filmed commercials. A new arm of TvB, called Retail Tv Productions, has already produced a "mat service" film for use by shopping centers which can be individualized to suit the needs of a particular center. Further films are planned in other retail categories.

In an interview with Broadcasting last week, TvB's Louis Sirotia, who is implementing the new program, explained the flexibility of the plan, particularly as it relates to the shopping center film. This commercial is designed to overcome the budget limitations of those who don't have agencies oriented to tv production. By using a uniform format to which any shopping center's name can be superimposed, a "high quality" film is available at low cost. Two prints of the film may be obtained for a 13-week period for $80. Shopping center tenants usually maintain cooperative advertising budgets but in the past have tended to direct these budgets to print media.

Retail Tv Productions initial film is intended for use during an anniversary promotion but others will be made to coincide with clearance sales, Easter, back-to-school and Christmas periods. Tailoring the film to the requirements of different shopping centers may take a variety of forms according to Mr. Sirotia. The basic package, however, consists of a 50-second film segment with identification by superimposed logo or center name. The audio portion of the film, which has been composed to suit any center, may be replaced with substitute announcements, if desired, at a slightly higher cost.

The commercial is meant to fill a one-minute spot, the last 10 seconds left open for an individual announcement. It has been produced so that it can be adapted for use by a single store within a shopping center.

Next step for Retail Tv Productions, pending success of the current project, will be the creation of a department store film. TvB reports that one New York shopping center has already committed itself to a tv station for sponsorship of 26 half hours on the basis of the new TvB mat service.

Rep appointments...

- WCKR & WIOD (FM) Miami, Fla.; George P. Hollingbery Co., as national representative, effective April 1, when the two stations will revert to their former calls, WIOD-AM-FM,
- KAPR Douglas, Ariz.; Elisabeth M. Beckjorden Co., New York, as national representative,
- KRAV (FM) Tulsa, Okla.; Herbert E. Groskin & Co., New York, as national representative,
- WWOW Conneaut-Ashbula, Ohio; Penn State Reps., Pittsburgh, as regional representative,
- WKID Champaign-Urbana, Ill.; Midwest Time Sales, Kansas City, as regional representative,
- WNOB Cleveland and KMFM Minneapolis; Herbert E. Groskin & Co., New York, as exclusive representative.

SRO on ABC-TV's 'Show'

ABC-TV wrapped up a $12 million sale of next season's The Greatest Show on Earth, Tuesday 9-10 p.m. with signing last Thursday (March 7) of Albert-to-Culver through Compon for alternate half-hours. American Tobacco (agency to be named) also has alternate half-hours and Kaiser Jeep Corp. through Norman Craig & Kummel has alternate hours of the program.

First film commercial produced by TvB's Retail Tv Productions unit is for use by shopping centers in anniversary promotions. Clips from the film (above) relate the history of one lady's shopping expedition to a center, from gossip about the event to satisfaction on completion of the trip. Emphasized between are convenient parking facilities (top and center) and the variety of purchase possibilities ("from gowns to greens"). Center's name or logo may be superimposed at any point in film or for its duration.

BROADCASTING, March 11, 1963
Why WROC-TV bought Seven Arts' "Films of the 50's" Volumes 1, 2, 3, 4 and 5

Says Ervin Lyke:
President and General Manager of WROC-TV, Rochester, New York.

"During the past five years, Veterans Broadcasting Company has had more than 4,500 different feature films under contract in Rochester — perhaps a record for features in one market. Consequently, I feel I can speak with some authority on the subject of 'comparative values' in films and packages. In my mind, there is no doubt concerning the rating value of the Seven Arts' 'Films of the 50's'.

'We feel each of the five Volumes purchased contains not only an extremely high percentage of 'block-busters', but equally important,

OVERALL STRENGTH DOWN THE LINE

Agencies and clients know Seven Arts' features on WROC-TV will attract largest possible audiences within and between all conceivable measurement periods."

SANDPAPER OR PLEXIGLASS

FTC slaps new restrictions on Colgate-Palmolive, Bates against 'sham' proofs in tv commercials

A proposed new and amended order against Colgate-Palmolive Co. and its advertising agency, Ted Bates Inc., has been issued by the Federal Trade Commission in the now-famous "sandpaper" tv commercial case.

In its new order, the FTC prohibits Colgate and Bates from:

- Presenting a visual test or demonstration represented to be actual proof of a claim made for any product, where the test or demonstration does not constitute actual proof because a mockup or substitute material or article is used instead of the genuine material or article purportedly used.

- Claiming that Colgate's Rapid-Shave or any other shaving cream has qualities or merits not actually possessed.

The order issued last week supersedes an FTC order issued two years ago. This was remanded last November to the government agency by a U. S. Court of Appeals on the ground that it was too broad in that it could be interpreted to prohibit indiscriminately the use of mockups or substitute materials in all tv commercials in every conceivable hypothetical situation (BROADCASTING, Nov. 26, 1962).

Started in '60 - The case began in 1960 when the FTC challenged the sandpaper test presented in tv commercials for Colgate's Rapid Shave shaving cream. It was established that instead of shaving sandpaper in the commercial, a mockup of sand on plexiglass was used.

Colgate contended that it was necessary to use the substitute because of tv's limitations.

FTC Commissioner Philip Elman, who wrote the order put out last week, said: "There is nothing objectionable in showing a person drinking what appears to be iced tea, but for technical photographic reasons is actually colored water, and saying 'I love . . . 's tea', assuming the appearance of the liquid is merely an incidental aspect of the commercial, is not presented as proof of the fine color or appearance of the tea, and thus in no practical sense would have a material effect in inducing sales of the product."

He held also that Bates cannot escape some responsibility for the advertising, particularly when it originated, prepared and published the commercials and had full knowledge not only that the claim was false but that the 'proof' offered to the public to support it was a sham. Bates, however, was permitted to defend itself provided it had no knowledge of the falsity of the representation nor any reason to question its truthfulness.

This is not a final order of the commission. Colgate and Bates have 20 days to file exceptions, with the FTC staff another 10 to reply. Following that the FTC will enter a final order.

20 ENOUGH AT NIGHT

TvAR survey shows creativity can suffice in short spots

A new presentation prepared by Television Advertising Representatives Inc. claims that prime nighttime 20-second tv spots offer creative and copy advantages as well as media values.

Titled "Twenty's Plenty," the TvAR presentation, the company said, is "unique" in that it is aimed primarily at creative and copy personnel at agencies rather than media specialists. It was prepared by Robert M. Hoffman, marketing and research vice president of the station representative firm, in consultation with Harry W. McMahan, a consultant on tv commercials. TvAR stressed that many tv claims are corroborated by research findings of the Schwerin Research Corp.

The central theme of the presentation is: "It's not how long—it's how good." A 20-second commercial, TvAR states, provides time for the name, a claim and a demonstration. The 60-second spot adds a platform for supporting claims plus mood or atmosphere and dramatization, but TvAR contends that for many products these additional elements are not a requisite.

The presentation cites Schwerin Research to document its claim that brand name recall is virtually identical for 20-second and 60-second spots. With respect to the playback of specific sales points, Schwerin reported, the 20-second spot is 71% as effective as the 60-second announcement, though it is only one-third as long.

COMMERCIAL PREVIEW: Purina Dog Chow

Dogs and children draw the spotlight in a new series of commercials for Purina Dog Chow (Ralston Purina Co.). Directed and produced by Gerald Schnitzer Productions, Hollywood, the commercials will begin shortly on The Jackie Gleason Show and The Real McCoys, both on CBS-TV.

The commercials create several episodes in the day of a little girl and her pet dog, unfolding from the question and theme of the series, "What is a dog?". Scenes include a dog being brushed, fed and sung to by a little girl. In the picture above, the dog is an "eager eater" of Purina Dog Chow. The commercial closes with the little girl in bed and "her best friend" sleeping beside her.

Jerry Schnitzer directed and produced the commercial for the production house, while Noel Digby served as producer for Purina agency, Gardner Adv., St. Louis. Gabriel Scognamiglio, of the production house, was art director. Different dogs and children of various ages will be used in future Purina Dog Chow commercials.
pitch

The pitchman has largely vanished from broadcasting, but the memory still lingers on: something for nothing, quick results with minimum effort, mechanical formula instead of creative ideas. Very strange. Especially since those television and radio stations determined to maintain the highest standards seem to enjoy the greatest success. People watch. People listen. People know.
2 CHICAGO AGENCIES MERGE
Carl Post president of new Post-Keyes-Gardner; agency's combined billings top $30 million

After a two-month delay because of tax and other fiscal problems, two agency neighbors in Chicago's Palmo-
live Bldg. were "married" last week. Keyes, Madden & Jones and Post, Morr & Gardner now are one as Post-
Keyes-Gardner.

The merger has been underway since last fall and was to have become fact the first of the year (BROADCASTING, Oct. 1, 1962). The combined billings in Post-Keyes-Gardner top the $30 mil-
lion mark with some 70% spent in broadcast media.

Chief architect of the merger was Carl M. Post, former president of PM&G who becomes president of Post-
Keyes-Gardner. Board chairman of the new PKG is Freeman Keyes, formerly chairman of KM&J.

Among the major accounts involved in the merger are: Brown & Williamson Tobacco Corp. (Raleigh and Belair cigarettes), previously at KM&J. Jos. Schlitz Brewing Co. (Old Milwaukee and Burgermeister beers), Maybelline Co. and General Finance Corp., broad-
cast-active accounts handled formerly by PM&G.

Officers of the new agency also include F. Sewell Gardner as vice chair-
man of the board and Frank F. Morr as executive vice president. Both had been PM&G principals. Howard A. Jones, KM&J president, becomes a member of the new agency's executive review board and will head divisions of Russel M. Seeds Co., a separate holding

company representing other diversified business interests of Mr. Keyes and himself. KM&J was a Seeds division before the merger.

Senior vice presidents of the new agency are Jack Baxter, Ray Dau and Anthony Hebel, all formerly with PM&G. Mr. Baxter also will be creative director.

Branch offices of the two former agencies also join under the new name except for the KM&J branch in Day-
tona Beach, Fla., which continues as a Seeds Co. holding. The PM&G and KMJ branches in Los Angeles will be consolidated into one office. Other of-
fices are in New York, San Francisco and Miami. Chicago headquarters will continue with PM&G's phone number, Whitehall 3-2880.

PM&G itself was a recent evolution from the old Gordon Best Co. Mr. Gardner joined the agency last year after Dancer-Fitzgerald-Sample closed its Chicago office.

TVB SALES CLINICS
8 selling teams to visit 101 cities in spring tour

As part of a major campaign to increase use of local tv by advertisers, Television Bureau of Advertising (TvB) will hold all-day sales clinics in 101 cities this spring. TvB conducted sales clinics in only 17 cities in each of the past three years.

The clinics will be conducted by eight

selling teams from TvB offices in New
York, Chicago and Los Angeles. Every
clinic will open with a session directed to the local advertiser.

Cities in which sales clinics will be held follow:

April 2, New Haven, Conn.; April 4, Scranton-Wilkes-Barre, Pa.; April 10, Fort Wayne, Ind.: April 12, St. Louis, Mo.; April 17, Altona, Pa., South Bend, Ind., Strange, Ill.; April 18, Lebanon, Pa., Greensboro, N. C., Augusta, Ga.; April 21, Atlanta; April 26, Jacksonville, Fla., Charlotte, N. C.; April 29, Des Moines, Ia., Charleston, S. C., Norfolk, Va., Ashe-
ville, N. C., April 30, Waterloo, Ia., Colum-
bia, S. C., Richmond, Va., Greenville, S. C. May 1, Cedar Rapids, Iowa; May 2, Raleigh, N. C., Washington, D. C.; May 3, Davenport, Ia.; Portland, Ore.; G. C. Baltimore, Huntington, Va.; May 6, Texarkana, Tex., Chicago; May 7, Shreveport, La., May 8, Dallas-Ft. Worth, Peota, Kan.; May 10, Oklahoma City, Kan-
sas City, Mo.; May 15, Tulsa, Okla., Bingle-
hamton, N. Y., Nashville, Tenn., Lincoln, Neb.; May 17, Detroit, Mich., N. Y., Oswego, N. Y.; May 18, Houston, Evansville, Ind.; May 19, Chester, N. L., St. Louis, Mo.; May 21, Lake- side, Wis., Scranton-Wilkes-Barre, Pa.; May 21, Indianapolis; May 22, Portland, Me.; Toledo, Ohio; Los Angeles, Calif.; May 23, Cincinnati.

May 24, Bangor, Me.; Detroit, Rochester, Ill.; Wheeling, W. Va.; May 27, Burlington, Vt.; May 28, Albany, N. Y.; May 31, Spring-
field, Ill.; June 2, Oklahoma City, Okla.; Tex., Minneapolis; June 3, Duluth, Minn.; June 4, Chicasa, Wis., Toledo, Ohio; Tex.; June 6, Fargo, N. D.; June 7, Portland, Ore., El Paso, Tex.; June 9, Kansas City, Mo.; June 10, Sacra-
mento, Calif.; Albuquerque, N. M.; June 12, San Diego, Calif., Salt Lake City; June 14, Phoen-
x, Ariz.; June 21, Monroe, La.; June 24, New Orleans; June 25, Baton Rouge, La.; June 28, Baffles, Nev.; June 28, Meridian, Miss.; Late June, Phila-
delphia, Los Angeles, San Francisco, Chi-
icago, New York, and Fresno, Calif.

Agency appointments...

• Alberto-Culver Co., Metrose Park, I11., which is spending virtually all of its budget in television, has added J. Walter Thompson Co., Chicago, as advertising agency for two new products not yet disclosed. Compton Adv. and BBDO, both Chicago, continue as A-C agencies with Compton placing the major share of A-C's business.

• Molson Breweries Ltd., Montreal, Canada, has appointed The Rumrill Co., Rochester, N. Y., as advertising agency for the U. S. sale of Molson's Canadian ale and Canadian beer. Mol-
son is the largest independent brewery in Canada and the 12th largest in North America. Canadian advertising for Molson continues to be handled by Cockfield-Brown & Co., Montreal, and MacLaren Adv, Co., Toronto.

• Gwaltney Inc., Smithfield, Va., meat packing firm, has appointed Liller, Neal, Battle & Lindsey, Richmond, as advertising agency.

• Fels & Co., Philadelphia, soap and detergent manufacturer, has named S. E. Zubrow Inc., that city, as advertis-
ing agency for all consumer products.

Y&R tv commercial check underway in 12 markets

Young & Rubicam now has access to a round-the-clock check on every client commercial run on all tv stations in 12 major markets, and in several months, in the top 75 markets.

The advertising agency became the first to sign a contract with Broadcast Advertisers Reports, according to a BAR announcement today (Monday). The contract covers a two-year period and is retroactive to Jan. 1, 1963. Auditing and checking for Y&R already have been underway, BAR said.

BAR independently audits proof-of-performance 24 hours-a-day, every day of the year. In addition to reports on Y&R clients, competitive product track records will be available for the agency’s checking. The monitoring will provide a check on product protection and over-commercialization as well as audit the performance.

BAR now monitors 48 stations in 12 markets but will be adding 18-20 stations in 5 to 6 markets each month, and by the end of this year will be up to 236 tv stations in 75 markets in which BAR estimates about 85% of all tv money is spent.

It was reported that other agencies soon will follow Y&R and sign for the monitoring service.

In effect, the BAR service will permit Y&R to review each station’s affidavits for every client spot that is run on all stations in the markets covered. The 12 markets which immediately come under the checking process are Atlanta, Baltimore, Boston, New York, Los Angeles, Chicago, Philadelphia, Detroit, Minneapolis, Washington, Pittsburgh, and San Francisco.

THE MEDIA

NAB nearly set on Chicago agenda

Pre-registrations for the 41st annual NAB convention at the Conrad-Hilton Hotel in Chicago March 31-April 3 are running 10-15% ahead of last year's, giving promise of a record attendance.

Already registered for Chicago at the middle of last week were 1,586 broadcasters, compared to 1,436 at the same time a year ago according to William L. Walker, assistant treasurer who is handling registrations. Pre-registration rolls close March 18, with those signing up early getting a reduced rate and preferred treatment in hotel rooms and banquet-luncheon tickets.

Highest official registered attendance at any NAB convention was the 3,101 who came to Washington in 1961. This mark is expected to fall in Chicago in three weeks.

Schroeder of WOOD Grand Rapids, Mich. They also are chairman of the NAB TV and Radio Boards, respectively.

Wanted: ‘qualified’ man

The President of the U. S. has given official notice that the broadcasting industry would like to have a “qualified broadcaster” appointed to the next vacancy on the FCC.

Joseph Goodfellow, vice president and general manager of WRCAM-FM-TV Washington, and chairman of the NAB’s conference of state association presidents, which adopted a resolution urging the President to name a broadcaster (BROADCASTING, March 4), delivered the document to the White House last week. Copies of the resolution also have been sent to each state association.

Unanimously adopted at the conference 12 days ago, it was introduced by Mel Burke of WTPF Charleston, president of the West Virginia Broadcasters Assn.

$13.5 million billing reported by ABC-TV

The ABC-TV sales department closed contracts last month for $13.5 million in second and third quarter business. A sales report issued last week showed most of the total coming from second quarter customers.

Nighttime billings by 26 advertisers accounted for $10,750,000, the highest buyers being Procter & Gamble and Bristol-Myers, each with over $1 million worth of time. Falling within the $500,000 to $1 million range for nighttime orders were Sinclair Oil, Polaroid, Remington, Schiltz, Noxzema, and Derby Foods. Clairol, Sterling Drug, General Mills, Dodge, Contac, Kaiser, Polk-Miller, Beecham Products, Chasebrough-Pond’s, Leh & Fink and Plough Inc., placed orders for between $250,000 and $500,000.

Daytime orders of about $2 million were consummated during February.

NAB nearly set on Chicago agenda

But the other 10% can make an important difference to you! At MGM Telestudios, all of that 10% is filled with the latest TV equipment from RCA. Take the six new TR-22 video tape recorders, soon to be installed. These fully transistorized, "new generation" instruments will record the highest quality pictures ever seen on TV screens. The TR-22 stands alone; so advanced in design, performance and stability that it is years ahead of any other video tape recorder. The TR-22 was created by RCA as a companion to the revolutionary TK-60 TV camera, the only 800-line* camera in the industry. Together they bring a completely new standard of artistic capability to video tape recording. Only at MGM Telestudios will you find this prime combination available for your commercial production.

*measure of resolving power

THE ANATOMY OF PRIMACY... PART III.
This is one of a series of major announcements from MGM Telestudios.
Today, tape, more than ever before, is TV's prime production tool. For more information, call Bob Fierman, Sales Manager, LO 3-1122

BROADCASTING, March 11, 1963
Side meetings scheduled for NAB convention

Not to be outdone by an expected record attendance at the NAB convention in Chicago March 31-April 3, the customary round of meetings of affiliated groups in the Conrad Hilton and nearby hotels also will be the largest ever this year. Some three-dozen extra-curricular sessions already are scheduled.

As in the past, the Assn. for Professional Broadcasting Engineers will hold the first such meeting at 2:30 p.m., Friday, March 29, in Room 9 (third floor) of the Hilton. Other meetings scheduled to date through the NAB (all in the Hilton unless designated otherwise):

Saturday, March 30—
9 a.m.-4 p.m. Assn. for Professional Broadcasting Education board meeting, Room 9 (third floor).
9:30 p.m. National Assn. of Fm Broadcasters, Waldorf Room.
10 a.m. QXR Network, meeting and luncheon, Rooms 18, 19 (4th floor).
2 p.m. Assn. of Maximum Service Telecasters, technical committee meeting, Sheraton Blackstone.
2 p.m. National Assn. of Fm Broadcasters, Waldorf Room.
3 p.m. ABC-TV affiliates, International Ballroom.
5:30 p.m. ABC Reception, International Ballroom.

topic of another panel featuring telecasters from markets of 100,000 population or less.

An extra tv session has been added on Sunday afternoon and will feature discussion on current topics of interest, including cost control, automation, local programming and promotion, personnel problems and community antenna tv systems.

The annual closed session labor clinic will be held Wednesday April 3.

Radio, Too—Radio assemblies will be held on Tuesday and Wednesday mornings concurrent with the tv sessions. The Tuesday meeting will feature a report on radio month promotions, an RAB presentation by its new president, Ed Bunker, and "Radio, the Lively Corpse" by Mitch Leigh, president of Music Makers Inc., New York.

On Wednesday, Station Representatives Assn. will display its annual sales presentation through its president, Ed Codel, and Larry Webb, executive director. Robert Mason of WMRN Marion, Ohio, chairman of the All-Industry Radio Music Licensing Committee, also will give his report.

Three panel discussions—"Enhancing the Station Profile," "Stereo—One Year Later," and "Fm Forum"—will highlight the program for Sunday's Fm Day. Ben Strouse of WWCD Washington, chairman of the NAB Fm Committee, will give his report at the beginning of the session.

The annual NAB Engineering Conference will run concurrently with the regular convention agenda, with separate meetings and luncheons each day. Luncheon speakers are Edward E. David Jr. of Bell Telephone Labs (Monday), Sidney Metzger of RCA (Tuesday) and Simon Ramo of Thompson Ramo Wooldridge Inc. (Wednesday).

Gow. Collins will open the engineering conference and the NAB's 1963 Engineering Achievement Award will be presented to Dr. George R. Town, dean of engineering at Iowa State U.

Hoffa's right to sue NBC upheld by court

Teamsters Union President James R. Hoffa's right to sue NBC for $2.5 million in Michigan has been upheld by U. S. District Judge Theodore Levin in Detroit.

The ruling supports Mr. Hoffa's contention that the suit, filed May 24, 1960, on Walter Gross of NBC's Detroit office, was sufficient. NBC had argued that the service on Mr. Gross, manager of television sales in Detroit, was not grounds for trial in Michigan.

In his suit Mr. Hoffa charged NBC, Robert Kennedy and Jack Paar had conspired to "ridicule, degrade, defame and humiliate him" (Broadcasting, May 30, 1960). The suit followed four appearances by Mr. Kennedy on the network, three on the Paar program and one on Meet the Press.

A companion suit against Messrs. Paar and Kennedy was dismissed by Judge Levin in 1960 (Broadcasting, Aug. 29, 1960) because they had been improperly served outside Michigan where the suit was instituted.

NBC said last week it still plans to run a segment on Mr. Hoffa on David Brinkley's Journal in April.

Denver pay tv accepting service applications

The Macfadden Teleglobe Pay-Tv system in Denver is now accepting applications for service, Gerald A. Bartell, president, announced last week.

Mr. Bartell said he was heartened by the initial response to newspaper advertisements over a week's period in the Denver area. He said 1,903 coupons and numerous telephone calls were received from Denver residents, seeking a pay tv brochure.

The Denver pay tv project is scheduled to begin in early May, using the facilities of KTVR (TV) Denver (ch. 2) (Broadcasting, Jan. 28).

Pulse issues latest tv audience profile

The Pulse Inc. is distributing to its subscribers its sixth edition of "TV Audience Profiles," which emphasizes demographic information on current network tv programs.

Called "Book I," the report breaks down the U. S. audience for each pro-
A new approach to religious programming on television, and the first presentation of its kind in America, is being telecast each Saturday at 5:00 PM on WMAR-TV. Titled "FAITH TO FAITH"—A DIALOGUE—the program features a Protestant minister and a Roman Catholic priest in a comparison of their respective faiths. It is not a religious debate but rather an effort toward helping both the Protestant and the Roman Catholic viewer better understand how his Christian neighbor believes and worships.

"FAITH TO FAITH"—A DIALOGUE is especially timely—because of current movements toward Christian Unity on both sides of the historic division in the Christian Church.

"FAITH TO FAITH"—A DIALOGUE is another First for Baltimore's First TV station—WMAR-TV . . . part of the dynamic concept of public service programming that has always been a feature on Channel 2.

No Wonder—In Maryland Most People Watch

gram in terms of audience composition (children, teen-age, male, 18-39, and 40 plus) and female (18-39 and 40 plus); size of family (1-2 members, 3-4 members and 5 or more); annual income (under $4,000, $4,000-$7,499 and $7,500 and up); education of household head (less than high school, high school graduate, some college or better); occupation of household head (professional, executive, managerial, official, technical, sales, clerical, craftsman, foreman, laborer); family cycle (with children under 6; children, 6-17; no children under 18); occupation status of housewife (employed, stay-at-home).

The study is based on cross-country interviewing during November 1962. It shows that 49 million U.S. families, accounting for 174,832,000 individuals, were in the TV audience at that time.

WGAL Tv Inc. takes over Arizona tv properties

Formal transfer of ch. 7 KOAT-TV Albuquerque, and ch. 4 KVOA-TV Tucson, (both Arizona) became effective last week with the arrival in Tucson of Clair R. McCollough, president of WGAL Television Inc., which had acquired the properties for $3,250,000. Contracts transferring the stations were signed in Washington on March 1 by Mr. McCollough and Clinton D. Mckinlon, former California congressman and president of Alvarado Television Co., the seller.

Mr. McCollough, who is also president of the parent Steinman Stations and chairman of the joint board of the NAB, said prior to his departure that new properties would be operated through resident managers. He said he would make frequent trips to the stations from his headquarters at WGAL-AM-FM-TV Lancaster, Pa.

changing hands

Announced • The following sales of station interests were reported last week subject to FCC approval:

- KFH-AM-FM Wichita, Kan.: Sold by Wichita Eagle and Beacon to Preston P. Reynolds Jr. and Walter W. Ahlschlager Jr. for over $1 million. The nine-story KFH Building in Wichita is included. Purchasers are Dallas businessmen engaged in constructing Wichita Plaza skyscraper building in Wichita; they also are in banking and real estate. They plan to move the KFH stations into the new building. KFH, founded in 1922, operates on 1330 kc with 5 kw fulltime. KFH-FM, which began in 1948, is on 100.3 mc with 11 kw.

- KBIG and KBIQ (FM) Avalon (Los Angeles), Calif.: 40% interest sold by John Poole to Kevin Sweeney, former president of Radio Advertising Bureau, for $300,000 for stock plus variables. Mr. Sweeney is slated to become president of John Poole Broadcasting Co. and is moving to California. He has one 17 time owned 32% of KFOX Long Beach, Calif., and 40% of KANS Independence, Mo. KBIG operates on 740 kc with 10 kw fulltime. KBIQ is on 104.3 mc with 106 kw.

- KMYC-AM-FM Marysville, Calif.: Sold by Carroll Hansen and Jack Sterling to William T. Stubblefield for $210,000. Mr. Stubblefield owns KTOB Petaluma, Calif. Messrs. Hansen and Sterling bought the station in 1959. Mr. Hansen is a former CBS Radio program director; Mr. Sterling, WCBS New York personality. KMYC is on 1410 kc with 5 kw daytime and 1 kw nighttime. KMYC-FM operates on 99.9 mc with 4.9 kw.

Approved • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 92).

- KXOA-AM-FM Sacramento, Calif.: Sold by Riley Gibson and associates to Producers Inc. for $500,000. Producers Inc., which is jointly owned by Ferris E. Taylor and family and Polaris Corp., owns WTVV (TV) Evansville, Ind.; KXGO-TV Fargo, KNOX- TV Grand Forks and KCND-TV Pembina, all North Dakota, and WKYW Louisville, Ky. The Milwaukee-based Polaris Corp, is a diversified company having interests in construction, warehousing, advertising agency, real estate. KXOA operates on 1470 kc with 5 kw daytime and 1 kw nighttime. KXOA-FM is on 107.9 mc with 12.5 kw. Commissioner Robert T. Bartley did not participate.

- KMO Tacoma, Wash.: Sold by J. Archie Morton and Dana J. Hunter to Edward A. Wheeler for $254,500. Mr. Wheeler owns WEAW-AM-FM Evans ton, Ill. KMO is on 1560 kc with 5 kw fulltime.

- WDDE-AM-FM Hamden, Conn.: Sold by Aldo deDominicis and Vincent deLaurentis to Stuart M. Cadan and Richard S. Green for $200,000 and agreement not to compete. Mr. Cadan was with sellers when they founded WHNC-TV New Haven, WDDE is a 1 kw daytimer on 1220 kc. WDDEFM, under construction, is on 101.3 mc with 20 kw.

KIOA downtown headquarters burn

A pre-dawn fire destroyed the downtown office building that housed KIOA Des Moines and eight other companies and civic organizations. KIOA maintained service by switching operations to its outlying transmitter location. Preliminary estimate of damages to the quarter-block building was in excess of $250,000. Remnants of KIOA signs can be seen at left and right center of photo as fireman fought the blaze in the 14-degrees-below-zero temperature that gripped the area.

there, has been acquitted.

A circuit court jury of six men voted to acquit Jack E. Burklew after deliberating nine hours.

Mr. Burklew was accused of offering $17,500 to Vice Mayor Eli S. Jenkins to vote in favor of selling the broadcast properties (Broadcasting, Jan. 7).

Mr. Burklew still faces a city council public hearing on charges of unethical conduct in office.

KFOG(FM) begins stereocasts

The Kaiser Broadcasting Div. of Kaiser Industries began stereo fm broadcasts on KFOG (FM) San Francisco (formerly KBAY [FM]) on March 1. KFOG, Kaiser's first station in continental U. S., features popular music and informational programming geared to the Bay Area.

Kaiser Broadcasting Div. owns KHVH-AM-TV Honolulu and KHJK (TV) Hilo, and has been granted construction permits for uhf stations in San Francisco (ch. 44), Corona (ch. 52) and Detroit (ch. 50) (Broadcasting, Jan. 7).

KTVH(TV) tall tower completed

KTVH (TV) Hutchinson-Wichita, Kan., has begun operation with a new 1,504 ft. tower, said by the ch. 12 station to be the tallest structure in Kansas.

The CBS affiliate started building the tower when the FCC granted permission last September. Over 250 tons of steel and 1,000 tons of concrete were used in the construction. Formal dedication ceremonies of the new KTVH (TV) tower will be held March 14.

CBS Radio acquires three new affiliates

KFGT, which went on the air in October 1962, operating on 930 kc with 1 kw daytime, has been an independent. WLAQ, which broadcasts on 1410 kc with 1 kw, was formerly an affiliate of ABC Radio. KUJ, operating on 1420 kc with 5 kw, had not been a network affiliate in recent years.

KDKA refuses to honor embargo on news session

Calling it “discrimination against radio and television stations,” KDKA-AM-FM-TV Pittsburgh refused to honor a 5½ hour embargo of a gubernatorial news conference last Wednesday.

The news conference held at 1 p.m. by Pennsylvania Gov. William Scranton was not to be released until 6:30 p.m., but the stations quoted from the news conference as soon as the facts were made available in mid-afternoon.

According to KDKA, the governor's aides had refused to give any reason why the conference should not be reported earlier than the embargo hour.
KOAT-TV moves to new home

KOAT-TV Albuquerque has moved its studio into a new $250,000 building three times as large as its old home.

Although the move took nearly three days, only a few hours of fringe time were lost in the shuffle, the station reported. The control center was moved to the transmitter site and live shows were originated from KOAT-TV's remote unit during two days of the transition period.

KOAT-TV was sold by Alvarado TV Inc. to WGAL Inc. (Steinman Stations) last January (Broadcasting, Jan. 28; also see page 46).

Court turns down Justice Dept. motion

U. S. Dept. of Justice's motion for a summary judgment in a government antitrust suit filed against CBS was turned down March 4 in a federal court in New York. It's expected that the suit now will come to trial, though no date has been set.

In handing down the decision, Judge Edward Weinfeld in effect found that the network's Incentive Compensation Plan does not show on its surface any alleged tie-ins.

The government filed its antitrust suit on April 12 in New York at the U. S. District Court, charging that CBS-TV's new plan then in effect only 11 months virtually forces affiliates to take all of CBS's afternoon and evening feeds, thus barring stations from carrying the programs of syndicators and spot buyers.

CBS denied antitrust violations and said the plan would not force affiliates to carry its programs, nor would it deny to other networks or independent program suppliers the most desirable time periods on stations affiliated with it (Broadcasting, April 16, 1962). The motion for a summary judgment was filed last December.

Media reports...

New Jersey network • The New Jersey Broadcasters Assn, last week inaugurated an NJBA Radio Network with the first broadcast of a weekly series of state-wide weather programs. Stations in the network include WOSJ-FM Pleasantville, WSNJ-FM Bridgeton, WTOA (FM) Trenton and WJRS-FM Newark. Francis Matrangola, general manager of WCMC Wildwood, is chairman of the network, and developed it in cooperation with the New Jersey Office of Civil Defense.

New format • WAIT Chicago has changed its format to what it terms "environmental sound." It calls for 12 minutes of music in every quarter-hour followed by a "cluster" of three 1-minute commercials.

Full-time stereo • WPFW (FM) Providence, R. I., has commenced fulltime stereo broadcasting. The station, which operates 7 a.m.-12 midnight, has had partial FM stereo operation since Dec. 17, 1961. WPFW (FM) is on 95.5 mc with 20 kw.

New arrival • The replacement transmitter for WBIQ (TV) (educational ch. 10) Birmingham, Ala., arrived according to Raymond Harlibert, general manager of the Alabama Educational Television Commission. WAPI-TV Birmingham is sharing the cost of the replacement unit and WBRC-TV Birmingham is expanding the rear of its transmitter building to house the new WBIQ transmitter where it will be operated in rent-free space courtesy of Taft Broadcasting Co. The new transmitter will operate on full authorized power of 316 kw visual, 158 kw aural.
The Great CHESAPEAKE BAY BRIDGE-TUNNEL Opening Next Jan.

It links Tidewater Virginia with New York and Miami on the fastest, most direct and profitable North-South route in America. This new bridge-tunnel will give Eastern industry new and broader access to America's markets through the world's greatest harbor (Hampton Roads).

Tidewater is already one of the fastest growing markets in the U.S. What a place to put a new-business dollar—right now. TideWTAR is a better way to spell it, and the best way to sell it.

ASCAP members get government support
JUSTICE DEPT. SUPPORTS CREDIT SYSTEM CHANGES

ASCAP members who are campaigning for a change in the organization’s system of paying songwriters have won assistance from the Dept. of Justice.

The government, in comments filed Feb. 20 with New York federal Judge John E. McGeehan, court-appointed master on the ASCAP consent decree, agreed with one of the three requests made by the writers for changes in the credit system used by ASCAP to determine payments to members. It opposed a second proposal and was neutral on a third.

The writers, 132 strong and including such famed musicians as Leonard Bernstein, last January asked for modification of the credit plan for background music on tv, including such music in movies used on tv.

In its comments to Judge McGeehan, the government agreed that the "qualifying works" concept should be abolished. It opposed, however, the idea that all background music should be treated on a par with feature music. It took no position on the third objective; that all credits, whether for feature or background music be based on duration of performance.

Under present ASCAP rules, a "qualifying work" is music that is used as background or theme but which had attained a given number of "feature" performances before its use as background or theme. It receives more credits than ordinary background music compositions. Members of ASCAP receive royalties for their works on a "credit" system.

The government points out that 14% of ASCAP’s total distribution goes to “qualifying” theme songs and background music. Yet, it adds, the duration of these performances is “clearly minimal” compared to background music and theme music which are treated on a duration basis or on a straight performance basis.

In practice, the Justice Dept. comments, the concept of “qualifying works” seems to be “an open invitation to program ‘rigging’.”

Judge McGeehan will recommend action on the membership petition to federal Judge Sylvester J. Ryan in New York sometime in the next few months. Judge Ryan for several years has presided over all negotiations for changes in the consent decree under which ASCAP operates.

It’s the 30th anniversary of ‘Fireside Chats’

On the eve of the 30th anniversary of the first “Fireside Chat,” the man who first used that term—CBS’ Robert Trout—recalled: “It certainly set a precedent for informality of the President at the time. But I doubt Mr. Roosevelt would have dreamed of being as informal as President Kennedy.”

Mr. Trout, veteran Washington newsmen who was first CBS capital correspondent, laughed when he recalled the circumstances surrounding the origin of the term.

“I was only 23-years-old at the time, so to add a bit of quick maturity, I said I was 28 and grew my mustache. It was a standing joke thereafter that when my birthday came along I took off a year instead of adding one,” he said.

The term “fireside chat” came into existence quite casually, he explained. “We at the station (Washington’s WJZ, which later became CBS affiliate WTOP) were told to prepare two types of introductions for the President—a regular formal one, and the other a more folksy type. We submitted both to the White House, and Mr. Roosevelt approved the folksy one, which just happened to include the ‘fireside chat’ term.” Mr. Trout drew the assignment of introducing the President in his first chat” March 12, 1933.

“But at the time, we had no idea there’d be any more than one such talk,” he grinned. “If I’d known how popular the term would become, maybe I’d have quit right then while I was ahead.”

There were serious implications to the talk, Mr. Trout recalled, which went beyond the immediate effect of that first talk.

“The first ‘Fireside Chat’ was a success,” said Mr. Trout. “Mr. Roosevelt spoke to the nation on a Sunday night before he was to end the moratorium on banks the next Monday morning. He asked the people not to make a run on the banks when they re-opened, and they didn’t.”

“But looking back on the talk with the advantage of 30 years’ perspective, I can see it as a pivotal point in the broadcast industry. It was the beginning of a trend of presidential exposure and informal-

Kelly series distribution to begin at convention

A new series of 39 half-hour children's tv programs, The Emmett Kelly Show, will be released for U. S. distribution at the Television Film Exhibit convention in Chicago (March 30-April 3) and for Canadian distribution at the Canadian Assn. of Broadcasters convention in Toronto in May, Donald Klauber, vice president and national sales manager of Seven Arts Assoc. Corp., announced last week.

The program spotlights the famed clown in circus routines and as host to cartoons in each episode. The series was produced for Seven Arts by Eric Albertson, with Mr. Klauber as executive producer; Harvey Chertok as associate producer and Mende Brown as director.

Theatre tv network to have 100 outlets

Within the next 12 months, a National Teletheatre Network of 100 theatres in as many communities throughout the nation will be entertaining audiences with "top Broadway shows, special Hollywood productions, major sporting events and other unique attractions," with a combined nightly box office revenue of about $500,000, National General Corp. President Eugene V. Klein said Thursday (March 7).

Addressing a luncheon meeting of the Los Angeles Society of Security Analysts, Mr. Klein said that plans call for equipping 100 U. S. motion picture theatres with special tv projection receivers developed by General Electric Corp., for which NGC has the exclusive distribution rights (Broadcasting, March 4). About 20 of these theatres will be NGC houses, he said, with the other 80 franchised to use the GE equipment on a lease basis from NGC, which will retain ownership of the apparatus. Target date for completion of these installations is March 1964, he said.

The NTN programming will be on a 365-day-a-year basis, Mr. Klein stated, "with profit-pulling events scheduled morning, afternoon and evening. In the normally dead time of morning, for example, our theatres will be open to introduce a manufacturer's new line or an industry's trade show. In the afternoon, doctors may swarm to our theatres to watch Paul Dudley White perform a delicate heart operation in the high fidelity color so important to medical technique and at night an outstanding Broadway show, concert or sporting event will draw the crowds back again."

National General has already committed itself for an expenditure of $7.5 million for GE's Telaria tv projection receiving equipment, Mr. Klein reported. This will be installed in theatres in communities ranging in size from major metropolitan areas to cities of 150,000 population or perhaps even smaller communities, he said. He predicted that before long the NTN houses would discard feature motion picture exhibition entirely in favor of bringing the public live entertainment in full color via leased lines.

Pressed for details, Mr. Klein said that a Broadway theatrical production might run for three weeks with six evening performances and two matinees a week. The seventh night might be devoted to cultural programming, an opera, a concert, a ballet or a Shakespearean drama.

Although GE's telaria tv reception equipment will be installed in a NGC theatre in Los Angeles in time for a demonstration there within 90 days and probably sooner, Mr. Klein stressed that no commercial operation should be expected until the spring of 1964. "There is a tremendous amount of experimentation to be done before we put this new entertainment medium before the public." Asked about union problems, he said that there will be some, of course, but "I'm sure we'll be able to solve them satisfactorily."

The $500,000 figure for an evening's revenue was arrived at by estimating an average of 2,000 seats per theatre, or a total of 200,000 seats in the 100-theatre network with an average price of $2.50 a seat (ranging from $3.50 or more for a big city theatre to perhaps $1 or $1.50 in a smaller community).

Purcell acquires firm for production of spots

Purcell Productions Inc., New York, announced March 1 that it had acquired Inter Continental Broadcast Media, New York, from Franklin Broadcasting Corp.

ICBM will serve as a subsidiary of Purcell, providing radio and tv stations with varied services for promoting local sales, including the production of jingles for local advertisers and program features and creation of merchandising aids.

Broadcasting, March 11, 1963
“Adventures in Paradise”

Viewers find the lure of the islands most irresistible. 91 irresistible hours from the top quality studios of Twentieth Century Fox TV, Inc.

444 West 56th Street, New York 19, New York—Columbus 5-3320

Hal Roach Studios gets new name

Landmark Studios, new name for the former Hal Roach Studios in Culver City, Calif., is being remodeled at a cost of more than $250,-
000 to provide facilities for the production of tv and theatrical films. Annunciation of the renovation program was made jointly by Max-
well J. Fenmore and George Ponty, who purchased the property last De-
cember at a court auction with a high bid of $1,326,000. Property in-
cludes seven sound stages, ranging from 5,000 to 34,000 square feet, to provide 105,000 square feet of staging area, and about 50 other
buildings of cutting rooms, projection rooms, special effects quarters, shops, storehouses and offices. Park-
ing accommodations for 300 ears are on the premises for tenants and studio personnel.

Annual program exchange

to start April 13

The five CBS owned tv stations begin their fifth annual Public Affairs Pro-
gram Exchange April 13, according to Craig Lawrence, vice president, CBS Television Stations Div. Each station will contribute 20 programs produced for local use.

The series are The American Musical Theatre, WCBS-TV New York; Com-
munism: Myth vs. Reality; KNXT (TV) Los Angeles; Friendship Show, WBBM-
TV Chicago; Space: The New Ocean, WCAU-TV Philadelphia, and Story
Shop, KMOL-TV St. Louis.

The exchange series will be seen on all five stations beginning April 13 in New York and Los Angeles, April 20 in Chicago and Philadelphia and April 27 in St. Louis.

ABC Radio gets rights
to Liston-Patterson bout

ABC Radio has purchased broadcast rights of the heavyweight championship
fight in Miami between champion Sonny Liston and challenger Floyd Patterson
Wed., April 10 (10 p.m., EST).

It will be the network’s fifth con-
secutive exclusive broadcast of heavy-
weight title bouts which included the
three Patterson-Ingemar Johansson
fights and the first Liston-Patterson bout.

The purchase price was not disclosed, but a network spokesman did say it was
considerably less than the amount paid for rights to the first fight “because of apprehension resulting from that one.”

The first fight ended in a one-round
knockout victory for Liston.

No sponsor has been signed for the
broadcast as yet.

There will be no home television of
the fight. Closed-circuit theatre TV
will be produced by SportsVision Inc.

Official sells ‘Marilyn’
in 11 countries

Official Films’ half-hour documentary program, Marilyn Monroe, has been
sold in 11 foreign countries several weeks in advance of its U. S. presenta-
tion on ABC-TV on March 24, Sey-
mour Reed, Official president, an-
nounced last week.

Mr. Reed noted that these sales have accounted for more than one half of
the production costs of the special, and said several more overseas contracts are in negotiation. The U. S. showing will be
sponsored by Whitehall Labs. Div.,
American Home Products Corp.,
through Win. Esty Co. (BROADCASTING,
Feb. 25).

The Official sales were made to the
BBC; the Australian Broadcasting Com-
mision; Documentary Programs Inc,
for a German-language version in West
Germany, Austria, Switzerland and
Luxembourg; Radiotelevisione Italiana;
Oy-Mainos, a tv station in Finland; a
Lebanese tv organization, and Tele

Organizacion Americana of Buenos
Aires for a Spanish-dubbed presenta-
tion in Argentina and Uruguay. Sub-
titles will be used in Italy, Finland and
Lebanon.

Sports Network to cover
NCAA basketball tourney

Sports Network Inc. has announced it is arranging a group of regional telecasts and one national telecast for coverage of the National Collegiate Athletic Assn. basketball tournament which begins on March 9 and ends on March 23.

All games through the semi-finals on
March 22 will be telecast on a regional basis, according to Richard Bailey, SNI president, while the final contest on March 23 will be telecast nationally.

He said there will be no regional black-
out if the games are sold out in advance
at the playing site.

A total of 20 games are expected to
be telecast. SNI was in the process last
week of arranging station lineups to
carry the coverage.

Survey shows tv viewers
prefer entertainment

A survey of 1,885 households in the Greater Milwaukee area has shown
viewers look to television primarily for entertainment and information, but not
education. The survey, the second
within three years, was taken in con-
junction with the annual Milwaukee
Journal Consumer Analysis by WTMJ-
TV.

According to George Comte, gener-
al manager of WTMJ-AM-FM-TV,
“the results from both surveys prove
once more, we believe, that despite
criticism from a few circles, our in-
dustry is providing the service our viewers want and which they, themselves, feel they need.”

Program notes ...

'87' to syndication • NBC Films Inc.,
New York, last week announced it will syndicate its 87th Precinct series. The
30-one-hour episodes were telecast on
NBC-TV during the 1961-62 season.

Consolidation • Walter Reade-Sterling
Inc. has consolidated the Los Angeles
offices of its two subsidiaries, Conti-
nental Distributing Div. and Sterling
Television Div. New headquarters for
both divisions is at 8933 Sunset Blvd.

Segment features newsmakers • Per-
cos Close-up, a new member of the
CBS Radio Dimension series will be
aired daily (Mon.-Fri., 3:30-3:35 p.m.
EST) by Mike Wallace. Mr. Wallace,
recently appointed correspondent at
CBS News, New York (WEEK’S HEAD-
LINERS, March 4) will use essay and

interview formats, presenting personalities currently in the news.

Scharry plans tv series • Scharry Productions, New York, headed by writer-producer-director Dore Schary, announced plans last week to produce a ten-week, half-hour drama series of programs based on H. G. Wells' Outline of History book. Mr. Schary is in negotiations with the tv networks on the projected series. It will be filmed in part on locations in France, Italy and Spain. The Outline of History project marks Mr. Schary's debut as a television series producer.

TFE's 18th • Embassy Pictures Corp. has joined Television Film Exhibit—1963, a project under which leading tv film distributors will display their programs and promotional material at the Pick-Congress Hotel in Chicago on March 30-April 3 during the time of the NAB convention. Embassy is the 18th distributor organization participating in TFE—1963.

Andy goes daytime • CBS-TV has completed a long-range agreement with Mayberry Productions to present daytime rebroadcasts of The Andy Griffith Show starting late in 1964. The nighttime series, now in its third season on CBS-TV, Mondays, 9:30-10 p.m., is not affected by the daytime deal. In negotiations for the Monday-Friday daytime reruns, Mayberry was represented by William Morris Agency.

New production • The Terrace Boys Div. of CBS Films Inc. has begun production, for the third year, of its Deputy Dawg series. The new series, which will be available in color as well as black-and-white, is being offered for sale immediately. The syndicated series is currently sold to more than 150 television stations.

SG's fellow named • Screen Gems reports that James D. Wotring, a 23-year-old graduate student at the U. of California at Los Angeles, is the fourth recipient of the $1,500 SG Annual Fellowship. He will spend five months at Screen Gems' Hollywood studio as an apprentice, applying his fellowship grant toward his master's degree thesis.

New TAC service • Television Affiliates Corp. is adding a new programming service to present subscribers, consisting of tv programs ranging from nine to 12 minutes in length on various community-oriented topics, including child guidance, personal and traffic safety, crime prevention and public health. Titled "Community Special Programming," the segments are being made available initially at no additional cost, according to Robert Weisberg, TAC vice president.

Desilu goes live • Five-a-week game show, You Don't Say, produced by Desilu, has been sold to NBC-TV, which will start it April 1 in the Monday-Friday, 3:30-4 p.m. time slot. This program, which has been tested on KTLA (TV) Los Angeles, is a live daytime game show and marks the entry of Desilu into live network program production. Ralph Andrews and Bill Yagemann, who head Desilu's live programming division, will produce the series, to be telecast in color from the network's studios in Burbank, Calif.

Tv pilot • Sam Marx is planning a new tv series to be based on the motion picture, "Damon and Pythias." Pilot script has been completed by Steve Rich. Guy Williams, who starred in the movie, may also play the same role in the tv series.

Bookies revisited • "Biography of a Booze Joint," first telecast in November 1961, will be rebroadcast on CBS-TV March 20 (7:30-8:30 p.m. EST). The special, which is documented with films of an actual bookie shop in Boston, is one of the CBS Reports series.

Varsity Show competition opens • BMI has announced the opening of the third annual Varsity Show Competition. It offers $1,000 to the composer and lyricist of the best college musical comedy or revue presented in the U. S. and Canada during the 1962-63 academic year. Rules for the competition, which closes June 15, are available from Robert B. Sour, BMI, 589 Fifth Ave., New York 17. Winners will be announced about Oct. 15.

New WBMB series • WBMB Chicago has started a new live drama series featuring local writing and acting talent in cooperation with Chicago Board of Rabbis. The 13-week series deals with brotherhood themes and is aired 11:05-11:30 p.m. on Wednesdays.

Two foreign circuses • The Moscow State Circus and the Blackpool Tower Circus of England will be offered for U. S. presentation for the first time as three-one-hour specials. Distributor is Independent Television Corp.

French accent • Seven Arts Assoc. Corp. is placing En France, a series of 26 half-hour adult French lessons starring Dawn Addams into tv syndication during the Television Film Exhibit—'63 convention in Chicago March 30-April 3. The series was produced in Paris by Time Inc. in association with the Librairie Hachette of Paris, and deals with the language, the people and geographical features of France.

Hackett on WNEW • Comic Buddy Hackett has signed with WNEW New York to do a weekly one-hour conversation and music show to be heard Sundays (6-7 p.m.). The show is called The Other Side of Buddy Hackett and reportedly will reveal interests of the comedian beyond the limits of the entertainment world.

Farming interview programs • Farm News Report, a monthly series of four 4½-minute radio interviews with agriculture experts, will be made available at no cost to radio stations in the U. S. Produced by Massey-Ferguson Co., the series is available from Empire Broadcasting Corp., 480 Lexington Ave., New York 17.

Capital cut • NBC newsmen Chet Huntley has made a record of humorous comments by public figures including President Kennedy, Adlai Stevenson and Sen. Goldwater, among others. The disc, titled "Chet Huntley Presents the Best of Washington Humor," has been purchased by Cameo-Parkway Records, Philadelphia, through Artists Agency Corp., New York.

Total news • WUPI (FM) Lynn, Mass., plans a new format of "total" information and wide news coverage, according to station owner Harvey Sheldon, who calls the new programming "Radio Free Boston." WUPI (FM), an MBS station on 105.3 mc, counts on "public sponsorship and support" to back its format.

New series • Alfred Davidson Associates, whose radio series, The World of Fashion, is syndicated to 42 radio stations, is preparing to introduce a tv version planned as a 10-minute program to be broadcast as a five-days-a-week strip. Walter Reade-Sterling Inc. will handle the distribution of the new...

INTERNATIONAL

AROUND THE WORLD WITH TELEVISION

Tv stations increase 29% in year, receivers up 21%

Overseas television last year made considerable advances, maintaining a hefty lead over Communist-bloc countries and introducing seven new countries and territories to tv, according to the U. S. Information Agency's annual report on the foreign developments of the medium.

The USIA figures—which exclude U. S., Canadian and armed forces stations abroad—showed an increase in overseas tv stations from 2,047 to 2,641, an advance of over 29%, and a burgeoning of receivers from 53,760,000 to 65,502,000, up more than 21%. Of the 2,641 overseas stations, only 549 are in Communist countries, the U.S. Information Agency said. Red countries gained 168 stations last year, and their sets at year's end totalled 11,310,000.

The seven countries and territories which started tv service last year are Gibraltar and Malta in Europe, Trinidad-Tobago in the Caribbean, Kenya and Morocco in Africa, Indonesia and Formosa in the Far East.

Japan was the site of television's most spectacular growth, adding 4,151,100 new sets for a total of 12,837,100, placing Japan second only to the U. S. in number of receivers.

"Overseas Television Developments in 1962," the name of the USIA report, also lists activity abroad in etv, the launching of space communications satellites Telstar and Relay and other significant events.

BBC transmitters to be partially American made

Eitel-McCullough Inc., electronic products development firm in San Carlos, Calif., is indirectly benefitting from BBC orders, totalling $3.5 million, for 24 new uhf tv transmitters.

BBC has placed orders for 12 transmitters each from Marconi Wireless Telegraph Co. Ltd., and Pye TVT Ltd., two English firms, both of which manufacture transmitters requiring klstron tubes, and both of which use Eimac klstrons exclusively.

The new tv stations are for BBC's new 625-line uhf service which will eventually cover most of Great Britain.

Gillette buys 'Fight' on 2 Japanese stations

The Gillette Co. has signed for 26-week sponsorship of Fight of the Week on two Japanese stations, both ABC International television affiliates. The unusually large foreign buy was made at an estimated cost of $96,000.

The two stations, NFT (TV) Tokyo and MBS (TV) Osaka, have also obtained telecast rights of the 1963 World Series. Gillette's agency in Japan is McCann-Erickson-Hakuhodo.

ABC International, which made the Fight sales, is a subsidiary of AB-PT.

Y&R acquires Italian agency

Young & Rubicam Inc. has bought controlling interest in an Italian advertising agency, Itamco, in Milan. The new firm, which will be known as Young & Rubicam-Itamco Spa., will be headed by Francis E. Gearon, senior vice president and director of Y&R's international division, who has been named president of the Milan agency, and Sumner J. Winebaum, managing director of the branch.

Mr. Winebaum was formerly head of the Y&R corporate office in Milan, which the agency opened last November. The two offices will be consolidated in the near future.

Among Itamco's clients are Procter & Gamble Italia Spa., and Kimberly-Clark Ltd.

Screen Gems forms international division

Screen Gems Inc., New York, has organized an International Broadcast Div., according to Jerome Hyams, executive vice president and general manager of the tv production firm.

For the immediate future, the international unit will concentrate its activity in Latin America. Boris Frank, formerly of the Bartell Broadcast Group. has been named manager, Latin America.

The international unit will function as consultant and/or representative of Latin American tv stations. The first station to sign with IBD is HIN-TV Santo Domingo, Dominican Republic.

Closed circuit studio to open

Cockfield, Brown & Co. Ltd., Toronto, reportedly will become Canada's first advertising agency to operate a closed-circuit television studio with telecine chain when CB ch. 3 goes into operation early this spring.

D. R. McBride, agency president, said that the c-c operation at the agency's Toronto headquarters will enable presentation material—16mm film, 35mm slides, or "live"—to be transmitted from the fifth floor studio to executive offices on the seventh floor, the main floor conference room, and other areas which may be included in the circuit.

"The Wasp Woman," "Beast From Haunted Cave" and "The Last Woman on Earth."

Show goes to school • Sterling Educational Films, New York, has entered into agreement with NBC-TV to market self-contained 16mm instructional segments from the network's Exploring series directly to schools and film libraries in United States and Canada. Sterling is an affiliate of the Walter Reade-Sterling group.

'T-Day' available

D-Day, a David Wolper production first aired as a du Pont special, will be presented over tv stations in at least seven European countries on June 6, 19 years to the day after the actual event.

The documentary will be televised over stations in England, Holland, Belgium, Sweden, Spain, Denmark and Italy. Arrangement were made by MCA-TV, which handles all Wolper tv specials overseas. MCA is seeking the addition of other stations in other European countries.

tv series, to be produced and filmed at 20th Century-Fox Television starting later this month.

Lessons for senior • WBNS-TV Columbus, Ohio, has acquired CBS Films' Assignment Foreign Legion series. Dubbed in Spanish, the 13-week show will be telecast starting March 25 (7-7:30 a.m., Mon.-Fri.) as a conversational Spanish course. According to the station, time normally allotted to commercials in the series will be given to a professor of Romance languages who will comment on each program.

Two stations join TAC • WKBN-TV Youngstown, Ohio, and KVAL-TV Eugene, Ore., have become affiliates of Television Affiliates Corp., New York.

New science fiction features • Allied Artists Tv Corp. has added 12 features to its Science Fiction group for television distribution. The package, called "12 Exploits," contains such titles as
Follow the Sun

Your most pallid time period takes on a vigorous new look. 30 vigorous hours from the top quality studios of Twentieth Century Fox TV., Inc.

“FOLLOW THE SUN” Stars Barry Coe as Ben Gregory, Brett Halsey as Paul Templin, Gigi Perreau as Kathy Richards, and Gary Lockwood as Erick Jason; And Features Guest Stars Such As... FINANCIAL REPORTS

CROSLEY, AVCO, SET NEW RECORDS

Sales rose 28% over those of previous year

Crosley Broadcasting Corp. had its best operating results in history, it was reported last week in the annual report of the Avco Corp.

Avco reported net earnings in 1962 of $20,040, 265 ($1.83 a share), highest in the company's history. In 1961, net income was $12,982,052 ($1.24 a share). The 1962 figure includes non-recurring capital gain of $1,249,989 (11 cents a share) from the sale of Crosley-owned WLWA (TV) Atlanta, Ga., to WIBC Indianapolis for $3.3 million. This was part of the arrangement whereby WIBC withdrew its application for the Indianapolis channel.

Crosley received the grant for Indianapolis in 1957, but this was reversed in 1961 in favor of WIBC after the U.S. Court of Appeals remanded the case to the FCC because Commissioner T. A. M. Craven voted for Crosley without having heard oral argument. In the interim, the personnel of the commission changed.

Consolidated sales in 1962 were $414,280,128, up 28% from 1961's $323,142,012.

Crosley stations are WLW and WLWT (TV) Cincinnati, WLWC (TV) Columbus and WLWD (TV) Dayton, all Ohio, and WLWI (TV) Indianapolis.

Radio-tv property keeps Boston paper in black ink

Television operations put the Boston Herald-Traveler Corp. in the black last year, Robert P. Talmadge, treasurer of the publishing company reported last week. The company publishes the Boston Herald and Traveler and owns WHDH-AM-TV Boston.

The Herald-Traveler company reported a consolidated net income in 1962 of $1,572,577 ($3.32 a share), on total net revenues of $34,822,277. This compares with 1961's net income of $1,657,658 ($3.68 a share) on total net revenues of $34,709,976.

Broadcasting accounted for $9,481,247 of the net revenues in 1962; in 1961 broadcasting was $8,988,583. Newspaper revenues last year amounted to $17,066,651 from advertising and $8,274,379 from circulation; in 1961 these figures were $17,346,682 and $8,371,711.

WHDH Inc. showed an improvement for the year "largely as a result of television," Mr. Talmadge said in his report to stockholders. Newspaper revenues and operating results were down, he said. In January, the Herald-Traveler paid a 5% stock dividend to shareholders, increasing outstanding shares to 23,620.

Columbia Pictures net falls below '61 figure

Columbia Pictures Corp., New York, last week reported net income for six months ended Dec. 30, 1962 fell to $871,000 (46 cents a share) from $1,637,000 (98 cents a share) in corresponding period of previous year. The company noted earnings were reduced by a provision for full federal taxes. In the previous year, net income benefited from a tax-loss carry forward. Gross earnings for the six-month period in 1962 amounted to $1,767,000 against $1,890,000 in like period of 1961.

Columbia Pictures owns 89% of Screen Gems Inc. which owns KCPX-AM-FM-TV Salt Lake City and WAPA-TV San Juan and WOLE-TV Aguadilla, both Puerto Rico.

Time Inc. revenue at all-time high

Time Inc. last week reported for 1962 the highest revenues and the third highest net income in the company's 40-year history. Revenues from sales rose to $326,039,000 in 1962 from a 1961 figure of $309,237,000.

Net income for 1962 was $10,190,000 ($4.76 a share), representing the company's highest earnings since 1957 and a 14% gain over 1961 when a net income of $8,971,000 ($4.23 a share) was reported.

The company also announced expansion of its broadcast activities into Latin America. Time-Life acquired PROARTEL, in Buenos Aires, a television program production company, in association with Goar Mestre, CBS and local Argentine interests. The company also joined Mr. Mestre, a former Cuban broadcaster, and CBS as an associate in PANTEL, a television production company in Lima, Peru.

Stockholding changes listed by SEC

Changes in stockholdings of officers and/or directors of companies listed on stock exchanges were reported last week by the Securities & Exchange Commission. In its February report, SEC lists the following broadcast transactions:

Leonard H. Goldenson, American Broadcasting - Paramount Theatres, sold 5,000 common, bought two (2) shares, resulting in final holdings of 60,727; John P. McGrath, Capital Cities Broadcasting Corp., sold 315, with 39,351 remaining; as custodian he holds 1,500.

Also David B. Bartell, Macfadden-Bartell bought 2,600 common, contributed 5,000 common to corporation for retirement, left with 323,507; Gerald A. Bartell, bought 2,000, contributed 6,250, remaining 322,379; Lee B. Bartell, bought 2,400, contributed 5,000, remaining 322,011; Marvin Bartell, bought 700, contributed 3,125, remaining 116,142.

Also Mark Evans, Metromedia, bought 500 common for total of 10,450; Benedict Gimbel Jr., sold 2,000, leaving 15,000; Lawrence H. Rogers II, Tait Broadcasting Co., sold 2,000 common, leaving 3,423. Norman E. Bennett, Crowell-Collier, acquired 1,237 common through option (exercised July 15, 1962), giving him total of 1,523; Summer Blossom sold 500, leaving 4,258; Wilson D. Cole, acquired 100 through option, giving him total of 18,722.

Collins Radio net, sales show increase

Collins Radio Co., broadcast equipment manufacturer, reported a net income of $1,716,718 (77 cents a share) on net sales of $111,211,292 for the first six months of its fiscal year ended Feb. 1.

This compares to the same 1962 period's net income of $1,041,265 (47¢ a share) on net sales of $93,805,154.

Backlog of orders as of Feb. 1 totaled $251 million, compared to $191 million as of Jan. 31. Commercial and foreign government orders amounted to $50 million of the backlog as of Feb. 1.
Why Should This Picture... Cost Twice As Much As This One?

Obviously it shouldn't. Yet most TV stations are still paying twice as much as necessary to transmit news broadcasts, panel shows, live audience shows, live spots... in fact about 80 per cent of all studio work. Significant new technological advances in Vidicons now make it possible for you to put quality pictures on the air in these scenes at ½ the price.

A lot of people are still nursing the idea (once true) that a Vidicon Camera won't give good picture quality. Take a close look at the two pictures here. One is EMI Vidicon quality; the other is Image Orthicon quality. Can you tell the difference? Well, the viewers can't either.

Contact Electra Megadyne, Inc. for the full story on how you can save money using Vidicon Cameras in your studio.

Trouble ahead for rating services

HINTS INDICATE COMMITTEE NOT TELLING ALL FIRST WEEK

Much of the evidence was still missing last week, but carefully plotted questions by the House Subcommittee on Communications gave strong promise it intends to prove that broadcast rating services are not what they have been claiming to be.

One member, Rep. William L. Springer (R-Ill.), put it this way: "Evidence comes very close to indicating . . . fraud."

Other subcommittee members, particularly Chairman Oren Harris (D-Ark.), repeatedly dropped hints and asked questions which indicated that they know considerably more than they are telling.

Would federally-enforced uniform standards for rating services help, they asked witnesses from the NAB, the major radio and television networks and other broadcasters.

Subcommittee members registered disbelief when witnesses claimed that ratings are just one of many factors that determine programming.

Congressmen found it hard to understand why three aggressive competitors—ABC-TV, CBS-TV and NBC-TV—all rely on the same company—A. C. Nielsen Co. of Chicago—to provide their audience measurements.

If fraud or other improprieties exist in the rating business, disclosure will come early this week when representatives of several rating services testify.

Broadcasters found themselves on different sides of several fences as the questioning advanced.

Gov. Collins, for example, was the only broadcaster witness who, when pressed, said he would go along with federal regulation of rating services, if no other solution would work. Other broadcasters firmly opposed extension of federal regulation.

Gov. Collins and NBC-TV witnesses maintained that ratings were only one of many factors which networks consider in retaining or killing programs and in setting rates for affiliates. But CBS-TV and ABC-TV took another view, after considerable prodding by questioners, that they did think that ratings were the primary factor in such matters.

Network witnesses were asked why no network has bothered to check Nielsen's figures.

Raising a possible antitrust issue, questioners asked why Nielsen had no competition, at least on a national rating basis.

No network witness questioned Nielsen's honesty.

A Louisville broadcaster who has been critical of rating methods and practices for many years, suggested disclaimers, now printed on their pocket pieces by firms which signed consent orders with the Federal Trade Commission, should be labeled with a skull and crossbones.

Expected on the stand today (Monday) are Robert E. West, president, Robert S. Conlan Assoc. Inc., of Kansas City, and Allan V. Jay, manager, Videodex Inc., New York.

The hearings began Tuesday (March 5) in a room jammed with upper-echelon executives of the broadcasting and ratings firm. Two staff investigators, Rex Sparger and Bob Richardson, crossed the nation for 18 months to collect material for the hearings. (BROADCASTING, March 4).

More Regulation? Just as advertised, NAB President LeRoy Collins was the lead-off witness. The former Florida governor called for reform in ratings. In answer to a question, he said that if it takes federal regulation to assure that all rating services and broadcasters operate under the same standards in compiling and using results, then "I personally wouldn't look with disfavor on government licensing" of the services.

He said that he had given "no thought" to possible government regulation, but that "we would certainly like to try the free system" before the government moves in.

Gov. Collins said that his concern about ratings has shifted toward questioning their quality and accuracy—from a 1961 feeling that broadcasting is slave to the services. He said the first project of the NAB's new research department is a study of the accuracy of audience ratings.

This study has not begun as yet, the subcommittee was told by Melvin A. Goldberg, NAB vice president for research, who appeared with NAB's Gov. Collins.

Like the networks, the NAB president maintained that ratings are only one of many factors involved in "the program decision making process. When he first came into broadcasting as NAB president in January 1961, Gov. Collins said that he seriously questioned the need for any audience measuring efforts but now agrees they are necessary.

"I am still convinced that reform is needed," he said. "I am just as convinced that rating data and conclusions drawn therefrom should be more accurate and more reliable. They should be developed through methodologies and procedures affording greater assurance of freedom from error than is now the case."

In the necessary reform, the central question should be if present rating reports deserve acceptance as reasonably accurate projections of the true broadcast audience, he said. "While
the rating services are wholly independent of NAB and the individual broadcaster, we are deeply concerned with the quality of their work for the prime reason that what they do undergirds and greatly influences the quality of ours," he said.

The Questions • Asked about his February 1961 speech to the NAB board (Broadcasting, Feb. 25) in which he said he did not quarrel with the accuracy of ratings, Gov. Collins said he since has received many complaints from broadcasters and has recognized the need for basic research into the accuracy of ratings. The broadcaster, he said, should have an effective check on whether published surveys measure what they purport to measure.

Rep. Springer asked if legislation requiring the networks to divide allotted amounts of prime time to specified categories is desirable. "No sir," Gov. Collins replied. "Under our system there should be more flexibility and freedom afforded the broadcaster than that would allow." He said such legislation would destroy free broadcasting.

Rep. Donald Brotzman (R-Colo.) wanted to know if the NAB has received any complaints that individual surveys were rigged. Gov. Collins replied that "no doubt" some "fly-by-night" surveys have not been what they claimed to be but that this was only a relatively small part of the total picture. "As far as I know, such dishonest operators are now out of the business," he said.

In answer to another question, the NAB president said that he did not recall any broadcaster charging that he had been "coerced" into subscribing to a service but that many feel "compelled" to buy. He said that he had never heard of any service telling potential client that "if you don't subscribe your rating will be lower." Such tactics are "definitely not practiced by the major firms," he said. "There is no basis to accuse reputable services of being corrupt."

Ratings Crucial • CBS-TV President James T. Aubrey Jr. refused to say ratings are television's lifeblood, but agreed with his questioners that ratings are crucial factors in programming decisions and in determining affiliate rates. However, Mr. Aubrey said, the most significant factor in programming is the "broadcast judgment of network executives."

Asked by Rep. Harris if CBS-TV relied on ratings because no other method was known to the company, Mr. Aubrey said ratings were relied on because they are a "proven method." That is, said Rep. Harris, picking up the witness's sentence, "proven in so far as your advertisers rely on it, and the advertisers are your sole measure of support."

Earlier Mr. Aubrey had stated, "Since our sole financial support comes from payments by advertisers, we cannot afford to ignore the tools they use in determining their purchases of programming and time."

"Ratings are useful only as estimates," Mr. Aubrey said, and "we recognize their shortcomings" as they depart from an ideal—providing audience response and indicating "what people would like to see that is not available."

Should be Accurate • Rep. Harris asked James M. Seward, CBS Radio executive vice president, whether ratings are accepted "without any method to check on their accuracy." "We know their techniques," Mr. Seward replied, and CBS's research department indicates the rating results should be accurate if those methods are followed.

Mr. Seward told the subcommittee several times that ratings are just one of several important elements in network decisions, but they "are of assistance in the three crucial areas of radio network operations: affiliations, sales and programming."

Radio's problem with ratings, Mr. Seward said, is a lack of a comprehensive measurement of portable and auto radio listening. Important advances have been made, he said, but they are "far from adequate to meet today's radio needs."

ABC Heard • Testifying for ABC-TV on Tuesday (March 5) were Thomas W. Moore, vice president in charge, and Julius Barnathan, vice president and general manager.

Mr. Moore told the subcommittee that ratings are the most important determining factor in fixing rates the network charges national advertisers for buys on affiliates. Ratings are probably the major factor in commercial television programs, Mr. Moore said.

Asked if ABC-TV had ever asked Nielsen to put out its too 30 market reports in a pocket piece similar to that used in NTV, Mr. Barnathan said the network had, but the rating firm refused, saying such a service might lead to a "confusion" of local and national aids.

ABC-TV subscribes to the bi-monthly NTV and uses it primarily to determine audience composition "as a check against the other system," Mr. Moore said.

One of Many • While making a

*BROADCASTING, March 11, 1963* 63
strong defense of Nielsen, NBC-TV witnesses stuck with the contention that ratings are only one of many factors considered in programming decisions. Mort Werner, NBC vice president for programs, read a 22-page prepared statement and he was flanked by Senior Executive Vice President David Adams and Research Director Thomas Coffin.

Mr. Werner said that rating results are not usable in raw form but must be analyzed and evaluated by NBC staff specialists who "have learned how to take into account the strengths and weaknesses of the various types of estimates." In the general entertainment field, he said, NBC would not be serving the public by retaining a program consistently rejected by viewers.

If ratings were the only criteria, however, "we would not go for a variety of program forms but would concentrate on the narrow range of the most popular forms and program them back-to-back throughout an evening," Mr. Werner stressed.

In answer to a question, Mr. Coffin said Nielsen is considered the best measurement service for its purposes because Nielsen provides the most detail, uses meters which are more accurate than other methods, and maintains a continuing panel of the same homes for measurement purposes. He said that letters from the public have very little impact on the fate of individual programs.

 Asked by Rep. Springer what NBC's reaction would be if the subcommittee shows that Nielsen reports do not do what they claim, Mr. Werner replied: "I would personally be very concerned and our research department would be working overtime to decide what to do." When asked about the possibility of regulation of the rating services, he said Nielsen is a very responsible company and that "we are not concerned about its reliability." Regulation is unnecessary, he said, because Nielsen can work out its own problems if any exist.

Rep. Springer quizzed the NBC executives closely on what factors other than ratings go into program decisions and Rep. Brozman asked if the network is satisfied with the service provided by Nielsen. Mr. Coffin replied that Nielsen "in particular" is reasonably satisfactory on national surveys but that local ratings leave "a great deal to be desired."

Mr. Coffin said that NBC is not concerned that Nielsen has not enlarged its TV national sample of 1,100 homes since the 1940's because the size is not a major problem. He admitted that it would be possible to rig a Nielsen national survey by controlling just a few Nielsen homes but thought this is not likely to happen because the firm takes extraordinary precautions against disclosure of its sample homes.

Rep. Harris cited what he termed examples of "gross inequity" and "injustice" in specific surveys and said he wondered why NBC supported Nielsen so vigorously. It is "amazing to me," he said, that all three highly competitive networks rely so heavily on the same company for ratings.

Sales Aid Only • NBC Radio uses ratings almost exclusively as a sales aid, William K. McDaniel, executive vice president of the radio network told the subcommittee. Ratings are not used in connection with programming since it consists mainly (80%) of news, information and public affairs programs, he said.

Ratings are important in sales because advertisers must have some measure of the size and characteristics of the NBC Radio audience they can reach with their sales messages, he said. NBC uses the Nielsen Radio Index as its basic service, Mr. McDaniel said, providing the network with cumulative audience estimates of an advertiser's campaign and how many times the average tuning home hears his messages.

Since Nielsen uses the same sample for its TV and radio measurements, the firm's surveys also provide information as to how network radio can be used to supplement TV advertising, he said.

NBC Radio also subscribes to all local Pulse reports but this information is used by the network only to answer specific questions on particular markets,
ENTERTAINMENT...what is it?

It's the grip of real suspense...a belly laugh...a tear...a feeling of elation...a moment of despair. Countless elements go into the manufacture of every form of entertainment. And since audience preferences are as changeable as the wind, it's an endless task.

It must be realized, too, that tastes vary widely. At WFGA-TV, we accept the challenge of determining these preferences and coupling them with the exercise of good taste. As we view it, it's part of the broadcaster's responsibility to entertain as well as inform. Our viewers like our programs...our advertisers like the results!
Surrounded by critics, Nielsen expands radio ratings

Radio rating surveys—under attack from the networks, individual stations, advertising agencies and Congress—are going to be substantially expanded by the A. C. Nielsen Co., Chicago.

Nielsen plans for major increases in the size of the sample and measurement of out-of-home listening in the Nielsen Station Index (local radio) surveys were disclosed by the firm in a letter to station subscribers dated March 1.

Subscribers received the letters last week as the House Subcommittee on Investigations was beginning hearings on a major investigation of ratings services and one which promises to have far-reaching effects (see page 62). In its letter, signed by Nielsen Vice President John K. Churchill, the largest broadcast rating firm said that it has recognized for some time the increasing need for major changes in the NSI measurements.

Consequently, Nielsen is beginning, effective today (March 11), an interim service and hopes to start selling commercially the expanded ratings in 8-12 months. A rising chorus of protests has been heard against the alleged lack of radio measurement surveys (Broadcasting, Jan. 21, Jan. 14). ABC Radio canceled Nielsen’s radio reports late last summer on the grounds radio is being “short-changed” and purchased Sindlinger & Co. reports (Broadcasting, Sept. 17, 1962).

Mr. Churchill said the expanded research and reporting is necessary to “reflect trends in radio itself and to maintain Nielsen’s standards of accuracy and statistical significance.”

Primary Needs • The primary needs, he said, are (1) inclusion of more of the sources of radio listening such as personal portables, auto radios, fm and (2) larger samples to help delineate the real differences among the audiences of individual stations.

Nielsen research of its own research, Mr. Churchill said, definitely points to the continued use of permanent-type samples where family records of a week or more of listening are kept. With the increased complexity of respondent reporting on many different sets in the same household, he said that Nielsen is concerned for both the accuracy and completeness of data from all sets. This will require careful supervision to assure full reporting, Nielsen said in announcing the development of “miniaturized meters” for attachment to individual receivers.

Sample sizes 4 to 5 times the present size will be required, the Churchill letter said, in pointing out the new service will be “costly.”

For all NSI measurements beginning today or after, Nielsen plans to continue its present surveys on an interim basis “in any market with sufficient client support” with this difference from past surveys: all published data will be confined to cumulative audience (for period of survey) and the per broadcast data basic report (average number of persons in station audience per quarter hour) will be discontinued.

Subscribers may discontinue the interim plan without penalty at any time, Nielsen said. The interim service will be withdrawn when the new expanded service is ready.

Most Nielsen subscribers contacted last week said they had not had time to study the proposal and that they were too busy to comment. It was pointed out, however, that the audience ratings per quarter hours, which are being discontinued in the interim plan, provided the primary measurements used by time-buyers in purchasing stations.

NBC Radio President William K. McDaniel, who has been highly critical of Nielsen radio measurements, said that he did not receive a copy of the letter but that the proposal is the first definitive, positive move made in many years to measure radio’s invisible audience and that reform is vitally needed.

he said, “There are various other services providing some sort of radio rating data, but they are so inadequate for our purposes that we do not subscribe to them,” Mr. McDaniel told the congressmen.

‘Active’ FTC • FTC Chairman Paul Rand Dixon praised his Trade Commission’s policing of rating services in a prepared statement but under the questions of the congressmen was hard put to defend the agency. Mr. Dixon spoke of what had been accomplished through consent decrees early this year with Nielsen, Pulse and ARB but Chairman Harris thought the timing of the decrees was “unusual,” “most significant” and “rather interesting.”

The Arkansas Democrat pointed out that the FTC issued the consent decrees only after it was public knowledge that the subcommittee planned comprehensive hearings on ratings—and this after Congress had been trying to get the FTC to do something since 1958.

Rep. Springer noted published criticisms of the consent decrees (Broadcasting, Feb. 25) and asked how they differed from recommendations made in the Madow report. Chairman Dixon agreed there was a “great deal of similarity” between the decrees and the Madow recommendations. However, he pointed out the FTC interviewed 450 persons in its investigation of 2½ years, made specific charges against the three services and used specific language not in the Madow report.

“The Madow report only makes recommendations while the consent decrees prohibit fraud,” Mr. Dixon said. Prior to signing the decrees (Broadcasting, Jan. 7), the three services could claim that such-and-such was true when it wasn’t, he said.

Chairman Dixon said many times that the decrees require Nielsen, Pulse and RAB to state that their ratings are no better than “guesses or estimates.” Asked specifically about a Nielsen press release on the decrees and noting that the compliance period is now underway, he said: “If he (Nielsen) doesn’t change his ways, it will cost him $5,000 for each day he violates’ the terms of the order. The FTC will watch very closely what Nielsen is presently doing, he said.

Before the consent decrees were signed, the ratings were accepted as gospel, he said. “I don’t think they will be accepted as gospel anymore.”

Rep. Moss said that he did not evidence any “backsliders” in the testimony of the networks, “I think this religion (of depending on the ratings) is well implanted,” he said.

Weaver’s Views • Sylvester (Pat) Weaver, board chairman of McCann-Erickson International and former NBC-TV president, said that the ratings are inaccurate but necessary to advertising and broadcasting. In the last 10 years, there has been a growing acceptance of ratings “particularly Nielsen with its small sample” despite the inaccuracies, he said.

The industry has talked itself into believing that ratings are more reliable than is actually the case, Mr. Weaver said. And, absolute reliance on ratings generates a never-never land, “just one step removed from the entrails of a chicken,” he said.

Individuals rarely do what they say they do and seldom watch what they say they watch, Mr. Weaver said he learned early in the game. Therefore, he said he has been guided in program decisions by trying to ignore what people

ple say and finding out what they actually do.

The pressure of ratings causes TV to disregard the occasional viewer and an important part of the audience (60%). He said, is composed of a group with a "blank-eyed, moronic stare of seven hours of continuous viewing."

Congress has come up with a solution 10 years late in the all-channel receiver legislation, Mr. Weaver said. Increased competition and additional TV networks will solve all the problems, including ratings, he predicted.

In answer to a question, he said that "spot buying is rating buying, nothing else."

Blames Ratings * Peter Tewksbury, producer of It's a Man's World, on NBC-TV, one of the first shows to die in the 1962-63 season, blamed the show's death on low ratings and lack of a publicity budget sufficient to build them up.

"The entire television industry is completely controlled by the Nielsen ratings," Mr. Tewksbury said. This season's top-rated show, The Beverly Hillbillies (CBS-TV), benefited from a major pre-season publicity buildup, Mr. Tewksbury said. "That show was a hit before anybody ever saw it."

Stations can "hypo" their ratings, Mr. Tewksbury said, by increasing their publicity during rating periods. This is not a true reflection of the audience and gives a false impression to advertisers, he said.

His own program could have stayed on the air if it had earned about five additional rating points, the producer said.

Numbers produced by ratings are "widely promoted and sorely missed," said Victor A. Sholis, vice president and director of WHAS Inc., licensee of WHAS-AM-TV Louisville.

Mr. Sholis recalled he told a network affiliates convention in 1952 that "selling by ratings ... is just plain stupid." "With ratings being run up the flagpole and virtually everyone saluting, it would certainly be appropriate for this committee to determine the validity of what is flying up there," he said.

Rating services have produced "more small type disclaimers" since the signing of consent orders this year with the FTC (Broadcasting, Jan. 7). Mr. Sholis said. Reading one disclaimer from a Pulse report, he said, "It simply tells the buyer he is getting numbers for which no one will claim reliability or authenticity."

Rep. Moss told the witness that despite disclaimers, there was nothing in the consent decrees which would indicate a slide rule may not be used with rating figures.

A more prominent display of the disclaimers is called for, Mr. Sholis said, "perhaps a skull and crossbones on the top."

Wodlinger Heard * The manager of a new interim TV operation in Michigan told the subcommittee neither ARB nor Nielsen would change its definition of the Grand Rapids-Kalamazoo metropolitan market to include neighboring Muskegon, which is served by his new station and two competitors.

The three stations serve all three cities, said Mark L. Wodlinger, vice president and general manager of WZZM-TV Grand Rapids, and the result is that WZZM-TV is unable to compete with two established area stations, WOOD-TV Grand Rapids and WKZO-TV Kalamazoo, which he said forcefully opposes a redefinition.

Nielsen and ARB said WZZM-TV's competitors placed considerable pressure on them and urged no redefinition he said.

If the facts the Michigan witness presented are true, said Rep. John E. Moss (D-Calif.), then it seems almost like a restraint of trade, or unfair competition.

Rep. Harris told Mr. Wodlinger the broadcaster was complaining that the rating firms hold out their services to anyone in broadcasting or a related business, and purport themselves as being fair. You, Rep. Harris told the witness, contend they are not fair.

Mr. Wodlinger said he planned to bring the affair to the attention of the Federal Trade Commission this week.

Rep. Harris said he was amazed that broadcasters, "with so many hundreds of millions of dollars involved, just sit back and allow the rating services" to be so influential.

Perhaps, Mr. Wodlinger said, since all broadcasters are regulated, the two companies which control the radio and television business "ought to be under similar control."

Looking into Nielsen and ARB procedures, Mr. Wodlinger said he was allowed to see Nielsen diaries after some difficulty and found they are kept by two categories of people. "A great number" are kept by elderly, 65-75-80-year-old viewers, and by large families, he said. "Handwriting and comments indicated that in families with a large number of children it appeared that the children were the ones who kept these diaries," he said.

Mr. Wodlinger said he did not find similar characteristics in diary-keeping by ARB respondents. Unlike Nielsen, ARB gave him immediate and complete access to its diaries, he reported.

Disenchantment * Robert R. Pauley, president of ABC Radio, described ABC's disenchantment with Nielsen's radio surveys.

The network abandoned Nielsen for Sindringer Co. after comparisons of Nielsen local station and national surveys showed the sum of the parts was greater than the whole, Mr. Pauley said. Pocket pieces provided by Nielsen said the local surveys (NSI) were "completely compatible" with national counts (NR1), Mr. Pauley said.

Nielsen cancelled ABC from its "in-
Maintenance for Collins FM transmitters

Collins' performance record of less down time than any other make of transmitter is a fact we can demonstrate. So, what maintenance amounts to is mostly regular dusting... with a good dust cloth. Keeps your Collins FM transmitter clean. And gleaming, as befits modern station decor. Of course, you don't have to dust (although we recommend it). In which case, your Collins FM transmitter will just stand there, dustily transmitting a clean, strong signal. Makes for great reception... happy listeners. And you know what that means to advertisers? Get complete information on Collins' complete line of FM transmitters. They're available in models from 250 to 20,000 watts (5 kw shown above). home" service after the network refused to subscribe to its new "transistor-plus" service, Mr. Pauley said.

Since ABC is no longer listed in Nielsen reports on network radio, Rex Sparger, staff investigator, wanted to know if the move cost ABC any business. American Express purchased CBS Radio on the basis of Nielsen, Mr. Pauley said. ABC was told it was "out of the running" for the account without Nielsen ratings even though the network submitted availabilities.

After an earlier dissatisfaction with Nielsen in 1958 ABC quit the service for a while. Wade Adv., of Chicago, told the network not to apply for a Miles Labs. campaign without Nielsen figures, Mr. Pauley said. Procter & Gamble also told ABC it needed Nielsen figures, he said.

Other questioning, apparently preparation for future witnesses from rating services, developed testimony from Mr. Pauley that in two situations where ABC-owned radio stations can be heard in nearby markets served by an affiliate, the affiliate does not carry several network programs (KABC Los Angeles and KGB San Diego, both in California; and WLS Chicago and WISN-AM-FM Milwaukee).

ABC's major quarrel with Nielsen developed from local and national rating results, Mr. Pauley said.

Utilizing a slide projector, he illustrated half a dozen examples on this order: NSI reported in 1961 that an ABC news program with Alex Drier reached 371,000 homes on 218 ABC stations. However, Nielsen's local reports of 17 ABC stations showed the same program reached 368,206 homes. The 17 stations were included in the original 218.

It was expected Nielsen would present its side as the hearing proceeds.

R. Peters Straus, president, WMCA New York, said in a prepared statement that ratings must be viewed in perspective. "We also urge upon our agen-

Sec. 315: suspension likely in ’64

HOUSE GROUP SHOWS LITTLE INTEREST IN OUTRIGHT REPEAL OF LAW

Members of the House Communications Subcommittee indicated last week they will probably establish equal time ground rules for next year’s presidential and vice presidential races similar to the temporary suspension of 1960.

But the subcommittee showed little interest in approving proposals by heads of two networks and the NAB who urged abolition of Sec. 315 of the Communications Act, the political broadcasting provision. An “exhaustive study” of Sec. 315, is, however, being considered by subcommittee, said Rep. Walter Rogers (D-Tex.), chairman.

FCC Chairman Newton N. Minow, who faced stiff questioning about the agency’s interpretations and enforcement of the Act as it applies to political broadcasts, told the subcommittee that setting an equal time was up to Congress.

Commerce Committee Chairman Oren Harris (D-Ark.), author of the suspension plan, told Mr. Minow the subcommittee ought to look into criteria which the commission has established for consideration of license renewals. The renewal situation, Rep. Harris said, "is a very, very serious problem" (see page 80).

Commissioner Frederick W. Ford proposed a conference of broadcasters, congressmen and the FCC which would draw upon the agency’s experience in administering the Act and work out practical guidelines for political broadcasting which licensees could follow in the future.

Chairman Rogers said the hearings, which recessed Wednesday (March 6), might resume to hear representatives of the Democratic and Republican parties and Lar Daly, of Chicago, a perennial candidate (see box).

Abolish Sec. 315 • CBS President Frank Stanton made a strong appeal for repeal of the whole political broadcasting law. He pointed out that the 1960 suspension of the law in its application to presidential and vice presidential races had been voted as a test of the broadcasters’ ability to present political intelligence without the restrictions of Sec. 315, and he said the test had proved their ability. A similar suspension in 1964 would prove nothing more than had already been proved. Dr. Stanton appealed for complete elimination of the section.

Dr. Stanton’s proposal drew sharp questioning. One point that troubled the congressmen was that repeal of Sec. 315 would eliminate the present prohibition against the censoring of candidates’ speeches by broadcasters.

Wasn’t Dr. Stanton “asking me to submit as a candidate,” inquired Rep. John E. Moss (D-Calif.), “to what you have for so long fought—prior restraint?”

Dr. Stanton said the broadcaster would need editorial control over the utterances of candidates, both because of his responsibility as a journalist and because the repeal of Sec. 315 would remove the immunity now granted broadcasters against liability for libel damages arising from the utterances of candidates made under Sec. 315. Dr. Stanton said he thought the congressmen could count on broadcasters to be fair.

“We know all men are not fair,” Rep. Moss said. What public interest would be served by placing the broadcaster in a position of judging what a candidate would say, he asked.

“I make my case, sir, in the name of the people,” the CBS president said.

“At any more responsible to the people than I am?” Rep. Moss asked.

Dr. Stanton paused, then said, “I think I am.”

Rep. J. Arthur Younger (R-Calif.) told Dr. Stanton he was “disturbed at your testimony.” Rep. Younger and other subcommittee members criticized the term “debates” used to describe joint appearances of Senator Kennedy and Vice President Nixon in 1960, the first year a temporary suspension of Sec. 315 was attempted.

Support for Suspension • Robert W. Sarnoff, NBC board chairman, said NBC supported the proposal for another suspension of Sec. 315 for presidential and vice presidential candidates in 1964, but he said the long-range hope of the network was for repeal of the section. The 1960 test proved, he said, that broadcasters acted responsibly in the presentation of campaigns for the nation’s two highest elective positions.

“There is no basis for believing that individual stations would not be similarly fair” as they were to national candi-

CBS President Frank Stanton (left) and NBC Chairman Robert W. Sarnoff, meet prior to testifying before the House subcommittee on changes in equal time requirements for political candidates. Both men urged complete repeal of Sec. 315.

Rep. Walter E. Rogers (D-Tex.) (right), new chairman of the House Communications Subcommittee, is shown with Rep. John E. Moss (D-Calif.), ranking Democrat, in a light moment during the two-day hearing on proposed changes in Sec. 315.
NBC finances study for best format for '64 'Great Debates'

NBC has made a grant to the American Political Science Assn., for a study to determine the best format for television debates between the presidential candidates in 1964. Robert W. Sarnoff, NBC board chairman, told the 26th meeting of the Chicago World Trade Conference on March 5.

Mr. Sarnoff made no mention of the amount of the grant, and an NBC spokesman later said the company did not want to specify it.

The study will be conducted by a seven-man committee of specialists in political science and communications, appointed by the association and headed by its president, Dr. Carl J. Friedrich, Eaton Professor of the Science of Politics at Harvard. Mr. Sarnoff told the conference that the political group, starting at this early date, will be able to present its findings well in advance of the 1964 presidential campaign. He added: "I am confident that its proposals will be a major contribution to our democratic process."

He voiced the hope that before the 1964 election campaign begins, Congress would act on the equal time provision of the Communications Act, which, he said, is a "straight-jacket" on political coverage.

Mr. Sarnoff noted his March 4 appearance before a Congressional Committee hearing during which he urged elimination of the equal time clause (see story, p. 72). He took this position, he said, in support of a congressional resolution that would suspend the equal time provision with respect to presidential and vice presidential candidates in 1964.

In another portion of his speech, Mr. Sarnoff called for free access by television to coverage of events, so that the medium can serve as "the eyes and ears of all the people." He contended that the right to witness public business "should not be confined only to those whom the hearing room will hold, when tv can bring the public business to everyone."

He also discussed television's role in the economy, pointing out that advertising is a primary stimulant for increasing consumption of goods and services. He claimed that tv, among all forms of advertising, has "unique capabilities that power the American economy."

dates) in covering local or state candidates."

Broadcasters would "gain no profit advantage" from removal of Sec. 315; rather, enlarged news coverage made possible by removal may send their costs up, Mr. Sarnoff said.

NAB President LeRoy Collins asked the subcommittee to suspend Sec. 315 entirely for 1964 to provide a proper test of broadcaster responsibility.

In an extended colloquy with Rep. Moss, a sharp critic of Sec. 315 repeal, Gov. Collins said the Californian's views must be colored by an extreme experience with an unfair or "shyster" broadcaster. There are fringe operators in every profession, the NAB spokesman said; but all broadcasters should not be judged by the irresponsibility of a few.

Rep. Harris said he didn't think broadcasters had "explored all avenues" open to them for covering political campaigns, even without suspension of Sec. 315. A group of 1959 amendments to the Communications Act freed bona fide newscasts, documentaries and interviews from equal time requirements, he added.

A statement from ABC President Leonard H. Goldenson, who did not testify in person, said the network supported the Harris resolution and opposed abolition of Sec. 315.

The U. S. Chamber of Commerce followed the NBC and CBS position favoring the Harris resolution in 1964, "pending repeal" of Sec. 315.

The Opposition • Sidney Zagri, legislative counsel of the Teamsters Union, said the union opposed repeal of Sec. 315, "even one slice at a time." Fearing a suppression of minority views, Mr. Zagri said prohibitive costs of television time, coupled with an expected lack of free time from the networks for minority candidates, would tend to black out presentation of differing political views and block the educative function of minority parties.

As an alternative to a suspension or elimination of Sec. 315 he suggested all candidates might be brought together for discussion in a format similar to a David Suskind Open End program.

"I seldom agree with your organization, but I must say I go down the line with you on this," Rep. Younger told Mr. Zagri.

Eric Hass, presidential candidate of

Amendment introduced

A bill to amend the California election code by the addition of a section defining "legally qualified candidates" for the purpose of administering the provisions of Sec. 315 of the Communications Act has been introduced into the state legislature by State Sen. Hugh Burns and State Assemblyman Jess Unruh. The amendment states, in part: "No person shall be considered a legally qualified candidate for any office or party nominee for a particular office unless he has filed a declaration of candidacy or declaration of acceptance of nomination with the proper official for the particular election or primary or is entitled to have his name placed on a general election ballot by reason of having been nominated at a primary election."

the Socialist Labor Party in 1952, 1956 and 1960, said advocates of Sec. 315 abolition argue that if its shackles were removed, broadcasters would operate "impartially and fairly during political campaigns," as they did in 1960.

"Maturity, 'sincerity,' 'sense of responsibility,' good intentions or whatever," Mr. Hass said, "do not justify or warrant the repeal of a statutory admonition to those entrusted with administering affairs in the public interest not to violate that trust or interfere with, or attempt to abrogate, the hard-won rights and freedoms of the people."

Similar logic would have to be followed in the study of the Bill of Rights because "those who hold office and administer the affairs of state have proved that they are mature and have demonstrated a 'sense of responsibility,'" Mr. Hass argued.

ACLU Alternative • Lawrence Speiser, Washington director of the American Civil Liberties Union, said that the group suggested an alteration of Sec. 315 in place of repeal. Substituting "equitable" for "equal" would give the law flexibility, Mr. Speiser said.

The ACLU also advocated a statutory requirement that some minimum free time be provided by the networks to all legally qualified candidates for President and Vice President.

Harmonic interference

FCC received petition from KBTV (TV) Denver, to deny application of KIMM Broadcasting Co. for a new fm station on 95.5 mc with 35 kw in that city. KBTV told the commission that the second harmonic of the proposed
Ownership investigation to hear Minow first

The House Antitrust and Monopoly Subcommittee will hear FCC Chairman Newton N. Minow Wednesday (March 13) as the opening witness in a study of the concentration of ownership in new media.

Chairman Minow has often commented on the decrease in competition among newspapers, and has cited a reduction of divergent voices in arguing that broadcasters must shoulder greater responsibility in providing forums for discussion of public issues and in expressing their views through editorializing.

The hearings are planned to run three days a week for four weeks, according to a schedule of witnesses released Thursday (March 7).

Following the FCC chairman will be a succession of newspaper publishers, some with broadcast holdings, advertising agency executives, union leaders, professors of journalism and critics of mass media. Among other government witnesses will be Lee Loevinger, assistant attorney general of the Justice Department antitrust division, and Paul Rand Dixon, chairman of the Federal Trade Commission.

Rep. Emanuel Celler (D-N.Y.), chairman of the parent Judiciary Committee, will preside at the subcommittee hearings.

Broadcasting. Rep. Celler has said, is expected to play only an incidental role in the proceedings (Broadcasting, Feb. 11, Jan. 28).

PAPE TV ACCUSED OF SEEKING PAYOFFS

Hearing ordered on revocation of stations' licenses

Pape Television Co., licensee of WALA-AM-TV Mobile, Ala., was accused last week of having demanded "large sums of money" to refrain from editorial attacks on a large architectural and engineering firm that had been engaged by the city of Mobile.

Pape TV was also alleged to have told a candidate for sheriff of Mobile County last May that unless he used WALA-TV exclusively for his political broadcasts, Pape didn't work for his defeat through "certain political forces indebted" to it. Part of the payment allegedly sought by the company, if the candidate used the station and was elected, was his promise to refrain from enforcing the law inside the city of Mobile.

These are among the allegations cited by the FCC in ordering Pape TV to show cause why the licenses of WALA-AM-TV should not be revoked. A hearing will be held in Mobile at a date to be announced.

The company, which is owned by one of the pioneers of broadcasting, W. O. Pape, has denied all allegations against it.

The commission said a hearing is needed to determine whether the company attempted to use WALA-TV improperly "for personal monetary gain" and whether it had violated the FCC's policy on editorializing and the political broadcasting section of the Communications Act.

Involuntary Transfer • The show-cause order added that the question of involuntary relinquishment of control by the licensee without the commission's consent would also be considered. Mr. Pape suffered a stroke in 1955, and since then the show-cause order said, hasn't been able to participate in the operations of the stations. Mr. Pape established WALA in 1930 and the TV station in 1953.

Pape Television last month applied for voluntary transfer of control of the two stations from Mr. Pape to a voting trust consisting of his wife, Delphine G. and his brother, Frank. The commission said this application will be held up pending a determination as to the qualifications of the licensee, including W. O. Pape's ability to enter voluntarily into such an agreement.

Pape TV's counsel, Harry G. Sells, flatly denied the extortion charge, calling it "defamatory." He also asserted that the station has complied with the commission's policy on editorializing and said there has been no transfer of control of the licensee.

In a letter to the commission denying the allegations point by point, Pape TV said most of the information given the commission in its investigation "is not competent and will not withstand cross-examination."

The architectural and engineering firm from which Pape Television allegedly demanded money is Palmer & Baker Engineering Inc., described by a commission official as an "internationally known" concern, with headquarters in Mobile.

According to the show-cause order, WALA-TV last April editorialized against the firm in connection with its work of drawing plans for, and supervising the construction of, a municipal auditorium in Mobile.

Money 'Demanded.' • The order said that "an officer and director of the licensee" (who was not further identified) subsequently demanded "large sums of money" from the firm, in return for which, he allegedly said, Pape Television would support the firm against public criticism, discontinue its own editorial attacks, and "deliver to the architectural firm the key vote" of one of the city's three commissioners in any dispute involving the construction contract "or the awarding of any future city contracts."

The order also said that after the firm's "alleged refusal" to pay the sums, WALA-TV "again editorialized in manner hostile" to the firm during the weekend of June 2 and 3.

The order said that during its series of broadcasts concerning the controversy over the auditorium contract, the licensee apparently didn't fulfill its obligations to present all sides of the issue or play "a conscious and positive role in bringing about a balanced presentation of opposing viewpoints," in accordance with the commission's editorializing policy.

The commission did not identify the candidate for sheriff allegedly approached by representatives of Pape TV. But it said that "an officer and director [and] an employee" of the broadcasting company told the candidate that unless he stopped using a rival tv station and restricted his political broadcasts to WALA-TV, "certain political forces indebted to the licensee would be influenced ... to help defeat him."

Lower Rates Offered. • The order also said that the candidate was allegedly told that, if he used WALA-TV exclusively, "charges for his political time would be considerably less than the station's published rates or the payment would be taken care of through
"Attila" was ranked No. 1 in its time period (7:30-9:00 P.M.) on WOR-TV's "The Big Preview." On Friday, February 23rd, "Attila" achieved a 24.7 average quarter hour rating according to the Nielsen Station Index. It had 31.5% share of audience in the New York Metropolitan Area.

This is the second of the thirty-three motion pictures purchased by WOR-TV, Channel 9 from Embassy Pictures. The first, "Hercules," smashed all opposition in racking up the all-time rating high on WOR-TV.

"Attila" was ranked No. 1 in its time period (7:30-9:00 P.M.) on WOR-TV's "The Big Preview." On Friday, February 23rd, "Attila" achieved a 24.7 average quarter hour rating according to the Nielsen Station Index. It had 31.5% share of audience in the New York Metropolitan Area.

This is the second of the thirty-three motion pictures purchased by WOR-TV, Channel 9 from Embassy Pictures. The first, "Hercules," smashed all opposition in racking up the all-time rating high on WOR-TV.
manipulation of licensee's financial records."

The order reported the allegation that, "In repayment for WALA-TV's assistance to him in his campaign for election as sheriff he was, if elected, to refrain from enforcing the law in the City of Mobile and restrict his enforcement activities to those parts of Mobile County outside the city."

The order doesn't indicate what the candidate's response to the alleged proposal was, or whether he was elected.

**Vhf drop-ins appear to be doomed**

**FCC INSTRUCTS STAFF TO PREPARE ORDER DENYING THEM**

The FCC's controversial vhf drop-in proposal is all but dead.

The commission, by a 4-3 vote, instructed the staff last week to prepare an order denying the short-spaced vhf drop-ins that have been proposed as a means of providing a third vhf network outlet in seven two-station markets.

Chairman Newton N. Minow and Commissioners Robert E. Lee, Robert T. Bartley and E. William Henry constituted the majority which indicated it felt uhf television should be given the opportunity of providing the needed service.

The markets that would be denied the third vhf channel are Johnstown, Pa. (ch. 8), Baton Rouge, La. (ch. 11); Dayton, Ohio (ch. 11); Jacksonville, Fla. (ch. 10); Birmingham, Ala. (ch. 3); Knoxville, Tenn. (ch. 8) and Charleston, N. C. (ch. 6).

In a related action, however, the commission voted 5-0 to instruct the staff to prepare an order looking to the reassignment of ch. 5 at Enid, Okla., to Oklahoma City, at short-spacing. The order would also modify the license of KOKO-TV, now operating on ch. 5, to specify Oklahoma City. Commissioner Lee abstained from voting on this proposal.

**Commission's Own Proposal** - An announcement of the commission action gave no reason for the majority's preliminary decision to abandon the drop-in proposal the commission itself advanced 19 months ago as a means of improving service in the eight markets (Broadcasting, July 31, 1961).

Those favoring it have held that the drop-ins are needed to meet an urgent demand for service. But the main argument against the proposal has been that it would hinder the ability of uhf television to develop. This argument was given added weight last year when Congress passed the all-channel-receiver act, which has the purpose of fostering the development of uhf tv.

If the order denying the drop-ins is approved, the major loser will be ABC.

Other allegations involve the campaign for Mobile City Commissioner last September. The order said WALA-TV's charges for political broadcasts appear to have been higher—by as much as 50% in some cases—than for other purposes, in violation of the political broadcasting section of the Communications Act.

The licensees are also alleged to have given preference to one candidate and subjected his opponent "to prejudice or disadvantage through differences in facilities and services provided (i.e., one candidate speaking into a dead microphone)."

The show-cause order said Mr. Pape, an officer and director of the firm as well as 100% owner of the voting stock, has been unable to take part in the operation of the stations "for at least one year" because of his illness. This indicates, the order added, that an involuntary relinquishment of control of the licensee has occurred without the commission's consent.

**Recommend renewal for Schafitz stations**

FCC Hearing Examiner Chester F. Naumowicz Jr. recommended last week that the commission renew the licenses of broadcaster Sanford Schafitz for WWIZ Lorain, Ohio, and WFAZ Farrell, Pa. At the same time Examiner Naumowicz decided against granting a hearing to cover the construction permit of WXTV (TV) Youngstown, Ohio, which Mr. Schafitz jointly owns with Guy W. Gully.

The commission's Broadcast Bureau had previously proposed that the licenses for WWIZ and WFAZ not be renewed. The bureau, charging Mr. Schafitz with unauthorized transfer of control of WWIZ to the Lorain Journal (Broadcasting, Jan. 28), said that neither Mr. Schafitz, Harry Horvitz, president of the Journal, nor the Journal himself, has the character qualification to be a broadcast licensee.

The examiner concluded, however, that WWIZ Inc., if viewed in a vacuum, might appear to have a corporate structure aimed at giving the Journal control, but if considered "in actual practice [the corporate structure] indicates that effective authority remained with Mr. Schafitz."

Examiner Naumowicz further concluded that the negotiations leading up the agreement between Mr. Schafitz and the Journal were not planned to transfer control of the station prior to FCC approval, and that the Journal has not
Puzzle:
Where Does the Milk Train Stop Now?

When Dorothy Jones, WMAL-TV typist, arrived at 11:30 one Monday morning, Ted McDowell, (Manager of WMAL-TV News and Public Affairs) her usually amiable boss, asked for an explanation.

“Well,” said Dorothy, “I went home for the weekend* and I missed the express train coming back, so I had to take the old milk train. An hour after we left the station at home I heard this noise and the train slowed down. We got to Washington two hours late. The conductor told me a thingumajig had blown off and we were only going 3/5 of the normal speed. He also said that if the accident had happened 50 miles farther down the line we would have arrived 40 minutes sooner.”

“That would still have made you an hour and 20 minutes late,” snapped McDowell, whose own stack was about to blow. “Next time, walk.” “Oh, I couldn’t do that,” gasped Dorothy, “I’m a Republican.”

How far is it from Dorothy’s home station to Washington? Figure it out and earn an appropriate award.

*For a more profitable way to spend your weekends (and your clients’ money) we suggest WMAL-TV’s 3 weekend bowling shows which deliver a combined audience of 392,000 avid souls who buy when they don’t bowl. Check Harrington, Righter & Parsons, Inc. for availabilities.

Justice Dept. tells Supreme Court that FCC has super powers

As far as the Dept. of Justice is concerned, the federal government has not only preempted broadcasting against state or municipal controls, but the FCC has super powers to regulate programming.

The views of the government, including some of the strongest language yet on the FCC's power over programming, were contained in a “friend of the court” brief filed by the Solicitor General of the United States with the U. S. Supreme Court in a case involving a New Mexico law and two radio stations in that state.

Argument is scheduled to be heard the week of March 25.

At the behest of the New Mexico Board of Examiners in Optometry, a state court enjoined KHOB and KWEW, both in Hobbs, N. M., and the local newspaper, from carrying advertisements of a Gaines County (Texas) optometrist. New Mexico law prohibits mention of prices and discounts by optometrists. The Texas optometrist is just over the state line. The New Mexico Supreme Court affirmed the lower court's injunction. KHOB and the weekly Hobbs Independent asked the U. S. Supreme Court to review these decisions.

Aside from the question of whether a state can regulate broadcasting by requiring it to follow a state law, a subsidiary question is whether a state can force conformity to the regulations through advertising which is conveyed outside the state by means of radio or newspaper circulation.

The Justice Dept. brief focuses only on the question of whether a radio station can be made to follow a purely state law.

Not only has the Communications Act precluded direct regulation of broadcasting by the states, the Justice brief says, but the FCC has been given “extensive authority to regulate programs and advertising material in the public interest.”

Practice and Law - In its list of particulars to bolster this contention, the Solicitor General lists various actions of the FCC and court decisions, including:

- Comparison of past and present programming at renewal time.
- Requirement that applicants specify program policies in applications.
- Requirement that stations keep program records.
- Reference to comment in the Supreme Court's 1942 network decision where former Justice Frankfurter said that the FCC may take into account the “composition of the traffic.”

Commission actions in denying applications because prospective broadcasters were found to have accepted “bait and switch” advertising and FCC's findings that this indicates failure to abide by the responsibilities of the license to operate in the public interest.

- Notices by the FCC to licensees warning against accepting deceptive advertising, birth control products, or engaging in double billing procedures.

- Ruling by the FCC and the courts on the broadcasting of medical advice and the advertising of quack medicines.

- Warning by the commission on the advertising of alcoholic beverages if contrary to local law.

And, above all the government says, there is the FCC's program policy statement issued in 1960 which justifies the commission's interest in programming.

The government brief concludes: “In summary, the Federal Communications Act gives the commission broad powers over radio broadcasting generally. More particularly, the Act gives the commission authority to regulate programming, including advertising to the extent compatible with this country's tradition of free expression in order to determine whether it is consistent with the public interest. . .”

The Justice brief was signed by Archibald Cox, solicitor general; Lee Loevinger, assistant attorney general in charge of antitrust division; Bruce J. Tarris, assistant general counsel; and Lionel Kestenbaum and Morton M. Maneker, attorneys.

On the brief for the FCC were Max D. Paglin, general counsel; Daniel R. Ohybama, associate general counsel, and Ruth V. Reel, attorney.

The Supreme Court granted review last November.

Businessmen protest sale of KGLC to newspaper

A group of more than 15 local businessmen of Miami, Okla., asked the FCC last week to deny the application of Miami Broadcasting Co., for an assignment of license of KGLC, that city, to Miami Newspapers Inc. (Miami News Record).

The commission also was asked to waive its rule requiring that opposition to an application before the commission be filed within 30 days. The petitioners said that they were not familiar with commission procedures, which delayed them.

The Miami businessmen said that if sale of the station is granted, all media would be in one ownership.

The petitioners said that within hours after the sale of KGLC had been arranged, C. C. Woodson, publisher of the News Record, allegedly called the KGLC station manager and told him to raise the advertising rates by 50%. The station manager informed Mr. Woodson that he would have to wait for FCC approval, the petition said.

FCC grants ABS request

The FCC last week granted a petition of the Assn. on Broadcasting Standards Inc. and extended the dates for filing comments and replies on the commission's proposal to allow daytime stations to go on the air at sunrise or 6 a.m., whichever is earliest (Broadcasting, Feb. 25).

The FCC extended the time to file comments from March 15 to May 1. Deadline for replies was changed from April 1 to May 16.
The company she keeps

Forty of the fifty largest U.S. corporations have a Charlotte address. Not because of her beauty. But because Charlotte is one of the largest commercial and distribution centers in the Southeast.

Charlotte ranks 5th in the wholesale distribution of chemicals...8th in per family retail sales. There are more people within a 75-mile radius of Charlotte than in a corresponding radius around Atlanta, Indianapolis, Kansas City or Minneapolis.

The largest businesses in America are in Charlotte to reach these people. You can reach them through WBT Radio Charlotte.

For over 40 years, WBT has had the largest adult audience for the 37-county basic area; the audience that receives and spends most of the Charlotte area's $2,612,784,000 worth of spending money.*

Join the company that Charlotte keeps—through WBT, the station of responsible programming, outstanding service, finer entertainment.

Access to House hearings is doubtful

RULES COMMITTEE NOT ENTHUSIASTIC ABOUT RADIO-TV COVERAGE

Broadcaster efforts to open the doors of House committee hearings to cameras and microphones were given the full support of a powerful congressman during a Rules Committee hearing held last week.

Nonetheless, opposition by several senior members of the committee cooled chances that the unit, which controls the flow of legislation to the House floor, would give the House a chance to vote on an access resolution offered by Rep. Oren Harris (D-Ark.) (BROADCASTING, March 4).

Rep. Howard W. Smith (D-Va.), chairman of the Rules Committee, said he noted a "lack of enthusiasm" among committee members for the broadcast proposal. The chairman did not say when the committee would vote whether the resolution should go before the House, but he indicated it may not be in the near future.

A congressman who favors lifting the access ban said after the hearing it seemed to him the resolution was "in trouble." He told a broadcast executive who sat through the session that the broadcaster ought to "get your friends to work" on the Rules Committee members—and fast.

Testifying to the rules unit on his own proposal Rep. Harris said Tuesday (March 5), "I believe that something ought to be done. I believe the time is coming when it ought to be done. I believe when it is done it should be done under the right kind of rules and procedures."

Neither an advocate nor opponent of broadcast coverage of committees in the past, Rep. Harris said he had explored the subject just recently and decided to offer an access proposal after accepting a "challenge" to discuss it with Rep. George Meader (R-Mich.), a long-time supporter of broadcast access, who per- sided the Arkansas Democrat to join his side.

Harris Safeguards • Rep. Harris pointed out that provisions in his resolu- tion are intended to safeguard witnesses, who could not be compelled to testify before either cameras or microphones, and to prevent commercializa- tion of hearing broadcasts. Such broad- casts, Rep. Harris said, would be fully public service (without either commer- cial or any other form of sponsorship) except if used within bona fide news- casts or documentaries as spelled out in 1959 amendments to the Communica- tions Act.

Doubts about the wisdom of permitting live or recorded broadcasts were expressed by members who feared that portions of hearings might be used out of context to show one side favorably (or another in a poor light), or to dis- tort the intent of speakers.

Rep. Clarence Brown (R-Ohio), most vocal objector to the resolution, asked if broadcasters would be required to show hearings in their entirety, or, he asked, would they be able to "pick and choose?"

Broadcast newsmen would be allowed to report hearings and summarize pro- ceedings just as they do other news, Rep. Harris replied.

"So you don't get a very good idea of what goes on at committee meetings," retorted Rep. Brown.

Questioned several times about the views of Speaker John W. McCormack (D-Mass.), on access, Rep. Harris said, "I think it's sufficient to say I discussed this with the speaker several times before introducing it."

Speaker Would Agree • The Speaker indicated Monday (Mar. 4) that he would not go on the record—either the speaker or leadership position—on the resolution, but he said he would be highly favorable if the House were to pass such a measure.

Former Speaker Sam Rayburn, Speaker McCormack's predecessor, consist- ently ruled against broadcasts of com- mittee meetings, and Rep. McCormack has followed his precedent to date (BROADCASTING, Jan. 22, 1962).

Rep. Richard Bolling (D-Mo.), who would favor a change from the present ban, asked Reps. Harris and Meader for their position on including broad- casts of House floor proceedings. "You give people a peek at creatures of the House [the committees], but not the parent body," he said.

Both pro-access congressmen said

Harris unhappy with FCC renewal ‘hammer’

Chairman Oren Harris (D-Ark.) of the House Commerce Committee does not like the "real hammer" the FCC is wielding over broadcasters in threats of what might happen at license renewal time.

He so informed FCC Chairman Newton N. Minow last week in dis- cussing this "very, very serious prob- lem" and told the commission that it is "going pretty far" in floating ex- press language in the Communica- tions Act.

The question arose during FCC testimony on Rep. Harris' own resolu- tion to suspend the equal time pro- visions of the Communications Act for the 1964 presidential and vice presidential campaigns (see page 72). Rep. Harris brought up an FCC letter to WLBT (TV) Jackson, Miss., questioning that station's decision not to sell any political time during the 1962 Democratic congressional pri- mary.

He pointed out the FCC gets its authority only from the Communi- cations Act, which states that no station is required to sell any political time. "How can you, in the adminis- tration of the act, overlook this lan- guage . . ." Chairman Harris asked Chairman Minow.

The FCC leader replied that, while prohibited from ordering WLBT to sell time, it could question whether the station had operated in the pub- lic interest in refusing to do so. If the station disagreed with the FCC dictum, it could have gone to court, Chairman Minow said in repeating a phrase he often uses.

Chairman Harris, however, pointed out that the FCC's letter told WLBT that "if you don't [sell] time, we are going to consider that in connection with your renewal." He said the station would have to be prepared to defend its license if it did not comply (WLBT did sell 30 minutes of time to the Negro minister who opposed Rep. John Bell Williams [D-Miss.] for the Democratic nomination after getting the FCC's letter [BROADCAST- ING, April 30, 1962]).

"We [Congress] ought to look into the question as to not only this [pol- itical case] but many other things that the commission takes into con- sideration with the renewal because this question of holding a real ham- mer over the head of somebody, when they know it is held there, seems to me a very, very serious problem," Rep. Harris said.
they opposed extending access to the floor.

The Radio Television News Directors Assn. and the Radio-Tv Correspondents Assn. (a group of accredited Washington broadcast newsmen) wired the Rules Committee their support of the Harris resolution and pledged coverage of committee would "not impair the dignity or decorum of committee proceedings."

**FCC invites comments on reallocation requests**

The FCC last week invited comments on four proposals for channel changes and reservations, three for noncommercial educational use and one for commercial.

The Twin City Area Educational TV Corp. asked the commission to reserve ch. 17 in Minneapolis-St. Paul, presently commercial, for noncommercial educational use. The petitioner presently operates KTCA-TV on ch. 2 in the Twin Cities.

The Kentucky Authority for Educational TV requested allocation of ch. 33 to Hazard, and deletion of ch. 19 in that city. The authority feels that WLEX-TV on ch. 18 in Lexington would cause interference to a ch. 19 operation (Broadcasting, Dec. 16, 1962).

Western Washington State College, Bellingham, Wash., plans to construct an etv station and requested the reservation of ch. 18, which is presently commercial, in Bellingham.

WKY-AM-TV Evansville, Ind., asked that ch. 25 be assigned to Evansville for commercial use.

**Revoke WVAL permit WJON asks commission**

WJON St. Cloud, Minn., requested last week that the FCC revoke the construction permit for WVAL Sauk Rapids because of alleged unauthorized transfer of control and economic injury to WJON.

WJON noted that in February and November 1962 the station had telegraphed the commission concerning the alleged transfer of 50% of WVAL owned by Carl A. Nierengarten (other 50% was held by Herbert M. Hoppe). According to WJON, Mr. Nierengarten told WJON General Manager A. E. Dahl that he was no longer responsible for his share of financing the proposed WVAL, because he no longer held his 50% interest.

The original agreement for financing WVAL was that Messrs. Nierengarten and Hoppe would put up $20,000. According to WJON no money was ever deposited to the partnership account. WJON said that 10 days after the original agreement was drawn up a new agreement was made, but apparently was never filed with the commission.

**Stanton calls for equal news access**

**CRITICIZES 'SECOND CLASS' STATUS OF RADIO-TV**

Dr. Frank Stanton, president of CBS, on March 5 called on legislators, courts and regulatory bodies to stop treating broadcasters as "second class" denizens of the Fourth Estate.

In an address to the New York State Broadcasters Assn.'s annual dinner in Albany, Dr. Stanton specifically urged suspension of the "equal time" restrictions of Sec. 315 of the Communications Act (see story on page 72), abolition of the "philosophy of Canon 35," and amendment to N.Y. State Sec. 52 of the Civil Rights Law, also treating radio-tv coverage rights.

"We can all do our part," he said, "by working to banish Canon 35, which certainly does not represent the will of the people; by urging Congress to throw out the tattered, outdated Sec. 315; and by opening legislative procedures to the widest scrutiny of the public."

Canon 35 of the Judicial Ethics of the American Bar Assn., bans microphones and cameras from courtrooms. It has spread in its application, Dr. Stanton said, to proceedings of Federal regulatory agencies, resulting in a "further erosion of the right of the people to know."

Sec. 52, "a blanket prohibition on broadcasting and picture-taking of proceedings of bodies having the power of subpoena," according to Dr. Stanton, was amended in 1962, but "entangled the broadcaster in an almost impossible web of required consents and permissions."

**New York Bill** To loosen the "legal knots binding broadcasters" in New York State, Dr. Stanton urged passage of a bill (Al 4198) now under consideration in the Committee on Judiciary of the New York Assembly. "This bill," he said, "would amend Sec. 52 of the Civil Rights Law by allowing broadcast coverage of the testimony of witnesses, whether under subpoena or not, and eliminating the requirement of consent on the part of the witness."

Dr. Stanton cited a growth rate of almost 200% in radio stations within New York State since World War II (from 70 stations to 207) and an increase in tv stations from 2 to 24 over the same period as evidence of the "continuing trend from print to broadcasting." Over the same period, he stated, the number of daily newspapers declined from 102 to 88.

"Yet today we are short-changing ourselves in failing to use electronic communications to the fullest in keeping the essential flow of information and feedback of opinion going," he said.

"We have not only been standing still in this regard, but we have been going in reverse. I speak particularly of the narrowing rather than the widening of the avenues of access to information."

At the meeting, the New York broadcasters elected officers and board members who will serve for one year, New officers are Merle L. Galusha, WGY Schenectady, president, and R. Peter Straus, WMCA New York, vice president. Re-elected were Elliot Stewart, WIBX Utica, secretary, and John B. Lynch, WWSC Glenns Falls, treasurer.

Herb Mendelsohn of WKBW Buffalo was elected to the board of directors.

**FCC asked to reconsider N.C. translator grants**

The FCC last week was asked to reconsider its grant of Atlantic Telecasting Corp. applications for new vhf translators in Fayetteville and Jacksonville, both North Carolina.

WTVD (TV) Durham (ch. 11) asked that the commission rehear the application for Atlantic's translator on ch. 6 in Fayetteville, which will carry the signal of WECT (TV) Wilmington (ch. 6). WTVD said that the WECT translator will duplicate WTVD's programming to Fayetteville which lies within its Grade B contour. WTVD pointed out that this would be in violation of the FCC's conditioned grant to Atlantic that its translator not duplicate WTVD.

Another petition against Atlantic was filed by WNBE-TV New Bern (ch. 12), opposing the grant of a new translator on ch. 12 in Jacksonville. WNBE-TV said that Jacksonville is within its Grade A contour and that the co-channel translator would interfere with reception of the station.

**Florida etv group seeks ch. 22 outlet in Tampa**

The Florida Educational TV Commission requested last week that the FCC reallocate and reserve for non-commercial educational use ch. 22 to Tampa and delete it from Lakeland. It also asked that ch. 70 be assigned to Lakeland.

The etv group said it plans a station to serve the Tampa-St. Petersburg area, and already has $475,000 allotted for that purpose.

The etv commission also plans to ask for four more uhf, but did not indicate where the channels would be requested. It already operates five vhf and one uhf etv stations.
TARIFF HUBBUB OVER TAPE VS. FILM

Should running time or footage be basis of charge?

A television tariff tizzy, involving import duties on video tape brought in from abroad, is underway in Washington and a first step is scheduled for March 20.

At issue is the apparent unfairness of the duty charged for tv tape compared with that paid on 16mm film.

Both tv tape and 16mm film are required to pay duty of 0.9 cents for each linear foot.

But, for the same program, tape requires more than twice the footage used in 16mm.

For a 15-minute program, it is estimated that from 500 to 600 ft. of 16mm film is required; the same program on video tape runs from 1,100 to 1,200 ft.

At the present import schedule, importers of tv tape must pay more than film importers pay—for the same program length.

A move is underway to persuade the U. S. Tariff Commission to change the rules to require customs duties to be paid on running time rather than on footage.

One of those leading the campaign is Benito Gaguine, a Washington attorney acting for his client, Spanish International Network. SIN owns Spanish-language uhf stations KMEX-TV Los Angeles and KWEX-TV San Antonio.

It relies heavily on programs produced in Mexico City by Teleprogramas de Mexico and imports about 50 hours of such programming weekly. This comes to 11.7 million feet of video tape yearly. If these programs were brought in on 16mm film, they would require 5.6 million feet a year.

This difference, 6.1 million feet annually, means that SIN is paying a $61,000 yearly penalty because it is using tv tape instead of 16mm film.

There are, it is acknowledged, few stations hit so heavily by this discrimination. Even the television networks do not consider this differential onerous. NBC figures it imports only about 72,000 ft. of video tape annually for news alone, costing about $720 in duties. The only other program where imported tape plays a significant part, NBC pointed out, is its International Showtime show (Fri., 7:30-8:30 p.m.).

The network calculates that import duties for segments of this program run about $160 a year.

CBS estimates that it brought in 555,000 ft. of tv tape, mainly news, last year from abroad. The import charge was something over $5,500 for the year.

Tape Allies • Mr. Gaguine’s campaign, which he began in behalf of his client a year ago, has already borne some fruit. He has enlisted the support of Ampex and RCA, both manufacturers of tv tape recorders, and of Minnesota Mining & Manufacturing Co., maker of tv tape.

His activities have also pushed a government agency into a move to set its regulations in order. Originally, it seems, the Customs Bureau insisted that video tapes be charged on an ad valorem (value) basis. But the formula to determine value became so complicated that in 1959 and again in 1961 NBC persuaded Customs officials in New York and Los Angeles to place video tape in the same category as motion picture film.

This Customs Bureau practice, however, never had the formal sanction of the Tariff Commission. Several weeks ago, the staff of the Tariff Commission submitted a recommendation to superiors to officially place video tape in the same import schedule as motion picture film. This presents tv tape users with the opportunity to make their case for a running time duty rather than a footage tariff. Deadline for comments is March 20.

There is some hope that this may be accomplished: some years ago color feature films for motion picture exhibition came into the country in three separate films. They were then made into a single negative for exhibition. The motion picture industry objected to the heavy duty impost, and in 1960 the Tariff Commission ruled that color movies would be charged on the basis of one film, not three.

The FCC last week...

• Designated for oral argument the application by WDUL, TV-Corvallis, Ore., for additional time to construct WHYZ-TV (ch. 10) Duluth, Minn. Commission wishes to determine if WDUL has the character qualifications to be a licensee.

• Denied a petition by WHDH Inc., WHDH-TV (ch. 5) Boston, to reconsider its Dec. 19, 1962 order which established a definite date for the filing of competing applications for ch. 5 with WHDH-TV’s application for renewal of license (Broadcasting, Feb. 4). Same petition asked that any applications filed before Jan. 24 not be considered mutually exclusive with WHDH-TV’s.

• Denied petition by WYNR Chicago to file comments in commission’s investigatory proceedings against the station (Broadcasting, Jan. 28). Further issues to determine if contests and other promotions had caused damage or threatened to damage public and private property, caused harassment through telephone calls, disturbed one or more public schools, and generally showed a lack of “reasonable care or prudence” in the promotions and contests it aired.

• Granted WAJM Inc. temporary authority to operate WAJM (FM) Montgomery, Ala., under former license of The Advertiser Co. which was relinquished March 6. Authority is for period of March 7 to June 7. Commission also waived fm freeze and accepted WAJM Inc.’s application to construct a new station on 103.3 mc, and waived rule allowing the filing of competing applications if WAJM’s is filed by April 15.

• By its Review Board enlarged hearing issues on application by Geoffrey A. Lapping for a new am station in Blythe, Calif., to determine if Mr. Lapping had used devious means to obtain confidential information about KYOR in that city. KYOR had charged that he conspired with Robert W. Presley, who was hired by KYOR, to obtain the information. The commission also wants to know if Mr. Lapping sent misleading letters, requesting applications, to area businessmen and if Mr. Lapping has the necessary character qualifications to be a licensee.

New bills introduced

The following legislation affecting broadcasting has been introduced in Congress. Proposals which duplicate earlier bills and resolutions are so noted:

Amend daylight hours: H.R. 4474, Reps. George E. Shipley (D-NJ), Arch A. Moore Jr. (R-Wa.), to amend the Communications Act to permit daylight stations to operate at least from 6 a.m. to 6 p.m.

Special authorization: S. 1005, Sen. Warren G. Magnuson (D-Wash.), to permit the FCC to grant a special 60-day authorization for non-broadcast operation in cases where applications for regular operation are pending.

Reciprocal agreement: S. 920, Sen. Barry Goldwater (R-Ariz.), and others: for FCC to issue authorizations for alien amateur radio operators to operate in U. S., possessions and Puerto Rico, if Americans are accorded similar authorizations from the aliens’ governments.

in Congress

BROADCASTING, March 11, 1963
Who helps you put superior spots before your sponsors' eyes?

Better local spots mean more money for you. And now you can produce them with your VTR. It's possible with the Ampex Electronic Editor operating with Ampex Inter-Sync. The Electronic Editor allows you to assemble, insert, add effects or make changes electronically until you get just what you want to see—all without cutting an inch of tape. Add a Special Effects Generator and you have every conceivable transitional effect at finger-tip control. There's no need for specially trained film crews. Your own staff can handle every job. Another Ampex accessory for better programming: Amtec—an automatic time element compensator that gives you geometrically perfect pictures. For more information write the only company providing recorders, tapes and memory devices for every application: Ampex Corporation, 934 Charter Street, Redwood City, California. Sales, service throughout the world.
Four Star’s big promotional push

NETWORK-CALIBRE SPOTS FOR OFF-NETWORK SHOWS

Four Star Distribution Corp. has started an unusual “network-calibre” promotional support for its off-network shows.

The company, now syndicating five off-network series, has begun the shipment of specially-made trailers for each episode of the 145-episode Zane Grey Theater. The series is in 41 markets, and Four Star says it is prepared to serve them all. In time, servicing will be expanded to cover other Four Star off-network television properties.

Four Star now distributes off-network shows Target: The Corruptors, Stagecoach West, The Detectives and The Law and Mr. Jones.

Initial estimates are that Four Star’s promotional endeavor will cost the company $22,000-plus on the basis of trailer material prepared (prints, shipping, etc.) for the Zane Grey series in 50 markets. This cost does not include other promotional expenses such as those incurred in kits (Four Star is going so far as to offer color art in limited quantities).

As markets are added, the process expanded to other series and stations step up their on-the-air use of the trailers or promos, the cost to Four Star will soar. This eventuality, according to the company, has a long-run return, the promotion seen as audience builders and a spur to future sale of its series in the markets involved.

Four Star executives explain that the usual trailer tagged to each program episode is made available to stations. This tag runs about a minute. But in addition, Four Star has specially-edited additional excerpts on a per-episode basis. These are in the 10-second, 20-second and one-minute lengths. (The firm also has meshed its plans by providing stills, synopses and storylines on a per-episode basis.)

Carrier crew gets tv preview

Approximately 1,500 men aboard the USS Lake Champlain saw “The Story of a Carrier Pilot,” one of the half-hour episodes of the David L. Wolper-United Artists Television series, The Story of..., prior to its release to tv stations.

The episode was shown originally to Navy officials headquartered in New York. When Captain Andrew L. Burgess, commanding officer of the Champlain, learned of the film while cruising in the North Atlantic, he cabled New York that he and his crew wanted to see it. UA TV complied and arranged the screening.

WCBS-TV uses record to promote late movies

As part of a special promotion commemorating the 12th anniversary of WCBS-TV New York’s The Late Show, the stations has issued a long-playing record album featuring Columbia Records’ artists performing a collection of 12 songs from motion pictures presented on the program. The album will be offered as a premium to the public for $1, starting today (March 11). In addition, the record album has been sent to approximately 1,000 agency buyers throughout the country, asking them to identify the motion pictures from which the album music was selected. Winners will be entitled to various prizes. The station also held an anniversary cocktail party for agency media supervisors and timebuyers at the Waldorf-Astoria Hotel in New York.

Audience on the move

A report from the Southern California Broadcasters Assn. shows one reason why traffic time is premium time in Southern California. As of Dec. 31, 1962, there were 4,091,000 radio-equipped passenger cars in the 10 Southern California counties. This was a gain of 9% in 1962. At the same time, automobiles equipped with radios in the metropolitan Los Angeles area rose 8% to 2,983,000.

The figures are from the end-of-the-year auto census of the California motor vehicles department. Dealers reported that 90% of new cars sold are radio equipped and 85% of used cars traded in have radios.

KLIF's trading stamps

KLIF Dallas has replaced cash and merchandise prizes in promotion contests with its own specially designed brand of trading stamps—KLIF Deejay Trading Stamps. More than 100 premiums are redeemable for the stamps, ranging from a monaural record album for 110 stamps to an air conditioner which goes for 7,400 stamps.

Each of KLIF’s six air personalities is pictured on his own stamp. During their broadcast periods the personalities offer listeners a given number of stamps for the correct answer to a “question of the hour.”
TAKE ADVANTAGE OF NEW FCC RULING ON REQUIRED READINGS WITH A LOW-COST MODULAR SYSTEM

AUTOLOG features the lowest cost modular system with four to nine channels available for local or remote use. Why spend extra money on an elaborate system when AUTOLOG maintains legally and technically correct logs?

Ready for delivery.

Richard C. Anderson and M. David Keil elected vp's of Young & Rubicam and account supervisors in agency's Chicago office. William B. White, associate director in merchandising at Y&R's New York office, elected vp-account supervisor. Mr. Anderson, who has been director of media relations and planning in Chicago office for past two years, will continue in that capacity. He formerly served as associate media director in both Chicago and New York offices and has been with Y&R for 11 years. Mr. Keil, an account executive at Y&R for past three years, previously served as brand manager in grocery products division of Armour & Co. Mr. White joined Y&R in 1954 from M&R DIetetic Labs where he was national field sales manager.

Jacob A. Evans, vp, central division of Television Bureau of Advertising, named Detroit representative for TvB. Mr. Evans succeeds Guy Cunningham, who was recently appointed TvB creative director. Prior to joining TvB in 1961, Mr. Evans was managing editor of American Weekly. He served for eight years with NBC where he directed advertising, promotion and sales development department of TV and radio networks and NBC Spot Sales.

Frank Menner, formerly with Ogilvy, Benson & Mather, joins Street & Finney, New York, as vp and director of media planning.

Richard L. Burkman, assistant account executive at Ketchum, MacLeod & Grove, Pittsburgh, joins National Union Insurance Cos., that city, as advertising manager.

Richard Hammett joins Reeves Adv., Minneapolis, as account supervisor. He formerly was research director of Young & Rubicam, Chicago, and before that with Leo Burnett Co.

Sol E. Zubrow, board chairman of S. E. Zubrow Co., Philadelphia marketing and advertising agency, appointed assistant to president for marketing of Fels & Co., soap and detergent manufacturer, that city. Mr. Zubrow will direct Fels' marketing and sales activities for all consumer products and be responsible for introduction of new products. William Drutt, vp and director of client services for S. E. Zubrow Co., elected president. Mr. Drutt, with Zubrow since 1957, is former vp and general manager of Chunk-E-Nut Products Co.

Alfred L. Goldman, vp in charge of copy at Benton & Bowles, New York, elected senior vp in charge of copy. Mr. Goldman joined agency in 1959 as associate creative director. He was appointed to board of directors in February 1962 and elected vp in charge of copy in April.

Fred Isserman Jr., executive on Enden Dandruff Treatment Shampoo account at Edward H. Weiss & Co., Chicago, based advertising agency, elected vp and supervisor of agency's Helene Curtis account. Mr. Isserman, who joined Weiss 2 1/2 years ago, is former project supervisor for Leo Shapiro & Assoc., Chicago market research firm, and at one time served as brand manager for Toni Co.

George Olsen, former assistant to vp-corporate relations and advertising of General Telephone & Electronics Corp., New York, joins Colgate-Palmolive, that city, as manager-publ. relations. Mr. Olsen will be responsible for supervision and coordination of public relations for toilet articles division. Edwin C. Loeser, intermediate accountant in treasurer's office of Colgate-Palmolive, appointed supervisor of media schedules. In his new post, Mr. Loeser will supervise program contracts and other business relative to broadcasting. He will also administer TV network billing, estimates and performance records.

Bill Smallman, formerly with Leo Burnett Co., Chicago, joins Foote, Cone & Belding, that city, as copy supervisor assigned to portions of B. F. Goodrich and S. C. Johnson & Sons accounts.

Janet S. Cuhel, assistant advertising manager of Mattel Inc., Hawthorne, Calif., toymaker, promoted to sales promotion administrator.

F. Stanley Newbery Jr., account supervisor at Cunningham & Walsh, New York, elected vp. Mr. Newbery joined C&W in 1959. Previously, he served as account supervisor with McCann-Erickson and vp and director of research for Ruthrauff & Ryan, New York.

Dorothy Shahinian, former associate media director at Fuller & Smith & Ross, New York, joins Kudner Agency, that city, as administrative assistant to media director.

Government people attend film reception

A film reception given last Monday (March 4) by Sens. Warren Magnuson and Henry Jackson (both D-Wash.) was attended by persons from Washington State and government personnel, who work in Washington, D. C. The picture "Washington State—Land of Contrasts" was filmed and narrated by Mark Evans, vice president of Metromedia Inc. Above (1 to r) FCC Chairman Newton N. Minow, Mr. Evans, Sen. Magnuson and USIA Director Edward R. Murrow.

that city, as manager. Previously, Mr. Monroe was client service executive with A. C. Nielsen Co., San Francisco.

Gene Upright, sports director of WIS-TV Columbia, S. C., since 1957, named manager of Video Corp. of Ocala, Fla. Company is community antenna system owned by Broadcasting Co. of the South, parent corporation of WIS-TV.

David E. Hanberg and James A. Badgley join KMCS (FM) Seattle, Wash., as sales manager and merchandising manager, respectively.

Arthur A. Eaton, senior account executive at KDIA Oakland, Calif., assumes added duties of pr director.

Edgar G. Shelton Jr., Washington communications attorney, is president and board chairman of company.

Bruce Schneider, account executive at KMOX-AM-FM St. Louis, joins sales staff of KSDK-TV, that city.

Mary Halstead appointed director of sales service for KPLR-TV St. Louis. Howard A. Rader and James W. Hoeffler join station’s local sales staff.

Vernon G. Tucker, former field engineer for Telemet Co. and previously chief engineer at KLYD-AM-TV Bakersfield, Calif., joins KTTV (TV) Los Angeles as assistant chief engineer.

Charles Velona, sales traffic manager in local sales department of KTTV, named assistant account executive.

Samuel M. Sharkey Jr., editor of news and night news editor of NBC News in New York, appointed to new position of managing director of news for KING-AM-FM-TV Seattle, Wash. He will assume his new duties in mid-March. With King Broadcasting Co., Mr. Sharkey will direct combined radio-news department responsible for all news, documentaries and editorials presented by stations. He joined KING in 1955.

Nicholas D. Newton, account executive at WTMF (FM) Lake Success, N. Y., joins sales staff of WPAT-AM-FM Paterson, N. J.

Roger Ailes, associate director of Mike Douglas Show on KYW-TV Cleveland, promoted to staff producer-director, and Jim Kenney, film-re-editer, named film supervisor. Other KYW-TV promotions: Don Stuart, national sales coordinator, to sales representative; John Dingenthal, radio national sales coordinator, to Mr. Stuart's former post; Bob Fields, technical director on Mike Douglas Show, to station engineering operating supervisor; and Richard T. Monroe Jr., technical operations, to facilities supervisor.

LeRoy Collins, NAB president, appointed to governing body of National Commission on Community Health Services, independent, nonprofit agency that works with local communities to evaluate existing health services and facilities, and to develop programs that will provide for current and future needs. Mr. Collins is only commissioner to be selected thus far from communications industry.

Bill Hillinick, head of his own pr firm in Los Angeles and San Francisco, joins western division of ABC Radio network as manager of research, sales development and promotion. Previously, Mr. Hillinick was pr director of Richard N. Melzer Adv. in San Francisco and with program promotion department of Young & Rubicam, Hollywood.

Dale Mahurin, former general manager of KVLC Little Rock, Ark., appointed commercial manager of KALO, that city. Jim Gaines named program director; David Arnold, news director.

Dr. Mary Ann Cusack, staff member of U. of Michigan, Ann Arbor, named special assistant to LeRoy Collins, NAB president. She will work on research and special projects. John Perry, who formerly held post, continues as consultant to Mr. Collins. Dr. Cusack holds degrees from Manhattanville College and Columbia U., both New York, and Wayne State U., Detroit, and is considered authority on broadcast editorializing, having written her doctoral dissertation on “Editorializing in Broadcasting.” She was first woman in U. S. to receive Ph.D. in radio and tv. In addition to her academic experience, Dr. Cusack served during 1952 as member of New York Times staff and was member of Detroit and Chicago bureaus of UPI in 1953-54.

Meryl Weber named public information director of KXOK St. Louis.

Michael Nozilo, employed at WISN-TV Milwaukee for six years as staff director, appointed to newly created post of coordinator of public services.

Larry Coffel, floor director, promoted to fulltime staff director.

George Woodyard, for past 10 years advertising and promotion director of Greater All-American Supermarket chain, with headquarters in Downey, Calif., joins KTLA (TV) Los Angeles as merchandising director. Walker Edmondson, whose TV career began in 1949 at KTLA, rejoins station as writer-star of The Walker Edmondson Show, which made its debut last Monday as Monday-Friday, 3-4 p.m. program.

Glenn C. Lewis, formerly with WSLS Roanoke, Va., joins announcing staff of WDBJ-AM-FM, that city.

Don Lasswell, air personality with WHB Kansas City, resigns to devote full time to private investments in Sacramento, Calif.

Rena Johnson, who has spent 39 years in Detroit advertising and broadcast business—past 24 years with CBS—retired Feb. 28. For past 10 years Mrs. Johnson has been office manager for four sales divisions of CBS which are headquartered in Fisher Bldg. in Detroit.

Mary Neal appointed publicity director of WTRF-TV Wheeling, W. Va.

PROGRAMMING

Peck Prior, veteran advertising agency and TV film executive, resigns as vp and general manager of Don Fedderson Commercial Production to become president of VPI Inc. of California, newly formed company for production of TV commercials. VPI Inc. of California was formed by Mr. Prior and George Tompkins, president of parent VPI Inc. of New York, national TV commercial producing organization, and is presently headquartered at Producers Studio in Hollywood. Mr. Prior, who previously was associated with McCann-Erickson, Young & Rubicam, and Campbell-Ewald, formed commercial division of Fedderson company in 1961.

Schuyler G. Chapin, director of masterworks artists and repertoire at
Columbia Records, New York, elected vp for creative services. Leonard Burkat, former music administrator of Boston Symphony Orchestra and administrator of Berkshire Music Center, joins Columbia to succeed Mr. Chapin.

James L. O'Connor joins RKO General Phonevision Div., Hartford, Conn., as vp and general manager. He succeeds Charles O. Wood, who moves to headquarters staff of RKO General, New York. Mr. O'Connor will be responsible for operation of subscription tv project in Hartford. He practiced law in New York prior to joining RKO General. Previously, he was vp in charge of east coast laboratories for Pathe Laboratories.

Arthur Zeiger, assistant director of business affairs at MGM-TV, appointed director of business affairs. He succeeds Jason Rabinovitz, who was elected treasurer of MGM Inc. (Broadcasting, March 4). Mr. Zeiger joined MGM-TV in December 1960. He has also served as assistant to president of broadcast management doing personal management for tv personalities. Mr. Zeiger was with ABC-TV from 1957-1959 in business affairs department and was assistant general counsel of National Telefilm Assoc. during previous year.

Patrick McGowan, tv manager of Modern Talking Picture Service, appointed manager of company's San Francisco branch office. Mr. McGowan was formerly associated with KPIX (TV) San Francisco.

Alvin Sussman, executive vp and director of sales for Universal Entertainment Corp., joins WBC Program Sales, syndication subsidiary of Westinghouse Broadcasting Co., New York, as vp and general manager. He replaces Mike Roberts, who resigned. Prior to joining Universal, Mr. Sussman had served as eastern sales manager for Associated Artists Productions and program buyer for Crosley Broadcasting Corp.

(Smiling) Jack Smith will be master of ceremonies of Your Name’s the Game, which returns to KTTV (TV) Los Angeles today (March 11) as Monday-Friday, 12:30-1 p.m. program. Both Mr. Smith and his assistant, Sandy Balson, were on program when it ran on KTTV in 1962. George Brewer directs game show, which is produced by Jack Evans for Ross & Seideman.

Lester Cooper, former supervising producer and head writer for Mike Wallace’s PM series, joined United States Productions, New York, as producer-writer.

Dick Wesson, recently signed to writer-producer-director contract by Filmyways TV Productions, will produce Paul Henning’s new comedy series starring Bea Benaderet, to start on CBS-TV in fall. Paul Henning will serve as executive producer for this new series, while continuing as producer-writer of The Beverly Hillbillies.

Sandy Dornish, former executive secretary at KMPC Los Angeles and previously with Frank Cooper Agency and Capitol Records, joins Heller-Ferguson Inc., Hollywood producer of station promos and radio-tv commercials, to handle production coordination and office administration.

Tom McNaghten, formerly with Secretary of Air Force information office, Hollywood, joins ABC-TV’s Queen for a Day show as press-publicity manager.

INTERNATIONAL

Lucien Parizeau elected president of Canadian Adv. Agency Ltd., Montreal, succeeding L. E. Schofield, who has retired after 37 years with agency.

Richard St. John appointed manager of newly established Vancouver, B. C., office of Goodis, Goldberg & Soren Ltd., Toronto-based advertising agency.

Arthur Robson, representative of Canadian Broadcasting Corp. tv news in New board members

Ten new directors have been elected to board of Academy of Television Arts & Sciences Foundation. New members are:

- Louis F. Edelman, independent producer; Sydney H. Eiges, vp for public information, NBC; Betty Furness, president of New York chapter of the academy;
- John Guedel, head of John Guedel Productions; Irv Kupcinet, columnist for Chicago Sun-Times; Donald H. McGann, president of Westinghouse Broadcasting Co.; C. Wrede Petersmeyer, Corinthian Broadcasting Corp.; Tom Sarnoff, vp, NBC; Jack Wrather, president of Wrather Corp.; and Jane Wyatt, tv and motion picture star.
3 CBC-TV employes killed

Three Toronto Canadian Broadcasting Corp. television men were killed when their airplane crashed 70 miles southwest of Calgary, Alta., on Feb. 26, while they were taking film of wildlife from the air for Camera Canada program. Killed were producer Norman Caton, 40; cameraman Leonard MacDonald, 34, and engineer Charles Reigler, 33. They were flying in twin-engined Apache plane filming herd of elk when plane hit treetop and crashed into hillside in heavily forested country. Their filmed program on wildlife and story of their crash is to be shown on CBC network on May 27, according to Thom Benson, executive producer of Camera Canada.

Harry D. Kiernan, former director of operations for Radcom-Westrex Div., Litton Industries, appointed director of finance. Gene B. Rollins, who has been personnel director, named director of industrial relations for Radcom-Westrex, which manufactures radio communication equipment and facsimile transmitters and recorders. Thomas H. M. Elwell, former head of optical, movie and sound recording labs for U.S. Industries' government programs division, appointed New York regional sales manager for Westrex recording systems department of Litton Industries.

John O'Leary named production supervisor of National Transistor, subsidiary of International Telephone & Telegraph Corp., Lawrence, Mass. Prior to joining firm, Mr. O'Leary was senior quality assurance engineer for Raytheon and supervisor of quality control for CBS Electronics.

Robert H. Westmoreland, chief of visual production for U.S. Information Agency, position to which he was named after his retirement in 1961 as chief of pictorial branch of U.S. Marine Corps, appointed Bell & Howell/Cannon technical consultant. In this newly created position, Mr. Westmoreland will work primarily with professional photographers, conducting training sessions on use of equipment in Bell & Howell/Canon 35mm line.

DEATHS

Patsy Cline, 30; Hawkshaw Hawkins, 43, and Concho Copas, 49, all stars of Grand Ole Opry were killed last Tuesday (March 5) when their light plane crashed near Camden, Tenn. Trio was returning to Nashville from benefit performance in Kansas City, Kan. Also killed was pilot Randy Hughes, 35. Mr. Hughes was Miss Cline's manager and son-in-law of Mr. Copas.

Marian Clark, radio-television writer, died Feb. 26 after short illness. Miss Clark joined KNX Los Angeles in 1943, first woman member of station's news department, and worked there for duration of World War II. In recent years she had been writing scripts for Gunsmoke and other TV shows.

Dorothy J. Durbin, first program director of WOWO Fort Wayne, Ind. (from 1925 to 1936), died Feb. 26 while enroute to Lutheran Hospital, that city. Following her service at WOWO, Mrs. Durbin established Durbin Booking Agency and operated business until her retirement in 1961.

A. J. Collins, formerly with Canadian Broadcasting Corp., appointed western Canadian radio-television director of Foster Adv. Ltd., Vancouver, B. C.

Ian Howard, of Needham, Louis & Brody, Toronto, joins CKNW New Westminster, B. C., as local sales representative.

Jack Sayers named retail sales manager of CJCA Edmonton, Alta.

Joel Aldred, president of Fifeshire Productions Ltd., Toronto, and Canadian tv personality, nominated as Progressive-Conservative candidate for St. Paul's Riding, Toronto, in April 8 Canadian federal election.

ALLIED FIELDS

John C. Lackner, vp of Canadian Audits & Surveys Ltd., Toronto, elected vp and general manager.

Sheldon Newman, former research director of Esquire Inc., joins Home Testing Institute, New York, as assistant to president.

EQUIPMENT & ENGINEERING

Warren E. Hendrickson, assistant treasurer of RCA treasury administration, elected staff vp for banking and credit administration. Mr. Hendrickson joined RCA in 1942 as administrative assistant in Camden, N. J.

Forrest H. Gehke, former marketing manager of Sylvania microwave device division, named market planning manager for microwave tubes of RCA electron tube division at Harrison, N. J.

"Here's how the NEW Rotolite
SAVES OUR TRAFFIC DEPARTMENT
TIME & MONEY!"

Mr. Charles Castle
WARN, Ft. Pierce, Fla.

"Typing daily logs was taking too much time in our traffic department. It took us 5 hours to complete the following day's log. We wanted to switch to the more efficient Diaz method of reproducing our logs, but felt that the equipment was too expensive. Then we discovered that the Rotolite Whiteprinter cost us only $129.30. Complete. Now we type our daily logs in 5 minutes a day on rugged, transparent Rotolites. Any num- ber of copies can be run off quickly and easily. From week to week only the daily logs need be typed. Changes need not be erased and retyped on the master—and so the masters are kept current easier than by any other method we've ever heard about. Now it re- sires approximately 40 minutes for both A.M. and P.M."

This is what Mr. Charles Castle, General Manager of Station WARN in Ft. Pierce, Fla., has to say about Rotolite—the modern traffic system for Radio and Television stations. Send today for details.

Stand up and be counted in the fight against Communism

You, as a private citizen, can hit Communism where it hurts!

WHERE? Communism’s weak spot! Eastern Europe—
In Eastern Europe 80,000,000 once free men and women still bravely resist Communist domination. Here, Communism is on the defensive. Here, many Russian divisions are tied down. This is where Communism is under greatest pressure. You can help keep this pressure on.

HOW? By supporting Radio Free Europe—Every day Radio Free Europe’s 28 powerful transmitters broadcast news of the Free World, religious services, the plain truth to the brave people of Poland, Czechoslovakia, Hungary, Bulgaria and Romania. Armed with this truth, they represent a major obstacle to the Communist threat of world conquest. Eighty percent of them listen to Radio Free Europe despite Communist jamming. It is their strongest link with the future.

R.F.E. is a working weapon
Radio Free Europe is one of the Free World’s major offensive weapons in the Cold War against Communism and Soviet aggression. But it needs money now to continue its work. As a privately supported, non-profit organization, Radio Free Europe depends on individual contributions from private citizens. Your help is needed. What’s it worth to you to hit Communism where it hurts? Ten dollars? Five dollars? Give whatever you can...

BROADCASTING, March 11, 1963
OUR RESPECTS to Merle Hicks Tucker

Civic affairs foremost in his schedule

Merle Hicks Tucker is a man who: won the duPont and Peabody Awards for public service in the same year; lost a mayoralty election when his opponent would not accept free time on his station; toured Europe in 1930 with the Cowboy Band; was director of the New Mexico Tourist Bureau; is owner-president of KGAK Gallup, N. M.; is 1963 president of Kiwanis International; and believes broadcasters have invited much of their own trouble from the Federal Communications Commission.

An outspoken critic of the welfare, socialist state, Mr. Tucker will deliver the keynote address at the New Mexico Broadcasters Assn. annual convention in Albuquerque next month. It's a date he has managed to squeeze in around his work for and with the Navajo Indians and his cross-country tours as Kiwanis president.

A 32-year veteran of broadcasting, Mr. Tucker got his start in radio with WBAP in his native Fort Worth, Texas. A music major at Hardin-Simmons U., Abilene, he had been offered a job as a staff musician with WBAP but turned it down in favor of the other side of radio.

Office Boy - Starting as an office boy he became a junior announcer and then moved on to the Cincinnati-Louisville area for four years. He returned to Texas and did a special series on the old Southwest Network in 1935. Three years as radio director for the Texas Centennial and Fort Worth Centennial followed.

Mr. Tucker got his first taste of station management at KSAL Salina, Kan. In 1940 he became general manager of KROD El Paso and stayed there until March 1942, when he left to take up permanent residence in New Mexico.

Two years with KOB Albuquerque were followed by Mr. Tucker's affiliation with Albert E. Buck and Frank C. Rand Jr. in forming the Rio Grande Broadcasting Co. The trio built four stations—KOAT Albuquerque, KTRC Santa Fe, KRSN Los Alamos and KGAK Gallup.

When the company was sold, Mr. Tucker and his wife retained control of KGAK, under the name Thunderbird Broadcasting Co.

Service To Navajos - Starting in 1950 he formulated the station's policy of local news emphasis, editorials and public service, particularly aimed at the Navajo Indians.

While the Tuckers worked with the Navajos in educational and health programs, KGAK began Navajo language programming. It was this programming which led to the public service awards in 1955, as the first radio station to broadcast regularly to American Indians in their own language.

Mr. Tucker believes strongly in radio managers assuming individual responsibility of leadership in the community; public service, local news production with real news men, not those who rip and read. He does not believe that editorializing should be handled indiscriminately; it should be done by either experienced editorial writers, men with former newspaper experience and "certainly someone who is responsible in the corporate setup."

Offer Turned Down - When Mr. Tucker ran for mayor of Gallup he did everything possible to get his opponent to use free time on KGAK—even to offering his own time, the ex-candidate says. But the offer was never accepted and Mr. Tucker wound up the loser by 300 votes.

The moral? Mr. Tucker says he doesn't honestly know what it could be. At least, he says, he complied with FCC rules and honestly believed his opponent should have used the station.

Born April 12, 1911, the 51-year-old broadcaster has been active in civic and state affairs serving as director of the New Mexico Tourist Bureau, two years as director of the state Dept. of Development, president of the Gallup Chamber of Commerce, general chairman and president of the Albuquerque Community Chest and as special consultant to former Commissioner of Indian Affairs Glenn Emmons during the Eisenhower administration.

Highly active in Kiwanis affairs for 21 years, Mr. Tucker was one of the originators in 1954 of Farm-City Week, a program that was officially recognized by President Eisenhower.

In addition to his civic and social duties, Mr. Tucker served two years on the NAB's Am Committee and one year on its Legislative Committee.

A proponent of individualism, Mr. Tucker feels that broadcasters have a greater responsibility than many of them have assumed. He feels that the FCC has gone beyond the original intent of the law, but is perhaps doing no more than other departments of the federal government—moving toward the welfare, socialist state.

Straight In The Eye - Mr. Tucker says that the final responsibility rests squarely on the shoulders of each broadcaster to stop this trend, to stand up "so you can look the FCC straight in the eye, with a clean conscience when the time comes."

Mr. Tucker married Mida Watts Harris of Louisville 31 years ago. They have a son Merle Jr. (Buck), 12, a student at St. John's Military School, Salina, Kan.; a married daughter, Mary George, 26, and one granddaughter.

Mr. Tucker's belief in the future of radio and television is unlimited. The media, he thinks, can be the greatest influence in American life for good and he takes issue with broadcasters who enter the field to "make a fast dollar."

If we had broadcasters, Mr. Tucker says, "who looked at it as a sacred profession and realized that they were given a real responsibility when they accepted a license, they wouldn't have to worry about making money. Somehow or other that will take care of itself if a broadcaster will do a job."

On a virtual leave of absence this year to visit all 50 states and Canada for Kiwanis and to attend the many broadcasting meetings around the country, Mr. Tucker has managed to squeeze in a day or two at the station.

After a month on the road, he returned to KGAK for three days in February before leaving for the Broadcast Pioneers Banquet in New York, the annual conference of Service Club Leaders in St. Louis and more Kiwanis activities.

However, there is one date Mr. Tucker intends to make: as the regular announcer for the Inter-Tribal Indian Ceremonies of Gallup in August.

For Mr. Tucker, no other event takes precedence on his busy schedule.
EDITORIALS

Time to turn to the public

LATELY things have not been going well for broadcasters in their striving for journalistic freedom.

Last week members of Congress reacted with hostility to proposals that would liberalize the political broadcasting law and open House committee hearings to radio and television coverage.

A month ago the American Bar Assn. reconvened its Canon 35 which denies radio and television access to most of the courtrooms of the nation.

For the past two years the FCC has been exerting tighter and tighter control over the journalism operations of radio and television through the invocation of its “fairness doctrine” and other means of second-guessing editorial judgments of broadcast licensees.

If anything, broadcast journalists have been losing ground. It is evident that now tactics must be devised if broadcasters are to make significant headway on their troubled journey toward acceptance as journalists equal to the press.

Up to now broadcasters have sought admittance to legislative halls and courts through direct appeals to legislators and court officers. They have resisted incursions of the FCC individually and with scant effectiveness. These tactics have failed. Their continued use gives little promise of anything but continued failure.

The conclusion is now inescapable: The case for broadcast freedom must be taken to the public. It will get nowhere as long as the public is unaware of what is going on. It will get nowhere until the public is made to realize that the public’s elected representatives and the keepers of its courts, assisted by political appointees, are conspiring to deprive the public of the clear, full view of government operations that only television and radio can present.

Broadcast journalism must be used to advance broadcast journalism’s cause.

The station that is barred from covering a trial that is of intense local interest ought to do a broadcast explaining why it is unable to provide radio or television coverage.

The network that is barred from a House committee hearing of national interest ought not to cringe at the notion of telling its audience why it has been locked out.

Let broadcasters go to the public with the persuasive instruments at their command, and the public will soon go to the aid of the broadcasters. If legislators or lawyers object, so much the better. Let their views be aired. The logic in the situation is not on their side.

More than meets the eye

MOST broadcasters know that they are in jeopardy because of the way the FCC is running their lives. Yet most broadcasters equivocate when it comes to taking the only affirmative action open to them—an expression from Congress in the form of new communications legislation that will bar censorship of programs and the domination by government.

The FCC has passed the stage of subtlety. Since it is encountering no organized resistance, it moves blithely along, arrogating more and more power. And its legal staff continues to contrive devious ways of buttressing its supposed authority. The staff is now using the Solicitor General of the United States in a bid to get the Supreme Court to write down its power grab.

The Solicitor General interceded in a rather innocuous case involving two radio stations in Hobbs, N. M., and a weekly newspaper which had been enjoined from carrying advertisements of a Gaines County, Texas, optometrist, just across the state line. The injunctions had been issued because of a state law prohibiting mention of prices and discounts by optometrists.

Because interstate commerce was involved, the Solicitor General intervened. Broadcasting is interstate commerce and the Communications Act thus precludes direct regulation of broadcasting by the states.

So far, so good. But the Solicitor General then argued that the FCC has been given “extensive authority to regulate programs and advertising material in the public interest.” This was gratuitous. It wasn’t needed to justify the FCC’s jurisdiction over interstate commerce.

This line of argument was contributed by FCC attorneys. It is customary for agencies of government to collaborate with the Solicitor General in specialized areas and, indeed, the names of the FCC attorneys were on the brief.

Among the citations calculated to prove the FCC’s powers over programming, the brief enumerated the license and license renewal requirements, and the July 1960 program policy statement which was accepted, practically in default, by those who should have spoken out against it.

The FCC’s strategy, however, was to elicit from the Supreme Court an affirmative expression of the FCC’s right to control programs. Cited in the brief was the 1943 opinion of the Supreme Court upholding the FCC in the network-monopoly case wherein Associate Justice Felix Frankfurter, in what the lawyers call dicta, said the law, as he construed it, placed upon the FCC the burden of determining the “composition of that traffic” and not merely the task of serving as a “traffic officer.” The FCC has quoted this language, not the substance of the opinion, as giving it carte blanche over programming.

It is obvious that the FCC lawyers are trying to get further affirmation of program control by smuggling it into a Supreme Court decision in the New Mexico case.

The NAB convention will convene in Chicago in three weeks. The FCC again will sit as a panel. It is important that the licensees get the answer. This is no time to stand on ceremony or to pull punches.

Unless the FCC repudiates its own lawyers, the answer will be automatic. In that event, the answer of the NAB should be an all-out drive for the legislation proposed by the authors of the monographs of the Federal Communications Bar Assn. (Broadcasting, Jan. 28) to which the NAB, thus far, has given only lip service.

"Nothing wrong with your set, lady. It's all those detergent commercials so close together!"

“87th PRECINCT”

Report: Program under surveillance for a full year, while on network television. Each episode taut and dramatic. Stories of detectives at work, brought to life by an outstanding cast. Audience Evidence: Sizeable. Loyal. In markets like Boston, Miami, Cincinnati, San Diego, Tucson—87TH PRECINCT took first place against high-powered opposition. That's why first-rank advertisers like Bulova, Ford, Gillette, Procter & Gamble, Warner-Lambert sparked national sales drives with 87TH. Current Status: Available to stations as first-run syndicated series—30 dramatic hours to arrest market troubles. Reports show viewers and sponsors on alert for 87TH PRECINCT. Action called for. Stake out your area through...

COMPLETE INDEX PAGE 7

Flexibility is one of many reasons why Spot Television is the largest growth medium in Advertising today. Frequency of sales message can be matched to markets. Timing can be keyed to short or long sales drives. Testing is efficient and economical. These quality stations offer the best of Spot Television in their markets.

BROADCASTING, March 18, 1963
Drop-in reverberations

FCC's 4-3 vote against sub-standard spaced drop-ins in seven two-station uhf markets continued to be lively topic last week (BROADCASTING, March 11). Supporters, including ABC, which stood to add affiliates in markets, plus prospective applicants, couldn't understand how FCC Chairman Newton N. Minow was persuaded to vote against his own plan, thus supplying one-vote margin of defeat. Mr. Minow previously had espoused plan whereby there would be automatic transition of drop-in outlets to uhf. Argument that swung him was that drop-ins would delay or even torpedo all-out move for development of uhf, evidenced by all-channel set legislation and government-industry uhf committee organized last week with the blessing of President Kennedy.

In some quarters, reaction to Minow vote was strong enough to question propriety of his voting at all in light of his recent resignation which he has neither denied nor confirmed. There's no certainty, of course, that his successor, whoever he may be, would have voted differently but notion is that Mr. Minow should have disqualified himself in matter involving precedent.

Where are you?

It's toss-up whether Car 54, now in second season on NBC-TV, will find new berth on CBS-TV in 1963-64. Decision was close Friday. If show is accepted, plans are to place it in Wednesdays, 8:30 p.m. period, where CBS-TV now has penciled in Real McCoys for next fall. Program will not be renewed by Procter & Gamble and is being replaced by Grindl in its current period Sundays on NBC-TV.

Alberto-Culver to radio?

Within next week or so, Alberto-Culver may decide to venture significant test of radio in several markets. Radio research plan awaits final okay at top. A-C now spends virtually all its $30 million-plus ad budget in tv. Firm tried to test radio once before during introduction of VO5 shampoo, but test was sacrificed when sudden change in total marketing strategy resulted in big tv blitz in radio research area.

Traffic with the enemy

At least some television network executives are getting wrought up about some of their stars appearing in ads for products they oppose. A-C now spends virtually all its $30 million-plus ad budget in tv. Firm tried to test radio once before during introduction of VO5 shampoo, but test was sacrificed when sudden change in total marketing strategy resulted in big tv blitz in radio research area.

Quotas going up?

U.S. distributors of programs abroad may look forward to brighter days in exporting shows to United Kingdom, still most lucrative foreign market in terms of money but limited by 14% quota on product coming in from outside Britain. Memo quietly being circulated by tv division of Motion Picture Export Assn. of America reports on efforts of two leading British program contractors—Associated Rediffusion and Associated Television Ltd.—to raise quota on tv imports. Associated Rediffusion and ATV are seeking union support for this move, hoping labor will exert pressure on postmaster general to raise quota to 20% or to some "realistic" figure. If move is successful in UK, MPEAA looks for more favorable trading position in other parts of world.

Background to Associated Rediffusion and ATV moves to raise quotas in UK is this: Program contractors produce and sell their own programs but also buy U.S. programs for use on tv in UK. With coming of second BBC-TV network in summer of 1964 and another commercial network in England, program contractors realize they are not geared to produce this volume of programs and look to more imports from America.

S.F. or Miami?

Although Democrats say selection of 1964 convention site is still wide open, insiders expect it to be contest between Miami Beach and San Francisco. Miami Beach has offered $600,000 to party, exclusive of "fringe benefits" but San Francisco told site committee last week it would top that figure (originally San Francisco bid $350,000). What disposition of Republcans will be isn't indicated, but networks would prefer conventions in same city because of expense factor.

Rating ratings

If statistics fly fast—or loose—when two major rating firms take stand in House investigation next week (see page 44), investigators will have top statistician in their corner. Dr. Herbert Arkin, professor of statistics at City College of New York and consultant to Price Waterhouse & Co. accounting firm, joined subcommittee staff last week. Dr. Arkin has never worked with ratings, he said, because they "are so dubious, tenious and contradictory that I've kept away from it." Not enough money is spent to do proper sampling in most broadcast measurements, he has said.

House investigation of rating services hasn't ceased just because hearings are underway. Investigators have been flying around country at night, questioning witnesses on record during day. Surge of information is being wired, phoned and brought to subcommittee by broadcasters encouraged by hearing to step forward. Frustrating portion of complaints are invalid, checking has shown, but some new material is being geared up. Notably silent, sources say, are advertising agencies.

Catv countdown

Catv operators, who have been contacted by officials of National Community Television Assn., are said to be virtually unanimous in support of minimal legislation that would establish federal jurisdiction over catv systems, opposed to state or local regulations. Of several hundred operators contacted, it's reported fewer than dozen opposed proposal, now being whipped into form by NCTA attorneys with collaboration of attorneys in office of FCC Chairman Newton N. Minow (BROADCASTING, Feb. 18).
WE'VE GOT A WAY WITH WOMEN

and it "brings home the groceries" for WJBK-TV advertisers

Channel 2 rings the bell with the gals who make the cash register ring... the big-buying 18 to 35 year olds with the ever-hungry young families to feed. That's what makes Detroit's No. 1 station the No. 1 choice of food advertisers. The big name brands and the big local chains get immediate, traceable results or Channel 2. You can, too! RATINGS HURT FREE ENTERPRISE?

Harris sees this result if Congress does not act

Friday testimony before House Special Subcommittee on Investigations put new light on ratings investigation, according to Subcommittee Chairman Oren Harris (D-Ark.).

Broadcast ratings don't have to be "a phony and a fraud to the public," Rep. Harris said after hearing Albert E. Sindlinger, president of Sindlinger \\& Co., Philadelphia. But, pleased chairman said, Congress would be jeopardizing free enterprise system if it permits industry to continue present "use" made of ratings without regard to accuracy.

Subcommittee begins third week of rating hearings today (Monday) with list of media, advertiser and performer witnesses (see page 44, 50), to be followed by the Pulse Inc. and A. C. Nielsen Co.

Without specifically criticizing other audience survey firms, Mr. Sindlinger said that his company over several years of research had determined that none of their methods give accurate results. He said Sindlinger has tried them all and uses telephone recall as the most effective. Sindlinger was the first to develop an instantaneous measurement—in 1948 with Radox, he said.

This consisted of permanent sample of 642 homes in Philadelphia, he said, but method was dropped after Nielsen representative learned location of sample homes from telephone company. He charged that permanent sample results could be rigged by locating and controlling homes involved. Also, Mr. Sindlinger said, permanent sample through use of diaries or Audimeters does not survey typical audience because respondents become "biased cooperators."

Two Clients • Sindlinger has 95 full-time employees and 380 field interviewers who take samples seven days a week and are closely supervised by home office, he said. Most of firm's surveys are taken for non-broadcasting clients with only 8% of revenue from radio- tv, he said. DuPont is only tv subscriber, paying firm $4,000 weekly for measurements of DuPont Show of the Week, and ABC Radio, which canceled Nielsen last summer, is only radio client, Mr. Sindlinger said. Firm does not make local measurements for stations.

Major fault lies with use made of ratings, he said. All five subcommittee members present praised Sindlinger presentation, which included 74-page appendix and 24 charts.

Rep. Harris told Mr. Sindlinger his testimony was "quite an indictment of the industry" but showed hope that broadcast ratings did not have to be "a phony and a fraud on the public."

Mr. Sindlinger told Rep. Paul Rogers (D-Fla.) that he would not object to federal licensing and uniform standards for rating services.

Ed Hynes, president of Trendex Inc., said his "relatively small" firm reports local radio listening and some national tv viewing through its telephone coincidental surveys but is not responsible for subscriber use in advertising.

Citing media ads in trade publications, subcommittee maintained that error variations in Trendex ratings showed many ad claims are unfounded in fact. There are "many uses" for which his reports should not be projected, Mr. Hynes said. Rep. John E. Moss (D-Calif.) described as "the most tortuous type of abuse the manner in which these are utilized."

Dr. Herbert Arkin, statistical consultant to subcommittee, criticized some common procedures used in telephone surveys and said some results could be off as much as plus or minus 30%.

Cox gets Senate approval to replace Craven on FCC

Kenneth A. Cox, FCC Broadcast Bureau chief, was confirmed as commissioner by Senate Friday. Action took place in executive calendar session. There were no objections.

Earlier in week, Senate Commerce Committee approved Mr. Cox's nomination, with only dissent by Sen. Strom Thurmond (D-S.C.) (see page 64). Mr. Cox plans to take oath sometime this week.

He succeeds T. A. M. Craven for remainder of Mr. Craven's current term, and June 30, and for full calendar term beginning July 1. Mr. Craven reached mandatory retirement age of 70 last January.

FCC names tv outlets which win renewals

FCC on Friday released list of stations whose licenses were ordered renewed in action in which commission instructed staff to ignore "6 to 11 p.m." question of local live programming in prime time (see story page 42). List includes 64 stations, but officials indicated others might be added this week. They include:

- Arizona—KJVA (TV) Yuma, KTVF (TV), KOLD-TV Tucson.
- Idaho—KLBN (TV) Kuna; KTVB (TV) Kuna.
- Idaho—KBLL (TV) Twin Falls.
- Texas—KTVH (TV) Amarillo; KZTV (TV) Waco.
- Texas—KTVB (TV) Lubbock; KTVH (TV) Killeen.
- Texas—KTVH (TV) Waco; KXAS (TV) Dallas.
- Texas—KXAS (TV) Dallas; KTXA (TV) Dallas.
- Utah—KUTV (TV) Salt Lake City.
- Utah—KSTG (TV) Salt Lake City.
- Utah—KTVW (TV) St. George; KTVX (TV) St. George.
- Utah—KSL (TV) Salt Lake City.
- New Mexico—KOB-TV Albuquerque.

Metromedia adds KLAC in $4.5 million deal

Purchase of KLAC Los Angeles by Metromedia Inc. for about $4.5 million is being announced jointly today (March 18) by Mortimer W. Hall, president of Hall Broadcasting Co., owner of station, and John W. Kluge, chairman-president of Metromedia. The deal is subject to FCC approval.

Metromedia recently bought KTTV (TV) Los Angeles for $10.4 million, subject to FCC approval (Broadcasting, Jan. 2). Metromedia, through its Metropolitan Broadcasting Div., also owns...
WEEK'S HEADLINERS

Charles C. Bevis Jr., assistant executive director of Assn. of Maximum Service Telecasters, Washington, D. C., appointed executive director of Assn. on Broadcasting Standards, newly formed group of over 50 standard broadcast stations. Mr. Bevis will assume his new position immediately at association's headquarters at 1741 DeSales St. in Washington. With over 25 years in broadcasting, Mr. Bevis is well known as radio and tv station manager. He was associated with NBC for 23 years, serving in various station and staff executive positions. Previous NBC assignments include general manager of stations: KOA Denver; WNBK (TV) (now KYW-TV) Cleveland; and WBUF (TV) (uhf outlet since relinquished by NBC) Buffalo. N. Y. He also served as general executive on staff of Charles R. Denny, who was at that time executive vp in charge of NBC-owned stations, Spot Sales, radio network and international divisions.

Edward A. Grey, senior vp in charge of media operations at Ted Bates & Co., New York, joins McCann-Erickson, effective April 1, as senior vp in charge of tv programming and media for New York office. Mr. Grey, who began his advertising career in 1936, held various media department posts at Newell-Emmett Adv., Albert Frank-Guenther Law, and former Biow Co. before joining Bates in January 1955 as media group supervisor. Later that year he was elected vp and associate media director, and in 1958, was elevated to senior vp and member of board of directors.

William R. Baker Jr., honorary chairman of Benton & Bowles New York, elected board chairman of The Advertising Council at organization's 19th Washington conference last week (see story, page 32). He succeeds Leo Burnett, chairman of Leo Burnett Co., Chicago, who remains on council board.

Michael H. Dann, vp, network programs New York, CBS-TV, appointed vp-program, replacing Hubbell Robinson, who resigns as senior vp-programs. Oscar Katz, vp network programs at CBS-TV from 1959-1962 and vp-daytime programs since July 1962, named to new post of CBS-TV vp-program administration. Mr. Katz's appointment announced by Mr. Dann after resignation of Alan D. Courtney as vp-network programs, position he held since July 1962. Mr. Robinson's resignation is as second of network's top program executive in past four years (see story, page 29).

For other personnel changes of the week see FATES & FORTUNES

and operates WNEW-AM-TV New York, KMBC-AM-TV Kansas City, WTTG (TV) Washington, WHK Cleveland, WIP Philadelphia, KOVR (TV) Stockton, Calif., and WTVF (TV) Decatur and WTVH (TV) Peoria, both Illinois. Howard E. Stark was broker.

Greater Boston loses again in ch. 5 fight

FCC last Friday denied request by Greater Boston TV Corp. that commission reconsider its grant to WHDH-TV Boston of four-month license to operate ch. 5 (BROADCASTING, Oct. 1, 1962).

Commission has granted until March 26 for filing of applications in competition with WHDH-TV's renewal application (AT DEADLINE, Feb. 4). Greater Boston was unsuccessful applicant for ch. 5 in original 1957 hearing.

Print loss is tv's gain, House counsel testifies

Major national advertisers raised their spending on tv by 8% over a five-year period, while they reduced newspaper buying by 5%. This information was placed in record of House news concentration hearing (see page 62) by Stuart Johnson, counsel for committee, at Friday session during re-examination of Stanford Smith, general counsel of American Newspaper Publishers Assn.

Johnson said 49 of top 100 national advertisers, responding to committee questionnaire (BROADCASTING, Jan. 28), indicated that in 1957 they put 39.78% of their money in tv and ran this up to 47.4% in 1961. During same period spending in newspapers went down from 23% to 18.08%.

DuPont awards to Smith, WFMT(FM) and KVOA-TV

WFMT (FM) Chicago, KVOA-TV Tucson, Ariz., and Howard K. Smith, ABC news commentator, were announced today (Monday) as winners of Alfred I. duPont radio & tv awards for 1962.

Awards will be presented at banquet in Washington, D. C., next Monday (March 25). Dean Gilbert Seldes of Annenberg School of Communications, U. of Pennsylvania, will be principal speaker.

NL&B executives gather 150 strong in Chicago

Some 150 top executives of Needham, Louis & Brborby, Chicago, and key officials of agency's New York, Hollywood and Toronto offices gathered at Chicago's Pick-Congress Hotel Friday-Saturday for first major reorientation-updating session to be held by agency in its history.

Fall broadcast plans also were previewed. Chicago offices were closed Friday. NL&B's tv-radio billings are about $24 million, over half of total handled by agency.

MBS announces three for affiliates board

Roger Beane, WSSV Petersburg, Va. (District 3); Gene Trace, WBBW Youngstown, Ohio (District 5); and Sherwood R. Gordon, KSDO San Diego (District 11) have won special run-off election for Mutual Affiliates Advisory Committee.

Contests in three districts had originally been tied. Mutual notified stations of vote Friday (March 15).

Results in other districts were announced last week.

SAG seeks 6% of gross for movies on pay tv

Proposal that actors employed in theatrical movies released to pay tv be given 6% of worldwide gross (less distribution expenses not to exceed 40%) will be made by Screen Actors Guild in negotiations to start March 25, SAG said yesterday (March 17).

Guild will also ask for advance of 75% to be paid at time of first release of any movie to pay tv. Present contract calls for producer to pay SAG 6% of world gross from use of theatrical pictures on free tv, less 40% distribution costs, but without advance payment.

Japanese color for $295

Japanese-made 16-inch color tv set is to be introduced in U.S. next fall to sell at $295 by Majestic Electronics Inc., Los Angeles. Made by Toshiba, set already is on market in Japan.
These shipping orders—they're getting longer and longer. So I calls up the Traffic Manager and says, "Look, old buddy, what goes with the shipping sheets?" He tells me that ever since the ratings came out, stations are ordering up these Warner Bros. TV shows like they was the only ones around. "No wonder," he says. "Maverick's right up there among the top ten off-network shows in markets like Los Angeles, Sacramento, Baltimore, Dallas-Fort Worth, Tampa, Indianapolis and others. Shows like Surfside 6, The Roaring 20's and Bourbon Street Beat are reaching more homes in many markets than network competition—in prime time yet." Then he gives me the back-buster. It's gonna be even worse when the March ratings show what that western strip—Maverick, Bronco, and Sugarfoot—does. Brother... do I hate ratings!

WARNER BROS. TELEVISION DIVISION
666 Fifth Avenue, New York 19, N.Y. Circle 6-1000

MAVERICK • SURFside 6 • SUGARFOOT • THE ROARING 20'S • BRONCO • BOURBON STREET BEAT • LAWMAN
a whopping 69% increase in three years

WTVV's total homes reached from 6 P.M. to 10 P.M. has increased steadily each year as shown in the following figures taken from the year-end ARB Reports.

25,500 in 1962
20,000 in 1961
17,800 in 1960
15,100 in 1959

WTVV operates on Channel 4 at full power from Alabama's tallest tower, 1549 feet above sea level.

WTVV serves nearly 200,000 homes in three states with the best CBS, ABC and local programming.

DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing

MARCH

*March 18—Western States Advertising Agencies Assn. dinner meeting, Sheraton-West Hotel, Los Angeles. Bob Klein and Alan Barzman, principals of Klein/Barz- man, commercial production firm, will speak. Ted Neole Jr. is program chairman. Marvin Cants, WSSA president, will preside.

*March 18—Extended deadline for comments in FCC inquiry into the objectionable loudness of commercial announcements and commercial continuity over om. fm and tv stations.

*March 18—Reply comments to FCC's proposed fm allocations table.

*March 18—Special hearing on import duties on video tape (see story, this issue) U. S. Tariff Commission, 9th & F Sts., N. W., Washington, D. C.

*March 19—Hollywood Ad Club luncheon meeting on color tv at NBC color studio in Burbank, Calif. Jack M. Williams, RCA Sales Corp. vp for advertising and sales promotion, will discuss color tv. Luncheon will be followed by a tour of the color studios. Door prize is a color tv set.

March 20—National Educational Television and Radio Center, spring meeting of program managers and station managers of affiliated non-commercial educational television stations. Park Sheraton Hotel, New York.

*March 22—Massachusetts AP Broadcasters Assn. meeting, Boston.

March 22-25—Spring convention of Arkansas Broadcasters Assn., Sam Peck Hotel, Little Rock. Speakers will be Blair Vedder, vice president and media director of Needham, Louis & Brotroy and Roy Moore, special agent, FBI's Little Rock office.

March 22-23—Arkansas AP Broadcasters Assn. meeting, Little Rock.

*March 23-24—Annual convention of the Intercollegiate Broadcasting System, Gould Student Center on the campus of New York University in the Bronx, New York City. Fred Ruef, vice president in charge of station administration, CBS Radio, will talk on "Seven Secrets of Success—Characteristics of a No. 1 Station." This convention follows the IRTS conference, March 21-22.

*March 25—Hollywood Ad Club Shirtsleeves session on "Creative Media Selling," 12 noon to 2:30 p.m., Hollywood Roosevelt. Emil Reisman, advertising manager, Gallenkamp Shoe Stores, chairman; Rick Rusk, associate producer, NBC Relaxacisor; David Blair, Bullock's department store; Robert Forestal of McNaughten, Laub, Forestal and Jeff Rogers of Honig-Cooper & Harrington will report on successful advertising ideas contributed by media salesmen. Jack O'Mara, TyB western manager, will preside.

March 25-28—Institute of Electrical & Electronics Engineers, international convention, New York Coliseum and Waldorf-Astoria Hotel.

March 26—Final date for the filing of applications for ch. 5 In Boston. Applications will compete comparatively with present W Về-4, TV.

March 26—Board of Broadcast Governors hearing, Ottawa.

March 27—Eleventh annual Management Conference of U. of Chicago, McCormick Place, Chicago. The one-day conference is sponsored by the Graduate School of Business and the university's Executive Program Club. Charles G. Mortimer, chairman of Columbia's School of Business, will speak at the evening conference banquet on "Developing a Climate Conductive to a Growth Economy."

*March 29—The Chicago chapter of Sigma Delta Chi (The Headline Club) dinner meeting, 6:30 p.m. (cocktails 5:30), Sheraton-Chicago Hotel. Walter Salinger, White House news secretary, will speak on managed news and other press-government friction.

March 29—Advertising Women of New York Foundation, World's Fair Ball, Grand Ballroom, Waldorf-Astoria Hotel, New York City. Cocktail service, 6:30 p.m.; dinner, 7:30 p.m.; dancing to Lester Lanin's orchestra from 8:30 p.m. to 2:00 a.m.

March 29-30—Spring conference of Sixth District (Illinois, Indiana and Michigan) of Advertising Federation of America, Sheraton-Chicago Hotel, organized by Chicago Federation Advertising Club, extends welcome to broadcasters. Speakers include AFA Board chairman Leonard Head, National Cash Register Co. and AFA's new president, Mark F. Cooper. Celebrity reception is scheduled March 29, 6-8 p.m., at Mid-America Club.

March 29-30—National Assn. of Educational Broadcasters Regional II conference, Tampa, Fla. "TV-Turned on to St. Petersburg" (educational ch. 3) is host station for conference and its general manager, LeRoy Lastinger, is conference chairman. Among the speakers are William Harley, NAEB president, and Richard Hull, of Ohio State U., NAEB board chairman.

*March 31—Board of directors meeting, Institute of Broadcasting Financial Management, 9 a.m., Blackstone Hotel, Chicago.

March 31—Assn. of Maximum Service Telecasters annual membership meeting, Conrad Hilton Hotel, Chicago.

*March 31—Annual meeting of the Assn. of Professional Broadcasting Education, Chicago. Dick Mendenhall, editorial director of WSB-AM-TV Atlanta, Ga., and Charles McDougal, head of radio-tv sequence at the University of Georgia's School of Journalism, will speak.

March 31-April 3—Annual NAB convention, Conrad Hilton Hotel, Chicago.

BROADCASTING, March 18, 1963
You’d expect to pay a nickel for such a nail

This tempered-steel nail will penetrate poured concrete.

1. It is shown three times actual size to clarify the details.

2. Notice the lengthwise fluting on the shaft: it prevents splitting, whether you are driving into concrete or wood.

3. The fluting gives the nail a screw-like grip. It won’t pull out.

4. The head will not split off. See how it is shaped to countersink itself on the final blow of the hammer.

5. Good as it is, you can buy a pound of these nails for 49¢. There are approximately 100 in a pound.

MORAL:
There is no such thing as a dull product. Only dull approaches to interesting products. What’s your problem?
“MIDDLE OF THE NIGHT”...
Kim Novak and Frederic March head an inspired cast in this intense drama that prize-winning author Paddy Chayefsky fashioned from his own Broadway success. It's another of the 73 great box-office hits, newly released for television, that have been added to the roster of the COLUMBIA POST-48's.

The COLUMBIA POST-48's are distributed exclusively by SCREEN GEMS, INC.
LEADS IN PROGRESS

WIBC's Jim Shelton and Easy Gwynn are seen before a photo of the nearly completed Northwest High School where they'll soon originate programs in WIBC's 13-year-old series of broadcasts from area high schools. Northwest is but one of 10 new schools opening in metropolitan Indianapolis this year. Nineteen more will receive major additions.

Expanding education in Indianapolis is just one of the many signs of solid growth. New commercial, industrial and government buildings are evident in all sections of the county. Apartment, home and shopping center construction abounds. This growth reflects a healthy, diversified economy with $30,000 gainfully employed.

LEADS IN AUDIENCE

WIBC long has dominated the radio scene in Indianapolis and Indiana. Thirty-eight daily newscasts, consistent editorials, music and personalities with widest popular appeal are combined in programming that has earned for WIBC the largest audience morning, afternoon and evening in Indianapolis and Indiana.*

workshop on international advertising. Hotel Plaza, New York.

April 18-20—Twentieth annual Alpha Epsilon Rho convention, Hotel President, Kansas City, Mo. Delegation of students of broadcasting from 32 universities.

April 18-21—Annual spring convention of Mississippi Broadcasters Assn., Broadwater Beach Hotel, Biloxi, Golf tournament on 18th. First business session at 1 p.m. on the 19th.

April 19—Michigan AP Broadcasters Assn. meeting, Lansing.

April 19-20—Annual convention of New Mexico Broadcasters Assn., Alvarado Hotel, Albuquerque. NAB President LeRoy Collins will be principal speaker.

*April 20—Seventh annual convention of the UPI Broadcasters Assn. of Connecticut, Yankee Silversmith Inn, Wallingford, Conn.

April 21-25—Ninety-third convention of Society of Motion Picture & Television Engineers, Traymore Hotel, Atlantic City.

*April 22-23—Conference on broadcasting and mental health, under joint sponsorship of National Assn. of Broadcasters and National Assn. for Mental Health, U. S. Hotel Thayer, West Point, N. Y. The conference will open with a luncheon at the Harvard Club in New York City on April 22 and from there will move to West Point by chartered bus. Conference co-chairmen are LeRoy Collins, NAB president, and Dr. William C. Menninger of the Menninger Foundation.

April 25-27—Annual convention of Fourth District of Advertising Federation of America, Cherry Plaza Hotel, Orlando, Fla. Speakers include: Ralston H. Collins, RCA, New York; Mark Cooper, AFA president; Whit Hobbs, BBDO, New York; Margo Sherman, McCann-Erickson, New York; Hobart Franks, Atlanta Journal and Constitution; Thomas Moore, ABC-TV, New York.

April 26—Pennsylvania AP Broadcasters meeting in Pittsburgh.

April 26—15th anniversary ball of Bedside Network of Veterans Hospital Radio & TV Guild, Plaza Hotel, New York.

OPEN MIKE

K&E's justifiable crowing

EDITOR: We're proud to have produced the world's best radio commercial (Broadcasting, March 4). One copy of this issue just doesn't seem to be enough to go around. Please send two additional copies for our files.—Alice M. Liddell, media director, Kenyon & Eckhardt, Boston.

(The radio spot for Hood Banana Split ice cream, K&E client, was judged the best radio spot in the Hollywood Advertising Club's International Broadcasting Awards.)

Honors to salesmen

EDITOR: Our friends in the insurance business can show us a thing or two about honoring their salesmen. I refer specifically to the "Million Dollar Round Table."

Has it ever been suggested to you
Baseball's great center fielder, S. F. Giant Willie Mays, displays his ease and grace in robbing another batter of a sure hit. San Francisco Examiner photographs by Charlie Doherty.

**SPORTS...**

Live and direct. That's what sports fans in the San Francisco-Oakland market expect (and receive) from KTVU. And sports is what they watch in growing numbers. Over 1,250,000 viewers per average minute watched the Giants-Dodgers games on KTVU last September. Northern California's top sports events are seen on KTVU—Seals Ice Hockey, Warriors NBA Basketball, the Bing Crosby Golf Tournament, College Basketball, Wrestling and Roller Derby—all are live and direct on KTVU. Just another reason why KTVU is the nation's LEADING independent television station.

that perhaps Broadcasting Magazine could have a "25-Year Radio Round Table," with strict membership requirements?

I'm only 39, [but] I have been in radio continuously for 23 years and I'm proud of the time sales made in that period.

How about helping us get more class in the wonderful radio business.—Walter H. Stamper, commercial manager, WAPO Chattanooga, Tenn.

Back to Oct. 15, 1931

EDITOR: ... I would like to apprise your readers of the fact that our institution is pressing forward in the accumulation of materials dealing with the broadcasting industry. We are particularly desirous of obtaining for our collection a complete file of your magazine. And the assistance that either you or your readers can give will be warmly appreciated and of enormous use in the years ahead.—Arthur Knight, curator, Hollywood Museum, 8833 Sunset Blvd., Los Angeles 69.

(Except for a few bound volumes that are a permanent part of our library, there are no extra complete files for the 25½ years we've been publishing. However, we pass along the request in the hope that some of your readers may be able to help Mr. Knight).

What's so funny?

EDITOR: With regard to your March 4 story on the NAB's annual conference of state association presidents, the picture captions infer that these distinguished gentlemen and their invited guests were discussing our problems and matters pertaining to broadcasting.

By the facial expressions in the pictures, I deduce that some pretty good jokes and stories were told at the conference, in addition, of course, to the transaction of business matters.—George Weiss, president, WBBQ-AM-FM Augusta, Ga.

Dissents on Belden report

EDITOR: Eagle Pass, Tex., is one of the Mexican-American markets described in your Feb. 28 issue. How the [Belden] report can take such a little sampling and get any information whatsoever on the listening and buying habits of the Mexican-American people is beyond me. A sampling of Los Angeles and San Antonio gives no indication of the people along the Mexican border where the [Spanish-speaking] population runs as high as 70%. We have been operating border stations for ten years and living and dealing with these people very closely. We think they are the finest, most loyal listeners that any radio station could have.

The survey showing 83% of the homes having radios and 87% of the homes having television is absolutely absurd. Also, we find that our local advertisers prefer English to Spanish advertising by a 60-40 ratio.—E. J. Harpole, general manager, KEPA Eagle Pass, Tex.

Provides all the answers

EDITOR: I want to congratulate you on the professional job that has been done in compiling such a wealth of referable data in the 1963 Yearbook.

Our broadcast people keep this Yearbook on top of their desk for quick and handy reference to answer the myriad of questions that arise on a most frequent basis.

Because of its wide editorial scope it is constantly referred to in answering such questions as station ownership, NAB codes, ownership transfers, audience composition, etc.

If I could suggest one area of improvement, it would be in the area of added technical details which you handle so professionally.—Marion Harper Jr., president, Interpub Inc., New York.

Another for radio drama

EDITOR: I have to express 100% agreement with John Stolz (Open Mike, March 4) that radio drama is not out of place if properly programmed. For a long, long time I have felt the same way. Drama could serve a definite purpose in today's radio.

There must be a number of masters stacked in dusty recording rooms. I know the writers are available and the actors are ready and willing to help revive a part of broadcasting that has been missing too long.

Sponsors are receptive to the idea of radio drama. The question is: are the broadcasters ready to leave what has become the beaten path and program something different.—Ken Bichl, president, Cleveland local, American Federation of Television & Radio Artists.

Straightening the record

EDITOR: In your March 4 CHANGING HANDS, there are several mistakes. KAVE-AM-TV was sold to John Dema. The majority stockholder is Mrs. Edward Talbott since Edward Talbott passed away Jan. 19. And the stockholders of KAVE-AM-TV have no interest in KMOD-TV, which is a Trigg-Vaughn station.—Tom Wiseheart, vice president & general manager, KAVE-AM-TV Carlsbad, N.M.

(The references to Mr. Talbott as chief stockholder as well as the inclusion of KMOD-TV in the item were picked up from an erroneous release from the broker.)
A circle of admiring faces. Indicative of the very special way children (and their approving mothers) think of Jerry Haynes. He’s WFAA-TV’s “Mr. Peppermint,” now in his third year of making big sponsors and little viewers happy. He’s one more reason why WFAA-TV is closest to the Dallas, Ft. Worth market.
Television packs power into personal salesmanship

“Believability” may have become an overworked word in these skeptical times in the intensely competitive world of advertising and marketing.

But we at Norge have never been more convinced of the selling power of a personality who possesses this elusive trait and can communicate it to television viewers. This conclusion comes from our experience as a participating sponsor of Lunch With Ernie, the ABC-TV noontime program which stars Tennessee Ernie Ford.

The results have been extremely gratifying not only to us but also to Norge dealers and distributors throughout the country. They prove once again that effective selling is still very personal, very individual—one speaking to just one other, though the listener may be multiplied millions of times through the magic of our newest medium.

Ad Battleground • In the appliance industry consumer confidence in the quality and performance of the product is absolutely essential. It is no easy task to convey this quality of reliability to a viewer who is bombarded with competing claims throughout the day.

Norge has been a broadcast advertiser for many years, going back to the early days of radio. The use of the broadcast media is an important part of our overall marketing planning.

The appliance industry generally has been a heavy user of both radio and television, particularly at the local level. Norge is no exception. A substantial percentage of our marketing dollar goes into the broadcast media where Norge now spends more than $1 million a year, including cooperative money.

Until the fall of 1962 Norge for several years had confined its television activity on behalf of our appliance line to spot schedules. These were productive. But we also were aware of the benefits of association with a program on a continuing basis where this continuity enhances our product story.

This opportunity came several months ago with the Ernie Ford Show as it was then called. At that time the program was seen in most markets from 11:30 a.m. to noon. It seemed to us that both the time period and the format were made-to-order for us to reach our prospect, the homemaker, in an excellent atmosphere.

Personal Touch • Even more important, however, was the personality who was to be the star of the program. Norge then had only recently offered a two-year parts and service warranty through our dealers as evidence of our faith in the quality and reliability of our automatic washers. We felt that we had to be associated with a performer whose own reputation would authenticate the story that we wanted to tell.

Perhaps more than any other personality, we believe, Tennessee Ernie Ford not only met but exceeded this qualification. In making our decision we took into consideration Mr. Ford’s integrity in his approach, not only to the program but also to the products to be advertised on that program. We knew that a part of his standard procedure is to use and analyze the products himself to test product claims before accepting commercial assignments. We considered, too, Mr. Ford’s previous association with quality products of other well-known and respected manufacturers.

We became a participating sponsor for an initial 13-week period in the fall and renewed our sponsorship this February for another 13-week period through May in 173 markets. Our participation in the program and Mr. Ford’s own unique way of presenting Norge appliance commercials have been most important, we believe, in helping to produce the sales gains which we have enjoyed.

Selling Climate • Now called Lunch With Ernie and in the 12:12-13:00 p.m. period, the program has steadily built a loyal audience. The free-and-easy format and Mr. Ford’s relaxed handling of audience and guests, we think, provides an atmosphere that increases the viewer’s receptivity to our commercials.

While some advertisers would prefer their commercials delivered “as is,” Norge prefers that Mr. Ford handle our commercials in his own refreshing way. For example, we certainly don’t object to his saying “sloshing around in there” in place of “agitation” when he describes automatic washer features. We also have benefited from occasional sketches that Mr. Ford has built around our products, sometimes just preceding our scheduled commercial for an automatic washer or dryer.

Mr. Ford’s obvious enthusiasm for the products has had a marked effect on the enthusiasm of our dealers and on all of us as well. Many of our distributors and dealers have purchased tie-in spots in local station availabilities to get extra impact from the national program in their own communities.

We also have prepared program-related ad mats for use as drop-ins in local newspaper advertising and have provided dealers with tie-in window banners and other in-store materials. We strive to obtain the fullest merchandising profit possible.

At Norge we also have called attention to our participation in this program through an extensive trade advertising schedule. Although our ads do not quote Mr. Ford or imply his personal endorsement of our appliances, they do employ his vernacular to emphasize how effectively he is selling Norge products on behalf of our dealers.

Dealer Response • Norge distributors and dealers are enthusiastic about our association with the show. Mr. Ford has made kinescopes for use at distributor-dealer meetings and his “appearance” via such film was a highlight of a recent Norge dealer trip to Spain. These filmed chats with the distributors and dealers employ the same friendly approach that is so effective with the viewers of the program.

Our participation in Lunch With Ernie currently is emphasizing our matching “Touch ‘n’ Wash” washer and “Touch ‘n’ Dry” automatic dryer. These two new laundry appliances feature simplified controls as contrasted to a multiplicity of buttons. During the next few weeks Norge refrigerators will be the subject of our commercials. And we know they’ll move, too. They can’t miss with the power that TV packs into personal selling.

James D. (Dan) Dougherty is vice president in charge of domestic appliance sales for the Norge Div. of Borg-Warner Corp., Chicago. He directs the national sale of Norge home appliances through 87 independent distributors and 10,000 retailers. He joined Norge in 1954 and has been national refrigerator sales manager, field sales manager and district sales manager for Montana, Oregon and Washington. Before joining Norge he was with F. B. Connelly Co. of Oregon, Portland.
Why buy St. Louis?

DIVERSIFICATION ... the most highly-diversified major market in the nation ... delivering consistent, stable purchasing power!

WAGES ... a steadily-employed labor force, earning wages 22% higher than the national average ... more sales potential for you!

GROWTH ... 2,126,000 sales prospects in the metropolitan area alone—a 45% increase since 1930 ... new, growing families with new, growing needs!

BUYING POWER ... $4,748,209,000 in net effective buying income ... a 67% increase in ten years!

DYNAMIC DEVELOPMENT ... the largest, most dynamic urban-redevelopment plan in the nation ... a rebirth of civic energy that has won the attention of the nation!

PENETRATION ... the nation's easiest major market to penetrate, through the "Voice of St. Louis," each week reaching 77% of the homes in this thriving market ... the greatest percentage of penetration delivered by any radio station in America's top ten markets!

PROGRESS ... is St. Louis!

BIG BUYERS LIKE '63-'64'S LOOK

Agencies think pilots promise many program innovations

ABC-TV's daring reshuffle of line-up causes most comment

NBC-TV keeps tested formats; CBS-TV has advantage of strength

Agency executives entrusted with the investment of close to half a billion dollars a year in network television think the 1963-64 season's schedule may be the most exciting in years.

Based on pilot films they've seen and scripts they've read, they feel that, taken as a whole, the network's program blueprints for next fall promise a rare degree of originality and innovation.

This consensus emerged clearly, although by no means unanimously, from an informal survey conducted by Broadcasting among top programming and media executives at leading advertising agencies. These agencies placed more than $480 million in billings for time and talent on the three networks last year.

Record Buying • The judgments these executives expressed, however alike or dissimilar in details, are the same judgments on which, for the most part, they are now and for several weeks have been buying into the new schedules at an unparalleled rate (Broadcasting, Feb. 25, et seq).

The patterns of their spending testify to their enthusiasm for the programs they have bought or optioned—and their lack of it for those they have abandoned or refused. In the survey, however, they gave their views on the whole spectrum of network prime-time programming—including specific new shows that struck them as unusually promising or unusually drab—whether they were involved in the buying or not.

They also gave their opinions on how the 1963-64 schedule changes will affect the networks themselves, with this consensus:

• Next season should be a critical one for ABC-TV, which of the three networks will be programming the greatest number of new prime-time shows.
• CBS-TV should once again dominate the three networks in the nighttime, although a few agency programmers felt that its lead may be cut.
• NBC-TV was seen as banking heavily on tested formats, with little "new excitement" going into its schedule through the new series now being planned. NBC seemed to out-rank ABC for second spot, however, some authorities thought this race would be a toss-up.

ABC-TV was credited almost universally by agency men with attempting the most daring moves, deviating markedly from its previous pattern of westerns and action-adventure. The network was at a critical point, executives felt, and sharp breaks from its previous strategy may be urgently needed.

CBS-TV was regarded as programming from strength, having approximately five and one-half weekly hours to replace and, agency men concurred, if wisely elected to substitute with a balanced diet of name personalities, historical drama and situation comedy. They believed that CBS-TV's overall balance and programming strength have been preserved.

There was less agreement on the soundness of NBC-TV's moves. Rated this season somewhere between CBS-TV's resounding success and ABC-TV's generally "poor" showing, NBC-TV has not, in the view of many agency programming directors, planned enough different moves to alter its competitive position significantly next season.

Waiting Game • NBC-TV, some warned, has only delayed a decision on what to program on two important nights as a result of planning motion pictures on both Saturday and Monday nights. Other critics of the network's plans saw a proven pattern of anthologies (such as that used in the past for Dick Powell Theater) becoming the norm at NBC-TV—for example, the anthologies that will back the Bob Hope and Perry Como programs, as well as fill the new Richard Boone hour.

But NBC-TV's supporters contended it has other strengths going for it: name talent, some musical-variety formats carried over and strong station lineups, all of which appeal to advertisers (for example, the Chrysler Corp. sponsorship next season of the Bob Hope hour).

Most of the respondents cautioned that prognosis is a risky business. Privately, many confided that they hoped that ABC-TV particularly has hit upon a workable programming formula, pointing out that stiffer competition is needed to upgrade tv programming as a whole and build confidence among advertisers. Several officials noted that in times of a "seller's market" (in which one network is in the driver's seat), programming tends to suffer and the medium as a whole is depressed.

Top Program Picks • New programs regarded by several agency men as "good," "excellent" or of possible "hit caliber" were My Favorite Martian on CBS-TV; Arrest and Trial and Jamie McPheeters on ABC-TV and Mr. Novak on NBC-TV.

New shows also receiving favorable mentions were Greatest Show on Earth and Stand By on ABC-TV; Grindll on NBC-TV and the Adventures historical drama series on CBS-TV.

Among newcomers that were considered doubtful or uncertain because of time period or for format were East Side, West Side on CBS-TV; the Richard Boone-Odets anthology series; the Robert Taylor series; and The Lieutenant on NBC-TV, and The Breaking Point on ABC-TV.

There were wide variations of opin-

SPECIAL REPORT
The Ohio River Valley
begins page 75
ion toward most of the new shows, but four new variety entries—the Danny Kaye and Judy Garland shows on CBS, and the Jerry Lewis and Sid Caesar-Edie Adams programs on ABC-TV—received almost unanimous approval. The belief was strong that these personalities are all sufficiently skilled to come through with hit shows, but...

It was also clearly felt that all three will need strong material, week in and week out. In the case of Miss Garland, most agency men questioned said they had serious reservations about her health and temperament being geared to a one-hour show each week.

The consensus was that Bob Hope on NBC-TV and Phil Silvers on CBS-TV would do well. There was less confidence that the Como Kraft Theatre would prove as successful as the weekly Como series in the past.

Several executives commented that they expected CBS-TV to receive its most rugged competition on Monday and Friday nights, but to remain on top on other evenings.

**ABC-TV Promising**  
In the agency executives’ reactions, ABC-TV stood out unquestionably as the network with the most promise for the biggest gains—if Success with its new lineup or a substantial portion of it would get ABC off and running, in their opinion. But they also were cautious, some going so far as to suggest that enthusiasm for ABC’s plans consists partly of hope that the network will do well, in order to preserve and strengthen three-network competition.

Richard A. R. Pinkham, senior vice president in charge of media and programs at Ted Bates & Co., said his agency was placing its money on the network (CBS-TV) that it expects to “pick up the marbles” next season. Bates has moved an estimated $20 million of Amoco-Home Products billings from ABC-TV to CBS-TV and is placing still more on CBS.

George Polk, BBDO vice president in charge of program planning, mentioned ABC-TV as the innovating, exciting network for next season but warned that the approach to advertisers is one that will get them “slow dollars.” He described the ABC-TV approach to new shows as one that is selling hope and expectation (through pilots) as compared to CBS-TV’s offer of name value and programming in the Judy Garland Show and Danny Kaye Show.

**Often-Mentioned Programs**  
Here are some of the new ABC-TV programs mentioned most often as holding high promise and giving an innovating and sometimes “daring” look to the ABC schedule for 1963-64:

*Greatest Show on Earth,* which will be hour-long and in color. It banks on the showmanship and background of

**Fitting in the pieces**

ABC-TV last week continued to show itself as the least "set" network in its programming plans for the next season.

Topping the news of shifts and revamps was the report that *Voice of Firestone,* now in its first season as a return series on Sunday at 10 to 10:30, will be dropped from the prime-time ABC-TV schedule in the fall. The network appeared to be giving a new quiz show, 100 Grand, the first big-money quiz since the rigging revelations in 1959, the nod for the time period.

Other "talked about" changes at ABC-TV: *Anus Burke* in at 8:30-9:30 on Friday and *77 Sunset Strip* in 7:30-8 that same night, giving that show one another season (reportedly 20 new episodes are involved in the arrangement with Warner Bros.): *Please Standby* headed for a 7:30-8:30 berth on Monday, and *Farmer’s Daughter* (half sold to Clairlo) into the Friday, 9:30 period.

Sid Caesar and Edie Adams each will star in a series of half-hour programs that will alternate in the Thursdays 10-10:30 period on ABC-TV, returning the 10:30-11 p.m. period to station time. Consolidated Cigar Corp. (Dutch Master Cigars), through Papert, Koenig & Lois, will sponsor Sid Caesar, and Consolidated, for Murriel cigars, has signed through Lennen & Newell for the Adams show.

ABC-TV made firm a new series that will star Robert Taylor in dramas based on the activities of the U. S. Dept. of Health, Education & Welfare, for Thursday, 7:30-8:30. Also on ABC-TV, Kraft Foods made final its place in the Thursday, 10-11 p.m. slot on the schedule. *Joey Bishop* stays on Saturday at 8:30-9 p.m. and *Jack Paar* remains in the Friday, 10-11 period. Both shows were to be shifted before Kraft’s deal had been set. The Kraft hour will be filled by seven Perry Como specials and a new hour mystery-suspense drama series (Closed Circuit, March 4). *Espionage* moves into the Wednesday 9-10 period vacated by Kraft.

ABC-TV also claims *The Virginian* and—Dr. Kildare sold out for the next season and The Eleventh Hour and The Richard Boone Show receiving substantial orders.

the circus (mostly shooting on location in various locales to fit the storyline of a circus on the move).

**The Fugitive,** an hour show based on the adventures of a man hunted for killing his wife—a murder the audience knows he did not commit. Agency programmers believe this could be a bold and interesting show with good possibilities. They see it as a “difficult premise” with danger of becoming “overly complicated,” but the pilot was impressive, suggesting high ratings.

*Please Standby,* based on science fiction (as in the old Lights Out programs). It could be a “big hit or a big bomb,” according to one programmer, but Lee Rich, senior vice president in charge of programming and media at Benton & Bowles, thought it “good and well done and different.” Mr. Rich predicted—as did several other agency executives—that ABC-TV has a good opportunity to become the “no. 2 network.”

ABC-TV additionally has Jerry Lewis slated for two hours on Saturdays, 9:30-11:30 p.m., an unusual move and one that agency officials find difficult to assess because of the length of the program and the mid-to-late-evening time it will occupy.

A totally new concept is employed in *Arrest and Trial,* each 45 minutes in length and scheduled for back-to-back presentation on Sunday evenings. The shows, by Revue Productions, can be viewed as a “package”—the first program deals with a man’s arrest, the second with his trial (Perry Mason style—but viewing one is not dependent on also seeing the other, since the storyline of each is self-contained.

**Burnett picks up P&G’s Lilt, Pert from Grey**

Leo Burnett Co., Chicago, has been appointed agency for Procter & Gamble products Lilt (home permanent) and Pert (shampoo) in a switch from Grey Adv., New York, effective as of June 8.

**Ovalline drops Tatham-Laird**

Ovalline Food Products Div. of Wander Co., Chicago, notified Tatham-Laird there last week that in 90 days Ovalline’s $1.8 million budget, spent virtually all in television, will go to another agency. Tatham-Laird has had the account since 1954. Ovalline officials said the advertiser has invited several agencies to make presentations which are to be completed this week.
Hubbell Robinson resigned as CBS-TV programming chief last week and Michael H. Dann was appointed to take over his responsibilities.

Mr. Robinson quit his chief program post (senior vice president-programs) over the March 8 weekend. James T. Aubrey Jr., CBS-TV president, on March 11 announced a replacement: Mr. Dann, who had joined the network in the spring of 1958 as vice president, network programs—New York.

Second Trip • Mr. Robinson had left CBS-TV once before—in 1959, when he resigned as executive vice president, programming to enter independent TV program production. The post went to Oscar Katz, who had been in charge of daytime programs.

When Mr. Robinson returned to the top program job in March 1962, Mr. Katz resumed his daytime responsibilities. Last week Mr. Dann, who had replaced below Mr. Katz when the latter was CBS-TV's No. 1 programmer, announced Oscar Katz's promotion to the No. 2 spot as vice president, program administration.

Out of the second-in-command position went Alan D. Courtney, who was vice-president-network programs. Mr. Courtney's resignation followed Mr. Robinson's. The two men had been associated when Mr. Courtney was a vice president at MCA TV and MCA acted as a sales agent for Mr. Robinson's production firm, which was responsible for "Thirler and 87th Precinct" on NBC-TV. Mr. Courtney joined CBS-TV last summer, a few months after Mr. Robinson had rejoined.

Mr. Dann's broadcasting background extends from a post in the NBC publicity department to successively higher jobs in programming at NBC-TV and later at CBS-TV. At CBS-TV, he has made the New York origination flavor more evident than has been the case at the two other TV networks.

Mr. Dann served at NBC a total of nine years, his top executive posts there including director of the program department and vice president in charge of program sales.

Mr. Robinson, when asked about his second resignation from CBS, said only that there was a difference over policy and that he was going to take a vacation. An unconfirmed report said Mr. Robinson may again produce network TV programs.

Mr. Katz entered programming from the CBS research department, which he joined in 1938. From August 1956 to 1959, and again from July 1962 until this month, he served as CBS-TV's vice-president-daytime programs.

Mr. Robinson's first CBS association was marked by some of TV's first advances in program entertainment. At that time Mr. Robinson drew attention for bold program innovations such as the 90-minute "Playhouse 90" drama series.

Agency appointments...

* Ghirardelli Chocolate Co., San Francisco, has appointed Fletcher Richards, Calkins & Holden, that city.

* New England Confectionery Co., Cambridge, Mass. (Candy Cupboard and Page & Shaw chocolates and Necco candies), has appointed Wilson, Haight & Welch Inc., Hartford.

* W. F. Young Inc., Springfield, Mass., makers of Absorbine and Absorbine Jr. Liniment, has appointed Ted Gottshelf Assoc., New York, as its new advertising agency. The Young account, which bills a reported $2 million annually (about half in broadcast), has been a J. Walter Thompson client since 1936.

* Care, new liquid bleach product from Texize Chemical Co., Greenville, S. C., has appointed Venet Adv., Union, N. J., as its advertising agency. An introductory campaign, with $100,000 in billings, will begin in May on radio and TV in the New York area.

Business briefly...

Xerox Corp., Rochester, N. Y., has bought full sponsorship of two NBC-TV public affairs programs—"James Riddle Hoffa and His Teamsters" (Mon., April 1, 10:11 p.m., EST), and "A Visit to the Kremlin" (Tues., May 21, 9:30-10:30 p.m.). In addition, Xerox will co-sponsor, with Upjohn Co., "An Encyclopedia of Communism" (Wed., April 10, 7:30-9 p.m.). Agency: Papert, Koenig, Lois Inc., New York.

Hartford Insurance Group, Hartford, Conn., has bought NBC-TV's "Baseball Preview," Fri., April 5 (9:30-10 p.m. EST). Hartford is also buying participations in NBC-TV's Saturday and Sunday "Baseball Game of the Week." Agency: McCann-Marschalk Inc., New York.

Buick Div. of General Motors Corp., through McCann-Erickson Inc., will sponsor a two-hour live telecast of the Portland (Ore.) Rose Festival parade on Saturday morning, June 15, on a special 11-station Pacific Northwest TV hookup. KGTV-TV Portland, KVAL-TV Eugene, KIMA-TV Yakima, KBS-TV Medford, KEPR-TV Pasco, KOTI (TV) Klamath Falls, KLEW-TV Lewiston-Clarkston, KPIC (TV) Roseburg, KCBY-TV Coos Bay.

Rep appointments...

* KTVI (TV) St. Louis: H-R Television Inc., New York, as national sales representative.

* WTAG LaGrange, Ill.; WYZE Atlanta; WLW Nashville; WGMA Ft. Lauderdale, and WJMY-TV Allen Park-Detroit; Vic Plano Assoc., New York, as national representative.

* WINN Louisville, Ky.: George Hollingbery Co. as representative.

* KCBD-TV Lubbock, Tex.: Blair Tel-
Toiletries, toilet goods—leading TV network buyers

Advertisers of toiletries and toilet goods placed the most in gross time billings of all advertiser product categories on the television networks last year.

These advertisers, according to Television Bureau of Advertising figures reported today (March 18), were responsible for nearly $148 million, an increase of over 21% ($121.6 million in 1961). Food and food products advertisers came in as a close second by registering more than $133.6 million, a 4.2% gain over the $128.2 million-level set in 1961.

A total of $798,808,138 in gross time billings on the networks had been reported for 1962, an increase of 12.2% over the previous year (Broadcasting, March 4).

Also released by TVB were leading network advertisers and top brands in the fourth quarter of 1962.

Other product classes which had substantial gains in 1962: insurance advertisers billing more than $15.7 million, up 40.5%; advertisers of confectionery and soft drinks at over $24.1 million, a 29.6% gain, and sporting goods and toy advertisers billing more than $10.2 million, a 78.2% increase.

In the fourth quarter, Procter & Gamble Co. had a gross time billing of over $12.1 million, and Anacin led the brands with nearly $3.4 million in gross billing.

Computer fault causes error in ARB report

The American Research Bureau last week said a fault in computer procedures caused an error in tabulations of ARB’s “family size” data contained in supplementary demographic reports covering the period of Nov. 7, 1962, to Dec. 4, 1962. The reports were sent to clients two weeks ago.

ARB said that within 24 hours of the discovery, clients were notified and requested not to use the particular data in question.

The research firm said it had established the error to be in computer procedures rather than in actual computer calculations and that it had taken “immediate” steps to “re-orient” procedures to protect against a recurrence.

Other demographic data contained in the reports are reliable and usable, ARB noted, and do not affect local market reports. The supplement was issued for all markets. Jack L. Gross, manager of agency services for ARB in New York, said the “difficulty was encountered in only a very small portion of the total data distributed to ARB clients.”

How to hold 'em past the news!

We might have titled this: how to increase your audience five minutes at a time. It isn't quite as catchy but it does sum up the strategy of our featurized programming.

What we have done is to program short topical features throughout the day. Coming before, after, and around the scheduled news, these timely features keep listeners the way we want 'em — interested.

With the exception of funny-men Bob and Ray, all talent is home grown.

When you have people on your staff like Julie Benell (Woman's Editor) or Murray Cox (Farm Director), you don't need anyone else.

Hormel recently added another chapter to Julie's success story by giving her a deluxe high-priced ham to sell. You'd have to hear a sample tape to appreciate the impact she added to sales and distribution. Suffice it to say, Hormel has happily increased her exposure about 30%.

Another tape we'd like you to hear proves that farm news can interest a large urban as well as rural audience. At least when it's handled by Murray Cox. His candid comments on the U.S.D.A. . . . his explanation of fluctuating livestock prices . . . his interest in farm youth . . . make him a much listened-to personality.

Characteristic of all regularly scheduled segments: business news, weather, sports, entertainment, travel, etc. is the way they're put together by WFAA's staff. We persist in the theory that we're talking to mature, intelligent adults. Whether it's food for thought or tonight's dinner, we accent fact, not fancy.

In this way we can currently bill ourselves (rather modestly) in the local area as the station with “news more people quote.” When you come right down to it, can you think of a better framework for your product?

$40 million in public service time

RADIO-TV MAKE BIG CONTRIBUTION TO AD COUNCIL

Radio and television media and advertisers contributed well over $40 million in free time last year to government-sponsored public service campaigns, according to an analysis of figures compiled by the Advertising Council. Members of the council met March 13-14 in Washington with President Kennedy, Vice President Lyndon Johnson and other administration officials.

The council has served as clearing house for government use of media on a public service basis since early in World War II. The two original campaigns, started in 1942, were devoted to U. S. Savings Bonds and the Smokey the Bear forest fire-prevention campaign. Among government agencies participating in donated media facilities are the Departments of State, Defense, Commerce, Treasury, Agriculture and Health, Education & Welfare, Public Health Service, Census Bureau, Peace Corps and the President's Council on Youth Fitness.

On behalf of private groups, broadcasters have donated time for traffic safety, higher education, mental health, Radio Free Europe and religion.

Last week's conference heard first-hand reports from government leaders who participated in question-answer sessions devoted to issues of the day and to national problems which might be alleviated by public-interest advertising campaigns.

At a meeting last Tuesday (March 12) of the council's directors, William R. Baker Jr., honorary chairman of Benton & Bowles, New York, was elected chairman of the board of the Advertising Council. He succeeds Leo Burnett, chairman, Leo Burnett Co., Chicago, who remains on the council board.

Albert L. Cole, general business manager of Reader's Digest, and George H. Gribbin, board chairman of Young & Rubicam, were elected vice chairmen. Edwin W. Ebel, vice president of General Foods Corp., was re-elected to a vice chairmanship.

Theodore S. Repplier was re-elected president of The Advertising Council.

Rayette Inc. plans radio-tv campaign

Rayette Inc., St. Paul, Minn., will spend an estimated $1.3 million in radio and television this year. The plan for radio-tv spending, which will place Rayette in broadcasting for the first time on this scale, comes with the appointment of a new advertising agency, Taplinger, Gladney Co., New York.

George Barrie, president of Rayette, a cosmetic firm, announced the appointment last week. The former agency was Milco Inc., Miami, Fla.

Advertising emphasis is planned first for two Rayette lines now in the retail market. The products are Acqua Net and Trol. Others will be budgeted as the advertising program progresses. Print advertising as well as radio-tv is planned in the campaign.

Rayette, it was learned last week, will enter radio and television through spot purchases, and may soon enter network tv. First radio use will open by April 5 as a "lead-in" announcement to capture product news and excitement and then tv a few weeks later for demonstration and sell.

Rayette at present is planning on long-term usage of spot radio, perhaps as long as 52 weeks. The spot thrust in tv will encompass some 26 to 39 weeks.

The company entered the retail market early last year with Acqua Net hair spray, which is already a leading retail sales item. Rayette formerly manufactured and distributed supplies and equipment for professional beauticians and for barbers.

Taplinger, Gladney is a new agency in business over the past five months. It now bills at a more than $3 million annual rate, and has Lucien Piccard watches, Du Vince fine men's jewelry, and Balenciaga perfumes, among other accounts. Rayette has been billing an estimated $1.5 million.

Hecht's biggest pitch

The biggest television advertising campaign in its history will be started Wednesday (March 20) by the Hecht Co., Washington, D. C., exclusively on WTOP-TV, in that city.

The promotion, which marks the department store's 67th anniversary, will use 170—10, 20 and 60-second spots over a 10-day period. Hecht's will also sponsor The Steve Allen Show in its entirety March 22, and plans to use video-taped spots on the show featuring Mr. Allen and WTOP-TV personalities.

Henry J. Kaufman Assoc., Washington, is the agency handling the campaign.

RCA Sales spending record amount in '63

A record-high advertising and sales promotion campaign is planned by RCA Sales Corp. for the first half of 1963, according to J. M. Williams, vice president of advertising and sales promotion.

Special television and radio commercials featuring portable merchandise have been developed for RCA Victor distributors and their dealers. RCA has also prepared radio advertising featuring a sales message for its "space age" sealed circuitry.

In addition, Mr. Williams said, RCA is spending "substantially" more money in its print advertising for color tv than it did in the first half of last year.

New radio-tv rep firm announced in New York

A new radio and television representation firm, Roger O'Connor Inc., has been formed in New York by two former officials of the Bolling Co. Principals are Roger O'Connor, who was vice president of tv sales, and Gary Eckard, formerly director of research and promotion at Bolling.

Mr. O'Connor's career in broadcasting, which covers 20 years, began with media buying at William Esty Co. and includes stints with ABC and CBS network sales. Before he joined Bolling, he was associated with The Katz Agency in tv sales.

Mr. Eckard was vice president of Charles Harriman Smith Assoc., broadcast research consultants, before joining Bolling.

Offices of the new firm are at 270 Park Ave. Phone: TN 7-9595.

Johnson back with Red

Johnson's wax has announced renewal for the tenth year, of its contract with Red Skelton. The star is set for next fall on CBS-TV in the Tuesday 8-9 p.m. spot through Foote, Cone & Belding, Chicago.

Sales prove Lorillard's ad effectiveness

TOBACCO FIRM SETS NEW RECORDS THROUGHOUT YEAR

"By the only yardstick that matters—sales—our advertising is effective," Morgan J. Cramer, president of P. Lorillard Co., told the Boston Security Analysts Society last week.

"In terms of sales, 1962 was the most successful year in our long history," said Mr. Cramer. "For the first time, we broke the half-billion dollar barrier with $516 million, and unit sales increased some 5½% over 1961."

According to Mr. Cramer, Lorillard-sponsored shows beamed more than 50 million commercial messages into 42 million of the nation's 50 million television homes, during a given week in the fourth quarter of last year. Corresponding sales, he said, for the last half of the year, staged a rally after a temporary lull during the first two quarters of the year. "Sales in each of our four fiscal quarters," he pointed out, however, "set new peaks for those particular periods."

Lorillard products, he said "are receiving wider distribution and broader display than ever before," noting that the company uses "all major media with the heaviest emphasis on network television."

From what Mr. Cramer described as "low man on tobacco's totem pole" in 1946, Lorillard has grown to a position as third largest tobacco company in the nation, largely on the impetus of its filter brand cigarette, Kent. "The filter cigarette has come from out of nowhere to command 56% of today's market," Mr. Cramer pointed out. He predicted that the filter area would eventually command 75% of the market.

A campaign to introduce a non-filter, extra-long brand, York, last year "cut significantly into our earnings," according to Mr. Cramer, and support of the product "will certainly not approach 1962 levels. It will receive national advertising exposure, via television, but our heaviest ammunition will be brought to bear in selected major markets where its reception has been outstanding."

RAB's David looks for better radio research

Better radio research is inevitable, and as it develops there will be "a tremendous growth in the buying of radio time," Miles David, RAB administrative vice president, told the Cincinnati Advertising Club last Tuesday.

He reaffirmed RAB's plan to be "in the forefront of the movement toward research that will give a more accurate—bigger—picture of radio's real reach" (Broadcasting, Feb. 18).

"What we essentially plan to do," he said, "is to invest the necessary money, for the industry, to develop better measurement—measurement which advertisers and agencies can endorse and believe in. You will be hearing a great deal more about this project in weeks and months to come."

"The first and most important thing you as an advertiser can do about radio measurement today is to recognize that what we in radio have been expressing for many years is true—that radio measurements have failed to keep pace with our medium," he said. "Second, and this may seem paradoxical, you should recognize that, with all of their inadequacies, the measurements available in radio are useful as buying tools."

"Radio's tools are, in fact, a lot more useful than the tools other media furnish you. There is the painful paradox. We furnish far more research than printed media."

Mr. David cited A. C. Nielsen Co.'s decision to expand its radio surveys (Broadcasting, March 11) as "acknowledgement, 10 years after the fact, that...radio has been under-measured all along."

He cautioned buyers, however, that "it would be very wrong if you came away from this talk, and from your reading about the hearings [on rating services] in Washington, with an attitude of complete disenchantment with broadcast research." The radio sales trend will be up, he said, and radio users should examine their "franchises" to see whether they ought not to take "more advantage of the fabulous media buy that radio represents at today's prices."

Budweiser to showcase rival media presentations

Budweiser's annual spring meeting with station representatives to discuss media and merchandising plans for its annual "Pick-a-Pair" promotion will be held in Miami April 15-18 and will feature a new event this year—a joint session devoted to competitive "pitches" from Radio Advertising Bureau, Television Bureau of Advertising, Magazine Advertising Bureau and Outdoor Advertising Inc., with each medium listening to the others.

Newspapers will not be represented because so little newspaper space is purchased in the "Pick-a-Pair" campaign where most of the $2.5 million consumer advertising budget goes to radio-tv. June and July will be "Pick-a-Pair" months again this year, it was announced last week by Budweiser's agency, D'Arcy Adv., St. Louis. Over 500 radio-tv stations will be used.

Budweiser's drive this year will be its sixth consecutive campaign. It is considered the biggest single drive of its type in marketing circles. William Bien, marketing vice president of Anheuser-Busch, said that "when 'Pick-a-Pair' first hit the street six years ago, Budweiser sales totaled 13 million 6-packs during the promotion. Last year we hit 22 million in the same period."

Budweiser reported that the 1962 "Pick-a-Pair" drive included 2.5 billion listener exposures on radio and 840 million viewer impressions in tv.

E.L. Bruce to North Adv.

North Adv., Chicago, has been appointed to handle household products division of E. L. Bruce Co., manufacturers. Account, a radio-tv user formerly was handled by Christiansen Adv., Chicago, bills $1 million annually.

Mogul criticizes commercial 'copy' cats

Emil Mogul, president, Mogul, Williams & Saylor agency, last week berated "copy" cats in broadcast commercial production. He told an advertising club gathering at Westport, Conn., that "one successful tv or radio campaign can create a trend faster than Bobby Kennedy can start a fad."

"One fairly creative piece of advertising begets a bargain basement—full of cut-rate imitators," he said, "each just enough different from the others to merit a creative badge for the responsible agency."

Mr. Mogul noted a tendency of the advertising community to confuse the "original thinker" with the "creative talent." The copywriters and art directors receive the praise and awards in the evolution of a commercial he noted, but the innovators are neglected. He suggested agencies put a higher premium on the men who originate new advertising techniques and who conceive ad campaign strategies.

The MW&S president also criticized some specific broadcast commercial practices, notably "misplaced and misguided humor." He said a humorous commercial placed in a serious program context or representing the wrong product can have a negative effect.
You might think Ward Dorrell's nickname "Doc" is short for Ph.D. You'd be wrong.

When he came to us eleven years ago to build our research department—the first ever created by a station representative, our salesmen humorously dubbed him "the witchdoctor." In affection and esteem, the abbreviation followed soon after and has remained.

Doc's ability to analyze research data and come up with fresh, new answers has given that ordinary breed of "doctors" pause to think.

When it comes to upsetting popular myths and deflating comfortable fallacies, he can be formidable and usually makes history.

He pioneered when he showed that slavishly buying by the numbers can be as misleading as a gypsy tea leaf reading. He proved that statistical variations—depending on the size of the sample—if not grossly inaccurate, are usually insignificant. And a fact of life! He has since helped educate agency and advertising people by holding seminars throughout the country that numbers are a guide—not a straitjacket!

One of the biggest problems faced by a television advertiser is watching hundreds of thousands of dollars go down the drain, because of misplanning and miscalculation. Doc developed Blair's TMP—Test Market Plan—that enabled advertisers to go into a market with a limited amount of money and hone their marketing, merchandising and advertising approach to a razor-edge.

The phenomenal success of TMP is testified to by the large number of advertisers who continue to exploit it on Blair-represented stations.

All this wouldn't amount to much if the light of Doc's research were hidden under a bushel. It isn't. Our salesmen know every fact and facet the instant new rating data is available. We're mighty proud of the fact they're the best research-equipped salesmen in the business.

Doc, of course, does not work alone. He is surrounded by a staff of statistical wizards "second to none." His team of research experts are forever striving to give the Blair-represented stations as well as advertisers and agencies the very best in scientific methods for the measurement of a market and the effectiveness of the broadcast media. It is this kind of research that helps the advertiser to measure product impact in the market.

This means when you put your commercial on a Blair-represented station, you get the most accurate and valid picture of your coverage, the deepest penetration of your market for the dollars you spend. We stake our reputation on it. If it's Blair it's the best!
WRC-TV brings Greater Washington more hours of community-service programming than any other station in the area. Hours zeroed-in on the local life of the nation's capital, and of the people who live and work there.

Week after week, WRC-TV's Dimension Four focuses on local problems—ranging from juvenile crime to the overcrowded skies above National Airport. When the dangerous impurity of Potomac waters became apparent, WRC-TV alerted the community with a special series, Our Beautiful Potomac. Prime network time was preempted to present a first-hand report on modern treatment of mental illness, as cameras went into St. Elizabeths Hospital, in There but for the Grace of God.

Two series created by WRC-TV have become weekly favorites: It's Academic features the city's brightest teen-agers in quick-thinking competition, and A Moment With....., offers illuminating conversations with leading national and world figures. WRC-TV's Traffic
as much a part of Washington as the Washington Monument

Court recently won the year's International Association of Chiefs of Police Award for its instructive re-enactments of actual court cases.

WRC-TV centers creative purpose on local issues and events, to reveal their full scope and import in dramatic terms. Like the Washington Monument, WRC-TV is an integral part of the Washington scene. This kind of community-station link is distinctive to the programming of all NBC stations.
Florida Citrus to Change Agencies

3 agencies being considered to replace Benton & Bowles

The Florida Citrus Commission voted Wednesday (March 13) to terminate its long-time association with Benton & Bowles on April 1, and decided to discuss the future of its orange account with three other agencies who made a pitch for the business more than a year ago in presentations invited by the commission.

The decision to change agencies came on an 8-4 vote at a meeting of the state agency in Lakeland. The agency is charged with promotion of Florida’s principal agricultural industry.

Agencies to be considered for the account are Ted Bates, New York; Lennen & Newell, New York, and Campbell-Ewald of Detroit. Campbell-Ewald was retained last spring to take over the grapefruit promotion when the commission decided to split the account.

Benton & Bowles has twice held the citrus commission account for a total of 13 years in the period since the commission was organized in 1935.

The orange advertising budget for the fiscal year which began July 1 was almost $5 million, but the devastating December freeze cut this down to approximately $2.2 million, which has gone into consumer advertising. In addition, B&B handled a special coupon promotion for orange juice concentrate last fall. The processor put up $3.5 million for the program, of which about $1.1 million was used by the agency in the consumer media, with most of the other funds being set aside for coupon redemptions.

Campbell-Ewald, with a much smaller budget for grapefruit and specialty fruits, also sustained a drastic budget cut as the result of the freeze.

Kodel tv campaign doubles ‘awareness’

Eastman Chemical Products Inc. reports that an intensive fall tv spot advertising campaign on behalf of Kodel polyester fiber "almost doubled consumer awareness of the product."

According to Jack Benoze, a vice president of the company’s agency, Doherty, Clifford, Steers & Shenfield, a spot check in four of the 35 markets in which the campaign was carried indicated that "our consumer awareness rose from 11% to almost 22%.”

In an interview last week, Mr. Benoze said the figures came from a telephone survey conducted in four of the 35 markets prior to the campaign, followed by a similar campaign after the six-week campaign closed.

The 35 markets chosen involved over 50 stations, and covered an estimated 70% of the nation’s television homes. The campaign will be repeated this spring for at least six weeks, beginning March 17. Kodel fiber appears in a variety of consumer products, including men’s, women’s and children’s apparel.

Swezey asks for support, not rug-pulling

Advertisers were asked last week to support the NAB radio and tv codes and not “cut the ground out from under us by attempting to engineer the consent of our subscribing stations to broadcast material which fails to meet code requirements.”

Speaking before the fourth annual Southeastern Marketing Conference of the American Marketing Assn. in Atlanta, NAB Code Authority Director Robert D. Swezey said a major problem in code compliance is caused by “repeated attempts of certain advertisers” to get non-acceptable copy broadcast.
MOVERS AND
SHAPERS OF A DYNAMIC CITY: SAN DIEGO

San Diego is a city that’s moving fast and growing big. Men such as these pictured help provide the steam. Their effect goes beyond their outlined activities, quickens the pulse of San Diego as it seeks and claims a special place in the West. San Diego is California’s second largest county in population. Keeping pace — and setting its own — within this dynamic marketplace is San Diego’s leading medium. The one that makes this a reachable marketplace. The one that represents the new San Diego. The one to buy. KOGO

Dr. Charles R. Schroeder is Director of the San Diego Zoo, which houses the world’s largest collection of wild animals. His many contributions to the growth of this popular San Diego landmark include such innovations as giant walk-through bird cages, tropical forests, and a Children’s Zoo where youngsters can play with many rare animals. Doctor Schroeder’s imaginative efforts contributed largely to the fact that over 2,000,000 people visited the San Diego zoo last year.

John S. Alessio is internationally known as a businessman, sportsman and financier. Prominent among his many interests are the year-round Caliente Race Track in Baja California, and the world-famous Hotel del Coronado across the bay from San Diego — both of which play a vital role in generating San Diego’s giant tourist industry which, last year, contributed approximately $165 million to the San Diego economy plus $60 million in Baja California.

John V. Banks brings 22 years’ experience in engineering, construction and manufacturing to his position as Executive Vice President of National Steel and Shipbuilding Company. This dynamic industrialist now directs a diversified business that produces aircraft parts and missile components in addition to its major activity of building middle-tonnage commercial and military ships . . . and makes an increasingly important contribution to San Diego’s broadening industrial base.

The FCC last week gave its staff a clear directive to quit pressuring television broadcasters to schedule local live programming in prime time.

This was the interpretation given by commissioners and staff members alike to the commission’s action, by a 5-2 vote, to order license renewals for some 70 Far West television stations.

The identities of the stations involved were not immediately released last week. But officials said they were stations whose licenses had been deferred strictly because of the so-called “6-to-11 p.m.” question. It is that time period that FCC staff members have been scrutinizing to determine the incidence of local live shows.

The renewal applications of some eight or 10 other western stations are being contended in a deferred status, but for other reasons.

Commission officials agreed the action was a clamp-down on what was regarded as an effort by the staff to induce stations to carry local live programming in prime time.

**Issue Not Dead** The action was not taken to mean, however, that the commission is any the less interested in that kind of programming. One key staff member said, “We’ll continue to consider local live programming, but on an over-all basis—not just on the basis of whether it’s carried between 6 and 11 p.m.”

The commission’s action was traced by one commissioner back to the disclosure by **Broadcasting** of a staff letter-writing campaign that seemed to be aimed at requiring stations to carry local live programming in prime time.

The commission’s action last week indicated continued dissatisfaction with the manner in which renewals are being handled. The staff had recommended that the licenses of some 30 of the stations involved be renewed, but that additional letters of inquiry be sent to the remainder.

The commission, however, instructed the staff to renew the licenses of all the stations being considered if the only question to be resolved was their alleged lack of local live programming in prime time.

The commissioners reportedly in the majority were T.A.M. Craven, Rosel Hyde, Robert E. Lee, Frederick W. Ford and Robert T. Bartley. Chairman Minow and Commissioner E. William Henry were said to have favored sending additional letters of inquiry to the stations whose programming had failed to satisfy the staff.

The first big departure from the policy the staff had been following came last month when the commission renewed the license of WKY-TV Oklahoma City, one of the stations in trouble because of its programming.

The commission, in a letter to the station said that although it did not schedule local live programming between 6 and 11 p.m., it had made a creditable record for such programming in prime time through a policy of pre-emptions (**Broadcasting**, Feb. 4).

A week later, the commission renewed the license of WFAA-TV Dallas, another station whose application had been in deferred status because of the 6-11 p.m. question. Again, the commission said the station’s preemption policy was responsible for its renewal (**Broadcasting**, Feb. 11).

For that of that reason, the basis of those two decisions, the staff had been screening the batch of renewal applications of the western stations, to determine whether those broadcasters could make showings equal to those of WKY-TV and WFAA-TV.

But the commission’s action last week appeared to go beyond those two stations in holding, in effect, that the time in which local live programming is scheduled need not be controlling.

Another indication of the commission’s attitude was its rejection of a proposal to send letters to the stations whose licenses are being renewed, setting forth the commission’s reasons. The vote was 6-1, with Chairman Minow in the minority.

Some commissioners had opposed sending such letters to WKY-TV and WFAA-TV, on the ground they were a “face-saving” device or “gratuitous.” Others were said to feel last week that a letter explaining the commission’s actions might simply bind the agency’s hands in future cases.

---

**Minow hints at push for code adoption**

**FCC Chairman Newton N. Minow** indicated last week he is ready to make a new push for adoption of the NAB code limitations on commercials as an FCC rule.

In an interview published in the **Chicago Daily News**, Chairman Minow was quoted as saying “the most prevalent commercial” received by the commission involve commercials.

He added that the industry already has a code on commercials and that “we would like to propose that the code be made a new FCC rule. We will enforce the code.”

Sources close to the chairman said last week he is likely to discuss the idea in his speech before the NAB convention in Chicago later this month.

The commission turned the idea down last November when Commissioner Robert E. Lee, who first suggested it, offered it as a proposed rulemaking (**Closed Circuit**, Nov. 26, 1962).

The vote was 4-3, and the impending replacement of Commissioner T. A. M. Craven by Kenneth A. Cox, Broadcast Bureau chief, would probably reverse that result. Commissioner Craven voted against the proposed rulemaking; Mr. Cox said last week he would be in favor of getting industry comments.

However, no one is predicting that this would presage FCC adoption of the code, which restricts the number of tv-commercial per time segment.

The Chicago paper also quoted Mr. Minow as being interested in advancing another proposal he has long favored—the use of uhf tv as a means of repeating “the best television programs.”

He said a system might be devised whereby a uhf station could repeat, within a week, “the best fare shown on the vhf channels,” or within hours, in the case of network news programs.

Chairman Minow is expected to discuss this idea in his NAB speech also.

 Nielsen, Pulse to get their chances

HARRIS UNHAPPY WITH WHAT HE HEARS, VOWS ACTION IF NEEDED

A House subcommittee which is investigating broadcast measurement services brought some of the important players in the rating game last week, but reserved the spotlight for A.C. Nielsen Co. and The Pulse Inc., which are yet to testify.

However, there was plenty put on the record in last week's hearings by the Special Subcommittee on Investigations to cause concern for broadcasters and advertisers alike.

Not the least of this was a demonstration that it was possible to learn with amazing accuracy which persons were to be interviewed in coming audience surveys by Audience Research Bureau (ARB) and C.E. Hooper Inc. (see page 46).

Both firms quickly announced they would make immediate changes in their sampling methods to prevent this possibility.

Rep. Oren Harris (D-Ark.), chairman of the subcommittee and of the parent Commerce Committee, said several times last week that the subcommittee wasn't just going through the motions of a hearing, and that it fully intended to expose whatever iniquity, misrepresentation or dishonesty might exist.

Corrective legislation, it was warned, would be necessary if the investigation showed that broadcasters, advertisers and research firms were unable to insure adequate service for the industry and protection for the public.

The hearings began March 5. During the first week broadcasters testified on how they use broadcast research (Broadcasting, March 11).

Network officials said they relied on ratings as critical elements in decisions on programming, sales and in setting affiliation rates.

Some of the last week's highlights:
- Audience information supplied by broadcast measurement firms is sometimes misused by broadcasters and time-buyers, said James W. Seller, director of ARB.
- Robert Richardson, subcommittee special attorney, charged that Robert S. Conlan Assoc., Kansas City, failed to perform field surveys for some reports which it published.
- Chairman Harris warned that Conlan clients "should give some close attention" to the testimony of Conlan representatives.
- Rex Sparger, special investigator, said Videodex Inc., New York, had misrepresented its methods to the subcommittee.
- Chairman Harris, after hearing two-and-a-half days of testimony by Conlan and Videodex witnesses, observed, "It's a wonder how the industry ever got themselves into this noose in the first place." Such situations would not be permitted to continue by the subcommittee, Rep. Harris said.
- The subcommittee criticized as arbitrary and artificial many metropolitan markets as they have been defined by the rating services. The FCC's engineering measurements should be guide enough on these matters, the subcommittee said.
- ARB and Hooper admitted some broadcasters try to "hypo" ratings with stunts and giveaways, but said these devices were taken into consideration in their published reports.

The subcommittee plans to hear Dr. Sydney Roslow, director of The Pulse Inc., on Tuesday, to be followed by witnesses for Nielsen, the largest firm in broadcast-measurement.

Cloudy Picture • After Robert E. West and Mrs. Hallie Jones, co-owners of Conlan, had been on the stand for a day-and-a-half, Rep. Harris told them the record "isn't a very pretty picture, I must say." The chairman said that several hundred radio station subscribers of Conlan surveys "should give some close attention to the record that has been developed."

Subcommittee counsel Robert Richardson accused Conlan of manufacturing radio surveys in its Kansas City office without making the claimed telephone interviews from the field. Mr. Richardson asked Mr. West: "Were not these surveys [in Tucson for KAIR there] made by your company writing figures in books in Kansas City?"

"Not to my recollection or to my knowledge, no sir," the Conlan president replied after consulting with his attorney.

"Have you ever sold surveys without doing the field work?" Mr. Richardson asked.

"I would say no," Mr. West replied.

The counsel asked if claimed surveys of Tampa-St. Petersburg, Fla., in November 1960 and February 1961 were falsified, and Mr. West said: "I don't want to refuse to answer but I don't

Conlan's Mrs. Jones and Mr. West
Disbelief • At one point Rep. John Moss (D-Calif.) told Mrs. Jones that "I just cannot believe in all candor that what you tell me here is true." The congressman made this statement when Mrs. Jones said Conlan makes a regular practice of paying its telephone interviewers in cash and keeps no receipts of such transactions.

"The record shows a pretty bad picture from your standpoint," Rep. Harris told Mr. West. "I am constrained to believe that you know a lot more than you will tell." At another point, the subcommittee chairman said to Mr. West: "I can't make up my mind whether you are deliberately trying to confuse the issue through vague testimony or whether after 12 years as president of Conlan you just do not know your business."

Mr. Richardson said that in four of eight surveys Conlan sold in Tucson between May 1960 and February 1961, subcommittee investigation could turn up no telephone interviewers who had done the field work. The same was true for Conlan surveys of Tampa-St. Petersburg in November 1960 and February 1961, he said, one of which was not sold according to Mr. West.

The subcommittee obtained nine cities from Conlan in which the Kansas City firm or its New York subsidiary, Verifak Surveys Inc., claimed to have made radio listening studies. Mr. Richardson said that he and Rex Sparger of the subcommittee staff investigated only in the two cities mentioned.

Field Denials • Conlan listed Mrs. Phyllis Broad as having done the field work for two Tucson surveys (November 1960 and January 1961) and the same number for Mrs. H. T. Edwards (July and August 1960). However, Mr. Richardson said, both women claimed that they had done telephone work for Conlan on only one occasion. In addition, he said, another woman claimed to have made a survey for Conlan in Tucson was in the hospital in traction at the time the survey was allegedly made.

The Kansas City firm had reported only the 1960 Tampa survey to the subcommittee but Mr. Richardson placed in the record two letters from Mr. West dated Feb. 28, 1961, to WALT Tampa and WSUN St. Petersburg, (which had purchased the November 1960 survey). In the letters, Mr. West congratulated WALT for being No. 1 in the daytime and WSUN for being tops at night in a Conlan survey conducted Feb. 12-19. He said the survey would be published the next week and offered it for sale to both stations for $145.

Mr. West said that letters of this type were a common sales practice of Conlan and that the survey probably was not 1962 was $5,619, Mr. West said after being shown figures submitted by his firm. The average cost to Conlan per survey in 1962 was $17, he agreed.

Mrs. Jones admitted that Conlan has no field supervisors and makes no attempt to check the accuracy of its telephone interviewers or whether they actually did the work reported. She said no correspondence with them is maintained and that their field reports are destroyed under an indefinite policy, sometimes the day the final report is completed.

Mr. West and Mrs. Jones purchased Conlan in 1959 from John L. Cuyant. The firm has five employees, including the two co-owners. Mrs. Jones has been with Conlan 16 years and Mr. West 12 years.

The Conlan president said that the
New York office in September 1961:

- That the company maintained a national sample of 9,200 tv homes.
- That Videodex Inc. had several field offices, notably in the Chicago area and a field operation in Joliet, Ill.
- That the firm was staffed by seven "subcontractors" who worked Videodex Inc. field work around the U.S.
- That it used between 30 and 35 "subcontractors" who worked "premium houses," which provided inducements for viewers to keep Videodex diaries.

However, Mr. Jay told the Subcommittee last week that his firm:

- Had discontinued its national rating service in 1958.
- Did have offices in Chicago and New York.

Cooperation has limits ARB, Hooper learn

Presidents of two major broadcast rating firms were shocked to learn Thursday (March 14) that two congressional investigators and a secretary had found a way to predict—with striking accuracy—who in a given market would be surveyed "at random" by their companies.

They were warned that unscrupulous broadcasters could do the same.

REX SPARGER and Robert Richardson, investigators for the House Special Subcommittee on Investigations (the group investigating broadcast ratings services—see page 44) demonstrated to the satisfaction and dismay of James W. Seiler, director of Audience Research Bureau, and Frank Stisser, president of C. E. Hooper Inc., that they had deduced the identifications of future interview prospects because both firms were a little "too cooperative" in allowing clients to check on their research procedures.

The Subcommittee has been critical of some firms for lack of cooperation in this area, but suggested ARB and Hooper tighten up their policies. Messrs. Seiler and Stisser indicated they would—immediately.

How It Was Done • Telephone

New York, but the bulk of Videodex operations had been shifted to New York during the past year.

- Employed smaller full- and part-time staffs than had been earlier declared to the investigators.
- Had neither contracts nor correspondence which showed a business agreement with its "subcontractors.
- Worked with what would be more accurately described as "premium mailing houses."

From the Top • Mr. Jay began his
testimony by describing Videodex Inc., which conducted national network tv program surveys in the mid-1950s, as a firm which now does 85% of its business directly with advertisers for whom it analyzes audience response to tv advertising schedules, usually spot.

Mr. Sparger said he and Mr. Richardson were told by Mr. JAY in his New York office on Sept. 22, 1961, that "survey sample size would never drop below 9,200," and that included all the cooperative ARB "first quarter" home sample was certainly better than 1,200 (Nielsen) or 1,050 (ARB). Mr. Sparger said he and Mr. Richardson both commented in memoranda they wrote that night.

But, Mr. Jay said last week, there is no group of 9,200 tv homes keeping Videodex diaries. Instead, the firm has

But, Mr. Sparger said, staff investigators and advertisers have been led to believe otherwise. Robert C. Sorenson, vice president and research director of D'Arcy Adv. Co., New York, had told them on Feb. 16, 1962 that the agency bought a Videodex Inc. survey for Studebaker to provide information about the advisability of moving Mr. Ed (CBS-TV) from one night to another, he said. To do this, the investigators told Mr. Sorenson he had stated, Videodex Inc. would compile a subsample from its national samples.

Mr. Sparger's Wednesday testimony said the Subcommittee's first knowledge that Videodex Inc. had discontinued its national service came Tuesday—when Mr. Jay was on the witness stand.

Mr. Jay later showed reporters a carbon of a letter which he said was written to the Subcommittee on March 5, 1962 in which he stated that "in no case has a standard Videodex network report been issued in published form on a subscription basis since early 1959. The multiple-market master composite network ratings have been based on the original master sample design of 9,200."

However, when Mr. Sparger testified Wednesday he said that Julius Barnathan, director of research for ABC-TV in 1959, had described a national study performed by Videodex Inc. for the network in 1959.

Disputing other points raised in Mr. Jay's testimony, Mr. Sparger said that Mrs. Beatrice Beadron, Videodex Inc.'s Chicago field supervisor, told investigators who asked on secret diaries, that they were placed in a warehouse (Anderson) immediately after tabulation because she feared the threat of fire at the office, which is in the basement of her Chicago home.

When Subcommittee investigators inquired about that storage account, they were told it had been "dormant" since 1956. Mr. Sparger testified.

Staff Shrinking • Rep. Moss was concerned about Videodex manpower, initially described by Mr. Jay as being substantially seven men. He amended that figure under direct questioning, and said just three of the five in Chicago are full-time. Mr. Jay heads up the New York office with an "assistant."

"Do you mean a secretary," he was asked.

Mr. Jay, the witness explained, his New York "assistant" did tabulation, verification, and in fact handled a considerable load of responsibility. He didn't want to appear facetious, Mr. Jay said, but the best designation for his assistant was as "a counterpart of Mrs. Jones," the Conlon assistant.

Pressing the witness about several dozen part-time workers, Rep. Moss

THE EFFICIENT WAY

RCA 25 KW Transmitter...

This is the new TT25DH designed with compact walk-in cabinet using half the usual floor area. Diplexed circuits plus air-cooled tubes and transformers assure the ultimate in reliability and trouble-free performance.
This "Traveling Wave" antenna design based on slot radiators results in improved signal effectiveness, excellent circularity, low VSWR, high power handling capacity and low wind load. Simplicity of construction means virtually no maintenance and it is resistant to lightning damage.

This RCA "package" provides the most efficient and most economical combination of antenna gain and transmitter power. The 25 KW transmitter, with an antenna gain of 15-18, provides an ERP (Effective Radiated Power) of 316 KW. A carefully designed vertical radiation pattern satisfies requirements for close-in as well as far-out coverage. It's the "easiest way to get 316 KW." Compared to other transmitter-antenna combinations this one (a) uses only half the transmitter power; (b) requires only a fraction of the usual floor space; (c) cuts operating costs in half; (d) requires lower capital investment. RCA offers single-source supply, undivided responsibility, and matched equipment. RCA supplies all hardware—arranges for installation, if desired. And RCA is on call for service 24 hours a day.

Your RCA Broadcast Representative is ready to help you work out the best proposition to fit your requirements. Call him, or write RCA, Broadcast and Television Equipment, Dept. TC-22, Building 15-5, Camden, N. J.

RCA The Most Trusted Name in Television
Johnny Carson, David Mahoney to testify

Big and little money in the radio-TV industry will be represented today (Monday) as the House Special Subcommittee on Investigations resumes its hearings into audience measurement services.

An NBC-TV spokesman said late last week that Johnny Carson, host of that network’s Tonight program, has been called by the subcommittee after two weeks of negotiations over whether he would have to testify. The congressmen want to question Mr. Carson about statements he made on his program about the power of ratings.

...was told that the number actually was “between 6 and 12.”

Questioned by the investigators in 1961 about his “subcontractors,” Mr. Jay said then they numbered between 30 and 35. But, when Mr. Sparger took the witness stand last week, he said staff checks failed to locate any persons listed by Mr. Jay as having worked for Videodex during a specified period.

The staff visited seven “premium houses” on a list furnished by Mr. Jay and found none had done any mailing for Videodex Inc. These firms are mostly “premium mailing houses,” Mr. Jay explained last week.

Not a Corporation • Videodex Inc.’s corporate status was questioned by Chairman Harris, who asked Mr. Jay, “Why did you not say your corporation was involuntarily dissolved on June 4, 1954?”

“I would be interested to know who the principals are who caused that,” Mr. Jay replied, saying that the chairman’s statement was the first time he had heard of the dissolution.

Subsequent testimony revealed that the firm began as a Chicago partnership, Jay & Graham Research Organization, in 1948, and became Jay & Graham Research Inc. in 1949. It was incorporated as Videodex Inc. in New York the next year, and amended in Illinois to Videodex Inc. in 1952.

Just two weeks after the involuntary dissolution in Illinois, New York records show, Videodex Inc. was voluntarily dissolved in that state on June 16. Mr. Jay said he could not remember whether the firm had ever filed annual reports required by Illinois law. However, filing federal income taxes as a corporation in 1962, the firm reported no net profits for that year, and paid no taxes, Mr. Jay said.

The firm still describes itself as Videodex Inc.

‘Hypoing’ and ‘Metros’ • ARB’s Mr. Seiler was questioned closely about what it would take to unduly influence a rating survey and congressmen sharply criticized “artificial” definitions of metropolitan markets.

But by the time he finished his testimony, Mr. Seiler had been warmly complimented for his frankness and ARB’s full cooperation with the subcommittee and its staff.

The ARB head said his firm notifies subscribers before surveys are conducted in their areas, but his staff is aware of “hypoing” and takes it into consideration in report preparation. “Hypoing” [is] “probably more emotional than real,” he said. ARB comparative studies have shown little change in audience pattern even with “hypoing,” Mr. Seiler said. Severe cases are mentioned in ARB reports and resulting data is footnoted with explanations.

ARB tries to follow Census Bureau guidelines in drawing metropolitan markets, he said, but advertising agencies sometimes create markets of their own definition.

“It seems you have one application of your business and the people who pay you have another,” Rep. Harris said.

“It’s not going to be a simple matter to make this [ratings] much more accurate,” Mr. Seiler said. The problem earns broadcast research firms face, Mr. Seiler explained, is that “we have an extremely difficult problem” and very little money to overcome it.

“The industry has never even described what a television viewer is,” he added.

How ARB Operates • One of the major rating firms, ARB measures national and local TV audiences. It is a division of C-E-I-R Inc., Mr. Seiler said, has a full-time staff of 225 employees and a field staff of about 5,500 interviewers. It has about 410 local TV clients in U. S. markets. The firm abandoned radio measurement several years ago because it didn’t think it...
Like everything in Kansas, it's BIG. The Fleming Company's Topeka food distribution center covers 258,000 square feet. Fleming has 6 such food distribution centers, serving its voluntary grocery chain of 800 supermarkets in 8 states. Sales volume of these stores in 1962 totalled $372,105,747, up 14.1% over '61. "It's just Mid-America on the grow," says President Ned Fleming.

You can be BIG in Kansas if you come in with a BIG concept—and with the one medium that's big enough to get the job done—WIBW. WIBW RADIO covers the best of Kansas, 69 counties, dominates in 45 of them. WIBW TV gives dominant day and night time coverage in the 32 leading counties. Buy them both and you're IN in Kansas. Ask Avery-Knodel for the BIG picture.
Comsat incorporators may face fiscal questioning

Incorporators of the Communications Satellite Corp. were approved by the Senate Commerce Committee last week but the space committee indicated it wanted an opportunity to ask about some unresolved questions.

The problem area seemed to be how much public money should go into research and development which will benefit the private corporation.

The issue was raised last month by Sen. John O. Pastore (D-R.I.), chairman of the Communications Subcommittee, and has been echoed by other senators since (Broadcasting, Feb. 25). It also was at the heart of opposition to the original Communications Satellite Bill which was opposed but passed last year.

Sen. Clinton B. Anderson (D-N.M.), chairman of the Astronautical and Space Sciences Committee, sat in with the Commerce Committee during the nomination hearing Monday (March 11) for the 14 incorporators. He indicated then that his committee might want to discuss some problems with the incorporators.

A tentative hearing has been set for tomorrow (Tuesday).

Three key men charged with the development of a private space communications system are shown as they appeared before the Senate Commerce Committee last week. (L-r) Leo D. Welch, chairman of the Communications Satellite Corp.; Sam Harris, vice chairman of the board of incorporators, and Dr. Joseph V. Charyk, president.

could be done, Mr. Seiler said.

(Asked about ARB’s relative position in the rating field, Mr. Seiler blurted out that the firm’s 1962 gross income was $31,135,663. Most of that income—$2,963,910—was from local TV market reports, he said.

The witness was quickly advised that he was not being asked for public disclosure of the actual figures—just for an idea of ARB’s share of the business.

(His best guess on that, Mr. Seiler said, is that ARB has about a 60-40 lead in local TV market reports. Its national reports, however, may represent closer to 10% of that area.)

The firm uses diaries through four-week periods to learn viewing habits, he said, and uses telephone coincidental surveys to check up on its diary-keepers’ habits. They have shown, Mr. Seiler said, that non-responders are somewhat different viewers, and there is some recording error—but the differences are small.

Misused ‘Metros’ • Rating users who buy time only on the basis of "metro ratings" "could be badly misled on coverage outside the metropolitan market,” Mr. Seiler said.

The "metro rating" is designed to show broadcasters how their programming competes with other stations who have the same opportunity to reach the same number of viewers, he explained. That is why "metros" are restricted areas into which all local stations put the same quality signal, he said.

Total home figures, however, measure all homes which pick up a station’s signal. They are intended to credit stations for any viewers they may have.

Sample errors worried the subcommittee and Mr. Seiler was asked about the margin of error in ratings given two competing stations in the same time period. In a Louisville example one was rated 22, the other 26. Applications of error variations showed that a more accurate description than 22 or 26 was that a 22 could range from 15.2 to 28.8 and a 26 from 19 to 33. This showed, Mr. Seiler said, that there really is no significant difference in the stations on an individual program level and points out problems which exist in buying spots in local markets on the basis of ratings.

"Never believe a thing until you see it twice in a row," Mr. Seiler said ARB advises its clients. "I feel very strongly," he said, "our material is quite often misused."

FTC Orders • Toward the end of Mr. Seiler’s testimony Chairman Harris observed that he thought it was interesting to note the timing of the Federal Trade Commission’s consent orders signed in December with three major rating firms, including ARB (Broadcasting, Jan. 7). Ratings have been under study by Congress since Senate hearings in 1958, Rep. Harris said. Material developed then was turned over to the agency. The House subcommittee issued the Madow Report (a statistical appraisal of rating meth-
Her name was WRGP-TV... now it's WRCB-TV, identifying her more closely with the RUST CRAFT BROADCASTING COMPANY which owns and operates the NBC affiliate in Chattanooga. She's still the number one favorite in the Chattanooga market according to the November-December '62 ARB, which shows that from 5:00 p.m. 'til midnight, Monday through Sunday—26.79% MORE people watch WRCB-TV than station B, and 35.96% MORE than station C. You'll want to know her better, so for more information as to her popularity in the Chattanooga four-state industrial center of the South, contact your H-R man!

odology) in the spring of 1961, he said, but it wasn’t until just two months before the current hearings that the FTC acted.

Chairman Harris thanked Mr. Seiler for his candor and presentation and said there was "no doubt in my mind that you are knowledgeable and capable in your business."

The compliment, however, prefaced this question: Should the subcommittee undertake legislative action in the rating field?

Mr. Seiler said he thought the subcommittee was making a valuable contribution by exposing problems.

What about setting standards for the industry? Chairman Harris wanted to know.

It would be difficult to set them, Mr. Seiler said, but certainly any misrepresentation should be exposed.

Hooper Ratings ‘Overused’ • Hooper’s president, Frank Stisser, told the subcommittee that the firm hoped to achieve a fuller understanding of the rating business would result from the investigation. What he meant, Mr. Stisser explained, was that ratings are "overused." Hooper tries to publish a comparative index of how one station’s programs compete with another’s in the same market, Mr. Stisser said. Coverage is not a concern of Hooper, he said.

Hooper measures radio listening primarily at home, Mr. Stisser said, but includes auto listening with on-street surveys conducted mostly by male college students who stand on street corners and check motorists’ radios "during red lights."

The firm employs 125 full-time workers; its interviewers are paid by the hour, but supervisors are paid monthly retainers and by the hour, Mr. Stisser said.

Outlining Hooper’s telephone interview method, Mr. Stisser explained that callers ask what station people "are listening to now," what they listened to 15 minutes ago and questions on listener characteristics.

An analysis of this method by subcommittee investigators showed that presentation of this data in half-hour breakdowns inevitably grouped respondents in a manner which meant they were counted twice. So, it was pointed out, although Hooper states it uses a minimum sample of 900, this could never be really more than 450, and—

it was said—the application of other statistical criteria diluted the sample to fewer than 300.

Mr. Stisser agreed this was so.

That ‘Hyping’ Problem • Hooper notifies its subscribers—located in about 60 major markets—when a survey is about to take place, usually the first week of a month. Notification is made to be fair to all, Mr. Stisser said, because once a survey begins someone usually finds out within a day or two.

As with ARB, which also informs subscribers when ratings surveys are being conducted, Hooper has a "hyping" problem. Facing it, the radio survey firm does what ARB does—publishes explanatory footnotes when it thinks stunts or other "hyping" devices may have thrown off the accuracy of a report.

Admits he likes idea

FCC Commissioner E. William Henry exhibited more candor last week than most bureaucrats are supposed to possess.

When Commissioner Robert E. Lee introduced him at the government-industry committee meeting on uhf development (see page 119), he referred to reports that Chairman Newton N. Minow might resign, to be succeeded by Commissioner Henry.

Smiling broadly, Commissioner Henry replied, "I know no more about it than does Commissioner Lee. All I can say," he added, "is that I hope he’s right."

BROADCASTING, March 18, 1963
THE KID MIGHT JUST BECOME ANOTHER HUCK FINN
Jaimie McPheeters is the hero of a Pulitzer Prize novel. And of a new television series with a lot going for it.

A healthy production budget. Writers like John Gay, who did the film "Separate Tables." Directors like Boris Sagal, who worked about every top drama show on television. And the facilities of Metro-Goldwyn-Mayer studios. But viewers don't sit and watch credits for an hour.

They will watch an engaging Jaimie (Kurt Russell) who finds the lure of adventure and gold more exciting than school. And a father (Dan O'Herlihy) who finds the lure of gambling more challenging than responsibilities.

And assorted heroes, friends, fiends, love interests and creditors who share their adventures.

"The Travels of Jaimie McPheeters" premieres this fall—on ABC Television—along with more than a dozen new shows.

One's a cross between Ben Casey and Sigmund Freud. (It's called The Breaking Point).

One's high adventure, with a wrinkle. The hero's a man on the run (Fugitive).

One's two hours of Jerry Lewis. (Enough said?)

And one show is actually two shows—Arrest & Trial. 45 minutes of chase (The Arrest). 45 minutes of courtroom action (The Trial).

New shows, new formats and faces, new ideas—all with one thing in common.

Entertainment.

Exciting programming to attract the younger, larger families that we, and you, want to reach.
ABC NOT GIVING UP ON DROP-INS

Network asks FCC to make seven markets dual operations

ABC last week attempted to breathe new life into the FCC's controversial, but dying vhf drop-in proposal.

The network suggested that the commission grant the drop-ins and at the same time authorize dual vhf-uhf operations in the 7 two-station markets.

Two weeks ago the commission voted to deny the drop-ins in Johnstown, Pa. (ch. 8), Baton Rouge, La. (ch. 11), Dayton, Ohio (ch. 11), Jacksonville, Fla. (ch. 10), Birmingham, Ala. (ch. 3), Knoxville, Tenn. (ch. 8), and Charlotte, N. C. (ch. 6). In a related action the FCC reassigned ch. 5 in Enid, Okla., to Oklahoma City, at short spacing, and modified the license of KOCO-TV, which operates the ch. 5 facility, to specify Oklahoma City (BROADCASTING, March 11).

ABC said that the commission denied the proposal by an announced 4-3 vote, but did not give any reason for making the denial. The network noted that the trade press reported the commissioners, who voted for the denial, did so out of belief that uhf channels would provide the third service.

ABC took a different view. It said the FCC's decision "will not satisfy the critical shortage of competitively equal facilities" in the seven markets. Neither will the FCC's position advance "the cause of uhf broadcasting," ABC said.

On this note the network concluded that if the commission provides for dual vhf-uhf stations, along with the drop-ins, both of the two objectives would be satisfied.

Last, But Not Least • ABC said that the seven proposed drop-ins are but the last of a long series initiated by the commission since 1952, when the agency adopted its plan to provide a third competitive facility in important two-station markets. ABC pointed out that in some cases the drop-ins were made without any mileage separation considerations. On the other hand, short spacing has sometimes been necessary such as ch. 13 (WAST [TV]) in Albany, N. Y. (BROADCASTING, Feb. 18).

ABC told the commission: "The public in these seven remaining markets is no less entitled to a third competitive service than it is in the other markets..." where the commission has provided a third service.

ABC reminded the FCC of its position when the commission denied a petition by the American Association of Maximum Service Telecasters to reconsider its drop-in policy. The commission said, "...we are faced with the inescapable circumstance that in the present state of the art, the operating commercial uhf stations cannot compete with vhf stations on anything like an equal basis."

Help or Hinder • ABC said that if the FCC plans "undue encouragement" to proposed applicants to apply for uhf channels in the seven markets, as a measure to aid uhf, "we agree that the action probably will contribute to its advancement. But if aid to successful uhf station operation is the criterion—as we believe it should be—the proposed action will hinder, not help, uhf."

The network said that the commission should not need to be reminded of the "scores" of uhf stations that have failed in competition with two uhf stations. But if the commission would grant dual vhf-uhf stations, the uhf could pull the financial load and support the uhf operation costs, ABC said. "Our proposal is to allow dual vhf-uhf operation with the same programming," ABC said.

The network noted that Chairman Minor and Commissioner Lee have in the past favored dual operations, but with different programming.

ABC told the commission it was willing to help uhf development. "To assist the successful applicant in the added cost needed to install and operate a dual vhf-uhf station," the network said, "ABC will, in its network compensation arrangement provide initially for more favorable terms to the station."

ABC concluded that if the commission doesn't reconsider its decision, the public in the seven markets will be "relegated to the status of second class citizens." The network added that it would be the "mid '70's" before a uhf operation would be feasible in these markets.

It has been reported that Gem City TV Inc., a prospective vhf applicant for Dayton, is preparing to file a petition for reconsideration too. It is taking the same approach as ABC did.

FTC loses in bid for Bayer injunction

A federal judge in New York has refused to grant a temporary injunction forcing Sterling Drug Co.'s Bayer aspirin to stop using advertising that refers to results of a Federal Trade Commission-sponsored medical study.

The FTC, which has filed a complaint against Sterling and its agency, Dancer-Fitzgerald-Sample, New York, for using the study in advertising, asked for the restraining order while the case is being litigated before an FTC hearing examiner.

In a decision made public last week, Judge Archie O. Dawson of the Southern District Court of New York denied the FTC petition seeking to stop Ster- ling's use of the comparative analgesic study published in the Journal of the American Medical Assn., Dec. 29, 1962 (BROADCASTING, Feb. 25). The FTC will continue prosecution of the case with a hearing scheduled to begin April 1, before Examiner Eldon Schrup.

No Difference • The FTC-sponsored study was made by two doctors and a city health officer in Baltimore. The investigators reported, the agency said, that there is no significant difference in the degree of relief from pain afforded by Bayer and other products tested, after 15 minutes of administration (BROADCASTING, Jan. 21).

In his decision, Judge Dawson found the FTC had not proved its case against Sterling Drug and Dancer-Fitzgerald-Sample, in each of five practices which the commission contended were fraudulent. He asserted that "if any false impressions are created about the origin of the study they are impressions created by the actions of the commission itself." Also, he said that "if the report of the experts employed by the commission is inaccurate then the commission itself is guilty of promoting false advertising."

A Sterling Drug official said that Bayer aspirin advertising will continue to use the results of the study, although current commercials do not refer to the study specifically. D-F-S said that whatever changes have been made in Bayer's ad copy were merely "a matter of good advertising practices," and not a result of FTC proceedings.

Freed pays $300 fine

A $300 fine was paid last week by disc jockey Alan Freed, who pleaded guilty in criminal court in New York last December to accepting a total of $2,700 from two record companies for favoring their records on his radio show.
What professional recording tape now offers a new standard of performance? AMPEX 600.

Ampex engineers are never content with present standards. They are always trying to improve what sometimes seems un-improvable. Now they have been at work on the Ampex 600 Series Professional Recording Tape. And they've improved it so much we felt we should call it the new Ampex 600. This 600 Series now offers better high frequency response characteristics. And because an exclusive Ferro-Sheen process makes the tape smooth, the first play and the one-hundredth have the same response characteristics curve. It gives you the kind of reliable performance you expect from Ampex recording equipment. Try this improved 600 Series and see. It's made in the same rigidly controlled clean-room atmosphere as precision computer and instrumentation tapes. Write the only company with tape, recorders for every application: Ampex Corp., 934 Charter St., Redwood City, Calif. Worldwide sales, service.
FCC INSISTS ON MAKING A DECISION

Refuses to approve agreement for Philco withdrawal

The FCC last week refused to approve the agreement under which NBC and Philco are qualified applicants and the commission decided not to deny itself the opportunity of deciding between them.

But the action jeopardizes NBC's play to dispose of its Philadelphia broadcasting properties, as required by a Justice Dept. consent decree, by swapping them for RKO General's Boston stations.

Under the agreement, NBC was to pay Philco not more than $550,000 as reimbursement for its expenses in prosecuting its application for a new station on ch. 3. This application is one of a series of revised matters now in a consolidated hearing.

The hearing, which has been in abeyance pending the commission action on the agreement, is scheduled to resume today (Monday).

In disapproving the agreement, the commission asked Philadelphia to decide, “without undue delay,” whether it will continue to press its application. Philco's alternative, commission sources said, is to withdraw without getting any of the $520,000 it says has spent.

Philco, in earlier pleadings, said if the agreement were rejected, the company would “prosecute its application with the utmost vigor.”

The commission action was said to have been taken on a 4-2 vote, with Chairman Newton N. Minow and Commissioners E. William Henry, Robert T. Bartley and Frederick W. Ford in the majority. Commissioners Robert E. Lee and Rosel H. Hyde dissented, and Commissioner T. A. M. Craven abstained.

The brief commission announcement — issued in advance of the official order — didn't give the reasons for rejection of the proposal. But commission officials said the majority felt the commission should not grant its own action, reduce the number of qualified applicants.

What makes this case different from most others in which an applicant seeks to withdraw from a comparative hearing in return for reimbursement of expenses, officials explained, is that a station is already operating on ch. 3.

Normally, what is at issue are two or more mutually exclusive applications for a construction permit to put a new station on the air. The commission, in such a case, could approve a withdrawal in return for reimbursement, in order to speed broadcast service to the area involved.

But in Philadelphia with ch. 3 already in service, the commission sources explained, no public interest would be served in approving Philco's withdrawal.

A secondary consideration on the part of the commission was said to be its concern that approval of the agreement might stimulate the filing of applications for new stations by persons interested in “shaking down” stations seeking license renewals.

“‘There's no evidence of that here,’” a commission source emphasized. “But large sums of money are involved. It might give someone the idea of how to pick up some cash.”

The major rationale reportedly adopted by the commission rejects the arguments of both the commission's Broadcast Bureau and Philco. The bureau was in favor of the withdrawal being approved but the payment denied on the ground that Philco's good faith in filing the application was suspect.

The bureau said there was a “serious question” as to whether the application was a device to improve the bargaining position of Philco Broadcasting's parent, Philco Corp., in its court fight with RCA, NBC's parent, over patent rights. This fight has been settled (Broadcasting, March 7). The commission reportedly doesn't question Philco's good faith.

Philco had argued that the commission doesn't have authority to disapprove the agreement. It said the Communications Act section cited by the bureau as providing jurisdiction applies only to cases involving competing applicants for construction permits.

An agency official said Philco could, of course, pull out of the ch. 3 fight if it wished—“we can't make them stay in.” But, he added, the commission can't approve an agreement it doesn't believe should be in the public interest.

NBC had hoped for FCC approval of the agreement as a means of clearing the way to renewal of the licenses of its Philadelphia stations, WRCV-AM- TV, and the subsequent trading of these properties for RKO General's WNAC-AM-TV and WRKO (FM) Boston.

But even if Philco decides to withdraw, the commission would still have to consider the antitrust activities with which Philco has charged NBC in the lengthy and complex hearing. The charges involve NBC's alleged pressuring of Westinghouse Broadcasting Company into exchanging its Philadelphia properties for NBC stations in Cleveland.

Firing engineer within rights, McLendon says

Gordon McLendon, president of WYNR Chicago, last week denied allegations in unfair labor charges filed against the station by Local 1220 of IBEW (Broadcasting, March 11).

Heart of the dispute, he indicated, is WYNR's right to fire an employee for not doing his job.

The IBEW complaint to the Chicago office of the NLRB charged that an engineer, James Clark, had been fired for his activities in behalf of Local 1220 and claimed that WYNR has refused to bargain in good faith since last fall even though a new contract was signed this January.

Mr. McLendon said, “The employee was discharged for failure to properly perform his duties, and while the station considered all of the demands for operating changes sought by the union, the contract which the union and the station signed in January specifically provided that the engineers would perform their duties as directed.”

FCC reveals ‘roadshow’ hearing costs

The FCC's inquiries into local live television programming in Omaha in January and Chicago last year cost a total of $4,915, according to figures made available by the commission last week.

The figures include per diem costs ($16 a day) for staff members and the two commissioners involved, their travel expenses and the rent for office space in Omaha.

Not included, however, were salary costs. The commission said these costs would have been the same had the FCC officials remained in Washington. There was no indication of the amount of time spent in preparing for the hearing, on the ground that no such records are kept in the commission.

The cost of the Omaha hearing was given as $2,552. This includes $1,152 in per diem expenses for a total of 72 man-days spent in Omaha by Commissioner E. William Henry, who conducted the hearing, and four staff members. Travel cost $900 and office space, $500.

The Chicago hearing cost $2,363. The per diem for Commissioner Robert E. Lee and four staff members who spent a total of 99 man-days in Chicago was $1,584. Travel expenses totaled $779.
NATURALLY... the redskins (they called 'em that because they shoulda blushed for shame!) had the hardy Captain all trussed up and ready for the crewcut. Just then, the chief's favorite daughter, Pocahontas (meanin' "well-stacked") ankles out to the block, drapes herself around the captain in a promisin' fashion, and says "Stop!" That did it. Then and there a great romance was born.

... and just as naturally

as Captain John Smith fell in love with Pocahontas, knowledgeable time-buyers are feeling real romantic these days about WHEC-TV. They’re mighty grateful, too, for the sales results that follow product-exposure to the people of the rich Rochester area via spots on Rochester's top-popular TV station, WHEC-TV, Channel 10.
Newspapers to be welcome in uhf: Minow

‘OPEN DOOR’ POLICY REVEALED AT CELLER'S OWNERSHIP HEARING

Newspaper publishers who for over two decades have felt unwanted in radio and television were urged to come into television last week.

For years, publishers have felt that in broadcasting they were somewhat unwanted. Last week they were assured of a warm welcome by FCC Chairman Newton N. Minow if they applied for uhf and if they have plenty of money to hold out until uhf turns the corner.

The FCC chairman made his offer in testimony before the House antitrust committee, headed by Rep. Emanuel Celler (D-N.Y.). The committee opened hearings last Wednesday on concentration of the ownership of news media.

After hearing Mr. Minow, the committee also heard representatives of the American Newspaper Publishers Assn., Nelson Poynter, publisher of the St. Petersburg (Fla.) Times and Evening Independent, and Loyal B. Phillips, former publisher of the St. Petersbursg Independent.

On Friday the committee was scheduled to hear Norman, Otis and Philip Chandler of the Los Angeles Times and Mirror.

The open door policy for newspaper applicants in uhf was enunciated by Mr. Minow during his discussion of the need for more facilities in order to dilute the percentage of tv stations owned by newspapers.

“Our efforts to improve this situation rest in major part,” he said, “... upon uhf tv and the all-channel receiver. We need applicants who are willing to risk their money in uhf tv for substantial periods of time, with no sure prospect of immediate financial return. If a newspaper publisher appears at our door as the sole applicant, able and willing to enter a large tv market on a uhf channel in competition with existing vhf stations, would we serve the public interest and the cause of diversity itself by turning him away?”

The answer, Mr. Minow seemed to respond, is no.

This was one of the most affirmative actions that came to light in the first three days of the Celler hearings.

The committee, including Mr. Celler, seemed more interested in developing information on monopoly and concentration trends in the newspaper business than in attacking the publishers.

During the course of Mr. Minow’s testimony, these points were made by the witness and committee members.

- The FCC is looking into joint rate policies of newspapers with broadcast facilities in two cities—“upstate New York and Worcester, Mass.” It is also studying the effects of joint printing plant agreements between two or more newspapers with broadcast interests in Honolulu, Shreveport and St. Louis.

- It is looking into a broadcaster’s complaint that the wire services aren’t fair; they both require five year contracts and “almost” identical rates (Broadcasting, Feb. 4).

- It is considering whether to look into situations where newspapers with broadcast stations use each of their facilities for cross promotion.

- Where a newspaper and its radio or tv adjunct editorialize with the same viewpoint, the FCC feels the broadcast station must comply with its “fairness” doctrine; it must afford time for the expression of opposing views.

- Although the commission is again asking Congress to give it the right to hold hearings on transfer cases, it does not seek the principles it followed when it operated under the Avoid procedure. In that process, which the FCC followed for several years shortly after World War II, the commission was considered to be inviting other bidders for the property to be sold.

“Significant and Dangerous” * At one point, Mr. Celler cited three “newspaper

chains” which he said owned among them 45 newspapers, 25 magazines, 10 am radio stations, seven fms, 12 tvs, two press associations, “several” photo services, “several” syndication and feature services.

“Is this not significant?” asked Mr. Celler.

“It is not only significant,” Mr. Minow replied, “it could be dangerous.”

Although Mr. Celler did not identify the chains, he later said he was referring to Scripps-Howard, Hearst and Newhouse groups.

In a discussion of FCC regulations and antitrust violators, Mr. Minow cited the Westinghouse price fixing case where the company was found guilty of violating the antitrust laws. After explaining why the FCC renewed the Westinghouse broadcast licenses, Mr. Minow added:

“In my view Westinghouse is one of the best broadcasting companies in the business... from a public interest point of view.”

Mr. Minow had similar kind words for most newspaper-owned radio and tv operations.

Broadcasting and News • Several times committee members including Mr. Celler observed that broadcasting is not on a par with newspapers in supplying news.

“Television and radio, whatever their other virtues, cannot replace the daily newspaper...,” Mr. Celler said. Broadcasting is “feeling,” he added.

Mr. Minow made this comment:

“Broadcasting cannot wholly substitute for the newspapers it may displace [as in New York]. The relative permanence and convenience of print provides comprehensive reporting which is indispensable to the democratic process. In New York, radio and tv did a herculean job... but they did not substitute for newspapers.”

A more stinging thrust at radio and tv news came when Stanford Smith, general manager of ANPA, was on the stand.

Mr. Celler observed, and Mr. Smith agreed, that the news operations of many radio and tv stations were not comparable to newspaper operations.

Stuart Johnson, majority counsel to the committee, commented that radio and tv stations do not have reporters who are as “inquisitive” as those on newspapers.

Later during this same session, Arthur B. Hanson, counsel for ANPA, insisted that the “freedom of press” guarantee in

BROADCASTING, March 18, 1963
RADIO AND TV STATIONS WITH NEWSPAPER AND/OR MAGAZINE AFFILIATION, 1931-1962

The amount of cross-ownership between broadcasting and newspapers is shown in these three charts introduced in the House antitrust hearings on newspaper concentration. In am radio in 1940, 30% were affiliated with newspapers; now it's only 10.8%. In fm radio in 1950, 36.8% were commonly owned; now it's only 14.6%. In tv in 1950, 42% were owned by newspapers; today the ratio is only 30.5%.

the Constitution applies only to newspapers.

Broadcasting, he maintained, comes under the "freedom of speech" provision.

Competitive Newspapers • In his opening statement, Rep. Celler called attention to the fact that only 52 cities have two separate and editorially independent newspapers. In 1909, he said, there were 689 cities with competitive newspapers.

Also, in the last 50 years, he said, the number of daily newspapers has shrunk steadily—from 2,200 in 1909 to 1,760 today.

After referring to the impact of radio and tv on advertising revenues of newspapers, he called attention to the study done by committee staff on cross-ownership of newspapers and broadcast facilities (see chart). This led him to state:

"... Of itself, such cross-ownership is not necessarily evil. Indeed ownership of a broadcast station may provide profits to keep a competitive newspaper afloat, while at the same time a newspaper publisher may well be able to provide more comprehensive, informed news coverage and editorial over radio and tv than another owner could.

"On the other hand, where the only newspaper in a community owns the dominant or the only broadcast station in the same community, the free flow of news and ideas may indeed be in jeopardy because variety of content is apt to be lacking..."

Personal View • Mr. Minow read two statements to the committee. One was the official FCC position, mainly a recounting of the history of the newspaper issue in Congress and at the commission, and the second a personal view.

It was in the latter that Mr. Minow expressed himself as a friend of newspapers in the broadcast field:

"... Though I could not document this, it is my personal impression that some of our broadcast licensees which are affiliated with newspapers and periodicals are among those broadcasters most serious about service to the public interest. Some of them who have come to broadcasting from a tradition of journalism rather than entertainment have set high standards of independence from advertisers, of emphasis upon informative broadcasting with extensive news staffs, and upon dedication to meeting community needs and advancing community projects."

In talking about the hopes for uhf, Mr. Minow seemingly held out a welcoming hand to publishers:

"Our efforts to improve this situation [more facilities] rest in major part again upon uhf tv and the all-channel receiver..."

Radio-Tv Helps • A newspaper which has broadcast adjuncts is in a better competitive position against its rival newspaper, Mr. Minow declared. He cited an informal study by the FCC staff which indicated that in almost every instance where daily newspapers suspended publication in 1945-1947, they did not have radio ownership; and in the period 1958-1960, they did not have tv interests.

The commission's attitude toward newspaper ownership, Mr. Minow stated in presenting the official FCC position, is hinged to the principle in the diversification of the media of mass communication.

Where all other things are equal, Mr. Minow said, the commission has preferred the applicant who has no other or fewer mass media interests. But, he added, "I have never found a case
where ‘all other things are equal.’”

This does not preclude a grant to a newspaper, Mr. Minow stated. But newspaper ownership is a “significant aspect” of public interest.

**Dilution Works**  In presenting statistics on newspaper ownership, Mr. Minow, aided by H. H. Goldin, chief of the Broadcast Bureau’s research staff, made these points:

* In 1941, daily newspapers controlled or had interests in 31% of all am stations (249 out of 801). In 110 communities the only newspaper there had varying interests in the only radio station there.

* Today the overall proportions have been reduced from 30% to 9% (only 330 out of 3,753 am stations have newspaper connections). Also the number of one-one communities has also dropped, from 110 to 78.

This is due, Mr. Minow emphasized, to the great jump in am facilities.

In television, newspaper interests run about 25-30%, Mr. Minow said. One of the reasons for this, he explained, is that major am radio stations were early in tv and many of them were newspaper-owned stations. In 1953 the proportion of newspaper-owned tv stations to all tv stations was 104 out of 349. Today, 153 tv stations out of 563 total are newspaper affiliated.

**Multitude of Sources**  After deducting joint and multiple ownership, there are 4,993 separate and independent entities engaged in disseminating news over the air and through daily newspapers.

This was the center point presented by Dr. Jesse Markham, Princeton U. economics professor, who at one time was a member of the FCC’s network study staff.

In a special study for ANPA, Prof. Markham found that there are 1,211 daily newspapers, 2,957 am radio, 485 fm radio and 340 tv stations, all separate and independent, providing news to the American public.

### Committee o.k.’s Cox, Thurmond lone dissenter

The Senate Commerce Committee approved Tuesday (March 12) the nomination of Kenneth A. Cox to be an FCC commissioner, and the Senate was expected to confirm him last Friday.

Mr. Cox, who is chief of the FCC’s Broadcast Bureau, would succeed Commissioner T. A. M. Craven, 70, who has been serving since his mandatory-retirement date, Jan. 31. Commissioner Craven will be the FCC’s consultant on space communications.

Sen. Strom Thurmond (D-S. C.) cast the only vote against the nominee, and that was by proxy during an executive session of the committee, which he did not attend. Sen. Thurmond had stated during Mr. Cox’s nomination hearing Jan. 31 that he had several questions to ask the nominee, but would wait for an executive session (Broadcasting, Feb. 4).

Sen. Thurmond has refused to reveal the nature of the questions he wanted to ask Mr. Cox. Asked Thursday why he voted against the nominee, Sen. Thurmond would make no statement, nor would he say whether he would speak against the nominee when his name came before the full Senate. Mr. Cox said he didn’t know why Sen. Thurmond opposes his nomination.

### NAB urges reinstatement of Airlie House meeting

Representatives of broadcasting urged Pierre Salinger, news secretary to President Kennedy, to reinstate the Airlie House meeting with radio-tv, newspaper and magazine delegates.

Mr. Salinger last week postponed the April 5-6 meeting to which media representatives had been invited to discuss charges that the Kennedy administration is managing the news (Broadcasting, Feb. 25). The postponement was due, it was reported, to the fact that Rep. John E. Moss (D-Calif.), chairman of a House committee on information, be-
First of all, what is a Flickerless Quickerswitcher? Ans: any custom video switcher system installed by GENCOM division of ELECTRA MEGADYNE INC. Vertical Interval Switching, pioneered by GENCOM three years before anyone else picked up on it, cuts the line video from one signal source to any other source during the vertical blanking plateau—switches the signals fast fast fast, and eliminates all flicker from the viewer’s screen—hence the name. Second, and of more urgent importance, how can the FQ benefit you? The answer to this depends on you. Can you use improved, updated, better studio switching equipment? Would you like a completely solid state modular audio/video system that virtually cares for itself? Do you desire double re-entry and automatic sync sensing? Would you like to have a studio that makes it possible to run a one-man station with two remote-controlled cameras controlled by the performer on camera? If the answer to any one of these questions is yes, then quick—switch your tale into the telephone and get our representative on scene to talk details.
gins hearing this week on government news policies (see below). There were also unsupported rumors that the meeting's postponement was due to protests by print media men who objected to the role radio-tv was playing. The meeting idea was originated with NAB's Freedom of Information Committee.

An NAB telegram to Mr. Salinger asked that the Airline House meeting be rescheduled after the Mosis hearings conclude. The telegram was signed by NAB President LeRoy Collins, NAB Vice President Howard H. Bell, and Freedom of Information Chairman Frank Fogarty, executive vice president of Meredith Broadcasting Co.

Newsmen being asked to criticize, solve

Representatives of broadcasting and other news media will be given an opportunity this week to tell a congressional subcommittee what's wrong with governmental "news management.

But they'll also get a tough assignment: Come up with some solutions.

Rep. John E. Moss (D-Calif.), chairman of the House Foreign Operations and Government Information subcommittee, said the unit will conduct hearings Tuesday and Thursday (March 19 and 21) in an effort to air the problem — and an attempt to solve it.

Tuesday's session will be a panel discussion which tentatively will include Howard H. Bell, NAB vice president; Herbert Brucker, editor of the Hartford Courant and first vice president of the American Society of Newspaper Editors; Gene Robb, publisher of the Albany Times-Union and a vice president of the American Newspaper Publishers Assn.; Clark Mollenhoff, Washington correspondent of Cowles publications; Charles Rowe, publisher of the Fredericksburg (Va.) Advance and freedom of information chairman of the Associated Press Managing Editors; and Ted Serrill, executive director of the National Editorial Assn.

The first government witnesses will appear Thursday. Among them will be Arthur Sylveste, assistant secretary of defense for public affairs, and Robert Manning, his counterpart at the Department of State. Other witnesses will represent the Space Agency, the Atomic Energy Commission, and personnel responsible for handling highly classified data and information pertaining to national security (the latter in closed sessions if necessary).

Who owns KSHO-TV? FCC wants to find out

The FCC last week announced it will hold hearings to determine the circumstances surrounding the ownership arrangements of KSHO-TV Las Vegas, Nev., the proposed transfer of control of the licensee, and its renewal application.

KSHO-TV has applied to the commission to renew its license, and assign the station's license from receiver Harry Wallerstein to TV Co. of America. If this assignment is granted, Nevada Broadcasters' Fund Inc., the parent company of TCA, would transfer control of the company from Reed R. Maxfield, Carl A. Hulbert, Robert W. Hughes, and Alex Gold to Arthur P. Williams. KSHO-TV is presently licensed to Mr. Wallerstein as a receiver due to financial difficulties, and for the benefit of creditors, an FCC source said. The station also has allegedly failed to file with the commission its ownership agreements.

The FCC last week...

- Reversed its Jan. 12 decision to reassign ch. 7 to Calais from Bangor, both Maine, and returned ch. 7 to Bangor for commercial use. At the same time the commission assigned ch. 13 to Calais for noncommercial educational use.
- Received a petition from Rep. Alvin E. O'Konski (R-Wis.) to allocate ch. 4 to Merrill, Wis. Rep. O'Konski was recently granted a construction permit for a new tv station on ch. 12 in Hurley (At Deadline, March 4). Rep. O'Konski did not indicate if he plans to apply for ch. 4 in Merrill if the allocation is made.
- Received request from Shenandoah Broadcasting Co. to allocate uhf ch. 74 to Charlottesville, Va.

EQUIPMENT & ENGINEERING

Dynair, CCC merge

Dynair Electronics, San Diego, and Communications Control Corp., Van Nuys, both California, have merged into a combined operation that will retain the Dynair name and the San Diego headquarters. E. G. Gramman, Dynair president, will be president and general manager of the new company; Omar E. LaHue, CCC president, becomes vice president and sales manager. Dynair is manufacturer of tv broadcast transmitters and closed circuit tv switching and distribution equipment; CCC designs and manufactures industrial control and data communication systems. Combined sales totaled about $500,000 for year ending April 30, 1963, with a 50-60% increase forecast for the year ahead.

UL moves to Oklahoma City

University Loudspeakers, a subsidiary of Ling-Temco-Vought Inc. now headquartered in White Plains, N. Y., has announced plans to move its plant to Oklahoma City.

University's entire design, engineering, production and electronic research operations will be shifted to a 100,000-square-foot facility now under construction by summer's end. Cost of the installation will be in excess of $1 million.

Temporary offices of the company in Oklahoma City are located at 1411 Classen Blvd., Suite 328.

Penney plans color-set line

J. C. Penney Co., New York, department store chain, is planning to market a private-label line of color television sets in its retail outlets. The company, which has been selling its own line of black and white models, did not announce when the color line would be introduced.

Astatic plans new campaign

The Astatic Corp., Conneaut, Ohio, has announced the purchase of Shure Brothers Inc.'s line of ceramic and crystal replacement cartridges and needles. Shure Brothers' high fidelity lines were not included in the sale. Astatic, which manufacturers needles, cartridges and microphones, plans an immediate, intensified sales campaign.

Etv consultant firm

Louie L. Lewis, former administrator of etv planning for RCA, has formed a new consulting firm to assist educational institutions in the selection and installation of electronic equipment. Mr. Lewis' firm will also offer counsel in the design and layout of the buildings planned to house the equipment.

Mr. Lewis specialized in etv planning during most of his ten years with RCA, and prior to that was chief engineer at WOJ-AM-FM-TV at Iowa State U. Mr. Lewis can be reached at 23 Wesley Ave., Cherry Hill, N. J.

USIA gives Collins contract

Collins Radio Co. Dallas, Tex., has been awarded a $2.32 million contract by the U. S. Information Agency to build nine new high power shortwave transmitters. They will be installed at USIA sites at Bethany, Ohio, and Delano and Dixon, Calif. USIA currently is engaged in a $9.5 million modernization for its broadcasting service, Voice of America.
HERBERT W. SPENCER has written, arranged and conducted for TV since 1953. For 17 years he had been staff arranger at 20th Century Fox studios. With EARLE HAGEN he has provided music for the Danny Thomas and Andy Griffith Shows and the Barbara Stanwyck Theatre. Besides conducting the Joey Bishop Show, Spencer also writes and arranges the entire background score. He has been affiliated with BMI since 1955.

BROADCASTING, March 18, 1963

and there are 104 other regular network programs which use BMI music.
Producers must decide on residuals

METHOD OF PAYING WRITERS APPLIES TO THIS SEASON AND NEXT

Producers of filmed programs for television last week had to choose which of two systems they wish to use in making residual payments to writers this season and next.

By midnight Saturday (March 16) they were required to notify the Writers Guild of America whether they were going to continue to make residual payments to writers on the old basis of a sliding scale based on the writer's minimum salary or on a new plan based on a percentage of the producer's gross revenue. Late last week the returns received by WGA were divided, with many producers still to be heard from.

The choice is this: The traditional plan calls for the writer to receive 35% of the minimum salary scale for the second run (first rerun), 30% for the third run, 25% for the fourth, 25% for the fifth and a final 25% for the sixth run and all runs after that. If a program has six or more broadcasts in a U. S. or Canadian market, the writer receives residual payments totalling 140% of the minimum fee for the original script. Foreign broadcasts do not carry residuals for writers. (The same formula of rerun payments holds for actors and directors.)

The new plan, introduced in the six-year contract signed in June 1960, at the end of a prolonged writers' strike, calls for residual payments to the writer of a flat 4% of the gross revenue from the distribution of the program following its first run (which may include reruns of some of that year's original programs to fill out the original broadcast contract), world-wide and in perpetuity. Unlike the residual payment pattern heretofore used, the royalty plan covers reruns throughout the world and for as long as the program is salable, with no limit.

**Old and New**

In general the producer who expects his programs to be big hits and salable for many more than six runs in a market will choose the traditional pattern. This is particularly true if he counts on much revenue from abroad, which is exempt from residual payments under the old system. Some producers would rather pay residuals on the basis of the WGA minimum salary than open their books to union examiners. And others fear that if the royalty plan works for the writers, it will inevitably become part of their contracts with the actors and directors unions, with the result that residual payments to the guild members might total 15% or more of the producer's distribution revenues.

The producer who does not anticipate more than one or two reruns for his programs may choose to pay the flat 4%. With some exceptions this plan has been chosen by members of the Motion Picture Producers Assn. (the major motion picture companies) and of the Alliance of Television Film Producers. But the three tv networks have elected to stand by the old plan for the filmed programs they own or control.

Whatever the decision, it affects only two seasons: the current one (1962-63) and the next one (1963-64). For the final two years of the six-year contract of the producers with WGA (1964-65 and 1965-66) the 4% royalty plan is mandatory. After that, the residual fee question will again be subject to the negotiations for a new contract between the writers and the producers.

**There's sales life left in pre-'48 films**

A study completed by United Artists Assoc. indicates there is a continued market for the re-sale of selected pre-'48 features and a demand for first-run, off-the-network post-'48 feature films.

Erwin H. Ezzes, executive vice president of UAA, reported last week that these two developments emerged from the company's recent individual pricing of its 2,000 feature films for each U. S. tv market, as prescribed by the Justice Dept. for all distributors.

He pointed out, for example, that in the past 30 days the "best" of the pre-'48 Warner Bros. and RKO Film libraries have brought in contracts amounting to more than $1 million. He noted that many feature film packs made originally in 1956 have come up for renewal in the past few months, and the volume of business generated shows that there is a market for outstanding films, irrespective of their theatrical or tv release date.

With respect to UAA's release of its first-run, off-the-network feature pack-

FOR COLOR... EASTMAN FILM
Who paid what to ASCAP in 1962

Radio and television contributed more than $30.5 million of the $35.3 million grossed by ASCAP in 1962, it was revealed last week.

For their use of ASCAP music the three television networks paid $8,803,790.04 while television stations paid $11,341,274.80; the four radio networks paid $550,965.35; radio stations, $9,861,054.11.

The figures, totaling $30,557,084.32, were contained in papers filed by ASCAP in New York with Judge John E. McGeeran, court-appointed master on the consent decree under which ASCAP operates, in an internal dispute over methods used in disbursing ASCAP revenues among its members (Broadcasting, March 11). At the society's West Coast meeting last month its 1962 total revenues were placed at $35,279,033 but without specifying sources (Broadcasting, Feb. 25).

age, titled "United Artists Showcase for the Sixties," Mr. Ezzes pointed out that in the six months it has been in syndication to stations, it already has grossed 80% of potential sales revenue available for the country. He noted that it has been sold in more than 90 markets, and stressed the contracts have been in many of the major, revenue-producing markets of the country. These post-'48 films were included in a group that played originally on ABC-TV last year, but Mr. Ezzes added there is "strong demand" for these films, despite earlier network exposure.

ITC to syndicate 'The Saint' in U.S.

Independent Television Corp. announced last week it is placing into syndication in the U.S. the one-hour The Saint series, which currently is playing in Great Britain on Associated Television, parent company of ITC.

The series has been on ATv since last September, but has not been released elsewhere. Twenty-six of 39 hour episodes have been completed. The scripts for the series are by Leslie Charteris, author of The Saint novels. Filming has been on location in various cities throughout the world.

A tv crime show strictly for laughs

Production was scheduled to start last Saturday (March 16) on a new comedy-crime series, Sebastian Cabot & The Crime-Busters. The show, produced by Continental/International Productions, Los Angeles, is being taped at the Steve Allen Playhouse.

Co-starring with Mr. Cabot will be Maurice Gosfield (formerly Pvt. Doberman on the Phil Silvers Show), Arnold Stang, Joyce Showlee and Valerie Varda.

Brian Clever will write the show and Paul Werth will assist in production.

Crime-Busters is C/IP's first venture into tv. The firm has a variety of radio programs in syndication.

TV VS. CONFORMITY

ABC-TV's Moore says it must resist pressure groups

If television is to make progress it must resist pressures of conformity "from special interest groups of citizens, from some advertisers and from some public officials," Thomas W. Moore, vice president in charge of ABC-TV, told Chicago's Broadcast Advertising Club last week.

Recalling occasions of special interest pressures put upon ABC-TV during the past year, Mr. Moore observed that even though they may have been brought with the highest motives, such pressures were not the means to ensure that the issues of contemporary life would be grappled with in a forthright or impartial manner.

Television's brief history shows the constant change and progress taking place, he said, noting that of the top-rated programs in 1951 "only one survives today [Ed Sullivan]; of the products advertised on television today, a considerable number did not exist in 1951."

Who could predict what shows the American public will be watching or the products it will by buying a dozen years hence, he asked. "Can we expect the American public to conform indefinitely?" Mr. Moore continued.

Because of the rising level of taste and sophistication, the increase of leisure time and the growing interest in a multiplicity of recreational activities, Mr. Moore said, the broadcaster "must concentrate. . . . on providing a service that people will turn to with expectation rather than simply because it's there." This means trying to be creative, imaginative and exciting, he said.

"It means that the new and the off-beat has to be given a fair viewing," Mr. Moore explained, and "it means avoidance of repetitive and 'me-too' carbon-copy programming."

The ABC-TV official said that implicit in this is the strong conviction that broadcasters and the networks "and not agencies or advertisers should retain control over programs and program content. I am unimpressed by wails of agency people bemoaning the loss in creativity now that they no longer control large blocs of programming as they did in radio and in the wild and woolly days of early television.

"The logic of the situation in television today demands concentration of authority in the hands of people whose only job is to produce the best possible program schedule."

The advertiser and the agency, however, will continue to have very important "and perhaps decisive" contributions to make to the "health of the medium," Mr. Moore said. "For no matter how close we move to the magazine concept as a result of participating sponsorship, television is not a magazine and in many lines there will continue to be a close relationship between program and product."

The question simply will be "what will get sponsored," Mr. Moore explained. He said he hoped advertisers will not merely make pronouncements on the need to foster creativity in tv and then proceed to sponsor "a pale imitation of a program that had been successful two years earlier." Rather, he hoped, "advertisers will show willingness to explore new program fields, new program forms, new talent, new faces."

ABC-TV schedules doctor-type soap opera

More medical-theme viewing is headed for the daytime soap opera audience this season.

ABC-TV has announced a new doctor-type serial, General Hospital, for its 1:13-3 p.m. Monday-through-Friday slot, and a subsequent shuffling of two other shows in its daytime lineup.

Jane Wyman Presents will occupy the 2:30-3 p.m. spot, and Seven Keys moves into the 11:30 a.m.-12 noon period.

General Hospital is the second medical serial presented by a major network for the season. A week ago NBC-TV announced plans for a weekday serial, The Doctors, for its 2:30-3 p.m. time slot (Broadcasting, March 4).

DON'T LET THE ADS KID YOU!

Shedding those excess pounds is never easy, but you'll enjoy a longer life if you succeed

Obesity has become a major health problem in the United States. It is estimated that more than 20 per cent of the adults over 30 years of age in this country are obese, with a much higher percentage being classified as overweight. The mortality rate increases as excess pounds accumulate. Among people who are 25 per cent or more overweight, the mortality rate is 50 per cent higher than for people of normal weight.

How people become overweight is a matter of simple mathematics. If a person consumes 500 calories more per day than needed for energy expended, at the end of the week there is another pound of fat tucked away in those embarrassingly conspicuous rolls around the mid-section of the body. And it isn't difficult to toss those 500 unneeded calories down the hatch. Three martinis at a businessman's luncheon will do the job, or, if your taste runs to things sweet, a quarter pound of fudge serves the same purpose.

We know how we get fat, but many times we really don't know why. Some of us develop childhood eating habits that can only result in obesity if we don't change them. The old tale that a fat child is a happy child should be forgotten, and parents should consider one of their primary obligations to be to teach their children to consume diets that are well balanced in both quality and quantity.

Many of us overeat to satisfy psychological needs that we may not understand and which we have not learned to handle in more satisfactory ways. Eating is seldom simply a matter of stoking the furnace to keep the fires burning. We attach much psychological value to food and to the process of eating the food.

Obesity is a National Health Problem

Obesity is a major health problem and must be attacked energetically if millions of Americans are not to cut their lives short and to live out those shorter lives less happily than their less weighty fellows. Today it is increasingly embarrassing to be a "fatty." The age when "everyone loves a fat man" is dead and gone, and we'll all be healthier for it—if we learn to keep weight under control.

Speaking purely from the mechanics involved, there are two ways to lose weight. You can reduce total food intake to the point where the body fat is called upon to supply calories. The other way to shed pounds is to increase physical activity enough so that the calories expended daily exceed the calories consumed in the food. It now appears that, for most people, a combination of these two methods—less food intake and increased physical activity—works best.

Plan Sensible Weight Control Programs

There are several very important points to keep in mind if someone in your family is concerned about weight reduction or weight control:

1. Motivation: Assuming that the overweight person does not have psychological problems which may require treatment first, everyone in the family can be important in providing the motivation needed to change eating habits to lose weight. There are many positive goals toward which the weight reducer should move. He can concentrate on reducing the risks of early death or serious illness arising from overweight. He should be encouraged to consider his personal appearance and how it might be improved.

Weight controllers need help and encouragement, and much of this can be furnished by the family. A start might be to list all the reasons in favor of losing weight.

2. Medical Supervision: Weight can be controlled without the help of the family physician, but there are many good reasons why medical supervision of the weight control program is the wise way.

Your physician knows you best, from the health point of view, and can help you set a reasonable goal for your weight. He can check your general health and make sure that you are losing weight without damage to your general health.

3. Exercise: Any person not physically handicapped, and whether worried about weight or not, should have a regular program of daily physical exercise. The human body functions better if the muscles are used regularly.

4. Well Balanced Diet: Avoid the crash and fad diets for losing weight, for they seldom succeed in keeping weight down. Often they are dangerous because they do not provide necessary food nutrients. A well balanced diet is one that provides all the different food nutrients—protein, minerals, vitamins, fat, etc.—needed for good health, but balance also means quantity as well as quality. You don't need special foods on most weight control diets. You should eat every day from the four basic food groups: (1) milk and milk products; (2) meat, fish, poultry; (3) fruits and vegetables; (4) breads and cereals.

Select from all these groups, adjusting total food intake to the number of calories necessary to maintain or to reduce weight, depending upon your goal.

Dairy Foods Fit Well In Weight Control Diets

Some people think they must reduce or eliminate milk and other dairy foods to lose weight. If you are interested in losing weight healthfully, keep this in mind: two 8-ounce glasses of milk per day provide for an adult man 25% of the protein he needs, and this is very high quality protein: 71% of the calcium—adults, like children, need calcium to maintain good health; 46% of the riboflavin; 15% of the vitamin A; 10-12% of the thiamine; plus other nutrients in less important quantities. (These are among the essential food nutrients listed as recommended daily dietary allowances by the Food and Nutrition Board of the National Research Council.)

Milk provides all these essential adult nutrients at a calorie cost that is low when compared with other foods that would supply equivalent amounts of these nutrients. Two 8-ounce glasses of whole milk supply about 320 calories. If your doctor has recommended an extremely low calorie diet for you, skim milk, which has about 90 calories per 8-ounce glass, may be substituted. Ordinarily this is not necessary in the weight control diet designed to establish a new eating pattern.

Reprints of this statement and a booklet, Family Feeding for Fitness and Fun, are available at no charge. Write to American Dairy Association, 20 N. Wacker Drive, Chicago 6, Illinois.
WARNER BROS. MAKES BIG TV PLANS

Schedules dramatic series to star Bette Davis

Warner Bros. Television is due for a new look, according to a blueprint for the immediate future disclosed Wednesday (March 13) by Jack Webb, who became top man of the studio's TV division on March 4. The new look, Mr. Webb told a news conference at the Warner Bros. studio in Burbank, Calif., is one which he expects to set "new audience-appeal standards" and to attract "some of the biggest 'names' in entertainment to Warner Bros."

One name already attracted, Mr. Webb said, is Bette Davis, who will star in an hour-long dramatic series to be created and produced by Fay Kanin. The series will not be an anthology but will have a continuing cast headed by Miss Davis, who will appear in each week's episode. Miss Davis owns a piece of the series, Mr. Webb said, noting that this is the first time a performer has shared in ownership of a Warner Bros. tv series.

Another new series in the preparatory stage is a half-hour comedy starring Danyelle Provine, previously a featured performer in the Roaring '20's which Warner Bros. produced for ABC-TV. George Burns will be over-all creative supervisor of this series, in which he will also appear as narrator. Norman Paul and Willy Burns are among writers who will work on this project.

A second comedy series, No Time for Sergeants, based on the successful novel, play and movie, will be written by James Fritzell and Everett Greenbaum, originators of the Mr. Peepers series. Mr. Webb is writer for the current Andy Griffith Show.

Those programs are all being prepared for the 1964-65 season, as is The Federal Investigators, true stories based on the Pulitzer prize-winning book written by Miriam Ottenberg. Robert Conrad, now employed in the Warner theatrical motion picture, "Palm Springs Weekend," is expected to portray one of a team of agents in the new series.

Although buying for the 1963-64 season is virtually over, Mr. Webb said that the pilot for a new series, Temple Houston, is now being filmed in color and should be ready for showing the first week in April. If any late buyer is interested, this series, with Jeffrey Hunter starred in the title role, could be readied to start this fall. William Conrad is directing the pilot for this "factual drama" series dealing with the son of the great Texas patriot, Sam Houston. James Coburn and Preston Foster are also starred in the episode, being filmed under the banner of Apollo Productions, owned by Mr. Hunter.

On the Air - Warner Bros. now has The Dakotas, Hawaiian Eye and 77 Sunset Strip, all 60-minute series and on ABC-TV. Mr. Webb said that nothing is definite regarding the future of The Dakotas and 77 Strip beyond the end of the current season. They have not been renewed and they have not been cancelled," he stated. The same applies to his own series for General Electric Co., True. CBS-TV did not put this into its 1963-64 schedule, he said, but GE has another month in which to decide whether to drop or continue this series, which might possibly move to NBC-TV as an hour-long program. If GE does decide to keep True on the air, Mr. Webb said he would be agreeable to continuing as host of the series, but otherwise he plans to devote himself exclusively to his supervisory production duties.

Mr. Webb's plans call for a maximum of six hours of programming on the air each week: five hour-long dramas and two half-hour comedies.

Unlike the time when all of the Warner Bros. tv production was done for broadcast on ABC-TV, the studio now hopes to have its shows appearing on all three tv networks. Asked about The Giant Step, he said that Warner Bros. had not created this series but had merely produced the pilot for CBS-TV, which had brought the show to the studio. The pilot film is now being shown in New York. Similarly, The Red Skelton Show is produced by Mr. Skelton's own production company on the Warner Bros. premises.

Lee Marvin series put in syndication

United Artists Television has placed the new Lee Marvin Show into syndication [Closed Circuit, Jan. 18]. The company already has completed almost $1.2 million in sales prior to production of the half-hour color series, M. J. (Bud) Rifkin, executive vice president in charge of sales for UA TV, announced last week.

Mr. Rifkin noted that the series has been sold in 50 markets, including 30 of the top 40. Among them are: New York, Los Angeles, Chicago, Philadelphia, Boston, Detroit, San Francisco, Pittsburgh, St. Louis, Dallas, Cincinnati, Baltimore, Indianapolis and Milwaukee.

Production is scheduled to begin in April. It is said to be the initial first-run syndication series intended for prime time showing that has been scheduled for release in 1963. UA TV is selling the series for a fall start.

The series will consist of actuality dramas, based on stories of the nation's police files, which will be filmed with the cooperation and assistance of local police chiefs. Each episode will be produced in color at the locale of the action. Mr. Marvin serves as host of the series and interviews principals in each segment.

Composers Co. formed

The Composers Co., a new producing group for the creation of music for broadcast commercials, Broadway shows and industrial presentations, has been formed by Sol Kaplan, Hershy Kay and Ed Sauter, writers and arrangers. Plans will be completed for establishing offices in New York, Hollywood and London, when Mr. Kaplan and Mr. Kay return from Europe later this year.

'Lucy' show set for '63-64

Lucille Ball has notified her sponsors and network that she will star in The Lucy Show for another season. Lever Bros., General Foods and CBS-TV long

WTVJ(TV) sample gives winners in election

WTVJ (TV) Miami Fla., last week tried its own system for instant election results and, according to the station, predicted all 13 winners of Dade County's March 12 special elections minutes after the polls closed.

The special election was held to select 12 new representatives and one senator to the Florida legislature, which was recently reconvened.

"Operation Sample" was the title given by WTVJ to a vote predicting system devised by the stations' Executive Vice President Lee Ruwitch. Mr. Ruwitch's system is based on the theory that one voting machine in a precinct will almost accurately predict the trend of other machines in the same precinct.

On election day WTVJ placed two-man teams in 20 selected sample precincts. At 7 p.m. the results began flowing in and resulting predictions were ready by 7:28 p.m., the station said. The predictions were based on 5% of the total vote WTVJ said, but guessed five of the 13 races "on the nose." The station said there was an overall 1.2% of error in the WTVJ predictions.

BROADCASTING, March 18, 1963

CHICAGO BOUND?

Then, we hope you will check in at American Research Bureau’s hospitality suite during your stay. You’re cordially invited! We will be on hand to show you new advances in audience measurement and to discuss your individual research requirements. In addition, we are particularly anxious for you to see and have a report analysis that has been specially prepared for your station and market. Your station’s report analysis will be available in Suite 900, Conrad Hilton Hotel. Check with ARB at NAB!
since had indicated their desire to keep the series starring Miss Ball (and produced by Desilu Productions of which she is president and the major stockholder) going for a second season, but the star had until the middle of March to make her own decision. This is the second Desilu-owned series to be set for 1963-64. The other is The Greatest Show on Earth, 60 minute color series starring Jack Palance, which will be on ABC-TV.

20th Century starts sales of new series

Twentieth Century-Fox Television which released Follow the Sun and Bus Stop series to syndication, has sold both of them to WNEW-TV New York and WTTG (TV) Washington, George T. Shupert, vice president in charge of sales, announced last week.

Both one-hour series are off-network properties, having played on ABC-TV. The distributor is offering 25 episodes of Bus Stop and 30 episodes of Follow the Sun.

Film sales ...

"Columbia Post-'50s" (Screen Gems): Sold to KOGO-TV San Diego; KGO-TV San Francisco; KTNT-TV Tacoma-Seattle; WKBN-TV Youngstown; WJAR-TV Providence; WVL-TV New Orleans; WHO-TV Des Moines; WLOS-TV Asheville, N. C.; WEE-TV Peoria, Ill.; KARD-TV Wichita; WOKR (TV) Rochester, N. Y.; WDAU-TV Scranton, Pa.; KOVR (TV) Stockton, Calif.; KMBC-TV Kansas City; WLBW-TV Miami; KLYD-TV Bakersfield, Calif., and KMI-TV Fresno.

33 Feature Films (Embassy Pictures Corp.): Sold to KGO-TV San Francisco; WFLA-TV Tampa; WGR-TV Buffalo and KTVM (TV) Phoenix. Also sold to KUTV (TV) and KSL-TV (both Salt Lake City) who will split titles.

Seven Arts' Volumes 4 and 5 (Seven Arts Assoc.): Sold to WNCT (TV) Greenville, N. C.; WFAA-TV Dallas-Ft. Worth; KOMO-TV Seattle, Wash. and WHAS-TV Louisville, Ky.

Seven Arts' Volumes 1, 2 and 3 (Seven Arts Assoc.): Sold to WNCT (TV) Greenville, N. C.

156 Hanna-Barbera Cartoons (Screen Gems): Sold to WCAU-TV Philadelphia; KTVT (TV) Fort Worth-Dallas; WTTV (TV) Bloomington-Indianapolis; KWT (TV) Oklahoma City; KOLN-TV Lincoln; KGNC-TV Amarillo; WJHG-TV Panama City; WALB-TV Albany, Ga.; WFB-TW Green- ville, S. C.; and KROD-TV El Paso. Now sold in 61 markets.

Dick Powell's Zane Grey Theatre (Four Star): Sold to WPIX (TV) New York. (Reported price: $300,000.) Now sold in 41 markets.

TAC plans program conference

Television Affiliates Corp. will hold its annual programming conference at the Sheraton Hotel in Chicago June 13-14 with approximately 50 program directors expected to attend.

Robert Weisberg, president, said topics on the schedule include: new ideas in children's programming; the influence of research on programming; success stories in the sale of public affairs shows; editorializing; movies and network re-runs, and new programming and production ideas. The agenda for the meeting was arranged by Roy Smith of WLAC-TV Nashville; Stan Cohen, WDSU-TV New Orleans and Lew Klein, WFIL-TV Philadelphia.

Ewell show in syndication

Four Star Distribution Corp. has placed the Tom Ewell Show into syndication and has sold the 32 half-hour episodes to WPXI (TV) New York and KABC-TV Los Angeles for a combined total of $125,000, it was announced last week by Len Firestone, vice president and general manager of the distribution company. The series formerly was presented on CBS-TV.
Ohio River links vast industrial area

NATURAL RESOURCES, CHEAP TRANSPORTATION VALLEY'S SUCCESS SECRET

A midnight traffic jam loomed a few weeks ago at one of the Ohio River's oxbow bends between Louisville and Owensboro, Ky. Three 1,100-foot tows pushed by million-dollar towboats were heading for a crash, judging by patterns clearly traced on the radar screen of the towboat Oreo.

Traffic tieups are frequent but collisions are rare on this crowded river, where tonnage hauled is matched only by the lower Mississippi. Traffic is heavy because one of the great industrial valleys of the world—the Ohio River Valley from Pittsburgh to the Mississippi—owes much of its swift development since World War II to the boost given by the barges.

Within a decade $18 billion has been spent on plants costing a million or more each. They line the river's banks and reach inland, occasionally going far up a tributary such as the Kanawha or Miami. The $18-billion figure was compiled by Ohio Valley Improvement Assn., an organization devoted to the waterways and area development.

The multiplied traffic volume stretches the capacity of the lock-and-dam facilities from Pittsburgh to the Mississippi. Several new and expensive high-lift locks and dams have been built; within a decade the locks will be reduced from 46 to 19, greatly speeding up river traffic.

Busy Thoroughfare • Huge barges loaded with coal, petroleum and chemical products move up and down the Ohio. Towboat piloting requires a blend of skill, experience and hunches. Experienced skippers use all their ingenuity to make fast trips and maneuver their long tows through short locks.

It's a miracle there aren't more collisions. Capt. Charles Robertson, a veteran of the river, was in the pilot house of the towboat Oreo that dark February night. On the radar screen a three-way jam at the pretzel shaped oxbow bend seemed inevitable to an amateur observer. Capt. Robertson was annoyed but unflustered because a young pilot approaching from the rear notified him he was passing with his load of empties. Both were down-river bound; upbound around the sharp bend was a third tow.

After a salty phone exchange in jargon only a river man could understand, Capt. Robertson slowed down his twin
OHIO RIVER LINKS VAST INDUSTRIAL AREA continued

2,000-horsepower diesels and drifted over to the Indiana shore to let the empty tow pass. Right in the middle of the bend the two other tows passed without incident; three in the bend might have meant serious trouble.

The oxbow incident was typical of a dozen, or even a hundred minor problems that occur in a day along the 981-mile river, a lifeline whose importance to the economy of a major area can only be understood by close-range inspection.

**Changed with War** • Pre-World War II the valley was somewhat resigned to a monotonous economic role that blended heavy industry, harrassing floods and fabricating plants. Came the war, and a desperate need for coal, ocean-going ships and the many other things that could be supplied by mills along the river, especially around Pittsburgh. That’s when the old, smoky city started making ocean ships for the military as well as the other products of the metal industries.

Up and down river an observer of the Ohio Valley will find the whole appearance of communities changing. Older cities in the hilly upper valley are still conspicuous for their antique architecture, known tolerantly as Milltown Gothic, but they are feeling the crunch of the wrecker as new glass and metal buildings and attractive industrial plants take their place.

Older steel mills still operate, and they still look like older steel mills. But there are two main differences—older furnaces are being modernized with new oxygen equipment and the clouds of smoke that the sun barely penetrates are starting to subside. Smoggy Weirton, W. Va., classic example of a fumepolluted community, is being surveyed by smoke-abatement engineers.

The industry-lined shores can be seen by a slow drive or even better by a weekend on a towboat such as the Ohio River Co.’s **Orco**.

Steeped in historic lore, the stream flows through beautiful country that must be evaluated from a practical marketing perspective if its basic attributes are to be appreciated. When the economic history of the valley’s 1950-70 development is written, it’s a safe bet the combination of low-cost water transport and one of the world’s greatest stores of underground natural wealth will get much of the credit for one of the nation’s least understood and most spectacular industrial explosions.

**Six-State Area** • From Pittsburgh, leading the upper valley in its commercial and industrial renaissance, on down to the flats where the Ohio joins the Mississippi, the six-state region offers literally hundred of lessons in economic adjustment and the importance of basic industry.

All around are the primary needs of hungry plants—cheap coal and hence cheap power, economic transport, metal low-water problem and minimal stoppage from freezing and flooding.

- Army engineers are reducing flood threats as new dams are built.
- Ohio tonnage exceeds that of Mississippi River (excluding ocean tonnage).
- Best coal veins in the world are within easy haul; 80% of nation’s coal mined in the valley. There’s natural gas and oil, too, plus pipeline crossings.
- Over three times as much water empties into the Mississippi as enters at the mouth of the Missouri. The 981-mile course has only a 427-foot fall from Pittsburgh to Cairo, III.-Wickliffe, Ky.
- Eight-state cooperative cleanup campaign has brought sewage-treatment to 95% of the population along the river.
- Diversified economy, ranging from steel at Pittsburgh, Wheeling-Steuben-

Fourteen 195 x 35 foot barges carry 21,000 tons of alumina up the Ohio to the Olin Mathieson Chemical Corp. plant at Clarington, Ohio. Tows consist of as many as 21 barges. An average railroad car carries only 50 tons.
How does KQV succeed in winning 24% of the Pittsburgh radio audience?

First of all KQV is not satisfied with featuring the finest personalities in the Pittsburgh area. KQV wants to give their listeners more. And they do.

KQV is Pittsburgh's first station for news. Pittsburgh listeners know where to turn first for news. At the 14 spot on their dial they get direct, on-the-spot reports of local, national and international news. They get reports from people making the news as it happens. A good example of this is KQV Newsman Allen Boal, who keeps an ear on the turbulent Cuban situation. His monitors of important Radio Havana broadcasts are featured regularly on KQV and ABC News reports.

Since he returned from Cuba, where he served as pool reporter for all U.S. radio and television aboard the Red Cross ship Shirley Lykes during the prisoner and refugee exchange, Boal has appeared on Howard K. Smith's ABC News program and before several Pittsburgh civic groups to relate what he saw inside Cuba.

KQV serves the community interests. Three recent community action projects illustrate how KQV wins the response and respect of Pittsburgh listeners.

The first occurred last fall when it was learned that pledges to the United Fund were short of its goal. KQV acted swiftly and turned over its entire facilities to the city's leading business men on "Million Dollar Wednesday," KQV's "outstanding cooperation" was instrumental in the drive's success in Allegheny County.

An earlier KQV project initiated community action for driver education programs in Pittsburgh high schools. The campaign aroused enthusiastic support and was commended by Pittsburgh civic leaders and educators. This drive was one of the projects which earned KQV the coveted Allstate Safety Crusade award for the year 1962.

Still a third community action project may save some lives. KQV not only urged listeners to use seat belts but saw to it that they could buy them at cost from the station. The response was so encouraging that KQV plans to continue the promotion several times during the year.

KQV personalities generate listener response. In a recent audience promotion KQV personalities offered to make "nice things happen for KQV listeners." Did the listeners react? In just 18 days Jim Gearhart, Henry Da Becco and Dave Scott were deluged with over 31,000 cards and letters from listeners.

What does it take to win 24% of the Pittsburgh audience? It takes News...it takes COMMUNITY SERVICE...and it takes EXCITING PERSONALITIES to win that kind of audience. Obviously, KQV has what it takes. (See your Eastman for more details.)

vile and Ashland, Ky.; aluminium and chemical complexes; livestock, corn, soybeans, wheat and other farm products in Kentucky, Ohio, Indiana, and Illinois.

- Largest atomic facilities in U.S., totaling over $22 billion in original facilities. It's often dubbed Atom Valley.
- Largest power-generating capacity in world; highest voltage transmission line; 9% of U.S. electricity generated.
- A riverside power plant can get its coal around $4.50 a ton compared to $6.37 nationally, or 1.9 mills per kw per hour compared to 2.9 nationally, according to one power system executive.
- Solid base of natural resources, industrial, commercial and transportation facilities for the future.
- Over 130 new chemical plants built in a decade.
- Barge tonnage is more than double the total tonnage at the port of New York; it may someday exceed the Panama Canal and St. Lawrence combined. The yearly total for the Ohio and tributaries is 105 million tons, and rising.
- Around 1970, it's predicted, the Ohio River will be carrying 150 million tons a year. Long ago it passed the Panama Canal and St. Lawrence Seaway tonnage. Even now ocean-going boats are being built at Pittsburgh and Marietta, a trick learned during World War II.
- "Bigger, much bigger things are ahead as the new Ohio River takes shape," said Col. R. W. de Lancey, executive officer of the Army Engineers at Cincinnati.
- Looking back a few years, say 10 or 12, will show these new facilities, with the area's natural lures given credit for their selection of valley sites:
  - Electric generating plants $4 billion
  - Atomic energy operations $2 billion
  - Chemical production $2 billion
  - Iron-steel $3 billion
  - Aluminum $2 billion.
- The Atomic Energy Commission lists these main atomic plants:
  - Kentucky—Paducah, gaseous diffusion, feed materials (operated by Union Carbide & Carbon), $783 million.
  - Ohio—Research facilities of General Electric at Cincinnati; Portsmouth gaseous diffusion, feed materials, $763 million; Goodyear Atomic Corp., Fernald, $115 million; Mound Lab (Monsanto) Miamisburg, O., $35 million; Piqua reactor $8 million.
- Pennsylvania—Bettis plant (Westinghouse) $49 million; pressurized water reactor, power generator (Duquesne Electric) at Shippingport, $50.5 million.
- Other facilities are at Madison, Ind., and Joppa, Ill.
- Among aluminum facilities are Alcoa at Pittsburgh and Evansville; Kaiser at Ravenswood, W. Va; Olin Mathieson at Hannibal, Ohio; Harvey at a site east of Owensboro plans a $50 million aluminum rolling mill; Reynolds employs 2,300 at Louisville; Anaconda Aluminum also is at Louisville.
- Going West—This long, busy valley starts at Pittsburgh where the Monongahela River flows north of the West Virginia hills to meet the south-bound Allegheny to form the Ohio (photo page 75). Naturally the Ohio became the artery for west-bound pioneers, who built assorted canoes and flatboats to haul their families and goods down-river to the wilds of the west.
- At Pittsburgh one of the greatest industrial empires in the world extends in all directions, then narrows to a plant-lined double strip as the Ohio jogs temporarily northward before starting its generally southwestern course.
- At the mill town of Rochester, 30 miles northwest, the Ohio does its jog, soon moving into hill country that lines the river for about 200 miles. The terrain is rugged but the riverside flats are heavily lined with mills to Weirton, Steubenville, Wheeling and Moundsville. Marietta, Ohio, and Parkersburg, W. Va. have plant clusters but most of the industry south of Wheeling is on the West Virginia side of the river where rail facilities join barges in providing transportation for industry.
- Again moving southwestery, the river's industry is in West Virginia and Kentucky. Between Parkersburg and Huntington the Kanawah River meets the Ohio at Point Pleasant. This West Virginia stream is the scene of another important industrial empire, being located right on coal and salt seams. This fortuitous combination of natural resources and water transport extends from the junction up the Kanawha past Charleston, an ideal location for chemical, metal, power, glass and other industries.
- Another Market—Down the Ohio from Point Pleasant and due west of Charleston 45 miles is the Huntington, W. Va.—Ashland, Ky.—Ironton, Ohio market, another major industrial center. Moving northwestward through Portsmouth at the junction of the Scioto River, a steel-chemical community, the Ohio winds its way southwest then resumes a northwestward course to the Cincinnati market where Licking River enters from the south. The Miami River flows south from Dayton, meeting the Ohio close to the Indiana border.
- From this point the river sticks to a southwesterly direction in a snaky way, passing Louisville, Owensboro, Evansville-Henderson. The Cumberland and Tennessee rivers flow into the Ohio at Paducah and the Ohio ends its 981-mile trail at Wickliffe, Ky. and Cairo, Ill.
- Except for the 50-mile leg of the Ohio starting out of Pittsburgh, the Ohio River is owned by West Virginia and Kentucky, with the latter state having the biggest share, over 650 miles. Pennsylvania, of course, owns the 50 miles entirely within its borders. This quirk in state ownership traces back to colonial charters. While it's fine to own a river, the owning state is saddled with the regulatory and bridging responsibilities.
- One widely used figure places barge haulage cost at 4 mills a ton mile compared to 11 mills for railroads.
- That differential was behind the observation of a Chesapeake & Ohio Railroad executive in Huntington, W. Va., as a long tow could be seen moving up-river, "There goes tour 100-car trains, pushed up a tax-free river, yet the In-

Out of fiery furnaces like this comes the steel that provides the backbone of the Pittsburgh economy. Many plants are now being modernized.

Ohio River Links Vast Industrial Area continued

The Commerce Commission won't let us get into the barge business and develop an efficient rail-barge service."

C&O has some of the nation's largest and most efficient facilities in the Huntington-Ashland area. It's planning to modernize the old Baltimore & Ohio trackage from Huntington to Pittsburgh, now that it has absorbed the B&O. The Norfolk & Western has modern facilities at Louisville. It shares tremendous coal trains. The 19-barge tow also included steel and a number of empty barges. At peak the towboat moves the equivalent of 400 hopper cars of coal.

Railroads vs Barges • The N&W has a large classification system at Portsmouth, Ohio, and yards at other points. Both aggressively managed, these two outstanding carriers are facing up to barge competition by developing new business and modernizing methods and facilities.

Barge cargoes break down this way: coal-cake 55%; petroleum 20%; stone, sand, gravel 12%; iron-steel 5.5%; chemicals 3%. On a ton-mile basis petroleum takes the lead, helped by the long barge haul from Texas. The Kanawha River carries nearly 11 million tons a year, led by coal and chemical products.

The Ohio River Co. is the world's largest river hauler of coal. On a recent downriver trip the Orco was pushing nearly 15,000 tons of coal, equivalent to three 100-car trains, a load of steel and some empties. A loaded tow can handle four trains.

Towboat operating is tricky navigating. The river is full of bends and currents. Sometimes it's high; sometimes it's low. But it's open the year round, except for an occasional sub-zero spell (three days of ice in the 1962-63 winter). Skippers know every sandbar, marker, and buoy. A towboat can run as much as 330 24-hour days a year; river men say it can move a 1,000-ton barge load 2,000 miles for the cost of shipping a 40-ton car 100 miles by rail.

The competitive transport costs get into emotional interchanges when railroads, owners of rights-of-way, rolling stock, stations, and trackage as well as heavy taxpayers, contemplate the free rivers, roads and air that barge, highway and air carriers enjoy.

Booming Business • Barge business has boomed on the Ohio, tripling in two decades to 80 million tons or 19 billion ton miles a year. Low-cost hauling and availability have attracted chemical, aluminum, steel and electrical generating facilities, which in turn use more and more of the oil, coal and other raw materials brought in by barge lines. It's a fortuitous situation for both and it's interesting to note that rail carriers in the valley are doing a lot better than the national rail average.

Barge interests are deeply concerned by proposals to tax diesel fuel and charge river tolls, claiming the nationally interlaced industrial and river transport balance can be upset to the detriment of both the public and carriers.

In the best tradition of the barge business, the Orco is spanning clean despite its black-diamond cargoes. Rooms for the crew are neat and comfortable. Exquisite smells seep out the big, stainless-steel kitchen and the chow is up to hotel standards.

"Times have sure changed," recalled Capt. Robertson as he turned on a three-mile searchlight beam to check on markers. "When I first started on the river the crews were mostly roustabouts. The first man on watch was the best-dressed man on the boat; the rest wore what was left and hoped the shoes would fit."

The Orco's crew works 30 consecutive days and is off 30 days. Each workday is divided into four six-hour sections; the men work six hours, rest six hours, work six hours and rest six hours — 6 a.m.-noon; noon-6 p.m.; 6 p.m.-midnight; midnight-6 a.m.

Skilled Workmen • Building a 1,100-foot tow is no job for amateurs. On a recent trip Capt. Robertson drew on his skill and experience to hitch up 19 coal and steel barges of assorted sizes including empties. Some distance below Cincinnati he tied up to a cottonwood tree on the Kentucky side. Two hours later he and his pilot, Clarence Walker, had fit the assorted barges into an efficient tow, keeping several that were to be dropped off en route up front for easy disposal.

Traffic jams at the older locks are costly. A two to six-hour delay at $50 to $100 an hour per tow adds two or more days to the Pittsburgh-Cairo trip. The Army Engineers are putting in dams and high-lift locks as fast as they can get the appropriations. Final completion of the 19 new locks in the 1970s is expected to start a brand new Ohio Valley boom. But industry and barge interests look with misgiving on fuel taxes or tolls that would boost the cost of efficient river transport. They explain that steel can be shipped at one-fourth the rail cost, grain and chemicals at half the cost. Coal and oil, two of the main cargoes, move cheaply. Petroleum products can be shipped from Texas right into the industrial centers. Cheap coal means cheap power which means cheap aluminum and chemical production. It won't be long, river men say, until the Ohio Valley is producing over 10% of the nation's electricity.

The billion-dollar rebuilding of locks and dams can't be done in a few years. The Greenup facilities in Kentucky, for example, cost $54 million. But they permit faster river movement. A tow can take up to 18 or 20 35-foot wide jumbo barges in the 110 x 1,200-foot locks.

That's the story behind the story of some of the nation's great markets, saturated by radio and television stations that reach as many as three million people from a single transmitter. It's the story of Pittsburgh, Wheeling, Steubenville, Huntington-Ashtabula, Charleston and west central West Virginia, Cincinnati, Louisville, Owensboro, Evansville and other nearby markets.

The Valley of Tomorrow, they like to say of the Ohio with its distinguished past and thriving today. Yesterday, today, tomorrow—they add up to an economic saga that delineates a story of America on the march.

Pittsburgh, old city with a new face

NEW SKYLINE, SMOKE-FREE AIR LEADING TO INDUSTRIAL RENAISSANCE

Pittsburgh is a perfect example of what a billion dollars can do for a city that had a glorious past but a gloomy future.

About the time the Steel City was starting to reel with the impact of the post-World War II rollback, the civic and industrial leaders were starting to wonder if they might just as well forget the municipal results of 190 years and abandon the joint.

Smoke was still belching from the stacks while a nation casually watched in pity. An occasional comedian still fed the hoary cue to his partner, “I’ve just come clean from Pittsburgh,” and then led the guffaws at the reply, “How do you come clean from Pittsburgh?”

That’s when the heads of U. S. Steel, Gulf Refining, Mellon Bank and the Chamber of Commerce, plus the mayor and countless other hardy souls, reached one of modern America’s courageous decisions. Abandon Pittsburgh? Never! Especially with all those plants, some of them on the elderly side, and all those office buildings and nearly 2 million dependent citizens.

The story of the Pittsburgh renaissance is an oft-told saga of local courage and initiative and cooperation. A guest at the Pittsburgh Hilton—the Golden Hilton on the Golden Triangle—can look down on the famous Point and 23-acre Gateway Center, where westbound pioneers huddled in the shadow of the British-built blockhouse en route to unknown frontier mysteries. He can look down and, no longer handicapped by heavy smoke, can see the rebuilt blockhouse on verdant acreage overpassed by the fantastic spaghetti of a modern highway complex. And he can face away from the confluence of the Allegheny and Monongahela, forming the Ohio River, to see some of the world’s most costly architecture where shabby slums stood a few years ago.

Little Smoke Left • For Pittsburgh, the Smoky City whose title was derived from the combined sort of bituminous-burning homes and busy mills, has abated 70% of its smoke at a cost of $250 million.

A boon to beer drinkers is this new aluminum zipper can of Aluminum Co. of America in Pittsburgh. It has container makers concerned.

Industry and dwelling owners have merged their civic loyalty, with a boost from appropriate legislation, to restore clear sunshine to an area that once resembled Los Angeles smog at its worst, with the enhanced curse of coal and chemical fumes.

Yet this is only a start. Elaborate plans for the future include a downtown-splitting roadway, more slum eradication and new construction, downtown malls, an enormous educational-business-research center at nearby Oakland (three miles from downtown), a new Northside. The list is ambitious.

Among educational facilities in or near Oakland are U. of Pittsburgh, Carnegie Tech plus nearby Chatham College and Duquesne U. Pitt is second largest private employer in the city, with a $51-million annual payroll (including research), and it is developing branches at Greensburg, Bradford, Titusville and Johnstown. Its 42-story Cathedral of Learning is an educational showplace.

“The University of Pittsburgh, founded shortly after the Revolutionary War, will be one of the 10 leading universities in the world,” said Dr. Robert D. Entenberg, marketing professor of the Pitt graduate business school and an outstanding authority on the area’s economics. Pitt has 14,000 students, is growing fast and has just been designated a top space research center with a $333-million grant as a start. New dormitories are pie-in-the-sky shaped.

Underrated Market • “Pittsburgh is one of the most underrated markets in the nation,” Dr. Entenberg said. “The

The largest retractable-dome civic arena in the world is located in the center of Pittsburgh. It’s used for conventions, sports and cultural events. When the weather is good, the roof is rolled away.

acute unemployment, now averaging 8% to 9%, is a decade old and the worst is over. Steel was up in mid-February. Most flood-control problems have been solved. Steel plants are spending hundreds of millions on new equipment and oxygen techniques. Business last year was 5% above 1961, approaching the 1957 alltime peak.

"This market has 13 billion tons of coal reserves, gas, oil, water, limestone and modern transportation by air, surface and rivers. The Pittsburgh Renaissance stopped smoke and floods. Now keep an eye on the future. Don't underestimate Pittsburgh."

Take a quick look at some high spots of the Pittsburgh market:

* Allegheny County alone has more factory production than 31 of the 50 states (metropolitan Pittsburgh includes three other counties).
* In the immediate Pittsburgh area there are 1,600 plants, with 200 having more than 100 employees each.
* Nine major installations are in the nuclear power business; there's nothing to match this in the nation. Most of the nuclear Navy is powered by Westinghouse-built plants.
* The four-county metropolitan area makes 6,000 products; employs 275,000 in production whose income is $1.7 billion yearly.
* Of the 500 largest U. S. industries, 55 have plants in the area; 25 headquarters in Pittsburgh. Value added by factories is over $3 billion a year.
* Over 100 research and testing laboratories employ 20,000 who earn $150 million a year; investment is $300 million and expanding. One-fifth of U. S. industrial research is in the area.
* Chemical plants comprise a $1 billion complex, with $42 million payroll for 7,000 persons.
* One-fifth of U. S. steel-making capacity is in the metropolitan area, producing about 20 million tons.
* Export sales of 250 concerns headquartered in Pittsburgh exceed a quarter-billion dollars yearly.
* Sixth largest U. S. metropolitan market, seventh in retail sales, eighth in population; retail sales are near $3 billion mark; ninth largest U. S. manufacturing center.
* Trading center of populous tri-state area (Pa., Ohio, W. Va. triangle); 6½ million people in 56-county marketing area.
* Measured by television coverage, Pittsburgh is a 29-county market with an estimated $9 billion to spend.
* Home office of largest aluminum industry, steel, plate-window glass, refractories and many others.
* One-fourth of nation's iron ore smelting.
* First atomic electric power plant at Shippingport.

The sky-piercing Cathedral of Learning on the U. of Pittsburgh campus adjoins the renaissance architecture of beautiful Heinz Chapel.

* Second only to New York in new office space added since World War II.
* One-fourth of downtown business district rebuilt.
* New highways in last decade cost $400 million; $500 million earmarked for next decade.
* America's largest inland river port; more tonnage than Panama Canal.
* Three-fourths of families in middle and upper-income brackets.

Five skyscrapers are going up, joining the 27 major buildings erected in the renaissance drive. The $22 million civic auditorium is the largest in the world with retractable dome. The luncheon talk in Pittsburgh inevitably gets around to the new local image. They even are thinking about a downtown monorail. Mellon Square Park has a six-story underground garage. The reputed second largest U. S. airport is being enlarged.

U. S. Steel has a series of major improvements, including National Tube
THE SMOKE AND GRIME HAVE LEFT PITTSBURGH. THE PEOPLE REMAIN. AND PEOPLE ARE WWSW'S ONLY CONCERN.

overhauling. That's where they
developed the hot-dog-shaped flasks that
guide Polaris missiles out of sub-
marines. Oxygen converter furnaces at
the Duquesne Works and improvements
at the Irvin Works will hit the $50 mil-
ion mark and keep going. Total steel
industry improvements will reach $300
million, including Jones & Laughlin and
fabricators.

Fresh Start • "Pittsburgh can have
an industrial renaissance as meaningful
as the civic renaissance," said Leslie B.
Worthington, president of U. S. Steel.
The Corporation, or Big Steel if you
prefer, was all shook up last spring
when the June 8, 1962 issue of Time
magazine ran a picture of the local
stacks with the caption, "Banked fur-
naces in Pittsburgh; The bread and but-
ter were getting thin." What irked the
Corporation, a spokesman said, was the
fact it had spent a fortune on smoke-
abatement at the site and the fur-
naces, instead of being idle, were op-
erating 100% at the time the photo
was taken.

But steel has its problems—Alcoa for
instance. The aluminum giant, with a
zipper beer can (see photo, page 82)
among its many new items, has the
steel and glass-container industries in a
sweat. Steel has come back with cans
made from high-strength tinplate the
thickness of this printed page. The final
decision will be up to the consumer. At
Duquesne new equipment will produce
150 tons of steel in 40 minutes com-
pared to the former eight hours.

The standard metropolitan area con-
sists of 2 1/2 million people—Allegheny
County 1,651,000; Westmoreland
361,000; Washington 219,000 and
Beaver 213,000. Every few miles there
is an important market, moving out in
every direction—Greensburg, Washing-
ton, Johnstown, Ambridge, Latrobe,
Jeannette, New Kensington, Vander-
grift, Beaver Falls, Carnegie, Connells-
ville, Uniontown, Butler, to name a few.

It's important to remember in look-
ing around the new Pittsburgh that the
next decade will bring even more dra-
matic changes. Money and spirit saved
a city; more of the same will dress up
this 205-year market into one of the
most efficient and attractive commu-
nities in the nation. At least that's the
way these progressive people are talk-
ing and acting.

The spirit of the renaissance is
spreading out around Greater Pitts-
burgh in all directions and into the Pan-
handle where Ohio, Pennsylvania and
West Virginia meet. Factory pay is
high—18% above the national average
with high living standards. One nearby
city, McKeesport (50,000), has its own
civic pride. The local Daily News will
not carry Pittsburgh store advertising
though only 14 miles away, a business-

Research is big business in Pitts-
burgh. A U. S. Steel scientist at work.

man said. The famed Pittsburgh de-
partment stores deliver to a 14-county
area.

Blaw-Knox, Crucible Steel, Gulf,
Heinz, Koppers, Westinghouse Elec-
tric—these are a few of the business
giants based in Pittsburgh. They do
things in a big way in this old city with
a new face.

This is the city that once moved
Frank Lloyd Wright to exclaim after
looking over the place, "Abandon it."—
a bit of professional counsel that was
happily ignored.

UPPER VALLEY PLANTS BUSY

Wheeling, Steubenville, smaller cities nestle along Ohio among teeming industrial complexes

About 40 miles northwest of Pittsburgh, where the Ohio River does an abrupt turnabout to the south, the river shores are lined with a concentration of industry and commerce referred to as the Upper Ohio Valley.

Geographically the region is more accurately described as the Tri-State or Panhandle area. But the definitions start stumbling over each other as the Pittsburgh metropolitan area becomes the Pittsburgh trading area, or roughly the cities and towns influenced by Pittsburgh television.

At the Pennsylvania-Ohio line the Ohio River residents start thinking in terms of two important down-river markets—Steubenville-Weirton and Wheeling-Bellaire-Moundsville. It's all a bit confusing to map watchers but to those who think in terms of markets the Ohio River cities and related environs are important business, industrial and transportation centers of more than 1.75 million people having close commercial ties.

To those whose perspective is oriented to such practical matters as people and dollars, the Upper Ohio Valley thus becomes a tri-state area that starts roughly where Pittsburgh's built-up area stops—McKeesport on the northeast and Rochester, Pa., on the northwest. Of course there is Pittsburgh tv overlap, but Wheeling and Steubenville stations assert their identity by showing one of the nation's most impressive industrial structures along the populous Ohio River shores and loyal audiences inland.

Industrial Complex • Industry is concentrated in the valley and spotted out into the outlying hills, but population is even more huddled within range of the hundreds of industrial plants that comprise one of the nation's most important groupings of smelters, fabricators and processors—all served by a tremendous network of barge lines providing cheap haulage of bulk materials.

These industries and the associated service functions provide income for the thousands of schools and places that are mapped by municipal boundaries. But the officially chartered community boundaries become meaningless to the market-minded observer who motors through Weirton, Steubenville, and Martins Ferry and then crosses the river into Wheeling and Moundsville. That's why those who sell via the airwaves also think of Wheeling and Steubenville in terms of Washington, Pa., East Liverpool and Cambridge, Ohio, and southeast toward Morgantown, Fairmont and Clarksburg, W. Va.

If the geography and civic semantics are intricate, the economic facts aren't. Besides the two major steel plants—Weirton Steel and Wheeling Steel—the river flanks are lined with such industrial giants, such as Koppers Co., Vanadium Corp., Titanium Metals, Ohio

An Upper Valley steel scene showing Wheeling Steel plant in Wheeling-Steubenville complex. Basic steel-making operations take place here.

ABC RADIO COVERS THE OHIO VALLEY WITH POWER

WWVA
50,000 WATTS

WWVA is only one of the powerhouse stations in the Ohio Valley that are now part of the growing ABC RADIO NETWORK. Others are WCKY Cincinnati, WHAS Louisville and KQV Pittsburgh. And the power behind these stations is their own local programming combined with the long-time popular programming, the unmatched news coverage and the new programming that only ABC RADIO offers National Advertisers.

The facts have changed in Network Radio—ABC RADIO is the reason for the change.
The important markets of the 981-mile long Ohio Valley are understood only by a city-by-city inspection of industrial and commercial facilities and interviews with hundreds of businessmen and industrial leaders.

This story of the valley's growth and the fast spread of manufacturing and chemical plants along the Ohio River shores is based on a 3,000-mile series of inspections by J. Frank Beatty, BROADCASTING senior editor.

The month-long tour was made by auto, airplane and a 400-mile ride on a coal and steel tow, pushed from Cincinnati to Owensboro, Ky., by the million-dollar towboat ‘Orco’ of the Ohio River Co., a major barge transport system.

Ferro Alloys, Allied Chemical, Mountaineer Carbon, Union Carbide, Olin Mathieson, Columbia Southern Chemical, Mobay Chemical, Fostoria Glass, Bloch Bros., Sylvanite, Blaw-Knox and huge power plants and big coal operations needed to keep a major economy in operation.

Within the trading influence of Wheeling (54,000 in central city) and Steubenville-Weirton (60,000) are, for example, such towns as East Liverpool, Ohio (23,000), Clarksburg, W. Va. (28,000), Moundsville, W. Va. (16,000), Washington, Pa. (25,000), Cambridge, Ohio (14,500), McKeensport, Pa. (45,000, but a community of considerable local identity), Fairmont (28,000), Morgantown (22,000) in W. Va., and Waynesboro, Pa. (11,000). These figures are city-only and do not take into account the outward movement from central cities, but they indicate the high saturation of the area's population.

Factories Busy • A tour around the area leaves memories of belching stacks. The residents prefer it that way, at least until installation of costly precipitator and oxygen units is complete. When the older stacks stop pouring out over the nearby landscape, the situation gets serious. Meanwhile Weirton Steel and Wheeling Steel are considering means of abating the fumes. Kaiser engineers have been studying the Weirton plant's smoke problem; both Weirton and Wheeling are converting to interim and permanent oxygen processes, the latest thing in efficient steel production.

The separate and interlocked communities in the Upper Ohio Valley enjoy diversified industrial support. Wheeling has steel, glass, pharmaceuticals, toothpaste tubes, toys, glassware, chinaware and food products, to mention a few leaders.

Steubenville-Weirton, straddling the tri-state Panhandle and the Ohio River have iron, steel, tin plate and containers, fire clay products, tar, coal, coke, wallpaper and many others. East Liverpool, at the northern tip of the three-state triangle, is a steel and a ceramic center turning out porcelain, chinaware and bricks. It is 25 miles south of Youngstown, Ohio.

The key cities lining the river from E. Liverpool to Moundsville have a central-city population of 185,000. Reaching inland to interrelated cities, the 10-county population exceeds 600,000. This figure is almost tripled when the basic tv-covered area is included, and a little more antenna height can add still another 300,000 or more to the audience.

Common Economy • From a Wheeling eminence, the Ohio shore a mile away offers an enigma in economic images. Except for the barge-dotted water strip, southeastern Ohio and western West Virginia are part of a common economy. Yet West Virginia bears the unjustified and unrealistic stigma of poverty and Ohio doesn't, mainly due to effects of the 1950-60 automation of the coal industry and one-sided journalistic exploitation of the problems of displaced families in areas 100 and 200 miles away (see page 92).

Moving southwestward down the Ohio, the West Virginia shores have superior rail facilities and a heavier concentration of industrial plants. Both sides of the river have huge electrical power generating facilities, due to availability of coal and low-cost water transport.

At one time some of the industries on shore sites were unhappy with their flood troubles. Now West Virginians claim they have better flood protection than the Ohio side of the river but both sides are benefiting from extensive flood-control dams (with new locks) that help keep the river under control though they still get some flooding during the rains and melting snows of March.

Historic Wheeling, where the hand-wrapped, twisted cigar was called a stogie (presumably after the Conestoga wagons enroute westward, stopping to stock up on smokes), continues as a tobacco center. Bloch Bros. still makes stogies, Mail Pouch chawin' tobacco and other lines.

Wheeling early became a wholesaling city and still is a center of food brokers,

distributors and industrial supply houses. An older market with a frontier background, Wheeling is now deep in urban renewal and municipal improvements. It has exceptional parks, including famed Oglebay Park, with skiing, golf and many other types of recreational facilities—largest park in the upper valley. There’s even a museum at this vast year-round center along with a huge lodge and auditoriums—all within the city limits.

Wheeling Steel, 11th in the U. S., with $220 million sales in a year and a $300 million plant investment, is spending $170 million on improvements, including conversion to oxygen-blown steel. In the interim oxygen is being added to older furnaces. The tin mill was modernized at a cost of $40 million. Steel plants in the area are ahead of many other centers in modernization. They are on barge routes and are located close to the four largest steel-consuming states—Ohio, Pennsylvania, Illinois and Michigan. Blast furnace yield is way up since development of steel pellets and oxygen methods.

Weirton Steel (National), another major, also gives the upper valley a strong basic foundation for industry. Steel production in the area was increasing in the first quarter of 1963.

New Highway • When Interstate 70 is completed at Wheeling it will run right through the center of the city, first passing through a tunnel and then crossing the river. This will draw extensive highway traffic to and from Atlantic states and the Midwest.

Wheeling has a five-year-old Jesuit school, Wheeling College, with an attractive campus, modern buildings and facilities for 1,000 students.

Wheeling Steel and Weirton each have about 13,000 employees. Total payrolls of the two run as high as $175 million a year. Wheeling Stamping is one of the largest makers of lead and aluminum toothpaste tubes.

The abrupt hills of Wheeling are topped by new and attractive residential sections, in contrast to some of the older areas typical of a river city that has a colonial background. But the wreckers are knocking down some of the worn-out blocks and soon more new buildings will join the architecture of past decades. One new renewal project will provide 11½ downtown acres for light industry.

Wheeling justifiably resents any association with some distant mining cities in the mountains whose economy and geography bear no relation to the market. Wheeling is a city of multiple economic personalities. It’s part of the Upper Ohio Valley and commercially tied to Steubenville, Weirton and other upriver cities; it’s close enough to Pittsburgh to belong to the tristate panhandle region; it’s bridge-distant from southeastern Ohio and it has ties with Morgantown and other southeast West Virginia cities; it’s neighborly with Parkersburg, down river 85 miles.

Stands Alone • With all these economic bloodlines, Wheeling stands on its own sturdy feet as an economic entity. The businessmen cooperate in a search for new industries. Regionally the area is behind Ohio Valley Industrial & Business Development Corp., headed by John G. Ondrick, brigadier general retired. Gen. Ondrick is new on the job and currently is mustering the statistical tools needed to attract new projects to this area of efficient and low-cost transportation, cheap fuel and vast natural resources.

Steubenville, with a city population of 36,000, is four miles across river from Weirton and 20 miles above Wheeling. It’s surrounded by cities and towns that merge or almost nudge each other. The city’s title honors Gen. Frederick William von Steuben, drill master at the fort that was named after him in 1786. The city is making progress on smoke abatement. Newer plants include Titanium Metals, 900 employees; Vanadium Corp., 325; Ohio Ferro-Alloys, 175. Unemployment is low, local businessmen explain.

When steel centers are complaining about a slowdown in demand, the cities in the Upper Ohio Valley boast their production always runs ahead of the national average. Steel output was up in mid-February even before anticipated stockpiling in anticipation of a possible strike had begun. At Wheeling Steel, 11th largest U. S. producer, they were quietly discussing new types of containers based on thinner tinplate, perhaps with one eye on Alcoa’s zipper beer can.

The upper valley benefits from the areawide drive against river pollution and already they’re talking about revival of game fishing on the river. The longer lakes formed by new dams with their 1,200-foot locks have already cut the hargie time between Wheeling and Pittsburgh.

All this modernization, rebuilding and general activity are bringing new life to this concentrated center of industry, commerce and people.

West Virginia’s plus factors

Cheap power due to inexhaustible coal supply; generating capacity constantly being expanded.

Major aluminum plants drawn by low-cost power.

Low-cost barge transport on Ohio and Kanawha rivers, tying-in nation’s inland waterways; rail and highways networks.

Extensive river and ground water resources for industry.

Natural gas and petroleum.

Enormous brine and rock salt fields for chemical plants.

Limestone, sand-gravel and clay-shale deposits.

Two-thirds of state covered by forests.

Major steel plants.

Central location; four of five major markets are within 500 miles.

Ideally situated for production of finished goods from locally produced metals, chemicals, petrochemicals and plastics.

Ample labor supply.

Industrial sites available along rivers.
There’s only one runaway leader in Wheeling-Steubenville:

**WSTV-TV**

REPRESENTED BY PETERS, GRIFFIN, WOODWARD INC.

... just as surely as there’s only ONE 36th TV market (TV Magazine, Feb. ’63)

ONE dominant signal (ARB-Nielsen, Nov. ’62)

ONE station that offers Notarized Merchandising!

Here’s a glimpse of how WSTV-TV looked to Nielsen last November. Total quarter hours based on homes reached, 8:00 a.m.-12:30 a.m., Sunday through Saturday: WSTV-TV had 414; the other station had only 44. And ARB points out that in the same month WSTV-TV had SIXTEEN of the top twenty nighttime shows ... all TEN of the top daytime shows. It’s not even close! WSTV-TV is runaway leader in Wheeling-Steubenville, America’s 36th TV market!

All West Virginia’s divided in two parts

ONE-SIDED REPORTING HAS FAILED TO TELL DRAMATIC GAINS OF STATE

The greatest story never told, a factual account of West Virginia’s industrial structure, has long been lost in a media morass.

For three decades the positive side of West Virginia’s economy has waited while the miseries of the state’s displaced miners have been spread over the printed page and dramatized in broadcasts.

Few newsmen have followed up their tales of miners’ travails by trekking up and down the Ohio and Kanawha Valleys to inspect the growth of a new and expanding industrial complex. They bypass the affirmative economic story, focusing instead on the pathos of poor people as though West Virginia had a monopoly on unemployment and poverty.

Today’s image of West Virginia is stained by the one-sided journalistic treatment it has received. The Kennedy-Humphrey campaign of 1960 took many newsmen into the backwoods. Magazine writers, NBC’s David Brinkley, ABC’s Howard K. Smith and scores of newspaper writers have stressed the seamier side of the West Virginia story.

In recent weeks the Washington Post and Time magazine have taken sly digs at West Virginia, apparently influenced by an image fostered by other journals. A Post story that mentioned the state’s newly developed Golden Trout, a game and tasty addition to the nation’s recreation and diet, wondered how a state with 18th century thinking could attract fishermen even if the new fish was superior. And Time, writing about West Virginia’s centennial art contest, prided in references to barefoot moonshiners and assorted signs of poverty.

They’re still steaming, however, about a Saturday Evening Post article in 1959 titled “A Dying State,” a gory rhetorical bludgeoning that could see only one side. A Los Angeles Times reporter who flew in for a basketball game last year decided to write with pathos about the state’s economy and people. True, Master Detective and others have written of West Virginia as the source and center of starvation.

The Other Side • Any look at West Virginia’s economy must divide the state into two parts: 1, the populous industrial strips along the Ohio and Kanawha Rivers; 2, the mountainous center and south, plus the farming areas of the east.

This review of the West Virginia economy deals with the western section of the state, where industries line the river shores. Latest U.S. Bureau of Labor statistics show 9.9% insured unemployment for the state as a whole, but state officials claim total unemployment is on the decline after a peak reached several years ago.

Is West Virginia really the horror spot of the United States, as stated or inferred by many who have written of its economy?

“...A quarter-million people out of a total population of less than 2 million receive public assistance,” Howard K. Smith said in his Feb. 17 commentary. He added, “There are in America’s affluent society between 30 and 40 million people who live in abject poverty.”

If 250,000 receive public aid in West Virginia, that’s 13.2% of the state’s population.

If we accept Mr. Smith’s figure that 30-40 million out of 185 million people in the U.S. live in abject poverty, it would mean seven out of 100 people, or 7%. The commentator said non-mining areas of West Virginia have suffered too, reciting the plight of a Mr. & Mrs. Allman on the outskirts of Charleston who have $169 a month wages from a relief project and a food ration. About once a week, he said, they go on a food binge by having a green salad for supper.

In sharp contrast here are some thoughts about Charleston, state capital, picked up during an economic look at market:

- Average workers income (factory earnings) in Charleston is fourth highest of U.S. cities, $6,480 a year. This is 3.3% above the mid-1961 average (U.S. News & World Report, Oct. 15, 1962). Detroit is tops with $6,629; the national average is $5,035 so Charleston workers earnings are 28.8% above the national average.

- Charleston is one of 15 markets having substantial (over 6%) unemployment. Journalists prefer to write about this unhappy side of West Virginia’s economy.

- Mine unemployment is mostly in the central and south portions, far from employment centers. The more aggressive unemployed move out; the rest prefer to stay.

- Charleston income was up 3.3% for the mid-year; employment was up 1.3%.

- The city has the largest chemical and largest sheet glass plants in the world.

- Union Carbide and Goodyear are building additions.

- The sale of Chevrolet autos here last year showed it among the top cities in the U.S.

More answers to Mr. Smith and his fellow newsmen were supplied by Gov. William Wallace Barron’s office. Here’s a set of statistics on West Virginia’s unemployment: There were 105,000 jobless (16.6%) in January 1961 when Gov. Barron took office. The latest available figure, November 1962, shows 61,000 unemployed, or 10.5%.

Taking the state as a whole, Gov. Barron said seven out of the 10 key index factors showed increases during the 1950-60 decade.

Tired of Treatment • Nobody in West Virginia is trying to picture a boom of the Miami, Phoenix or Los Angeles type. But West Virginians are getting tired of the journalistic treat-
The practical and the beautiful in Charleston, W. Va. An Esso tow passes within hailing distance of the state's blue-and-gold domed capitol.

- Retail sales were up 2% to a record $1,745 million; bank debits rose 5.4% to $10,196 million; salaries and wages totaled $2,174 million compared to $2,162 million in 1962; weekly earnings at the mines averaged $120, up 0.6%; factory workers averaged $101.12, up 3%.
- Carloadings up 4.8%; crude petroleum up 26.6% to 3.5 million barrels; auto sales up 17.9%.
- A Washington, D. C., liaison office opened by the state landed a list of federal contracts that boosted West Virginia from 50th to 30th place among the states in defense contracts. The 1962 contacts, totaling $62 million, quadrupled the 1961 figure of $16 million. The office also was active in bringing in new industries, including Melpar to Fairmont, West Virginia Ordnance Works to Wheeling and expansion of Adel Precision Products at Huntington, according to Gov. Barron.
- With some of the nation's most beautiful landscapes, West Virginia is building up its recreational facilities and accommodations to attract tourists. Their expenditure last year is believed to have been at least $325 million.

Natural Riches
- Besides the almost limitless water reserves, West Virginia has these natural bounties to offer industry:
  - COAL—Reserves estimated at 50 billion tons. Production averages 110 million tons a year and is likely to increase. Employment dropped from 132,000 jobs in 1948 to 41,000 in a decade-and-a-half as automation entered the industry but the decline in employment has stopped. Value of production (at the mine) is around $600 million yearly (recent peak was $854 million in 1947). No. 1 coal-producing state.
  - GAS—Production is up 13% for the last decade, totaling 220 billion cubic feet a year from 13,000 producing
wells. Fields are in the western half of the state. Reserves are 1.8 trillion cubic feet.

SALT—Extensive brine and rock salt beds form the chemistry industry's building-block material. Production is around 900,000 tons. Reserves are 8 trillion tons.

OIL—Production exceeds 3 million barrels a year; much of it is of Pennsylvania crude quality, commanding a premium price.

The portion of the state within 25 miles of the Ohio River "is more prosperous than Ohio," according to Andrew L. Henry, director of community development of the commerce department. Most of the Ohio River plants are on the West Virginia side, he added.

The West Virginia economy set a new record for 1962, according to Gov. Barron, with business well above 1960-61 levels. Unemployment declined, he reported; new roads are being built, including interstate legs that will help erase the state's reputation for slow, pretzelish traffic routes.

100 Years Old • During 1963 a total of 206 days will be devoted to celebration of the state's centennial. Celebrated, too, will be the fact that 17 of the 22 business indicators were up in 1962, with 10 of them setting all-time records. Total personal income for 1962 is estimated at $3.2 million, another high.

New records in economic factors were registered in retail sales, electric power production, gasoline sales, collections of consumer sales and gross sales taxes, postal receipts, bank debits, salaries and wages, and average factory-mining weekly earnings.

West Virginia's business leaders make no pretenses of a boom. Instead they point to the halt in unemployment and the total of 540,000 employed people in the state; the anticipated expansion of chemical and industrial production. Stone-clay-glass, agriculture and lumber-wood products are classed as declining activities but chemicals, metals, manufacturing, public utilities, finance, trade and transportation and government employment are expected to increase gradually during the decade. A slow expansion in population is anticipated. Mining employment is expected to remain stable.

That's a quick look at a state suffering from image troubles caused by newsmen who miss the real story of what's been happening in the West Virginia hills.

Huntington-Charleston industries busy

HIGH WAGE LEVEL BELIES STORIES OF WEST VIRGINIA HARD TIMES

The media men who recount their observations of poverty in West Virginia should be compelled to inspect at close range the neighboring markets of Huntington and Charleston (see story, page 92), and the Ohio and Kanawha River industrial empire.

These portayers of pathos would find in Charleston the world's largest chemical plant, a group of other major industries, a governmental economy typical of a state capital—all capping the bunched factories along the Kanawha River. They would find Union Carbide's hilltop laboratory where the skills of 2,200 scientists are devoted to pure and applied research. And they would find close to the highest industrial pay level in the U. S.

These print and broadcast journalists would observe in Huntington the largest nickel rolling mill in the nation, and it's still growing. They would find factories running the gamut of industry, from heavy goods to brassieres. And they would be surprised to encounter one of the newest and most attractive industrial cities in the land.

Northeast of Charleston is a string of cities splitting the industrial western half of West Virginia from the mountainous center and agricultural eastern slope. These cities are Morgantown, Fairmont, Grafton, and Clarksburg. The heavily traveled Kanawha barge route enters the Ohio River at Point Pleasant, W. Va., and Gallipolis, Ohio, (pronounced Galli-pol-ice with accent on the last syllable).

Huntington Plat • When Collis P. Huntington, empire builder of the 1880s, reached the Ohio River with his Chesapeake & Ohio Railroad he decided to lay out a perfect site for a city that would bear his name. His surveyors staked out the riverside area with wide streets and perfect rectangles, figuring the plat would be adequate for maybe a century or more.

Thanks to his foresight, the main area of Huntington presents an orderly pattern. But Huntington has spread far beyond the rail baron's dreams as industry and commerce have developed. The state capital, Charleston, is 40 miles away but a ride along the route compels the belief the two cities will someday have a high-speed lifeline and become twin markets.

They're twins already, under the modern concept of a market as the area covered by a good tv station signal—a concept that's gaining wide acceptance as the visual medium continues to grow. The rugged terrain permits elevated tower sites where a tv station can fan out over 60 or 70 counties, covering parts of West Virginia, Ohio, Kentucky and Virginia.

Growing Fast • The rollick of industry offers a list of multi-million dollar plants, modern highways, bridges and waterways. This growth is ahead of the national average and retailing surpasses the expansion of many major metropolitan areas.

Appropriately Huntington is headquarters of the C&O, one of the nation's money-making rail carriers. C&O has greatly enlarged its office operations in Huntington and its executives are laying plans to modernize the old Baltimore & Ohio trackage to Pittsburgh and bring it up to C&O's standards.

The Huntington metropolitan area
1 meteorologist, 1 Charleston studio, 2 Huntington studios, 9 newscasters and 25 “stringers”…

38 reasons why we dominate Supermarket

And here is number 39: WSAZ-TV’s 1,253-foot transmitter tower—the very tallest in the entire Charleston-Huntington complex. A complex we call Supermarket.

When you put all the reasons together, you see why our Radar Weather Forecasts and our local features and news coverage (fed by 25 reporters and photographers) are so well received. Not only in metropolitan Charleston and Huntington—the heart, hub and core of Supermarket—but throughout our 72-county 4-state area as well.

You see, WSAZ-TV enjoys an audience loyalty here in Supermarket that borders on the fanatic: 24 out of the top 25 nighttime shows, in fact, are seen by the Charleston-Huntington market over Channel 3.

And ARB recently rated us among NBC’s top fifteen affiliates in terms of television homes delivered: day in, day out, all week long.

Can you wonder, then, about the warm regard in which WSAZ-TV is held by advertisers the country over? Or, indeed, what your best means of reaching Supermarket’s 495,700 TV homes is? Or how to go about reaching the 2-million Supermarket residents who earn some $4 billion yearly?

While you’re thinking it over, perhaps you’d like to thumb through our handsomely illustrated brochure. It’s aptly entitled “SUPERMARKET” and it’s free from your Katz Agency man. Ask him for it!

WSAZ-TV
Charleston-Huntington, West Virginia

3
includes Ashland, Ky., and Ironton, Ohio. The immediate four-county market has a population of 260,000. Three states—West Virginia, Kentucky and Ohio—meet between Huntington and Ashland-Ironton.

A circle tour of the city of Huntington reveals the world's largest high-alloy nickel plant, International Nickel, with a $30-million building program underway. The company makes high nickel alloys, including the Incoloy coils used in electric stoves. Its employment of 2,500 puts millions into the local economy. Four-fifths of its output goes to destinations within 600 miles, with a tenth going to the aircraft industry in Southern California. Every missile has nickel alloy from the nose down. Inco has moved its sales force to Huntington.

Other large employers are the C&O, 5,230, including those at the world's largest freight yard owned by a single company at Russell, downriver; Owens-Illinois containers, 1,550; Houdaille Industries, 600; H. K. Porter Co., steel, 825; ACF, freight cars, 1,100; Standard Ultramarine, 525, and Huntington Mfg., 625.

Tobacco warehousing is a major business in Huntington. When the burley has been auctioned and moved out, Owens-Illinois moves in with fancy whiskey decanters for the next Christmas season. One of the large warehouses is made of plastic-coated nylon, resembling a block-long, fat quonset hut and kept expanded by an air-pressure system.

Unemployment Off • The city's unemployment has been cut from 10% to 9% in a single year, and local businessmen figure new and expanded industries will accelerate the downward trend. Cultural facilities include Marshall U., with 5,000 students and a major scientific laboratory project. Bank debits were up .8% in 1962. In fact, all major business indices are climbing. Electric consumption is up a fat 10.7%.

Moving out to neighboring communities, one-year-old Montecatini Nova- mont works represents a $20-million investment. It produces petrochemical pellets for use in Moplen, a new fibre competitive to nylon. A Meraklon fibre plant is in the planning stage. Local natural gas, coal, easily accessible petroleum and Texas pipe lines insure abundant raw material for this Italian corporation.

The local move to attract small industries and plants making finished or semi-finished products includes a number of processing works, plastic pipe production and garment plants. Lining the Ohio both up and down river are Allied Chemical & Dye, with several installations; giant power plants operated by Columbia Gas system and its United Fuel Gas Co., Kentucky Fuel and Ohio Fuel. The river valley out 45 miles each direction includes a group of plants at the Ohio-Kanawha intersection: Philip Sporn power unit (Appalachian Power and Ohio Power); Marietta Mfg. Co. (ocean-going boats); Celanese; Liverpool Salt; Kyger Creek power; Goodyear Chemical.

Both Directions • Downriver from Huntington are Armco Steel, Allied

The efficient downtown layout of Huntington, W. Va., is now circled by attractive new suburban homes. Here is a typical all-electric dwelling.

Chemical, Dow, DuPont, Ashland Oil & Refining, Ozark Chemical, Columbia Hydrocarbon, Detroit Steel and Hooker Chemical. Along the Big Sandy River, besides Ashland Chemical, United Fuel Gas, Novamont and Kentucky Power.

Ashland and Ironton, at the Ohio-Big Sandy intersection, are right in the middle of the area development. Armco, first of the continuous-rolling steel mills, was begun three decades ago and now is in a $50 million expansion program. It currently employs 3,700.

Ashland Oil & Refining, with 1,350 employees, turns out chemical and petroleum products. It recently arranged to buy United Carbon Co. assets for $50 million. Largest city in northeastern Kentucky, about 12 miles from Huntington, Ashland is based on steel, chemicals and transportation. The city has one of the few barge-to-rail loading facilities along the Ohio River, and its barge traffic is heavy. It's a rail junction point for the C&O. The local yards can handle 1,800 cars a day; nearby Russell yards accommodate 14,500 cars.

Like Huntington, Ashland was laid out with wide streets. And like Huntington it has a high flood wall. Ashland's iron deposits were discovered about 1800 by an industrialist of that era, John Deering. He and others built smelters; surplus ore was shipped downriver to Cincinnati. The city is the scene of annual American Folk Song Festival, stemming back to past centuries.

Charleston's Chemistry • Historic Charleston, once represented in the Virginia assembly by Daniel Boone, is well prepared for the scientific and chemical future with its extensive complex of Riverside industries.

Atop a hill across the Kanawha river in South Charleston is a flashing new
$50-million research facility operated
by Union Carbide Chemicals. Its 2,200
scientists and technicians are highly
paid to think of new ideas, methods
and products. The company's Sevin in-
ssecticide was airlifted to Egypt a year
ago, the 2 million pounds of bug killer
saving that country's cotton crop.

With total employment of 12,000,
Union Carbide's chemical plant is big-
gest in all the world, producing 400 dif-
ferent chemicals of the olefin, polyure-
thane foam and many other categories.
Every year 150 technical school pro-
fessors are brought in to inspect the
plant and get a good view of modern
industry at work. Huge recreational
areas are maintained for employees.

Prestone antifreeze, the stuff that made
motors winterproof, is a by-product that
became an automotive essential. Nearby
DuPont has a similar item, Zerone.

Kroger has a large distribution center at
Charleston.

The local blood pressure rises when
the word poverty is mentioned around
Charleston. The city has its shoddy
areas, of course, but its wages are ex-
tremely high and the waterfront is
famed as an outstanding example of
civic beautification. A symphony or-
chestra and other cultural facilities are
found around the seat of state govern-
ment. The state capitol, resembling like
many others the U. S. Capitol in Wash-
ington, has a gold-and-blue dome of
striking beauty. The capitol, incidentally,
has an element of commercial
charm—a million-dollar payroll. The

city is the home of Morris Harvey Col-
lege, West Virginia graduate school and
West Virginia Tech.

High Wage Level • But what gets
them excited is any suggestion that
Charleston is a city of poverty when

HUNTINGTON-CHARLESTON INDUSTRIES BUSY continued

its average wage level is fourth highest in the nation (see page 92).

Last year 12 major plant expansions were underway. FMC ordnance depot has a $64 million Army contract for armored personnel carriers. Its plant adjoins expanding Union Carbide in South Charleston.

Among major industrial employers besides Union Carbide are FMC 2,900; Goodrich-Gulf 730; duPont 2,800; North American Aviation Co.'s brand new electronic facility 270; McJunkin Corp., oil-well hardware 180; American Viscose, 1,000; Kanawha Mfg. Co.; Libby-Owens-Ford Glass Co., 1,600; Appalachian Power has big generators; Kroger stores, 700; state offices, 2,600; Monsanto, 700; True Temper, 400.

Down the Kanawha are Monsanto, American Viscose and Allied Chemical. Barge traffic is important to the valley, the Kanawha having a nine-foot channel that ties it to the upper and lower Mississippi as well as to the Gulf. Local coal, ample water, salt and cheap transportation provide an ideal chemical setting. Last year Charleston had a temporary setback when Owens-Illinois noting that its glass-container customers were now over 100 miles or more distant, phased out this part of the plant mostly because of the transportation problem. It's still making paper products.

The power-generating pool in the area is credited with bringing the big Kaiser aluminum plant to Ravenswood, 50 miles north and not far from Parkersburg. With its industries, wholesaling, government, transportation and smaller industries, Charleston and Kanawha County have a diversified economy that supports a population of 250,000. Three interstate highway links will speed up truck deliveries. Charleston is famed in chemical history as the area that originated nylon, Vinyline resins, lucite and the polyethylene resins, and other base chemicals. Area manufacturing employs 22,500 persons, with 65,951 employed in non-manufacturing lines.

**Industrial Boundary** Due south of Pittsburgh 70 miles is the start of an unmapped economic boundary that separates central-eastern West Virginia from the industrialized western half of the state. Morgantown, Fairmont and Clarksburg, reading north to south, are at the top of the boundary; 200 miles to the southwest is Charleston, marking the bottom.

A metropolitan area of 40,000, Morgantown has West Virginia U. (7,000 students, big-league sports and fine specialized schools). The 9-foot Monongahela River channel, an unusually busy one, leads to Pittsburgh, the Ohio and on to the Mississippi. Sterling Faucet, largest industry, employs 1,300. Metalworking, glass and textile plants abound; U. S. Bureau of Mines has a major experimental station.

Fairmont and Clarksburg, industrial cities a 45-minute drive apart, have income levels well above the state average. They are major trading and manufacturing centers and big coal producers. The Tygart Valley and West Fork rivers merge at Fairmont to form the Monongahela. Coal and cement are barged down and gasoline up-river. Westinghouse has a lamp division employing 2,000 and an expansion project means 200 more jobs. Bank deposits and retail sales are higher; Christmas sales were the best in many years. Owens-Illinois employs 1,660 in its glass container plant. Cerro Aluminum has 400 employees. The 42 local plants, including Sentry Sanitary, Sharon Box and Sharon steel employ 5,500. Monongahela Power has expanded its generating capacity. Marion County has 64,000 people.

Pacing Clarksburg's progress is a new $5 million expressway running right through the city. Glass is the top industry; business picked up nicely after the Kennedys bought West Virginia pieces for the White House. New power generating facilities are helping the economy. Hazel-Atlas division of Continental Can employs 1,650; Pittsburgh Plate Glass 1,180; Rolland Glass 414; Lockheed-Marietta 225 and Maiden Form Brassiere 400 employees. The airport runways are being enlarged. Harrison County population is 80,000.

**Parkersburg-Marietta** A big bend in the Ohio River finds Marietta on the Ohio side and Parkersburg 10 miles to the south in West Virginia. Upriver are St. Marys, Bens Run and New Martinsville. Southwest are Ravenswood, W. Va., and Gallipolis, Ohio. On the shores from New Martinsville to Gallipolis and Point Pleasant are Quaker State Refining, American Cyanamid (two plants), B. F. Goodrich plastics, Union Carbide (two plants), Johns-Manville Fiber Glass, Universal Glass, Shell Chemical, two Kaiser plants, DuPont, Borg-Warner, Vanadium Corp., Mobay Chemical, O. Ames Co., Dravo Corp., Corning Glass, American Viscose and others.

Parkersburg is about midway between Wheeling and Huntington. Just below the city is Blennerhassett Island where Aaron Burr is said to have planned his southwestern empire. City population is 45,000, with 65,000 in the metropolitan area; its hub of an 11-county area farming-industrial economy. The Little Kanawha River enters the Ohio in Parkersburg.

The college city of Marietta, oldest settlement in the Northwest Territory (1788), has a big Indian mound, similar to the famed bulge in downtown Moundsville. It is located at the intersection of the Ohio and Muskingum rivers. Washington County population is 55,000. An Atomic Energy Commission power facility is operated by Ohio Valley Electric Corp.

The $200 million Kaiser Aluminum & Chemical Corp. Ravenswood, W. Va., plant is one of the most modern in the country. It adjoins the Ohio River which permits river and surface transportation. The plant combines enormous reduction capacity and a modern rolling mill.

Some of the biggest and busiest industries in the nation are located in this West Virginia-Valley area.
Cincinnati in midst of vibrant growth

HIGHWAYS, BRIDGES, SHOPPING COMPLEXES OPEN NEW AREAS TO INDUSTRY

Old Cincinnati, originally named after a Roman dictator but currently known by choice as the Queen City, has grown right out of its civic britches. This metropolitan market of 1½ million spanning the Ohio River is now building for the future to compensate for its overloaded highway and bridge facilities and to beautify the somewhat antique and jam-packed downtown.

It's an ambitious program that promises to surpass the famed fighting spirit and energy of Rome's Lucius Quintius Cincinnatus in the 500-600 B.C. period. The great Lucius left his plow, mopped up the attacking Aequians in a day to leave Rome safe once more and went right back to the farm. But his namesake city of Cincinnati will need at least another half-decade to win the basic struggle against obsolescence and tool up with physical facilities adequate for the future.

The vibrant rebirth of Greater Cincinnati first impresses an observer of its economy at the big airport in suburban Kentucky, a terminal that keeps getting closer by the clock to downtown as the twin-ribboned highway segments are added.

Change Apparent • All through Newport and Covington, Ky., and the buzzing countryside, this evolution into a modern and suburban-studded trading area is apparent mile by mile. The Kentucky communities, with the help of a new and deeper channel in Licking River opposite downtown Cincinnati are conducting their own drives to bring in new business and industry. They, too, are ruthlessly razing clusters of blocks in an aggressive effort to convince the nation they aren't merely dormitories for the Ohio side of the trading area.

At the river approach on the Kentucky side appear the developing stages of new ramps and cloverleafs that will speed traffic across the Ohio on a fast, modern $17 million bridge that appears to be about a year, maybe less, from completion. And the waterfront distributor system in riverside Cincinnati offers fast connectors to an expanding network of fast highways that will reach out in all directions, connecting local industries and spreading to federal and interstate links.

Added up, the principal projects will run a half-billion dollars. Industrial expansion is impressive, new facilities and improvements in 1962 running over the $300-million mark. A $27-million federal building is underway and the central riverfront is being beautified. They like the Queen City tag in Cincinnati. Its origin is in dispute but a favorite legend centers around the 1854 visit of Henry Wadsworth Longfellow. Seated on a hill overlooking the Ohio River, he was inspired to write in his poem "Catawba Wine": And this song of the vine,
this greeting of mine,
the winds and birds shall deliver
To the Queen of the West
in her garlands dressed,
on the banks of the beautiful river.
The German dwellers in the area had...
planted vineyards all over the hills. Cincinnati was once known as a wine center; its brewing eminence continues.

Modern Cincinnati to the casual observer is the home of the Reds baseball club, the basketball Royals and Oscar Robertson, two slick college cage teams—U. of Cincinnati and Xavier—and fine local beers. But to the marketer the Cincinnati area offers these important facts:
- Practically all major business indicators were up in 1962 over 1961.
- Cincinnati leads the world in production of machine tools, soap and playing cards.
- Over 170 important new manufacturing companies have entered the area in a decade with $435 million invested in facilities.
- One industrial center, part of the projected Circle Freeway, already has $80 million invested in plants concentrated around the Mill Creek expressway intersection.
- A 90-mile lock-free lake has been built in the Ohio River as a result of the billion-dollar Ohio River development program.
- Kroger has a new $10-million headquarters.
- It's the 15th largest U. S. manufacturing area, led by chemicals, cans, clothing, machinery, motor vehicles, valves and other metal-working products.
- Four large insurance companies have their homes in the area.
- Unemployment has been reduced to about 4%.
- Cincinnati Gas & Electric has a five-year $200 million expansion program, and is maintaining a $40-million annual rate; over a decade the program will pass $400 million. Its electric power capacity is over 1.5 million kilowatts; gas is being doubled from 36 million to 72 million cubic feet capacity per day.
- CG&E's tax bill is $32.5 million, 26 cents out of every dollar collected.
- Retail trade in the immediate three-county metropolitan area (Hamilton in Ohio, Campbell and Kenton in Kentucky) are estimated to have passed the $1.5 billion mark; population is estimated at 1.2 million.
- A $16.6-million bond issue was voted recently. It will help to doll up the riverfront, build a convention-exhibition hall, rebuild some of the downtown and relocate the produce market area.
- Cincinnati & Suburban Bell Telephone Co. has spent $19 million to expand its facilities; total revenue is up $3 million to a $60-million total.
- The German heritage of the city's natives is responsible for a $75-million brewing industry. The local product can be classified as select sipping.
- CG&E has bought 10 General Electric jet engines from the local Evendale plastic plant to use as reserve generators. They cost $10 million and have 100,000 kw capacity. A pioneer in underground gas storage, it has just built a third storage tank at a cost of $1.5 million.
- Greater Cincinnati population is up 25% in a decade.
- The highway projects underway or soon to be will cost a half-billion.
- The city is a leader in space development and research. A nuclear reactor will be installed at the U. of Cincinnati; metal-working firms supply hardware for missiles.
- Western & Southern Life, one of four insurance firms headquartered in Cincinnati, has $1.2 billion in assets.
- Average weekly earnings are at an all-time high.

General Electric is the largest local employer, with 12,000 working at the Evendale jet engine plant. First engines for the 2,000 mph XB-70 experimental bomber have been produced. It's working on space engines.

Procter & Gamble, largest soap-detergent maker and No. 1 buyer of television time, employs 9,000 and headquarters in Cincinnati.

Other large employers include Ford 5,000 plus; General Motors, over 3,000; Atomic Energy Commission, over 2,500; Allis Chalmers 2,500; Ayco 2,700; Baldwin Piano 2,300; Cincinnati Milling Machine 4,500. Others above the
1,000 employee mark include Acme-Newport Steel across the river in Kentucky; American Radiator; Philip Carey; Champion Paper at Hamilton, down below past peaks; Avco electronics; Du-Bois Chemicals; Formica; Diamond National; Bigson; Globe-Warnecke; Hyde Park Clothes; E. Kahn's; Lunkenheimer and William Powell valves; MacGregor sportswear; National Distillers, NuTone fans; R. L. Polk, RCA and Trailmobile.

Many Centers • Shopping centers abound and the new freeways will bring more of them. One tri-country center alone involves a $25-million investment.

About 60% of the labor force in the market works in Cincinnati. Big adjacent communities are Covington 60,000, Newport 30,000 and Fort Thomas 15,000. Local trend observers figure a lot of the future growth will occur on the Kentucky side. Boone County went up 70% in a decade. The new interstate routes will have a heavy impact. Much new industrial space on both sides of the river has been opened up by the new Markland Dam, to be finished during the summer. The Pittsburgh-Cincinnati barge trip has been cut by new locks from five to three days.

Radio and tv stations include more distant communities such as Hamilton and Middletown in their area of influence. But within 5 to 15 miles are solid suburbs such as the Kentucky communities. The $30-million airport, new and built for the future, employs 1,000. Off from the runways is Latonia race track, a $5-million beauty that has a strong economic influence when the ponies are drawing crowds.

Northern Kentucky Industrial Foundation, formed in 1959, is getting into full operation. Its 930-acre fully equipped plot already has two plants, Great Lakes Carbon Corp. and Crescent Paper Tube Co. Covington is getting a handsome new Internal Revenue Service plant that will employ 1,600, 2,300 at peak.

Covington is Kentucky's third-largest urban complex. With Licking River and the Ohio intersecting plus new bridges for both rivers and the interstate highways, this old waterside community is taking on a new look. The circle freeway will orbit the Kenton-Boone-Campbell county regions. A U. of Kentucky extension and state vocational school are included in educational facilities.

The Covington-Kenton-Boone and the Campbell County Chambers of Commerce have live programs under way that are already paying dividends in plants and jobs. A fund of $250,000 was raised by the former through sale of stock and another $1-million borrowed for the new industrial sites. Campbell County Business Development Corp. and Northern Kentucky Area Planning Commission are leading the drive to wipe out blight areas and attract industry. Acme-Newport Steel Co. is the largest employer in the area; it recently was enlarged. Louisville & Nashville railroad has a fancy new freight yard. Southern and C&O serve the area.

Near Center of City • All this growth and planning starts just a mile from downtown Cincinnati. The way the situation shapes up as spring 1963 arrives, with new freeways and bridges metropolitan Cincinnati will be a tightly intertwined and easily traveled market with a 20-mile or wider radius before the 1970 census takers start their decennial count.

Cincinnati's tv station influence extends out more than 50 miles into a populous area of 3.7 million people whose retail spending this year will approach $5 billion. And radio's influence is important depending on time of day and technical factors.

Middletown and Hamilton to the north are large markets in their own right, with many economic ties leading to Dayton, farther north. Middletown is the home of Armco, first of the large modern rolling mills. It has a population of 44,000, plus 28,000 within a few miles. Butler County population is 205,000, up 36% in a decade. Fifty-six local industries have a total payroll

50,000 WATTS

WCKY is only one of the powerhouse stations in the Ohio Valley that are now part of the growing ABC RADIO NETWORK. Others are WHAS Louis ville, WWVA Wheeling and KQV Pittsburgh. And the power behind these stations is their own local programming combined with the longtime popular programming, the unmatched news coverage and the new programming that only ABC RADIO offers National Advertisers.

The facts have changed in Network Radio—ABC RADIO is the reason for the change.
NOTHING LIKE IT IN BROADCASTING ANYWHERE, ANYTIME, ANYHOW!

THE SHOW WITH THE TALENT

RUTH LYONS—the power-packed personality with no equal in broadcast history—has led her smash "50-50 Club" program through its merry paces every weekday at noon for 17 years on WLW Radio and for 15 years on WLW Television, the last 6 in full color. She's the modern American Radio-TV phenomenon—femcee, performer, pianist, composer, singer, wit, wise-cracker, brain, sage, character, Reds baseball booster, and housewife—who livens up the dial and has 'em in the aisle!

The show's own talented staff are all stars in their own right. All join in the fun to become fancy or foible for Ruth as she keeps 'em stepping and guessing with one hand, and the audience in the palm of her other hand. Ruth and her happy show have been written up in the Saturday Evening Post, Ladies' Home Journal, Look, American Home, Billboard and many other magazines.

The show's own talented staff are all stars in their own right. All join in the fun to become fancy or foible for Ruth as she keeps 'em stepping and guessing with one hand, and the audience in the palm of her other hand. Ruth and her happy show have been written up in the Saturday Evening Post, Ladies' Home Journal, Look, American Home, Billboard and many other magazines.

GUEST STARS
With her magic ability, Ruth makes the stars come out at noon in WLW Radio-TV land. Because of the popularity and influence of her show, guest stars by the star dipperful appear on "50-50 Club"—to the delight of audience and sponsors. Where else can advertisers get such a who's who about what's what in one program package? Musicians, show people, authors, statesmen, sports figures, everybody who's anybody. Just to name a few—

HAPPY SPONSORS
It wouldn't take a psychologist to conclude that the happiest people in the world are Ruth Lyons sponsors. And they stay happy for years. Prime proof of the pudding! Nu-Maid Margarine has been on the show for 17 years; Fels soap products and Folgers Coffee for 11 years; Frigidaire for five years. And the list goes on and on.

AUDIENCE
Ruth's bouquet microphone can reach into 3 million homes. Her hour-and-a-half noonday show Monday thru Friday is carried on WLW Radio and the 4-Station WLW regional TV network—WLW-T, Cincinnati; WLW-D, Dayton; WLW-C, Columbus; WLW-I, Indianapolis. Tickets to her luncheon program at luncheon cost are sold out 3 years in advance. And could be sold out for 9 years if Ruth would permit it.

MAIL
Ruth Lyons program in 1962 received over 1,726,000 pieces of mail. A big part of this is Ruth's fabulously successful Telephone Exchanges for various sponsors, with prizes up to $1000. Even though listeners and viewers are not required to send in sponsors' labels, an overwhelming 98% of them do! Proving the loyalty of Ruth's audience to her products.

PUBLIC SERVICE
This is the factor which really reflects the power and the glory of Ruth Lyons. Through her program alone, she raised over $381,000.00 in her 1962 annual Christmas fund for equipment and toys in the children's wards of 59 hospitals. In the 23 years the fund has been in existence more than $2,256,749.00 have been distributed. A fantastic accomplishment for which her only reward is an endless number of unknown children made well and happy.

WE ARE PROUD to say that Ruth Lyons is an example of the unique dynamic leadership and community spirit of the WLW Stations—which have made the Crosley Broadcasting Corporation a standard bearer in Radio-TV programming, talent, and engineering in this great world of communications.

of $100 million. They account for 22,-000 jobs, three-fifths of area employment. The Armco plant employs 7,000 plus about 200 in the office. Other large employers are Diamond National paperboard, 875, Sorg Paper, 565 and Aeropac Mfg. (aircraft components and stainless steel sinks, 750). Industrial parks offer plant sites.

Hamilton is deep in a campaign to bring new industry to replace several closed plants that had cut industrial jobs by 6,500 in seven years. Guided by Hamilton Assn. of Trade & Industry, formed by the chamber of commerce and business people, seven new plants have come in to replace Baldwin-Lima-

Hamilton and others. Population has risen from 52,000 in 1950 to 75,000; new industrial sites are being developed, the city is getting a housecleaning and local citizens are cooperating. Hamilton is fighting back on a brass-tacks basis; local boosters wear brass tacks on their lapels.

While the outlying communities expand in the manner of the era, the heart of Cincinnati is assuming a new aspect. The new highways and bridges will join the improved Ohio River waterway to promote access to markets and bring in raw materials at low cost. Cincinnati is busy dressing up for the future.

**DAYTON DEEP IN SPACE AGE**

**Inventive past gives city edge for scientific future**

The marketing numbers of spread-out Dayton are staggering to the average businessman whose knowledge is based on a few calls on local industries. But to the statistical observer, the statistical story of this market in southwestern Ohio recounts unusually rapid growth and a prosperous high-wage populace.

Finished-product and raw-material industries of this complex city and its 50-mile trading area range from scientific plants to rolling mills. This birthplace of the cash register, airplane and self-starter is now deep in computer and missile development, scientific endeavors that perform a dual role by providing local employment and gearing the nation for a leading position in the space age.

In its familiar role of pace-setter for the age of automation, Dayton has taken advantage of its specialized statistical know-how to offer a series of market stories relating the city to perennial communities, outlying markets and the entire Ohio Valley.

Dayton is located a fast 60-minute drive from downtown Cincinnati. Its newest civic enterprise is a promotion that jackets trade-influence areas into an ingenious numbers-on-the-march title, "Megacity 70-75."

The rich lore of Dayton's industrial past segues into the promises of its future in Megacity 70-75. The stories of two basic American institutions—aeronautics and automotive—have their roots in this river city and its famed industrial pioneers.

**Historic First • James F. Kettering and the Wright Brothers accomplished two historic break-throughs with the self-starter and the first airplane flight by triggering the evolution of the automobile into an efficient vehicle that anyone could operate and the separation of man from the earth's surface. They were aided by John H. Patterson, whose National Cash Register Co. made point for worldwide organization. Adjacent are recreational facilities.**
Even the birds live better where there's 27% more discretionary income (on the national average). That's Ohio's Third Market, and no medium — but none — covers it as thoroughly as WHIO-TV, AM, FM. Ask George P. Hollingbery.

Additional morsel for thought:

Dayton continues to lead the state's eight major cities with the highest weekly gross earnings. (Dayton Daily News—1/14/63)

Associated with WSB, WSB-TV, Atlanta, Georgia and WSOC, WSOC-TV, Charlotte North Carolina

DAYTON, OHIO • WHIO • AM • FM • TV
GM huge was venture major exuberant ket, can 75 with lion Columbus, and such potential, Megacity is lumbus, and the economic picture is. To economic-matters, the one half-million buildings are building Megacity is explained. Rather than the Megacity 70-75, and the city's 70-75 is Steadman's. Dayton is the most important city in the country, and the seventh largest industrial market it's explained.

- Megacity 70-75 is a stable market with a huge government payroll augmenting diversified industries. Pay is high; buying power is exceptional. A single sales, service or distribution facility can serve Megacity 70-75.

- A half-million are employed in industry, adding over $4.5 million in value at 5,200 industrial plants and providing average-income income. Principal metropolitan areas in Megacity 70-75 besides Dayton are Springfield, Columbus, Hamilton-Middletown, Lima and Cincinnati in Ohio; Richmond, Ind.

To those who would argue that Dayton is tiring a statistical string around a bundle of scattered markets, these points are emphasized:

- Neither Cincinnati nor Columbus can provide local service to such a large consumer and industrial market.

- Megacity 70-75 isn't any farther from one end to the other than New York or Los Angeles metropolitan areas; there are 35 towns and cities over 1,000 within 25 miles besides the seven basic cities.

- In recognition of the Dayton claim, many companies are establishing tri-state area out of Dayton-based offices and facilities because it is the very center of distribution, this makes Dayton a fine site for manufacturers.

- Megacity 70-75 is the tenth largest local market in the nation and Ohio's fastest-growing metropolitan area for 20 years.

This is a recap of Dayton's numbers. The area covered is somewhat larger than the growingly popular definition of a market as the area strongly influenced by a strong TV station's signal. Using the TV definition, two cities are pretty well outside television range—Columbus (682,000 metropolitan population) and Lima (104,000).

Even eliminating Columbus and Lima, the market within effective TV range of Dayton totals over 2.9 million people—a lot of people in anybody's marketing story. Eliminating Cincinnati (1,071,624) from Megacity 70-75 on the ground Cincinnati is a major market all its own and should not be covered by anybody else's umbrella, still leaves a 1.9 million TV-influenced market for Dayton to claim compared to the 3.7 people in Megacity 70-75. (Figures are 1960 U.S. Census.)

Accepting the Megacity 70-75 concept, the population of the market is exceeded only by New York, Los Angeles, Philadelphia, Detroit, Boston, Washington-Baltimore, Cleveland-Akron and Pittsburgh.

Narrowing Dayton's area semantics to the Census Bureau's Standard Metropolitan Statistical Area definition leaves Dayton with 750,000 people as of March 1963, up more than 40% from 1950. This ignores the practical influences of broadcast media and high-speed highways. At the very least, those who probe into the market's economics are likely to grant Dayton at least a 15-county trading-area range, or 1.5 million people and 500,000 buying units. But Dayton is building on its broader Megacity 70-75 base.

- Wright-Patterson Air Force Base, a complex of many defense units, is the largest single employer in Ohio with 32,500 employees of which 7,600 are military. Its 1962 payroll was over $200 million; 175 industries in the area are prime contractors ($40 million); over $60 million is spent for food, utilities and supplies.

- General Motors employs 27,500 in Dayton. Its four divisions are Frigidaire, Delco, Delco Moraine (auto parts, defense) and Inland Mfg. (rubber, plastics, auto parts).

- National Cash Register Co. employs 15,500 in Dayton (60,000 around the world). Sales exceed a half-billion dollars; the business has doubled in a decade and a new $3 million research-development center is under way.

- Chrysler's Aircramp division long ago passed the 1,000-employee mark; Dayton Tire & Rubber (Firestone) has 1,100 employes turning out 10,000 tires a day; Dayton Corp. produces foam, plastics, builts.

- A graphic arts center, the McCall Corp., plant (4,500 employes) has the largest International Typographical Union chapel in the world. It prints Reader's Digest, U. S. News and many others; E. F. MacDonald Co., world's largest provider of sales incentives (including the third-ranking Plaid trading stamps and Happiness tours), has just bought Wilding Inc., Chicago pioneer in audio-visual and TV commercial systems (MacDonald grosses about $115 million). Others in the graphic arts field, totaling 10,500 employes, are Reynolds & Reynolds and Standard Register Co. plus Mead and Kimberly-Clark paper plants.

BUILT IN DAYTON • While some markets heavily dependent on aeronautics bases are worrying about the transition from military planes to missiles, Daytonians explain that the city has already passed this stage. Some oldtimers still remember the headline in the Dec. 17, 1903 issue of the Evening Herald, "Dayton Boys Fly Airship." The story about the Kitty Hawk, N. C., flight explained that it was "in the teeth of a 21-mile gale. Ncclay's break through was negotiated with a powered crate developed and built in a little bicycle shop on Dayton's West Third St.

Formidable-looking planes still stand poised at the end of Wright-Patterson runways but the huge complex is aim-

WRIT, Milwaukee
ing at the future at a vast aeronautic research laboratory that goes into the basics of air navigation and systems. Its Air Force Logistics Command and Aeronautical Systems Division, staffed by 6,500 officers and 18,500 civilian employees, have a $165 million payroll. The businessmen who call on the facility spend $4.5 million a year at local hotels and motels, not including entertainment, food, travel and other items.

Combat and support units all over the world are handled by the logistics group. The systems unit has a new $9 million grant for electrogasdynamics facilities, roughly a hot wind-tunnel for atmospheric re-entry experiments. Air Force Institute of Technology has an engineering school; Foreign Technology Division (shh) keeps the government posted on what other nations are doing in the unexplored outer space.

Defense Electronic Supply Center buys the tubes and components for all Defense Dept. units, a $200 million enterprise.

With its $150 million expressway project, new Cox Memorial city airport (plus two military and four private airports), Dayton is tooled for what's to come. The Cox airport, named after the 1920 presidential candidate-broadcaster-publisher, is the largest city-owned airport in Ohio. A local fund of $6 million was raised to tee off a new university to be operated by Ohio State U. and Miami U. This will join Dayton U. and its research facilities.

Dayton has a half-dozen major computer facilities: NCR, Univac, IBM, U. of Dayton, National Real Estate Adv. Co. and Automation Institute of Miami-Jacobs Junior College. Its labor force is 35% skilled, 30% semi-skilled. Eight employers in the metropolitan area hire more than 2,000, six hire 1,000-2,000, four 750-1,000, five 500-750. Wages exceed $1.4 billion; average weekly earnings are $124, tops for Ohio. A vast urban renewal program is under way.

This is the market that has grown out of the tinkering of the Wrights, the inventive genius of John F. Kettering (self-starter, diesel, air-cooled refriger- ator, air-conditioning and World War I guided missiles that were built but never used).

A novel and attractive office-building center is located outside the central city. Col. E. A. Deeds donated a famed carillon. So, when Dayton businessmen think of their market, they're aware of its history, growth and potential. That's why they speak of Megacity 70-75.

**Lower valley growth outstrips nation**

**RIVER CONtributes to Economy of Louisville, Owensboro, Paducah**

Industry, horses, bluegrass, whiskey, farming and commerce are blended neatly into a balanced, diversified economy in the area bordering or tied to Kentucky's 664 miles of Ohio River frontage. The fastest growing of these business segments (horses and whiskey are drab unexciting dollars to the market) are industry and commerce.

Old Louisville is the largest Ohio Valley metropolis west of Cincinnati. It's old in tradition but the facade of the 1960's is dominated by high-speed traffic arteries, a two-level bridge whose jutting girders are nearing the Indiana shore at New Albany the neighboring airport and state fair that symbolize the new and the old side of American living, a very modern Methodist skyscraper that combines a shrine for worship with revenue-producing rental space, the longest Ohio River dam and an eye-popping hexagonal 29-story downtown apartment that will soon be ready for tenants.

Louisville's media are handsomely housed. The famed old hotels now have modern competitors serving visiting businessmen and lovers of the breed who scan the reproductive and performance achievements of Kentucky's world-famous horses.

Lexington (75 miles) and the capital city of Frankfort (50 miles) are tied by bluegrass sentiment and the practical aspects of related economic factors to the busy Louisville market.

At the northeastern corner of Kentucky, Ashland is an integral unit of the tristate Huntington-Asland-Clintondale market (see page 94). And at the northernmost point of the state, the cities of Covington and Newport are part of the Cincinnati metropolitan area though currently involved in their own suburban project (see page 99).

As the Ohio River moves past Louis- ville to the oxbow bends country, Owensboro blends hard industry with hard liquor and chemical production. Another 50 miles westward is Henderson, Kentucky's portion of the Evansville metropolitan market; industry again takes over in a big way.

At Evansville the river barely manages to free itself from a series of near-knots on its way to Paducah where the names of Irvin S. Cobb and Alben Barkley are solemnly revered at the same time respectful homage is paid to the payrolls and products poured out by hundreds of millions of dollars worth of chemical and power plants. Historic Paducah has mellowed in recent years—in an economic sort of way.

Finally, 664 miles from Ashland, the Ohio meets the Mississippi at Wickliffe, Ky., and Cairo, Ill., a small market that might have become another Pittsburgh but for the eccentricities of past economic expansion and the flooding tendencies of the terrain.

This is the area that inspires Ken- tucky's proud boast that its industry is growing 55% more than the national average.

A new church concept is Trinity Towers, Methodist church in midtown Louisville. The $2.75 million 17-story structure has over 200 apartment units.

Kentucky economy must start with a highspotting of industry, allowing time for the soul-rewarding inspection of the commercial aspects of horses and whiskey (see page 118). Louisville has all kinds of industries—big and little, space-age and long-established, basic and finished goods.

General Electric's Appliance Park is enormous. Largest appliance plant in the world, it provides work for 11,000 employees who turn out washers, dryers, ranges, dishwashers and air conditioners on a 920-acre site.

Here are some of the local GE vital statistics—barges bring in 100,000 tons of steel a year; 10,000 carloads of raw materials and 15,000 truckloads of parts are delivered; 20,000 carloads and 60,000 truckloads of appliances go out; 60,000 major appliances are made every week; annual payroll is $65 million; local purchases are $20 million. All this on land that was producing truck crops a decade ago. Instead of some tractors, fertilizer and seed, the area now needs 10 carloads of coal a day to keep in operation.

Other large employers include International Harvester tractors, 3,100; Ford assembly, 2,300; duPont neoprene, 1,900; Brown & Williamson tobacco, 2,500; Reynolds aluminum, 1,800; Naval ordnance, 1,850. GE and Reynolds are sponsoring a 250-unit apartment development on Louisville's river front. Eventually it's expected to occupy a four-square block area and have perhaps 1,000 units.

Louisville claims other "largest" elements in its economy—world's largest neoprene synthetic rubber plant at duPont; largest maker of air-filtering equipment, American Oil Filter Co. (its

**WAKY** is represented by The John Blair Company
cookers are used in Minuteman silos); largest U. S. wood packaging firm, General Box. And of course Hillerich & Bradshy, largest maker of baseball bats.

Not to be overlooked is the economic potential of another Louisville resource whose development has been underwritten by 10 local businessmen—Cassius Clay, who shares his sponsors' ambition to bring the heavyweight boxing title to Louisville and to attract attention to the city as well as Cassius Clay by a never-ending stream of self-glamorizing oratory devoted to his muscular attainments.

**Brain and Brawn** — Louisville's interest in the Clay biceps is intense but it rises to more significant artistic heights in the activities embraced by the Louisville Fund, a $200,000 local contributed boost for musical and other activities. The city has a high level of civic cooperation and its achievements in the arts and sciences are exceptional. A new local project is the Belle of Louisville, recently bought sternwheeler which will serve as a reminder of the past and a way to enjoy the river's present-day charms.

There's a new zoo project that promises to be a pace-setter in natural education. U. of Louisville is active in modern scientific research and it has Rauch Memorial Planetarium. Louisville Orchestra and Chorus, a concert association, theatrical groups, the vast fairground and coliseum and several local art centers are part of the extensive community activity. U. of Louisville is the oldest municipal university in the United States. It's one of 10 local colleges and universities.

Big hunks of the downtown are being knocked down in slum-removal projects that include hospital, apartment and federal office facilities.

Here are some concentrated Louisville economic data:

- The Louisville market influence and commercial contacts extend out to a population of more than 2 million, with 600,000 families whose buying at stores exceeds $2 billion.
- Total employment in Jefferson County is 238,200; unemployment is being cut, now stands at 20,000; average weekly earnings of production workers are $108.
- Jefferson has 30 plants employing 500-1,000 workers; 31 over 1,000.
- Value added by plants is estimated at $1.3 billion a year.
- Metropolitan area population is 750,000, up 26% in a decade.
- Metals, equipment machinery, chemicals, food-beverages and printing are leading industries.
- $3 billion has been spent in build-
ing new plants and enlarging old ones.

These are why Louisville calls itself the "Industrial Capital of the Southwest."

Across the river in Indiana are the suburbs of New Albany and Jeffersonville. Main plants on the Indiana side include Colgate-Palmolive, General Plywood, M. Fine garments, H. A. Seinsheimer garments, U. S. Steel homes, and Pillsbury. The new interstate bridge will ease traffic movement and enhance the crossroads side of the market.

East 75 miles from Louisville in the heart of the bluegrass, Lexington (64,000 population) cites two claims to world fame—largest loose-leaf tobacco market and "Horse Capital of the United States." The metropolitan area of 135,000 people, has 300 horse farms, favorite tourist spots. Another claim to fame is Spindletop Research Center, called the newest, independent industrial research institute devoted to space age projects. Lexington is proud most seasons of the U. of Kentucky basketball team.

Frankfort, the capital, shares the bluegrass economy, The cities reflect glories of the past but they're keenly interested in the chanting auctioneers who sell over 100 million pounds of fine burley tobacco every winter. Frankfort also has the economic support of the state government.

The twin state leaders, Gov. Bert T. Combs and Lt. Gov. Wilson W. Wyatt who also is chairman of the Economic Development Commission, cite figures like this in reviewing Kentucky's growth:
- 141 new and expanded manufacturing facilities in 1962 representing $174 million plant investment.
- Tourist income up 7%, twice the national average; exceeds $200 million.
- State has extensive parks and lakes.
- $155 million in new highway contracts.
- No. 1 burley tobacco state.
- Population totals 3,150,000 compared to 2,945,000 in 1950.
- Business and industrial development groups are making substantial progress in attracting new industry.
- 670,000 non-agricultural employes, up 21,000 in year.
- Kentucky has more river frontage and navigable waterways than any other state.

These are some of the reasons Kentuckians cling to their cities and farms. They love their bluegrass, horses, whiskey and scenery but they're highly conscious of the plants and new roads and waterways where the money comes from.

ABC RADIO COVERS THE OHIO VALLEY WITH POWER

IN LOUISVILLE

WHAS 50,000 WATTS

WHAS is only one of the powerhouse stations in the Ohio Valley that are now part of the growing ABC RADIO NETWORK. Others are WWVA Wheeling, WCKY Cincinnati and KQV Pittsburgh. And the power behind these stations is their own local programming combined with the long-time popular programming, the unmatched news coverage and the new programming that only ABC RADIO offers National Advertisers.

The facts have changed in Network Radio—ABC RADIO is the reason for the change.

the Evansville city line.

In Owensboro they emphasize the depression-proof attributes of the local and nearby area in the diversity of industry. Owensboro-Daviess County Industrial Foundation is active in attracting new plants. Its finest hour was the decision of Dewey & Almy Chemical Co. to start operating with a $4 million, 200-employee facility.

The General Electric tube plant has been there for years. Texas Gas Transmission Corp. has erected a glamorous headquarters building for its vast operations. Murphy-Miller employs 550 making office furniture; Green River steel employs 627 and is expanding.

The GE payroll is $19.5 million, quadruple the 1945 figure; Modern Welding has a $1.5 million payroll. And Owensboro is astir over reports of a big Harvey Aluminum plant proposed on a site a half-hour's drive to the east. With Alcoa expanding across the river toward Evansville, Owensboro would be delighted to join an aluminum upsurge in the area.

Other Owensboro highspots: Kentucky Wesleyan and Brescia Colleges; important Illinois Central and Louisville & Nashville rail facilities; three gigantic distilleries whose warehouses are so big they provide a local sightseeing attraction (Glenmore, Fleischman and Medley).

PADUCAH-CAIRO

The twin industrial centers of Paducah and its chemical offspring, Calvert City, are the last major economic entities near the western terminus of the Ohio River, 30 miles away. Opposite each other as the Ohio empties into the Mississippi are Cairo, Ill., and Wickliffe, Ky. Paducah has two other nearby confluences, the mouths of the Tennessee and Cumberland as they meet the Ohio.

As the major community in McCracken County, Paducah has a population of around 60,000 whose main income comes from industries, chemical plants, farming and the river itself. Illinois Central has repair facilities and shops that employ over 1,000. Other large employers include International Shoe, Modine Mfg., Southern Bell and Paducah Marine Ways.

Calvert City is a $200 million complex of chemical plants that started sprouting a few years ago. The plants use each other's products and get low-cost power. The area claims more generating capacity within 60 miles than any other comparable area in the world, a total of 3.7 million kw plus another 135,000 kw when the new Barkley Dam is built on the Cumberland River.

Some of the plants at Calvert City are Atomic Energy Commission uranium, 1,300 employees (operated by Union Carbide); National Air Reduc-
tion, 340 employees; Penn Salt 400; Pittsburgh Metallurgical, 450; General Aniline, 190; Goodrich 200. Goodrich has a $35 million expansion program.

Paducah and Calvert City have close ties with the Tennessee Valley Authority. Kentucky Lake is the largest man-made lake in the world (2,400-mile shoreline); other lakes are around the area or are being built. Paducah proper has a major urban renewal project. Barge line employment around Paducah is around 700. Other industries important to the area are Claussner Hosiery, 650 employees; Shawnee steam plant, 514; Chicago Telephone Supply Co., 250 and Southern Textile, 120.

At Mayfield are Curlee Clothing, 620; General Tire, 600, and Merit Clothing, 2,300. Metropolis, Ill., has Good Luck Glove, 600 and Allied Chemical 400. Cairo has E. L. Bruce Co., hardwood processing, 160, and M. Snower & Co., garments, 125.

Wickliffe is famed for its archeological museum.

As electric boxes improved, gas refrigerators lost their appeal. The city found itself with Servel, Arkla air conditioners, Bendix-Westinghouse compressors, and a half-dozen others. But Servel had lost its market. International Harvester shut down its refrigerator division; Chrysler moved out; Graham Paige had lost out in the competitive auto race. Within a seven-year period 10 major employers shut up shop. By 1957 Evansville was gnawing its civic fingernails to the quick. A Committee of 100 formed in 1952 hadn’t been able to halt the exodus or replace missing jobs.

So 1957 was the year Evansville raised a kitty and took a $30,000 look at itself through a professional appraiser’s eyes. It buoyed up local spirits just to hear the bad news. Southern Indiana G&E, civic conscious as well as anxious to sell more electricity and gas, the chamber of commerce, Evansville College, banks, industrialists, merchants—all got behind the bootstraps operation. Evansville Industrial Foundation and later Evansville Future Inc. were formed. Evansville Development Corp., recently organized, is using a revolving fund to get new plant sites.

Today’s Evansville is good to ob-

The bluegrass landscape between Louisville and Lexington is dotted with famed farms where equine aristocrats graze in lush pastures.

**EVANSVILLE REGAINS OLD PROSPERITY**

New industries outdo lost furniture, appliance factories

Memories of the unhappy 1950s are revived occasionally in Evansville, Ind., but more recent and more satisfying to this metropolitan area of 200,000 are the statistics of today’s humming industry and portents of approaching decades.

There’s probably no more courageous story of internal uplift than the account of Evansville’s recovery from a series of staggering industrial blows that left the city reeling. Luckily the local businessmen shook hands on a rebuilding deal that was successful beyond their fondest hopes.

117
serve. Abandoned factories have been modernized and expanded—RCA Whirlpool in the old Servel plant, for example. Old river-town structures of the Milltown Gothic era were razed; others were freshened up with paint and modern window treatment. Flood control was installed; industrial parks were plotted and started; a new museum of arts and sciences and the philharmonic orchestra are proudly shown to visitors.

**Better and Better** • Business last year was above 1961, which was above 1960. Unemployment has been chopped all the way from 14% to 4% or less. Evansville is an important distribution point, located near the population center of the nation. It has three ports—local, Yankeetown and Mount Vernon. They handle coal, ore, metal products, plus corn and soybeans sent downriver from Indiana farms.

Mount Vernon has a new General Electric plastic plant and an industrial park; Babeck & Wilcox is building a big reactor plant; Mead-Johnson has fattened the area pocketbook with money from its slimming Metrecal and pharmaceutical products.

General Motors has a major casting plant at Bedford, some miles out. Southern Indiana G&E has big generations and facilities; it operates the enormous Alcoa power plant at Yankeetown. Alcoa is adding a rolling mill, scheduled to employ 1,300, to its aluminum processing facility. Other major plants are Bueyrus-Erie Co., cranes; Igleheart Bros. (Swans Down flour mixes); Southern Indiana G&E is in an expansion program that will run $16.5 million; Indiana Farm Bureau has a refinery at Mt. Vernon; George L. Mesker Steel is active; Freeze Dry Products, H. Hendrich (cigars), Inland Container, Hahn Inc., International Steel, General Tires, Kent Plastics and others. They keep Evansville’s 200,000 population economically healthy (500,000 in the direct trading area).

At Henderson, with 18,000 people and beautiful Audubon Park, are Spencer Chemical, Dade Park race track, furniture and chemical plants. New motels are appearing on both sides of the river.

**HORSES, WHISKEY ARE BIG BUSINESS**

Kentucky first in bourbon, produces 60% stakes winners

There’s one thing about Kentucky—its people figure that since they have to do business to make a living they might as well have some fun while they’re at it.

The reference, obviously, is to horses and whiskey, two industries in which Kentucky exerts undisputed leadership.

These important economic entities didn’t just happen, Kentuckians explain. They grew and grew and still are dominant because of bountiful natural gifts. The horses’ high speed and robust health are ascribed to the bone-building attributes of limestone water and blue-grass pastures with limestone soil, augmented by the skilled breeding attainments of horse-farm operators.

And the whiskey. Once again limestone gets a lot of the credit. The ground water is a perfect mixer for the high-proof bourbon that comes out of charred-oak barrels.

**Home of Thoroughbreds** • But back to the horses. Kentucky has 200 thoroughbred farms, more than any other state, it’s claimed. And the state asserts it raises more fancy-bred horses than the 1,000 other thoroughbred horse farms combined. Kentucky horses win over 60% of all stakes races.

Take the 89th Derby the first Saturday in May, for example. It will draw 100,000 people to the track and 20,000 to the free Philip Morris show at the nearby fair grounds. These people will stay one to three nights at hotels and motels as far out as Indianapolis and Nashville—and pay inflated prices at many of the hostels.

While Kentucky tries to compute the economics of the horse industry, it has more specific statistics on the whiskey business. George Garvin Brown, president of Brown-Forman Distillers, said the American thirst is abetted by more leisure time and higher living standards, with per capita consumption of spirits having risen from 2.22 gallons in 1961 to 2.30 gallons in 1962. Whiskey sales were 183 million gallons in 1962, up 2.2%; imports were up three times as much, 71%.

Louisville’s 20 distilleries, dominating the bourbon world with the help of Owensboro, Bardstown and other centers, keep six cooperage plants busy making charred white oak barrels needed for the important processes involved in aging whiskey.

Brown-Forman (Early Times, Old Forester and King bourbon) uses a railroad car daily of special yellow dent corn grown in Indiana and developed by Purdue. Output of bourbon at Bardstown is over 300 barrels daily. Processing is scientific and intricate but the quality of the final product is up to a little group of five tasters supervised by Dan Knopf, laboratory manager.

Distillers contribute $18 million to the Kentucky treasury. Their plants produced 77.9 million gallons, 69% of total U.S. whiskey, in 1962, according to Distilled Spirits Institute data.
ORGANIZATION SESSION HELD

150 at uhf development committee initial session;

Lee, Henry to name 20 members to steering group

Some 150 representatives of industry and government gathered in Washington at the FCC's invitation last week, and plunged into the task of finding ways to help foster the development of uhf television.

The occasion was the organizational meeting of the Committee for the Full Development of Uhf Broadcasting, which is being sponsored by the FCC as a means of implementing the all-channel-receiver act.

The group didn't come up with any answers during its meeting—just questions. Some of the solutions to uhf's many problems will come, it's hoped, from studies to be made by subcommittees.

FCC Commissioner Robert E. Lee, chairman of the committee, told the opening session the FCC wants to "pick the brains" of industry's experts, and urged the group to look on the committee as its organization. "We want you to give us technical help," he said. "We won't try to spell out what this committee will do."

Commissioner E. William Henry, vice chairman of the committee, added a note of caution. "No one should get the impression that creation of this committee will guarantee success" of uhf television, he said.

Executive Group to be Named • Commissioners Lee and Henry in the next few weeks will appoint an executive committee of about 20 members to serve as a steering group. This body will meet in Chicago during the NAB convention, starting March 31, to establish subcommittees and draft agendas for them.

From the comments at last week's meeting, it appeared the problems troubling uhf broadcasters are technical and legal as well as economic. Some representatives, for instance, thought it would be helpful if broadcasters were permitted to put final amplifiers atop their towers—a practice now banned by FCC rules. Others said more efficient transmission lines were needed. Some called for closer liaison between the FCC and the Federal Aviation Agency in the matter of tower farms.

The importance of informing the public and dealers about the all-channel sets now coming into the market in increasing numbers was stressed by a number of speakers. Benito Gagunique, a communications attorney, suggested that the FCC and Federal Trade Commission cooperate "so that the right publicity" is given all-channel sets. E. I. Sandwick, of Electronics Industries Assn., agreed there is a need for an educational program—but said the FTC should be kept out of it.

Mort Farr, chairman of the National Appliance & Radio-TV Dealers Assn., expressed the hope the government "will find the funds" to finance a campaign to inform both the public and the dealers of the advantages of all-channel sets. He added the optimistic prediction that broadcasters who "pioneer" in uhf tv will one day "cash in."

Seminars Likely • One method of promoting uhf tv that will probably be adopted is the use of seminars, in which experts from various aspects of the industry would participate. Commissioner Lee said he thought such discussions could be an important method of publicizing and explaining uhf tv to dealers and servicemen in new uhf markets.

Other problems touched on included:

- Ratings and Madison Avenue's attitude toward uhf. Adam Young, who heads the rep firm bearing his name, said "ratings are a guide to what people buy." But William L. Putnam, of WWLP (TV) Springfield, Mass. (ch. 22), said ratings aren't an important factor locally. "A station owner doesn't have to tell a local advertiser how good his station is," he said. "The advertiser knows."

- Programming availability — Some thought this an economic problem. "If a station is healthily it's worth the programming it needs," said Mr. Gagunique.

- Uh allocations—"How can we get more allocations without disrupting those we have—this is a good area for study," said Commissioner Lee.

John Doerfer, former FCC chairman and now a communications attorney in Washington, had a suggestion for easing uhf stations' economic burdens that's likely to ruffle some commission feathers. Local live programming, which the FCC says stations should carry to meet their responsibilities, is expensive. Mr. Doerfer said, "If the commission wants to encourage uhf stations," he added, "it should consider giving some relief in this area."

Although this suggestion isn't likely to get far, Commissioner Lee said the commission is ready to act on a proposed rulemaking to ease transmission requirements for uhf stations. Among other things, it would permit the use of directionalyzed antennas, now banned, and reduce the required sound-to-picture power ratio.

Congress Interested • Two members of Congress present at last week's meeting emphasized the importance they attach to the effort to implement the all-channel act, which was enacted as a means of helping uhf tv.

Sen. Gale McGee (D-Wyo.), a member of the Senate Commerce Committee and its communications subcommittee, said the trade, the FCC and Congress should give the new act every chance to achieve the fuller utilization of uhf channels. There has been a "terrible waste" of these channels until now, he said.

Rep. J. Arthur Younger (R-Calif.), a member of the House Commerce Committee and its communications subcommittee, said unless uhf broadcasting develops, the all-channel-receiver act will merely impose a tax—the extra cost of such sets—without providing

Representatives of three broadcasting equipment makers chat with FCC Commissioner Robert E. Lee at the organizational meeting of the Committee for the Full Development of Uhf Broadcasting. (l-r) E. R. Taylor, executive vice president, Motorola Inc.; Commissioner Lee; A. E. Allen, director of products, Philco Corp.; and Charles N. Hoffman, director of sales, Warwick Manufacturing Co. Some 150 people attended the meeting.
the consumer with any added benefit. He called for a concerted effort to make sure that uhf broadcasting is available for reception on the all-channel sets consumers will be buying exclusively next year. Deadline for all-channel sets is April 1964.

The committee for the development of uhf broadcasting will have a life span of two years—unless the FCC decides to prolong it, Commissioner Lee said. He added that the commission will be “scrupulous” in protecting committee members from wandering into antitrust law violations. He said the committee’s activities will be conducted in accordance with a 1962 presidential order that lays down guidelines for industry-government committees.

**Ford to Pastore** • Meanwhile, the only commissioner who opposed creation of the committee, Frederick W. Ford, gave his reasons last week in a letter to Sen. John Pastore (D-R. I.). Commissioner Ford said he feels “as strongly as anyone” that the FCC should promote the technical advancements of uhf but dissents strongly to agency involvement in broadcasting activity more properly belonging in a trade association.

Commissioner Ford’s views were requested by the chairman of the Senate Communications Subcommittee during a hill appearance by the FCC in late February (Broadcasting, March 4).

In addition to technical matters, the committee is charged with collecting and disseminating information on the practical problems confronting uhf tv stations and Commissioner Ford said he objected to this provision on three grounds: (1) it is contrary to the philosophy of the all-channel receiver legislation in that it will tend to “over-sell” uhf too early and may cause channels needed for education to be gobbled up; (2) it places the FCC in sponsoring “what in effect will be a trade association,” and (3) it is contrary to the FCC’s regulatory responsibilities under the Communications Act.

**BROADCASTING DAY**

Florida observance hears call for broadcaster on FCC

Prominent broadcasters from Florida and Texas stressed the need last week for the appointment of an experienced broadcaster to the FCC.

Appearing during Broadcasting Day (March 11) at the fifth annual U. of Florida Communications Week, Lee Ruwitch, vice president-general manager of WTVJ (TV) Miami and Mike Shapiro, general manager of WFAA-AM-FM-TV Dallas, said there is a crying need for an FCC member with a practical outlook toward the industry.

“The FCC is overinfluenced with a bureaucratic attitude” and does not understand the industry it regulates, Mr. Ruwitch said during a panel discussion moderated by Mr. Shapiro. (The presidents of 41 state broadcasters associations sent a resolution to President Kennedy urging that an industry man be named to the next available vacancy [Broadcasting, March 4].)

Two Washington attorneys, Thomas Wall of Dow, Lohnes & Albertson and Robert L. Heal, Spearman & Roberson, discussed the current regulatory climate at the commission. Both attorneys attacked the FCC’s encouragement of viewers and listeners to complain to both the station and the commission about programming.

Melvin A. Goldberg, NAB vice president for research, predicted that pay tv may eventually reduce free television to offering “Class B or C material.” This could be caused, he said, because of the huge financial returns held out for pay tv programming.

Turning to ratings, Mr. Goldberg said that audience measurements need to be “more than just a head count” and should go into why people view and listen. “We’ve got to learn what people self-censor and why to eliminate needless duplication,” he said.

Sydney Roslow, president of The Pulse Inc., New York, indirectly answered charges made against his firm a week ago before the House Special Subcommittee on Investigations (Broadcasting, March 11). Dr. Roslow, who is scheduled to testify this week in the ratings investigation, said that his field workers have made door-to-door interviews in suburban Miami cities despite local ordinances banning such activity.

“Applying such ordinances to companies like ours who don’t sell anything is unconstitutional,” he said.

Status Symbol • Tv is becoming a national status symbol in underdeveloped countries and the U. S. must provide both educational and entertainment programming overseas or the Russians will, R. Basil Thornton, international director of the National Educational Tv & Radio Center, New York, told the conference. If “underdeveloped countries can’t afford an atom bomb, they’ll settle for a tv station,” he said.

With many students in the audience, highlight of the “day” was a live telephone discussion with NBC commentator Chet Huntley in New York and NBC correspondents in Paris, London and West Germany on educational needs of future broadcast journalists. “The best preparation for getting into news work,” Mr. Huntley said, “is to read all the books you can get your hands on.”

Robert Hitchens, director of NBC Radio sales planning, and Harold Krelstein, president of Plough Broadcasting Co., also participated in the Broadcasting Day seminar.
"To be prepared for war," said George Washington, "is one of the most effective ways of preserving peace."

Today's counterpart of this philosophy is reflected in the massive shield of missile sites built or under construction in the farthest reaches of rural America. Many of these, and hundreds of other vital defense installations, are served by America's rural electric systems.

These locally-owned cooperatives and power districts were created by rural people who could not get electric service from established power companies. Today these systems operate 1 1/2-million miles of lines far beyond city limits, serve the growing power needs of 20 million rural people. And capital borrowed from the Rural Electrification Administration to build these lines is being repaid with interest.

Because these lines are there, power is quickly provided for vital installations ranging from launching pads to tracking stations, from lighthouses to Air Force bases.

Rural electric systems are proud to play an important part in safeguarding peace and the future of all Americans.
Gov. Romney to speak at NAB closing session

ERWIN CANHAM TO MODERATE JOINT TUESDAY PANEL

The stable of featured speakers for the NAB's 41st annual convention in Chicago March 31-April 3 was completed last week with the announcement that the nationally prominent governor of Michigan, George Romney, will address the final day management luncheon.

And, as today's (Monday) deadline for pre-registration approached, expected attendance at the annual gathering of broadcasters in Chicago's Conrad Hilton Hotel continued to reach toward a record. As of noon last Thursday (March 14), 2,072 radio-tv men had notified the NAB they would be in Chicago.

Co-chairmen of the 1963 convention are James D. Russell of KCTV (TV) Colorado Springs, and Ben Strouse, WWDC-AM-FM Washington. They are vice chairman of the NAB Radio and Television Boards, respectively.

Tv personality Bob Hope, who will receive the NAB's Distinguished Service Award, NAB President LeRoy Collins and FCC Chairman Newton N. Minow are the other featured speakers during the convention. The traditional question-and-answer session with members of the FCC will close the convention Wednesday afternoon.

A special joint radio-tv session Tuesday morning will hear a panel discuss "Broadcasting in a Free Society," to be moderated by Erwin D. Canham, editor of the Christian Science Monitor. New to the tv agenda this year is a debate on the controversial proposal to adopt as FCC rules the NAB code time standards for commercials. Participants will be Commissioner Robert E. Lee, who first suggested the plan, and William Pabst, chairman of the tv Code Review Board and vice president-general manager of KTVU (TV) Oakland-San Francisco.

Republican Gov. George Romney, often mentioned as a potential presidential or vice presidential candidate in 1964, surged into national prominence in his successful election campaign last year. He previously served as president, board chairman and general manager of American Motors.

ABC-TV affiliates meet to see program preview

ABC-TV's affiliates will get a first hand view of the network's program offerings for 1963-64 at the affiliates' March 30 meeting in Chicago when 27 of the network's performers stage a season preview.

Jerry Lewis will emcee the special performance, which will include contributions from such personalities as Lawrence Welk, Ernest Borgnine, Jimmy Dean, John McIntyre, Chuck Connors, Ozzie Nelson and Jack Palance.

The meeting will be held at the Conrad Hilton Hotel at 2:30, and will be followed by a cocktail party and dinner. Executives participating in the meeting include Leonard H. Goldenson, president of American Broadcasting-Paramount Theatres Inc., Thomas Moore, ABC-TV vice-president in charge, Robert L. Coe, vice-president in charge of tv station relations, James C. Hagerty, vice-president in charge of news, special events and public affairs, and Chester Simmons, president of Sports Programs Inc.

Collins makes plea for House coverage

The right of the American people to know about the operations of their federal government no longer can be satisfied by a reporter with a pencil, NAB President LeRoy Collins told the House Rules Committee last week in a plea for the removal of the House ban against radio and tv coverage of committee hearings.

"Public proceedings of congressional committees can be made truly public in this day and age only through the added efficient use of the tools of radio and television—as applied by the expert and dedicated electronic journalist," the NAB president said. He pointed out the major technical advances in recent years which make it possible for electronic coverage with "very little or no obtrusiveness" in urging the committee to approve H Res 263.

The measure was introduced by Rep. Orrin G. Harris (D-Calif.), chairman of the House Commerce Committee, and he and Rep. George Meader (R-Mich.) testified in favor of removal of the ban two weeks ago (Broadcasting, March 11). Normally, the Rules Committee does not permit testimony from a nonmember of Congress but since it has original jurisdiction over the measure, it accepted Gov. Collins' request to testify.

Since the Senate permits radio-tv coverage of hearings, "its committee proceedings and those engaged in them have been made better known to the American people than proceedings of comparable importance before House committees," the NAB president said. "We ask now . . . that you give the people a greater opportunity to hear and see your committees transact their business. For, after all, it is the people's business too."

Rep. B. F. Fisk (D-Calif.) said that "I have always been opposed to this

NAB membership continues to grow

NAB membership passed 3,000 for the first time in 1962 and the rolls have continued to grow since Jan. 1 with 3,113 members as of last Wednesday (March 13).

This is an increase of 59 over the 3,054 radio, network and associate members at the close of 1962. During 1962, 427 dues-paying members were added but 284 resigned or were dropped from the rolls, for a net gain of 143.

Code subscribers also are on the increase, with 1,768 radio code members and 406 tv last Wednesday. Comparable figures on Jan. 1 were 1,671 radio subscribers and 399 members of the television code.

A breakdown of NAB membership last week showed: 1,885 am stations; 678 fm; 403 tv; 4 am networks; 3 tv networks; 140 associate members.

At its board meeting last January, the NAB authorized the appointment of a membership liaison committee to be made up of at least one broadcaster from each state and Puerto Rico. Bill Carlisle, NAB vice president for station services, said that the committee members are being selected by NAB Radio Board directors and that the committee will become official at the close of the 1963 convention.
Viewing time sets new record in January

The average American family spent more time watching television in January than during any previous month in the industry's history, according to A. C. Nielsen Co., figures presented by Norman E. Cash, president of the Television Bureau of Advertising.

Mr. Cash reported to the Fordham Alumni Advertising Club on March 13 that time spent viewing television in January was 6 hours and 14 minutes per TV home per day, a 17-minute average increase over last January's figure of 5 hours and 57 minutes. The former viewing record was 6 hours and 8 minutes in February 1961.

The average viewing time per TV home for the entire year 1962 was 5 hours and 4 minutes per day, according to Mr. Cash's report.

proposition" but told Gov. Collins that he had made the strongest argument the congressman had ever heard for removal of the ban. Rep. James Delaney (D-N.Y.) expressed an old fear that broadcasters could not be trusted to present hearing coverage in a completely fair and impartial way.

Rep. William Avery (R-Kan.) asked about what he termed a "critical area of disagreement"—equal time requirements in an election year—if a congressman running for reelection is shown and heard in a House hearing. Gov. Collins said that the question of repeal of Sec. 315 (which already exempts newscasts) of the Communications Act is a separate question now before the House Commerce Committee and that situations of this type would be covered under the FCC's fairness doctrine.

WGN-TV to program 24 hours

Round-the-clock television service on Fridays and Saturdays is to be inaugurated April 5, WGN-TV Chicago reported last week. Later in the summer the independent outlet may expand the 24-hour schedule to all seven days of the week. Although program format has not yet been determined, WGN-TV said it has plenty of movies and other film programs which it can use.

Although open-end type discussion programs now on WBKB (TV) and WBBM-TV there on weekends frequently run into the small hours, no Chicago station presently programs all night on a regular basis. WCBS-TV New York began all-night programming several weeks ago.

WICU(TV) to return to NBC-TV network lineup

WICU (TV) Erie, Pa. (ch. 12), is switching its primary affiliation from ABC-TV to NBC-TV, effective May 1, according to an announcement being released today (Monday) by Tom Knodle, NBC station relations vice president, and Arthur Ingram, general manager of the station.

WICU left NBC-TV for ABC-TV in 1961. Erie has one other television station on the air, ch. 35 WSEE (TV). Its primary affiliation is with CBS-TV, its secondary affiliation now with NBC-TV. Another uhf station has been authorized but is not in operation.

WICU is licensed to Gibraltar Enterprises Inc., principally owned by Edward Lamb.

KVKM-TV joins ABC-TV

KVKM-TV Monahans, Tex., using four relay stations which it set up between El Paso and the ch. 9 outlet's transmitter near Kermit, Tex., has become a full-time ABC-TV affiliate. Construction of the 240-mile microwave system and the beginning of ABC-TV service was announced last week by J. Ross Rucker, general manager of the station.

WIBG announcers back on job

The 11 announcers and newsmen who had been on strike at WIBG Philadelphia returned to work last week pending final resolution of the contract between the station and the The American Federation of Television and Radio Artists, the employees' bargaining group.

Ray fills in at OBA operations seminar

TWO-DAY MEETING ATTRACTS OVER 150 FROM 5 STATES

Discussion of all phases of radio-tv regulation highlighted the first Radio Operations Seminar of the Oklahoma Broadcasters Assn. in Norman, March 9-10. Over 150 broadcasting and advertising agency executives from five states attended the sessions conducted with the U. of Oklahoma.

William Ray, chief of the FCC's Office of Complaints & Compliance, was the principal speaker as a substitute for Broadcast Bureau chief and commissioner-to-be Kenneth A. Cox, who was ill. Mr. Ray spoke on the rules of the commission and current interpretations which guide broadcasting executives.

He said broadcasters should regard their stations, at least in part, as modern versions of the town crier and town hall. By communicating news of the community and providing a forum for discussions of community problems, broadcasters would go far toward meeting the FCC's programming requirement that they satisfy the "needs" of their communities, he said.

Speaking on Sec. 315 (equal time) and Sec. 317 (sponsor identification) of the Communications Act, NAB Executive Vice President Vincent Wasielski told the broadcasters that "common sense" should guide their operations under these two controversial standards.

Clee Fitzgerald, OBA attorney from Stillwater, Okla., conducted a discussion on lottery laws and contracts. He said that Oklahoma's lottery statutes are generally more stringent than those of the federal government and that if stations comply with the state laws they should not run afoul of the FCC.

The broadcasters were given a course in preparing license renewal applications by Francis X. McDonough of the Washington law firm of Dow, Lohnes & Albertson. He suggested that each station prepare its own "composite week" once each year and thoroughly analyze its operations "and then when the time comes to file for renewal, you know that your station is ready for it."

Howard Kitzmiller, FCC attorney, concluded the two-day seminar with a warning that "far too many" stations do not compile accurate and complete logs. He said the commission is vitally concerned with the maintenance of proper logs and told the broadcasters that "attention to detail will go far to-wards a favorable FCC report . . ." following a station inspection.

Sen. Howard Edmondson (D-Okl.) met with a committee of Oklahoma licensees on broadcasting problems with the FCC during the seminar at the invitation of OBA President William S. Morgan, general manager of KNOR Norman.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• KFQ-Am-TV St. Joseph and KLJK Jefferson City, both Missouri: Sales reported close to completion by Jesse Fine and associates to Mid-State Broadcasting Corp. for $1,750,000. Mid-State is headed by John P. McCoff, and owns fm stations WAXB Detroit, WSWM East Lansing and WQDC Midland, all Michigan. KFQ is a fulltime station on 680 kc with 5 kw. KFQQ-TV is on ch. 2 with CBS and ABC affiliations. KLJK is a 5 kw daytimer on 950 kc. Broker was Hamilton-Landis.

• KVIP-TV Redding, Calif.: Sold by Shasta Telecasting Co. to Sacramento Valley Telecasting Inc. for over $1,250,000. Sacramento Valley, currently in hearing for ch. 9 in Redding, is comprised of six stockholders, with major owners being Frank M. Crawford, J. Ned Richardson and William B. Smullin, 25% each. Mr. Richardson owns KPAY Chico, Calif. Mr. Smullin is 50% owner of Southern Oregon Broadcasting Co. (KBES-7 Medford, KAGI and KGPO [FM] Grants Pass, KOTT-TV Klamath Falls, and 50% of KPIC-TV Roseburg, all Oregon). Other Sacramento Valley stockholders are Robert Burris, former manager of KEYT (TV) Santa Barbara, Calif., and Richard C. D. Bell, also formerly of KEYT. Shasta Telecasting owns KJEO (TV) Fresno, Calif., and through Carl R. McConnell KVQ-TV Eureka, Calif. KVIP-TV, founded in 1956, operates on ch. 7 and is affiliated with ABC and NBC.

• WBOY-AM-TV Clarksburg, W. Va.: Sold by Rust Craft Broadcasting Co. to Fortnightly Corp. for $950,000. Fortnightly Corp. owns The Reporter magazine and the Clarksburg Television Cable Co. which operates the community tv system in Clarksburg. Roger Garrett remains as manager of the station. At one time Rust Craft instituted a court suit against Fortnightly for picking up the signals of WSTV-TV Steubenville, also owned by Rust Craft, and carrying them on the catv cable in competition with WBOY-TV in Clarksburg. Rust Craft also owns WSTV-AM-FM in Steubenville, WRCB-TV Chattanooga, Tenn.; WRD-TV Augusta, Ga., WPIT-AM-FM Pittsburgh, Pa.; WWOL-AM-FM Buffalo, N. Y.; WSO

Tampa, Fla., and 40% of WVUE-TV New Orleans, LA. WBOY operates on 1400 kc with 1 kw day and 250 w at night with an NBC affiliation. WBOY-TV is on ch. 12 and carries both CBS and NBC programs.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see FOR THE RECORD, page 136).

• KSYD-TV Wichita Falls, Tex.: Sold by Sidney A. Grayson and Associates to Paul Harron and group for $2,350,000. Mr. Harron is the principal stockholder of WKTV (TV) Utica, N. Y., and is president of World Broadcasting System, Philadelphia, a radio program service. He is a former Philadelphia broadcaster. KSYD-TV is on ch. 6 and is a CBS affiliate.

• WMAM-AM-FM-TV Macon, Ga.: Sold by George P. Rankin Jr., Wilton E. Cobb and Mr. and Mrs. Wallace Miller to WMRC Inc. for $2,094,750. WMRC Inc. owns WBFC-AM-TV Greenville, S. C.; WBIR-AM-TV Knoxville, Tenn. It is 49.8% owned by the Greenville News and Piedmont, 14.6% by R. A. Jolley and family, and others. The same group also owns WWNC Asheville, N. C. (Asheville Citizen-Times). WMAM is on 940 kc with 50 kw daytime and 10 kw nighttime. WMAM-FM operates on 99.1 mc with 3 kw. WMAM-TV, founded in 1953, operates on ch. 13. All the stations are CBS affiliates, with the tv adjunct also carrying ABC programs.

Autry group buys western hotel chain

In a $20 million transaction that adds hotels and motels to their broadcasting and sports interests, Gene Autry, Robert O. Reynolds and Paul A. O’ Bryan have purchased the Doric Co. chain of 20 West Coast hotels and motor hotels and have formed the Gene Autry Hotel Co. to own and manage these properties. Mr. Autry is president of the new hotel company; Mr. Reynolds is vice president; Mr. O’ Bryan is secretary, treasurer and general counsel; Floyd R. Clodfelter, former board chairman of the Doric Co., is also a vice president. The transaction was negotiated by Mr. O’ Bryan of the Washington, D. C., law firm of Dow, Lohnes & Albertson, for the buyers. The sellers were represented by Birney Dempsey of Clodfelter & Bowden.

Mr. Autry, whose career began as a rodeo and western motion picture star, is board chairman of Golden West Broadcasters (KMPC Los Angeles, KSFO San Francisco, KEX Portland, Ore., KVI Seattle, Wash.) and Mr. Reynolds is president. Messrs. Autry and Reynolds are also board chairman and president, respectively, of the Los Angeles Angels baseball club and own a major interest in the Los Angeles Rams football club, ventures in which Mr. O’ Bryan is also associated. Mr. Autry also is owner of KOOL-AM-FM-TV Phoenix and KOLD-AM-TV Tucson, both Arizona.

GE forms subsidiary to run radio-tv stations

GE announced last week that a wholly owned subsidiary General Electric Broadcasting Co., has been established to operate the GE stations, WGY, WGFM, WGBF (FM) and WRGB (TV) Schenectady, N. Y. A certificate of incorporation has been filed with the New York secretary of state, according to J. Milton Lang, general manager of the GE stations. GE’s board approved the formation of a broadcasting subsidiary last February.

Among the advantages of a separate corporation, Mr. Lang said, was the simplification of expanding station ownership through the acquisition of additional radio and tv stations.

At the present time the licenses of the GE stations are pending renewal by the FCC. GE, along with several other electrical machinery manufacturers, including Westinghouse Electric Co., was found guilty two years ago of price fixing in violation of the antitrust laws.

GAB, governor to meet

Gov. Carl E. Sanders of Georgia has scheduled an unusual off-the-record session with member stations in the Georgia Assm. of Broadcasters for April 11 in Atlanta. Combined with a luncheon, GAB President Charles Smith of WDEC Americus, said the session will permit broadcasters to tell the governor their problems and at the same time get a first-hand report on state issues.

The licenses of the Westinghouse stations, held by subsidiary Westinghouse Broadcasting Co., were renewed by the FCC last year.

WHEB opens new studios

WHEB Portsmouth, N. H., began operating from a new $40,000 home March 8, one year to the day after a fire gutted its former quarters. It has been operating in the interim from the New Hampshire National Bank.

Harold Segal, WHEB’s general manager, designed the new colonial style building. The station’s three studios are in the center of the building, permitting visitors to watch the operations through windows as they circle the interior of the building.

ARCMATRATIVE STATION BUYS!

EAST COAST—Network affiliated VHF-TV station operating in the black. Good physical facilities. Total price of $682,500.00. On terms to be negotiated.

FAR WEST—Excellent power, daytime-only radio station serving marketing area of 200,000. Heavy fixed assets. Last nine month ownership earnings in excess of $25,000.00. Priced at $175,000.00 with $50,000.00 down and balance over ten years.
CBS LOOKS TO ANOTHER RECORD YEAR

Stockholders report gives divisional breakdown

If the general economy holds good, national advertising expenditures should rise again this year and radio-television revenues ought to outgain those of other media, CBS Chairman William S. Paley and President Frank Stanton said last week in their annual report to stockholders of CBS Inc.

“We expect,” they said, “that CBS will enjoy its full share of this growth” and attain “an increased level of sales and profits in 1963.” CBS net sales in 1962 surpassed the half-billion dollar mark for the first time, reaching $509.3 million on a 7% gain while net income rose 32% to more than $29 million (Broadcasting, Feb. 18).

The report said the CBS-TV network in 1962 enjoyed record revenues which made it “the world’s largest advertising medium” for the ninth consecutive year, while net sales for the five CBS-owned television stations rose 12% over the previous all-time high of 1961. Four of the stations, “and probably all five,” were first in sales in their markets, stockholders were told.

For the CBS Radio network and the CBS-owned radio stations 1962 was a year of “searching reappraisal” plus programming and operational changes which were expected to contribute to their growth, the report continued.

“Although sales were adversely affected by widespread business uncertainties in 1962,” the report said of the CBS Radio Div., “at year’s end the prospects for advertising revenues in 1963 and the sponsorship commitments already in hand for the new year were more encouraging than at any time in the recent past.”

News Production - The CBS News Div. was said to have produced 17% of the CBS-TV network schedule, or 187 hours more than in 1961, and 51% of the CBS Radio network schedule.

With the start of the long shutdown of all major New York newspapers in December, it was also noted, CBS News increased its hours of service to WCBS-TV New York by 75%. WCBS Radio meanwhile was reported to have expanded its news schedule by 30% to help keep listeners informed during the newspaper strike.

The CBS-TV Stations Div. (including CBS Films Inc. and several international operations as well as the CBS-owned television stations) was said to have had “the best year in its history,” and was looking forward to a better one in 1963.

National spot billings placed on the owned television stations by CBS Television Stations National Sales, another unit of this division, exceeded the 1961 figure by 16%.

The five CBS-owned tv stations also were reported to have carried “more than 10,000 non-network public-affairs programs and nearly 33,000 local unsponsored community service announcements” in 1962.

Columbia Records reported a 15% sales gain as leader of the phonograph record industry. CBS International Div. “showed promising results,” and CBS overseas activities and investments “in the aggregate, were profitable and ‘highly promising.’” CBS Labs, the seventh corporate division, reported advances in research and development for both government and industry.

The CBS-owned stations are WCBS-AM-TV New York, KNX and KNXT (TV) Los Angeles, WBBM-AM-TV Chicago, WCAU-AM-TV Philadelphia, KMOX-AM-TV St. Louis, WEEI Boston and KCBS San Francisco.

RKO General sales up

The National Sales Div. of RKO Broadcasting, New York, announces sales on the company’s five tv stations for the first four months of the 1962-63 fiscal year ended Jan. 31 rose 47.1% over the same four-month period a year ago.

Sales on the seven RKO General radio outlets were 31.2% ahead of last year’s figure.

RKO General broadcasting stations are WOR-AM-FM-TV New York; KHJ-AM-FM-TV Los Angeles; WNAC-AM-TV and WRKO (FM) both Boston; CKLW-AM-FM-TV Windsor-Detroit; KFRC-AM-FM San Francisco; WGMS-AM-FM Washington, D.C.; WHBQ-AM-TV Memphis; and the Yankee Network.

RCA stockholders to meet

The annual stockholders’ meeting of RCA is scheduled for May 7 at 30 Rockefeller Plaza, New York. The entire board of 16 members will be elected. Other business: appointing independent public accountants and voting on a resolution submitted by three stockholders concerning the incentive plan.

In the notice of the meeting, yearly compensation of the following officers and directors among others was indicated: David Sarnoff, chairman, $200,000 ($66,926 after taxes); Robert W. Sarnoff, chairman of NBC, $180,000 ($66,404); Elmer W. Engstrom, president, $160,000 ($74,488).

Paley sells to ‘diversity’

William S. Paley, board chairman and biggest stockholder of CBS, sold 75,000 shares of CBS common stock during February “to provide more diversification of his personal investments.” He retains more than $866,000, his office said in a statement released last week.

His sale was said to have been on the open market, apparently over a period of days. The dates were not disclosed, except that they were in February. The closing price of CBS stock on Feb. 1 was 47-3/4; on Feb. 15 it was 49-3/4 and on Feb. 28 was 50-3/4. At those prices 75,000 shares would have brought from about $3.5 million to more than $3.7 million.

Public offered stock of Scripps-Howard

The first public offering of Scripps-Howard Broadcasting Co. stock was disclosed last week when the company registered with the Securities & Exchange Commission in Washington for an offering of 375,000 shares of $1 par common stock at an estimated $20 a share. This represents 14.5% of the outstanding stock of Scripps-Howard Broadcasting.

The E. W. Scripps Co. owns 71.48% of Scripps-Howard Broadcasting. After selling 118,750 shares, its ownership will drop to 66.89%. Mr. Howard, president of the Scripps company, owns 8.69% of broadcasting company, and after selling 102,500 shares, will remain a 4.37% owner.

Messrs. Hanrahan, Watters and Westergaard each own 4.35% now, are selling 51,250 shares each which will leave them each as 2.37% owners. Mr. Hanrahan is vice president and general manager of WESV (TV) Cleveland; Mr. Watters, of WCPO-AM-FM-TV Cincinnati, and Mr. Westergaard, of WNOX-AM-FM Knoxville, Tenn. Scripps-Howard Broadcasting also owns WPTV (TV) West Palm Beach, Fla., and WMC-AM-FM and WMCT (TV) Memphis, Tenn.

As of Dec. 31, 1962, Scripps-Howard Broadcasting had 2,588,750 shares issued and outstanding, with stockholders...
Wometco sets record for earnings in '62

For the fourth successive year since 1959, when the company became publicly owned, Wometco Enterprises Inc. earnings showed an increase. For the year 1962, Wometco reported record net income after taxes of $1,831,254 ($1.27 a share), up 35% over 1961's $1,353,255 (94 cents a share).

Gross income for 1962 was up 17% to $18,723,132 from 1961's $15,999,469. The company showed a cash flow of $2,774,137 ($1.93 a share) for 1962.

So far in 1963, Mitchell Wolfson, Wometco president, said, the company is operating at levels above those of last year.

Wometco owns WTVJ (TV) Miami, WLOS-AM-FM-TV Asheville, N. C.; KVOS-TV Bellingham, Wash., and 47 1/2% of WFGA-TV Jacksonville, Fla. It also owns theatres in Miami and West Palm Beach, the Seaquarium in Miami, venerating operations in South and Central Florida, Jacksonville, Panama, the Canal Zone, and the Bahamas, and operates Pepsi-Cola and Canada Dry franchises in the Bahamas.

The company's annual stockholders meeting is scheduled for April 1 in Miami.

BRITAIN COOL TO PAY TV

Applications for experimental 'wired' network fail to materialize after 12 information queries

Great Britain's invitation for applications from companies wishing to operate experimental pay television on "wired networks" next year has met with nothing more than a nod of interest so far.

Deadline for applications to operate the network is March 29, and according to reports published in England last week, there had been 12 inquiries asking for full information regarding the proposed network, but no firm applications to date.

A pay television network, under supervision of the British postmaster general, would provide subscribers with an additional program, apart from those of the British Broadcasting Corp. or the Independent Television Authority, for which viewers would pay extra sums either through coin boxes attached to their sets or by credit arrangements.

The government, which has established a rigid set of restrictions for any company contracting to operate such a network, warns that there is no guarantee that pay tv will be established permanently. The government will determine after a two or three-year trial whether there is sufficient demand and quality of programming and operation to merit pay tv's continuation there.

Among specifications set forth by the postmaster general for the experimental network are clauses specifying that program schedules must be submitted in advance, as well as scripts or recordings, if required. A general decency code is stated, as well as stipulations that there be no programs of a news or propaganda nature, and that no significant prizes can be awarded on the shows. There is an absolute ban on advertising.

Companies said to be available for such an operation because they have the necessary equipment are Choiceview (owned jointly by Rediffusion and Rank), British Telemeter Home Viewing Ltd., and British Relay Wireless Ltd. Program suppliers Tolvision Ltd. and British Home Entertainment Ltd. are also mentioned as possible applicants for the franchise.

Rigid government restrictions apparently would influence the nature of any company which receives the pay tv franchise, including a provision that the company must be set up "to operate pay television as its main interest."

ITA tv bill amendment sought by postmaster

Britain's postmaster general wants to remove some of the tough provisions from the new television bill now being considered by the House of Commons. The bill re-defines the Independent Television Authority's control of programming.

He has moved an amendment cutting out the requirement that in making its program code the ITA must take into account Section 3 of the current television act. This section says that nothing may be broadcast which offends good taste or decency and also lays down that "proper proportions of the recorded and other matter . . . are of British origin and British performance."

The postmaster general's amendment instructs ITA to draw up a code "giving guidance" on the use of violence and other standards. ITA must "secure that the provisions of the code are observed."

Another amendment, tabled by the Labor Opposition, would increase ITA powers. It wants to add a provision to the bill that ITA shall "give directions" on "specific matters concerning standards.

"This amendment also instructs ITA to make sure that 90% of the programs on the commercial network are British."

Labor members also want the annual report and accounts of ITA to be debated by Parliament. Labor M. P. Donald Chapman said that it was a scandal to give the Independent Television Authority a 12-year lease of life without parliamentary power to withdraw it.

Postmaster General Reginald Bevins said that a routine annual debate would mean interference in the day-to-day running of both broadcasting organizations. This would be "wholly a bad thing, and a bad influence on television, . . . ." He said that a new ITA chairman would be appointed before the bill becomes law. The bill is still under discussion.

TeleHaiti signs IBD as U.S. representative

A second Caribbean television station has contracted newly formed International Broadcast Div. of Screen Gems Inc. as its U.S. representative. Formation of the new division was announced slightly over a week ago (BROADCASTING, March 11).

TeleHaiti, the only tv outlet for the country of Haiti, joined HIN-TV Santo Domingo, the Dominican Republic's only tv station, as IBD's first two clients.

The signing of a general representation agreement between TeleHaiti of Port-Au-Prince, and IBD, was announced last week by Boris Frank, manager, Latin America.
Leslie Parkhurst, former president of American Safety Razor Co., joins executive staff of Schick Inc., Lancaster, Pa. Mr. Parkhurst will be responsible for marketing of Schick's line of men's toiletries.

Wallace Roehrig named advertising manager of Atlantic Cos. (Atlantic Mutual Insurance Co. and Centennial Insurance Co.), New York, succeeding W. Irving Plitt, vp, who retired Feb. 28 after 45 years service with organization.

A. J. Cason, former vp and account executive at Roche, Rickerd & Cleary, Chicago, named to executive contact group at O'Grady-Andersen-Gray, that city, succeeding Roger Kirkgasser, who resigned.

Charles E. Little, senior account executive at Foote, Cone & Belding, New York, appointed supervisor of General Food's Jell-O Div. account at agency.

Samuel A. Montague, formerly with People-to-People Inc., Kansas City, joins Potts-Woodbury, that city, as vp and executive director of advertising agency's newly established public relations division.

George R. Windsor, merchandising executive at Erwin Wasey, Ruthrauff & Ryan, Los Angeles, joins McCann-Erickson, that city, as account executive.

Mrs. M. K. Morton joins Donald L. Arends Inc., LaGrange, Ill., advertising agency, as account executive.

Paul O'Neill, senior account executive at Norman, Craig & Kummel, New York, joins Boston office of Wilson, Haight & Welch, Hartford, Conn., ad-

Beverly Wilshire Hotel
BEVERLY HILLS, CALIFORNIA

BROADCASTING, March 18, 1963
Mr. Evans

Mr. Evans, who will continue to make his headquarters in Chicago, joined TVB in 1961 from American Weekly where he served as managing editor. It has been learned that Mr. Evans’ added responsibilities, as reported last week, erroneously implied that he had changed jobs and moved to another city. This is not so.

George Guido, formerly with Leo Burnett Co., Chicago, joins Needham, Louis & Brobery, that city, as senior art director. Dixie Lee Buyan, previously with Campbell-Mithun, joins NL&B’s creative staff as writer.

THE MEDIA

Ralph Radetsky, executive vp and general manager of Metropolitan Television Co. (KOAA-AM-FM-TV Denver and KOAA-TV Pueblo, Colo.), elected president and chief executive officer, succeeding William Grant, president and board chairman, who resigned. Thomas P. Campbell, one of founders of Metropolitan, elected board chairman.

Thomas L. Davis, general manager of WAAF Chicago for past 12 years, elected vp of Corn Belt Publishers, publisher of Drovers’ Journal and other publications and parent firm of WAAF.

Seymour Whitelaw, sales manager of KCBS-AM-FM San Francisco, elected vp and general manager of KOL-AM-FM Seattle, which last week was transferred from Taft interests to Goodson-Todman as tv program package firm’s first venture into station ownership.

Paul Rogers, sales and promotion manager of WACE Chicopee (Springfield), Mass., since August 1962, promoted to general manager. Joseph Rogalski Jr., member of WACE staff for 15 years, succeeds Mr. Rogers as sales and promotion manager.

James Westerhold, member of sales staff of WLKR-FM Norwalk, Ohio, promoted to station manager. Other executive promotions within Bob Reid-er Group (WRWR-FM Port Clinton, WLKR-FM Norwalk, WKTN-FM Kenton, all Ohio) are: Jean Lockwood named group’s chief accountant; Wayne Wobsen to chief engineer for group; and William Shaw to station manager of WKTN-FM.

Paul F. Kelly, vp and general manager of WSPB Sarasota, appointed sales manager of WBRD Bradenton, Fla., succeeding Hal Meyer, who resigned to become commercial manager of WABR Winter Park (Orlando), Fla. Tom Doyle named WABR program director.

Ben McLaughlin, executive vp of Broadcast Time Sales, New York-based station representation firm, appointed sales manager of KSLA-TV Shreveport, La., succeeding Deane R. Fleet, who resigned last week to become station manager of KTBZ-TV, that city. Before joining BTS, Mr. McLaughlin had served as sales manager of KETV (TV) Omaha for one year and vice president and general manager of WICU-TV Erie, Pa., for 11 years.

William Cochran, western representative of ABC Radio station relations, appointed manager of station relations. Prior to his appointment as western representative, Mr. Cochran was station clearance sales service assistant on West Coast. He served in network film distribution department of ABC-TV before joining ABC Radio.

Arthur F. Thomas, general manager of KKCT Corpus Christi, Tex., appointed general manager of KUNO, all-Spanish radio outlet, that city. Mr. Thomas replaces Sterling Zimmerman, station’s general manager for past five years, who resigned to become commercial manager of KALI San Gabriel, Calif.

Elisa Gesualdo, formerly office manager of Fred Smith & Co., joins Vic Piano Assoc., New York, as office manager and director of sales services.

Sylvia Bauer, assistant account executive at Del Wood Assoc., New York, joins Vic Piano in station relations department.

G. L. Hartsfield, merchandise man-
ager for Albany, N. Y., store of Montgomery Ward, appointed sales manager of WTRY Troy, N. Y.

Irwin Steres, media director of D’Arcy Adv., San Diego, Calif., joins Peters, Griffin, Woodward, Los Angeles, as tv account executive. Mr. Steres served with D’Arcy for past five years in St. Louis and San Diego offices.

Charles M. Pickering, salesman in Chicago office of Television Advertising Representatives, joins TVAR’s New York sales staff.

E. G. Blackman, sales manager of WLAC Nashville, Tenn., elected vp in charge of sales. Rob Townsend, program director, named assistant vp and program director. Mr. Blackman joined WLAC in 1956 as account executive. He was appointed sales manager in 1960 in charge of both national advertising and local sales. Mr. Townsend, former program director of KBOX Dallas, joined WLAC last year.

John P. Holland, former national sales coordinator and sales promotion manager of WIND Chicago, joins sales staff of WFMT (FM), that city.

Tom Koon, formerly on sales staff of WIL St. Louis, takes similar post with KMOX-TV, that city.

Earl Levy, freelance publicist and former partner in Milwaukee advertising agency of Fromstein & Levy, named to sales staff of WMJ-TV Milwaukee.

Leonard H. Goldenson, president of American Broadcasting - Paramount Theatres, re-elected board chairman of United Cerebral Palsy Assns.

Raymond Hurlbert, general manager of Alabama Educational Television Commission, appointed chairman of NAEB State Educational Television Commissions Committee. New committee has been created as NAEB coordinating service to those states where legislative bodies have set up state commissions for developing educational television within their states.

Bert Allis, assistant chief engineer, promoted to chief engineer of WHEC-AM-TV Rochester, N. Y.

Norman E. Cobb, member of engineering staff of KNXT (TV) Los Angeles, appointed engineer-in-charge of station’s technical operations. He succeeds Robert Gross, who has moved to WCAU-TV Philadelphia as chief engineer. Both stations are owned by CBS.

James H. Schoonover, vp and general manager of WROC-AM-FM Rochester, N. Y., joins Transcontinental Television Corp. as manager of WGR-AM-FM Buffalo, N. Y., effective April 1. Mr. Schoonover, who joined WROC in November 1961, is former general manager of KTUL-TV Tulsa, Okla.

Howard Williams, formerly with WBUD Trenton, N. J., appointed chief engineer of WSBC-AM-FM Chicago. Jay Alvin, formerly with WGRY Gary, Ind., joins WSBC as news director and air personality.

CBA’s new officers

Robert D. Wood, vp and general manager of KNXT (TV) Los Angeles, elected president of California Broadcasters Assn., succeeding George Whitney, vp and general manager of KFMB-AM-FM-TV San Diego. Other new officers are: Leslie H. Peard Jr., KFRE-TV Fresno, vp for tv; Elsworth Peck, KWIP Merced, vp for radio; and Jules Dundees, KCBS-AM-FM-TV San Francisco, secretary-treasurer.

Gene King, program director of WCBS-AM-FM New York, appointed to advisory council of radio English-teaching branch of Voice of America.

George Brown appointed program director of WWOK Charlotte, N. C.

James Dunbar, assistant program director and on-air personality at WLS Chicago, named program director of KGO-AM-FM San Francisco. Both stations are owned by American Broadcasting-Paramount Theatres. Don B. Curran, KGO general manager, named San Francisco chairman of Broadcasters’ Committee for Radio Free Europe.

Vince Ford, air personality-promotion manager of WKMI Kalamazoo, Mich., promoted to program director.

Ernest W. Felix appointed sales development manager of WTVJ (TV) Miami, Fla. Mr. Felix, former vp of ABC, has served for past two years as general manager of Caribbean Bottling Co. in Nassau, Bahamas. Both Caribbean and WTVJ are divisions of Wometco Enterprises. From 1957-58 Mr. Felix was general manager of WMTV (TV) Madison, Wis.

Phil Stout, former staff announcer at WNPV Lansdale, Pa., appointed program director of WTOA (FM) Trenton, N. J.

John Murphy, former assistant to director of media research at D’Arcy Adv., Chicago, joins Metro Broadcast Radio Sales and Metro Broadcast TV Sales, Chicago, as sales development manager. Mr. Murphy will be responsible for development of research and marketing information.

Gary Gumpert, former radio-tv director at Queens College, New York, joins staff of WHA-TV (educational ch. 21) Madison, Wis., as senior producer.
Dominick V. Ortuso, KYW-TV Cleveland, joins WJW-TV, that city, as producer-director.

Don Hillman, news director of KLIP Fowler, Calif., joins KAIL-TV Fresno, Calif., in similar capacity.

John R. (Dick) Carlson, production supervisor at WOW-TV Omaha, appointed program director, succeeding Bill McBride, recently named station manager. In Broadcasting, March 4 issue which reported Mr. McBride's promotion, engravings of Mr. McBride and David Inouye, of Dancer-Fitzgerald-Sample, were inadvertently transposed by the printer. Mr. Carlson joined WOW-TV in 1955, became chief production assistant in 1956, a director later that year, and was promoted to production supervisor in 1958.

Jack Boyce, WZRO Jacksonville Beach, Fla.; Ron Johnson, WKTX Atlantic Beach, Fla., and John Thomas, WTOC-TV Savannah, Ga., join news staff of WJXT (TV) Jacksonville, Fla.

Larry Kane, news director of WFUN South Miami, Fla., joins WIL-AM-FM St. Louis as evening news editor.

Paul Giel, former All-American college football star and major league baseball pitcher, appointed to newly created position of sports director of WCCO-AM-FM Minneapolis-St. Paul, effective April 1. During past year after his baseball retirement, Mr. Giel was assistant business manager of Minneapolis Vikings.

Slater Barkentin, manager of continuity acceptance for WOR-AM-FM-TV New York, named director of community services. Frank Kizis, WOR-TV sales staff, succeeds Mr. Barkentin.

Charlotte Watson named assistant to director of community services.

Richard Sinclair, former promotion director of KHJ-TV Los Angeles, moves to similar position at KCOF (TV), that city.

Dan Hibbs, former news director of KSTT Davenport, Iowa, joins announcing staff of WGI. Galesburg, Ill., replacing Alan Kent, who resigned to join WOC-AM-FM Davenport.

Bill Burns, program director of KTRH-AM-FM Houston, joins announcing staff of WCPO-AM-FM Cincinnati.

Don Cummins joins announcing staff of KVVO Tulsa, Okla.

Roy Elwell, disc jockey formerly with KLAL Pasadena, joins KJH-AM-FM Los Angeles, in similar capacity.

Jon W. Goodman, program director of KIMA Yakima, Wash., joins KERG Eugene, Ore., as air personality.

Casey Shawhan, western pr director of NBC, and Bee Canterbury, fashion director of Bullock's Downtown, department store, appointed co-chairmen of 1963 Journalism Achievement Awards Dinner which will be held in mid-October. Awards are sponsored by U. of Southern California and its journalism alumni association.

Charles Stroud, former director of client services at WGN-AM-TV Chicago, named promotion director of WLS, that city. Earlier, Mr. Stroud had been with WLW Cincinnati and WLWA (TV) Atlanta.

Marvin Camp, member of ABC News staff in New York, resigns to accept post of director of news, special events and public affairs for WESH-TV Daytona Beach, Fla. Prior to joining ABC, Mr. Camp served as news consultant for Trinidad Publishing Co., director of press and public relations for WOR-AM-FM-TV New York, and spent five years at NBC where he supervised production for news programs on WOR-AM-FM-TV (now WNBC-AM-FM-TV) New York.

Bill Campbell, sports director of WCAU-AM-FM Philadelphia for past 16 years, resigns to accept position as broadcaster for Philadelphia Phillies baseball team.

Dick Martel, disc jockey formerly with KXOA-AM-FM Sacramento, Calif., joins KOGO-AM-FM San Diego, Calif., in similar capacity.

Bob Christopher joins KBIO-AM-FM-TV Boise, Idaho, as air personality.

Bill Wade, formerly with KDEO joins KOGO-AM-FM San Diego, both California, in similar capacity.
Award winners

Bradford R. Bean and Robert W. Beatty, both radio scientists at National Bureau of Standards, have received Silver Medals of U. S. Dept. of Commerce for outstanding contributions in fields of radio wave refraction (Mr. Bean) and microwave circuit standards (Mr. Beatty). Howard E. Bussey received a Commerce Dept. Meritorious Service Award for work in electromagnetic parameter measurements associated with interactions of electromagnetic waves and matter at microwave frequencies.

Ross J. Plaisted, transmitter supervisor of KYW-AM-FM-TV Cleveland, retired Feb. 28.

Dick Janik, assistant account executive, promoted to account executive for local sales at KTTV (TV) Los Angeles.

Robert Lawrence, author and conductor, named to replace late Jacques Fray as host of WQXR-AM-FM New York's Listening to Music show.

Josh Brady, midwest radio personality, joins WCFL Chicago as host of The Road Show, Monday-Friday, and The Josh Brady Show, Saturdays.

Kathy Tarras, weather girl and hostess of several local shows for WSBA-TV York, Pa., joins WRCV-TV Philadelphia to host Five O'Clock Show.

Mike Norton, sports director of WGAN-AM-TV Portland, Me., assumes added duties with sales staff of WGAN radio. Lloyd Knight appointed director of public affairs for WGAN-AM-TV.

Donald J. Badger, former general sales manager of WZZM-TV Grand Rapids, Mich., joins WTEV-TV New Bedford-Providence-Fall River as promotion manager.

David Shafer, staff announcer with WCLY-FM Cleveland, promoted to public service director and production manager, replacing James Holston, who resigned.

Dana Crowell and Del Doyle named traffic manager and continuity director, respectively, of KIXZ Amarillo, Tex.

Mike Davenport joins station's announcing staff.

Patricia Rogers, former public service director of Crowell-Collier Broadcasting Corp., joins Transwestern Hotels, Santa Rosa, Calif., as public relations and publicity supervisor.

Kenneth C. Badger, formerly of WCAV-TV Burlington, Vt., joins staffs of WMHT (TV) (educational ch. 17) Schenectady and WEEZ Rensselaer, both New York.

Bob Detrey, formerly with WRAW Reading, Pa., named promotion director of WLAN-AM-FM Lancaster, Pa., replacing Bob Harrington, who resigned to join WINQ Tampa, Fla.

PROGRAMMING

Martin N. Leeds, executive vp and member of board of directors of Talent Assoc.-Paramount Ltd., has resigned, according to Paramount Pictures, after he was asked to transfer to New York, where all activities of Talent Assoc. will be concentrated. Mr. Leeds has been in charge of company's west coast operations with headquarters at studios of Paramount Pictures Corp., Hollywood. He has not announced his future plans. Mr. Leeds is former president of Home Entertainment Co., west coast pay tv firm; executive vp of Desilu Productions, and director of business affairs for CBS-TV in Hollywood.

Kenneth Glancy, general manager of distributing branches of Columbia Records, New York, elected vp of Columbia Records Sales Corp., responsible for sales and merchandising programs through distributors and branches. Jack Loetz, CRSC sales director, appointed general manager of Columbia Record Distributors, responsible for management of Columbia's 13 company branches. William Farr, former staff assistant to Mr. Loetz, named director of merchandising for sales corporation. Tony Rubino, manager of sales statistics and budgeting, promoted to staff assistant.
BCBA officers for 1963

Roy Chapman, CHBC Kelowna, B. C., elected president of British Columbia Broadcasters Assn., succeeding Ken Hutcheson, CJAY Port Alberni, B. C. William Speers, CKWX Vancouver, B. C., was elected vice president. Ray Peters, CHAN-TV Vancouver, named director for tv, and Murdo Maclachlan, CHWK Chilliwack, B. C., director for radio.

Seymour Poe elected executive vp and member of board of directors of 20th Century-Fox Film Corp., becoming movie production and distributing company’s No. 2 executive next to Darryl F. Zanuck, president and chief executive officer. Mr. Poe joined Fox Film as vp in charge of world-wide distribution last August, shortly after Mr. Zanuck became president. Company hasn’t had executive vp since W. C. Michel retired from post last year. Donald A. Henderson, financial vp, also was elected a director, and Joseph M. Sugar was named vp in charge of domestic sales.

Gwen Smart, mid-west editor of Sponsor Magazine and before that with Earle Ludgin & Co., Chicago, appointed director of advertising and public relations for Fred A. Niles Communications Centers. She will be located in Chicago and coordinate advertising and public relations for Niles studios there and also those in Hollywood and New York.

John A. Limpert, United Press International regional executive for Illinois, appointed regional executive for Michigan, with headquarters in Detroit. He replaces James J. Clockenkeimer, who died last month of injuries received in automobile accident. Peter F. Dunne, former weekly newspaper publisher from Cheyenne, Wyo., succeeds Mr. Limpert, with headquarters in Springfield.

Harry Robert, former sports editor of Hearst-Metrotone News, joins Allegro Film Productions, New York, as executive producer and writer-director.

Jack Hastings, most recently with West Coast operation of Robert Klaeger Assoc., New York, joins Don Feddersen Commercial Productions, Hollywood, as producer. Fred MacMurry has been signed for his fourth season in father role in My Three Sons, produced by Don Feddersen Productions for broadcast on ABC-TV network. William Frawley will also continue as “Bub,” and Tim Considine, Don Grady and Stanley Livingston as three sons.

Harry Ackerman, Screen Gems vp and executive producer, named chairman of tv film division of Motion Picture Relief Fund’s 1963 campaign. Mr. Ackerman will organize and direct fund’s volunteer campaign force in tv field for drive which kicks off May 20.

E. S. (Bud) Prager, former general manager of SESAC, signs production agreement with Warner Bros. Records, Burbank, Calif., to produce and record series of religious and gospel albums.

James Lavenstein, administrative manager of CBS-TV program department, named to site committee for archives of Academy of Television Arts & Sciences.

INTERNATIONAL

Thomas E. Darling, general manager of CHML Hamilton, Ont., elected vp and general manager of station.

Blaine Littell, African bureau chief for CBS News, appointed head of Paris bureau. Succeeding Mr. Littell in Africa is Frank Kearsn, who has been assigned to Paris bureau for past year. Mr. Littell succeeds Bob Kleiman, who resigned last month to join editorial board of New York Times.

Gaston Belanger, Toronto office manager of Paul L’Anglais Inc., French-language radio-tv station representative, elected treasurer of Station Representatives Assn. of Canada, Toronto. He succeeds Alex Bedard, who has closed his representation business to become manager of radio division of Paul L’Anglais.

R. W. Hartwood named director of broadcast services, and Raymond Taillefer becomes broadcast department manager, with general supervision of all department’s operations, for Cockfield, Brown & Co. Ltd., Montreal.

Norman B. Buchanan resigns from board of directors of Canadian Broadcasting Corp. to be Progressive Conservative candidate for Charlotte, N. B., in April 8 Canadian federal election.

Harold C. Singleton, West Coast consulting radio engineer who recently designed 50 kw transmitting facilities for KWJL Portland, Ore., joins staff of Radio Liberty at its new shortwave station in Spain as transmitting equipment engineer.

Ralph Sneigrove, owner of CKBB and CKVR-TV Barrie, Ont., is Liberal party candidate for Simcoe-North constituency in April 8 Canadian federal election.

EQUIPMENT & ENGINEERING

Nicholas Frantzis, former senior research project manager at Minneapolis-Honeywell, elected executive vp and director of engineering for Semtran Instruments Inc., Maple Shade, N. J., electronics manufacturing firm.

John W. Gilpin, secretary of Eitel-McCullough. San Carlos, Calif., electronics manufacturer, elected vp-administration. Mr. Gilpin joined Eitel-McCullough in August 1958 after seven years with management firm of Booz, Allen & Hamilton in San Francisco.

Dr. Paul Glechauf consulting engineer with General Electric Co.’s electronics lab in Syracuse, N. Y., appointed manager of monochrome cathode ray tube research and development department at Rauland Corp., Chicago, subsidiary of Zenith Corp. Earlier, Dr. Glechauf was research engineer with Westinghouse. He received his Ph.D. degree in physics from Masaryk U. in Czechoslovakia.

Karl E. Clough appointed director of engineering for Radcom-Westrex.

Shapp receives award

Milton J. Shapp, board chairman of The Jerrold Corp., parent company of Jerrold Electronics Corp., Philadelphia, received 1963 Philadelphia Fellowship Commission Award last week in ceremonies there. Mr. Shapp was honored for Jerrold’s interracial employment policies, for his work in helping to establish and for promoting country’s Peace Corps, and for his sponsorship of Philadelphia neighborhood renewal program. He is consultant to Sargent Shriver, director of Peace Corps, and was recently named by Philadelphia Mayor James H. J. Tate to head local Manpower Utilization Commission. Fellowship has been given annually since 1947.
Wanted

A disc jockey who has worked at Michigan stations and has claimed to have had experience in Los Angeles radio has been listed as wanted by the FBI.
The fugitive's last known employment was at WIBM Jackson, Mich., where he worked under the name William London. WIBM discharged him in March 1962. Before joining WIBM he was with WALM Albion, Mich., from December 1960 to April 1961.

Authorities in Jackson, Mich., have charged London with obtaining loans by fraud. A federal warrant, issued in U. S. District Court in Detroit last May 24, charges him with fleeing the state of Michigan to avoid prosecution for a felony.

London, according to the FBI, has used various names, including William Holiday, William Holloway and William Howard. He is described as about 30 years old, with dark hair and eyes and swarthy complexion, height 5 feet 8 inches, weight 180 pounds.

Div. (develops and manufactures radio communication equipment and facsimile transmitters and recorders) of Litton Industries, New York. Mr. Clough formerly was manager of facsimile sales for company. Nelson M. Ripley joins Radcom-Westrex as director of manufacturing.

Richard P. Gifford, manager of engineering for General Electric's communication products department, Lynchburg, Va., promoted to general manager, replacing Harrison Van Aken, who recently was named head of GE's computer business in Phoenix, Ariz. Mr. Gifford will have full responsibility for all product lines of department which include mobile two-way radio, microwave and telecommunications, power line carrier and military communications. Joining GE after World War II, he was member of team of engineers which established first microwave relay from New York City to Schenectady for tv transmission purposes. Mr. Gifford also served as member of Ad Hoc Committee on FCC Docket 11997, covering spectrum utilization from 25 mc to 890 mc, and in 1959 was named chairman of TR panel of EIA's engineering section, covering engineering standards in broadcast, microwave, land mobile radio.

William C. Crowe appointed manager of General Electric rectifier components department in Auburn, N. Y.

James W. Ritter, northeastern district sales manager for electronic tube division of Sylvania Electric Products, New York, appointed assistant marketing manager-renewal, for division.

Richard H. Edwards appointed operations manager and marketing director of Continental Electronics Products Co., new communications systems organization of Ling-Temco-Vought, Dallas, Tex. Formerly sales representative for company's mid-continent region, Mr. Edwards joined LTV last June.

Paul C. Bronesky, manager of mobile and microwave service sales of RCA, New York, appointed manager of mid-Atlantic region sales for RCA's two-way mobile radio systems, with headquarters in Cherry Hill, N. J.

ALLIED FIELDS

William W. Eaton, former executive vp and a founder of C-E-I-R Inc., international problem-solving and consulting services organization and parent company of American Research Bureau, resigns from C-E-I-R board of directors to accept appointment as deputy assistant secretary of newly created Science & Technology Section of Commerce Department. Mr. Eaton is succeeded by Robert Holland, company's vp for finance and administration.

Irv Rosenthal, vp, Audits & Surveys Co., New York, named corporate technical director. Mr. Rosenthal will be responsible for problems of research design and procedures.

DEATHS

Willard A. Plethchner, 61, former vp of BBDO, New York, died March 13 in Gainesville, Fla. Mr. Plethchner retired from BBDO in 1960 after 32 years with agency. After leaving agency, Mr. Plethchner served with Management & Marketing Institute and Magazine Publishers Assn.

Maurice Kalen, 47, director of financial operations and analysis for RCA, New York, died March 9 during vacation trip in Nassau, B. W. I. Mr. Kalen joined RCA as senior accountant in Camden, N. J., plant in 1941.

Plan now to attend

IEEE's special TV Symposium

Wednesday, March 27, 2:30:5:30 p.m.
Morse Hall, at the Coliseum, New York

Hear these 5 technical papers:
The South Carolina ETV Story

March

12.

Hearing Examiner Charles J. Frederick
issued initial decision looking toward granting application of Thomas County Bcstg.

WKTG Thomaskw to 5 kw;
and pre-sunrise operation with
daytime facilities precluded pending final
Inc. to increase power of
ville, Ga., on 730 kc, D, from 1

conditions

decision in Doc. 14419. Action

March

12.

DESIGNATED FOR HEARING
Big Bear Bcstg. Co., Big Bear Lake, Calif.
for hearing application for

—Designated

new daytime am on 1050 kc, 250 w, DA;
made KNX Los Angeles and Federal Aviation Agency parties to proceeding. On own
motion, waived Sec. 1.351 of rules regarding
applications for frequencies adjacent to
KFIV Modesto, Calif. Designated for
hearing application to increase daytime
power on 1360 kc from 1 kw to 5 kw, continued nighttime operation with 1 kw, and

—

change from

DA-N

to

DA-2; made

KSRO

Santa Rosa and KEEN San Jose parties to
Van Wert Bcstg. Co., Plymouth, Ind., WDZ,
Mid-States Bcstg. Co., Decatur, 111.— Designated for consolidated hearing applica137


tions of Van Werf for new daytime am on 1050 kc, 230 w, DA, and WDZ to increase power to 1500 kw. (2) Granted partial petition by WMZU, a 1500 kw DA station in Des Moines, Iowa, for renewal of its license for 1963-65, subject to certain conditions.

Fence Best Corp., Cavey, P. R.; WMIA, Abaco Radio Corp., Arecibo, P. R.—Designated for consolidated hearing an application for new stations in United States and Puerto Rico.

Foran and, and (2) dismissed petition insofar as it might leave to avoid other adverse showing. (Jan. 11 supplemental initial decision in Docs. 13086-13088 looked toward denying Bessler application and granting similar application of Suburban Best Inc. for new station in Jackson, Ws.) Action March 6.

ACTIONs

By memorandum opinion & order, commission (1) dismissed petition by Bessler for proceeding against location of new station for new station at 5000 kw, 10 kw, 1 kw-CH, D, in United States, subject to certain conditions. *Includes 3 stations operating on unreserved channels.

filing of opposition to appeal, Action March 5.

**ACTIONS ON MOTIONS**

- Commission granted request by Frontier Best, Inc., and extended from March 1 to March 15 time to file reply comments in matter of amendment of Subpart L, Part 11, of rules and regulations to govern grant of authorizations in Business Radio Service for microwave stations to relay tv signals to catv systems. Action March 6.

- Commission granted request by Midwestern Video Instruction Inc., and extended from March 5 to March 15 time to file reply comments in matter of proceeding on an application of Ponce Bestg, Corp., Cayey, and Abacoa Radio Corp. (WMITA), Arecibo, both Puerto Rico. Action March 8.

- Granted petition by Dr. Charles H. Haggard and Kenneth R. Rogers to extend time for filing answer to prehearing application for new an in Crystal City, Tex., but with prejudice, and terminated proceeding. Action March 6.

- Granted petition by Genkar Inc., Gouverneur, N. Y., and granted further hearing for 9 a.m., April 11, in proceedings on its application, et al., in consolidated am proceeding in Docs. 14517 et al. Action March 8.

- By Hearing Examiner James D. Cunningham

- On own motion, continued March 11 further hearing to March 18 in proceeding on NBC-BSD Broadcasters transfers and related applications in Docs. 13083 et al. Action March 8.

- By Hearing Examiner Thomas H. Donahue

- By memorandum opinion & order in proceeding on an applications of Smackover Radio Inc., Smackover, and Magnolia Bestg, Co. (KVMA), Magnolia, both Arkansas, in Docs. 14103-4, vacated and held in abeyance rulings of examiner made on record of proceeding on March 7 concerning appearance on stand of Walter E. Hurschman until such time as transcript of proceeding is in hands of counsel for Broadcast Bureau, at which time they shall become final. Action March 11.

- By Hearing Examiner Asher H. Ende

- By memorandum opinion & order in proceeding on applications of Laramie Community TV Co. and Albany Electronics Inc. for new tv translator stations in Laramie and Tie Siding, both Wyoming, in Docs. 14526-6, denied Laramie's petition for leave to amend to change site for its translators and to reopen record; without prejudice to filing of further petition for leave to amend consistent with views expressed in memorandum opinion & order should it ultimately be decided applications of Laramie Community rather than Albany Electronics should be granted. Action March 14.

- By Hearing Examiner Arthur A. Gladstone

- Granted petition by Broadcast Bureau and extended from March 20 to May 15 time to file its proposed findings or comments on proposed further findings on application for new stations in Carolina and Bayamoun, both Puerto Rico. Action March 8.

- By Hearing Examiner Charles J. Frederick

- Granted motion by Osage Programmers and interpreted application for new station on its application and Cherokee Bestg, Co. for new an stations in St. Johnsbury, Vermont, and both Oklahoma, respectively. Action March 7.

- By Hearing Examiner Millard F. French

- Received in evidence exhibit 3 filed by applicant, closed record, and ordered proceedings, if any, shall be filed by March 18 in proceeding on application of Boston TV Broadcasting, Inc., in Cambridge, Mass. Action March 11.

- Granted Feb. 9 petition by Saul M. Marks for new an in Kutztown, Pa., which is in consolidated am proceeding in Docs. 14425 et al., effective as of Feb. 16, and accepted am pere tane amendment tendered with petition. Action March 7.

- By Hearing Examiner Isadore A. Honig

- Upon request by Broadcast Bureau and in conces of caution, advanced from 2 p.m. to 9 a.m. March 19 formal hearing conference following remand in proceeding on application ofnew an station enterprises for new an in Houston, Tex. Action March 12.

- On own motion, scheduled formal hearing conference for March 19, at 2 p.m., to sit at an at procedural for further hearing after remand on addition issue specified by Review Board in proceeding on applications of Hibon-Francisco Radio Enterprises for new an in Houston, Tex. Action March 7.

- By Hearing Examiner Annie Neal Huntington

- Reconsidered order released March 1 in proceeding on application of Sport Magazine, Inc., for new an in Miami, Fla., to extent of again reopen record, limited to issue of whether station should be granted in affidavit of Lawrence P. Frickart to facts stated in first two sentences of his affidavit, and again closed record. Action March 12.

- By Hearing Examiner H. Gifford Irion

- On own motion, continued March 11 prehearing conference to March 15 in proceeding on application of Blythe, Calif., for new an d/b as Broward County Bestg, Inc., for renewal of license of WIXX Oakland Park, Fla. Action March 7.

- By Hearing Examiner David I. Kraushaar

- By order after March 12 prehearing conference in proceeding on application of Magic City Bestg, for additional time to reply comments, WJBZ, Madison, Wis., in Doc. 14804, approved procedural ground 11 in March 15 time for ordered hearing to commence as previously scheduled on April 18, Action March 12.

- By Hearing Examiner Griffin Bestg, Corp., and rescheduled April 8 hearing for March 20 in proceeding on its application for new an in Lynchburg, Va. Action March 7.

- By Hearing Examiner Jay A. Kyle

- On own motion, changed from March 17 to March 24 time for objections to notification of parties as to witnesses desired for cross-examination in applications for new an in Blythe, Calif. Action March 11.

- Upon request by Redding-Chico Tv Inc. scheduled further prehearing conference for March 12 in Redding, Calif., tv ch 9 proceeding in Docs. 14937-9, Action March 11.

- Granted motion by Redding-Chico Tv Inc. and extended from March 8 to March 15 time for filing petition for leave to amend by Northern California Educational tv Assn., tv ch 8, in Redding, Calif., tv ch 8 proceeding. Action March 11.

Any kind of one-night stand is easier.

Because Air Express delivers overnight...anywhere in the USA

Props and costumes...TV tapes...musical instruments...whatever—Air Express will deliver them tomorrow...anywhere in the USA.

Here's how easy it is to assure dependable, on-time delivery of whatever must be sent in a hurry. Phone the local REA Express office for Air Express service. Then we'll pick up your shipment...put it on the first flight out...and our trucks deliver it where you want it the next day...anywhere in the USA.

Cost? Less than you think. For example, 10 lbs. travels 1,049 miles for only $5.06.

Air Express alone can offer this service, because only Air Express has scheduled service between 2,500 airport cities...plus scheduled surface express connections with another 21,000 off-airline cities. And Air Express shipments have official priority with all 38 scheduled airlines—first cargo aboard after air mail.

Specify Air Express always—for rush inbound or outbound shipments. Call your REA Express office for Air Express service.
OUR RESPECTS to Nelson Ira Carter

A good radio commercial—startling and bold

"A good radio commercial ought to be a little startling, a little bold and completely pleasant and interesting," So says Nelson Carter, vice president of Fletcher Richards, Calkins & Holden and manager of the agency's Los Angeles office.

"To think of the world that's not a bad formula for a tv commercial, or indeed for any advertisement," he observes. "But the thought occurred that it's a pretty good description of a successful advertising man as well.

In Mr. Carter's case the emphasis would seem to be on the "pleasant and interesting," but associates note that behind his friendly manner and smile is a keen and active mind, a combination that has been known to produce startling results.

These characteristics, perhaps inborn, were undoubtedly strengthened during the years when young Nelson was preparing for a career in the diplomatic service. He majored in political science at Stanford U., where he received his B. A. in 1930 and his M. A. in 1931, and toped off his formal education with a year at the Sorbonne. ("Paris was wonderful, but I don't remember getting to class very often.") But when he returned home in 1932 the nation was in the grip of the depression. The independent income considered necessary for a career diplomat had vanished, so Nelson joined millions of job hunters.

A Native Son • Born in Long Beach, Calif., July 5, 1908, Nelson Ira Carter was writing ads for a local clothier before he was out of grade school. In college he edited the humor magazine, The Chaparral, and wrote sketches and a light opera which were staged as student productions. So he hoped for a job as a writer, either in advertising or the movies. But advertising agencies were laying off veteran employes, not hiring newcomers, and a publicity job at Columbia Pictures didn't last long.

For a while he wrote a radio serial for a Los Angeles station (today he can't recall what station or the name of the serial, only that "it was about two wise-cracking secretaries"). But that didn't last long either. When a friend called from New York to offer him a writing job on the March of Time, he was off on a fishing trip and never got the call. Instead, he spent a year as a department store stockroom boy before getting a copywriter's berth at Beaumont & Hohman in San Francisco.

A few months later, the manager of the B & H Omaha office left and Nelson was sent there to replace him. "This was great training. It was a small office and I had to do everything myself, from looking for new business to writing copy and acting as an ad director. In my three years in Omaha I really learned the advertising business." He also met Catherine Fredendall, who in due time became Mrs. Carter. Then he was transferred to the agency's home office in Chicago ("we liked the people, but hated the climate") and after two years they were happy to be sent back to the Los Angeles office.

**If You Can't Lick 'Em...** • His chief assignment was to try to keep the Lockheed account at B & H, "but when I went in for my first visit I met a delegation of about a dozen men from Foote, Cone & Belding coming out." Lockheed moved to FC&B and, shortly thereafter, so did young Carter. He soon was assigned to the Sunkist account and, except for a two-year stint for Union Oil, he handled Sunkist for the next 20 years. Meanwhile, he moved up the ladder at FC&B. From account executive he became account supervisor, vice president, chairman of the plans board and manager of the Los Angeles office.

Then, in 1959, the agency wanted Mr. Carter to move to New York. After a lot of thought, he said no. "It wasn't easy to leave after 20 years, but Catherine and the children love California as much as I do and our life here seemed more important than the job in New York," he recalls.

James Lane, a former client when he was president of Breast O'Tuna, was then president of Barnes Chase Co. and he persuaded Nels to become head of the Los Angeles office of the San Diego-based agency. "We had a lot of plans that never got off the ground," Nels says, so along with several other BC employees he moved to FRCAH, where he is vice president and Los Angeles office manager.

"This agency believes in radio and it's the major medium for several of our accounts. About 80% of the Folger's coffee advertising budget goes into radio and for White King soaps the figure is nearer 85%. Like some other western agencies, we appreciated what radio can do at a time when most eastern agencies were underwriting it. For some years the best radio advertising in the nation has been done in the West. Now that everybody's 'discovers' radio, the competition is tougher, but the rewards are worth working harder for.

**What Lies Ahead •** Like many thoughtful advertising executives, Nelson Carter looks for a radical change in the method of agency compensation in the near future. "Agencies are now supplying clients with services never contemplated in advertising's earlier days and seldom covered by commissions from media. The advertisers are coming to expect these services regardless of the size of their advertising budgets, which sometimes leaves the agency with a substantial loss on the account.

"But probably the worst thing about the commission system is that it makes the advertiser suppose that its agency's recommendations for more advertising are based more on a selfish desire to earn bigger commissions than because more advertising is the best solution to the advertiser's problem.

Nels and Catherine Carter live in Altadena, a socially correct suburb of Los Angeles. Daughter Crystal, now Mrs. Thomas O'Connell, is a Stanford alumna and son Steven, 20, is a junior there. Tom, 13, is in grammar school. Nels plays golf for exercise ("it used to be tennis") and gin for recreation ("it used to be poker"), goes trout fishing whenever he gets the chance and is a voracious reader, with early western Americana his specialty.

Active in his profession, Nels Carter is past president of both the Los Angeles Ad Club (1955-56) and the Advertising Assn. of the West (1957-58). Probably the recognition that has pleased him most came when Long Beach State College established the Nelson Carter Chapter of Alpha Delta Sigma, national advertising fraternity.
News frontier

NEWS is in the news these days. The Celler Antitrust Subcommittee last week began its month-long hearings on the economic plight of newspapers. This week, the Moss Subcommittee on Government Information gets its teeth into "news management" by the New Frontier. And last week an extraordinary conference on the handling of government information, which had been nailed down for April 5-6, suddenly was called off.

It came as no surprise that the opening salvo at the Celler hearing dealt with newspaper ownership of radio and tv stations. We predict that as the hearing develops, a big share of the interrogation will be directed toward purported monopoly situations stemming from newspaper ownership. Chairman Celler (D-N.Y.) laid this groundwork in his opening statement by citing three newspaper chains that control 45 dailies, 25 magazines, 10 radio-am's, 7 fm's, 12 tv stations, two press services and "several" photograph services and news feature syndicates.

But if the committee expects to develop that the newspaper owners dictate the news and editorial policies of the preponderance of these stations, or use combination advertising rates, it will be disappointed. There may be a few such instances but most newspapers maintain entirely separate news and sales staffs and meticulously avoid overlap.

It is no doubt true that the broadcast tail is wagging the newspaper dog in many instances. Should these newspapers be penalized because they had the foresight to get into radio and television early?

While newspaper economics held attention last week on Capitol Hill, the action downtown, wherein the White House called off the scheduled conference on handling of government information, evoked surprise. The White House said the reason was conflict with the Moss subcommittee hearings in which most of the same people would participate.

This is a lame excuse. There isn't the remotest chance that the March 19-21 Moss committee hearings would overlap the April 5-6 White House conference.

Apparently there has been newspaper resentment about the manner in which the White House conference was set up through the auspices of the NAB. There also has been backwash about "too much radio-tv representation."

This certainly is no time to argue about protocol or representation. The press is generally under attack. Whether publishers like it or not, radio and television are part of the "press." They are in the news business and are entitled to the same protection under the First Amendment, whatever the moutnings of power-bent bureaucrats.

Whether it's competition for news or competition for advertising, or union negotiations, publishers and broadcasters are in the same boat. All concerned had better quit quibbling and recognize this reality.

It's circulation

THE immediate effects of the House investigation of ratings services will bring little comfort to broadcasters. All the rating imperfections that come to light are bound to be dramatized and distributed by rival media. Nothing better has come into the hands of magazine and newspaper ad salesmen for years.

Yet the long-range effects of the hearings could be salutary. They could lead to basic revisions in the concepts and techniques of measuring radio and television audiences. Revisions are overdue. In many ways radio and television now measure themselves to their own disadvantage and to the advantage of print media.

The majority of newspapers and magazines sell total circulation. The "rating" service that they use is the Audit Bureau of Circulations which does nothing more than its name implies: It audits the records of the publishers to verify the number of copies that the publishers claim to deliver to subscribers or newstand buyers. If ABC confirms that Newspaper X sells an average of, say, 1 million copies, 1 million then becomes the circulation guarantee of that paper, and the advertiser who buys a page in it tends to think a million copies of his ad will be seen and read.

The fact is, of course, that few if any ads in any issue of a general publication make any impression on a majority of readers. Research of the kind conducted by Daniel Starch & Staff consistently shows that only small minorities of readers so much as "note" a given ad. Magazines and newspapers have wisely refrained from basing their rates or their selling on Starch ratings. They continue to talk total circulation, and total circulation is what all but the most sophisticated buyers think they get.

The contrast between the use of circulation measurements in publishing and broadcasting is striking. While magazines and newspapers talk total circulation and do everything they can to avoid talking Starch, broadcasters talk about ratings. The television station that has a coverage area encompassing 1 million television homes will quote a rating of 20 as an argument to persuade an advertiser to buy a given period of time. If the advertiser buys it, he thinks he has bought 200,000 circulation. The same advertiser will think he is getting all 1 million of Newspaper X's total circulation, even though his ad may be noticed by no more than 10% of the readers of Newspaper X.

The net effect of broadcasting sell by ratings is to minimize the size of radio's and television's circulation while print media are maximizing theirs. As a result, the broadcaster spends more energy selling against competing stations than he spends selling against other media. The ratings race pits broadcaster against broadcaster. Newspapers and magazines can stand on the sidelines and cheer.

What is needed in broadcasting is a thorough reappraisal of audience measurements and their use. The subject is intricate and therefore uninviting. Yet it deserves to be seriously studied by all broadcasters who are interested in looking beyond next month's P&L report. It is too big a subject to be successfully attacked by one element in broadcasting or one trade association of broadcasters. A study project under the joint sponsorship of NAB, RAB and TvB makes sense to us.

STEINMAN STATION • Clair McCollough, Pres.

Representative: The MEEKER Company, Inc. • New York • Chicago • Los Angeles • San Francisco

BROADCASTING, March 25, 1963
The thing to do

Newton N. Minow is still publicly refusing to confirm (or deny) Broadcasting’s Feb. 11 report that he will resign soon as FCC chairman, but he’s done some research that chairman who intended to stay on would not be apt to do. In private conversation last week he said he had looked up tenures of former FCC chairmen and found they had served average of about two years. Mr. Minow passed his second anniversary in office March 2.

Schroeder-Quarton-Strouse

It’s odds-on bet that William Schroeder, vice president-general manager of WOOD-AM-FM-TV Grand Rapids, will be elected chairman of NAB joint board to succeed Clair R. McCollough, president of Steinman stations. And pre-NAB convention grapevine has Ben Strouse, president, WWDC-AM-FM Washington, slated to succeed Mr. Schroeder as chairman of radio board. William B. Quarton, president, WMT-AM-TV Cedar Rapids, Iowa, incumbent chairman of television board, is expected to be re-elected.

Mr. McCollough has stiff-armed draft to retain joint board chairman-ship since he’s taken on added responsibilities of supervision of recent Steinman acquisitions (KOAT-TV Albuquerque and KVOA-AM-TV Tucson). He’ll serve until June board meeting, but election of radio and tv board heads will come during next week’s NAB convention in Chicago.

Treyz to Schick

Ollie Treyz, ex-ABC-TV president who resigned last week as vice president of Warner Bros., will join Schick Inc. as executive in charge of sales promotion and merchandising. Company plans immediate expansion of its electric and safety razor business to differ from full line of men’s toiletries and related masculine product items. Mr. Treyz is expected to visit Schick manufacturing headquarters in Lancaster, Pa., this week, returning from Florida vacation.

Schulke to Fm Assn.

National Assn. of FM Broadcasters has found its man. James A. Schulke, director of advertising and sales promotion of Magnavox Co., is slated to become chief executive officer of NAFMB, with headquarters in New York following NAB convention in Chicago next week. NAFMB meets March 30 in Chicago and is expected to ratify appointment cleared last week by 12-man board of directors. Mr. Schulke, former vice president of Paramount Television Productions and in charge of KTLA (TV) Los Angeles, has had extensive agency background (Y&R) and has been in talent field with James Saphier. His assignment: To do for fm what RAB and TVB are doing for am radio and tv.

As advertising-sales promotion head of Magnavox, Mr. Schulke was actively engaged in development of plan for fm promotion underwritten by that company to extent of $150,000 appropriated for block time purchases on NAFMB member stations. Plan was developed by Frank Freimann, Magnavox president and strong proponent of commercial fm as quality aural service.

Fee bite revived

Proposal that FCC charge fees for all applications is being revived and showdown vote is expected soon. Fee idea was bombarded when released for comments last spring (Broadcasting, May 21, 1962). But some commissioners, notably Chairman Minow, still favor it. So does Bureau of Budget, which would like all regulatory agencies to pay their way. Proposed fee schedule has been revised, but fees that would be charged broadcasters are same as those included in original plan released last year.

Specials on spec

David Susskind, head of Talent Assoc.-Paramount Ltd., has bought script for 90-minute dramatic special written by actor-writer Peter Ustinov and has signed Mr. Ustinov and Anthony Quinn to star in it. Story is called “The Velvet Knife” and is set in Italy in period immediately following Mussolini’s death. No sponsor or network has been set. Mr. Susskind also has deal with Lawrence Olivier to star in second 90-minute special. Mr. Olivier’s first appearance on U.S. tv was in another Susskind special, “The Power and the Glory,” last season.

Renewal relief?

Relief may be in sight for harried radio broadcasters on license renewal forms. Oral motion, made at last Wednesday’s FCC meeting by Commissioner Fred W. Ford, that an en banc hearing be held to procure updated information on how am radio operates these days (as distinguished from pre-television era when present forms were adopted) was unanimously approved. Staff was instructed to prepare document on role of modern radio in relation to tv and fm broadcasting. FCC previously had decided to separate am and tv renewal forms.

By procuring from broadcasters informed judgment on modern radio operations, FCC would be in position to revise Part IV of renewal form relating to program service, recognizing differences and possibly eliminating category breakdown so that supplemental statement would suffice.

Little left to sell

ABC-TV is close to SRO on its Arrest and Trial programs for next season. Ford division of Ford Motor Co., through J. Walter Thompson Co., has affirmed order for all of 45-minute Arrest and two other advertisers—one is Liggett & Myers Tobacco, also through JWT, and other unidentified—are signing for Trial, other 45-minute show in back-to-back scheduling on Sunday evenings. Sales will leave two minutes open in Trial. Shows are part of new concept wherein they can be seen as “package” but one is not dependent on viewing of other.

Shirt sleeves

Warm-up for FCC’s shirt-sleeve panel at NAB convention in Chicago next Wednesday (April 3) is scheduled for today (March 25) at Mayflower Hotel in Washington. In addition to seven members of FCC, NAB Joint Board Chairman Clair R. McCollough, who will be moderator, and NAB President LeRoy Collins, will be on hand. Last year charges of “rigged” panel developed because NAB permitted FCC to screen questions submitted in advance and to throw out those considered too “controversial.” Moreover, questions were assigned in advance to individual commissioners, and audience was not told that session had been “rehearsed.”

About face

It will be another two or possibly three weeks before FCC opinion denying seven vhf drop-ins is released. That’s because Broadcast Bureau had written decision other way, i.e., to authorize drop-ins. Upshot is staff had to jettison half-inch-thick document and start over to write opinion justifying 4-3 opinion against drop-ins.

Although ABC has already petitioned FCC to reconsider denial, formal request for reconsideration can’t be filed until official decision is published. Two-station vhf markets in which third v at less than standard separations would have been dropped in are Johnstown, Pa. (ch. 8); Baton Rouge, La. (ch. 11); Dayton (ch. 11); Jacksonville, Fla. (ch. 10); Birmingham, Ala. (ch. 3); Knoxville, Tenn. (ch. 8) and Charlotte, N. C. (ch. 6).
What to Do with Six Straws in a Dry State

WMAL's redoubtable VP and general manager, Fred Houwink, is also a keen puzzle buff. He and a band of WMAL cohorts, heading to Chicago for the NAB convention, took to the rails after being grounded by weather. The group had just settled down to the long haul in the club car of the Capitol Limited when the train entered a dry state.

Finding himself with six straws and no glass in one hand and time* on the other, Fred suggested a problem to while away the thirsty stretch.

He cut two of the six straws in half. Then he asked his cohorts** to use the eight pieces (four long and four short) to construct three squares of equal size.

If you're not a straw man, check with us for a solution. If you are, send us your answer (use one color to designate short straws, another for long)—for a suitable reward.

*Harrington, Righter & Parsons, Inc. dispense another kind of Fred's time—the number-one-in-its-time-slot type (according to latest NSI for Washington) on Monday, Tuesday and Wednesday at 11:30 PM with Thriller, as SurfSide 6 and Checkmate. Check HR&P for availabilities.

**Since you asked, they were, reading from left to right:
Neal Edwards, Harold Green, Ted McDowell, Dick Stakes, Al Powley, Stan Hamilton and Herb Victor

changes: Send to Broadcasting Cir-
culation Dept., 1738 DeSales St., N.W.,
Washington 6, D. C. On changes,
please include both old and new
addresses plus address label from
front cover of magazine.
WHAT IS THE MEASURE OF A BROADCASTING STATION?

The pleasant folks* pictured here are part of a local Connecticut television show ... a show which, consistently, has bested nighttime network competition. Titled "What in the World," the program is basically a quiz . . . which insults neither intelligence nor credibility . . . on the geography, history and architecture of the world's interesting places . . . and the habits, customs and accomplishments of people. The prizes are modest . . . and they don't go to people but to institutions which have need.

Funny thing about the show! It has only one commercial, three minutes long, smack dab in the middle of the program, . . . and, usually, it is so interesting, it draws fan mail!

We'd like to take full credit for "What in the World" but must hasten to assert that it is the brainchild and production of Baker Advertising of Hartford. We do take credit, however, for recognizing its merit and charm a long time ago. In fact, "What in the World" has been on WTIC-TV as long as the station has been telecasting.

Sorry — but "What in the World" is not for sale. It is sponsored by the Electric Companies of Connecticut, as it has been since its very first broadcast.

*Left to right: John F. Schereshefsky, Director of the Rumsey Hall School; Aline Saarinen, art critic; Charles C. Cunningham, Director of the Wadsworth Atheneum; James N. Egan, attorney; Ben Hawthorne, announcer, and Quizmaster John Dando, Associate Professor of English at Trinity College.

NIelsen CO. ASKS FCC/NAB RATINGS AID

Company witnesses coming back to House probe tomorrow

A. C. Nielsen Co. witnesses suggested to House subcommittee investigating broadcast measurement business Friday (March 22) that FCC and NAB become involved in straightening out some of problems in ratings.

With three weeks of ratings investigation behind them, members of Special Subcommittee on Investigations concentrated fully on Nielsen, giant of ratings industry, whose witnesses will return to stand tomorrow (Tuesday) afternoon as congressmen try to wind up hearings this week.

In Nielsen’s nine-point suggestions on ratings problems, firm recommends asking “FCC and/or NAB to take strong stand” to discourage outside interference in sampling, and to develop standards for deciding when “hypooing” occurs during rating surveys. Other suggestions: government credentials for ratings firms, technical committee on radio research, complaint bureau on ratings abuses, uniform definition for metro areas.

Returning to question whether Niels
ten firm recommended that MBS and ABC Radio add more 50 kw stations (see page 35), counsel Robert E. L. Richardson revealed Nielsen presentations to networks which showed about 50% of NBC and CBS Radio audiences accounted for by “powerhouse” stations.

After showing standard error in Nielsen Cumulative Audience reports ranges between 50,000 and 100,000, subcommittee pointed out Nielsen vice presidents advised MBS on interpretations of WOR, WINS, both New York, audience shares of between .5 and .8. Such precise figuring was “perfectly ridiculous,” said Dr. Herbert Arkin, subcommittee statistical consultant.

In other evidence showed Nielsen, which in 1952 presented strongly worded tack on mail ballot system used by competitor Broadcast Measurement Bureau, adopted method as its own in next NCA report after BMB died.

Nielsen witnesses said 100 of 1,150 tv homes used in national sample will be changed by fall of 1963, based on 1960 census. Firm admitted that homes now are based on modified sample constructed in 1947 with 1940 census data.

Cox to take FCC oath Tuesday from Douglas

Kenneth A. Cox is scheduled to be sworn in as FCC commissioner tommorow (March 26) by Associate Justice William O. Douglas of Supreme Court.

Mr. Cox, now Broadcast Bureau chief, had planned to assume office last week, but President Kennedy left for Central American trip without signing official commission. Signature still was lacking late Friday, but White House said commission would be signed in time for ceremony in FCC meeting room.

FTC hits St. Joseph ads based on medical study

False advertising charges were leveled against Plough Inc.’s St. Joseph aspirin by Federal Trade Commission Friday. FTC charged that St. Joseph newspaper, magazine and tv advertising incorrectly stated results of analgesic study reported in Dec. 29, 1962, Journal of American Medical Assn.

Also charged in complaint is Plough’s advertising agency, Lake-Spiro-Shurman, Memphis. Tv spots claimed “America’s leading medical journal reports St. Joseph aspirin is your ‘best buy’ in pain relief,” FTC said.

Opinions expressed in Journal article are those of clinical investigators, not AMA, according to complaint. Similar charge of false advertising in use of same study has been made by FTC against Bayer aspirin (BROADCASTING, March 18).

Bailey, Miller limit equal time exemptions

Chairmen of Democratic and Republican National Committees urged Congress Friday to suspend equal-time section of Communications Act for 1964 presidential and vice presidential races.

But Democrat John M. Bailey and Republican William E. Miller opposed extending suspension to candidates for lesser offices.

Party leaders gave views to House Communications Subcommittee, which is considering administration-backed measure (H Res 247) to waive equal-time requirement as it applies to presidential and vice presidential candidates (BROADCASTING, March 11).

Rep. Oren Harris (D-Ark.), chair-

more AT DEADLINE page 10

Hosts take note!

With NAB convention activities to be closed down Tuesday afternoon (April 2) in Chicago, delegates will have no choice but to go to hospitality suites if they want liquid refreshments.

And, note to hosts—stock up early because all public liquor sales will be prohibited in Chicago that day until after 6 p.m. Even host hotel will not be able to replenish stocks because Chicago municipal elections fall on same day. Local law requires all bars and liquor stores to close while polls are open.

Old ‘friend’ of broadcasters, Lar (America First) Daly, is write-in candidate for mayor, running against Democratic incumbent Richard Daley and Republican challenger Benjamin Adamowski.

man of parent Commerce Committee and sponsor of resolution, said “more experience” with manner in which broadcasters handle political broadcasts would be desirable before extending suspension to lesser candidates.

Party chairman said suspension of law in 1960 to permit debates between presidential candidates John F. Kennedy and Richard M. Nixon contributed greatly to education of electorate on campaign issues.

But they said present law must be retained for protection of candidates for local and state office.

Mr. Bailey said “until we have conclusive, concrete evidence there will be no abuses,” state and local candidates should have protection of present law.

Salinger counterattacks; asks study of news media

Pierre Salinger, White House news secretary, slung charges of news management by Kennedy Administration back at “city editors and managing editors” of newspapers and radio and tv “news directors.”

Responding to mounting criticism of administration’s news activities (see page 130), Mr. Salinger told Women’s National Press Club in Washington Friday that study should be undertaken to determine whether newspapers, magazines and radio-tv are being operated in public interest.

BROADCASTING, March 25, 1963
WEEK'S HEADLINERS

Albert A. Klett, vp-director of Seven Arts, Los & Brorby, Chicago, named vp in charge of creative services. In his new position, Mr. Klett will be responsible for all of agency's broadcast and print creative work. Harold Kaufman, creative group head, appointed director of radio-tv production. Mr. Kaufman has been with NL&B for nearly four years and previously had been with Leo Burnett Co., Chicago.

Thomas D. Tannenbaum, executive assistant to Ray Stark, vp of Seven Arts Productions, named to post of vp in charge of newly created tv production department. Mr. Tannenbaum will head new tv production effort for Seven Arts (see story, page 143). He has served as associate producer on Seven Arts' motion picture "Rampage" for Warner Bros, release and served as head of Famous Artists Television before joining Seven Arts. He will divide his time between New York and Los Angeles.

Kenneth C. T. Snyder, senior vp of Needham, Louis & Brorby and manager of agency's Hollywood office, resigns as of April 1 to become president and executive producer of The Funny Co., which will produce 260 five-minute color animated programs of same name, which Mattel Inc. (toymaker) will use as advertising vehicle in major markets in 1964 (Broadcasting, Feb. 11). Mr. Snyder and Charles B. Koren, former MCA vp, have formed Snyder-Koren Productions, radio-tv commercial and programming consultancy, to create and produce advertising for both advertisers and agencies. Mr. Koren is vp of The Funny Co.

Theodore F. Shaker assumes responsibility as acting general manager of WABC-TV New York, replacing Joseph Stamler, vp and general manager, who has resigned over policy difference. Mr. Shaker also is president of ABC-owned tv stations and of ABC Television Spot Sales. Also resigned is Arthur Gross, WABC-TV program manager. Richard Beesly, sales manager of Los Angeles office of ABC Television Spot Sales, replaces James E. Szabo as WABC-TV general sales manager. Mr. Szabo may move into another sales area at ABC. Mr. Beesly served in station sales posts in Los Angeles, Chicago and New York.

Edward A. Warren, program director of WBKB-TV New York, appointed program director for ABC-owned tv stations. Prior to joining WNBC-TV in May 1962, Mr. Warren was director of programming for WGN-TV Chicago. In his new position, he will report to Theodore F. Shaker, president of division. ABC-TV Stations are WABC-TV New York; WBKB (TV) Chicago; KGO-TV San Francisco; KABC-TV Los Angeles; and WXYZ-TV Detroit.

Ford, Marlboro take CBS-TV pro football

Ford Div., Ford Motor Co., through J. Walter Thompson Co., both Detroit, and Philip Morris Co. (Marlboro cigarettes), New York, have each signed for quarter share sponsorship of 94-game regular season schedule of National Football League over CBS-TV, starting Sept. 15 and running through Dec. 15, CBS-TV announced Friday (March 22). Remaining half-sponsorship will be on regional basis.

Three games will be presented nationally, according to William C. MacPhail, vice president of CBS Sports. Twelve regional networks will carry remaining games, presenting seven contests simultaneously on Sundays.

Couric warns against public service laws

"Paste public service [broadcasting] on the statute books in the form of 'thou shalt devote so much time to public service programming' and you will have killed charity," John Couric, NAB pr manager, said last Friday.

In Philadelphia speech before Goodwill Industries luncheon honoring broadcasters, Mr. Couric warned against any attempts to "fence in" radio-tv's freedoms to act in public service. Broadcasters, he said, do not need "a marked map" to guide them in meeting needs of public. He criticized "the blackballers of broadcasters . . . automatic reactors at the mention of . . . radio, tv or broadcasting" and "kneelkerc critics who kick the electronics media without knowing why."

Alcoa drops 'Premiere' for Huntley-Brinkley

Aluminum Co. of America next fall drops 10-year formula of identifying itself with particular tv entertainment programs. It will turn to "greater reach and frequency" of new half-hour Huntley-Brinkley Report on NBC-TV (Mon.-Fri. 7-7:30 p.m. EST).

Alcoa, currently sponsor of ABC-TV's Alcoa Premiere, has bought 78 quarter-hours (in 52-week schedule) of Huntley-Brinkley, according to Alcoa's agency, Fuller & Smith & Ross, New York. Budget for new show is about $4 million; budget for Premiere, $4.1 million. Premiere's last play will be Sept. 12, and sponsorship in half-hour news show starts Sept. 9.

EIA pushes for repeal of tax on all-channel tv

Electronic Industries Assn. is going to try to get excise tax removed from all-channel tv sets. Board of directors Friday authorized staff to work for removal of 10% impost after hearing Robert W. Galvin, Motorola president, report that elimination of fee would permit all-band receivers to be sold at near same price as present vhf-only sets. EIA board of directors' action came after consumer products division urged move and legislative committee opposed on ground industry is better served by working for administration's tax reduction program (see earlier story, page 136).

For other personnel changes of the week see FATES & FORTUNES

Ford, Marlboro take CBS-TV pro football

Cooper. Celebrity reception is scheduled March 29, 6:45 p.m., at Mid-America Club.

March 29-30—National Assn. of Educational Broadcasters Region II conference, Tampa, Fla. WEDU (TV) Tampa-St. Petersburg (educational ch. 3) is host station for conference and its general manager, LeRoy Lastinger, is conference chairman. Among the speakers are William Harley, NAEB president, and Richard Hull, of Ohio State U. AFB board chairman.

*March 30—Annual meeting, National Assn.
help for busy teachers
hope for crowded classrooms

Today, education in America faces a severe challenge. An accelerating world requires new and broader curriculums. An expanding population begs for more teachers, more classrooms.

Many communities have turned to Educational Television as an imaginative way to expand course subjects, to bring more effective teaching techniques into the classrooms without sacrificing personalized instruction.

Because of our long experience in the research and development of telephone, television, and defense communications networks, it was natural that the Bell System was called on to develop facilities for one of the first ETV networks in the country, in Hagerstown, Maryland.

We have since helped pioneer the first state-wide, closed circuit Educational Television system, in South Carolina.

In doing this, we have developed a transmission service that provides several channels of instruction. It is low in cost and makes use of the service and maintenance facilities of local Bell Telephone Companies in communities of any size.

Helping communities like yours find the answer to better learning through Educational Television is just one more way of putting Bell System research and skills to work serving you and your family.

BELL TELEPHONE SYSTEM
Owned by more than two million Americans
of Fm Broadcasters, Conrad Hilton Hotel, Chicago.

March 31—Board of directors meeting, Institute of Broadcasting Financial Management, 9 a.m., Blackstone Hotel, Chicago.

March 31—Assn. of Maximum Service Telecasters annual membership meeting, Conrad Hilton Hotel, Chicago.

March 31—Annual meeting of the Assn. of Professional Broadcasting Education, Chicago. Dick Mendehall, editorial director of WSB-AM-FM-TV Atlanta, Ga., and Worth McDougall, head of radio-television at the University of Georgia’s School of Journalism, will speak.

March 31-April 3—Annual NAB convention, Conrad Hilton Hotel, Chicago.

APRIL

*April 1—Annual stockholders meeting, Wometco Enterprises Inc. 400 North Miami Ave., Miami, Fla.

April 1—Deadline for petitions to FCC for reconsideration of its new rates for leased, private telegraphic services and establishment of special press rates for wire services.

April 1—Deadline for comments on FCC proposed rulemaking to reserve ch. 36 in Allentown for etv use, assign ch. 36 to Altoona, ch. 3 to Clearfield, ch. 65 to Harrisburg, and ch. 68 to Scranton, all Pennsylvania, for etv use.

April 1—Deadline for comments on FCC proposed rulemaking to add ch. 18 to Gaithersburg, Md.

*April 1—Eighth annual membership breakfast meeting of TV Stations Inc., Mayfair Room, Sheraton-Blackstone Hotel, Chicago. Sylvester L. (Pat) Weaver, board chairman of McCann-Erickson International, will be guest of honor and principal speaker. Other speakers will be W. D. (Dub) Rogers, TV Inc.’s chairman, who will also preside, and the organization’s president, Herb Jacobs.

April 2—Premium Advertising Conference, conducted by Premium Advertising Association of America, McCormick Place, Chicago. The theme of the conference, which is held in conjunction with the National Premium Buyers’ Exposition is “Operation Greater Economic Growth Through More Productive Advertising and Sales Promotion.” Featured speakers are Dr. Arno Johnson, vice president and senior economist at J. Walter Thompson Co.; Stanley Goodman, president of Sales Promotion Executives Assn.; Richard F. Tomlinson, president of Food Field Reporter and Food Topics; Daniel L. Goldy, U. S. Dept. of Commerce; and William Dunham, president of Premium Advertising Assn. of America.

April 3-5—Assn. of National Advertisers West Coast meeting, Santa Barbara Biltmore Hotel, Santa Barbara, Calif.

April 6—American Women in Radio & Television, Presentation ‘63 workshop, 10 a.m.-12:30 p.m., TV wing, McCann-Erickson Inc., 455 Lexington Ave., New York.

April 6—Georgia AP Broadcasters Assn. meeting, Atlanta. News clinic featuring specialists in various phases of broadcast news coverage. Awards banquet at night, with AP Assistant General Manager Louis Kramp speaking.

April 11—Seminar on radio broadcasting and community leadership under joint auspices of Southern California Broadcasters Assn. and U. of Southern California Dept. of Telecommunications. USC campus, Los Angeles.

Another important plus... documented research tells the story!

They like us

WGN Radio has the most highly respected programming in Chicago. Chicago area adult listeners rate* WGN first in these categories...

- Good program variety
- Well-rounded news coverage
- Good sports coverage
- Good taste
- Advertising of high quality products
- Broad family appeal
- Appeal to intelligent people

That's why we reach more

WGN Radio reaches the largest audience of any broadcasting station west of the Hudson River. (NCS, 1961—1,677,600 homes reached weekly.)

WGN Radio reaches more homes and more cars than any other Chicago radio station. (NCS, 1961; The Chicagoland Auto Radio Audience Survey, 1961.)

For ten consecutive months, WGN Radio has reached more homes per average quarter hour (6 a.m. to midnight) than any other Chicago radio station. (NSI Bi-Monthly Radio Reports, April, 1962—January, 1963.)

That's why we say

WGN IS CHICAGO

The most respected call letters in broadcasting

Big-as-all-outdoors!

"THEY CAME TO CORDURA"... Gary Cooper, Rita Hayworth and Van Heflin lead a brilliant array of top Hollywood and Broadway performers in one of the most exciting adventures ever brought to the screen. Robert Rossen's taut direction makes it a memorable outdoor film. It's another of the 73 great box-office hits, newly released for television, that have been added to the roster of the COLUMBIA POST-48's.
**Properly assayed**

**Editor:** Congratulations on an accurate, honest appraisal of the West Virginia economy. Want 1,000 reprints of your march 18 Ohio Valley special report.—Tom Garten, WSAZ-TV Huntington, W. Va.

**Editor:** The West Virginia centennial commission deeply appreciates your presenting the positive side of the West Virginia story in our centennial year.—Carl R. Sullivan, executive director, West Virginia Centennial Commission, Charleston.

**Fm trouble at the top**

**Editor:** An acute problem exists for many fm broadcasters.

Most, if not all, small market fm stations are hard-pressed to sell advertising. Fm service is supported by am income in the hope that the increasing popularity of fm will one day make it a saleable medium.

To illustrate the point of this letter, our WRFL (FM), after 17 years of operation made possible because of the remote control provision of the FCC rules, is faced today with the necessity of discontinuing this service because of the new FCC automatic logging provision. As of April 8 a first class license holder must personally inspect all transmitting equipment DAILY and log his visit, stating need for remedial action and what steps were taken to perform it.

The WRFL transmitter is in the Blue Ridge Mountains, virtually inaccessible for days at a time during winter months and during spring thaws. It is six miles from the nearest passable road.

It boils down to the addition of two extra engineers and a road crew for an fm facility which can give no income for some years.

You can help by getting the word to those involved. It is remotely possible that if enough broadcasters petition the FCC for a stay, one might be granted. At best these fm stations with remote mountaintop installations should explore the FCC to carefully consider the consequences.—Philip Whitney, general manager & chief engineer, WRFL (FM) Winchester, Va.

**Carried to the extreme**

**Editor:** FCC Chairman Newton Minow, in his testimony before the House judiciary antitrust subcommittee last week, expressed a view that seems to me to be interesting in its implications. He defined the public interest as set out in the Communications Act as including the well-being of newspapers. . . . Since Mr. Minow is not considering licensing newspapers as well as protecting them by a kind of indirect subsidy, it would seem he is stretching the concept of the public interest.

If newspapers are to get a boost by the granting of valuable licenses over other equally worthy applicants, why not also insure that these publications are in fact operating in the public interest? How about an examination of the readership firms so that newspapers can experience the "tar brush" of congressional investigation?

I hope that if the commission does begin to award broadcasting licenses to newspapers as a boost to their economic misfortunes that it will also encourage the other benefits that go along with operating in the public interest.—M. C. Topping, assistant professor, Oklahoma State U., Stillwater, Okla.

**Mr. Martin's remarks**

**Editor:** In reporting my remarks at the state presidents' conference (Broadcasting, March 4), your man has placed quotation marks around a statement I didn't make. Since it relates to the sentiments of the membership of the Colorado Broadcasters Assn., I would appreciate a correction.

I did not say that the membership of CBA was "not interested in anything the NAB has to say." What I said was that our membership had requested that our convention program this year omit an appearance by an NAB staff member paraphrasing Mr. Collins . . . Bob Martin, president, Colorado Broadcasters Assn.

[An experienced Broadcasting reporter made notes when Mr. Martin delivered his remarks. The story has been described as accurate by NAB executives.]

**Old diaries not used**

**Editor:** This . . . concerns page 46, March 18 Broadcasting: "company obtains multiple-market data by using its old sample by referring to diaries stored in warehouse . . ."

Any multiple market composite undertaken by us concerns the problem of sample design and distribution. We do not refer to old diaries for current information on viewing. We do observe the geographic distribution of past samples from tables we have; study Census of Housing data; current set ownership patterns; and then design multiple-market subsamples. Current diaries are then sent such a sample when multiple-market composites are studied. All of this is separate and distinct from local market sample work.

The foregoing is quite different from the statement in Broadcasting and I believe the confusion comes from the terms of the subsample and past sample distribution in the letter I left with [your reporter] at the hearings. . . .—Allan V. Jay, Videodex Inc., New York City.

1540 BROADWAY, NEW YORK 19 • CHICAGO • CULVER CITY • TORONTO
Are tv commercial production costs really up?

If a good one-minute tv spot cost $5,000 to produce in 1958, how much would it cost today—$5,000? $10,000? $15,000?

If you estimated $10,000 or more, you’re probably a client. If you estimated $5,000 or less, you probably run a production house—and, incidentally, you’re probably right!

Of course, total tv advertising costs are rising. Talent re-use payments have skyrocketed as a result of recent contracts negotiated by the Screen Actors’ Guild and American Federation of Television & Radio Artists. Talent and air-time costs have gone up, too, along with the cost of living. On the production side some costs are up but others have come down.

Result: It needs cost no more to produce good commercials today than it did five years ago.

Why Higher Estimates? • If this is true, why are production estimates submitted by agencies so much higher? Because many agencies do not separate true production costs from non-production items. Their production estimates include charges for such non-production things as talent re-use payments, prop items that do not rightfully belong in a commercial production budget. The latter items seem to be increasing in scope and number.

Actual film production costs include only non-recurring items—not the production house, costs of special services or props, talent session fee, agency commission and local taxes.

This total should be shown separately from the residual costs which are completely dependent on the media buy. For example, if the gross commercial production cost was $8,000 and the spot was to be used in a one-city test market and had two on-camera performers, the session cost would be $199.50, including pension-welfare. However, if the same commercial were to be shown for 13 weeks on a prime network show, the session cost would be $1,092, including pension-welfare.

Agency failure to make clear that residual payments are dependent on the media buy has resulted in the widespread wrong impression that commercial production costs have risen.

Which costs have gone down? Chiefly production house profits. First, as a result of rising overall tv costs, clients are tending to produce fewer commercial spots and run them more often. Second, there has been a rapid increase in the number of companies producing tv commercials. Over 80% of the 236 New York City film producers are less than two years old.

Buyer’s Market • The resultant increase in the availability of talent has tended to create a buyer’s market. That’s why production houses sometimes charge less today for comparable services than they did five years ago despite a 20% increase in hourly rates of production unions.

To meet the competitive situation, they are turning to ingenious production methods, many of which are not only more effective for the product but more economical as well.

There are two good reasons why they can do this: 1) personnel and 2) mechanical. Greater experience, inventiveness and skill on the part of production personnel save time and costly mistakes. And improved equipment, which required a large capital investment, has resulted in reduced studio logistics costs.

For example, magnetic tape has revolutionized sound recording. Now, instead of having to record sound on film, then send it to the lab for developing and printing, which used to take a day or two and often resulted in errors that required costly re-recording, you can record directly on magnetic tape during shooting. Magnetic tape is to sound what video tape is to film.

Miniaturization and new light-weight cameras, lighting and sound equipment have greatly reduced studio and location shooting costs.

And finally the film itself, both black and white and color, has been improved radically. This allows more flexibility in shooting and cuts down on time previously required for critical lighting.

Jet Age Commercials • Furthermore, contrary to popular belief, location-shooting costs have actually decreased in many cases. Before the days of jet travel, a crew sent to Florida or the Caribbean during the winter months sometimes sat around for ten days or more waiting for good shooting weather. Today you can jet crew and talent directly to a guaranteed good-weather location, shoot the footage in one or two days and lower both talent and production costs.

For example, you can transport camera crew, agency producer and one actor from New York to Rio, where seasons are reversed, shoot your footage and bring them all back for approximately $2,000 (via jet economy flight).

Production houses, in cooperation with the unions, are doing more than their share to hold down tv commercial production costs. Here are several ways the agency production supervisor can save money in large chunks:

1. Schedule shooting during the October-March period and try to avoid the peak production months.
2. Do not insist on using a certain producer when he’s already up to his ears. “There’s only one man who can do this”. . . is a lot of nonsense . . . and can cost a lot of money.
3. Avoid crash-production schedules. Overtime in shooting, editing or labor work doubles the cost.
4. Urge creative staff—writers, artists and producers—to develop inventive new ways of reducing talent re-use payments which may even increase the effectiveness of the commercial.
5. Make multiple use of sets and props whenever possible.

It’s true that tv commercial production costs are not higher today than they were five years ago. Prove it to yourself. Pull out a storyboard shot in 1958. Select the right production company and cost it out, applying some of the economy tricks you’ve learned since then. You may even find you can do it better for less!

Edward H. Mahoney has been in the advertising agency broadcast field for 16 years. Prior to joining Fuller & Smith & Ross Inc. in 1960 as vice president and manager of broadcast, he was vice president in charge of television for Cunningham & Walsh in New York for three years. Before that, he was vice president of commercial tv for Benton & Bowles for eight years. Mr. Mahoney was graduated from Harvard College where he also did graduate study in architecture.

WELI/960 THE SOUND OF NEW HAVEN/5000 WATTS

BROADCASTING, March 25, 1963
They told Police Chiefs of a plan to televise their Departments in action, in a case that (1) dramatizes the forces that lead to crime and (2) adds a chapter to the record of heroic police service.

More than a score of metropolitan PD's responded enthusiastically. They are bringing before the camera the REAL culprits, the "innocent bystanders", the victims and the officers involved in a REAL AND IMPORTANT CASE IN ITS FILE. Result:

1963's Great Law Enforcement Series

POLICE CHIEF F. C. RAMON, Seattle, states:
"This television series illustrates the desperately dangerous risks the Policeman faces on the job... and he faces them for the Community. The citizens should know about this and, above all, should know how they can help."

POLICE CHIEF C. L. SHUPTRINE, Houston, asserts:
"The modern criminal accentuates the demand for up-to-the-minute law enforcement agencies... flexible, dynamic and effective. This television program accurately portrays today's Police Departments in action.

NEW TV SHOWS SEEN OVERSEAS TOO

U.S. distributors get $36 million a year from programs now on networks here; second run sales add another $24 million

A steadily increasing trend to sales of "on-network" tv series overseas by U.S. distributors is looming as a greater factor in the evaluation of the global market.

This pattern of "on-network" sale is different from "off-network" in that it covers the U.S. distributor sale in foreign markets of tv programs—such as a Perry Mason or a Bonanza—currently being run on the networks in this country.

Television program distribution internationally recently is a near-$60 million business this year, and it's estimated conservatively that approximately 60% of this amount, or $36 million, will accrue from the "on-network" area alone.

A check last week of several leading distributors in the U.S. reveals that for many of these top firms, the "on-network" sales practice has supplanted the so-called "off-network" release of programs overseas as the principal revenue source in these markets.

The trend to "on-network," however, is not a new development, and is known to have started as far back as 1953, and for certain programs the pattern has grown over the years. During the 1962-63 season, in fact, approximately 75% of the three networks' prime-time programs were being sold abroad concurrent to their showing here.

Of the $60 million base projected by the television division of the Motion Picture Export Assn. for international distribution, the $36 million in "on-network" distribution is actually considered a conservative estimate. Here are some of the reasons:

- The largest and best-paying international markets, including the United Kingdom, Japan, Australia, Canada and Latin America—are demanding and purchasing the new shows while buying proportionately fewer of the older syndicated and off-network shows—that is, programs which have completed their cycles on CBS-TV, ABC-TV and NBC-TV.
- The most active international marketers—Screem Gems, MCA, NBC Films, CBS Films, and to a lesser extent, the William Morris Agency—are deriving in the neighborhood of 80% of their overseas gross from on-network sales, because they hold the rights to the programs.
- Off-network programs still find a market; but more and more, these productions will find exposure only on stations that cannot afford the newer, more expensive shows and will then face stern competition for time slots with the contemporaneous product.
- Prices Low — Even the active distributors of on-network programs acknowledge, however, that this growing sales pattern does not necessarily mean that overseas markets will pay more for these new shows. They agree unanimously that prices in virtually all overseas air are "unreasonably low" (story, p. 28) and such conditions as quotas, lack of inter-station competition, government monopolies and the availability of U.S. programs in abundance, creating a "buyer's market," have tended to perpetuate prices that U.S. distributors consider inadequate.

Willard Block, international sales manager of CBS Films, pointed out that this emerging pattern has had a subtle but unmistakable influence on depressing prices on occasions, especially for the only moderately successful show. He explained that if a network program is offered one year and not

Investigators snipe at Nielsen researchers

A House Commerce subcommittee had a big day last Thursday taking pot shots, in the name of public service, at the biggest of the television-radio research organizations, A. C. Nielsen Co.

For more than six hours the investigation group headed by Oren Harris (D-Ark.) pried into the methodology of the various A. C. Nielsen Co. broadcast reports (story page 34).

Main targets of the probers were Warren Cordell (left), Nielsen vice president and chief statistical officer in charge of the services, and Henry Rahmel, manager of the media research division and executive vice president. Others who appeared for the Nielsen firm were George Blechta, client relations vice president for station services, New York, and John Boesel, client relations vice president for national services.

The Nielsen witnesses were rouged up as they gave technical answers to lay queries and backed them up with sheafs of charts.
bought internationally, the buyer will insist upon a reduction in price if the
same show is placed on the market the following year. The rationale: the pro-
gram is old; it's been around.

Broadcasting's study last week indi-
cated more than 70 programs carried in prime network time have been sold
to foreign countries during the current
season. The outlook is for a widening
of this sales concept in 1963-64. An
independent study by one of the lead-
ing international distributors, who asked
to remain anonymous, reveals that con-
current programming to be offered
abroad for next season will amount to
a weekly minimum of 12½ hours of
comedy, 31½ hours of drama, 14 hours
of music variety, four hours of panel
shows and 4½ hours of news and public
affairs.

Though the "newness" factor men-
tioned by Mr. Block has been a prime
one in accelerating the growth of on-
network programs abroad, overseas dis-
tributors mentioned other considera-
tions:
• The opening up of stations in key
markets has stiffened competition
to some extent, and stations and adver-
sisers have insisted on programs they
consider "the best," which becomes
translated into "the latest."
• There is a psychological dimension
in that overseas operators want the
programs that are being played in the
number one tv market—the United
States—and are unwilling to play "sec-
ond fiddle." They also want the feeling
of decision-making, acting out the role
of a programming executive, by picking
the shows they predict will be "hits."
• The leading tv film distributors—
Screen Gems, CBS Films, NBC Films
and MCA particularly—have been ac-
tive in the global market for years and
have "used up" their older properties
to a considerable extent. Their pre-
eminence in network programming has
enabled them to consolidate their lead-
ership by selling their concurrent shows.

Growing Market • The practice of
buying concurrent programs dates back
at least to 1953 when several U. S.
shows were bought for Great Britain,
Canada and Australia have been on-
network purchasers for at least eight
years but have stepped up their number
in recent years. U. S. distributors ob-
served that in the last three years the
United Kingdom, Japan and Latin America
particularly have expanded their
concurrent programming purchases
and this practice has spread, on a more
limited basis, to other countries.

In some instances, an overseas broad-
caster may purchase a popular U. S.
series that has been running on a net-
work for several years, and may either
begin to program from the first year's
cycle or from the latest year's output.
In many instances, an overseas station
will buy the initial output, schedule it
52 weeks a year and eventually "catch
up" with the latest episodes.

Lloyd Burns, international vice presi-
dent of Screen Gems, voiced the view
that concurrent programs are demanded
particularly in the UK, Australia, Can-
da and Japan, but said that in Latin
America the main consideration is
"whether it's a good action-adventure
show." He added that it is SG's policy
to sell its new, network programs even
in smaller markets, irrespective of the
low price tag that it may accrue. There
is no attempt, he said, to fork over
instead of a current SG production on
a small-market overseas operator.

Programs for '63-'64 • From the
buyer's point of view, Charles Michelson,
chairman of the Export Department,
Inc., New York, which serves as a
selling agent in the U. S. for Television
Corp., Ltd., Sydney, reported that nego-
tiations now are in progress for pro-
grams to be carried during 1963-64.
Mr. Michelson noted that Television
Corp. generally negotiates for the entire
Australian rights to a series and often
purchases U. S. programs on from four
to six stations.

During the spring Ken G. Hall,
chief executive of Television Corp.
visits the U. S. and screens pilots of
upcoming shows and reviews scripts.
Starting next month Mr. Michelson and
Mr. Hall will evaluate the new pro-
grams and by early or late summer will
have decided on the purchases they
will make of concurrent programs. Mr.
Michelson reported that the vast ma-
jority of shows bought for Australia
are those shown currently in the U. S.
but he added that "we do fill in with
some other product and feature films."

One of the unusual aspects of con-
current sales was pointed out by Alvin
Ferleger, international sales manager
of NBC. He stressed that in Canada, the
buyer insists upon pre-release of new
products, which means that stations
there invariably present U. S. network
programs in advance of their showing
here. Canadian broadcasters have in-
serted on this prerogative, because in
some areas of the country, particularly
those adjacent to Detroit, viewers are
able to pick up U. S. programs.

Extra Servicing • Another sidelight
was noted by Harold Klein, vice presi-
dent and worldwide sales manager of
ABC Films, who pointed out that con-
current programming entails extra serv-
icing, including the distribution of prints
and the need for dubbing. The latter
consideration is highly significant in
Latin America, necessitating a backlog
of 13 or more concurrent shows before
dubbing process is started.

Though the major markets for con-
current shows are the big five of the
United Kingdom, Latin America, Japan,
Better prices for U.S. programs campaign

The Television Program Export
Assn., which represents some of the
distributors of U. S. tv shows abroad,
is planning to undertake a campaign
to increase the prices paid for U. S.
programs in overseas markets.

John G. McCarthy, president of the
TPEA, announced the project
at a news conference in New York
last week after returning from a six-
week business trip to markets in the
Far East, Middle East and Europe.
Mr. McCarthy said he would call a
meeting of the organization's board
of directors shortly to set up a com-
mittee of foreign sales managers to
work with him on a market-by-mar-
tet analysis of pricing throughout
the world.

Mr. McCarthy said that in many
markets of the world prices were
"inadequate." He attributed this
situation largely to quotas and to
price-fixing arrangements among
buyers of U. S. programs. He was
asked by a newspaper what steps
could be taken to raise prices if
overseas buyers continued to resist
increases. He replied TPEA members
were prepared to take "defensive counter measures," but said that only
in an extreme circumstance would
distributors withhold product from
a particular market.

Mr. McCarthy

BROADCASTING, March 25, 1963

28 (LEAD STORY)
At left the principal negotiator for Screen Gems in program sales abroad, Lloyd Burns (l) stands beside S. W. Caldwell, president of the CTV Television Network in Canada, as Ray Junkin (seated), general manager of Screen Gems (Canada) signs a programming contract with CTV. At right on the Hollywood set of the new Clifford Odets-Richard Boone anthology series scheduled for NBC-TV next season, Alvin Ferleger (2d from right), NBC International sales manager, discusses overseas sales plans now being made for the series with (l to r) Mr. Boone, Mr. Odets and Marvin Goodman of the NBC International staff.

Australia and Canada, sales have been made in other markets, including Germany, Italy, Sweden and the Philippines.

Richard A. Harper, director of features and syndicated sales for MGM-TV, reports that the company’s The Eleventh Hour has been sold in Finland, Manila, Nigeria and Italy as well as Canada and Latin America while Sam Benedict has been sold in Manila and Italy as well as in Great Britain and various Latin American nations. Mr. Harper noted that sale of concurrent programs poses certain problems because of dubbing and shipping, and adds to already-heavy print costs. But he acknowledged it’s a growing practice and one under which the distributor must operate in the future.

Tom Seehof, eastern sales manager of Desilu Sales Inc., reported the company has had “excellent results” with The Untouchables and The Lucy Show. Thirteen countries in Latin America have bought The Untouchables and other sales were in the Philippines, Australia, Japan, New Zealand, Lebanon, Sweden, Germany and Canada, he said. Sales on Lucy have been made in Australia, the Philippines, Japan, Great Britain, Germany, Malta, Nigeria, France and Canada.

In general, distributors agree that the emerging pattern is for the older, off-network and syndicated properties to find acceptance in new and/or less developed markets of the world, while the newer, on-network shows are sought and bought in the older, established and flourishing television operations. But officials can point to deviations from the norm in certain countries for certain shows.

A representative list of prime-time, concurrent programming with the name of the international distributor follows (based on available information):

**ABC Films:**
- Ben Casey, I’m Dickenson
- He’s Fenster, Ozzie and Harriet, and Perry Mason’s voice in Japan is supplied by actor Hideo Sato, whose voice has been dubbed into the series for the four years it has been playing in that country, which stresses concurrent network shows.

**CBS Films:**

**Desilu:**
- The Lucy Show, Fair Exchange and The Untouchables.

**MCA:**
- Jack Benny Show, Alfred Hitchcock Hour, Mr. Ed, Wagon Train, Leave It to Beaver, My Three Sons, Wide Country and International Showtime.

**MGM-TV:**
- The Eleventh Hour and Sam Benedict.

**William Morris Agency:**
- The Rifleman, Saints and Sinners, Lloyd Bridges Show, Danny Thomas Show, Andy Griffith Show, Dick Van Dyke Show, New Loretta Young Show, Ensign O’Toole, Mc Keever and the Colonel, The Real McCOys, Sing Along with Mitch and Joey Bishop Show.

**NBC Films:**

**Screen Gems:**
- The Jetsons, Dennis The Menace, Empire, Route 66, The Flintstones, Our Man Higgins, Naked City and Donna Reed Show.

20th Century Fox TV: Dochie Gillis, United Artists Television: Stoney Burke.

Warner Bros. TV: Cheyenne, Hawaiian Eye and 77 Sunset Strip.
ARB updates its television homes figures

Of the 54,901,900 homes in the United States, 90% are television homes according to estimates released last week by the American Research Bureau.

The state and county breakdown shows 49,581,000 tv homes as of July 1962, based on ARB's updating procedures using May 1962 regional census data for each county and state. The figures are for use in ARB reports Jan.-Aug. 1963.

On Dec. 17, 1962, BROADCASTING printed the A. C. Nielsen Co. complete county-by-county radio and television ownership estimates as of September 1962. Nielsen listed 50,003,300 television homes, 91% of an estimated 55,092,400 homes. (The Nielsen figures include Alaska; the ARB figures do not.) The state-by-state figures, which are available in county form in the ARB booklet, follow:

Business briefly...

The Institute of Life Insurance, through J. Walter Thompson, New York, will sponsor American Landmark: Lexington- Concord, an NBC-TV news special to be telecast Sun., April 21 (8:30-9 p.m. EST).

Scholl Mfg. Co., Chicago, through Donahue & Coe, New York, will participate in ABC-TV daytime shows: Jane Wyman Presents, Who Do You Trust?, Father Knows Best, Day in Court, General Hospital, Seven Keys and Queen for a Day. A two-month flight of Five announcements a week is planned, beginning April 29.

Foremost Dairies, San Francisco, will begin a 13-week tv-radio campaign on April 1 to promote its new milk cartons carrying comic strips on the sides. The company declined comment on details of broadcast campaign. Agency: Guild, Bascom & Bonfigli, San Francisco.

I. Rokeach & Sons, Carlstadt, N. J., has purchased 250 radio spots on New York City and Newark, N. J., stations for its Passover campaign, commencing today (March 25). The spots will run during a two-week period on WOR, WHN, WEVD, WQXR and WINS, all New York, and WVNI Newark. Agency: Co-ordinated Marketing Agency, New York.

Reynolds Metals Co., Richmond, Va., has signed for an alternate weekly hour of the new The Richard Boone Show on NBC-TV next season. The show goes into the Tuesday, 9-10 p.m. period. Lemen & Newell is the agency.

Philadelphia agencies merge

Gresh & Kramer Adv. and Harold S. Gilbert Adv., two Philadelphia advertising and public relations agencies, have completed arrangements for a merger, it has been announced by Bernard J. Kramer, president of the former company, and Mr. Gilbert. The new organization will retain the name of Gresh & Kramer and will remain at 1717 Sansom St. Mr. Gilbert will assume the title of vice-president.

Chesebrough-Pond's groups its accounts

Chesebrough-Pond Inc., New York, has completed consolidation of its advertising activities with the appointment of William Esty Co. to handle its Q-Tips cotton swabs and cotton balls and J. Walter Thompson as agency for its Cutex line of cosmetics.

The new appointments now place all of the firm's cosmetics with JWT and its proprietaries with Esty. Lawrence C. Gumbiner previously handled the Q-Tips account while Doherty, Clifford, Steers & Shenfield the Cutex products. The move was tailored to conform to Chesebrough-Pond's domestic realignment during 1962, when the company divided its marketing operation into two segments, the cosmetic division and the proprietaries and specialties division.

Rep appointments...

- Dixie Network: Grant Webb & Co., West Coast regional representative.
- KAPR Douglas, Ariz.: Elisabeth M.
"PUBLIC SERVICE AT ITS BEST"...

The power of television was never more dramatically demonstrated than when WBNS-TV took 100,000 Central Ohioans into already overcrowded Ohio Penitentiary. The shocking conditions, accentuated by too many people, too few opportunities for rehabilitation, need attention from the Ohio Legislature. To date, mail received at WBNS-TV indicates the Legislature will hear plenty. This kind of editorial impact is what makes television the medium that gets things done, and WBNS-TV the prime mover in the community.

"Telementary No. 66"
Beckjorden, New York, as national representative.

- WHLD Niagara Falls: Mort Bassett & Co. as representative.
- WNEG Tioecoa, Ga., WLYB Albany, Ga., WYNA Tuscumbia, Ala., and WINI Murphysboro, Ill., appoint Hal Walton & Co. as representative.

**NBC-TV easing back on product protection**

A new modification on product protection has been made by NBC-TV. Advertising agencies were told of the two changes which went into effect earlier this month.

An advertiser that has a minute participation in a program no longer receives product protection in an adjacent network show, and opening and closing billboards placed both in the daytime schedule or in participation shows no longer have product protection.

The changes are seen as a continuing trend narrowing the spacing, or protection of advertised products from competing or related products on network tv, particularly the minute advertiser.

In fact, NBC noted the policy revision was necessary because of the continued increase in the number of minute advertisers in network television.

What complicates product protection is the practice of rotating minutes within such program blocks as motion pictures in prime time (next season, as this, NBC-TV will have two such movies, Mondays and Saturdays).

**Also in advertising...**

**Expansion planned** - Ralph Bing Adv. Co., Cleveland, has moved to the top floor of that city's Park Bldg., Public Square. The Bing agency had been located in the Frederick Bldg., East Fourth St., for the past 17 years. Its present move reportedly is to accommodate recently acquired business and will entail the hiring of additional personnel. Ralph S. Bing is agency's president.

**New agency** - Gradle & Briggs, new advertising and pr firm, has been formed by Michael W. Gradle and Carl Briggs, with executive offices at 17100 Ventura Blvd., Encino, Calif. Telephone is 789-5441. Mr. Gradle, formerly manager of advertising and promotion for KNBC (TV) Los Angeles, and previously with Footen, Cone & Belding; Crowell-Collier and Needham, Louis & Broby, is president of the new firm. Carl Briggs, veteran advertising and pr man whose background includes service with the Richard Prosser Agency, Arnoux Corp., Security Title Insurance Co., Grove Mortgage Corp. and Pacific Public Relations, will be vice president. Leonard Murphy, with financial industrial experience, will be secretary-treasurer.

**New Walton offices** - Representation firm Hal Walton & Co. with headquarters in New York has announced the opening of new sales offices in Los Angeles at 1540 N. Highland Ave.; in San Francisco at 681 Market St. and in Atlanta in the William Oliver Bldg.

**A new VPI** - VPI of California has been established by VPI of New York, tv commercial production company. Peck Prior, formerly vice president and general manager of Don Feddersen Commercial Productions, is president of VPI of California, which has opened offices at 1515 N. Western Ave., Hollywood 28. Telephone is Hollywood 6-8691. The eastern and western organizations are operating in close alliance, with directors interchange, as the work demands.

**Harper describes changes in marketing concepts**

The concept of marketing has changed from the "we make it, you sell it" theory to one of "consumer preference built into a producer's design." This is how Interpublic Inc. President Marion Harper Jr. described the impact of automation in marketing to the Sales-Marketing Executives of Chicago last week.

"The essence of marketing is communications," said Mr. Harper, who is also chairman of the board of the American Assn. of Advertising Agencies. "The operation of business today has become, more and more, the management of information...we are dealing far more with data than with things," he said.

Harper foresaw the day when "programmed effort will drive out non-programmed effort," or the era of the "punch card."

He stated that the principle of feedback—relating information from various stages of a process to a central control—has already been applied in marketing, in inventory and warehousing; and increasingly it would come to play a role in product development, advertising, sales promotion and selling.

---

**Dale Moudy's spreading the word:**

"WING, the colossus of Dayton Radio and an Air Trails station, is an à la Carte subscriber. This is radio programming at its very best...a great sound," Hear it with Milt Herson and Marv Kempner in Suite 1119A, Conrad Hilton Hotel.

Mark Century Corporation
6 West 57th St., N. Y. 19, N. Y. Cl 5-3741
This is Atlanta...

and she just turned 21!

Atlanta has just jumped to 21st position as a television market in Sales Management's "Survey of Television Markets". The rank is based on Nielsen's average nighttime circulation, which shows a high achievement of potential by WSB-TV—the dominant station in the Atlanta market.

*Copyright Sales Management Feb. 1, 1963 Survey of Television Markets; further reproduction is forbidden.
Is Pulse running a ‘con game’?

REP. HARRIS ASKS THAT QUESTION, THEN PUTS NIELSEN ON HOT SEAT

The accuracy of audience ratings on which $900 million dollars worth of TV and radio timebuying depends was challenged last week by a House Commerce subcommittee.

Chairman Oren Harris (D-Ark.) and his colleagues spent a busy week probing the methodology of A. C. Nielsen Co. and the Pulse Inc. ratings. The questioning was rough at times in the manner of congressional investigations—so rough that The Pulse Inc. was inferentially termed “a con game” by Chairman Harris.

Last Thursday the Special Subcommittee on Investigations turned giant killer, subjecting Nielsen executives to questioning that challenged the authenticity of that company’s methods and hinting that it’s possible to rig Nielsen’s mechanical devices (Audimeter and Recordimeter-Audilog diaries).

And the Thursday probe wound up with open hints that the Nielsen executives hadn’t seen anything yet. Although no definite information was supplied on what was still to come, it was obvious that nearly two years of investigating by subcommittee staff investigators have unearthed material from former Nielsen field men and meter-equipped homes that will maintain interest in the hearing.

Nielsen and Pulse were the main targets last week. Several witnesses testified as to their personal views on ratings in general:

- David J. Mahoney, executive vice president of Colgate-Palmolive, reiterated his suggestion that networks should give guaranteed circulation (Broadcasting, March 11) but voiced willingness to stay with the present ratings system.
- Mrs. Dorothy Rabell, KITT (FM) San Diego, Calif., complained that Pulse ratings don’t adequately report FM coverage.
- Ross Baker, KCCO Lawton, Okla., said an isolated Pulse report hurt his ratings and cut sharply into local and national business.

After hearing the parade of witnesses, the subcommittee kept indicating it wants answers to a single question, “Are broadcasters, advertisers and public Nielsen reports.

His comments were so fiery that Chairman Harris pointed out the subcommittee really wasn’t attacking Nielsen witnesses or the company but merely felt it had a duty, after five years of study, to raise questions about Nielsen and other survey firms.

“Insofar as the networks are concerned,” he said, “90% of the information they rely on comes from your [Nielsen] company. If this is true, and if networks produce $800 or $900 million of advertising per year, your work is very important. We are entitled to raise questions about the methodology and use of statistics. We are not attacking you ‘as such.’ We have developed some interesting things—most-

[Images of David Mahoney, Johnny Carson, and Dr. Sidney Roslow]
used to influence the inner mechanical devices of recorders and thus give a break to 50 kW stations.

The probe took an unusual turn when a key Nielsen witness, Henry Rahmel, executive vice president and media research manager, asked a spectator if his network had been so approached. The witness, Harper Carraine, CBS Radio research director, denied he had ever been given any advice or suggestions along this line.

Another long exchange at the Thursday hearing was based on purported discrepancies in Nielsen local and national radio data on two programs, Speaking of Sports and Alex Dreier on ABC Radio. Earlier testimony by Robert R. Pauley, ABC Radio president, was recalled by the subcommittee to show discrepancies between Nielsen's local and national surveys (Broadcasting, March 11). Mr. Pauley had cited a 1961 Nielsen station index that showed a Dreier program with 371,000 homes on 218 ABC stations whereas Nielsen's local reports covering 17 ABC stations showed the same program reached 368,206 homes.

Nielsen Tolerance • Nielsen witnesses contended the figure, and another purported discrepancy involving Speaking of Sports, were well within the sample tolerance.

All day Thursday subcommittee members sniper at Nielsen's witnesses on the ground they were giving long, technical explanations dealing with stacks of charts. In turn the witnesses said they were merely stating the methodology behind development of samples used for local and nationwide reports. At one point Chairman Harris said Nielsen witnesses were filibustering.

Main Nielsen witnesses were Mr. Rahmel, Warren Cordell, vice president and chief statistical officer in technical charge; George Blechta, client relations vice president for station services, and John Boesel, client relations vice president for national services.

Mr. Rahmel emphasized that Nielsen, in serving advertisers, agencies, broadcasters and program producers, provides a breadth of information that extends beyond simple audience-size or ratings information. He urged the committee to make a clear distinction between questions concerning commercial broadcasting programming policy and questions dealing with the validity of broadcast audience measurements. His detailed explanation of U.S. Census Bureau 400-home samples brought broad questioning from the subcommittee. He said relatively small samples, properly selected, can provide precise estimates. And he stressed the word estimate is "a term of art in the lexicon of statisticians," subject to recognized sample tolerances that are included in Nielsen reports.

Different ways of obtaining research data were explained by Mr. Rahmel—face-to-face questioning, telephone, telephone or face-to-face recall, diary records and meters. After reviewing the history of the three-decades-old Audimeter, he explained Nielsen's newer Recordimeter-Audilog technique. This is based on a machine that registers when the set is turned on (without specifying stations) augmented by detailed diaries of the home's tuning.

'Conditioned' Homes? • The subcommittee was irked by the technical explanations of charts given by Mr. Cordell, who dealt with methodology. He contended there is no evidence that homes with Nielsen meters are "conditioned" by presence of the devices. Investigating congressmen became involved in the use of don't-answer and busy-signal homes in the base of telephone coincidental surveys conducted by Nielsen for checking purposes. Nielsen's own figures showed extremely close similarities for its own station index and its checkups via telephone coincidentals.

Members of the subcommittee were violently critical of Nielsen witnesses' presentation of a series of charts showing viewing and listening habits during special events and comparisons of audience habits by a series of breakdowns. They said they weren't interested in what Nielsen was selling but rather in the way the material was gathered and processed. "You have showed us many documented uses without determining if the tools of measurement are valid," Rep. Moss said.

Getting down to Audimeter film reports, the subcommittee asked about operation of the Nielsen field staff. Field men make eight calls per year in Audimeter homes, the subcommittee was told, and ways of calibrating meters and trouble-shooting were outlined. Field supervisors do their own checking, too, it was stated.

About 10% of Audimeters don't work or present unusable data, Mr. Rahmel said. When Mr. Cordell submitted a 300-page report on a Nielsen checking study with the observation, "This is an unusual report for us in that it gives everything," Chairman Harris scolded the audience for its laughter.

Robert E. L. Richardson, special subcommittee counsel, entered the questioning late Thursday, asking about bias...
and operation of the field men. He and subcommittee members wondered if a few Audimeter homes could be influenced by outsiders and sharply affect Nielsen data.

Asked about pay for field men, Mr. Rahmel said the average was $600 a month, plus expenses and an auto. Mr. Richardson asked if pay started at $1.25 an hour but Mr. Rahmel said the figure applied to a former contract. Then Mr. Richardson asked if field men were paid according to the amount of usable film received at the Nielsen main office. Mr. Rahmel said this was the case, describing it as based on efficiency.

Could Reports Be Faked? A long colloquy followed on the possibility field men could run test checks and fake an Audimeter report by conducting a fake run in their own homes. Mr. Rahmel conceded the chance of dishonesty but emphasized that checkups are careful. He said 88% to 92% of home tapes are usable.

Other questions deal with the length of time the 1,100-plus meters have been in homes, Mr. Richardson hinting some have been in the same homes since 1947. Mr. Rahmel said there is a 12% turnover in homes having meters. Counsel followed with the hint some people might be willing to pay up to $10,000 to know where meters are located, saying he could show 30 examples where homes have been located.

Rep. Moss confessed he was baffled at the type of people who would allow a Recordimeter in their homes, “buzzing and blinking, all for $1 a week.” He asked “Is this home typical?” Mr. Rahmel said Nielsen has data showing the metered audience is a good cross-section.

Mr. Blechta said Nielsen has matched Audimeter and Recordimeter-Audilog (diary) panels of around 1,100 homes each, plus a national panel and local measurements adding up to 44,000 homes recording reception in over 200 tv and 32 radio markets.

A. C. Nielsen, founder of the firm, and A. C. Nielsen Jr., president, were not present at the hearing.

Criticism Hits Pulse • The testimony of Dr. Sydney Roslow, president of The Pulse Inc., concluded Wednesday with a barrage of sharply critical statements by subcommittee members and a professional statistical consultant.

Chairman Harris told Dr. Roslow that while he didn’t want to be unfair, Pulse’s rating service “appears to me to be a con game.”

Rep. Paul G. Rogers (D-Fla.) said the measurement firm’s record had shown him one of “the most shocking examples that I have seen of supposedly a legitimate business.”

Rep. J. Arthur Younger (R-Calif.) said he was “hopeful” Dr. Roslow would refund money to subscribers for receiving payment “under false pretenses.”

Dr. Herbert Arkin, professor of business statistics at the City College of New York and special consultant to the subcommittee, testified that Pulse uses “highly questionable techniques” and recommended an auditing system be established to provide some control over reliability of rating survey information.

In an opening statement Tuesday, Dr. Roslow said his firm attempts to do a conscientious job. “We do not believe that unfounded charges should be spread on the public record before the business involved is given an opportunity to submit its point of view,” he said.

At the conclusion of his testimony Wednesday, and after he had listened to the subcommittee’s strong criticism, Dr. Roslow was asked by a reporter if he had any comment to refute charges raised about his company. The Pulse president said he had no statement to make.

When Dr. Roslow admitted that Pulse formerly used a weighting process (described as a “trade secret”) which it applied to audience share figures that changed more than 50% from one report to the next, Mr. Richardson charged that the “secret” was merely an arbitrary method which allowed Pulse to adjust figures any way it wanted.

Dr. Roslow said neither the FTC nor
Have you ever heard of our "Party Line"?

We don't want to spoil it by trying to compress the whole story of our "Party Line" program into this brief space.

Suffice it to say here that "Party Line" is a participating program on the most popular TV station anywhere near the great Red River Valley. It is producing big results for some big advertisers. For example, we recently offered a Party Line Pattern Book, at $1 a throw. Result: 14,928 copies!

Ask PGW, will you? They have the whole story of this spectacular program.
"Our contemplation of our own accomplishments during the past twenty years must be tempered by a realization of the importance of the contribution of the stations we represent to our success — not just that they have paid us our commissions, but that they have worked with us, suggested, advised, responded to suggestions and advice. Perhaps our happiest accomplishment is that we have been able to work in effective partnership with able broadcast station managers, to the mutual profit of stations and ourselves. And perhaps our happiest augury for the future is the continuation of this teamwork toward the benefit of the national spot industry."

John Blair — April, 1953

These are the words we used to describe our 20th Anniversary in April, 1953. Now on our 30th Anniversary, it is interesting to me to see that they have just as much meaning today as they did ten years ago.

Ours is a personal service company. We have no factories, no warehouses, no inventories. What we do have are people, capable people, and our success as a Company depends entirely on them.

In looking back over our 30 years of radio and television representation, I feel that we have been exceptionally rewarded by our association with outstanding broadcasting management people. They have worked with us very closely; they have advised us, consulted with us, responded to suggestions and recommendations. In short we have been able to form a working partnership of the greatest effectiveness with each of the stations we represent. As I stated in 1953, this is perhaps our happiest accomplishment.

We have been more than fortunate in the caliber of the people we have attracted to our organization. They are able, dedicated people whose primary interest is to do the best possible job for the stations with which they work.

By far the largest part of the compensation of the Blair salesmen comes from an incentive commission plan which Blair initiated when the Company was formed and which is well known to the industry. To put it plainly, the salesmen earn more as they sell more. Furthermore, each of the salesmen and department heads is a stock holder in the Company. All of the stock is owned by active employees of the Company. It is this type of compensation plan along with Company ownership which creates the enthusiasm and the drive which inevitably result in increased sales and a faster rate of growth and progress for the stations.

It should be noted here that the closeness of the relationship between John Blair and Company and station management is probably greater than that of any other similar business. We take an intense personal interest in the operation of the stations represented and have been instrumental in the development of their businesses. By the same token, the operators take an intense personal interest in the development of our Company.

Many years ago we began to build our service departments and they have now, after 30 years, evolved into a very important function in our total operation. These departments work with stations in research, programming, promotion, public relations and advertising.

However, the service departments have another function — that is, to help the salesmen sell. Every project undertaken by any of the service departments must have a direct effect on sales.

We have always felt that a major effort on the part of this Company should be the creation of new business on an industry-wide basis. To this end, five years ago we created the Blair Group Plan; an entirely new method of selling spot radio, principally to advertisers who had not been users of the medium. The plan has been outstandingly successful and has brought many new advertisers into profitable use of the medium. The details of the Plan are by now well known to the industry. We have implemented it with a complete department, with specialized salesmen, estimators and coordinators to make it an efficient and hard-hitting sales device. In addition, the entire radio organization is intimately concerned with the promotion of the Blair Group Plan. In our opinion this Plan is making a very important contribution to the growth of the spot radio industry, through its exposure of the powerful influence of radio to all key advertisers.

In television, we have developed an important creative sales device in the Test Market Plan, which enables an advertiser to assess accurately the results of a spot television campaign. Literally hundreds of advertisers and agencies have employed this plan with outstanding results and have been encouraged in their use of spot television through it.

As we move into our 31st year, already three major projects which will benefit the entire industry have been announced and are in motion. The first is Radio '63; a compelling demonstration of the effectiveness of spot radio, particularly the Blair Group Plan. The second is a national research study which demonstrates the continuing strength of radio.

Similarly, Blair Television is redoubling its efforts in the special projects department. This department, new to the representative field was created in 1962 to encourage the sale of local programs especially in the field of live public affairs broadcasts on the local level, civic events, of high local interest, sports and other local activities of this general nature. Already considerable interest has been created among important national advertisers because of the strong local interest which is generated in their products. As this interest expands through the efforts of the special projects department, the revenue potential for stations will obviously grow.

In our fourth decade, we are confident that continuing vigorous activity of this nature in the interests of our Company, our represented stations and the industry will be a major factor in keeping broadcasting strong and prosperous. We know that our work in this area will continue to receive the enthusiastic support of the stations we represent as it has in the past, and the mutuality of endeavor among the stations and ourselves will continue at a very high level.

John Blair, President
Pulse method changes detailed by Roslow

Dr. Sydney Roslow, president of The Pulse Inc., last week told a House subcommittee investigating broadcast measurement firms (see page 34) that his company has made "rather significant" changes in its methodology since signing a consent order with the Federal Trade Commission in December (Broadcasting, Jan. 7).

Some of the changes Dr. Roslow described:
- Sample size is reported in detail.
- Control of supervisors by Pulse has been strengthened from a contractual to an employer-employee relationship.
- All interviewing is performed after 6 p.m. This reduces not-at-home experiences and ends heresay reports because more people are at home during evening hours and can describe their own listening habits.
- Interviewers are required to make one revisit to question persons absent on initial visits.
- Questionnaires now list all respondents by sex and age, and all listeners in visited households are included.
- Interviewers are required to check each aided-recall questionnaire to indicate that station program rosters have been shown to interviewees.
- All questionnaires must be initialed by respondents.
- Postcards sent to listed interviewees (as a check on interviewer performance claims) request more information about interviews than in the past.
- Interviewers now are evaluated by their field supervisors.
- The rating firm furnishes supervisors composites of each interviewer's raw data.

the Madow committee had criticized his firm for weighting. Chairman Harris said, "I don't care. I don't like you to tell me that this is a trade secret when you can't even define it."

A comparison of staff tabulations of Pulse interviews in Louisville for November 1961 with published Pulse results for that period showed wide variances in many cases. "It just goes every-which-way," Mr. Richardson said. WLOU Louisville, which features Negro programming, was given half its actual share of audience by Pulse, he said.

Dr. Roslow said the weighting was an "unfortunate policy" and was discarded in June 1962 because it wasn't sophisticated enough for automation.

"You rather amaze me that after 21 years [Pulse was founded in 1941] you had not gained sophistication," Rep. Moss commented.

The subcommittee revealed a failure of Pulse to supervise effectively its sample execution and field work when Mr. Richardson showed that some interviews were being conducted repeatedly in counties in the wrong state.

Clark and Floyd are Indiana counties which, with Jefferson County, Ky., comprise metropolitan Louisville. But investigation disclosed that Pulse has been regularly interviewing people in two Kentucky counties: Winchester (Clark County), located 85 miles from Louisville, and Prestonsburg (Fulton County), about 165 miles from Louisville.

Not only was the interviewing being done in the wrong places, Mr. Richardson said, but Mrs. Hazel Newkirk, Pulse's supervisor in Louisville, has sworn to the subcommittee that she has repeatedly pointed out the apparent error to Pulse headquarters in New York, and furnished maps to illustrate the problem.

"What bothers me is," Dr. Roslow said, "that we're probably doing this in the present survey right now." Later he said the error had been rectified in subsequent reports.

Mr. Richardson charged that Pulse had tried to hire back on Monday night a San Diego supervisor whom Dr. Roslow testified had been fired in September 1961 for being "derelict in the performance of her duties."

Dr. Roslow had revealed the dismissal of Mrs. Mae Dutelle Tuesday in an effort to discredit statements regarding performance of Pulse interviewers disclosed on Monday by Mrs. Fred Rabell, a San Diego fm station owner (see page 44).

When Mr. Richardson said Dr. Roslow's statement about Mrs. Dutelle was not in keeping with efforts by his company to re-employ her, Dr. Roslow said he did not know of "any recruiting activity by his associates."

Mr. Richardson also charged that Pulse had hired its entire field staff in San Diego after it learned subcommittee investigators had talked to them. The timing of these dismissals was a coincidence, Dr. Roslow said. Besides, he said, the then-current supervisor, Mrs. Florence Hovland, "had a heart condition."

Pulse efforts to contact other persons who had talked to the subcommittee set off a verbal row during a mid-day

Both men hotly denied the charges and warned Mr. Plotkin that the subcommittee would be quite deeply upset if any efforts were made to influence witnesses.

Mr. Plotkin said he would try to contact any witness the subcommittee had talked to in an effort to acquaint himself and his client about what the subcommittee had been told.

Since Pulse does not publish information showing margins of statistical variance, Mr. Richardson asked, how can broadcasters and time buyers determine the reliability of Pulse reports?

This would come only in terms of the judgment which a person using a Pulse report might have of a particular market, Dr. Roslow said. Pulse figures can fluctuate as much as 20 to 30% in a stable market, the witness said, but knowledge of station history and programming structures must be considered along with survey statistics.

BBDO is feeding rating figures into computers, Mr. Richardson said. Can computers exercise the kind of personal judgment the witness said was necessary to evaluate ratings? he asked.

Dr. Roslow said he understood the agency uses the computers only as guides for its time buyers.

**Identifying Interviewers** - Careful questioning of Dr. Roslow showed that while his firm tries to keep the identities of its interviewers secret, it is public knowledge that the company is cleared by the National Better Business Bureau and its local offices. Mr. Richardson said that in two of three markets investigated it was learned who the interviewers were because a broadcaster's telephone call elicited the names from local BBB offices.

This is not good, Dr. Roslow said. After admitting that any station following this detective procedure could learn interviewer identities, Dr. Roslow was asked if his interviewers could be influenced.

"People are people," he said.

**'Hyping'** - Since the subcommittee had brought admissions from other rating services that audiences could be artificially inflated ("hyped") through giveaway and stunt promotion programming, Dr. Roslow was asked whether all stations get the same advance notice on when rating surveys are scheduled. Syndicated reports are issued on a regular basis, Dr. Roslow said,
FROM THE FILES OF OUR TRAFFIC DEPARTMENT

August 4, 1947, Iowa-Illinois Gas & Electric Company began its sponsorship of the 8:00 A.M. News. For more than 15 years, this partnership has remained unchanged.

WOC Radio caters to people who buy utility services, appliances, homes, autos, food and clothing. For the most part, our listeners spend paychecks . . . not allowances.

so stations would know about them equally.

Special reports, however, are set up at the request and convenience of clients, he said. Other stations are solicited, but the first client has a generous head start if he intends any "hypoing," it was shown.

Dr. Arkin said Pulse's weighting scheme served as a method for doctoring its figures. He said the company made "casual, if any, checks" on tabulations for its earl punch system, and added that statisticians have an old cautioning phrase, "garbage in, garbage out." Referring to variations in figures Pulse produced for its Negro survey in Louisville, the statistician said such data could not be relied on.

It is "very strongly my opinion," Dr. Arkin concluded, that the ratings services should get together and "police their own business," investigate all of their methods and services, publish what they do and how they do it, and provide an audit to give integrity to their figures. There will invariably be sampling errors, Dr. Arkin said, and he advised the measurement firms not to "mess with fractions." Small samples are not better than nothing, he warned; no survey is better than one built around an insufficient sample.

New Rating in Town • What happens when a rating report hits a two-station radio market which hasn't been rated for several years was detailed by Ross B. Baker, general manager of KCCO Lawton, Okla.

The Pulse Inc. surveyed Lawton for KSWO, that city, in September 1962. Mr. Baker said. Since publication of the report in November, showing KSWO had better than 50% of the audience, and that KCCO ranked fourth behind KSWO and two out-of-town stations, his business has fallen off drastically, he said.

National business was hit first, but now the report has been circulated to local merchants, some of whom have been "questioning their own judgment," he said.

The result has reversed KCCO's billings picture: sales in 1962 were improving over corresponding months in 1961 by better than $1,500, Mr. Baker testified, but have slumped so badly since November that in the first two weeks of this month the station is more than $1,500 dollars behind all of March 1962 sales.

Asked how much audience he thought he really had, the manager said "three times what Pulse shows," and he should be ranked number two, about 5 or 10% behind KSWO.

Mr. Baker told the subcommittee of telephone surveys his own staff has made, and of parking lot checks of auto radio dial settings. These aren't professional surveys, and he wouldn't try to sell time on them, Mr. Baker said, but they have given him a general idea of his station's popularity.

Paints Dark Fm Picture • Broadcasters "live and die by the numbers" [rating points], but trying to exist without them "is a matter of Russian roulette," testified Mrs. Fred Rabell, who with her husband owns KITT (FM) San Diego, Calif.

Mrs. Rabell said KITT's experience with the rating firm is "a rather unfortunate story," but indicative of treatment given most fm stations.

Pulse formerly purported to measure all radio listening, but has admitted, since signing a consent order with the Federal Trade Commission in December (BROADCASTING, Jan. 7), that it lists only subscribers, Mrs. Rabell said.

Fm stations are "locked out" of the big advertising agencies because Pulse refuses to detail fm listening in its syndicated reports, subscribed to by most major agencies, she said. Hooper, which does measure and report fm listening, is frequently ignored by time buyers, she said.

Pinchhitter • Mrs. Rabell testified for her husband, confined to a San Diego hospital with diabetes. He is a former president of the National Assn. of Fm Broadcasters and is currently fm director-at-large of the NAB.

KITT appeared in Pulse reports only in 1960 when it was a subscriber to two consecutive reports, Mrs. Rabell said. After that "we disappeared." The station dropped $10,000 in billings when it was omitted in subsequent Pulse reports, she said, even though Hooper reports indicated the station had a measureable audience. So much unspecified fm audience existed in Pulse reports, according to Mrs. Rabell,
FINE FOR FISH

...but
not for the
radio and television
audience. We know you
agree because we’re talk-
ing about “bait” advertising...
of all kinds...sweet-sounding,
pretty copy with a not-so-pretty hook.
Representing 22,000 of America’s
franchised new-car and truck dealers,
NADA has pledged itself to fight false
and misleading automobile advertising.

"THERE IS MORE CONFLICT WITHIN A SINGLE TROUBLED MIND, THAN IN ALL THE FICTION EVER WRITTEN."

—McKINLEY THOMPSON, M.D., STAFF PSYCHIATRIST, YORK HOSPITAL, LOS ANGELES.
A man with a clarinet and a stammer, goes into fits of violent rage.

A striking blond movie star is loved by everyone—except herself.

These are some of the patients who find their way to the office of Dr. McKinley Thompson, psychiatrist. And these are some of the stories you will see on Breaking Point.

Breaking Point is a new hour-long television drama about the unconscious, uncontrollable, often illogical, self-destructive drives of troubled minds.

And of the help that comes to them through psychiatry.

There are no cliches, no couches, no Viennese accents. Problems are recognized, and the promise given of a brighter future with self-understanding.

Breaking Point, like the Ben Casey show, is produced by Bing Crosby Productions.

With great stars that build audiences. (Paul Richards plays Dr. Thompson. One show stars Oscar Homolka, Scott Marlowe, Sheree North and Millie Perkins.)

And with integrity.

Breaking Point premieres this fall — on ABC Television — along with more than a dozen other new shows.

One's a spectacular series based on a spectacular film (Greatest Show on Earth).

One is 120 minutes of unpredictability (Jerry Lewis Show).

And one show is actually two shows—Arrest & Trial. 45 minutes of chase. (The Arrest). 45 minutes of courtroom action (The Trial).

New shows, new formats and faces, new ideas—all with one thing in common.

Entertainment.

Exciting programming to attract the younger, larger families that we, and you, want to reach.

'BREAKING POINT'
ONE OF THE BIG NEW SHOWS COMING THIS FALL
that there were times when the miscellaneous listening category exceeded the audience share of the highest-rated popular music station in the San Diego market.

Mrs. Rabell told the subcommittee that a Mrs. Maye Dutelle who identified herself (in a sworn statement) as Pulse's former field supervisor for San Diego, told her she had many doubts about the accuracy of reports compiled from interviews she and her workers submitted to the firm.

Mrs. Dutelle told her, Mrs. Rabell testified, that many interviews were conducted in remote rural San Diego communities in report after report. Mrs. Dutelle notified Pulse that it seemed odd to be sending interviewers back into places so often that respondents became irritated, but she said she was instructed to continue the practice.

Mrs. Rabell said she thought some federal intervention was necessary when FM stations faced a "your money or your life" situation.

Balaban's John Box • Subcommittee investigators tried to show that a broadcaster and his assistant had represented to two ratings firms that they had discussed their stations' ratings problems with subcommittee investigators in St. Louis during a February 1962 visit—a month before the investigators reached that city.

John F. Box Jr., executive vice president and managing director of Balaban stations WIL-AM-FM St. Louis and KBOX-AM-FM Dallas, denied that he and his assistant, William T. McKibbin, had made such representations. There must have been some confusion with Federal Trade Commission investigators, Mr. Box suggested.

Mr. Richardson told Mr. Box that this testimony seemed peculiar in light of what the witness had told him and Mr. Sparger March 22, 1962—their first visit to St. Louis. Mr. Box told the subcommittee staff then, Mr. Richardson said, that the FTC investigators had not discussed ratings with Balaban employees.

Mr. Richardson had been referring to letters, phone calls and memoranda from Mr. McKibbin and Mr. Box to W. R. Wyatt of Nielsen and the latter's memorandum to J. K. Churchill, Nielsen vice president in Chicago.

According to a memo, Feb. 19, 1962: "Mr. McKibbin's whole attitude [complaints about Nielsen reports, which the stations had discontinued] centered around the fact that WIL has been involved during the past week with Mr. Sparger and Mr. Richardson of the Harris Committee," Mr. Wyatt wrote his boss.

An Agency View • Given their turn to testify, an advertising agency media executive and a timebuyer insisted that ratings are only a factor among several considered in purchasing time.

But subsequent questioning showed that some of these other factors were based on audience composition and market definition, information which also is supplied by broadcast measurement services.

Miss Mary Lou Ruxton, buyer for Leo Burnett Co., Chicago, said her agency uses Nielsen data "when we can get it," but also accepts Pulse information.

Thomas R. Wright, Burnett media vice president, explained that his agency trains its buyers not to rely on ratings, but to use other factors: station programming, power, audience demographic information, costs and commercial policy.

When buying television time, Mr. Wright said, Burnett gives ratings a "minor" consideration, less than audience share.

Rating reliability, a subject thrown at every media witness, was put to Mr. Wright, who said Burnett left that problem to the agency's vice president for program analysis, Dr. Seymour Banks. Asked if Burnett had ever studied Nielsen's methodology, Mr. Wright said he understood Dr. Banks had said that Nielsen had been "very open" with Dr. Banks.

Determination of which measurement services Burnett uses is up to Dr. Banks, Mr. Wright said.

Mr. Richardson asked the agency executive about statements alluded to him at a conference of advertising executives arranged by Minnesota Mining & Manufacturing Co., MBS and Outdoor Advertising at Wonedoc, Canada in 1961. Mr. Wright said he had probably made statements like the following, which an investigator read from what was described as a transcript of the conference.

On the weight his agency gives to Nielsen radio ratings: "We get it free; it is so valuable. But that is not the only reason for disbelief, believe me, I will tell you the truth, the guys who were taking the Nielsen pocketpiece numbered over 100 in our company. We now have 11 copies. Nobody looks at them. I don't think anybody believes in them."

About the inadequacy of radio ratings: "We know Nielsen can't do the job; Pulse can't do the job. In fact, nobody is doing the job."

Who uses ratings: "It is the supervisor, the associate supervisor, the assistant, the timebuyer, down the line, who is growing in business, who is
learning his lesson. He leans upon this thing. It is the only crutch that he has."

Programming • The subcommittee was curious how the agency was able to keep a check on the programming of 450 television and between 2,500 and 3,000 radio stations with which Burnett deals. Miss Ruxton said the agency maintains information on station programming which is reviewed before each buy.

Since Burnett does not monitor stations but relies on either presentation tapes prepared by the station or programming information provided by the stations, the subcommittee wondered whether it would not be possible that stations furnish samples of their best programming.

Rep. Rogers suggested that if as Mr. Wright had said Burnett time buyers are not required to listen to stations on which they purchase time, then programming “must not be very important.”

He requested program sheets of 10 Florida stations from which Burnett had bought time in the past two months.

Guaranteed Circulation Challenged • The chief advocate of a magazine approach to television—guaranteed circulation—was accused of trying to make the ratings problem worse by requiring more reliance on numbers.

David J. Mahoney, executive vice president of Colgate-Palmolive Co., appeared Monday to recite for the subcommittee a speech outlining his circulation proposals which he had delivered two weeks earlier before a tv workshop of the Assn. of National Advertisers in New York (Broadcasting, March 11).

Chief critic of Mr. Mahoney’s proposal was Rep. Moss. There is no chance to test tv audiences to the exactness guaranteed circulation would require, he told Mr. Mahoney. Instead, the congressman suggested, perhaps networks should tell advertisers candidly that they cannot test, and that “we are charging you this because this is what the traffic will bear.”

Mr. Mahoney maintained that advertisers are entitled to guaranteed circulation because such a system would make the tv networks stand behind ratings.

The Mahoney Plan • Mr. Mahoney explained that his proposal would: “Guarantee audiences so that risks may be more equally shared by networks and advertisers.”

Provide “unbiased research of new shows,” again to balance advertiser risk with the networks.

“Afford greater availability of good regional shows for test-market purposes.”

His plan would depend on a ratings system, Mr. Mahoney said. Colgate-
Palmolive relies on Nielsen, he added. Questioned closely on the importance of ratings to networks and sponsors, Mr. Mahoney acknowledged that networks base their time charges on ratings.

NBC told the subcommittee ratings are only a guide, Mr. Mahoney was told (Broadcasting, March 11). The Colgate vice president said he would think they are more than that. He said they were the principal guide. Pushed a little further on the subject, Mr. Mahoney said he would think ratings are the networks' "basic sales tool."

Seeking from television's ability to deliver mass audiences the same specialization and circulation control obtained from magazines can't work, Rep. Moss said. "You are demanding a standard which at no point has any one been able to come forward and show is attainable," he added.

Mr. Mahoney also said he thought their ownership of all but 12 current programs gave the networks a distinct advantage. "The only advertisers who can sleep well are those few who own controlling interests in successful shows," he said. "They can exert pressure on the networks for choice time periods and other advantages."

The 'Lifeblood' Theme • The first subcommittee witness to speak from the tv performer's viewpoint said Monday (March 18) that the tv networks lean heavily on ratings in making programming decisions. "Your whole life really is based on what happens with these ratings," said Johnny Carson, whose exact same remark made on his program Feb. 11 (The Tonight Show, NBC-TV) interested the subcommittee enough to call him to testify.

"Some performers have lost their jobs on the basis of ratings," Mr. Carson said. Drawing on his own experience, he blamed the demise of two separate programs he did for CBS-TV in the mid-1950's (both titled the Johnny Carson Show) for lack of sufficient rating points to meet competition.

The effect of ratings "is acknowledged now as tremendous," observed Chairman Harris.

Congressmen Rated Too • Told by one congressman that they, too, are rated—"on our votes"—Mr. Carson replied quickly, "Congressmen get a two-year run. Most performers get 39 weeks."

Mr. Carson said he objected to the influence of ratings because, "Ratings as far as I know have no correlation with the quality of a show."

Despite their shortcomings, Mr. Carson admitted, there will have to be some kind of rating system as long as television in the U.S. is commercial and its job is to sell goods.

But, he added, "I don't think loyalty of viewers to a particular commercial message" is shown by ratings.

WARD-TV says solution is dual operation

WARD-TV (ch. 56) Johnstown, Pa., told the FCC last week that for the sake of continued uhf tv in Johnstown the commission should reconsider and grant a ch. 8 drop-in to that city.

The Johnstown uhf operation urged that the commission allow the station to operate ch. 8 along with ch. 56. WARD-TV said that the surrounding terrain, with its mountains and deep recesses, is an obstacle to uhf propagation and does not let it compete with the area's two vhf stations.

WARD-TV has been in operation since the fall of 1953, the station pointed out, as a CBS-ABC affiliate. It competes with WJAC-TV (ch. 6) Johnstown, an ABC-ABC affiliate, owned by Johnstown's only daily newspaper (Johnstown Tribune); and WFGB-TV (ch. 10) Altoona, an ABC-CBS affiliate owned by the Philadelphia Inquirer.

As a result of this competition and WARD-TV's propagation problems the station said it has suffered a very low income. WARD-TV told the commission that a dual vhf-uhf operation would allow the vhf to carry the financial load of the uhf. and is the only solution for continued uhf operation.

ABC last week told the FCC that it supported petitions by Springfield Tv Broadcasting Corp. and Taft Broadcasting Co. for allocation of a uhf channel to Dayton, however, only so that it could be used as a ch. 11 drop-in there. This would allow a dual vhf-uhf operation, such as ABC proposed two weeks ago (Broadcasting, March 18) in asking reconsideration of the FCC's drop-in decision. ABC said it opposed the allocation of the uhf channel only, such as Springfield and Taft requested.

The FCC last week...

- Received application from KTVB (TV) Boise, Idaho, for ch. 13 at La Grande, Ore. The proposed station would have a power of 12.9 kw and be operated as a satellite of KTVB.

- Received application from Integrated Communications Systems Inc. of Massachusetts for uhf ch. 44 in Boston. The station will have a power of 512.9 kw.

- Granted a new noncommercial educational tv station on uhf ch. 42 in Charlotte to The Charlotte-Mecklenburg Bd. of Education. The station will have a power of 233 kw.
RATE YOUR PERSONALITY
Make the deejay ratings test. Call ten (20 or 30 etc.) local phone numbers at random. Ask respondents if they can recognize names of any air personalities on the staff of your competitor. Prompt them with names. Then try your own air names. THEN TRY DICK CLARK! We tried it in three markets and got 12% average recognition among all local radio personalities. DICK CLARK—87%. That means RATINGS! Find out about Dick Clark's phenomenal RADIO ratings. Find out about fabulous sales figures. Hear the local sound of the DICK CLARK radio show. It's big, star-studded, tight, happy—and local. It's you at your very best. Don't buy "syndicated." HIRE DICK CLARK. He's available and reasonable.
Write, wire, call MARS BROADCASTING, INC., 575 Hope Street, Stamford, Conn. (203) 327-2700. See Mars and Clark at the NAB Convention, Suite 1518A, Conrad Hilton.
Two busy years with Newton N. Minow

MOST POLICIES HE USED WERE THERE BEFORE HIM, BUT HE GETS CREDIT

There will be no broadcaster in Chicago for the NAB convention beginning next week who will not recognize Newton N. Minow on sight.

He is the same Newton N. Minow who after two months as chairman of the FCC called tv programming a "vast wasteland" at the 1961 NAB convention in Washington.

He is the same man who, at the 1962 NAB convention in Chicago, said that radio too often is "a bazaar, a clamorous casbah of pitchmen and commercials which plead, beat, pressure, whistle, groan and shout" with "incredibly bad" programming.

Under the New Frontier's two years of leadership at the FCC, broadcasting has been threatened, harassed, cajoled, ridiculed and many, many, believe censored in violation of the U. S. Constitution and the Communications Act.

Next week, Mr. Minow will probably address his last NAB convention as chairman of the FCC. He has not denied the Feb. 11, 1963, BROADCASTING report that he has informed the President of his intentions to resign this spring.

The Record • A close study of the FCC's record over the past two years discloses that practically all of the stricter FCC policies of regulation—except in the areas many believe approach censorship—were instituted before Newton N. Minow.

Mr. Minow, however, quickly embraced the toughened FCC policies adopted prior to his arrival (see below)

Collins, Minow: togetherness on tv

NAB'S PRESIDENT THINKS MAGAZINE CONCEPT HAS 'GREAT APPEAL'

LeRoy Collins, NAB president, came out last week for the magazine concept in television and said the idea of clustering commercials to avoid program breaks "has great appeal to me."

Gov. Collins's latest recommendations for revisions in industry practices were made during a television appearance with Newton N. Minow, FCC chairman. The two engaged in an informal conversation on A Moment With, . . . a half-hour program taped last Tuesday for later broadcast on WRC-TV Washington and perhaps on other NBC owned and operated stations if they decide to clear time. The program was done without script, although Messrs. Minow and Collins conferred beforehand.

The magazine concept was one of several subjects that were amiably discussed.

Both Messrs. Minow and Collins spoke warmly, and at some length, about the late Eleanor Roosevelt (Mr. Minow had brought along a picture of his three children and Mrs. Roosevelt; Gov. Collins recalled her as "a wonderful friend" and, at Mr. Minow's prompting, related some of his experiences as chairman of the 1960 Democratic national convention at which Mrs. Roosevelt's appearance set up exuberant demonstrations).

Both reflected (each at the prompting of the other) on achievements during the two years that Mr. Minow has been chairman of the FCC and Gov. Collins head of the NAB, and

both agreed that although each job has presented some frustrations, progress has definitely been made.

Mr. Minow complimented Gov. Collins' on his efforts to gain access for broadcasters to cover House committee hearings. The House Rules Committee buried the proposal the day after the program was taped.

Clustered Spots • The magazine concept for television came up when Gov. Collins asked Mr. Minow to tell about his recent trip to Geneva, for international conferences, and to London to inspect the BBC and the British commercial television system. Mr. Minow explained that the commercial system in England prohibits sponsorship of programs. It sells spot commercials that are "run together, perhaps six at a time, at the beginning or at the end of a program."

As Mr. Minow explained it: "In the middle of a serious thing you don't get an anti-acid commercial. Many people think that this system ought to be adopted here."

Gov. Collins joined in: "In other words, that will improve the art, so to speak, because you won't have a mood that is developed by serious drama interrupted by a commercial, say, dealing with rat poison or dog food or something that would be a clash with the mood created by the drama, and so it would be improvement for art's sake."

Mr. Minow pointed out that there were arguments for and against the adoption of the magazine concept in American tv. To eliminate sponsor identification with programs might discourage programs like the specials sponsored by Hallmark cards.

"I know Mr. Hall [Joyce Hall, head of Hallmark]," said Gov. Collins, "and I think he makes a great contribution to television . . . but it would seem to me that some type of arrangement could be worked out that would still allow for that but still would provide so-called magazine concept at the same time."

Gov. Collins added: "The big advantage, aside from the art, is the fact that it would relieve the broadcaster from the pressure of sponsors and their fears and concerns about people who don't like the particular program taking it out on their product, and that sort of thing."

To Each Its Own • Mr. Minow pointed out that the British television system differed in several respects from American tv. He added: "I, as you know, have occasionally been critical of American broadcasting, but I'd say that certainly our system need not be ashamed when it's stacked up with what else is going on around the world."

In answer to a cue from Gov. Collins, Mr. Minow said he was "encouraged" by progress made during his administration. Three developments he mentioned were space communications, educational television and congressional enactment of the law that will require all tv sets to receive both vhf and uhf signals.

In answer to a cue from Mr. Minow, Gov. Collins said of his
and is generally given the credit for much that has transpired. The chairman has been highly effective in spotting key people throughout the commission staff who think like him. In some instances where the FCC has rejected a Minow viewpoint, individual staffers have nevertheless acted as if it were policy.

A case in point is an FCC letter to a midwestern tv station asking why it had dropped CBS Reports and what it programmed in the same time period. Chairman Minow had wanted such questions included in the program reporting form; the commission had rejected this idea but the letter went out anyway.

The lead story in the April 10, 1961, issue of Broadcasting (nearly a month before the vast wasteland speech) pointed out that a “new regulatory wind is reaching tornado proportions in Washington and it could be an ill wind for many broadcast licenses.”

A reappraisal of performance standards to be required of licensees at renewal time was then taking place on the staff level, the article pointed out. This was one month after the new Commissioner Kenneth Cox became chief of the Broadcast Bureau.

Chairman Minow termed the new attitude a “vigorous application of the law.” Freedom of speech, he has said, should not be confused with freedom to break promises to exploit a public trust—a broadcast license. But the staff did not stop with holding a station to its promises.

Ill-fated Drive * In a campaign begun last spring, the FCC’s Broadcast Bureau started, on its own, to defer renewal applications of tv stations which did not promise regularly scheduled, local, live, public service programs in prime time. This situation was first brought to the attention of a majority of the FCC members in a Dec. 3, 1962, Broadcasting article. The story highlighted the experiences of WKY-TV Oklahoma City in (1) its bid for a renewal and (2) application for approval of the purchase of KVT (TV) Ft. Worth-Dallas.

The same article disclosed that the staff had asked the FCC to defer the licenses of some 100 California stations for alleged programming deficiencies.

As a result, the full FCC reviewed the authority it had delegated to the staff and took these actions: (1) Ordered WKY-TV renewed and (2) two weeks ago, ordered renewed the licenses of tv stations, which had been deferred by the staff, without regard for prime time, local public service programming (Broadcasting, March 18).

This latter action was taken on a 5-2 vote, with dissents by Chairman Minow and Commissioner E. William Henry. Since that action, a third Kennedy appointee—Mr. Cox—has replaced Commissioner T. A. M. Craven.

But even with Commissioner Cox now having a vote, the New Frontier still needs one more to make its position stick that the FCC can force tv stations to schedule certain programs during given time periods. And, with Mr. Minow scheduled to leave the FCC soon, the minority position will be weakened rather than strengthened.

Barring unexpected circumstances, four Kennedy appointees will not serve at one time on the FCC until June 30, 1964—when Commissioner Frederick W. Ford’s term expires. There now are three—Messrs. Minow, Henry and Cox—with a fourth New Frontier appointment to succeed Chairman Minow.

Dark Days * The FCC’s more leisurely attitude toward license renewals actually began in 1959 with the rigged quiz show and payola disclosures by Congress and subsequent legislation. Then, late that year, the FCC adopted anti-payola rules and quizzed all broadcast licensees on payola practices.

In March 1960, Commissioner Ford succeeded John Doerfer as chairman and (1) established the FCC’s Office on Complaints & Compliance and (2) started working on what Commissioner Ford terms the “magna carta” of broadcasting—The July 29, 1960, program policy statement. Commissioner Rosel Hyde dissented to this statement, maintaining that under it the FCC restricts competition and discourages programming changes and innovations.

Congress, in September 1960, passed
legislation permitting the FCC to fine stations for rules violations and to issue licenses for less than three years. The commission also had asked for authority to order a violator off the air temporarily but the Senate removed this provision from a House passed bill.

The FCC then adopted its own rules covering short term renewals (effective in December 1960) and fines (effective the following Feb. 13). The agency wasted no time in using the new power—five stations owned by Richard Eaton received short term renewals the same month and KDWB Minneapolis-St. Paul was fined in March 1961, two weeks after Chairman Minow joined the FCC.

Then KORD • Although the chairman was not around when the FCC began moving toward its promise vs. performance policy statement, he cast the deciding vote in ordering a renewal hearing for KORD Pasco, Wash., on programming representations. This action, on a 4-3 vote, came at the FCC's March 23, 1961, meeting, three weeks after the New Frontier took over at the commission.

Four months later, the FCC granted KORD a one-year license and at the same time wrote all licensees that they would be expected to live up to program representations. In program sanctions since then, the FCC nearly always quotes either the 1960 policy statement or the KORD decision, or both.

In adopting the 1960 statement, the FCC expressly rejected the contention that it has the authority to require licensees to broadcast specific types of programs within specific time periods—the very action the staff was attempting in the tv renewal cases above. "With respect to this proposition, we are constrained to point out that the First Amendment forbids governmental interference," the FCC said in its program policy statement.

One of the FCC members who approved the policy statement had this in mind when he said of the disclosure on staff letters to tv stations because they were not regularly scheduling public service in prime time: "You caught us in outright censorship.

Fear with Club • When Mr. Minow became chairman of the FCC in March 1961, an administration source who refused to be identified said that "quality" programming in ever-increasing doses will be given the public through "fear, the moral persuasion technique and with an obvious club over the broadcaster's head." And, just three weeks ago, Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, criticized Chairman Minow for the "real hammer" the FCC is wielding over the heads of broadcasters in renewal matters (Broadcasting, March 11).

The NAB has been strangely silent over the efforts of the FCC staff to force tv stations to alter their prime time program schedules to include local, live public service. No public statement on the subject has been made by the NAB or its president, LeRoy Collins, even though five of the seven commissioners themselves have publicly rebuked the commission staff.

In his confirmation hearing before the Senate, Mr. Minow promised that as FCC chairman he would improve programming. He said that he would do this through the power the FCC has in withholding or granting a station's license renewal.

In another move toward a closer check of licensee's programming, the FCC has been trying to adopt new program reporting forms since February 1961. Two separate proposals have been released for industry comment and a third is on the way.

Again, Commissioner Ford was the prime mover in this tightening move —started before his successor as chairman joined the commission.

The Headliners • Many FCC sanctions have been taken against stations for programming matters which have received wide publicity—and a large portion of these actions were begun under the chairmanship of Mr. Ford. He agreed with the majority that the staff had gone too far in trying to withhold tv renewals. Mr. Minow was sworn in as a member and chairman of the FCC March 2, 1961, succeeding then Chairman Ford.

The present chairman has been in on the "kill" in many instances but played no role in original actions which placed licenses in jeopardy. For instance, the ex parte cases, which had either been decided or set for rehearing before Minow.

The KRLA Los Angeles license renewal hearing for programming and other violations was ordered in 1960, as was the KWK St. Louis revocation proceeding, again on programming. The KWK case is still pending while the FCC refused to renew KRLA, which has appealed to the court.

WDKD Kingstree, S. C., was placed on the carpet in March 1961, at the second FCC meeting presided over by Chairman Minow. A WDKD disc jockey was charged with making "coarse, vulgar, suggestive" remarks over the air and the license, with lack of candor and misrepresentations to the FCC. This case, too, is now in the courts. The first FCC fine came a week later—the chairman's third meeting—levied against KDWB Minneapolis-St. Paul for non-programming violations. Mr. Minow was not around when the

first short-term licenses were issued although it must be admitted that he has pursued with vigor both types of sanctions—short-term licenses and fines.

Many fines, short-term licenses, renewal hearings and revocations have followed—many of which now are outstanding before the FCC. In these and other actions, the chairman has played a leading role.

For example, there is the FCC's Suburban decision under which broadcasters are required to survey local program needs in submitting an application for renewal. This case was decided in July 1961 and has since been upheld by the U. S. Supreme Court. It involved an application by Suburban Broadcasters for a new fm station in Elizabeth, N. J., which was denied on a 4-2 vote because no effort had been made to determine local programming needs.

One of the chairman's first actions, in April 1961, was to instigate an inquiry to determine how a vhf channel in New York and Los Angeles could be assigned to educational tv. At that time, all seven vhf channels in each city were occupied by commercial stations and it came at a time when WNTA-TV New York was trying to sell. As a result, and with the active participation of the chairman's office, WNTA-TV (ch. 13) was sold to educators at a lower price than commercial interests offered.

There are many things the chairman has publicly advocated—mostly repugnant to broadcasters—which he has not been able to accomplish. Among these are license fees, the magazine concept of advertising, required free time for political candidates, network regulation, restriction of newspaper ownership in non-competitive situations, FCC adopting of the NAB codes on commercial time standards and relaxation of the rules to permit educational tv stations to collect revenues for the sale of time.

Powers Denied • Two attempts have been made to secure additional powers for the FCC chairman, who has often expressed frustration at his inability to get things done because of (1) due process and (2) the equal status of all seven commissioners. In May 1961, the week of the vast wasteland speech, President Kennedy sent to Congress a reorganization plan for the FCC which critics maintained would have made the chairman a "czar." It was vetoed by Congress without much delay.

A year later, a private management study financed by the government recommended that the FCC "take the crucial step of making its chairman chief executive officer in fact as well as name." While the FCC has approved many of the recommendations in this report, it has stoutly refused to relinquish powers from the seven to the one.

One Accomplishment • The well-publicized statements of Chairman Minow have been directly responsible for a huge increase in the number of complaints filed with the FCC. For the fiscal year ending last June 30, the commission received over 12,000 letters complaining about radio and tv, "a substantial increase over the previous year.

As might be expected, dislike of specific programs brought by far the largest number of complaints—35%. The chairman has repeatedly urged the public to make such complaints to the FCC. This, over the silent objections of other members who say such letters just clog the FCC's overburdened staff since the agency is expressly forbidden from reviewing individual programs.

Eight months after his vast wasteland speech, Chairman Minow outlined his philosophy in a speech before the San Francisco Commonwealth Club. "Those of us at the FCC have a right to freedom of expression," he said. "I will continue to speak out, to nudge, to exhort, to urge..." better programming.

Cries of censorship, he charged, are false cries. "If there are not examples of censorship, I suggest that broadcasters stop defending against an enemy who is not there," he challenged.

Five of his colleagues on the FCC, members of Congress and most Washington attorneys in communications practice now are pointing to the WKY-TV renewal as a clear example of attempted censorship—not by the commission itself but by the FCC staff with the endorsement of the Kennedy-appointed members.

As the chief regulator of the radio-television industry, Chairman Minow has been in the public spotlight as no other chairman in history. He has far outshone many much higher ranking government officials in commanding press coverage.

He has traveled from coast to coast making speeches—often about how tv programming must be improved and how he proposes to do it. The 37-year-old Chicago attorney has been given credit for all that is good on television.

And, for all that is bad, he asks the public to come to him for salvation.

Most comments oppose FCC's fm allocations

CRITICIZE OMISION OF MANY COMMUNITIES FROM PLAN

The FCC last week was warned that its proposed table of fm allocations may leave some communities without an fm service, while facilities in others may lie unused.

This was the tone of comments by the Asgn. of Federal Communications Consulting Engineers, Fm Unlimited Inc, and more than 150 others in comments received at the commission last week.

The allocations table for the 80 commercial fm channels in the U. S. proposes to make 2,730 fm assignments to specific cities within the continental limits of the U. S., and was the final step in the FCC's plans to revamp fm (Broadcasting, Dec. 24, 1962).

The AFCCE told the commission that it opposes a table of assignments based on a minimum mileage separation, which assumes that all stations will operate with maximum power and antenna height. The engineers did agree, however, with the establishment of new classes of stations, zones and maximum power limitations. Fm Unlimited asked the commission why the agency felt that the presently proposed table would work in view of the failure of the 1946 tentative table of assignments, which was dropped in 1958.

The AFCCE recommended that the FCC adopt a "go-no-go system" for making allocations. The association suggested that the 1 mw/na contour be protected, and that all contours be determined by the use of propagation curves. This go-no-go plan had pre-

viously been urged by NAB (Broadcasting, Feb. 18) which felt that the proposed table is too rigid.

Protected Contour • AFCCE said that "both day and night [fm] is comparable to am daytime service." The association reminded the commission of the achievements in am service in reducing areas not having their own primary service, from 29.8% in 1940, to 0.3% in 1960, when the protected contour concept was used for making assignments. AFCCE credited the NAB's study of am growth problems with the above information which was presented to the FCC last Jan. 7 (Broadcasting, Jan. 14).

"This is substantial evidence that by use of a protected contour concept of allocation, the objectives of providing service to the people of the U. S. can well be achieved. It permitted the growth of the [am] service as the population and demand for service increased," AFCCE said.

The objectives of the commission in providing fm service to the country will not be achieved by the proposed table of allocations "simply because the mileage separation system and the table of assignments precludes more than one service to many communities, and thereby seriously limits the possible expansion of multiple fm service," AFCCE said.

Fm On The March • AFCCE added that fm provides a greater potential for a nationwide nighttime radio service than does am, due to the physical nature of the service. Fm Unlimited said "Fm is destined to replace am as the basic radio service," and is the means of local community expression.

AFCCE said that the addition of a new fm channel to the table of assignments indicates that the commission has determined where the population growth will occur, and where the need for a facility will develop. AFCCE said that it was unaware that such a study of population had been made.

"The actual fact," the association said, is that the assignments were made where they would "fit" separation requirements set forth in the rulemaking.

Five Year Plan • AFCCE told the FCC that one way the commission could limit concentration of fm channels in larger cities would be to place a limit on the number of assignments, basing that number on the city's population. This limit could be effective for a five year period with the FCC having the option to extend it for an additional five years. AFCCE added that this type of limitation could be applicable "to a protected contour system of allocation."

AFCCE said that the faults in the distribution of all types of broadcast facilities are twofold. First is the problem of meeting the necessary co-channel separation, and secondly that new assignments are based on locations of the existing stations as a nucleus.

The commission's objective of having nighttime fm supplement the daytime am service has not been met by the proposed allocations table, according to AFCCE. The association noted that in Georgia there are 52 communities with daytime only am stations that have not been given any fm channel. "The need for nighttime primary aural service cannot be met with am frequencies."

Fm Unlimited agreed and told the commission that the table proposed much misallocation of channels. It told the commission that fm is not a supplemental service for am, and feels that 4,000 to 5,000 fm outlets should be established across the country. Fm Unlimited said don't "force fm to go through the same tortuous muddle" that vhf television has gone through.

AFCCE told the FCC that as much of the population of the U. S. as is possible should be allocated two fm facilities. Yet, AFCCE said, under the proposed table it would seem that some communities are without hope for even one fm service.

This was also the view held by the majority of the mass of comments filed last week—that their particular communities would not be given fm channel assignments, or that their one channel did not provide for future needs.

Advisory Committee • Fm Unlimited urged that an Fm Standards Committee be formed. The committee could be recruited from fm broadcasters, technical people and others well acquainted with the fm industry.

The committee could re-evaluate fm's state of being, and formulate a "realistic set of standards that relate existing conditions with future developments, based on practical rather than theoretical ideals." Such a committee could arrive at a workable solution within three months, Fm Unlimited said, adding, people working in the fm industry know the industry best and can best serve the public in its development.

Fm Unlimited also suggested that the classes of fm services be expanded from three to six classes, which would provide for better future development.

CBS and NBC filed comments supporting the commission's proposed table. CBS upheld the mileage separation theory, but on a go-no-go basis. NBC said the table "should diminish considerably the difficulties and delays inherent in many alternative methods of assignment."

BROADCASTING, March 25, 1963
Sale's successes build film's market

PATTERNS CHANGE BUT SPONSOR DEMAND FOR PRODUCT CONTINUES

It's the sales success enjoyed by advertisers that is building present demand for syndicated and feature film product.

This is certain whether properties are first-run motion pictures, off-network programs, cartoons or one of the many other program categories which are offered in abundance by syndicators.

For the advertiser, the syndicated program, if selected and scheduled with care, can be an effective vehicle. This applies to all sponsors no matter whether their distribution patterns are national, regional or local in character.

As syndication business has changed and become more flexible in what it offers the advertiser, he in turn has had to learn how to employ the syndicated product in different ways.

Changing Patterns • The pattern of advertiser purchases has changed over the past five or six years. Where buyers were once predominantly big regional distributors who bought a series of programs for use throughout their territories, today the majority of sales are on a one-minute participation basis. But this system has its advantages in added flexibility and syndicated properties are continuing to prove their advantages as spot carriers.

Although big regional sponsorships have diminished there are still many of them. Some of their success stories have been outlined below.

Advertiser experience with syndication provides additional sales successes for the already stuffed portfolio of the television medium.

An off-network western drama boosts chain-saw sales for one advertiser who now looks to it to perform equally well for its outboard motor company.

A cartoon series sells potato chips at a better clip, and in a special promotion moves more loaves of bread from company to consumer.

Symphony concerts not only appeal to audiences but to advertisers. Banks, savings and loan firms and utilities like them as image builders.

Food product advertisers are among those tasting success with syndicated programs—a canned beef advertiser and a national canned tuna company, for example, find them to be natural aids to distribution demands.

The following stories of advertiser success are typical.

'Ripcord' Wins Renewal • The proof of the value of syndicated series to an advertiser, particularly a regional advertiser, lies in the all-important renewal. Recently, the United Artists Television half-hour series, Ripcord, completed its first-year run for California Oil Co., Western Division, in eight southwestern markets—and the client promptly renewed!

California Oil's satisfaction with Ripcord is especially heartwarming to UA TV in these days when regional advertisers, once the backbone of the syndication business, have virtually disappeared from the scene. Full sponsorship of Ripcord by California Oil is on KBRC-TV Abilene, KVII (TV) Amarillo, KROD-TV El Paso, KCBD-TV Lubbock, KOSA-TV Midland-Odessa, and KSYD-TV Wichita Falls, all Texas, and KOB-TV Albuquerque and KSWS-TV Roswell, both New Mexico.

Jack W. Snapp, media director of White & Shuford, Denver, which placed the order for California Oil, reported that the first-year Ripcord was bought because it was felt that the series would have audience appeal and would lend itself to effective merchandising. He said the results were satisfactory on both counts.

He noted that the series, centering around the exploits of sky divers, lent itself to such promotional efforts as skydiving contests and exhibits, local contests and unique displays. He added that audience appeal proved high, and, in many instances, Ripcord out-rated network programs. He said ratings have been ranging from mid-20's to the 30's.

The decision to renew the series, Mr. Snapp said, was prompted by the substantial ratings, station approval and merchandising-promotional opportunities.

Bridge Sells Van Lines • “We feel that Championship Bridge has definitely accomplished its objective for North American Van Lines in its first two years.”

This summation of a syndicated show's effectiveness comes from a company which five years ago could not find a tv program which would, in its opinion, reach the specialized audience it needed to sell its service.

North American's sales have increased 11.7% from 1961 to 1962, according to a company spokesman, who added that “since the major portion of our advertising dollar goes into Championship Bridge, it deserves a lot of credit.”

And in 1963, after only two months, sales had risen 14.5% during the period as compared to a year ago, he added.

In the past, North American's problems in finding a tv show stemmed from the fact that it had to reach a highly specialized audience—the moving American. “We just couldn't find such a concentrated audience in any one tv program.”

Then Walter Schwimmer Inc., Chicago, began syndicating Championship Bridge. North American did some research and found that bridge players had much in common with mobile groups—age between 25 and 44 years; occupation salesman or executive type; and a family man having one or more children.

Hoping to reach an estimated four million viewers, North American bought the show, and after two years on the air found that its original estimate had in actuality more than doubled.

Additional research of a sampling of 3,000 people from 10 metropolitan areas revealed that of those holding down "prestige jobs," 34.2% watched Championship Bridge and of this group, 77.2% had been moved by a van line during the past ten years. A connection was also seen between salaries and viewers, with the higher income brackets holding the greatest percentage of viewers.

When asked if they would consider North American in their next move, 41.3% in the viewer group answered...
SALE'S SUCCESSES BUILD FILM'S MARKET continued

affirmatively, as compared to 15.7% in the non-viewer group.

Rinks Buys 'Maverick' • The trend in film syndication these days is one of selling films directly to stations, rather than to regional or national advertisers.

Among the notable exceptions to this trend has occurred in Ohio, where Rinks Bargain City has purchased the Maverick series from Warner Bros. for presentation on three Ohio stations.

Rinks Bargain City, through its Cincinnati agency, Cye Landy Advertising, is currently beaming the Maverick show over WCPQ-TV Cincinnati, WIMA-TV Lima and WHIZ-TV Zanesville. Reports from Warner's midwestern sales manager indicate that both client and agency are doing quite well, and are happy with the unique arrangement.

In fact, according to a Cye Landy official, one out of every four people who come into Rinks Bargain City in Cincinnati comments on having seen the company's commercials on the Maverick show.

Savings & Loan Symphony • A syndicated program need not be of mass-appeal in order to attract audiences and sponsors. Seven Arts Assoc. points to its series of 13 Boston Symphony Specials (one-hour programs), now sold in 32 markets and attracting substantial advertiser support, to prove the thesis there is a substantial minority audience for television.

The specials are regarded as a "prestige" vehicle, suited particularly to the needs of institutional advertisers and banks who have been highly active. The series has garnered 10 banks and savings and loan associations as sponsors.

An unusual commercial success story revolves around the Home Federal Savings & Loan Assn., Columbia, S. C., which is sponsoring the Boston Symphony series on WIS-TV in that city. Company officials recounted that a tourist couple, on a weekend visit to their son who is attending a Columbia, S. C., school, saw a recent symphony telecast on a set in their motel room. They were so impressed with the program and had such a warm feeling for the advertiser that they opened a $10,000 savings account with Home Federal Savings & Loan Assn. the following morning.

Bunker Hill Likes 'Shannon' • Beefing up the sales of Bunker Hill Canned Beef products was a task given to television. The vehicle: Screen Gems' Shannon action adventure series. The result: a big increase in beef-eaters in 12 Southern markets.

Sales manager of the Bedford, Va., firm, Joseph Valiant, had this to say about the tv venture: "A 19% sales increase of Bunker Hill Canned Beef products during the first quarter of

1962 resulted solely from sponsorship of a half-hour, first-run syndicated adventure series...." [Shannon].

Mr. Valiant points out that all of the company's advertising in other media remained unchanged before, during and after the sponsorship of Shannon so the first-quarter sales jump "must logically be attributed to [that] series."

Bunker Hill had been in television before, explains Mr. Valiant. "We've been spending most of our advertising budget in television for the past 10 years, telecasting everything from hillbilly bands to The Cisco Kid." The company began carrying Shannon on WSB-TV Atlanta and within three months was using the vehicle in 11 other markets: WFMY-TV Greensboro, N. C.; WXEX-TV Richmond; WRAL-TV Raleigh, N. C.; WDBJ-TV Roanoke, Va.; WSOCTV Charlotte, N. C.; WTAR-TV Norfolk, Va.; WIS-TV Columbia, S. C.; WCJB-TV Bristol, Va.; WHIS-TV Bluefield, W. Va.; WFBC-TV Greenville, S. C.; and WITN (TV) Washington, N. C.

McCulloch Goes With 'Deputy' • McCulloch Motors Inc., Los Angeles, whose chain-saw division is currently sponsoring NBC Films' The Deputy in 130 markets around the country, has picked up the option on the show and will advertise its Scott Outboard Motors in about 75 markets for another 13 weeks. The campaign for Scott will begin in mid-April.

According to a spokesman from McCulloch's agency, Fuller & Smith & Ross Inc., Los Angeles, sponsorship of The Deputy "is doing everything we expected it to and much more." The spokesman added that chain-saw sales are up over the industry's rate of sale.

McCulloch is a second-year customer of NBC Films: The advertiser sponsored the syndicator's Royal Canadian Mounted Police for 26 weeks last year, in approximately 100 markets.

McCulloch went into tv because its chain saws "should be demonstrated" to the potential buyer. A spokesman said McCulloch wants to reach, among others, the "casual user"-the homeowner that wants to cut down a tree in his yard; the overnight camper.

The spokesman noted that tv advertising for McCulloch's chain saws "has done something for the industry." Not many people, he said, are familiar with the product, and McCulloch's tv usage may have helped to acquaint the public.

In addition to its tv usage, McCulloch advertises in radio and in print.

Bread and 'Bozo' • In September, 1962, WAST-TV Albany, N. Y., inaugurated a live Bozo the Clown program, syndicated by Jayark Films Inc., with Betty Lou bread as sponsor.

According to a report from Jayark, the station combined a program promotion with a promotion for the advertiser, by using specially imprinted "Bozo" balloons as a give-away to the children in the studio audience. WAST-TV was, up to now, sending 6,000 balloons with the imprint "It tastes better with Betty Lou Bread."

In addition, the station has ordered about 100 gros of the "Bozo" walking doll as a premium item for the sponsor.

The animated Bozo the Clown library, which has been on the air for four years, has been sold in over 200 markets.

'Biography' for Utility • Pacific Gas & Electric Co., San Francisco, seeking entertainment and prestige values in a television program, is cooking with gas and electricity in its sponsorship of Official Films Inc.'s half-hour actuality series, Biography, in seven California markets.

The stations are KRON-TV San Francisco, KERO-TV Bakersfield, KHS-L-TV Chico-Redding, KIEM-TV Eureka, KFRE-TV Fresno, KSB-WTV Salinas-Monterey-San Jose and KSBY-TV San Luis Obispo-Santa Barbara.

"For an institution like ours, which is more interested in image than product, we find it refreshing to discover that viewers write in and say they like the show for its entertainment and prestige values plus the quality of the production," comments A. James McCollum, PG&E advertising and publicity manager.

Mr. McCollum calls Biography an all-family show, with children and their parents viewing the program together. As a result, Biography has garnered consistently high ratings, which, Mr. McCollum says, means a substantial

and responsive audience for the company’s commercials, which are both institutional and sales messages. The institutional announcements are themed to dramatic evidences of PG&E’s engineering enterprises, such as atomic electricity development and the stringing of lines by helicopter. Sales messages are directed toward expanding the use of gas and electrical appliances. The agency for PG&E is BBDO, San Francisco.

PG&E makes available prints of the series to schools and considers this service of value both to the advertiser and the children and teachers.

**Popeye Promotion** • Advertisers often use syndicated cartoon shows for special local promotions.

A “toy sweepstakes” by Millbrook Bread is one current example of such a promotion, which is drawing successful results on “The Good Ship Popeye,” over WTEN (TV) Albany, N. Y., a children’s show built around King Features Syndicate’s Popeye cartoons.

To enter the sweepstakes, listeners of the program were asked to visit the Millbrook shelf display at the supermarket and pick up entry blanks. Although they were not required to do so, the young Popeye fans were also asked to send an end wrapper from a Millbrook loaf along with the entry blank.

Over 3,000 entries were reported sent during the first five weeks of the eight-week promotion. And 99% of the entries were accompanied by the Millbrook end wrapper.

WTEN (TV) reported that the Millbrook promotion drew more mail than any previous promotion tied in with a visit to the sponsor’s point of purchase.

**Lay’s Likes Cartoons** • Frito-Lay Inc.’s Lay’s potato chips sales in Southwestern markets have climbed 15% annually over the last two years, a growth directly correlated to the company’s use of television. Frito Lay picked up CBS Films’ cartoon series, *Deputy Dawg*, as the vehicle to carry its Lay’s message in 1961, got unexpected mileage out of it, and continued sponsorship of the show through 1962.

Paul Patterson, account executive for Lay’s potato chips at Liller, Neal, Battle & Lindsey, Atlanta, explains that the cartoon series is especially suited to the promotion of premium offers. Lay conducted 11 “special-offer” marketing schemes in 1961 and ’62.

Mr. Patterson reports that sales of Lay’s Twins package (two for one) quadrupled over the two-year period. The whole Lay chips budget, with the exception of some hus-carding, was put into sponsorship of *Deputy Dawg* on some 45 stations in the company’s southern marketing district. The show was carried on an alternate week basis at an expense of about $425,000 annually.

Effectiveness of the cartoon series in delivering the Lay message can be read in terms of numbers reached. Nielsen figures for March-April 1962 indicate that Lay’s sales messages were attracting about 3,777,500 viewers in 1,717-050 television homes.

In 35 Lay markets rated by Nielsen (remaining markets were projected) *Deputy Dawg* had an average rating of 23.4. The commercial minute cost-per-thousand was an attractive $2.09.

CBS Films has begun the third year of Deputy Dawg production. The new series will be available in color.

**Science Fiction Success** • Earl Hollenbeck of Blackman-Hollenbeck Ford, Fresno, Calif., said his company is considered “a shrewd buyer.”

And, Mr. Hollenbeck said, “we knew a good thing when we saw it.”

The “good thing” Mr. Hollenbeck saw was sponsorship of Allied Artists’ Science Fiction Features over KIEO-TV Fresno. And his reaction after watching the show overwhelmingly outscore three competitors in the 6-7:30 p.m. time slot is summed up briefly: “The audience exceeded our expectations, and the sales results were tremendous.”

Blackman-Hollenbeck originally bought the show on a 13-week basis, but it took the company only five weeks to note the impact of its advertising, and to buy the show for a year. The company uses nine commercial minutes per show, divided up among 4-5 spot announcements.

Mr. Hollenbeck said that his company buys nothing but tv advertising, and in regard to the Science Fiction Features in particular, he said: “The show speaks for itself.”

Here is what the show has done for Blackman-Hollenbeck in cold facts. Reaching 48% of the viewers in a four-station area, the advertising has prompted a sales increase of 30%, according to

The Science Fiction features sponsored by Blackman-Hollenbeck Ford in Fresno have brought “tremendous” sales results, says Mr. Hollenbeck.

Mr. Hollenbeck, directly traceable to the tv advertising on the show.

**Paradise Participations** • Sponsor satisfaction with 20th Century-Fox TV’s *Adventures in Paradise* series is no secret at KSLA-TV Shreveport, La. At that station all five participants stuck with the show when it changed time periods recently.

The 91-hour-long episodes of South Sea adventure, with Gardner McKay and guest stars, “has been sold out almost from the day it went on the air last September,” according to KSLA-TV program director John Renshaw.

Advertisers in the program are Procter & Gamble, Breast O’ Chicken tuna, Jack’s Beer, Sprite (soft drink) and OJ’s Beauty Lotion.

Ratings of the program attest to its popularity in the Shreveport market and give an explanation of high sponsor interest. ARB’s November-December report gave the show an average of 54,000 homes and a metropolitan share of 47%.

**Optical Firm Pleased** • Eyeglass sales through television?

Why not?

That’s the report from Texas State Optical, a huge 94-office optometric firm in the state of Texas, which reports it is “completely delighted” with results of its tv advertising in 15 Texas markets.

Thanks to an impetus started by the sponsorship of ABC Films’ *One Step Beyond* series in the Rio Grande Valley area, Texas State Optical now allot 60% of its total advertising budget to television, and according to TSO director of public relations W. Ed Allen, the tv advertising outpulls the other media by far.

The *One Step Beyond* series, a half-hour excursion into the realm of extrasensory perception released several years
ago as Alcoa Presents, was first sponsored by Texas State Optical over Weslaco-Harlingen station KGBT-TV, and was greeted by what Mr. Allen termed “fantastic ratings.” As a result, TSO expanded the series into three more areas—KXII-TV Midland-Odessa, KXII-TV Sherman-Denison, and KTSN-TV El Paso.

And the general results?
In each situation where the One Step Beyond series is running, Mr. Allen reports, the show is doing an outstanding job in the ratings, and in the organization’s sales curve.

Classical Example • A bank in Arizona, by advertising on a classical music program syndicated from Chicago, has found television a happy medium for reaching a particular segment of viewers.

Thanks to its sponsorship of Great Music from Chicago on KTVK (TV) Phoenix (Sundays, 10-11 p.m.), Greater Arizona Savings and Loan Assn. “reaches an audience that we are particularly interested in,” according to bank president Maxwell E. Greenberg. Mr. Greenberg said sponsorship of the program “has resulted in a substantial increase in new savings accounts.”

Great Music from Chicago, which Mr. Maxwell said “has made an outstanding contribution to the cultural life of Phoenix through television,” is made available through WGN Syndication, Chicago, and is currently appearing in 45 markets within the continental U. S., plus markets in Argentina, Uruguay, Canada and the Virgin Islands.

Winner of a George Foster Peabody award in 1959 for television entertainment, Great Music from Chicago features the Chicago Symphony Orchestra with guest soloists and conductors.

Film distributors and their Chicago locations

Television Film Exhibit ’63 has attracted the majority of the major syndicators and film distributors. Located in the Pick-Congress Hotel, just north of the Conrad Hilton on Michigan Ave., the exhibits will be open from March 30th through April 3. Major exhibitors and other film distributors are listed here with their locations. For film distributors not listed here check NAB Convention listings, page 116.

In over 30 markets to date, Seven Arts’ series of 13 one-hour TV Concert Specials featuring the Boston Symphony Orchestra has registered an impressive commercial success story for a variety of sponsors.

In 10 of these markets for example, the series is/was sponsored by a local bank or savings and loan association as follows:

- Bangor, Me. (WABI-TV) Merchants National Bank of Bangor
- Des Moines, Iowa (WHO-TV) Valley City National Bank
- Fargo, N. D. (WDAY-TV) Gate City Savings & Loan Association
- Fresno, Calif. (KMOV-TV) Sequoia Savings & Loan Association
- Lexington, Ky. (WKYT) Bank of Commerce
- Louisville, Ky. (WAVE-TV) Citizens Fidelity Bank
- New York, N. Y. (WNEW-TV) Manufacturers Hanover Trust Co.
- Omaha, Neb. (WOW-TV) Nebraska Savings & Loan Association

In addition to banks and/or savings and loan associations, other sponsors of the Boston Symphony Orchestra series include Scott-Stewart Volkswagen in Erie, Pa.; The Stewart Dry Goods Co., which is co-sponsoring the series with the Citizens Fidelity Bank in Louisville, Ky.; Music Manor in Reno, Nev.; Miller Piano in Jacksonville, Fla. and the Manufacturers Light and Heat Co., which is co-sponsoring the series with the Security National Bank in Wheeling, W. Va.

Of particular significance to these sponsors is the public and critical acclaim received for these 13 brilliant concerts conducted by Erich Leinsdorf, Charles Munch, Aaron Copland, William Steinberg and Richard Burgin.

For further information and to arrange a screening of our 15-minute Boston Symphony Story and/or a complete concert, please contact your nearest Seven Arts salesman.

Stations look at film programming

THREE OUT OF FOUR WOULD LIKE TO HAVE MORE PRIME-TIME PRODUCT

A wide demand for more and better syndicated film programs is shown among television stations in the United Stations, with three-out-of-four stations reporting they would like more prime-time programming from syndicators.

This finding, along with many others that probe deeply into the major aspects of tv station programming and the films made available to them, are shown in an industrywide tv survey conducted by Broadcasting.

The results bring to light many facts and trends that heretofore have been suspected but not scientifically documented. The survey findings are based on a 30% response to a lengthy questionnaire sent to all 569 tv stations, with 169 questionnaires processed in an analysis of the replies.

Clearer Picture • Purpose of the survey was to obtain a better picture of the exact programming requirements of the industry along with station reaction to the films currently available.

An analysis of replies yields basic information that will serve as a guide to syndicators and other program suppliers. They show what types of programs are in short or adequate supply, in the opinion of tv stations. They reveal, also, the types of syndicated films stations desire.

Besides the tabulated data (see below), the responding stations supplied illuminating suggestions to syndicators. These include both favorable and unfavorable comments on the product presently available. They include, too, detailed suggestions dealing with the types of films they want to buy. The 30% sample is believed to represent a fair cross-section of operating tv stations.

The first industrywide insight into the amount of network programming dropped by stations to make way for feature films or syndicated programs is provided by the survey.

Half of operating tv stations have dropped one or more network programs this season in prime time to make way for feature films, it was revealed.

An interesting finding came from the question, "Have you done more of this substitution of feature films for network programs in prime time this season as compared with previous seasons?"

The finding: 83.6% of replying stations have not substituted feature films for prime-time network programs this season in comparison with their operating practice in previous seasons; 16.4% have done more substituting than in the past.

A question that went right to the heart of the syndication situation dealt with the current need for prime-time, first-run syndicated shows. It showed that 73.5% of station answers said "Yes," indicating a definite need and desire for such shows; 26.5% answered "No."

In the 169-station sample which answered two-out-of-five stations are located in three-station markets; one of four in two-station markets; one of six in four-station markets; one of eight in single-station markets. Minor segments were located in markets having five or more stations; several are in eight-station markets.

Here are some high spots brought out by the survey:

1. Three reruns are about the limit for films of all types, in the opinion of a majority of stations.
2. A majority consider the present supply of good feature films adequate.
3. Of all film programs (by length), 30-minute films are in largest supply.

1. Size of markets from which replies were received.

- A third of the stations have 100 to 500 feature films in reserve; one out of five has over 1,000 in reserve; many have over 2,000; several have 3,000; a few have over 4,000 feature films in reserve; and one of eight has 500-1,000.
- Nearly two-thirds of responding stations devote 11 to 30 hours a week to live programming; one of five devote 10 hours a week to live material, one of 20 devote 31-40 hours a week.
- Two out of five stations devote 11 to 28 hours a week to film or tape programs; one of five devotes 29 to 40 hours a week to such programming.

An interesting response from stations was produced by a question asking which types of programs they desired more. Adventure films led in the three categories of programs—features, one-hour and 30-minute programs.

Next in demand are dramatic programs, particularly in the feature and one hour types (see table, page 78). On the other hand comedies rank second among types of 30-minute programs desired. Comedies rank third in feature and one-hour programs.

Westerns rate a poor fourth among types of programs most desired, analysis of the survey shows. Detective stories run a shade below westerns.

Three Reruns Common • The analysis of rerun practices brings to light revealing data on the number of times stations run their films. In the case of feature films, for example, three reruns is the most popular practice, closely followed by two and then a single rerun. Occasionally stations rerun a feature as often as five or even 10 times. The largest number of feature film most rerun was found to be three.

As to 30-minute films, the returns show that over 43% of stations follow an average practice of two reruns compared to nearly 33% for a single rerun. Only one of eight stations follows a practice of three reruns for 30-minute films. Reruns beyond three are negligible.

The most reruns for 30-minute films, the questionnaires revealed, average three at 25.7% of stations. About tied around the 20% mark are two and four reruns of 30-minute films; one rerun is the most allowed at about 13% of stations.

It's interesting to note that about 7% of tv stations will permit no reruns for either feature films or 30-minute programs.

The most popular type of non-network programming is the 30-minute segment, the figures show, with half of responding stations scheduling between 11 and 30 hours a week with programs of that length.

Programs two hours long consume a relatively small amount of the week's nonnetwork material. About one out of five stations devotes 0-5 hours a week to two-hour segments, mostly feature films. Only three stations in the sample program two-hour features more than 30 hours a week.

One out of three stations programs 90-minute nonnetwork segments 0-5...
Judge TV picture quality here and you'll be fooled!

View it on a tv tube and you'll see why today's best-selling pictures are on SCOTCH® BRAND Video Tape

Don't fall into the "April Fool" trap of viewing filmed tv commercials on a movie screen in your conference room! The only sensible screening is by closed circuit that reproduces the film on a tv monitor. Then you know for sure how your message is coming through to the home audience.

When you put your commercial on "SCOTCH" Video Tape and view it on a tv monitor, you view things as they really appear. No rose-colored glasses make the picture seem better than it will actually be. No optical-to-electronic translation takes the bloom from your commercial or show. Every single image on the tape is completely compatible with the tv tube in the viewer's home.

You've just completed a commercial you think is a winner? Then ask your tv producer to show it on a tv monitor, side-by-side with a video tape. Compare the live-action impact and compatibility that "SCOTCH" Video Tape offers agencies, advertisers, producers, syndicators. Not to mention the push-button ease in creating special effects, immediate playback, for either black and white or color. Write for a free brochure "Techniques of Editing Video Tape", 3M Magnetic Products Division, Dept. MBX-33, St. Paul 19, Minn.

"SCOTCH" IS A REGISTERED TM OF 3M CO., ST. PAUL 19, MINN.
STATIONS LOOK AT FILM PROGRAMMING continued

hours a week compared to one out of four that uses such programs 11-30 hours a week and one out of five that devotes 6-10 hours to 90-minute programs. Obviously one-hour programs are important in station schedules. Two out of five stations devote 0-5 hours weekly to one-hour segments; one out of four, 6-10 hours; one out of five, 11-30 hours a week.

Programs 20 minutes long are not important in the nonnetwork scheduling of most stations. On the other hand nearly two out of three stations devote 0-5 hours a week to quarter-hour programs and one out of three devote 0-5 hours to 10-minute programs. Several stations listed substantial time devoted to five-minute programs.

Views of Stations • Perhaps the best picture of the way the consumer (tv station) feels about syndicated product can be obtained by a review of the individual comments that came with questionnaires. About half of the respondents took advantage of the chance to voice views on the type of service supplied and the particular needs of the station.

Commenting generally on syndicated programming, several respondents submitted views on types of films desired. They said:

"Let's have lots of color." 
"We need more quality, first-run syndication. There is still a market for it." 
"Need new first-run product, not off-network."

They suggested, too, specific types of programs; a number calling for films tailored for children. They want worthwhile and entertaining programs; one asked for "fresh material." Also desired for children are good-quality cartoons, features and half-hour films.

As to feature films, comments on the present supply ranged from "barely adequate" and "reasonably adequate" to "not adequate in quality," "not adequate for children" and "adequate for short-term but not for long term." Among specific types desired are science fiction and action-adventure along with many requests for a "good balance" of variety features.

In the one-hour category, respondents asked for documentary, biographical and war films; sports; science-fiction; variety, both balanced and unusual, and special features.

The largest number of comments dealt with 30-minute programs. Respondents were eloquent in stating their complaints as well as their desires. First there were a number who discussed the present supply of 30-minute films. Most said there was an adequate supply of reruns, non-first-run, poor and old films. They saw a scarcity of top-quality 30-minute syndicated shows, one respondent noting the available shows don't match network quality, primarily because of cost factors. One station respondent said "the supply of 30-minute, first-run syndicates has dwindled to almost nothing." A shortage of 30-minute agricultural programs of the public service type was noted, along with a need for family-type material suitable for the 7-7:30 p.m. slot and country-music programs.

A central time zone station explained there is "a large pool of unsold half-hours available" in the area.

More 30-minute programs of this type were desired: suspense, biography, sports, musical, unusual variety and travel.

Distinction Wanted • Finally one respondent asked for "singularly distinctive syndication such as Steve Allen, Jerry Lester and public service types." No special time segment was mentioned.

The matter of program supply brought a number of observations. One large station said it had 3,750 feature film titles under contract and found little else available, aside from first-run movies, that doesn't appear "low-budget and lacking good direction and production." Another said it has over 2,300 feature film titles, many still first-run. Here are several other comments, somewhat diverse in content: "Feature film is rapidly diminishing"; "supply generally adequate"; "we're short of syndication, regardless of time periods"; "in largest supply are poor half-hour syndicated"; "short of first-run, off-net."

Of course the price problem bothers stations when they're in the market for new products. Here's one proposal, "Distributors should work on a station classification price; overall costs are too high especially if the film is run in low-cost time periods."

Prices of syndicated films "are way out of line," a station suggested. Another added, "Please, syndicators, keep the cost down." More comments, "market too small to sell prime-time, first-run syndicated programs"; "syndicated film is practically extinct and if available the price is way out of line."

Criticism • Many stations responding to the questionnaire commented on the

Executive committeeemen for "TFE-'63" examine floor plan of TFE members' exhibit space in Pick-Congress Hotel, Chicago: (l to r) Harvey Victor, Jayark Films; Richard Carlton, Trans-Lux; Bob Rich, Seven Arts; Bob Seidelman, Screen Gems, and Alan Silverbach, 20th Century-Fox. Promotion committee for event consisted of Keith Culverhouse, MGM Television, and Gene Plotnik, King Features.

BROADCASTING, March 25, 1963
Every 2½ minutes an Air France airliner arrives or departs somewhere in the world

And that "somewhere in the world" can be practically anywhere. For Air France is the world's largest airline, covering 201,000 route miles. Linking 126 cities in 71 countries... the world's largest network of unduplicated air routes. • Air France Boeing 707 Intercontinentals and Caravelles alone service 90 destinations. In North America there are seven Air France jet gateways to Europe: New York, Chicago, Los Angeles, Houston, Mexico City, Montreal, Anchorage. In Europe, our jets fly to more destinations than any other airline. • The result: in 1962 Air France flew 3½ million passengers to all parts of the world. In 1963 even more will fly Air France. And an even larger jet fleet will be there to serve them. • And wherever they go, the familiar Air France office is there to smooth the way. In North America more than 40 Air France offices serve the traveler. And every office is staffed by people who speak the international language of friendliness and service. • Small wonder that the airline that is first in international commercial passenger experience is first choice of experienced air travelers all over the world.

AIR FRANCE
THE WORLD'S LARGEST AIRLINE

BROADCASTING, March 25, 1963
SUCCESS STORY

Produced on a modest motion picture budget, THE LITTLEST HOBO has already grossed nearly 20 times its original cost in U.S. distribution. Now, reaping equally successful box office returns in foreign distribution.

A proven exciting adventure picture geared to adult entertainment values—but with sure-fire appeal for all ages.

Reviews from cities of every size and geographic location make every sales point agencies and sponsors want to hear. The following are only 4 out of 80 in our files.

REVIEWS

"THE LITTLEST HOBO, is for the whole family. The star, a German Shepherd dog named London, will amaze you."
—Walter Winchell

"But mark you this: children have no corner on the laughter market at THE LITTLEST HOBO! Nor on the tears and exciting suspense it evokes. THE LITTLEST HOBO is both an heroic fairy tale for children and a sophisticated fantasy for grown-ups. The star, the great German Shepherd dog, London, is the smartest ever seen on the screen. THE LITTLEST HOBO is a gem of motion picture making."
—Kay Procter, Los Angeles Examiner

"HOBO CANINE COMEDY. THE LITTLEST HOBO is a gem of entertainment and artistry on a very high budget of intelligence and imagination. A 'sleeper'. This makes one hope that the picture's success will prompt a sequel dealing with further exploits."
—Jack Moffitt, Hollywood Reporter

"Shoppers for that 'something different', will be attracted to this unusual concept of a 'vagabond' German Shepherd dog, possessed of human qualities and understanding. Rating: Very Good."
—Motion Picture Herald, New York

GUARANTEED RATING FACTORS

Actually an audience tested TV "pilot", the movie, THE LITTLEST HOBO, has already favorably preconditioned a large number of American families to the television programs.

The family appeal of the star of this adult-action series is pointed up by the fact that 18 million U.S. families own 26 million dogs and spend over 395 million dollars on them annually.

The mature audience appeal of these exciting and dramatic adult-action adventures filmed throughout the world PLUS the equally important all family appeal of a handsome, intelligent German Shepherd adds up to a saleable, rating-getting series in any survey—any market.
The star of THE LITTLEST HOBO television series, the magnificent German Shepherd, London, literally roams the world over seeking adventure. London ranges widely in his exciting travels—from the nocturnal jungles of the major cities to the vast reaches of the majestic Rockies. He wanders anywhere—by train, plane, ship; throughout America and foreign countries. His friends include the flying soldier of fortune in Hong Kong and the French Poodle from his Paris adventures. In each episode he meets new people in new locales. Each adventure’s changing co-stars and supporting players are drawn from the industry’s finest actors. The story policy is straight drama but the situations vary from Hitchcock suspense to Lucy-type humor.

Offices in: CHICAGO, LOS ANGELES, HOUSTON; ATLANTA / 500 PARK AVE., NEW YORK
STATIONS LOOK AT FILM PROGRAMMING continued

quality of syndicated product. "The syndicators have hurt themselves by turning out programs way behind network standards, and all say it's for budget reasons," a station commented. "Now most have no budget at all. Some syndicated programs are so poor, many free films are better to program." In agreement was another respondent, "First-run syndication films for local nonnetwork affiliates are extremely poor. The price structure on off-network syndication is unrealistically high."

A respondent said, on the other hand, that the supply of programs for nonnetwork programs "is excellent." This was offset by another comment, "We never get good ratings with syndicated shows." Aside from documentaries, the supply is "generally undistinguished," in the opinion of a respondent, and another noted, "there seems to be less fresh product coming forth."

The off-network situation inspired many respondents to offer thoughts. Where one station said off-network reruns are "excellent and rate extremely high," another said there were "too many of them and not enough new material." The latter added, the off-network packages "are too big in number of runs and episodes." Adverse reaction from prime-time network reruns was pointed out by a respondent and another said "too much accent on reruns is detrimental to the long-range interests of the industry."

A Los Angeles station stressed the special problem of multi-station markets, contending the supply of syndicated films is inadequate aside from network reruns. "First-off-net series are disappointing, at least in Los Angeles, in ability to pull audiences," this respondent said. "Every Los Angeles station that bought off-network shows is obtaining ratings 40% or more below pre-season estimates."

These replies must be accepted as a series of individual observations, supplementing the tabulated findings in the tables. While some are critical of syndicators, the other side of the picture is presented in this observation, "Although reasonably high-budget, first-run action-adventure series are practically nonexistent, I feel there will be a resurgence in the syndicated business resulting in better product although in less number than five years ago."

It was suggested in one case that network shows are being syndicated too soon after being dropped by the networks, leading to flooding of markets with shows too recently viewed. And complaint was made that "distributors seem to think reruns from network are worth as much as first-run programs."

Finally a frank station operator conceded, "There's a lack of station schedule time to provide an incentive to syndicators." And another respondent, agreeing with this view, added, "The networks approach more and more on station time, all with the blessing of the station sales department. Sales could function well with 100% net programming, simply selling participations and adjacencies, but this isn't good programming. Now the nets are stepping into our early evening news time."

Asked if more of this kind of substitution this season, was done this year as compared with previous seasons 16.4% of stations responding said "yes."
He's patrolling the city limits... Ours!

Main Street doesn't end with the sidewalks. Not any more.

Ask the GI patrolling the Brandenburg Gate. His Main Street ends at the East in Berlin. His western terminus may be Korea or Okinawa.

To protect and maintain an enduring freedom for those city limits, 2,750,000 Americans are now in uniform... with more being enlisted daily. But it's our obligation to see that our GI's hold the spirit of their cause... the conviction of their courage.

We can help them do it... by helping the USO. Because the USO reaches GI's across America and in 32 military areas around the world. Those GI's can't be on the streets where they live, but the USO brings Main Street, U.S.A. to them... with companionship, relaxation... spiritual help.

But more USO's are needed. Your money is needed. So that no GI will ever have to wonder—even for a minute...

"Does anybody know I'm here?"

Support the USO through United Fund or your Community Chest

Using HAWAIIAN EYE as their firm name, a team of private investigators—Robert Conrad, Anthony Eisley and Grant Williams—find excitement and romance in the never-ending variety of characters who rendezvous in exotic Hawaii. With their friends—Troy Donahue as the handsome Special Events Director at a resort hotel, Connie Stevens as the lovely singer-photographer, and Poncie Ponce as the fun-loving taxi driver—the bachelor investigators are constantly involved in spine-tingling suspense and action.

Now in its fourth season on the network, HAWAIIAN EYE against strong competition compiled an average 20.4 rating and a 31.2 share of audience* during its first three full seasons. Available on an individual market basis—for fall start.

* Nielsen Multi-network (Oct. Apte averaged)
107 HOURS OF ACTION-PACKED WESTERN DRAMA

Starring Clint Walker, CHEYENNE is the first of the great Warner Bros. western hours—and one of the greatest in television history. Standing six-feet-six-inches in height, Walker as Cheyenne Bodie presents a towering figure of strength. A figure that inspires warm thoughts among the beautiful...admiration among the lawful...and cold fear among the lawless. To a man like Cheyenne Bodie, no obstacle is too big to tackle, no danger too big to risk, in his efforts to break the lawless spirit of the west to the halter of peace.

In its six full seasons on the network, CHEYENNE won an average Nielsen National rating of 24.8, good for a 38.6 share of audience.* Now available on an individual market basis—for fall start.

ON TAP AT THE CONVENTION

Official agenda for the 41st annual NAB Convention in Chicago's Conrad Hilton Hotel, March 31-April 3, is listed below. Also listed are unofficial and related meetings and activities. The Engineering Conference agenda begins on page 88 and engineering exhibitors on page 96. All rooms are in the Conrad Hilton unless indicated otherwise.

Registration • Saturday, March 30—9 a.m.-5 p.m.; Sunday, March 31—8 a.m.-6 p.m.; Monday, April 1—8 a.m.-6 p.m.; Tuesday—9 a.m.-5 p.m.; Wednesday—9 a.m.-5 p.m. Lower Lobby.

Exhibits • Sunday, March 31—12 noon-9 p.m.; Monday, April 1—9 a.m.-9 p.m.; Tuesday—9 a.m.-7 p.m.; Wednesday—9 a.m.-6 p.m. East and West Exhibit Halls.

SUNDAY, March 31

NAB Fm Day Program • 2:30-5 p.m., Continental Room.

FM Forum: Messrs. Strouse; Dillard; Tanner; N. L. Benton; WLOL-FM Minneapolis; Merrill Lindsay, WSOY-TV Decatur, Ill.; Fred Rabell, KITT (FM) San Diego; Henry Slavick, WMC-FM Memphis (all members of NAB Fm Committee).

[NOTE: Delegates to the NAB Convention are invited to attend the program of the National Assn. of Fm Broadcasters in the Waldorf Room beginning at 10:30 a.m. Sunday, March 31.]

Television Assembly • 3:30-5 p.m., Waldorf Room.

MONDAY, April 1

Grand Assembly (Management and Engineering Conferences) • 10:30 a.m.-12 noon, Grand Ballroom.

Award to Mr. Hope, with the comedian then slated to address the delegates. On the platform also will be Illinois Gov. Otto Kerner who will welcome the broadcasters to Chicago.

The three traditional management conference luncheons are expected to draw a lion’s share of attention because of the three major speeches to be delivered. Gov. Collins will speak Monday, FCC Chairman Newton N. Minow Tuesday and Michigan Gov. George Romney on closing day.

After attending the joint meeting Monday morning, the engineers will open their annual conference that afternoon and sessions will run concurrently with the management meetings. The technical delegates will join the managers again for the closing Wednesday afternoon panel of FCC members, an established major feature of the convention.

The engineers also will hold their own luncheons each day with the following speakers: Dr. Edward E. David, Bell Telephone Labs, Monday; Sidney Metzger, manager of Project Relay, RCA, Tuesday, and Dr. Simon Ramo, Thompson Ramo Wooldridge Co., Wednesday.

Everett E. Revercomb, NAB secretary-treasurer, will again serve as convention manager as he has done for the past several years. Howard H. Bell, vice president for planning and development, heads the convention program arrangements, and William L. Walker, assistant treasurer, is in charge of registrations. Mr. Walker has been in Chicago the past several days making final arrangements.

NAB executive offices for the convention will be on the third floor of the Conrad Hilton. John M. Couric, manager of public relations, will man a complete newsroom for the use of all accredited representatives of news media. The NAB also will set up a recording studio for the use of stations wishing to provide on-the-spot coverage.

Tv Election • A major order of business will come Wednesday morning with the election of four directors to the NAB TV Board. Among those whose terms expire, and who are not eligible for re-election, is Clair R. McCollough of the Steinman Stations, chairman of the NAB combined boards. Others whose terms expire include James D. Russell, KKTV (TV) Colorado Springs and co-chairman of the 1963 convention; Otto P. Brandt, KING-TV Seattle; Robert F. Wright, WTOK-TV Meridian, Miss., and the three network directors—Mortimer Weinbach, ABC-TV, William B. Lodge, CBS-TV, and David C. Adams, NBC-TV, who are appointed.

Ben Strouse, WWDC-AM-FM Washington, is co-chairman of the convention along with Mr. Russell. They are vice chairmen of the NAB radio and tv boards, respectively. Other convention committee members include:

John S. Booth, WCHA Chambersburg, Pa.; George T. Frechette, WFHR Wisconsin Rapids, Wis.; Gordon Gray, WKTV (TV) Utica, N. Y.; Willard Schroeder, WOOD Grand Rapids, Mich.; Mike Shapiro, WFAA-TV Dallas; Lester G. Spencer, WKBV Richmond, Ind.; Eugene S. Thomas, KETV (TV) Omaha, Neb., and Robert F. Wright, WTOK-TV Meridian, Miss.

4 Cameras to
For Each Program Requirement, an RCA

For the Best
4½" I. O. Picture—TK-60

Designed to get the most out of the 4½" tube, the TK-60 camera produces the ultimate in fine pictures. You can control contrast and mood as never before. Super stabilized circuits assure unvarying picture quality, and eliminate adjustment delays. Its striking appearance and built-in production features make it every inch the "Camera of the Sixties".

For the best 3" I. O. Picture—TK-14

The TK-14 is designed to take full advantage of the 3 inch I.O. tube. It's the standard of the broadcast industry. With its new improved circuitry, it affords higher resolution and shorter set-up time. It's a camera you will commend for its excellent pictures, high reliability, and conservative cost.

The popularity of RCA Television Cameras is proved by their use in more U.S. Stations than all other makes combined! Find out why most TV shows start with RCA cameras. See your RCA Regional Representative. Or write RCA Broadcast and Television Products, Building 15-5, Camden, N.J.

TECHNICAL PAPERS

The 17th annual Broadcast Engineering Conference, running concurrently with the NAB convention April 1-3 in Chicago's Conrad Hilton Hotel, will feature 22 technical papers on the latest technical developments in broadcasting.

As in past conventions, the technical delegates will join management for the opening general assembly Monday morning (April 1) and for the closing FCC panel Wednesday afternoon. The engineers will hold their own luncheons each day and will hear speeches by Dr. Edward E. David, Bell Telephone Labs (Monday); Sidney Metzger, manager for Project Relay, RCA (Tuesday), and Dr. Simon Ramo of the Thompson Ramo Wooldridge Co. (Wednesday).

NAB President LeRoy Collins will greet the engineering delegates during their opening technical session Monday afternoon. Technical papers that afternoon will be devoted to both radio and tv topics. On Tuesday morning, the radio and tv engineers will split up for separate sessions and will meet together again Wednesday morning for subjects of common interest.

Like the management delegates, no engineering sessions are scheduled for Tuesday afternoon so that convention attendees may visit the engineering exhibits and hospitality suites. Many of the engineers also are expected to attend sessions at the NAB Fm Day program Sunday, March 31.

Highlight of the Wednesday luncheon will be the presentation of the annual NAB Engineering Achievement Award to Dr. George R. Town, dean of engineering, Iowa State U. Ames, Iowa. The presentation will be made by George Bartlett, manager of engineering for the NAB.

Chairman of the Engineering Conference Committee is Orrin W. Towner, director of engineering, WHAS-AM-TV Louisville. Other committee members include Mr. Bartlett; William S. Dut- tera, NBC; J. B. Epperson, Scripps-Howard Broadcasting Co., Cleveland; James E. Gray, WYDE Birmingham; Albin R. Hillstrom, KOOL-AM-FM-TV Phoenix; Clyde C. Hunt, Post-Newsewck Stations, Washington; Leslie S. Learned, Mutual; Frank Marx, ABC; James D. Parker, CBS-TV, and Jack Petrik, KETV (TV) Omaha.

Following is the full program for the Broadcast Engineering Conference, with summaries of technical papers:

Monday, April 1
10:30 a.m.—General Assembly, Grand Ballroom, Conrad Hilton.
12:30 p.m.—Engineering Luncheon, Williford Room.

Presiding: William S. Duttera, director allocations engineering, NBC.

Speaker: Dr. Edward E. David, director, Computing & Information Research Center, Bell Telephone Labs.

Mr. Collins Mr. Towner

Mr. Epperson Mr. Learned

Mr. Klink

Dr. David Mr. Duttera

2:30 p.m.—Technical Session, Continental Room.

Presiding: J. B. Epperson, engineering vice president, Scripps-Howard Broadcasting Co.

Session Coordinator: Leslie S. Learned, director of engineering, MBS.

Opening of 17th Annual Broadcast Engineering Conference—LeRoy Collins, president, NAB.

2:40-3:05 p.m.

“The Use of Spectrum Display in Broadcast Monitoring.” by Granville Klink, chief engineer, WTOP Washington, D. C.

During the last few years, the FCC has used spectrum display equipment in its monitoring stations to provide increased capability for detecting the effects of improper operation. This paper relates several experiences in which citations and advisory notices were issued as a result of this type of surveillance, and describes a new kind of monitor that was developed to assist broadcast stations in locating and correcting the source of trouble.

The monitor consists basically of a receiver and a spectrum display unit on one chassis. It covers the fm and vhf television channels and displays the spectrum in segments of from 50 kc to 2 mc on a 5-inch screen calibrated horizontally in frequency deviation and vertically in decibels.

3:10-3:25 p.m.

Over the past 21 years the NAB has been instrumental in the development of audio recording and reproducing standards which are applicable to discs and tape. The first standards were adopted by the association's board of

BROADCASTING at NAB

A full staff of editors, reporters and advertising representatives of Broadcasting Publications Inc. will attend the NAB convention March 31-April 3, to be held in Chicago. Headquarters and open house will be in Suite 706A of the Conrad Hilton. A separate newsroom will be opened Saturday, March 30, with staff men assigned to cover every convention event and meetings not on the NAB’s official agenda.

Representing Television Magazine will be Ken Cowan, Don West and Frank Chizzini.
Well behaved transmitters

DON'T WHISPER!

Stay listenable with Audimax!

Undulating audio is not listenable! When it shouts—unpleasantness! When it whispers—strain! Every time your listener touches his volume control, you stand a chance of losing him! Audimax—the monitor with a memory—rides your output gain control with super-human speed. When levels are correct, gain remains constant—this is the Audimax Gain Platform. Audio output remains on a natural listening keel at maximum modulation. There’s no distortion, compression, thumping or pumping. No audio “holes.” Audimax is not a Compressor, Limiter or AGC. Audimax is a control computer, complete with memory and judgement. You merely set the Gated Gain Stabilizer to recognize noise and background effects, and electronics takes over. Proper levels are maintained; gain is held constant during pauses or returned to normal at standby—automatically. To get listener loyalty—and keep it—you need Audimax! It pays!

BROADCASTING, March 25, 1963
NAB PREVIEW

TECHNICAL PAPERS CONTINUED

directors in 1942, with subsequent revision in 1949, 1950 and 1953. Since the last revision, countless new developments have taken place in this field which make many of the existing standards obsolete and outdated. Areas such as multi-track, stereo cartridge tape are but a few recent developments which are not now included.

The NAB recording and reproducing standards committee along with its various working groups, is diligently pursuing this effort not only to bring the present standards in step with today's techniques but to insure interchangeability between users. This talk will review the status of the present recording and reproducing standards activities.

3:30-3:55 p.m.

“Sound Reinforcement in Television Theaters.” by A. PIERCE EVANS, project engineer, CBS-TV.

An important element of many television broadcasts, the reaction of the studio audience to the performance, is dependent upon good sound reinforcement. In both the design and operation of the sound reinforcement system, problems are encountered which are unique to television studios. New approaches to these problems, utilizing recent advances in the state of the art, are presented.

4:45 p.m.

“Broadcast Engineering Activities in Canada,” by M. LEVY, consultant, Canadian Assn. of Broadcasters.

This paper describes briefly the various organizations dealing with broadcasting matters such as the Canadian Dept. of Transport, the Canadian Radio Technical Planning Board and its various technical Committees, the Canadian Assn. of Broadcasters, and the way they collaborate to study problems connected with broadcasting, analyze proposed regulations and plan future expansion and activities.

A review of some technical activities of the CAB, particularly in the fields of frequency allocations, tv receiver interference to am radio receivers, space broadcasting will be discussed.

4:30-5 p.m.

“A Method of VLF Television Scan Synchronizing,” by ROBERT M. MORRIS, staff engineering consultant, ABC.

It has been the desire of television broadcasters for many years to be able to switch, montage, and create visual effects with pictures from remote cameras and sources with the facility normal with cameras all under the same roof. The gen-lock or sync-lock has been the only answer to this need and it unfortunately is only a partial and not too satisfactory answer where more than one remote source is involved. In such cases it has been necessary to lease separate video lines for purposes of synchronizing the separate remote sources which, when it is possible, is expensive.

This paper describes a new technique applicable to the scan synchronizing of multiple picture sources at different locations based upon developments for satellite and missile tracking. Equipment which will provide a coherent lock with vlf radio signals for the control of sync generators is described together with its method of use and some of the problems associated with this new application of precision control.

Tuesday, April 2

9 a.m., Technical Session, Radio, Continental Room.

Presiding: JACK PETRIK, chief engineer, KETV (TV) Omaha, Neb.

Session Coordinator: CLYDE M. HUNT, vice president for engineering, Post-Newsweek Stations, Washington.

9-9:25 a.m.

On Feb. 20, 1963, the commission adopted a report and order amending its rules to permit the use of automatic logging devices for recording information normally required to be entered manually in the operating logs of broadcast stations. The rules, as amended, also make other changes in logging procedures. The new rules concerning program, operating and maintenance, and their effects on the operation of broadcast stations, as well as the specific requirements relating to automatic logging equipment, will be discussed in detail.

9:30-9:55 a.m.

“Practical Considerations for Fm Multiplex Monitoring,” by CHARLES E. DIXON, development div., Collins Radio Co.

Every fm broadcaster who has made the switch to stereo multiplex has been faced with a perplexing monitor problem. The electronics manufacturing industry has been concerned primarily with building stereo multiplex transmitting equipment and has not provided the stereo broadcaster with a monitor tailored specifically to fit his needs. Transmitter manufacturers have had to build specialized test equipment in order to prove the quality of their stereo transmitter to the FCC for type acceptance purposes, but generally this equipment has not been made available to the broadcasters. This paper will discuss the fm stereo multiplex monitor requirements and how the application of such a monitor will benefit the stereo broadcaster.
10:10:25 a.m.

"Broadcast Transmitter Harmonic Considerations," by C. V. Clarke Jr., project engineer, Gates Radio Co.

With our ever-increasing use of the spectrum and the over-crowded conditions which exist today in all bands, it is now more important than ever that spurious emissions must be kept to a minimum. Harmonic radiation not only creates interference to other services, but may disrupt vital communications which are instrumental to public safety. The commission has recognized this fact by placing stringent rules on the radiation of harmonics by users of broadcast equipment. This paper will discuss the effects of loads, whose impedance varies with frequency, upon the harmonic emission from a broadcast transmitter. A method for measuring harmonic radiation will also be discussed.

10:30-10:55 a.m.

"On the Go with Radio," by Vincent P. Marlin, chief engineer, WFBL Syracuse, N.Y.

With ever-changing programming formulas in radio, the station engineer's ingenuity is constantly being called upon to develop equipment which will satisfy these demands for speed and portability. This paper deals with the design, construction, and operation of a remote trailer . . . a complete station on wheels. Such matters as remote pickup equipment, cue circuits, control of programs, and layout of equipment will be discussed in detail. Summarizing the paper will be a recap of all problems encountered in over 140 remote broadcasts of 4,504 actual "on-air" hours and how these problems were solved.

11:10:25 a.m.

"A New Digital Phase Monitor," by John K. Birch, Vitro Electronics, Silver Spring, Md.

Phase monitors used presently with directional arrays are limited in accuracy, or resolution, and are not adaptable to remote control. This paper describes a new monitor which has been developed to measure with great accuracy, and which, in addition, may be programmed and read over telephone lines.

The phase meter section of the monitor utilizes the time interval method of measuring phase, displaying the angle in degrees on a digital counter. Tower current is indicated as a deviation from the assigned current ratio, on a differential type of voltmeter. Variations in the system are available, depending upon the amount of accuracy required. The digital techniques employed make possible future refinements of the system, such as tape printers or chart recorders as readout devices.

11:30 a.m.-12 noon

"A New Method of Broadcasting Three Dimensional Stereophonic Sound," by Kenneth R. Hamann, chief audio engineer, WDKC Cleveland.

The true reproduction of sound source localization frequently demands more than two distinct channels for transmission from the studio or concert hall to the listener. Two-channel stereophonic systems all too often leave a "hole in the middle" which detracts from the feeling of realism that the sound reproduction system should provide. Stereophonic recording systems involving from 3 to 10 discrete channels have been in existence for some time. Various techniques have been employed in their transmission but all have had their shortcomings. This paper will describe the adaptation of a unique three-channel system for broadcast use which is currently in operation at WDKC in Cleveland.

9 a.m.—Technical Session, Television, Upper Tower

Session Coordinator: James D. Parker, director, IV-F Engineering, CBS-TV.

9-9:25 a.m.

"Design and Installation of a TV Antenna for Simultaneous Operation on Two VHF Channels," by Richard K. Blackburn, technical director, Ganett radio and TV stations, Rochester, N.Y.

WHETV and WROC-TV, both Rochester, N.Y., are now operating on chns. 10 and 8 using a common antenna. Both stations operate at a power of 316 kw and use the only such television antenna system in operation in the U.S. The antenna is fed by four transmission lines in order that the upper or lower half may be fed separately and, thus, constitute a spare antenna system for use in case of feed line or transmission line failure. This paper will describe the design parameters of this system including vertical and horizontal performance. System response compared to design goals will be discussed.

9:30-9:55 a.m.

"Simplified Operating Practices for Studio Image Orthicon Cameras" (Film), by Joseph A. Flaherty, director of technical facilities planning, operations department, CBS-TV, New York.

This film portrays simplified operating practices for 4½" image orthicon cameras which are employed by CBS-TV to obtain consistently high quality results in normal day-to-day operations. Special emphasis is given to demonstrating the inter-relationship of lighting, scene contrast, camera exposure, and object-to-image transfer characteristics, and to relating these variables to final image quality. Practical methods are illustrated which standardize some of these variables to permit simpler operation.
NAB PREVIEW
TECHNICAL PAPERS CONTINUED

with more predictable and consistently higher quality results.

10-10:55 a.m.

"Remote Control of TV Transmitters," by GEORGE W. BARTLETT, NAB manager of engineering.

Over the past 10 years the broadcasting industry has been attempting to modernize its operating techniques in order to bring them into step with those of other services. The adoption of remote control operation for am and fm transmitters was a move in this direction and is now an accomplished fact at over 2,500 am/fm stations. This symposium will discuss the NAB field testing program which is currently underway at 5 stations. A program designed to test the dependability, accuracy and reliability of tv remote control equipment.

Symposium participants include Mr. Bartlett, R. B. MARVE, manager, low power transmitter engineering, RCA; B. T. NEWMAN, broadcast sales, General Electronic Labs; F. J. BIAS, technical products operation, General Electric Co.; WILLIAM P. KRUSE, Gates Radio Co., and JOHN A. MOSELEY, president, Moseley Assoc. Inc.

NAB engineering award

Dr. George R. Town, dean of engineering at Iowa State U., Ames, will be presented the 1963 NAB Engineering Achievement Award during the closing luncheon April 3 of the engineering conference in Chicago (see OUR RESPECTS, page 169).

George Bartlett, NAB manager of engineering, will make the presentation.

The 1962 engineering award went to Ralph Harmon, vice president for engineering of Westinghouse Broadcasting Co.

by NBC in construction of several color facilities over the last 10 years would be of interest to other broadcasters just entering this new medium. The several system factors that have to be taken into consideration in the installation of monochrome equipment take on added importance in color and must be executed and checked to far greater accuracy. In addition, several new problems are introduced which are of little or no significance in black-and-white broadcasting.

The paper describes some of the precautions taken by NBC in laying out and constructing color facilities, and outlines some of the procedures used in alignment and proof of performance tests.

11:30-11:45 a.m.

"Intercity Television Network Service Today," by SHELDON C. JENKINS, transmission engineer, American Telephone & Telegraph Co.

The Bell System provides thousands of miles of intercity television channels. While a few channels are used for educational purposes and others are used occasionally for closed circuit applications, nearly all of the channel mileage is used for network transmission. This paper will describe the various systems of intercity television network service both past and present. It will concern itself with such matters as the role played by the switch or operating centers, describing equipment now in use and the techniques used by AT&T in the transmission of video information.

12:30 p.m.—Engineering Luncheon, Wiliford Room

Presiding: LESLIE S. LEARNED, director of engineering, Mutual.

Speaker: SIDNEY METZGER, manager communications systems, project Relay, RCA Astro-Electronics Div.

Tuesday Afternoon, April 2—No sessions scheduled after luncheon. This period is not programmed to permit delegates to visit exhibits and hospitality quarters.

Wednesday, April 3

9:00 a.m.—Technical Session, Continental Room

Presiding: FRANK MARX, president, ABC Engineers, ABC.

Session Coordinator: JAMES E. GRAY, chief engineer, WYDE Birmingham, Ala.

9-9:25 a.m.

"Recent Developments in Videotape Recording," by GRANT M. SMITH, senior electrical engineer, Ampex Corp.

Since the introduction of the Videotape recorder, the number of tape machines in use continues to increase. Approximately 1,300 machines...
RCA Field Mesh Image Orthicons 7293A and 8093A

Sharper and Quieter Picture Reflects Tube Improvements

You can see the difference. It shows in the upgraded picture quality when you use the improved RCA-7293A in your black-and-white camera chains. Look for the red base. It's your cue to confidence that you have the RCA-7293A with high signal-to-noise ratio, improved sharpness, and a high signal output. Its operational flexibility and life expectancy are equivalent to those of RCA-5820A.

In addition, RCA-7293A produces all the RCA Field Mesh design features: better camera focus, less "edginess", and better geometry. It embodies RCA's quality assurance in uniformity for highlight response, background shading, high effective sensitivity and anti-ghost benefits.

RCA-8093A is the Field Mesh Image Orthicon recommended for high quality tape recording. When particular attention is paid to light-level control and lighting uniformity, this tube produces even higher signal-to-noise ratio and longer gray scale reproduction.

You can choose from a complete line of RCA Field Mesh Image Orthicons, including: RCA-7513 and the matched set RCA-4415 & 4416 for color; and for black-and-white: RCA-7293A, 7295B, 7389A, and 8093A. Ask for them at your AUTHORIZED DISTRIBUTOR OF RCA BROADCAST TUBES.

RCA ELECTRON TUBE DIVISION, HARRISON, N.J.

The Most Trusted Name in Television
Mr. Smith

were in operation as of January 1962, and undoubtedly this number has increased well above this figure. Recent noteworthy events have been the introduction of transistorized circuitry, simplified means for color recording, improved heads, editing techniques and miniaturization. This paper will describe the recent developments which have been incorporated in the new Ampex single console four-head videotape recorder.

9:30-9:55 a.m.

“What to Look for in New Designs Using Transistors,” by R. N. Hurst, broadcast studio engineer, RCA.

Broadcast engineers who make no attempt to become acquainted with transistors will very rapidly find themselves unable to participate in some of the liveliest technical conversations in the industry. The transistor, scarcely more than 10 years old, has been refined and developed to the point where it is a fast-rising contender for many of the circuit functions required in broadcast equipment, both audio and video. With the passing of each day more and more equipment being redesigned to use transistors. The present trend toward miniaturization also requires the application of these new devices.

This paper will discuss in detail, several areas where the characteristics of transistors require a different design philosophy than tube circuitry, and how this philosophy may be applied.

10:00-10:25 a.m.

“An Automated Audio Console,” by Edward M. Mullin, project engineer, ITA Electronics Corp.

Today’s emphasis on a tight program format often taxes the proficiency of even the best audio operators. Many stations have realized the difficulty of maintaining their high standards of station operation in programming and have been searching for a method of simplifying the console operator’s task. Top 40 type

Mr. Mullin

of programming, the multiplicity of duties, and the consolidation of numerous functions formerly carried out by several personnel have added measurably to the tasks confronting control room personnel.

This paper will discuss the problems involved in the development of an automatic audio console designed to alleviate many of the problems now confronting the control room operator.

10:30-10:55 a.m.

“The ABC Color Operating Standards,” by A. W. Malang, chief video facilities engineer, ABC-TV.

After ABC-TV reached the decision to commence color broadcasting, it became rapidly apparent that color operating practices were far from standardized, and were in fact considered by some to be incapable of being standardized. In order to accomplish network broadcasting on a clock time basis ABC-TV finds it advantageous to play back each show a number of times in different places. Hence, if the color shows (as of this date film only) were to be of consistent and comparable quality, standardization was mandatory.

The measure of success of this program has been exemplified by the comments of viewers and affiliates, in which consistent high quality of the color programs has been expressed.

11:15-11:25 a.m.

“A New Approach to a Color Film Channel,” by I. C. Abrahams, consultant, advanced engineering, General Electric Co.

This paper describes a new system, which makes use of a fourth tube, whose exclusive function is to pick up the luminance information from the slide or film. The use of this tube for such a purpose permits obtaining improved sharpness of the luminance signal, since its output is independent of the color signal. On the other hand, the registration of the three images of the other three channels is not nearly so critical, since they contribute only to the chromaticity of the picture.

Superior sharpness is therefore obtained for both the color picture and the monochrome picture. Although there are color errors which theoretically arise in a system of this type, it will be shown that these are not of practical consequence in the final analysis.

11:30 a.m.-12 noon

“RF Interference Reduction in Television Pickups,” by J. L. Hathaway, staff engineer, NBC.

This paper describes the nature of radio frequency interference which has degraded and even ruined a few NBC-TV field programs over the past years. It outlines some efforts to eliminate interference by cut-and-try brute force methods. Further, it points out two practical methods of definitely reducing the deleterious effects of radio interference; one of these utilizing the newly developed filter which is described in detail.

12:30 p.m.—Engineering Luncheon, Williford Room.

Presiding: Orrin W. Towner, chairman, Broadcast Engineering Conference Committee, director of engineering, WHAS-AM-TV Louisville.

Presentation of Engineering Achievement Award: by George W. Bartlett, manager of engineering, NAB.

Acceptance of Award: Dr. George R. Town, dean of engineering, Iowa State U., Ames, Iowa.

Speaker: Dr. Simon Ramo, vice chairman, Thompson Ramo Wooldridge Co.
Improved RCA Image Orthicon RCA-5820A
Has No Match for Tube-to-Tube Uniformity

The key to telecasting's highest performance uniformity from tube-to-tube is RCA-5820A, the Image Orthicon respected as "standard" of the industry.

On every major characteristic by which TV pictures are measured, RCA-5820A is quality assured. If you use RCA-5820A, you can get another like it with complete confidence. How can you be sure? Each and every RCA-5820A is tested and rated in three different cameras and given a final, thorough operational check prior to shipment!

The excellence you buy in today's RCA-5820A includes: High signal-to-noise ratio, uniformity of signal output and background, high sensitivity and improvements in resolution capability.

This RCA Image Orthicon is recognized as an exceptional all-purpose type for studio or remote use. It features microscopic gun alignment, gold-plated grids, and pre-tested mesh to assure reduced microphonics.

A leader in TV Camera Tube development since the early days of television, RCA today offers a complete line of Image Orthicons for black-and-white and color.

CONVENTION EXHIBITS

Manufacturers of broadcast equipment will show their newest products along with established lines in the lower lobbies of the Conrad Hilton Hotel in Chicago. Following are descriptions of the principal products to be on display in the two separate exhibit halls. The exhibit space designated is in the Conrad Hilton unless otherwise indicated.

Station representatives, networks, syndicators and miscellaneous industry service firms are listed on following pages, including personnel attending the convention. These are based on information available as Broadcasting went to press.

A list of manufacturers of equipment who will maintain hospitality suites will be found in the "Where to Find It" directory (page 122).

ALFORD MANUFACTURING CO.
Space 21W
Alford this year will show tv and fm antennas, diplexers, coaxial switches, vestigial sideband filters, RF measuring instruments.
Personnel: Harold H. Leach, Gerald Cohen.

ALTO FONIC TAPE SERVICE INC.
Space 32W
AMPEx CORP.
Space 28W
Four new products will be introduced: the VR-1100, low-cost, all transistor Videotape recorder; Editite time element control system for precise automatic editing and full animation on tv tape; Mark IV heads, new design long-life video heads for VR-1000 and VR-1100 recorders; 602 Audio Recorder, an improved field recorder/playback for broadcast, industrial and educational use.
Also to be shown are the VR-1000C Videotape recorder equipped with Intersync tt signal synchronizer, Amtec time element compensator, electronic editor, Editite and Colorite, direct color recovery system; VR-1500 portable closed circuit Videotape recorder; 7½" conversion kit for VR-1000 recorders; Marconi Mark IV monochrome camera chain; Marconi eight-event store and switching unit; PR-10 professional audio recorder; SA-10 speaker/amplifiers and MX-10 mixer; 354 broadcast recorder with new four-position head and full line of audio tape and UST prerecorded tapes.
Personnel: C. Gus Grant, Tom Davis, Tom Merson, Bob Day, George Shoaf, Jack Miller, Tom Washburn, Gregg Perry.

ANDREW CORP.
Space 70W
Andrew will feature its Multi-V antenna, providing full performance data, its accessories and Andrew pattern services. The Multi-V is now cataloged in standard sizes up to 16 bays. A new Helias display will be made, featuring a large selection of flexible coaxial cable. Coaxial transfer switches for rapid switching of pairs of transmissions will also be displayed. The switches will be shown in operation and with construction details.

AUTOMATIC TAPE CONTROL INC.
Space 22W
Complete station automation will be on display, including the new SP-10-1 systems Programmer. The Programmer is said to be capable of handling up to 10 audio sources in any random pattern desired. Program planning is dialed into the unit in the sequence desired. The modular concept of ATC automation and the ease of designing and assembling complete systems exactly matched to format requirements will be stressed.

Choose RCA-4415 & 4416 for Your Big Year in Color

Colorcast schedules are growing heavier. And heavier. And heavier. Get set now to deliver the sharp, true, bright pictures sponsors demand for their programs and commercials. Replace with RCA Image Orthicons 4415 & 4416. For RCA insists on highest quality performance in its color image orthicons. And has invested more to get it.

The RCA 3-tube factory-matched set in your camera produces exceptional pictures in color receivers, as well as high resolution pictures with normal tone rendition in black-and-white sets...at lighting levels available in black-and-white studios! There's no problem of high scene-lighting temperatures...no need for extra air-conditioning. And many lighting costs usually associated with highest quality indoor color pickup are avoided.

RCA precision construction, Field Mesh, plus finely matched tube characteristics assure you excellent picture registration and uniform color balance over the entire scanned area.

Also available is RCA-7513, an Image Orthicon for highest quality color pickup using conventional color TV lighting. Ask about RCA Image Orthicons locally. SEE YOUR AUTHORIZED DISTRIBUTOR OF RCA BROADCAST TUBES.

digital form for ease of transmission, switching and regeneration will be on display.

BAUER ELECTRONICS CORP.
Space 56W
Bauer Electronics this year will display the Model 707 1 kw transmitter, the Model FB-5000J 5000 w transmitter and the Model 440 “Log Alarm” automatic logging device. It will be the first NAB Convention display for the latter two items.

BOSTON INSULATED WIRE & CABLE CO.
Space 71W
Tv camera cables, special application tv cameras, microwave equipment, and cable assemblies will be among this year's display.
Personnel: Alden C. Davis, Hubert Goodwin, Jack E. Ferrer.

BROADCAST ELECTRONICS INC.
Space 14E
Broadcast Electronics this year will show four new products—a recorder-playback cartridge unit, a phase monitor and two variations of existing models—in addition to regular items in their line.
The new cartridge unit, Spotmaster Model 500 DL, is capable of delaying broadcast of programs from 6 seconds to 30 minutes and was specially designed to help the broadcaster eliminate objectionable language, for instance, on telephone interview type programs.
The new phase monitor, Model 28V-2, will handle both 6 element arrays, with additional inputs supplied on request, and occupies less than 9 inches of rack space. It measures phase angle, current ratios and amplitude on a single meter with 7" scale length. Measurement accuracy is 1° with repeatability to ½°.
Spotmaster Models 500A and 505A, the other new products being shown, are variations of Spotmaster Models 500 and 505. In addition to these new items, 7 products from the regular Broadcast Electronics line will be shown, including recorder, playback, recorder-playback combination unit, equalized turntable preamplifier and cartridge racks.
Personnel: Ross Beville, Jack Neff, Don Smith, Dave Durst, Jim Woodworth, Ben Strouse.

CHARLES BRUNING CO.
Space 41X
The Copyflex diazo machine line for simplified program logging and a newly developed system for sales contracts and billing will highlight the firm's exhibit. Bruning will also exhibit its new Copytron electrostatic dry copier machine.
Personnel: Eugene Bonk, Garwin Dawley, Don Sanders.

CBS LABORATORIES
Space 72W
CBS Labs this year will exhibit Audi-max automatic level controls, test records, VA-1 transistorized video distribution amplifiers, digital display devices for statistical reporting, and other products in their line.
Personnel: Elliot R. Kurtz, Marvin Kronenberg, Emil L. Torick

CENTURY LIGHTING CO.
Space 19E, 14E
Century will be lighting the General Electric and Visual Electronics demonstrations areas.
Personnel: Edward F. Kook, George Gill, Rollo Gillespie Williams

CHRONO-LOG CORP.
Space 47W
Sequential Television Equipment Programmer (STEP) is an automation system for tv switching, designed to switch video and audio, start and stop film projectors and tape units and operate slide projectors. STEP permits programming an entire day's switching sequences in advance. The sequence can be checked out through a preview mode. Provision for last minute changes and operator override is provided in the programmer.
Chrono-Log Digital Clocks have been used to provide digital outputs of time for network coverage of astronaut flights. They can be used for coverage of sporting events and other events where viewer interest is centered on the importance of time.

COLLINS RADIO CO.
Space 27W
The transistorized 900C-1 Fm Stereo Modulation Monitor will be among the

Now! An RCA Image Orthicon with picture pickup fidelity so high, it's like bringing your audience right into the studio.

That's RCA-7295B...a new 4 1/2" type unilaterally interchangeable with the 7295 and 7295A. Tighter performance limits and additional tests and inspections at RCA have refined processes and materials to such an extent that performance of this TV Camera Tube rivals that of any Image Orthicon on the market.

With this 4 1/2" Image Orthicon, you get the ultimate in flexibility for high fidelity pickup in black-and-white TV. Because you get: improved background uniformity, higher signal output levels, better signal uniformity, higher signal-to-noise ratio, improved detail response, reduced microphonics, and stable sensitivity.

All these improvements had to come in a tube from RCA—a leader in TV Camera Tube development since the early days of television. Ask locally about a complete line of RCA Orthicons for color and black-and-white telecasting. SEE YOUR AUTHORIZED DISTRIBUTOR OF RCA BROADCAST TUBES.

RCA ELECTRON TUBE DIVISION, HARRISON, N. J.

For name and address of your local distributor write or call your nearest RCA Distributor Products Sales Office—New York, N. Y.: 36 W. 49th St., Murray Hill 9-7200; Needham Heights 94, Mass.: 80 "A" St., Hillcrest 4-8400; Washington 7, D. C.: 1725 "K" St., S.W., Federal 7-8500; Atlanta, Ga.: 134 Peachtree St., N. Washington Blvd., Raymond 3-8361; SEE THE RCA IMAGE ORTHICON DISPLAY AT NAS.
new equipment at the Collins display. The 90C-1 measures main channel, sub channel, pilot carrier and SCA carrier insertion; it will measure stereo separation, crosstalk and pilot phase; provides stereo and monaural output for proof of performance measurements, plus output connections for measurement of an and noise and distortion.

Also new is the 26U-2 Stereo Peak Limiting Amplifier, featuring gated limiting action for maximum stereo separation, compatible with complete limiting capabilities.

New Marti equipment, sold by Collins, will be the M30B/TPS higher powered remote broadcast transmitter, and the 11RS-2R new improved matching receiver.

The company will also display the 830D-1A 1 kw fm transmitter, the 830F-1A 10 kw fm transmitter, A380-2 direct fm exciter, 786M-1 stereo multiplex generator, 808A-1 remote console and other am and fm stereo equipment.

The display will show a Collins 300F 250 w transmitter installed in 1938 at WGAU Athens, Ga. It was the winner of the company’s recent oldest transmitter contest and was in continuous daily service from 1938 until it was replaced with a 20V-3, supplied by the company, earlier this month. A 20V-3 will also be on display.

COMMERCIAL RECORDING CORP.

Space A-East

A complete line of station 1D and promotional jingles, plus commercial jingles will be exhibited.

Personnel: John J. Coyle, Buddy Harris, Walter Wiececke, Bud Curry.

CONRAD DIV. OF GIANNINI

Space 7E

Conrad will offer four new products for view at the convention, a color master monitor, a transistorized monitor, a kinescope recording chassis and an audience and studio monitor. The master monitor utilizes 95 transistors and 21 tubes and has a precision decoder. The color monitor’s only operating controls are contrast and brightness. The transistorized monitor, 8 inches and fully regulated, features a DC coupled video amplifier with keyed backporch clamp. It has a two channel video input and diode switcher, light weight, size adjustment and a horizontal displacement switch.

The new kinescope recording chassis is designed to fill the gap between the studio monitor and the elaborate professional kinescope recording monitor. It features internal blanking, video phase reversal, sweep reversal, aperture correction and regulated high and low voltage. The new audience and studio monitor, the CVA23, is a voltage regulated utility monitor offering full 10 mc bandwidth, but uses a 23-inch rectangular tube.

CONTINENTAL ELECTRONICS

Space 25W

Continental Electronics, a subsidiary of Lear-N-Vought Inc., this year will exhibit its 5/10 kw transmitter, remote control and fault alarm equipment, monitor receiver and magniphone. In way of new products it will show a new vidicon camera chain.

CUMMINS ENGINE CO.

Space 36W, 37W

This will be the first year of Cummins’ exhibit of its line of standby diesel generator systems which range from 60 kw to 400 kw. The exhibit will be newly designed by Elliot-Noyes, featuring cutaway model in action, lighting up display when regular power cuts off.

DRESSER-IDEICO CO.

Space 61W

A display of the firm’s tv, fm, microwave towers; their design, construction and inspection will be shown.

DYNAIR ELECTRONICS INC.

Space 49W

Two completely new lines of solid-state modular amplifier units, a new solid-state switching equipment, broadcast transmitters, closed circuit tv transmitters and other signal processing accessories will make up the Dynair exhibit.

The new amplifiers are the Series 1000 Equipment, a complete line of video and pulse modular amplifiers which plug into a 13½ inch-high frame; and the Series 3000 Equipment, similar except the modules mount in a 3½ inch frame and 12 modules may be mounted in a 19 inch width. The advanced design parameters include 20 mc bandwidths, minimum power and space requirements, meantime between failure ratings of approximately 5,000 hours, differential phase and gain of nominal amounts and minimal crosstalk.

The Series 5100 Switching Equipment is a remote controlled, solid-state, expandable modular system providing switching of signals free 20 mc information from any number of inputs to any number of outputs.

The TX-1B closed circuit tv transmitter and the TX-600H broadcast transmitter will also be shown. The TX-600-H produces 600 w visual and 90 w audio.

ELECTRA MEGADYNE INC.

(successor to EMI/US)

Space 4E

New equipment this year includes: a dial-operated monitor system, designed for greater simplicity in selecting various video/audio program sources from remote locations; a solid-state four output distribution amplifier; a solid-state four output pulse distribution amplifier; a custom designed switching system; a completely automated tv studio with advanced design vidicon cameras mounted on remote control pan and tilt heads.

Other equipment to be shown are the 4½ inch image orthicon cameras, a vidicon color camera, a new 2:1 vidicon and a display in EMI’s design and construction of custom audio and video control equipment.

ELECTRONIC APPLICATIONS INC.

Space 20W

Several new microphones, the C-12A, CKS4 and C-60 capacitor microphones will be shown. Also to be introduced is the new model D19C microphone for use where very, very high quality is needed, according to the manufacturer. The microphone was designed with a

BROADCASTING, March 25, 1963
shock-lock stand.

ELECTRONICS, MISSILES & COMMUNICATIONS INC.

Space 53W

EM&C this year will show vhf and uhf translators, translator accessories and uhf transmitters.

Personnel: Dr. B. W. St. Clair, Robert F. Romero, Henry Shapiro, Melvyn Lieberman, H. C. McKenzie.

GATES RADIO CO.

Space 44W

Several new products will be featured, including the new BC-1G 1 kw am transmitter which is completely re-styled externally and improved internally. It will be displayed along with a compatibly styled BC-5P-2 5 kw am transmitter.

Two Gates fm transmitters also will be shown: the 1000 w and 5000 w models for stereo programming. The M-6095 Cascade exciter and M-6146 stereo generator, two stereo consoles, a stereo limiter and new turntable pre-amplifier will be on display.

An operating exhibit of the new Cartritape II, three-cue tone cartridge tape system will be featured. The system offers a choice of one, two or three cue tones in a system that can be increased as needed by adding plug-in amplifiers.

Three new Gates microphones will be introduced and 10 audio consoles, including the three transistor models introduced at last year's NAB, will be on display.

Also featured will be a model of a 50 kw helicopter transportable system, which the company will soon deliver to the U. S. Army Signal Corp.

GENERAL ELECTRIC CO.

Space 19E

A new line of uhf transmitters and uhf zig-zag panel directional antennas will be introduced by GE. According to the company the frequency drift in the new antenna is no more than five parts in 10 million and is inherent in the transmitter design. Heart of the series is TT-55-A 100 w transmitter with transistorized crystal oscillator circuits for visual and aural carrier frequencies.

It can be used for certain low-power applications, but in most cases will serve as the driver for the TT-56-A, a new 12.5 kw transmitter, or the TT-57-A, a new 25 kw transmitter. The new transmitters require 35% less floor space than other models in the same frequency range.

The new antenna is the first non-resonant panel type available for uhf, according to GE. It makes available an almost limitless variety of directional radiating patterns. Made up of zig-zag panels, specific antenna designs are developed from a computer program which interpolates between closest values for more than 150 previously calculated patterns.

Other new products to be shown are 3" image orthicon color camera, professional live vidicon camera, color film camera, black and white continuous motion picture film projector, transistorized sync generator, 3" image orthicon black and white camera and educational tv studio package.

GE describes its four-camera film unit with four camera pickup tubes instead of the usual three as an advanced concept, based on a new transistorized vidicon camera to be introduced at the NAB show.

Three vidicons produce only chrominance information, the fourth serving as a monochrome camera carrying all the picture detail and brightness. H. E. Smith, technical products marketing manager, said the new color film system (PE-24-A) provides operating stability and reliability.

The system works on the coloring book principle in which a complete black-and-white picture is drawn and the color filled in. A single broadband vidicon channel produces the black and white image and three other vidicons fill in electronically with color.

Other items on exhibit will include 1 kw vhf high channel transmitter, 2,000 mc microwave antenna, helical antenna, portable and rack-mounted 2,000 mc relay, 4½" image orthicon vidicon channel produces the black and white film vidicon camera, film center multiplexer, black and white calibrator monitor, complete line of television monitors, relay switching system, transistorized remote audio amplifier, line of audio equipment.

GENERAL ELECTRONICS LABS INC.

Space 41W

The line of fm transmitters—1, 15 and 30 kw will be shown. Other products on display include stereo generators; SCA generators; stereo control consoles; fm relay receivers; GEL. Rust remote control equipment and GEL's new Autotelelog.

GPLL DIV., GENERAL PRECISION INC.

Space 12E

GPLL will introduce for the first time its new Precision 800 vidicon viewfinder camera chain and its Precision 580 vidicon film chain.

On display also will be GPLL's high resolution vidicon film chain, Model PA-550: 35 mm telecast projector, Model PA-200 and its tv projection system, Model PB-615.

HARWALD CO.

Space 68W

The Mark IV auto-load inspect-o-film machine with electronic graph recording scratch detection, will be featured. The Model U Mark II inspect-o-film, Junior Deluxe inspect-o-film, Splice-o-film automatic splicer, Sonomatic and Admatic continuous rear projection slide projectors will also be shown.

INTERNATIONAL GOOD MUSIC INC.

Space 65W

The Simplimation, IGM's automation equipment will be featured at the display. Also to be shown are the Heritage, Premier and Sovereign programming.

Personnel: Rogan Jones, Charles
Sprague, Gene Wagner, Homer Griffith.

INTERNATIONAL NUCLEAR CORP.
Space 3E

Transistorized equipment will make up INC's exhibit. Included are the TDA-2 video/pulse distribution amplifier, TDA-26 high gain video amplifier and TCA-3 camera amplifier.

Personnel: Raymond L. Weiland, Sondra Darlene Ewing.

ITA ELECTRONICS CORP.
Space 15E

ITA this year will show their line of fm and transmitters, fm and tv antennas, consoles, documenters and accessories.

JAMPRO ANTENNA CO.
Space 39W

On display will be a new single bay ch. 13 tv batwing antenna, Jampro type JAT 1/13H. A full scale antenna, capable of 10 kw input, it is designed for standby use.

Also to be shown is the Jampro fm radiating element featuring digital tuning, which permits simple end cap adjustment on the tower. This new method will permit extremely low VSWR ratios to be easily obtained, the company says.

Personnel: Peter Onnigian, Larry Seese, Taro Yodokawa.

JOHNSON ELECTRONICS INC.
Space 52W

Johnson Electronics will exhibit its transistorized equipment for background music. The display will feature tuners, amplifiers, demonstrators, and the company's Portasound Johnsonaire equipment. The tuner will have a new type chassis that will be introduced at the exhibit.

KLEIGL BROS.
Space 1E

A new SCR semi-conductor dimmer, which uses a silicon controlled rectifier, and a new line of quartz lighting fixtures will be shown. Also on display will be Kliegl's regular products—a complete line of tv lighting fixtures, accessories, wiring devices and control equipment for monochrome and color telecasting.

KRS ELECTRONICS
Space 38W

On display will be the KRS Stact Broadcaster, a six-deck cartridge tape recorder, featuring a reversible cartridge and complete remote control. The unit fits in 14 inches of rack space. The KRS three-deck recorder, which provides a complete tape cartridge system in one cubic foot area, will also be shown.

LOGOS LTD.
Space F-East

Color tape to film transfer systems will be exhibited along with black and white film techniques and complete video color facilities production.

Personnel: Charles F. Riley, Frank Thompson, Richard P. Sullivan.

MACARTA INC.
Space 42W

The West Des Moines company this year will display automatic magnetic tape cartridge recording and playback equipment and automatic tape magazine reconditioning and reloading products.

Test instruments designed for tape machinery and new dual-channel recorders and playbacks will also be shown.

MAGNETIC PRODUCTS DIV., 3M CO.
Space 19W

Displayed for the first time will be 3M's new Storette cabinet with audible range. The exhibit also will include the line of Scotch brand sound and video recording tapes. Mincom, a 3M subsidiary, will show its drop-out discriminator in the same space.

Mincom personnel: Ed Walsh.

3M personnel: W. H. Madden, P. B. Van Deventer, Forrest Watson, Tom Madden, William Herriot, Bob Ferderer, Don Rushin.

MAGNE-TRONICS INC.
Space 46W

The Programmer, a completely automatic tape playback system, featuring four tape units together with control system and clock, will be shown. The Programmer is manufactured by Tape-athon for use with the Magne-Tronics Motivational Music program service. A new tape rewinding system will also be displayed.

McMARTIN INDUSTRIES INC.
Space 43W

A transmitter SCA multiplex receiver is being introduced at this year's display. Tube models will also be shown.

The complete line of fm and SCA multiplex, frequency and modulation monitors, including the new RF amplifier, TBM-2500, will be displayed. The RF amplifier enables remote operation of any McMarten monitor and may also be used with other presently owned monitors where an established fm station is planning a new remote operation. Other monitors include the TBM-4000 and the TBM-3000/3500 combination.

Another new product is the TBM-1200 fm stereo rebroadcast receiver, with extremely high sensitivity—lug for 30 db of quieting. The receiver's output is capable of directly modulating certain fm stereo and/or SCA multiplex transmitters without going through signal demodulation and regeneration. The frequency response of the receiver is 20 to 100,000 cps ± ½ db with extremely low phase shift.

On display again this year will be the TBM-1000 and TBM-2000 fm and SCA multiplex relay receivers. A 32-watt transistor audio amplifier, new to the line, will be shown also.

MIRATEL ELECTRONICS INC.
Space 34W, 35W

Featured will be Miratel's complete new line of all transistor monitors, the first of which this company introduced last year. Included will be 8-inch through 21-inch sized monitors in rack and cabinet models in Miratel's "T" series, and the new "I" instrumentation series which features high and low voltage regulation and overscan and underscan.

Audio operated relays for program failure alarm and the Conelrad receiver line will also be displayed.

Personnel: W. S. Sadler, R. B. Hackenberger, N. C. Ritter, B. J. Klind-

These are the products G.E. introduced at the last two NAB shows

Not only did we introduce them, but we sold them, shipped them, installed them—and now they are operating successfully all over the country.
1963: PE-23-A Studio Vidicon Camera Channel
• PE-24-A 4 Vidicon Color Film Channel • PE-25-A Color Live Channel • BC-31-B Transistorized Monaural/Stereo Console • BA-32-A Transistorized Program Amplifier • BA-29 Transistorized Gated Unilevel Amplifier • TV-102 Transistorized Video D.A. • PG-5-A Transistorized Sync Generator • TT-55-A, 56, 57 UHF Transmitters • TY-96-B Zig Zag Panel Antenna

These are new products you can expect to see at this year’s show

They are ten more reasons why you can continue to look to General Electric for the newest and best in broadcasting equipment. See them at Booth 19-E.

Progress Is Our Most Important Product

GENERAL ELECTRIC

Mark Century Corporation
6 West 57th St., N.Y. 19, N.Y. Ct 5-3741

NAB PREVIEW

EXHIBITS CONTINUED

worth, D. Schulte, and P. Vogelgesang, H. T. McAdams.

MITCHELL VINTEN INC.

Space 62W

Mitchell Vinten will exhibit its Heron crab crane, a new hydraulic powered crab crane designed for use in large studios for the production of musical and dramatic shows, and features new control and drive systems. A heavy duty pedestal that provides a 50% greater range of vertical camera movement and a lower center of gravity. A lightweight pedestal for use with vidicon cameras. A remote broadcast dolly for use with mobile cameras used in the field, but portable enough for two men to carry it. Pan and tilt heads, called the Mark 3 Head, that have been adapted for color use as well as monochrome; the Mark 3 will be shown in action at the exhibit and is designed to be used with vidicon equipment and the lightweight pedestal described above.

MOBILCOLOR INC.

Space 60W

Developers of synchronized sound and color presentations for major radio promotions, the Mobicolor spring and Christmas radio promotions will be displayed.

MOSELEY ASSOC. INC.

Space 48W

Moseley will exhibit a dual 950 mc aural STL, a radio remote control system, a wire remote control system, a 10 w fm exciter, an fm stereo generator, and an SCA subcarrier generator. The fm exciter is new this year, as is the dual 950 mc aural STL. Moseley says the exciter is designed as a replacement exciter for fm transmitters and low power educational service. The dual STL is designed for fm stereo service as planned in the FCC’s new rulemaking to allow fm stations to make two simultaneous broadcasts on one aural STL channel for stereo broadcasting from the studio to the station’s transmitter.

Personnel: John A. Moseley, Howard M. Ham Jr., and George L. Kladrnik.

OZALID PRODUCTS

Space 63W

Duplicating equipment and materials for copy systems will be shown.

Personnel: Richard Lyman.

PEPPER SOUND STUDIOS INC.

Space D-East

Custom musical productions for radio and tv and radio station library service will be on display.

RADIO CORP. OF AMERICA

Space 5E, 6E, 10E

Studio demonstrations of fm stereo broadcasts will be among the features of the RCA exhibit. The latest transistorized equipment for radio stations, as well as new am remote automatic logging and control equipment designed to scan transmitter meter readings and to record permanently all operating parameters required by FCC regulations, will be introduced. The exhibit will have the first public showing of new tv film equipment and a preset switcher for controlling up to 10 tv program segments. A “live” tv studio will be set up to demonstrate four cameras—three for black-and-white and one for color. Exhibit visitors will be able to compare, side-by-side, the detail, shading and other features of pictures produced by the cameras on the same scene.

In tv tape recorders, RCA will show its TR-22, an all solid-state machine, operating in color. The TR-2, a universal type recorder capable of being used with a wide range of accessories, will demonstrate “pixlock, half-speed operation” and other features.

RCA’s exhibit space has been enlarged to accommodate a bigger display of broadcast equipment. It will be in the same location as last year’s exhibit and will include developmental models of future tv broadcast equipment.

The electron tube division’s display in Space 10-E will include image orthicon, vidicon, large power tubes, electronic instruments, microphones, nu-vistors, intercoms, batteries, dark heater tubes, novar tubes, citizen band radio, minireeds, transistors and high-fidelity components.

RAYTHEON CO.

Space 11E

Raytheon, equipment division, will exhibit its tv microwave relay equipment, a dual-link hot-standby studio to transmitter link and a portable microwave system for remote pick-up applications. The two systems consist of new KTR-1000K microwave equipment featuring wideband transmitter monitor regulated DC filament power, video modulators and transmitter klystron, and temperature compensated klystron anode voltage supply.

Personnel: Don Smith, Robert Keller, George Hinckley, Gene Love, Hugh Bannon, Henry Geist, Jack Banister, Phil Cass.

RIKER INDUSTRIES INC.

Space 58W

Riker Industries will display its expanded line of video modules which may be used in studio and master con-
STONEY BURKE
Music by
DOMINIC FRONTIERE

DOMINIC FRONTIERE, vice-president and musical director of Daystar Productions, was a violin prodigy at two and an accordion virtuoso at age six. As a young concert soloist and pop artist he gained acclaim all over the world. As composer-arranger-conductor, he has distinguished himself in recordings, the theatre, motion pictures and in TV. He has just completed the music of eight pilot shows for new series.

BROADCASTING, March 25, 1963

and there are 104 other regular network programs which use BMI music.

**NAB PREVIEW**

**EXHIBITS CONTINUED**

trol facilities. New products to be displayed will be all-transistor modules for:

Sync generator with deluxe sync lock, expandable special effects generator with joy stick positioner, versatile video switching system, automatic vertical interval test signals, sync comparator, stabilizing amplifier, a "revolutionary" power pulse distribution system and a VIT black and white reference generator.

Other new Riker transistorized modules are for: color bar generator, burst flag generator, color standard, video d.a., bar and dot generator and for a complete line of video test signal generators.

**ROHN SYSTEMS INC.**

**Space 50W**

Display will include am, fm and microwave towers, reflectors and associated equipment.

**SARKES TARZIAN INC.**

**Space 17E**

Sarkes Tarzian, broadcast equipment division, will exhibit a complete and integrated tv station complex. It will feature: studio camera equipment, film camera and projection equipment; heterodyne repeater, high and low power terminal microwave; simple mobile switching system through production studio switch equipment, with two variations of special effects systems. The exhibit will also feature the first showing of the completely transistorized studio equipment product line, cameras, film systems, synchronizing generators, switching and special effects equipment, and terminal distribution gear. This equipment will feature a new concept in industrial design.

**SCHAFFER ELECTRONICS**

**Space 73W**

Schafer products shown will include automation equipment, program automation systems, spotters, transmitter remote control and automatic logging equipment.

**SESAC INC.**

**Space E-East**

A new lp package will be introduced by SESAC. The *Just a Minute!* package consists of 10 lp's for themes and program features. Each cut is 60 seconds and is performed by a combo, orchestra or symphonic pops orchestra.

**SONY CORP. OF AMERICA**

**Space 31W**

A newly developed portable video tape recorder (TV 100) will be shown for the first time by Sony. It is transistorized and has push-button operation. The units are the first production models, flown in from Japan last week. Prototypes have been in use in Japan.

Sony's vtr portable is roughly the size of a suitcase—17½x25x16½ inches. It weighs 145 pounds and operates on AC current. Besides broadcast applications, Sony says the portable is suitable for closed-circuit, industry, school and hospital applications. A slowdown procedure cuts the movement to 1/60th of regular speed to permit analysis of action. It is said to use about a third the tape required normally.

Personnel: Bruce Birchard, Hugh Young, M. Morozano, K. Tsunoda.

**SOUNDSCRIBER CORP.**

**Space 54W**

Ben Mochan will exhibit its Soundsciber S-124 monitor. The S-124 is a single-channel recorder that maintains an automatic, unattended watch over daily transmissions. Only one tape change a day is needed with the S-124, saving the trouble of short-time recordings by the station staff.

Personnel: Gerald Northern, Charles Stancik, Robert Cooksy, Donald Fox.

**SPARTA ELECTRONICS**

**Space 56W**

Two models of Spartamatic cartridge systems, including stereo cartridge tape system and portable cartridge playback unit will be shown. An A-50 portable studio: an A-10 audio console and a Timecaster, which automatically gives the correct time with a jingle or other cued material by pushing a button will also be on display.

A new Sparta reel-to-reel tape record-
HERE'S YOUR ENTIRE STUDIO CREW...

WHEN YOU USE A GENCOM REMOTE CONTROL CAMERA SYSTEM

Because one man can operate two cameras, and be the performer on-camera when he desires, the new remote-control studio camera system offered by GENCOM makes possible a genuine “Automated TV Studio.” Each automatic shot box makes it easy to pre-set five camera positions, adjusting pan, tilt, zoom and focus at each position. To go to a pre-set shot, just press the button. To take over “manually” with the joy stick, just push the manual button. Pre-set shots repeat indefinitely, change easily. You must operate this system yourself to fully appreciate it. Try it out at NAB Booth 4E.
Take a 2nd look at Collins... find the 'surprise'!

You'll find plenty of surprises in store for you as you examine the Collins equipment on display at this year's NAB Show.

When you visit our booth, we hope you'll poke around in our complete line of AM, FM and stereo. We want you to take a really good look at everything... inside and out. Try out the demonstrators. Ask a few questions. You'll be pleasantly surprised to find out the many new things Collins has to offer you.

Also, we're introducing 2 new products in our expanding line of stereo equipment — the 26U-2 stereo peak limiting amplifier and the 900C-1 stereo modulation monitor.

See everything that's new with Collins at Booth 27W in the West Exhibition Hall of the Conrad Hilton. Come by and get the full story of quality in depth from Collins.

Georgia Station
Wins Transmitter

Athens, Ga. (Special) — Radio Station WGAU in Athens today was announced the winner of an Old Transmitter Hunt contest sponsored by Collins Radio Company.

The station's prize-winning transmitter was a Collins 300F, 250-watt model which has been in constant use since 1936. The prize offered by Collins in this contest was a new Collins 20V-3 transmitter, which has been installed and is now in service at the station.

The old transmitter will be on display in the Collins booth at the National Association of Broadcasters' national convention opening next weekend in Chicago.

"To fully appreciate the value of the transmitter," Collins officials said, "you have to see it in action... to hear it... and to compare it with other equipment. You'll find the Collins transmitter simply outstanding in performance... outstanding in quality of construction... outstanding in value to the radio station owner."
NAB PREVIEW

EXHIBITS CONTINUED

ing and playback unit will be introduced at the display.

SURROUNDING SOUND INC.
Space 76W

The Broadcaster sound equipment will be demonstrated. It is a self-contained sound laboratory for am and fm radio.

TEKTRONIX INC.
Space 29W

On display will be video-waveform monitors, vectorscope for color tv phase measurements, oscilloscope trace-recording camera, tv and bc test equipment—generators, amplifiers, scopemobiles and auxiliary test equipment.
Personnel: Charles Rhodes, Ron Olson, Keith Williams, Ralph Ebert, Cliff Briesenick, Frank Elardo, Terrell Jamison, Joe Gardner, Paul Whitlock, Jerry Coomer, Bob Siegert, Ed. Vaughn.

TELEMET CO.
Space 2E

Telemet Co. will show its latest equipment for use in, and testing of, black-and-white and color television broadcast systems. The new equipment to be shown will include: a completely transistorized special effects generator that features individual plug-in switching amplifiers, waveform generator and power supply; and a transistorized portable video transmission test using only ac power to supply signals for studio or transmission facility check out and alignment.

Also to be demonstrated is a transistorized EIA sync generator that supplies sync, blanking and drive signals in accordance with EIA standard RS170. This unit requires only seven watts of power.

Other Telnet transistorized equipment to be exhibited: video distribution amplifiers; a mid-frequency phase corrector; a pulse distribution amplifier; a multiburst generator; a staircase generator; and a Sin 2 pulse and window generator.

Color equipment on display will include: a tv utility monitor, a color bar generator and an encoder.

TELEPROMPTER CORP.
Space 31W

Focal point of the exhibit will be a three-part screen automated slide presentation telling the story of the company and its products and demonstrating the TelePro and RA-100 Random Access projectors in actual use. TelePrompTer also will display for the first time the products of its recently acquired subsidiary, Conley Electronics.

The Conley division is the manufacturer of Fidelipac endless loop tape cartridges. Also shown will be the Amphicon 190 large screen tv projector and prompters.

Personnel: Irving B. Kahn, Peter C. Rink, George Andros, Joseph Minsteri and Bradford Macy.

TELEQUIP CORP.
Space 3E

Telequip will show the new line of PYE tv equipment, including the PYE 4½" image orthicon camera, for which the New York company has recently been named distributor. Also new this year will be a demonstration of the Maurer-Matic 13, 35mm film processor and studio and remote lighting equipment employing sealed reflector lamps. Features of the light fixtures include lightweight, small size and lower replacement costs.

Personnel: John Schlager, Howard L. Ryder, John J. Camarda, Derek Clowes, Robert Hair, William Jones.

TELEVISION ZOOMAR CO.
Space 59W

The new Angenieux-Zoomar lens, named the 10-2-1, will be shown. It operates with a minimum of three feet working space and permits coverage of an area of 40 inches down to 4 inches with a 10 to 1 zoom ratio. Zoomar will also offer a remote servo control for its lenses which was developed by Evershed & Vignoles, London, and for which Zoomar is the American distributor.

Personnel: Jack A. Pegler, Bill Pegler, Dr. Frank G. Back.

TOWER COMMUNICATIONS CO.
Space 24W

Towers—microwave, am, fm, tv, special (both guyed and self-supporting); microwave passive reflectors, portable pre-built buildings, and parabolas will be on display.

U. S. ARMY
Space 66W, 67W

U. S. NAVY RECRUITING SERVICE
Space 69W

UTILITY TOWER CO.
Space 40W

Utility will display a complete line of towers and accessories for and broadcasting services. Accessories include insulators, ground systems and prefabricated steel transmitter buildings. The Oklahoma City company offers a complete package including installation and maintenance services.

VISUAL ELECTRONICS CORP.
Space 14E

A complete solid-state television broadcast equipment line will be introduced by Visual Electronics. Included are: fully transistorized Visual zoom cameras in both 3" and 4½" image orthicon models; a transistorized video switching system with modular unitized construction; a transistorized vtr "mod de-mod"; transistorized audio tape cartridge equipment, with a reversible, continuous-loop cartridge; transistorized audio consoles and a modular audio amplifier series.

A diversified line of radio-tv equipment and program automation equipment will also be shown, with the entire exhibit designed to indicate the completeness of the new transistorized lines, according to Visual. Included in

George did it and he's glad.

He signed up Radio à la Carte, George P. Mooney did, for WKGN, Knoxville. Listen to him: "Radio à la Carte is just what radio needs. Dave Diamond and I are happy to be an à la Carte station." You can do it, too. See Mary Kempner and Matt Herson in Suite 1119A, Conrad Hilton Hotel.

NEW!

snap-in cartridge loading—foolproof, split-second, one-hand operation

INTRODUCING THE

Spotmaster 500A

Cartridge Tape System

Now Spotmaster brings you the new 500A cartridge tape system, featuring split-second, snap-in cartridge loading and one-hand operation.

- With sleek new eye-appeal to match its new ease of operation, the 500A joins the Spotmaster family of equipment from Broadcast Electronics—pioneer and leader in tape cartridge broadcasting. On five continents, more stations use more Spotmasters than any other cartridge tape units... because only Spotmasters combine these advantages:
  - RUGGED QUALITY. Designed by broadcast engineers for the broadcast industry, Spotmasters give you outstanding dependability in action, combined with maximum durability and minimum maintenance requirements.
  - MOST COMPLETE LINE. Spotmaster products include recorder/playback and playback-only units... compact and rack mount models... stereo and mono... remote controls, sound sensors, and cue-trips... accessories for field use... cartridges and cartridge winders and timers... desk-top, wall-mount, and lazy susan cartridge racks... right down to color-coded cartridge tags.
  - LEASE OR PURCHASE—THE CHOICE IS YOURS. In addition to attractive "package" plans for purchase of Spotmaster systems, Broadcast Electronics offers an outstanding leasing arrangement with renewal and purchase options.
  - TOP SPECS. 50-12,000 cps ± 2 db @ 71⁄2 ips... harmonic distortion below 2%... less than 0.2% wow and flutter... S/N ratio, 50 db below 2% distortion... automatic electronic pulse cueing, with cue trip available on all playback models for automatic sequential switching... transistORIZED for dependable long life... hysteresis synchronous motors in all models... standard continuous loop cartridges, 20 sec. to 31 min. duration (or wound to your specifications).
  - FULL-YEAR GUARANTEE. Broadcast engineering stands behind all Spotmaster systems with an iron-clad guaranty for your protection.

Join the hundreds of stations that enjoy pushbutton broadcasting by Spotmaster... and have said goodbye to scratchy transcriptions, missed cues, wrong speeds, jumped grooves, and other production headaches. Learn the whole story of Spotmaster versatility and quality. Call or write for full information... today!

Broadcasting, March 25, 1963
Who can deliver a fully transistorized broadcast VTR for less than $35,000?
Now: the Videotape* Recorder is practical for any sized station. And low-cost mobile tape applications are a reality. It’s all because of the VR-1100—anther Ampex tape recording innovation for television. The VR-1100 is a transistorized broadcast recorder that costs less than $35,000. It has two speeds—15 ips and 7½ ips. Provides three hours of recording at 7½ ips. Is compatible with all 4-head recorders. Takes less than half the floor space of previous VTRs. Weighs ½ as much. And can be equipped for single-camera production—by adding the Vertical Lock Accessory that allows use of the Ampex Electronic Editor. What’s more, low power requirements and a new convection cooling system eliminate the need for blowers or special air conditioning in the station. Controls are minimized for simple operation. Maintenance costs are low. Reliability and performance characteristics are superb—all in the Ampex tradition. Order now for Fall programming. For complete details call your Ampex representative or write the only company providing recorders, tapes and core memory devices for every application: Ampex Corporation, 934 Charter Street, Redwood City, California. Term financing and leasing are available. Sales and service engineers throughout the world.
Antonisse, K. W. Spicer, self-powered, is Andre, 116

NAB PREVIEW
EXHIBITS CONTINUED

the line will be a multi-deck broadcast cartridge tape unit featuring a reversible, continuous loop cartridge. Each cartridge of the new tape unit, the KRS Stat Broadcast 6B-6VE, will hold up to 32 minutes of recorded material.

VITAL INDUSTRIES
Space 30W

The VI-1000 solid state stabilizing amplifier, custom engineered for every application and the VI-10 solid state video distribution amplifier, with a plug-in module having four isolated outputs will be features of the firm's display.

A solid state pulse distribution amplifier, VI-20, which regenerates EIA tv pulses and distributes them through four isolated outputs also will be on exhibit. It is a self-powered, plug-in module.

VITRO ELECTRONICS
Space 46W

A new kind of station monitor, the Nems-Clarke spectrum display unit, Type SDU-520, will be displayed. It is designed to give the broadcaster a complete audio and visual picture of his assigned frequency. Operating in a tuning range from 54 to 260 mc, the SDU-520 is capable of measuring frequency deviations, determining sideband or subcarrier attenuation and can be used to locate spurious radiation and sources of interference.

Vitro will also show the complete line of Nems-Clarke broadcast equipment, including rebroadcasting receivers for fm and tv, precision measuring devices and video jacks and plugs.

WHBF-FM, Rock Island, Ill. selects ATC automated system

WHBF Chief Engineer, Robert J. Sinnett, is shown checking out the ATC system that will put WHBF-FM on a fully automated programming basis. The components selected will provide music, news, commercials, production aids, and program logging automatically. The system was selected by WHBF because the flexibility enables them to change programming structure as easily as dialing a phone. Broadcast personnel may be released from control operation for more profitable activities.

STOP AUDIO-LOGGING PROBLEMS PERMANENTLY!

The SoundScriber S-124 MONITOR does it unattended... twice around the clock

The MONITOR records magnetically on special time-scale Dupont Mylar tape... allows you to trace any broadcast to the very second it occurred.

Exclusive transverse recording process compacts 24 hours of recording onto a single 3 3/4" spool.

Makes recordings tamper-proof.

TESTED and PROVEN by NETWORKS and STATIONS

Networks like CBS, NBC, Canadian Broadcasting and hundreds of stations: WUNQ, WOR, WGMG, WCAU, WBDM, WJBK, WJLB, WJLB, KFIV, KLAC and KMPC... to name just a few, are now using the SoundScriber S-124 MONITOR.

Meets FCC licensing requirements. Magnetic tapes can be erased and re-used, but they can't be edited. For more details write to SoundScriber or...

Tubes designed from the user's viewpoint
...use them wherever reliability is essential

When reliability really counts—as it does in broadcasting—be sure with tubes custom-designed and tested for the job.

Sylvania engineers traveled the country—met with engineers and maintenance groups in broadcasting, public service radio, industry, the airlines—listened to their problems and studied them. From this came GB Gold Brand, a superior line of new and upgraded tubes, each tailor-made to a specific job. A given tube may have, for example, low noise, exceptional stability or vibration resistance. Or a critical parameter may be as much as three times the usual value. In each case, performance and reliability have been verified by actual user experience as well as laboratory testing.

Electronic Tubes Division, Sylvania Electric Products Inc., 1100 Main St., Buffalo 9, N. Y.
Tarzian's new "C" model, fully solid state Vertical Interval Switcher, incorporates all the desirable features of the highly successful VIS-88 plus recent engineering refinements adding even greater performance.

This switcher does more—in less space—than any other available. All the advantages of transistorized switching are yours in a compact, low-cost package.

- NAB CONVENTION PREVIEW
- BROADCASTING, March 25, 1963
STEP INTO
TOMORROW
WITH TELEVISION
BY TARZIAN

See it at
NAB—Space 17E

A complete line of Solid State television broadcast equipment will be unveiled by Sarkes Tarzian, Inc. at the National Association of Broadcasters Show in Chicago, March 31.

Reflecting an outstanding capability in the engineering and manufacturing of sophisticated broadcast equipment, the entire Tarzian line will introduce a new concept in the design of television equipment. From the exciting, functional exteriors by Schory-Steinbach Associates—Industrial Designers—to the incomparable transistorized engineering, the new Tarzian look is a look of quality—quality in performance matched by quality in appearance.

These solid state electronic products come to you in the longtime Tarzian tradition of uncompromising quality at reasonable cost.

FORD STILL SKEPTICAL OF COMMITTEE
Fears uhf development group may encourage bad risks

While one FCC commissioner was involved last week in plans for the commission-sponsored uhf-development committee, one of his colleagues continued to express concern that the commission might be inviting investors to “lose their shirts” in uhf.

Commissioner Frederick W. Ford, who had opposed creation of the committee, said last week he fears the committee might encourage investment in uhf stations before there are enough all-channel sets in circulation to give those operations “a fighting chance.”

But Commissioner Robert E. Lee, chairman of the Committee for the Full Development of Uhf Broadcasting, said stimulation of investment won’t be one of the group’s functions. He said the committee, which had its organizational meeting two weeks ago (BROADCASTING, March 18), will be concerned primarily with technical problems.

Commissioner Lee, meanwhile, appointed an executive committee of 20 members and scheduled a closed meeting for the group in Chicago on April 4, following the NAB convention. With the aid of commission staff members, he has also been developing subjects for discussion at the Chicago meeting.

Original Proposal - Commissioner Ford’s concern stems from the original proposal for the committee, which was advanced by L. M. Sandwick, of Electronic Industries Assn. In a letter to Sen. John O. Pastore (D-R.I.), chairman of the Senate Communications Subcommittee, Commissioner Ford noted that Mr. Sandwick had suggested that the committee might educate broadcasters, dealers and distributors on “how uhf can be made to succeed.” Mr. Sandwick went on to say it’s essential that venture capital be attracted to uhf.

This idea, Commissioner Ford said, was included in the commission’s notice proposing the committee. He referred to a passage which said that the committee “could perform the very useful function of collecting and disseminating information concerning the practical problems confronting the uhf broadcaster in differing market circumstances, the methods used by broadcasters to meet those problems, and whether a particular method was successful or effective.”

Commissioner Ford said such promotional activities would be “contrary to the philosophy of the all-channel receiver legislation.” The committee, he said, might “oversell” uhf broadcasting . . . rather than allow natural forces to operate gradually . . . as the legislation contemplates.” He added that the committee might precipitate “a tragic setback similar to that which occurred in the early 1950’s when inferior equipment, public indifference and the apathy of advertisers combined to drive so many uhf stations off the air.”

Trade Association Work - The commissioner also feels that if the committee engages in promotional activities, the commission will, in effect, be sponsoring a trade association.

Commissioner Ford said the FCC’s association with the committee “gives the appearance the commission is unduly encouraging investment of private funds in uhf.” He said this “will tend to obscure” the hazards involved. He added that although the commission is responsible for encouraging the use of radio and tv and developing a nationwide broadcasting service, “public attitudes and competitive forces will determine to a large extent whether a broadcasting service is to remain viable.” Commissioner Lee, however, indicated he had no basic disagreement with Commissioner Ford, who approves the idea of a committee devoted exclusively to solution of uhf’s technical problems.

“We’re not going to recommend investment in uhf,” he said. He added that the only “education” programs the committee conducts will be devoted to the technical problems. He is hopeful that seminars, in which experts would discuss these matters, can be held in new uhf markets for the benefit of tv set dealers and servicemen.

Robert G. Weston, Commissioner Lee’s engineering assistant, is serving as executive secretary to the full committee, and George S. Smith, the commissioner’s legal assistant, is legal counsel. Arthur H. Gladstone, an FCC hearing examiner, is special counsel.

Commissioner Lee said the executive committee, at its meeting in Chicago next month, will decide on areas of study and set up subcommittees to handle them. The next meeting of the full committee will be scheduled for late April or early May, he said.

FCC wants change in Communications Act

The FCC has approved a request for legislation to eliminate the so-called “anti-Avco” amendment that prohibits the commission from considering, in station transfers, whether anyone but the proposed purchaser should be granted the license.

The legislative proposal is awaiting consideration by the Senate committee, which must pass all legislative requests by agencies, before being sent to Congress.

The proposed bill, reportedly, would not add new language, but merely strike the Communications Act provision banning the FCC from considering transfer of a property “to a person other than the proposed transferee or assignee.”

Commission officials regard this language, added in 1952, as “unduly restrictive.” They feel the commission should have more discretion in deciding how to proceed in station transfers.

Other FCC legislative proposals and their status:

Ctty regulation—A bill has been drafted but not yet approved by the commission. It was worked out by commission staff members with representatives of the National Community Television Antenna Assn.

Network regulation—Draft legislation is not yet prepared on this. The commission wants to act first on the report its Network Study Staff submitted on the lengthy investigation of networks.

Petitions for interventions — Ready
Will spring bring a thaw in FCC 'freezes'?  

The appearance of spring last week coincided with indications that the end of two FCC freezes—on am and fm grants and applications—may be in sight.

The warming trend in am matters was heralded by the staff's submission of a recommendation for a proposed rulemaking to revise the national allocation policy. The commission hasn't discussed the proposal in detail yet, but it's understood that, among other things, it provides for new engineering standards that would make am grants more difficult to obtain in markets already heavily served by standard radio, but easier in underserved areas.

The commission imposed the am freeze which, with some exceptions, applies to new or changed facilities, on May 10, 1962, to provide a breathing space in which it could consider ways of dealing with the so-called population explosion in am stations. The commission noted that current am rules are essentially the same ones that were in force 20 years ago.

How soon the freeze can be lifted is anyone's guess. It depends on how fast the commission—now that it has a proposal before it—can operate its rulemaking machinery. But there is some hope within the agency that the job can be completed by early fall.

An end to the fm freeze seems a more immediate prospect. It was imposed Dec. 21, 1962, at the time the commission requested industry comments on a proposed table of allocations for the 80 commercial fm channels in the U.S. The deadline for comments passed Monday and reply comments are due April 17. The proposal will then be brief for action, and some officials feel the commission could act in this matter and lift the freeze before the August hiatus.

Another "freeze" imposed by the commission involves the 13 clear channels it broke down 18 months ago ( Broadcasting, Sept. 18, 1961). It is deferring action on grants because of a resolution adopted by the House of Representatives last July, asking the commission to delay for at least a year.

WKRG replies to unfair trade charges

FCC TOLD NO MONOPOLISTIC PRACTICES TAKE PLACE

The FCC last week reported it had received complaints that WKRG-AM-TV Mobile, Ala., uses unfair trade practices in combination with the Mobile Press Register Inc. which owns 50% of the stations and Mobile's only daily newspapers.

On March 6 the commission sent WKRG-AM-TV a letter requesting that the station reply within 15 days to charges that it had used its connection with the Press Register to foster monopolistic trade practices. The deadline was met by WKRG-AM-TV last Thursday (March 21).

WKRG-AM-TV told the FCC that when the Press Register bought its 50% of the stations the licensee promised it would operate the tv and radio stations separately from the newspapers. WKRG-AM-TV said that it believes it has upheld this promise.

The FCC said that its investigations did not uncover sufficient information "to justify institution of hearing proceedings" but what information it does have indicates that the charges against WKRG-AM-TV "were neither frivolous nor completely unfounded."

The commission told the Mobile amtv to answer the allegation that "executives or employees of the Mobile Press Register have used the threat, express or implied, that favorable publicity will be given those who advertise on WKRG-AM-TV and that unfavorable publicity, or no publicity, will be accorded those who advertise on rival stations or refuse to advertise on WKRG."

Separation Policy • WKRG said that it believes that its operating policy is adequate to safeguard against monopolistic practices. The station said that only Kenneth R. Giddens, president of WKRG-AM-TV, controls the station's operations, both the programming and business practices. The only Press Register executive active in station business is William J. Hearin Jr., who has to countersign checks, as representative of the newspapers' interest. WKRG admitted that at times Mr. Hearin promoted time sales, but that the licensee's board of directors stopped this practice.

WKRG said that advertising columns in the newspapers are open to rival radio and tv stations, just as WKRG sells time to competing newspapers. However, WKRG did not specify any particular newspaper.

The station told the commission that there are no combination rates for those who buy both space in the Press Register and time on WKRG. Neither is any preferred rate given for time on WKRG if advertising is purchased in the papers and vice versa, the station said. WKRG also disclaimed any discrimination against any party who advertises with other papers or stations.

News For All • WKRG said that the Press Register makes the news it gathers available to the radio and tv stations which decide how that news shall be used. The station said that some of its newscasts originate from the Press Register newsroom, but that credit in these cases is given to the paper.

The station pointed out that this same news is released to the AP and UPI.

WKRG said that the Press Register carries the program schedules of all
stations in the area, as well as its own. The station also uses other newspapers and assorted media for promotions, WKRG said.

In summing up, WKRG said that it is fully aware of its responsibilities not to create monopolistic practices because of its association with The Press Register.

**Government Concern** - The FCC said that it “has many times expressed concern over the possible concentration of control of media” and that it will take “cognizance of anti-competitive practices” in its evaluation of a licensee’s operation.

The commission said the Mobile dailies’ partial ownership of WKRG-AM-TV “creates a tendency toward concentration of control of media” in Mobile. It warned that WKRG should maintain “a degree of vigilance...which may have been lacking in the past.”

FCC Chairman Newton N. Minow expressed the commission’s concern over this matter at hearings by the House antitrust committee two weeks ago (Broadcasting, March 18).

**Dodd seeks more funds for ‘violence’ probe**

Sen. Thomas J. Dodd (D-Conn.), who still has not shown to his colleagues a staff report written from 1961-62 Juvenile Delinquency Subcommittee hearings on the effects of TV’s violence on youth behavior, says that findings in this so-far secret report justify a similar probe of motion pictures directed at youngsters.

Indications were that the TV hearings—not the report and its legislative recommendations—would be published this week.

“Competition and the drive to obtain high ratings” in television is responsible for the use of “unwholesome, harmful, or at best only inferior shows,” Sen. Dodd said in a letter justifying sub-committee budget requests to Senate Judiciary Committee Chairman James O. Eastland.

A clear warning to movie people is in the Connecticut senator’s justification for a $188,000 appropriation to keep his Delinquency Subcommittee going: “Certain low-grade films particularly prevalent on the screens of drive-in theatres have led Subcommittee investigators to question whether industry leaders exercise sufficient responsibility toward viewers of their productions,” the senator wrote.

The Senate approved the request.

**NAB wants delay in FCC’s new logging rule**

The NAB last week asked the FCC to delay the effective date of its new rule which, in addition to permitting automatic operating logs, requires stations to keep a maintenance log and have transmitting equipment checked every day by a first-class engineer. The NAB requested that the rule (Broadcasting, Feb. 25), now scheduled to take effect April 8, be postponed until June 8.

The association’s request contended that keeping the maintenance log will force stations to adopt new operating practices and that more time is needed to allow broadcasters to fully understand the rule and adapt to it.

At least one individual broadcaster has voiced discontent with the new rule. Phillip Whitney, general manager and chief engineer of WRFH (FM) Winchester, Va., says that the station’s transmitter is high in the Blue Ridge Mts. and cannot be serviced every day (see Open Mike, page 18).

The NAB’s petition noted that the new rules are to be discussed at the association’s convention in Chicago April 1-3, and the proposed time extension will allow broadcasters to take “full advantage of this counselling. . .”

**Commission imposes censorship, NAB says**

**MEMO TO FCC REQUESTS NO MORE LOCAL HEARINGS**

The NAB last week accused the FCC of having imposed “a very real, although somewhat illusory censorship” on broadcasting.

The charge was contained in a memorandum filled with the commission on the FCC’s Omaha hearing on local live programming. The memorandum called that hearing—and the one held in Chicago last year—an irresponsible attempt “to exert a form of government control over programming.”

KETV (TV), KMTV (TV) and WOW-TV—the three stations involved in the hearing—did not file comments.

The memorandum, submitted by Douglas Anello, NAB general counsel, renewed NAB President LeRoy Collins’ request that no more such hearings be held. The commission, it said, “should halt its efforts to govern by harassment, by needling, by nibbling in a proceeding directed indiscriminately against all broadcasters.”

But the memorandum didn’t limit itself to these activities. It said that, despite the no-censorship provision of the Communications Act, a whole range of commission actions over the years has resulted in a deterioration of broadcasters’ freedom.

**Real Censorship** - Judged by the standard applied to the printed press, the memorandum said, “broadcasting is
Been seeing any white flashes lately? Those are dropouts in your tape. They cost you money. They spoil your picture.

That's why we developed this Dropout Killer

The Mincom Video Tape Dropout Compensator

This is a money-saving first. The new Mincom Dropout Compensator for TV tape. The Compensator kills perceptible dropout effect in video tape playback. Reduces station overhead by eliminating costly engineering evaluation time and unproductive wear on recording equipment.

And, of course, the Dropout Compensator helps you put a superior picture on the air from any tape, old or new.

A compact module, compatible with all existing VTR equipment in color or black and white.

Write or call for complete specifications.
Everybody keeps getting into the act

NAB's Bell Tells Moss Hearing the House Manages News, Too

Congressmen investigating charges of news management by the Kennedy administration were reminded last week about "news management" on the Hill.

The prodding came from Howard H. Bell, NAB vice president who called their attention to the fact that radio and TV are still denied access to cover House committee hearings with microphone and camera. His remarks were addressed to Rep. John E. Moss (D-Calif.) and his House Sub-committee on Government Information.

Departing from his prepared remarks, Mr. Bell interjected a reminder that House rules still prohibit broadcasters from covering House meetings.

"I hope you'll forgive me for this commercial," he added.

In his statement, Mr. Bell emphasized what other panelists appearing before the committee maintained:

"The American people at all times are entitled to be fully informed on the actions of government, excepting matters directly and specifically impairing the national security."

Mr. Bell also called for a meeting between Pierre Salinger, White House news secretary, and representatives of all media, to discuss allegations of news management. Such a meeting had been scheduled by Mr. Salinger for April 5-6 at Airline House, near Warrenton, Va., but was postponed because of a "conflict" with the hearings of the Moss committee.

Affirmation of the people's right to know what the government is doing except where military security is involved was stressed by all other spokesmen for news media at the hearing. They represented American Newspaper Publisher's Assn., American Society of Newspaper Editors, Sigma Delta Chi, National Editorial Assn. and representatives of various newspapers and periodicals.

A strong indictment of Arthur Sylvester, Dept. of Defense press chief, was made by Clark Mollenhoff of the Cowles Publications. He called for Mr. Sylvester's resignation because it was Mr. Sylvester's remarks shortly after the Cuban crisis that sparked the controversy.

Mr. Sylvester is alleged to have said that news management is a function of war weaponry as is "the right to lie" when there is a possibility of nuclear war. He also ordered Pentagon personnel to report meetings with newsmen, a directive still in effect but not now being implemented.

A defense of sorts was made by James Reston, Washington bureau chief of the New York Times.

Mr. Reston said things weren't as black as they have been painted, and that there is more news available to reporters in Washington today than 20 years ago.

He also added: in discussing the Sylvester "right to lie" principle, "It is the basic responsibility of the President to defend the people of this country. In the ultimate extremity it may be justified to deceive the people for the purpose of deceiving the enemy. . . ."

Mr. Sylvester is to be heard by the committee today (March 25).

in fact burdened with a very real although somewhat illusive censorship."

It added that, over the years, the commission "has acted in a manner that does, in fact, repress broadcast communications. This repression exists where deliberate actions and activities operate to change the format of a station's programming through the use of power over, and leverage against the broadcast licensee."

"Repressions" cited in the memorandum include:

- The request for a detailed breakdown by percentages for program information.
- The questioning of certain aspects of the breakdown with the implication that sustaining is better than commercial; local better than remote.
- The pronouncements by those in authority that there should be more education and discussion and less entertainment.
- The format of inquiries directed to licensees who wish to change program proposals."

The memorandum said "all of these exercise a leverage that tend to induce conformity with certain government preconceived program ideas."

The NAB said it doesn't dispute the commission's authority to review an applicant's determination of audience wants and community needs. But, it added, the commission must accept the licensee's "honest and prudent evaluation of these needs and how he can best meet them."

Otherwise, the memorandum said, the commission would be substituting its judgment for that of the broadcaster—and "the ascertainment of matter to be broadcast remains solely, not primarily that of the licensee."

The memorandum said there was "no logical or legitimate rationale" for the hearing on the programming of the three television stations in Omaha. The NAB said no complaints about the programming had been received and that the commission had renewed the stations' licenses six months previously.

No Fishing Party • The memorandum also said the section of the Communications Act authorizing the commission to institute hearings on its own motion was "not intended to cover any exploratory operation or fishing expedition."

It said "there must be an affirmative finding that the public interest would be served by such an inquiry."

The NAB recalled that the commission had "invited one and all to come and publicly air their grievances" against the Omaha stations, and added:

"They came, approximately 125 of them, not to bury, however, but to praise. Only two revealed any complaint, and these, as representatives of performing unions, expressed the completely understandable desire that the stations employ more of their numbers."

The memorandum also indicated criticism of the manner in which the hearing was conducted. It said that although the testimony reflected satisfaction with the Omaha stations, "the questioning indicated that the questioners were not overly impressed. . . ."

The memorandum described questioners' interest in local live programming "as almost obsessive," and said that while witnesses "were slow to blame stations if their organizations had not been the subject of a full-blown documentary . . . the implication of the questioning . . . was that perhaps the stations should have been more aggressive in seeking the participation of organizations in the preparation of such programs."

The hearing was conducted by Commissioner E. William Henry with the aid of four commission staff members.

FCC Must Decide • The memorandum said that the commission, "by rashly initiating a novel and crude form of inquiry," now faces a "dilemma" — it must either concede "the Omaha stations have successfully determined the needs and interests of the public, or it must substitute its own methods for
Philco keeps its hat in the ring

WILL STAY IN FIGHT FOR NBC'S PHILADELPHIA OUTLET

Philco Broadcasting Co. says it is back in the fight for Philadelphia's ch. 3—this time to stay.

This was the company's prompt reaction to the FCC decision disapproving the agreement under which Philco would have withdrawn from its contest with NBC, which is now operating on ch. 3. Under the agreement, NBC would have paid Philco up to $550,000 as reimbursement for its expenses in prosecuting its application for a new station.

In rejecting the proposal, the commission said it did not want to deny itself the opportunity of deciding between two qualified applicants for the channel. At the same time, it asked Philco to decide, "without undue delay," whether it would continue to press its application (Broadcasting, March 18).

On Monday—less than 72 hours after the order was issued—the commission had its answer. "We will proceed with our application," Philco's counsel, Henry Weaver, told FCC Hearing Examiner Cunningham, when the hearing resumed after a two-month lay-off.

Surprise Announcement • This response was in accord with earlier Philco statements that, if the agreement were disapproved, the company would resume its fight for the channel. But it came as a surprise. Most observers, including FCC officials, expected Philco to withdraw, regardless of whether the agreement was approved. Some officials think Philco might still pull out before the contest goes much further.

The agreement was one of a series reached between NBC-RCA and Philco Corp. and its parent corporation, Ford Motor Co. The other agreements ended long-standing patent-rights litigation, and provided for payment by RCA of $9 million to Philco Corp. for patent rights owned by the latter (Broadcasting, Jan. 7). In requesting FCC approval of the withdrawal agreement, Philco said it wanted to free its executives for the task of "re-establishing Philco Corp. as a major competitive force."

The complex FCC hearing is now scheduled to resume April 22. At that time, it will pick up where it was suspended in January, when the commis-
A
POSITIVE
APPROACH

Lang-Worth has taken the POSITIVE APPROACH in regard to the Radio Industry’s needs for commercial selling tools.

“Radio Hucksters and Airlifts” is now combined with “IMAGES.” A POSITIVE revenue builder.

“Radio Hucksters and Airlifts” is a service of over 2,000 selections keyed to calendar events and added to monthly.

“IMAGES” are custom-made — all new — 60-second spots for specific accounts.

You tell us who and “THE LANG-WORTH MAN” will sell him for you.

Hempstead, N. Y.

L. B. Wilson Inc.’s finances questioned

APPLICANTS ASK IT BE ISSUE IN MIAMI CH. 10 HEARING

L. B. Wilson Inc.’s financial qualifications to build and operate a station on Miami’s ch. 10 were questioned last week by two of that company’s three competitors for the channel.

A petition to enlarge the issues in the comparative hearing which began two months ago was filed jointly by South Florida TV Inc. and Civic TV Inc. The financial qualifications of both companies are already among the issues to be settled in the hearing. The fourth applicant is Miami TV Corp.

L. B. Wilson owns WLWB-TV, which has been operating on the channel for a four-month authorization since November 1962. (It also owns WCKY Cincinnati.) The company won the grant in July 1960, after the three other original applicants for the channel were disqualified for ex parte contacts with then Commissioner Richard Mack.

In their joint petition, South Florida and Civic said that while L. B. Wilson originally appeared to be financially qualified, that firm’s most recent balance sheet shows “substantial deterioration.”

They said as of Sept. 30, 1962, the company has assets of $160,295.77 and liabilities of $655,723.44, or a deficit of $454,427.67. They also said the company has a further obligation of $298,000 to RCA, and a possible tax liability of $132,000, claimed by the Internal Revenue Service. They said that L. B. Wilson Inc. operated at a loss of $67,000 in the fiscal year ending Sept. 30, 1962.

In a separate petition, affecting its own financial qualifications, South Florida requested permission to amend its application to provide for a firm loan commitment of $1.9 million from the First National Bank of Boston to the William B. MacDonald Jr., Corp., principal source of South Florida’s financial strength. The corporation is controlled by William B. MacDonald Jr., who is president, director and 80% owner of South Florida.

The petition says the amendment would eliminate any question as to the ability of the corporation to meet its financial commitment to the applicant. It added that the bank loan would not be used unless other resources of the corporation proved inadequate.

The Miami ch. 10 hearing is scheduled to resume April 22, but Civic asked last week to have the recess continued until May 15. Civic said that its attorney is one of the Philco attorneys in the NBC-Philco hearings (see story page 131) which may go on for three to four more weeks, Civic said.

Senate groups okay Comsat board

The 14 incorporators of the Communications Satellite Corp. had been approved unanimously by two Senate committees at the end of last week, but a vote on their confirmation faced a fight on the Senate floor this week.

That warning came from Sen. Albert Gore (D-Tenn.) who said Tuesday (March 19) that he had serious doubts about the Senate “permitting itself to become entangled and ensnared in the operation” of the private company.

Action in the Aeronautical & Space Sciences Committee on the same day indicated no question there about the qualifications of the incorporators. They were approved unanimously by the Commerce Committee two weeks ago (BROADCASTING, March 18), and by the space committee on Tuesday.

What the space committee was concerned about, said Sen. Clinton B. Anderson (D-N.M.), chairman, was that the company’s by-laws would allow communications firms to buy less stock than the public, but legally they would be entitled to elect half the directors. Legal briefs are to be drawn on this point, the committee was told by Bruce G. Sundlun, an incorporator.

How Much Public Money? • Other space committee members asked how the company might share development of a space communications system with the government, which already has asked Congress for $55 million in this area for fiscal 1964.

Mr. Sundlun said the government has helped other industries. The corporation is not prepared to pay for costly research, he added.

Sen. John O. Pastore (D-R.I.), chair-

BROADCASTING, March 25, 1963
TRANSLATORS BRING KLAS-TV TO 7,000 MORE VIEWERS

Says Bob McKenzie, Chief Engineer, KLAS-TV, Las Vegas, Nevada.

In Las Vegas and throughout the U.S., more and more knowledgeable people are turning to EMCEE Translators as the logical means of extending TV coverage...efficiently and economically. These unattended, re-broadcast transmitters reach more people at lower installation cost and maintenance than any other system. Community service organizations seeking to improve TV or bring TV to their area and broadcasters wanting to fill in shadow areas...all should investigate the EMCEE Translator System. These systems are available for VHF or UHF...from 1 watt to 100 watts...from individual area service to multi-hop regional systems...as an equipment package or installed by one of EMCEE's many franchised dealers. Whatever is needed, the logical choice is EMCEE...the world's largest manufacturer of VHF and UHF translators and accessories.
How fair is fair in Michigan?

Broadcasters in Michigan are facing a knotty fairness-doctrine question as a result of the debate now going on in that state over the proposed adoption of a new state constitution.

The question: Is a broadcaster obligated to honor a demand for time to express one side of a controversial issue when the demand is made in a form letter that is signed by someone unknown to the broadcaster?

Many radio and TV stations in the state have been playing tapes of broadcasts by Gov. George Romney urging adoption of the proposed constitution. The governor had been a vice president of the State Constitutional Convention, and the tapes were played as a public service.

Then, last week, stations all over the state received a form letter containing a demand for “equal and fair play time to give the reasons for voting against the proposed constitution.” It was signed “Tom Downs, vice president, State Constitutional Convention.”

Tom Downs was listed as one of the vice chairmen of the convention. But many broadcasters never heard of him. As a result, some wondered whether any individual could send them a form letter demanding they contact him and receive a demand for equal time.

One broadcaster who decided in the negative was Richard Gillespie, president of WGHN Grand Haven, Mich. “I’ll give time to anyone I know, but I don’t know who Downs is and I don’t intend to accommodate him.”

Mr. Gillespie feels his position is sound, legally. But he thinks the Downs demand shows up a “quirk” in the fairness doctrine.

man of the Senate Communications Subcommittee, has raised the question of public spending which would benefit a private corporation several times this year, and has indicated he thinks there is need for a high-level conference on it to involve the administration, the FCC, the National Aeronautics & Space Administration and the space corporation (Broadcasting, Feb. 25).

Sen. Gore is understood to think the Senate has no constitutional authority to confirm incorporators of a private corporation.

One point he probably will raise is a provision of the Communications Satellite Act which authorizes the corporation but states specifically it “will not be an agency or establishment of the U.S. government.” The senator wants to know how the President can appoint directors of a private firm, as he would do for both the incorporators and for three directors when the company is in its permanent stage.

He also is concerned that confirmation might establish a precedent for federal involvement in other private businesses.

A provision of the act worrying the senator gives the President authority to interest himself in company affairs with foreign governments or bodies.

Celler III; hearing delayed

Illness of Rep. Emanuel Celler (D-N.Y.), chairman of the House Judiciary Committee, last week forced postponement of hearings on the concentration of ownership of news media until sometime next month.

Rep. Celler was reported by his congressional office to be suffering from influenza at his home in Brooklyn.

His Antitrust and Monopoly Subcommittee conducted three days of hearings earlier this month, and had planned at least three more weeks of sessions (Broadcasting, March 18).

Five more renewals given

The FCC last week renewed the licenses of five more TV stations whose renewals had been deferred while the commission’s staff explored their prime-time local live programming. Two weeks ago, the FCC renewed 64 TV licenses which had been under the same scrutiny (At Deadline, March 18).

The stations granted renewals last week were KCRA-TV Sacramento, Calif.; KNDO (TV) Yakima and KNDU-TV Richland, both Washington; KHVV-TV Honolulu and its satellite, KJHK (TV) Hilo, both Hawaii.

Storer requests extension

Storer Broadcasting Co. has asked and been granted an extension to May 24 for comments on FCC proposal that broadcasters owning the maximum allowable number of stations would have to dispose of one interest before applying to buy or construct another. (Broadcasting, Feb. 18).

The commission has set the date for comments at March 25, and the deadline for replies at April 10. Storer asked until June 10 to make reply comments.
As broadcasting towers grow taller and taller the demand for tough, strong guys made of Roebling prestretched galvanized bridge strand grows apace.

New giant on the horizon is WJTV's tower in Jackson, Mississippi, at 1615 ft. one of the tallest structures anywhere in the world.

Designed and built by Kline Iron & Steel Company, Columbia, S. C., this tower, which includes an elevator, is held securely erect by eighteen Roebling galvanized bridge strands.

All over America, broadcasters are getting the message: Roebling is the source for dependable strand to assure tower security. It stands to reason. Roebling has the experience, the facilities and the engineering knowhow to handle the most complex suspension problems—whether it involves the massive bulk of a bridge... or the delicately poised needle of a TV tower. For information on any aspect of a guying problem, write The Colorado Fuel and Iron Corporation, Roebling's Bridge Division, Trenton 2, N. J.

Output of all-channel sets perking up

TO ACCOUNT FOR 20-25% OF ’63 PRODUCTION, SAY SOME MAKERS

Viewers who have been waiting to buy a new television receiver until they can get one with both uhf and vhf need wait no longer. The all-channel set is here; in fact, has been here for the last nine months.

Virtually every major manufacturer of television receivers has already placed on the market a complete line of vhf-uhf receivers.

And tv manufacturers are producing more and more receivers capable of tuning in to the 12 vhf channels and the 70 uhf channels.

Production figures for the month of January show that 12% of the 484,415 tv sets made—58,032—are capable of receiving all channels.

For all of 1962, tv receivers capable of receiving both vhf and uhf numbered only 8% of total production—598,446 all-band sets out of a total of almost 6.5 million. In 1961, the all-channel share was 6%—370,977 out of a total of more than 6 million.

In the early enthusiasm for uhf tv manufacturers put 20% of their production into vhf-uhf sets. This was in 1953 when over 7 million receivers were made. This ratio steadily declined; to 18% in 1954, 15% in 1955, 14% in 1956, 12% in 1957, 8.6% in 1958, and a low of 6.86% in 1959.

Once uhf stations go on the air, manufacturers believe, they will have sets available. Some makers estimate that tv receivers capable of receiving all 82 channels will account for 20%-25% of 1963 production.

Sales Spotty • Sales of all channel receivers have been running well, manufacturers say, in those markets that are all or mostly uhf.

They point to the high rate of sales of uhf-uhf receivers in such markets as South Bend-Elkhart, Ind., and Scranton-Wilkes Barre, Pa., where uhf is the established method of tv broadcasting.

Uhf sales, however, have picked up markedly (although still modest in comparison with national sales) in other cities with new uhf outlets, such as Washington, D.C., where year-old educational WETA-TV has been joined by commercial WOOK-TV; in Los Angeles, where KMEX-TV is on the air, and to San Antonio, where KWEX-TV is operating. The last two stations specialize in Spanish language programs.

Benjamin Abrams, president of Emerson Radio & Phonograph Corp., said that 20%-25% of his sales in the Los Angeles area are now all-channel.

Edward R. Taylor, executive vice president of Motorola’s consumer products division, said that his sales of vhf-uhf receivers are up from 3%-5% to 14% in selected areas.

At the moment all major manufacturers are offering both vhf-only or all-band receivers. The all-channel sets can be bought as “factory converted” or with “field kits” which enable the purchaser to change a vhf-only model into an all-band receiver.

The new 1964 lines, which will be introduced to distributors in May and June of this year, will continue along these lines, manufacturers said.

By April 30, 1964, all television receivers manufactured for interstate shipment must be all-channel. This is the deadline formulated by the FCC, in cooperation with manufacturers, and is in keeping with the law which the 87th Congress enacted last year.

Congress passed the all-channel receiver act at the request of the FCC which sees this move as a significant boost for uhf broadcasting. Although manufacturers opposed the legislation on principle, all have cooperated with the commission in drawing up regula-

Lee wants new ownership rule: 5 vhf, 5 uhf

FCC Commissioner Robert E. Lee waved the uhf banner before television set manufacturers last week, but he also admitted that he has revised some of his pet campaigns:

“I’m abandoning my hope for all-uhf tv and deintermixiture,” the commissioner told members of the Consumer Products Division’s executive committee last week in Washington at the spring conference of the Electronic Industries Assn.

But still a uhf stalwart, and still eager to do all he can for those coming into the uhf fold, Mr. Lee proposed a revision of the multiple ownership rules to permit a single person or company to own five vhf and five uhf television stations.

Under present regulations, a single owner is prohibited from owning or controlling more than five v’s and two u’s.

If the FCC were to change the ownership rules, Mr. Lee commented, this might make uhf ownership attractive to multiple station owners. It also might make uhf interesting to investment capital capable of financing groups of uhf stations.

Mr. Lee expressed the hope that uhf won’t fall into the hands of what he called “shoestring” operators. They usually do a “lousy” job and fail anyway, he observed.

But, Mr. Lee was not able to promise government financial support for an “educational” campaign to explain uhf to dealers and the public.

This campaign, voted by the Consumer Products group (provided three-fourths of the tv manufacturers in EIA approve), would spend $100,000 on a public relations promotion to explain and sell uhf to dealers primarily, but to the public also. A presentation on the proposed campaign was submitted by Sunnen Rider & Assoc., New York.

Uhf Test • Jules Deitz, FCC engineer, told a panel of service representatives, that “if New York City is any criterion, fine uhf reception is available in most metropolitan areas, especially with outdoor antennas.”

He emphasized that the quality of reception depends on the quality of the receiver and installation. He warned, also, that the results in New York were based on optimum receivers and installations and must not be confused as average.

Commissioner Lee made one other suggestion at the EIA meeting. Speaking to the land mobile group, he told them their request to have the FCC move chs. 14 and 15 from tv to land mobile use won’t be granted. There might be a chance, he suggested, that the land mobile services (taxicab dispatching, truck dispatching, etc.) might be able to use unused uhf channels on
So that tv viewers may change their receivers to uhf, a converter is needed. Available from many component makers is Standard Kollsman's low-silhouette shaped converter which sits on top of an existing receiver and permits the viewer to receive the additional 70 uhf channels. All tv set manufacturers have field conversion kits permitting a vhf-only set to be converted into an all-channel set. Here (right photo) is Admiral's special kit recently introduced for that company's 23-in. models. It comes complete with built-in antenna and is in two models: for full range fine tuning and for automatic preset fine tuning. Plug-in connectors eliminate the need for soldering.

Inventory Push • There is a feeling that some of the smaller manufacturers may increase their production of vhf-only receivers during the pre-April 30, 1964 date in order to build up inventories of vhf-only receivers. These sets can be shipped to dealers and distributors even after the cutoff date, but must be marked to indicate that they were made before U- day. Dealers, of course, can sell vhf-only sets as long as they have them in stock.

And, as long as there is a $20-$30 differential in price between a vhf-only receiver and an all-band receiver, there are markets where this will appeal to consumers—particularly in areas without uhf stations.

Even after the April 1964 deadline there may still be special dispensation to make vhf-only receivers for sale to hospitals, schools, apartment houses, hotels and other public or private institutions which use master antenna systems. There is no need for an all-channel receiver in these circumstances since the systems are engineered to a "non-interfering, shared basis." He also wondered why land mobile services couldn't use chs. 5 and 6 which, he pointed out, were used mostly for converted uhf signals.

Most mobile users showed a decided lack of interest in sharing on a non-interfering basis and it was thought too many other services would apply for this privilege.

Other highlights of the EIA meeting:

EIA will soon begin publishing color tv production and sales figures. They will begin with Jan. 1 of this year.

A broadcast equipment group recommended that the FCC be asked to put out a rule-making notice to establish standards for stereo monitoring equipment. This follows a request made last year by stereo set makers that a monitoring system be instituted to check stereo broadcasts. This initial move was taken, it was said then, because many set makers felt stereo stations were not hewing to the technical standards for stereo broadcasting, bringing complaints from set buyers.

The circle is completed, it was pointed out, by broadcasters blaming transmitting manufacturers for failing to produce equipment capable of meeting the FCC standards.

The major problem, it was stressed, is the lack of monitoring equipment to check stereo transmissions. Radio set manufacturers threshed over the question of high fidelity definition with Martin Shepherd Jr., an attorney for the Federal Trade Commission. The FTC two years ago began attempting to draw up a definition of high fidelity in order to protect consumers from being bilked when they buy receivers and phonographs advertised as high fidelity. Last January, EIA submitted a proposed definition on hi fi for packaged radio and phonograph equipment. Still to come, it is understood, is a similar proposal from the Institute of High Fidelity Manufacturers, a group of quality component makers.

Further attempts to evolve a system of rating sound equipment will be made at a meeting of EIA's loudspeaker section scheduled for June 27 in Chicago. Last June, the group heard a proposed "acoustical sound" rating system submitted by electronics consultant Lincoln Walsh, Millington, N. J.

Thomas P. Collier, GE International Division, called for electronics manufacturers to begin thinking worldwide. He urged American tv set makers to begin producing receivers for the world market, even though there are differing standards in some countries. An international standard of 625 lines has been recommended, he noted, and American tv manufacturers should begin preparing to move into this market. He warned that U. S. industry has about five years to establish itself in Europe before the European Common Market erects tariff walls which will prevent Americans from exporting many of their manufactured products to the ECM.
convert uhf signals to an unoccupied vhf channel at the antenna. Receivers are linked to the master antenna via wire lines and all programs appear on an individual receiver in one of the 12 vhf channels. The industry has asked the FFC to permit this and is optimistic that it will be granted.

**UhF Tuners** *Tuner makers are going full steam ahead with production and so far have had no difficulty in filling orders. One of the specific problems that earlier had hurt uhf, the 6AF4 oscillator tube for 470-890 mc band, has been overcome. New developments, including RCA's Nuvistor and GE's germanium diode tubes, also have helped improve tuner performance.*

Aside from the regular tuner makers (General Instrument, Oak Manufacturing, Sarkes Tarzian, Standard Kollsman and Blonder Tongue) other component makers are expected to enter the field.

The situation at some of the major manufacturers is as follows:

**RCA**—All sets can be had now in either uhf-only or all-channel. The all-channel receivers can be bought factory converted or field convertible. This same practice will be carried out in the 1964 receiver line. Differential: about $30.

**GE**—All but one receiver in the present line is available all-band. All are factory installed. The one exception, a portable sales leader, can, however, be changed to receive uhf by changing strips. GE declined to reveal its program for 1964. Differential: roughly $30.

**Admiral**—All present sets are field convertible now, with two types of conversion: preset tuning or continuous tuning. The new 1964 line will be completely 100% convertible, either at the factory or via dealer-distributor organizations. Differential: $30 for both factory conversion or field kit.

**Emerson**—Between 20 and 25 models are available now for all-band reception. In the 1964 line this percentage will be increased substantially, to the extent that 50% of Emerson's production is expected to be in 82-channel sets. A new 16-in. portable model will cost $130 in uhf-only; $150 for all-channel.

**Warwick**—All present sets are adaptable for all-channel reception, either at the factory or in the field. Warwick's production goes 100% to Sears, Roeback & Co. Differential: $20.

**Motorola**—Offers all models either uhf-only or all-channel in present line, with both factory conversion or through the use of field kits. The 1964 line will continue this practice, with the addition of all-channel potential for color receivers. Differential: $20-$30.

---

**Collins finds oldest**

Winner of Collins Radio Co.'s national "oldest transmitter" contest is WGAU Athens, Ga., Collins announced last week. WGAU's winning entry will be exhibited by Collins at the NAB convention in Chicago.

WGAU's successful entry is its Collins 300F 250-w transmitter which has been in daily service since May 1, 1938, and has logged more than 165,000 hours with only 87 minutes of down time. Collins has awarded WGAU its new 20w-3 1-kw transmitter as prize.

Runner-up in the contest was KRYS Corpus Christi, Tex., with a Collins 20H transmitter in service since Dec. 19, 1940. Third was KWPC Muscatine, Iowa, with a Collins 300G transmitter running since February 1946. Fourth was WMON Montgomery, W. Va., with a 300G in service since July 1946. Each also received a prize, Collins said.

---

**Telstar II, Echo II to go in orbit in spring**

Within the next three months two new space relay links are scheduled to be placed in orbit.

Telstar II will be launched this spring, and it will be placed in an orbit higher than Telstar I so that it will suffer less from radiation “sickness.” AT&T’s Chairman Frederick Kappel said last week Telstar II will be redesigned to insure more protection from radiation effects which have twice forced the flying radio relay to cease operating. AT&T sent Telstar I into space, via government facilities, last spring.

Echo II, a passive reflector balloon, will be set aloft this spring also, the National Aeronautics & Space Administration announced last week following conclusion of an agreement with the U.S.S.R. to cooperate in space programs. In the communications field, both the U. S. and Russia will use the 140-ft. diameter aluminized balloon for test purposes. The U. S.-U.S.S.R. agreement also provides for a cooperative venture in meteorological satellites, including exchanges of weather information surveyed by the satellites. Echo I is still orbiting.

And next fall, an improved Relay will be sent into orbit by NASA to continue and expand the activities of the first Relay made for NASA by RCA and put into orbit last December.

Relay was used for the first time last...
week for a color tv program. The program was transmitted to Relay, 4,000 miles above earth, and returned to earth, all from the AT&T Andover, Maine, ground station. It originated in the NBC technical center in New York. The program is a 15-minute segment of Robert Louis Stevenson's "Kid-napped," shown Sunday on NBC in the Walt Disney Wonderful World of Color series (7:30-8:30 p.m. EST).

Late in the week, Mr. Kappel told an audience at the Philadelphia Chamber of Commerce that transoceanic cables in the future will equal the capabilities of space satellites, including the relaying of tv. This will come about through the addition of amplifiers permitting the use of wide band circuits underwater, he said.

Technical topics...

India buys audio tape • Largest export shipment of audio tape recorders in Ampex history left the company's Sunnyvale, Calif., plant for New Delhi, India. The $100,000 order included five master tape recorders and 36 high-speed tape duplicator slaves, which will be delivered to All India Radio to establish a nationwide radio tape system, with programs taped and duplicated being flown to member stations throughout India.

New silicon transistor • RCA has reported development of a new uhf silicon transistor which will increase the maximum frequency limit of silicon devices to more than 1,000 mcs. The new transistors with improved noise and gain ratios will reportedly "substantially" enhance the broadcast area of a usual vhf communications system.

UAR signs Melpar subsidiary • Television Assoc. of Indiana Inc., Michigan City, Ind., a subsidiary of Melpar Inc. of Falls Church, Va., has signed a contract to assist the United Arab Republic on a communications project that will reportedly permit Western Europe to be linked by microwave with Khartoum in the Sudan. The Indiana company will serve as engineering consultant, according to TAI President W. C. Eddy. The project is expected to be completed by the end of August.

Audio buys Olympic • Audio Devices Inc., New York, a producer of coated aluminum recording discs and magnetic tapes, has purchased the assets of Olympic Record Co., Santa Monica, Calif., manufacturer of master and instantaneous recording discs. Audio Devices plans to incorporate a proprietary manufacturing process of Olympic into its present facilities at Stamford, Conn.

Tube measurements • American Microwave & Television Corp., San Carlos, Calif., has developed a variable parameter television system for testing and evaluating vidicon and image orthicon tubes. The unit is rack cabinet mounted and includes power supply and synchronizing signal generator. The system makes precise exposure and resolution measurements under varying light level conditions as well as at varying scan and frame rates and bandwidths.

Radio-tv gets into the Missouri house

BUT NEighboring KANSAS BALKS AT IDEA AT LAST MINUTE

Legislative debate was broadcast live from the Missouri House of Representatives for the first time last week. KWOS Jefferson City fed four stations, KTTS and KGBX both Springfield, KXEO Mexico and KCMO Kansas City. KMOX St. Louis originated its own feed from the House chamber. The debate last Tuesday and Wednesday (March 19-20) centered on a controversial administration bill to raise the state's sales tax from 2% to 3%. (Another bill due to reach the House floor next week would amend the present sales tax to include a 2% tax on all advertising sold in the state, see page 140).

KWOS carried four hours of debate both days and made open line feeds to the other stations, allowing them to cut in and out as they wished. KMOX made intermittent feeds totaling 3 hours and 45 minutes for the two days. The Missouri representatives voted 100-52 on Tuesday to allow the broadcasts, after learning that permission had already been granted by House Speaker Thomas D. Graham (D).

Token Protests • Some legislators protested and a Republican caucus took place before the final vote. During an 11-minute debate the live broadcasts were halted pending the vote. The stations said they hoped to be able to resume broadcasts of the sales tax debate in the House this week.

Bob Tibbetts, news director of KWOS, and Robert Hyland, CBS Radio vice president and KMOX general manager, had been negotiating separately to gain the broadcast access. The Missouri legislature's action was applauded by Leroy Collins, president of the NAB. He wired Speaker Graham that the House has "opened a new avenue of broadcast service to the people of your state ... broadcasters everywhere deeply appreciate the recognition by you and your colleagues of this role in advancing the people's right to know."

In a wire to KMOX, KTTS and KWOS, Gov. Collins offered congratulations "on the victory for broadcasting journalism in the Missouri House."

Kansas Says 'No' • Meanwhile in Kansas Wednesday night, members of that state legislature protested live radio and television coverage of a Thursday debate on making Wichita U. part of the state's college system. Speaker Charles Arthur (R), who had originally given approval to the broadcasters, withdrew it the evening.

Dick Nason found Radio à la Carte

Let him tell you in his own words: "I've been looking for a fine radio programming service. I found it in Radio à la Carte. Mark Edwards and I are glad WSAI is an à la Carte station." See Marv Kemper in Suite 1119A, Conrad Hilton Hotel.

Mark Century Corporation 6 West 57th St., N.Y. 19, N. Y. CI 5-3741
An old goblin turns up again

Taxation of all advertising "sold or purchased" in the state of Missouri loomed suddenly last week during legislative debate on a bill by Gov. John Dalton to raise the state's general sales tax from two to three cents. That advertising also might be subject to the sales tax was part of the debate covered on radio (see story, page 139).

John English, counsel for the Missouri Broadcasters Assn., said the state senate passed the governor's bill with minor changes and it had gone to the house where one amendment to also tax advertising was voted down. On Wednesday, however, he said, an amendment to subject advertising to the full two cent tax was before the session began because of some legislators' objections. Admittedly against the live coverage were Assistant Speaker Edward Boyd and Rep. Ross Doyen (both Republicans).

WIBW-AM-TV Topeka, had already moved its cameras and microphones into the chamber and had arranged to feed a four station tv network: KTVH (TV) Wichita-Hutchinson, KLOE-TV Goodland, KAYS-TV Hays, and KTVC (TV) Ensign, and KVOE-AM Emporia.

Speaker Arthur affirmed he favored broadcasting the debate, but said if even one member felt his ability to speak freely on the bill would be abridged by radio-vehicle presence, then he would be obliged to cancel the plans.

Thursday Thad Sandstrom, general manager WIBW-AM-TV editorialized on the ban. KTVH, which reported itself swapped with phone calls expressing disappointment over the ban, also editorialized against it and KVOE announced it planned to express an editorial opinion opposing the legislature's move.

introduced by Rep. Harry Raiffe (D-St. Louis) and it was passed 120 to 27. The amendment now goes back to the senate.

Rep. Raiffe said adoption would produce upwards of $20 million in additional revenues in two years.

The tax on advertising is a threat that periodically raises its head around the country. The last such epidemic loomed six years ago when the City of Baltimore sought such a levy (BROADCASTING, Nov. 11, 1957). This, in turn, generated like attempts in Norfolk, St. Louis and Providence. However, all such proposals were defeated with a large share of the credit going to local broadcasters and Advertising Federation of America.

LAB adds to requests for 'experience' on FCC

The Louisiana Assn. of Broadcasters has joined the presidents of state broadcasting associations in asking President Kennedy to appoint an experienced broadcaster to the next vacancy on the FCC.

In a resolution adopted March 15, the LAB noted that a vacancy "will develop in the near future" on the FCC and that prior radio-tv experience would be an "ideal prerequisite" for the job. Also, LAB said, there has been a "great dearth of such experience" on the FCC in the past.

Late in February, the conference of state broadcaster presidents adopted a similar resolution introduced by Mel Burk, president of the West Virginia Broadcasters Assn. from WTIP Charleston (BROADCASTING, March 4).

The Louisiana broadcasters also asked the All-Industry Music License Committee to give top priority to the SESAC "problem" of not being able to identify music licensed by that organization. "SESAC refuses to adequately and properly identify the copyrighted selections contained in its repertoire and imposes arbitrary and unreasonable license fees and conditions . . . upon stations," LAB said in a resolution sent to the license committee and all other state associations.

TIO membership up, new activity planned

Television Information Office last week reported a spurt in new members since last October, plans of new projects and current distribution of materials to sponsors.

The review of activities was released at a semi-annual meeting by Clair McCollough, of the Steinman Stations and Television Information Committee's chairman.

Mr. McCollough announced a TIO study of work and leisure activities of tv broadcasters throughout the U.S. TIO is compiling responses from more than 700 commercial broadcasters on questions ranging from the composition of their families to the amount of time spent by management on community activities.

Roy Danish, TIO's director, noted that as part of the organization's increase in advisory services to stations, Carl Burklund, general manager, and Ben Wickham, manager of station services, have held staff meetings at 107 stations in 27 states since Oct. 17.

TIO listed the following activities:

- Distribution to TIO sponsors of its first two bibliographies in a projected series listing books, articles and other primary sources of information about tv. The first two: (1) "Television and Education" listing publications dealing with the relationship of the medium and education, (2) "Television: Freedom, Responsibility, Regulation," describing material dealing with these areas.

- The sending to stations of a comprehensive index and guide to all TIO informational material supplied stations since September 1959.

- Addition of seven tv stations as sponsors. Stations are KTVH (TV) Wichita; WNEM-TV Saginaw; WTRE (TV) Lufkin, Tex.; KSL-TV Salt Lake City; WHIC-TV Rochester, and KEYR-TV Bismarck, N. D., and educational WMUB (TV) Oxford, Ohio.

Also attending the meeting were Henry B. Clay, KTHV (TV) Little Rock; John P. Cowden, CBS-TV; Sydney H. Eiges, NBC, a new Television Information Committee member; Michael J. Foster, ABC; Joseph X. S. Sinclair, WJAR-TV Providence; Robert F. Wright, WTOE (TV) Meridian, Miss.; Lawrence Creshkoff, TIO's executive editor.
Pennsylvania senators cited by PAB

Special citations for their joint tv and radio broadcasts were awarded March 20 to the two Pennsylvania senators by Pennsylvania Assn. of Broadcasters. Recipients were Sen Joseph S. Clark (D) at left and Hugh Scott (R) at right. The presentation was made by Clair R. McCollough (center), NAB board chairman, of the Steinman Stations.

PAB members held a dinner meeting in Washington with the state's congressional delegation.

Mr. McCollough said in presenting the award that the program, broadcast jointly by the two senators from opposite parties, is the only one of its kind on Capitol Hill. He said it greatly stimulates the interest of viewers and listeners in public affairs. The program is broadcast every fortnight on 14 tv and 39 radio stations. Other senators appear as guests.

Robert Williams, WHLM Bloomsburg, presided as PAB president. PAB was the first state organization of broadcasters in the nation. George Koehler, WFIL Philadelphia and a past president, spoke on the purpose and achievements of PAB.

Zenith paints rosy Hartford pay tv picture

MORE THAN 2,000 SUBSCRIBERS 'APPEAR SATISFIED'

A six-month initial report citing "gratifying" results from the experimental pay-tv operations of WHCT (TV) Hartford, Conn., is contained in the 1962 annual report of Zenith Radio Corp. distributed last week.

Zenith's sales and earnings continued to establish new record highs with color television set sales said to be one of the important factors (Broadcasting, March 4).

WHCT is licensed to RKO Phonevision Inc., a subsidiary of RKO General Inc., and inaugurated service in late June 1962. Zenith's Phonevision pay-tv system is being used in the test with Zenith providing the decoding units attached to home tv receivers and the encoding equipment at WHCT (Broadcasting, Jan. 21).

Zenith said the six-month report of the Hartford experiment contained in the annual report is the first time some of the initial results have been revealed.

(Many years ago Zenith conducted a Phonevision test in Chicago (Broadcasting, May 28, 1951).

More than 2,000 • Zenith said the number of Hartford subscribers "has passed the 2,000 mark" and that "the subscriber expenditures for the service are exceeding the anticipated rate." No dollar figures were given but it was reported that 1,800 subscribers each were paying about $8 to $10 monthly.

Zenith's report said "most of the entertainment" offered in the Hartford test "proved to be very effective." The report said the "Zenith-developed Phonevision equipment is performing efficiently and reliably" and that "subscribers appear to be well satisfied with the service."

Zenith explained that at the outset it was very difficult to obtain "suitable" motion pictures for use in Hartford but now most distributors are furnishing their product, including recent...
Mr. Wooten’s super fallout shelter

A $150,000 underground fallout shelter, which could be built for about $65,000 without the frills, has been put up by Hoyt Wooten of Whitehaven, Tenn. Mr. Wooten, owner of WREC-AM-TV Memphis, is shown seated in his communications room. Equipment was chosen to provide local and extended reception and transmission on the low band through the uhf band. Nine antennas are mounted on an 82-foot tower. An emergency antenna is buried in the edge of concrete forming the shelter’s entrance cover.

The communications room contains am, shortwave and fm stereo receivers, telephones, Conelrad equipment, patch panel and hi-fi set. The shelter, designed by Mr. Wooten, has 5,600 square feet of living space, will keep 56 people alive for 31 days and took more than two years of planning. Lt. Col. John Somers, Memphis Civil Defense chief, has called it “the best in the world.” John F. Meagher, NAB vice president, said after touring the shelter, “I never saw anything like this.”

films such as “The Interns” and “The Music Man.” Zenith said, however, that “even more difficult has been the problem of assuring an adequate supply of non-movie programming, such as legitimate theatre plays, musicals, variety shows, etc.”

The Zenith report indicated that mass entertainment programs and films captured the highest percentage of the Phonevision subscribers.

NAB schedules fall conferences

The annual NAB trips to the field will begin this fall in Hartford, Conn., at the Statler-Hilton Hotel. As in the past, the conferences will last a day and a half, with the Connecticut opener scheduled Oct. 14-15.

NAB President LeRoy Collins and key association executives will participate in each of the eight conferences. In addition to Hartford, the NAB road show will visit the following cities:

- Minneapolis Oct. 17-18, Lamington Hotel
- Pittsburgh Oct. 21-22, Pittsburgh-Hilton Hotel
- Miami Beach Oct. 24-25, Americas Hotel
- Nashville Nov. 14-15, Dinkler-Andrew Jackson Hotel
- Fort Worth Nov. 18-19, Texas Hotel
- Denver Nov. 21-22, Denver-Hilton Hotel, and San Francisco Nov. 25-26, Fairmont Hotel.

NBC-TV improves its color tv facilities

NBC-TV says it’ll complete a $1,- 250,000 color tv project this spring (CLOSED CIRCUIT, March 11).

NBC has further perfected its live, tape and film color equipment as a result of new technological advances over the past few months.

The network last week noted that all of its color cameras now include latest precision color components giving a greater degree of stability. It also is equipping each of 40 color tape machines at its two centers in New York.
and Burbank, Calif., with new technical equipment for stabilization (includes locking devices for such effects as synchronized dissolves), and color film chains are being modified in keeping with the advances.

NBC Radio dedicates new studio complex

NBC Radio and WNBC New York began operations last week in newly modernized facilities in the RCA Bldg. in New York.

The new $500,000 “Radio Central” provides NBC with three integrated studios and a fourth control point for program assembly during heavy traffic, William K. McDaniel, executive vice president, said at dedication ceremonies last Wednesday (March 20).

McCOLLOUGH MAY SERVE UNTIL JUNE

Radio, Tv Boards to elect during Chicago convention

Election of four Tv Board directors and a chairman and vice chairman for both the Radio and Tv Boards is slated to take place at the NAB convention in Chicago next week.

Clair R. McCollough of the Steinman Stations, chairman of the NAB combined Boards, will go off the Tv Board at the end of the convention but he is expected to continue as chairman of the combined directors until the NAB board meetings in June. The Radio Board elected new directors in odd-numbered districts in February (BROADCASTING, March 4).

William B. Quarton, WMT-TV Cedar Rapids, Iowa, is the present chairman of the Tv Board and James D. Russell, KKTU (TV) Colorado Springs, is vice chairman. Chairman of the Radio Board is Willard Schroeder, WOOD Grand Rapids, and Ben Strouse, WWDW-AM-FM Washington, is vice chairman. This will be the first convention at which the Radio Board heads have been selected. In the past, they have been picked at the June board meetings following the convention.

Tv Board members whose terms expire with the close of the convention are Messrs. McCollough and Russell, Otto P. Brandt, KING-TV Seattle; Robert F. Wright, WTKO-TV Meridian, Miss., and the three network directors—Mort Weinbach, ABC-TV, William B. Lodge, CBS-TV, and David Avlams, NBC TV.

PROGRAMMING

‘TARGET PROGRAMMING’ OFFERED

Snyder-Koren unites marketing sense, program design

A new concept in broadcast advertising, “target programming,” is being offered to advertisers and agencies by a new company, Snyder-Koren Productions, which will begin operations April 1 at 6335 Homewood Ave., Hollywood. Principals are Ken Snyder, formerly senior vice president and Hollywood office manager for Needham, Louis & Brorby, and Charles B. Koren, vice president of MCA until that organizations retirement from the talent representation field, and recently head of his own talent agency (see WEEK’S HEADLINES, page 10).

As defined by Mr. Snyder, “target programming” is the application of “an advertising orientation to the business and art of audience attraction. Program design and marketing sense need not be mutually exclusive and a well-balanced combination of the two can still make for an efficiency in mass selling that is very attractive in today’s atmosphere of rising costs and squeezed profits.”

Snyder-Koren already has specific program properties and syndication plans for advertisers in the drug, cosmetic, cereal, financial and food fields. Among them are: Giselle’s Small Fry, starring Giselle MacKenzie; The Lawyer Answers and Your Medical Advisor, both in association with Jackson Hill, creator of Divorce Court; Lance Crossfire, 30-minute comedy animation series, and Joey Jingle, five-minute cartoon, to be made in association with Pantomime Films; a half-hour family situation comedy, Hector’s Pups; America Unlimited, a TV and theatrical film series in association with Monarch Films; another five-minute animation series aimed at the juvenile audience and a half-hour adventure series, Charlie Bakers’ World.

The Funny Company • The new organization will also create and produce advertising in all media for selected clients among both agencies and advertisers. It shares offices with The Funny Company, producer of the five-minute color animation program series of that title. This series of 260 programs was created by Mr. Snyder and a group of associates for Mattel Inc., toy manufacturer, which had been looking for a children’s TV programming that would be entertaining enough to please children and yet contain enough information to satisfy parents and teachers (MONDAY MEMO, Dec. 24, 1962).

Although The Funny Company is an independent organization, the program production costs are being underwritten by Mattel, which will use them to advertise its toys in a major market spot campaign to start in January 1964, through Carson Roberts, Los Angeles (BROADCASTING, Feb. 11). Mr. Snyder, president of The Funny Company, and Mr. Koren, vice president, say that this program series is a prototype of the “target programming” technique.

If you see Harold Krelstein,
of Plough Broadcasting, ask him to repeat what he told our Marv Kempner: “I heard Radio à la Carte and I think it’s a fine radio production service. Larry Monroe, Bernie Millenson and Herb Golombeck agree.” You will, too. Hear it in Suite 1119A, Conrad Hilton Hotel.

Tvb editorial report

A survey among Television Bureau of Advertising affiliates shows 66% of members carry editorial comment on a regular basis. Reporting this figure last week, Norman Cash, TVB president, noted a significant increase in editorializing among the bureau’s members over the last two years. Editorial comment via TV is also catching the interest of an increasing number of advertisers, Mr. Cash noted.
WGA 4% ROYALTY PLAN TO BE TRIED

However, old rerun scale kept by 3 networks, 11 companies

Most of the major producers of filmed programs for television are going to give the new 4% royalty plan of rerun payments for writers a trial.

Following the March 17 deadline for members of the Motion Picture Producers Assn. (the major motion picture studios) and of the Alliance of Television Film Producers, Paul Stager of WGA said that the three networks and 11 other companies had notified the guild that they were rejecting the flat royalty plan. They will continue to make rerun payments to writers on the old plan of specified percentages of minimum scale amounting to 140% of the original payment at minimum scale. Companies not notifying WGA automatically go on the 4% plan of rerun payments, Mr. Stager said.

Companies not belonging to either MPPA or ATPFP were given a few additional days in which to choose between the two plans of rerun payment. It is believed, however, that they will follow the general example and accept the new plan.

The new plan calls for the producer to pay the writer of a filmed tv program a flat 4% of the gross revenue from rebroadcasts on a worldwide basis and in perpetuity. The old system of rerun payments, which applies to actors and directors as well as to writers, calls for a payment of 35% of minimum scale for the first rerun (second run), then 30%, 25% and another 25% for the third, fourth and fifth runs and a final 25% for the sixth and all additional runs.

The list of producing companies turning down the flat 4% of gross plan of rerun payments for writers includes: ABC-TV, CBS-TV, NBC-TV, Arness (Gunsmoke), Cayuga (Twilight Zone), Disney (Wonderful World of Color), Fedderson (My Three Sons), Filmaster (Death Valley Days), Filmways (Mr. Ed, Beverly Hillbillies), Heyday (I'm Dickens, He's Fenster), Paisano (Perry Mason), Selmur (Combat), Stage Five (Ozzie and Harriet), Warner Bros. (Hawaiian Eye, Dakotas, 77 Sunset Strip).

Revue, Desilu and the other major producers of filmed programs which have adopted the new plan will begin paying the 4% of gross for all programs starting on the air last fall. After two years, all producers will make rerun payments by the 4% of gross method for the 1964-65 and 65-66 seasons. Following that the WGA contracts expire and the rerun payments will again become a matter of negotiation.

Four Star Television to syndicate 'Rifleman'

The acquisition by Four Star Television of the Levy-Gardner-Laven interest in The Rifleman and The Detectives for a sum in excess of $1.5 million was announced last week by Tom McDermott, Four Star president. These film series were created and produced by Levy-Gardner-Laven in association with Four Star Tv.

Plans are being formulated to place 165 half-hour episodes of The Rifleman into syndication via the Four Star Distribution Corp. for a fall start. The series is concluding its run on ABC-TV this summer. The Detectives is currently in syndication.

Seven Arts releases new shows to television

Seven Arts Assoc. Corp., New York, is placing into syndication a package of 30 additional "Films of the 50's," to be designated Volume 6. The new group includes features from England, France, Italy, Germany and Japan. Among the titles are "The Cow and I," "Rashomon," "Maedchen in Uniform," "Umberto D," "Raising a Riot," "Concert of Intrigue," "Girl with a Suitcase" and "The Island."

Seven Arts has also announced tv syndication of the following series: Mahalia Jackson Sings (82 five-minute segments); Laafs (65 one-minute comedy vignettes); The Emmett Kelly Show (39 half-hours) and En France (French lessons, 26 half-hours).

Associated Press honors three stations

The Associated Press awards to member stations for cooperation in news coverage this year go to WCAU Philadelphia, KYNO Fresno, Calif., and KVSS Missoula, Mont.

Announced by Dwight Martin, president of the AP Radio & Television Assn., the awards were based on the stations' performance in protecting the AP on news stories breaking in their respective coverage areas.

Honorable mention certificates will be presented to eight other stations: WIL St. Louis; WKZO Kalamazoo, Mich.; WCYB Bristol, Va.; KGLO Mason City, Iowa; KFOR Lincoln, Neb.; KPOI Honolulu; WONE Dayton, Ohio, and WGIR Manchester, N. H.

CBS-owned tv stations plan third program swap

The five CBS-owned tv stations will participate for a third straight year in the International Program Exchange, a series of shows in which a station from each of several participating countries supplies a show reflective of that country's particular culture.

The U. S. contribution, The International Hour: American Jazz, will open the series on May 21 (7:30-8:30) and will be carried by the five CBS stations—WCBS-TV New York, WBBM-TV Chicago, WCAU-TV Philadelphia, KMOX-TV St. Louis and KNXT (TV) Los Angeles. The show will be produced by WHM-MTV and taped from the Chicago Lyric Opera.

Following the U. S. telecasts, the tapes will be made available for presentation in the participating foreign countries. In the last two years, tv stations in Canada, Australia, Japan, England, Denmark, Sweden, Mexico, Argentina, Italy, Ireland and Yugoslavia have participated.

Miller Brewing Co. will sponsor the show, through its agency Mathisson & Associates, Milwaukee.

Trans-Lux opens new office

Trans-Lux Television Corp., in an expansion move, has opened a new southeast division office in Miami Beach to be headed by Marshall (Bud) Or-
mond, who has transferred from the company's midwest division in Chicago. The new office is located at 1119 16th St., Miami Beach. Named to replace Mr. Ormond as midwest manager is Marvin Lowe, formerly with Screen Gems in that city.

Four Star Distribution exceeds goal by 30%

Four Star Distribution Corp. completed sales in excess of $2 million during its first six months of operation, exceeding its projected goal by 30%. Len Firestone, vice president and general manager, reported.

Mr. Firestone pointed out that Four Star began to sell off-network in September when most of the major syndicated program buys already had been made and the market was saturated with an "overabundance" of available product. He attributed the initial success to program quality, flexibility of use of available film and Four Star's experienced sales organization.

Four Star Distributing Corp. presently is offering five off-network series for syndication: The Detectives, Zane Grey Theatre, Target: The Corruptors, Stagecoach West and The Law and Mr. Jones. Mr. Firestone indicated that additional off-network properties will be released shortly.

Government attitudes influence tv programs

The government's attitude toward tv programming is recognized by tv producers and it's having an effect in the product they turn out.

That's the conclusion of Venet Adv. Agency, Union, N. J., for whom Trendex Inc. conducted a survey that covered 43 leading producers of network and syndicated film programming. Venet emphasized last week that the government role from the survey's point of view is made up mainly of the FCC and its chairman, Newton N. Minow. Left unsaid, however, are similar viewpoints expressed by congressional committees. Among the findings:

There's ample assent to the call for more balanced and diverse program fare; an awareness of softening scenes of violence in tv; a feeling that Chairman Minow has the right to discuss programming; a belief that the FCC's program "values," as expressed, have merit.

But the stand on all these issues is far from unanimous. The surveyors found many who, though in the minority, believe little or no influence on programming has come from the FCC.

Mark Century to hold programming seminar

A radio programming seminar will be held by Mark Century Corp. at pre-NAB convention proceedings in Chicago. The session is slated for March 30 at 1 p.m. Mark Century, according to the radio programming service's president, Milton Herson, plans to cover nearly every phase of station operation from programming to management.

Panel members already designated are Harold Krelstein, Plough Broadcasting, Memphis; Ben Strouse, WWDC-AM-FM Washington, D.C.; Dale Moudy, Great Trails Broadcasting, Dayton.

Invited to take part in the seminar: Irv Lichenstein, WWDC; George Mooney and David Diamond, WKGN Knoxville; Smokey Walker, WKDA Nashville; Ken Grant, KNUZ Houston; Herb Mendelson and Doug China, WKBW Buffalo; Bill McKibben, WII St. Louis; Dick Lawrence and John Alexander, WFLA Tampa; Al Slaght and Al Waters, CHUM Toronto; Marie Williams, WEZE Boston; Collis Young and Steve Joos, WCOL Columbus, Ohio; Mark Edwards, WS AI Cincinnati, and J. P. Williams, WING Dayton, Ohio.

SEVEN ARTS TO MAKE NETWORK SHOWS

Thomas Tannenbaum to head television production

Seven Arts Productions Ltd. will enter television production of programs for network sale, the company announced last week. Seven Arts, it was noted, will go into "all phases" by packaging half-hour, hour and special presentations.

Thomas D. Tannenbaum, a former executive for Famous Artists Television and for the past year executive assistant to Ray Stark, who with Eliot Hyman, runs Seven Arts, will be vice president in charge of tv production (see Week's Headliner, page 10).

Seven Arts has been involved in motion picture production and Broadway stage plays, and through its Seven Arts Associated Corp. is a leading distributor of feature films to tv (more than 200 Warner Bros. and 20th Century-Fox features) and also distributes domestically 13 one-hour concert specials. Within two weeks, Seven Arts also will release for tv The Emmett Kelly Show, En France and Mahalia Jackson Sings.

As a motion picture firm, Seven Arts has been placing under contract young stars, producers, directors and writers, and, it's indicated, will draw upon these people in its tv production.
EXTRA PAY PROPOSAL
SAG seeking cut of pictures released to pay television

A request that actors working on theatrical motion pictures which are released to pay television receive extra payment based on the worldwide gross receipts, will be the principal proposal of Screen Actors Guild in negotiations for a new contract with the Assn. of Motion Picture Producers (At Deadline, March 18).

SAG will not ask for any increase in the present minimum wage scale for theatrical pictures, in accordance with action taken at the last annual membership meeting (Broadcasting, Nov. 19, 1962). The talent union will ask for a non-discrimination clause in the hiring of actors. The new two-year contract, when signed, will be retroactive to Feb. 1, 1963, when the present three-year contract expired.

The pay tv proposal separates pay tv rights from those of theatrical exhibition, of which pay tv has heretofore been considered an extension by the union.

Specifically, SAG is asking that when any motion picture produced after Jan. 31, 1963, is released to pay tv, either before or following its theatrical showing, the producer shall pay the actors 6% of the worldwide total gross receipts from pay tv, after deduction of actual distribution expenses, not to exceed 40% of those gross receipts. This pay tv percentage payment would be in addition to what the actors get paid for making the picture in the first place.

SAG also asks that when the picture is first released to pay tv, the producer shall pay to each actor an amount not less than 75% of the applicable minimum compensation as a "non-returnable advance" against the actor's share in the worldwide gross.

The present SAG contract with the major movie makers comprising AMPM membership calls for 6% of worldwide gross receipts from use of the theatrical film on free tv for all motion pictures on which production started after Jan. 31, 1960, less a flat amount of 40% of the gross to cover distribution costs, but without any advance payment. In the negotiations commencing today, SAG will ask that all money due actors under this clause shall be paid by checks payable directly to the individual actors, with these checks being delivered to SAG for forwarding to the actors semi-annually.

The decision of the union not to ask for an increase in the present minimum wage scale for performers in theatrical films was based on a desire of SAG to encourage more production in Hollywood and to avoid adding to the tendency of many producers to make pictures abroad. Regarding production abroad, in its new contract proposals, SAG is asking that when producers employ SAG members for work outside the U. S., the terms of the basic SAG contract shall apply, "unless the producer has a contract with the actors' union having jurisdiction in such country and such contract covers the employment of such member."

Program notes . . .

New Banner series • Bob Banner Assoc. is preparing a new hour-long dramatic tv series, Adam's Children. Paul Stanley will produce/direct and Steven Gathers will write the pilot. Banner currently produces Candid Camera, The Gory Moore Show and the Carol Burnett specials, all on CBS-TV.

Tv gospel series • Seven Arts Assoc. Corp. reports it has obtained from Television Enterprises Corp. the tv distribution rights to Mahalia Jackson Sings, a series of 82 five-minute programs starring the well-known gospel singer. It will be released during the Television Film Exhibit—1963, opening in Chicago on March 30.

Clark gains markets • The Dick Clark Radio Show has added WFLA Tampa, Fla., and WKWK Wheeling, W. Va., to its list of stations. The show, distributed by Mars Broadcasting, has now been purchased in 23 markets.

Space reports via NET • The National Aeronautics & Space Administration will produce a series of monthly tv programs reviewing space science developments. Titled Space Science '63, the series will be produced by NASA's Office of Educational Programs and Services and carried by the 71 affiliates of the National Educational Television network. Premiere program is scheduled for March 28.

'Defenders' get award • Screen Producers Guild chose The Defenders as the best produced tv series of 1962. Robert Markell is the producer and Herbert Brodkin the executive producer for Plautus Productions and Defenders Productions. Series is broadcast Sat., 8:30-9:30 p.m. on CBS-TV.

**FINANCIAL REPORTS**

**BROADCASTING UP, THEATERS DOWN**

**AB-PT reports record income and profit for 1962**

The broadcasting business was good in 1962, the theater business not so good, according to financial reports released last week by American Broadcasting-Paramount Theatres Inc.

The ABC Div. disclosed record income and profit for one year, with income rising from $254,380,000 in 1961 to $274,522,000 in 1962. At the same time, theater revenues dropped from $83,328,000 in 1961 to $75,956,000, a decline AB-PT attributed to "a fewer number of quality pictures," and adverse weather conditions early in the year.

Sales increases were reported by the firm's merchandising interests, chiefly record and publishing subsidiaries, whose incomes rose from $25,477,000 in 1961 to $29,262,000 in 1962.

Gross overall income for AB-PT rose from $363,085,000 to $379,741,000, also a company record, as was the operating income figure, which climbed from $9,906,000 in 1961 ($2.29 a share) to $10,757,000 in 1962 ($2.46 a share).

**CBS reveals salaries of its top executives**

CBS Inc. will hold its annual shareholders meeting on April 17 at 10 a.m. at CBS television studio 50, 1697 Broadway, New York.

The annual meeting notice provided information on remuneration of highest paid officers and directors of the company during 1962. Topping the list were William S. Paley, CBS board chairman, and Frank Stanton, president, each of whom received $100,000 in salary; $138,758 in additional compensation and $7,500 in deferred compensation.

Other officers and directors received the following amounts in 1962: James T. Aubrey Jr., CBS-TV president, $100,000 in salary and $60,000 in additional compensation; Merle S. Jones, president, CBS Television Stations Div., $100,000 in salary, $25,000 in additional compensation and $25,000 deferred; Goddard Lieberson, president, Columbia Records, $60,000 in salary, $12,500 in additional compensation and $37,500 deferred.

Arthur Hull Hayes, president, CBS Radio, $65,000 in salary, $20,000 in additional compensation and $10,000 deferred, and Richard S. Salant, president, CBS News $60,000 in salary, $22,500 in additional compensation, and $7,500 deferred.

**Crowell-Collier radio revenue is 4% of total**

Total revenues of Crowell-Collier's three radio stations rose from $3,305,000 in 1961 to $3,588,000 in 1962, 4% of total revenues, the company reported in its annual report for 1962 issued last week. Operating profits for the broadcasting subsidiary were about the same for both years, the report states.

Overall, C-C reported net income of $3,086,667 (95 cents a share) on total revenue of $36 million.
sales and revenues of $96,671,581. In addition there was a special credit of $731,522 (22 cents a share) from the sale of real estate. In 1961, C-C's net income was $4,117,643 ($1.29 a share) on sales and revenues of $71,208,699.

The consolidated balance sheet as of Dec. 31, 1962, shows unamortized balance for the radio stations of $1,628,908. In 1961 this was $1,800,300.

A proxy statement issued with a call to the annual stockholders meeting April 4 in New York, shows that Robert M. Purcell, former president of Crowell-Collier Broadcasting Corp. and still a vice president of the parent company, is employed on a year to year basis at a salary of $40,000 annually plus deferred compensation of $20,000 for each year employed. He also receives five yearly deferred payments of $10,000 each accrued before 1960. KDWB Minneapolis-St. Paul.

C-C stations are KFWB Los Angeles, KWEB Oakland-San Francisco and KDWB Minneapolis-St. Paul. Joseph C. Driling is president of the stations.

Avco's record earnings

Avco Corp. reported last Friday (March 22) that consolidated net earnings for the first quarter ended Feb. 28, 1963, amounted to a record $4,988,349 on net sales of $113,656,405. These compared with net earnings of $3,321,459 on net sales of $83,179,565 for the corresponding quarter of 1962. Crosley Broadcasting Corp., a subsidiary of Avco, operates WLW and WLWT (TV) Cincinnati, WLWD (TV) Dayton, WLWC (TV) Columbus, all Ohio, and WLWI (TV) Indianapolis.

Eitel-McCullough net up 55%

Eitel-McCullough Inc., San Carlos, Calif., tube manufacturer, reported a 55% increase in net earnings for 1962 and an 8% jump in sales for 1962. Net income after taxes amounted to $757,392 (41 cents a share) on net sales of $29,451,669. This compares with net earnings of $486,671 (26 cents a share) on net sales of $27,109,945 in 1961. Backlog of unfilled orders as of Dec. 31, 1962 was $7.7 million, the company reported, compared with $6.7 million in 1961.

Canadian ad agencies

There were 146 Canadian advertising agencies in business last year, with billings of about $660 million, according to the Dominion Bureau of Advertising. Seventy-seven of them had their headquarters at Toronto, 44 in Montreal, 15 in Vancouver, and 10 in Winnipeg. The top ten did $176 million in total billings. There is no breakdown available as to how much in radio, TV or print media.

The top ten were MacLaren Adv. Ltd., $33.8 million; Cockfield Brown & Co., $25.1 million; James Lovick Ltd., $20 million; McKim Adv. Ltd., $17.6 million; Vickers & Benson Ltd., $17.1 million; H. E. Foster Ltd., $14.4 million; J. Walter Thompson Co., $13.8 million; F. H. Hayhurst & Co., $11.9 million; Young & Rubicam Ltd., $11.5 million, and McConnell Eastman & Co., $10.8.

Criswell, are directors of the new company, of which David C. Stewart, president of K&E, is board chairman. Novas-Criswell will now be known as Novas-Criswell-Kenyon & Eckhardt, and the name Novas has been added to that of K&E de Mexico.

In addition to its Mexican operation, K&E also maintains a Brazilian company, K&E do Brasil.

New music license fees okayed in Canada

The Canadian Copyright Appeal Board at Ottawa, Ont., on March 15 approved the new broadcast tariff of the Canadian ASCAP, the Composers,
WFIL in Israel

Kol Yisrael, the national broadcasting service of Israel, is now adapting WFIL, Philadelphia’s children’s educational programs for broadcast in that country.

The program exchange arose from a pen-pal correspondence between WFIL engineer Joe Stotland and Ashar Tarmon, an Israeli school principal. In 1961 Mr. Tarmon was asked to suggest a program series for his school district. He passed the request to Mr. Stotland, who responded with 16 scripts from WFIL’s Studio Schoolhouse series.

Israel Radio liked the ideas so much, it developed a series of English language programs called English is Easy. According to Mr. Tarmon, the series has given Israeli young people “an appreciation of good children’s literature in the English language.”

Bristol-Myers has trouble in Africa

Bristol-Myers Co. has found itself embroiled in a controversy with the government of South Africa over the country’s racial situation as presented by a CBS Reports television broadcast on which Bristol-Myers was a participating sponsor.

The company, one of four sponsors of the Dec. 19, 1962, telecast, confirmed that it had received protests from the South African government in regard to the show, and said it planned to dispatch company representatives to Johannesburg to talk with government officials.

The purpose of the talks, presumably, would be to point out the limited knowledge and control a sponsor has over such a program. Bristol-Myers purchased a specified amount of time for the entire series, and reportedly knew only that the Dec. 19 show was to be generally about South Africa. In New York, a spokesman for the parent company said that Bristol-Myers’ future status as advertiser on the show would probably not be discussed until the representatives returned from South Africa.

The program, produced by David Lowe, was entitled “Sabotage in South Africa,” and dealt with the political, economic and sociological situation. Government officials claim that the show presented a distorted view of the racial situation there.

It was through Bristol-Myers’ subsidiary plant in South Africa that the protests were lodged, and a company official credited the plant’s location there as being the probable reason for the company’s involvement in the controversy. Neither CBS nor any of the other three sponsors have reported receiving protests in regard to the show.

Radio-tv billings on rise in Canada

Radio and television national advertising in Canada was up considerably in the first 11 months of 1962 as compared with the 1961 period. The compilation is from a continuing survey made by Elliott-Haynes Ltd., Toronto, and published in the Toronto advertising weekly Marketing.

Radio advertising totalled $18,466,388 in the January-November 1962 period against $16,349,597 in the same period in 1961. Television advertising was $49,973,122 for this period against $40,252,969 in the 1961 period.

Foods and food products were largest group advertisers in both media, with $5,195,530 spent in radio last year ($5,086,935 in 1961), and $12,447,449 on television ($10,016,588 in 1961).

Drugs and toilet goods came second in both media with $2,532,878 in 1962 ($2,326,948 in 1961) on radio, and $10,827,519 in 1962 ($8,787,503 in 1961) on television.

Bonn buys station for space communications

A transportable space communications station capable of making use of both the Relay and Telstar communications satellites has been sold to the Post Office Dept. (Bundespost) of West Germany by International Telephone & Telegraph Co.

The station has dual transmitters, one to operate with Relay and the other with Telstar. It can handle 12 two-way voice channels as well as facsimile, multi-channel teleprinter circuits and high-speed data transmission.

The use of these units could permit “many more nations to establish long distance communications via satellite without great financial investment,” according to Dr. Arnold M. Levine, vice president, communications, ITT Federal Labs, Nutley, N. J., where the equipment was designed.

(outside of Chicago)
Edward A. Gumper, vp and account supervisor at Geyer, Morey, Ballard, New York, elected senior vp-plans. Mr. Gumper will be in charge of integrating agency plans and services. He will also continue to supervise Lehn & Fink Products Corp. account. Prior to joining agency in 1958, Mr. Gumper was general product manager for toilet goods division of Colgate-Palmolive Co., New York.

Frank K. Mayers, Arthur W. Schultz and Robert M. Trump, all vps and management account representatives at Foote, Cone & Belding, elected directors. Mr. Mayers, headquartered in New York, is on Clairil account. Mr. Schultz and Mr. Trump, of Chicago office, work on Kimberly-Clark and Kraft Foods accounts, respectively.

Charles A. Brandon, executive vp of Winius-Brandon Co., St. Louis and Kansas City advertising agency, elected board chairman, replacing Enno D.

Winius, who died last December. J. D. Nevins and J. H. Barickman elected executive vps, with Mr. Nevins remaining as creative director for company and Mr. Barickman as general manager of Kansas City office. Curtis P. Crady and Richard A. Lane, vps, elected to agency’s board of directors. Mr. Brandon joined Winius-Brandon (then Louis E. Anfenger Co.) in 1944 after having previously worked in sales, advertising and promotion for Ralston-Purina Co. He was elected vp in 1947.

G. Douglas Morris, former president of I.P.I. Corp. (product development firm), joins Morse International, New York, as executive vp. Mr. Morris has also served as senior vp of Lambert & Feasley. Prior to joining that firm, he held positions with Ted Bates and Pedlar & Ryan.

Fletcher Coleman, formerly with CBS-TV network, joins tv production department of Street & Finney, New York, as network program supervisor. Thomas Chastain, Young & Rubicam, and Margaret Holt, N. W. Ayer & Son, join S&F’s creative department to work on Colgate-Palmolive account.

Dave Fulmer, tv creative director at Guild, Bascom & Bonfigli, San Francisco, elected vp. Mr. Fulmer headed agency’s Hollywood office from 1956 to 1960 as program director and tv production supervisor. Prior to joining GB&B, he was tv producer-director, actor and musician.

Glen Bammann, who joined Knox Reeves Adv., Minneapolis, in 1961 as associate director of broadcast services, promoted to executive director of broadcast services. Russell Neff, with agency since 1939 exclusively in radio-tv, has retired as vp and executive director of broadcast services, but will continue in advisory capacity through end of year. Earlier Mr. Bammann had been with McCann-Marschalk, New York, and McCann-Erickson, Cleveland.

Weslie Booman, former research director in Minneapolis office of Campbell-Mithun and for past year director of market research for Johnson Wax Co., Racine, Wis., rejoins C-M as vp and research director. Allan Aalgaard, who has directed C-M’s research department for past year, assumes new account management responsibilities with agency’s Allis-Chalmers account.

Ade Schumacher, former president of Firth Carpet Co., joins Hazel Bishop International, Union, N. J., as president. Mr. Schumacher was president of Liggett Rexall Drug Co. from 1949 to 1957 and of Owl Rexall Drug from 1944 to 1949.

William P. Stiritz, former brand manager for Pillsbury Co., Minneapolis, joins Gardner Adv., St. Louis, as account executive. Richard J. Tucker, also formerly of Pillsbury, joins Gardner as senior research analyst.

Alexander S. Peabody Jr., vp and associate creative director at Young & Rubicam, New York, appointed associate copy director with special responsibilities in tv copy area. Alvin Hampel, copy supervisor, succeeds Mr. Peabody as associate creative director.

Larry Pickard, director of news and special projects for WBZ-TV Boston and former managing editor of NBC-TV’s Today program, resigns to form his own public relations firm, Pickard Assoc., with offices at One State St., Boston. Mr. Pickard started in broadcasting in 1946 with WOR New York. In April 1953 he joined CBS-TV, with subsequent overall responsibility for network’s syndicated newsmagazine service. Mr. Pickard left to join NBC-TV’s Today show in December 1955 and joined Westinghouse Broadcasting Co. in Boston in May 1961.

Ed Sturgeon, agricultural editor of KMI-TV Fresno, joins J. J. Jackson Advertising & Public Relations, Visalia, Calif., as partner. Agency will now be known as Jackson-Sturgeon Advertising & Public Relations.

Curtis H. Judge, sales manager for Household Products Division of Colgate-Palmolive Co., New York, appointed sales promotion manager. Mr. Judge joined Colgate-Palmolive in 1949. Thomas F. Desmond, eastern regional manager, succeeds Mr. Judge as sales manager for household products.

Thomas G. McKenna, Chase Manhattan Bank, joins Pittsburgh office of
Fuller & Smith & Ross as account executive.

Fred Maeding, former timebuyer supervisor for Kellogg account at Leo Burnett, joins Alberto-Culver Co. (toiletries and proprietary drugs), Melrose Park, Ill., as assistant international advertising manager.

David M. Platt, media group supervisor at Kudner Agency, New York, appointed associate media director.

Frank Picard promoted to administrative assistant in radio-television department of D. P. Brother & Co., Detroit. He joined agency in 1960 as business manager for radio-television department and before that had been with WWJ-AM-TV Detroit.

Howard E. McDonald, formerly with media and research divisions of McCann-Erickson, appointed to newly created post of marketing research director for Waste King Corp. (gas and electric ovens and ranges), Los Angeles. Thomas B. Harrison named advertising and sales promotion manager.

Jackie Pond named assistant radio-television timebuyer at Gourfain, Loeff & Adler, Chicago advertising agency.

Saxon Runwell joins media department of Earle Ludgin & Co., Chicago.

Ralph L. Gemberling, former account executive at Norm Advertising, New York, joins National Council of Churches, that city, as director of program and station relations, broadcasting and film commission. He succeeds Carl Cannon, who resigned to join Lincoln Center for Performing Arts.

**DAB officers for 1963**

Gordon K. MacInintosh, president and general manager of WTUX Wilmington, elected president of Delaware Assn. of Broadcasters, succeeding Wayne Rollins, president of WAMS, that city. Ewing B. Hawkins, president and general manager of WILM Wilmington, and John B. Reynolds, general and sales manager of WJBR (FM) Wilmington, were elected vp and secretary-treasurer, respectively.

**THE MEDIA**

Mr. Loeb

Tom Loeb, former general executive with Ashley-Steiner Inc., New York talent representatives, joins CBS-TV, New York, in newly created position of supervisor of live programming. Prior to joining Ashley-Steiner, Mr. Loeb was president of Roncom TV Productions, and also served with NBC for nine years.

Allen Hedgecock, vp-general manager of WARK-AM-FM Hagerstown, Md., named vp-general manager of WDOV-AM-FM Dover, Del., effective April 1, replacing William S. Cook, who resigned. Mr. Cook has been vp-general manager of WDOV since 1956. Mr. Hedgecock is former commercial manager of WDOV. C. Howard McFarland named sales manager of WNAV-AM-FM Annapolis, Md. Henry Rau Stations are WOL-AM-FM Washington, D.C.; WNAV-AM-FM, WDOV-AM-FM, and WARK-AM-FM.

Lee Bickford, regional sales manager of WPRO-AM-FM Providence, R. I., named general manager of WHIM-AM-FM, that city.

George Mahon, sales manager of WFBG-AM-FM Altoona, Pa., named general sales manager of WFBG-TV, replacing John S. Brubaker, who resigned to enter advertising agency business for himself in Connecticut. Angela Montrella, WFBG account executive, replaces Mr. Mahon as radio sales manager. Before joining WFBG-TV as account executive in 1956, Mr. Mahon was employed in same capacity at WTVP (TV) Decatur, Ill.

Kelly Atherton, account executive at WFIE-TV Evansville, Ind., promoted to sales manager, effective April 5, replacing Jack Berning, who resigned to accept similar post with KTVT (TV) Dallas, Tex.

Sam Ewing, manager of KAPY Port Angeles, Wash., joins KMBY Monterey, Calif., as sales manager.

John C. Dailey and Dale G. Larson named local sales manager and production manager, respectively, at WOW-TV Omaha, Neb.

William P. Gaspar, sales manager of Metro-WBOF Inc. (WWFY [FM] Norfolk and WBOF Virginia Beach, Va.), elected vice president and general manager.

Peter G. Crawford, sales manager of WAIL-TV Atlanta, appointed general manager of Merchants Broadcasting System of Atlanta, division of Cartwright & Bean, replacing Joseph Porter, who resigned.

IRTS nominates officers for 1963-64 term

Sam Cook Digges (r), administrative vice president of CBS Films Inc., New York, is being congratulated upon his nomination for the presidency of the International Radio & Television Society by outgoing President William K. McDaniel, executive vice president of NBC Radio. Mr. Digges heads a slate of six officers and six new members of the board of governors nominated for election by the IRTS for the 1963-64 term. Nomination is tantamount to election.

Others nominated for the 1963-64 term and who will take office at the society’s annual meeting May 9 are Thomas J. McDermott, N. W., Ayer & Son, first vice president; Richard P. Jones, J. Walter Thompson, and C. Wrede Petersmeyer, Corinthian Broadcasting, as vice presidents; William N. Davidson, Advertising Time Sales, secretary, Edward P. Shurick, H-R Representatives, treasurer.

Nominated to serve two-year terms on the board of governors are Clifford Botway, Ogilvy, Benson & Mather; Erwin H. Ephron, A. C. Nielsen; Alfred R. Schneider, ABC; James A. Stabile, NBC; and Erminio Traviaetas, BBDO. George C. Stevens, Transcontinental Television, was nominated to fill a one-year unexpired term.

Va., joins WJZ-TV Baltimore as traffic manager. Jim Miller, WJZ-TV film director, named account executive.

Glenn M. Brillhart, account executive at WJZ-TV Baltimore, appointed general manager of WAQE-AM-FM Towson (Baltimore), Md, Mr. Brillhart replaces Charles S. Gerber, who recently resigned to become president and co-owner of KARA Inc. and general manager of KARA Albuquerque, N. M.

Jack Swan joins news department of WNAC Boston.

James J. Bollinger, chief announcer at WKYW Louisville, Ky., joins announcing staff of WLW Cincinnati.

Henry Lewis, newscaster formerly with shortwave department of U. S. Armed Forces Radio & TV Service, joins WTIV (FM) Lake Success, N. Y.

Gerald E. Udwin, assistant news director of WIND Chicago, named news director of KDKA-AM-FM Pittsburgh, succeeding David Kelly, who has shifted to post of KDKA-TV news director. Both stations are owned by Westinghouse Broadcasting Co. Prior to joining WIND, Mr. Udwin had been with Associated Press in Chicago and WRRR Rockford, Ill., and WAAP Peoria, Ill.

Bill Dansby, news editor at WFGA-TV Jacksonville, Fla., elected president of Jacksonville News Reporters Club.

Tom Ferrall, news and film editor at KMOX-TV St. Louis, and Bill Yearout, with Winius-Brandon Adv., join staff of KMBC-TV Kansas City.

Bob Raleigh, air personality at WRK West Palm Beach, Fla., joins WPSC-AM-FM Morningside, Md., in similar capacity.

PROGRAMMING

James C. Stern, sales manager for central division of Allied Artists TV Corp., Chicago, appointed assistant general sales manager. Mr. Stern will make his new offices in New York.

Robert L. Miller, former administrative assistant to vp, Trans-Lux Television Corp., New York, joins ABC Films, that city, as director of film operations. Mr. Miller succeeds Leonard Strobel, who joins Lennen & Newell. Bernard Franzman, formerly with National Telefilm Assoc., joins ABC Films as traffic manager.

James R. West, western sales representative, promoted to sales manager of PAMS Syndicated Productions, Dallas, Tex.

Cameron Applegate, Fred Thorne and Ray Lofaro join New York sales staff of Robert Lawrence Productions. Mr. Applegate formerly served as salesman for Dallas Jones, Chicago. Mr. Thorne served with BBDO and P&G in Canada, and Mr. Lofaro headed his own artists representative firm.

Frank P. Rosenberg joins Revue Studios as production executive and has been appointed executive producer of Arrest and Trial, new 90-minute series ABC-TV starting this fall.

William Davenport has been signed as producer and Charles Tannen as associate producer of new Screen Gems series, Grindl, which starts on NBC-TV this fall in Sun., 8:30-9 p.m. spot, with Procter & Gamble as sponsor. Team acted in same capacity for Four Star’s Ensign O’Toole series during past season.
Trouble-shooters

Two broadcasters are among the 15-man trouble-shooting committee appointed by Arizona Gov. Paul Fannin to help solve the controversial tax status of the state's Salt River Project.

The broadcasters are Tom Chauncey, president of KOOL-AM-FM-TV Phoenix, and Jack Williams, program director of KOY, that city. They will join with 13 other prominent Arizona citizens in mediating the bitterly disputed issue.

Sony, Mr. Stewart was vp in charge of sales for Sylvania Electronics Corp. Irving Sagor elected vp in charge of account and finance.

A. K. Wing Jr., technical director-communications for International Telephone & Telegraph Federal Labs, elected vp of electron tube division.

Joseph P. Ulasewicz and Wiley D. Menger appointed antenna merchandising manager and transmitter merchandising manager, respectively, in RCA broadcast and communications products division. Since 1954, Mr. Ulasewicz has been broadcast equipment field sales representative covering New England states. Mr. Menger had responsibility for division's fm transmitters.

Frank M. Thomas, manufacturing manager for eastern operations of Sylvania Electronic Systems, appointed chief engineer for parts division of Sylvania Electric Products, New York.

Dr. Herbert Bandes, senior staff member of Arthur D. Little Inc., San Francisco, and former chief engineer for semiconductor division of Sylvania Electric Products, appointed director of research for Eitel-McCullough, San Carlos, Calif., electronics manufacturer.

W. Robert Dresser, former chairman of Department of Engineering of New Haven College, appointed director of research for Scully Recording Instruments Corp. (tape recorders), Bridgeport, Conn.

Warden N. Hartman Jr., president of Eastern Pennsylvania Investment Co. of Philadelphia, joins Philco Corp.'s consumer products division as special markets manager. He succeeds J. A. Winfield, who resigned.

GOVERNMENT

Michael J. Connelly, former public relations aide to FCC Chairman Newton N. Minow and with U. S. Information Agency, appointed by Gov. Otto Kerner as consultant to Illinois Board of Economic Development. Mr. Connelly was member of Democratic National Committee staff in 1960.

Lee Hall, NBC commentator, and Robert Sturdevant, chief of European correspondents for ABC in Paris, join U. S. Information Agency to work with Voice of America. Mr. Sturdevant has been assigned to program manager's office and Miss Hall to worldwide English programs.

INTERNATIONAL

Clara Quinn, senior broadcast buyer of BBDO Ltd., Toronto, appointed media manager.

Kenneth Hawkins appointed news director of CKBW Bridgewater, N. S., replacing Kenneth Foran, who resigned to join Halifax Herald.

David G. Brydson, with E. S. Sunner Corp., Canadian station representatives, New York, appointed director of stations relations for Television Bureau of Canada Ltd., Toronto, newly created position.

Lt. Col. Rene P. Landry, vp of Canadian Broadcasting Corp., Ottawa, Ont., resigned his post when he reached retirement age earlier this month. He continues, however, as CBC consultant.

Radio à la Carte praised by Morris.

Rulemakings

FINIALIZED

—By report & order, commission finalized rulemaking proposal of May 2, 1960, to permit simultaneous operation of two trans. on single studio-trans. link channel to send stereophonic programs from studio to trans. of fm station. In so doing, commission is also permitting same technique to be used on fm intercity relay circuits, since there may be need for transmission of same programs between stations. Further, commission is extending the same authorization to fm station (am, fm or tv) needing two trans. on "backup" studio circuit. Amendment effective May 1. Action on March 26.

PETITIONS FOR RULEMAKING FILED

FOR THE RECORD
The NEW Santa Fe Trail

A report on some of Santa Fe’s newest milestones
by the President of the Santa Fe

In 1963, Santa Fe is investing some 90 million dollars on new equipment and improvements.

All this money is being used to keep the Santa Fe up-to-date in every way.

As a matter of fact, so many new and exciting things are happening on the Santa Fe today that some people are calling it "The New Santa Fe Trail."

Here are just a few highlights of the many improvements:

- 2548 new boxcars.
- 500 Mechanical Temperature Control cars.
- 550 covered hopper cars.
- 194 double and triple deck autoveyors.
- 181 flat cars.
- 58 new diesel locomotives.
- 24 hi-level passenger cars.
- 31 semi-lightweight mail and baggage cars.
- Increasing our microwave communications system to 2064 route miles.
- Experimenting with new and more efficient freight cars such as compartmentalized cars for automobile parts.
- Advancing our piggy-back operations to include joint rail-truck rates.

And we haven't been standing still up until now. We've invested over a billion dollars in progress since World War II. For example:

- The new cut-off line into Dallas.
- Major line relocations in Arizona.
- Equipped 3360 new freight cars with "Shock Control" devices for damage-free shipment of fragile freight. (More of these cars are on order.)
- Equipped 7745 freight cars with roller bearings.

- Designed and built the first multi-level automobile transport cars—the autoveyors—which are now used by all major railroads.

To keep pace with changing times and with the rapid growth of the areas we serve, we keep constantly on the move toward a better way to serve you and to strengthen a vital part of our national defense.

It is our aim to keep the Santa Fe Trail always new.

THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY
Dr. George R. Town will be just as much at home next week among broadcasters at the NAB convention in Chicago as he is on campus at Ames, Iowa, where he is dean of the College of Engineering of Iowa State U. of Science & Technology.

Ever since the 1930s he has been an active participant in the development of the technical aspects of radio, fm and television, including the several major allocation proceedings before the FCC. He is perhaps best known for his work in 1957-58 as executive director of the Television Allocation Study Organization, the all-industry group which explored the engineering capabilities of vhf and uhf frequencies for the FCC.

It was at the NAB's Chicago convention in 1959 that Dr. Town formally presented the TASSO report to the FCC's then-chairman, John C. Doerfer. The report made no recommendations to the commission, but it did find uhf to be technically inferior in nearly all respects to vhf. TASSO found uhf signals are shadowed by man-made and natural interference, and that with limits of its signal range, uhf is on a par with vhf when it is operating over a level, smooth and treeless terrain.

1963 NAB Award • Dr. Town will be at the Chicago convention again this year because of the TASSO study. But this time it will be to receive the NAB's 1963 Engineering Achievement Award. NAB said Dr. Town was chosen for this high honor "because of his valuable contributions to technical knowledge and literature, his development of new engineering techniques and his leadership in broadcast engineering activities." Citing his TASSO leadership, the NAB described the study as "monumental."

It is quite likely that Dr. Town will alert broadcasters during his Chicago visit to the growing problem of interesting young students in engineering careers in radio-tv. Despite lots of good jobs in the industry, he notes, the students more and more fail to bother even to interview for them. The glimmering image has been captured by the newer fields of aerospace, computers and information theory, he says.

The practical solutions? Well, one might be for broadcasting firms to give more interest-sparking research projects to colleges, he suggests. And cooperate more closely to encourage new young teachers who could inspire and guide engineering students.

Eggs to Electrons • As a young boy, George Rea Town worked on poultry farms, in grocery stores and all the other odd jobs he could find around his home town of Poultony, Vt., about 20 miles southwest of Rutland. He was born May 26, 1905. While attending public grade school, he and a neighbor boy rigged up a telegraph line between their houses.

At age 15 young George earned the first license for his amateur radio station. As 1CQM, using a 50 w GE ham rig, he still recalls the thrill of his first trans-Atlantic contact in 1920 with a ham in England. Except for skating and skiing in winter, radio was his chief interest during school years when his heavy schedule of odd jobs permitted. At school he liked math, physics and chemistry best.

Following graduation in 1922 from Troy Conference Academy, he enrolled at Rensselaer Polytechnic Institute, Troy, N. Y., and was graduated in 1926 as an electrical engineer. His undergraduate thesis was on measurement of field strength at 7.5 mc, the "uhf" region of that day.

Continuing graduate work there he became Doctor of Engineering in 1929. The second thesis was devoted to automatic train signal control as a result of summer research work for General Railway Signal Co. He also worked a summer in the test department of New York Edison Co.

Sexton's Belle • During one regular odd job, as sexton for a big Troy church, he met a local miss, Charlotte Schooner. She became Mrs. Town, June 15, 1929.

That same year Dr. Town joined Leeds & Northrop Co., Philadelphia, to study practical applications of precise electrical measurement equipment. When furloughed because of the depression in early 1933, he joined Arma Engineering Co., Brooklyn, working several months in the firm's development laboratory on Navy fire control gear. Then for the next three years he taught math and electrical engineering at Rensselaer.

Although teaching would always be his chief interest, Dr. Town returned to private industry in 1936 as research engineer for Stromberg-Carlson Co. in Rochester. He worked on radio receiver development initially, but soon became responsible for development of the firm's line of tv receivers which were field tested during the New York World's Fair. In the 1937-41 period he also taught graduate courses in electronics at the U. of Rochester.

In 1940 Dr. Town served as his company's alternate on the National Televison Systems Committee. He was particularly active on four of the NTSC working panels, in charge that one was responsible for today's scanning standards of 525 lines-60 fields.

War and Radar • Stromberg-Carlson made Dr. Town engineer in charge of its tv lab in 1940 and the next year he became assistant director of research. During the war years he worked on radar and other high-frequency gear and in 1944 he was named manager of engineering and research. His work there also involved color tv and fm.

During the FCC's postwar reallocation proceedings in 1945-46, he served as secretary of the tv systems panel and chairman of the fm systems panel of the Radio Technical Planning Board. Stromberg-Carlson chose Dr. Town to be assistant secretary of the corporation in 1949. But that year his desire to teach impelled him to resign and he joined Iowa State as associate director of its engineering experiment station and professor of electrical engineering.

The experimental station, which is the school's research arm, has done considerable work in the fields of color tv and semiconductor devices. During 1957-58 Dr. Town was on leave of absence to head the TASSO study. In March 1959 he was made dean of Iowa State's Engineering College, which claims the largest undergraduate enrollment west of the Mississippi and now has some 3,200 students in various engineering fields.

Dr. Town is a fellow and past director of the IRE and member of various other engineering organizations. The Towns live near the Ames campus with their grown daughter Anne. For fun the family goes camping in the Rockies.

Chicago revisited

WHAT will happen at the NAB convention in Chicago next week?

A sure bet is that no momentous decisions will be made to affect the future activity, strength and well-being of broadcasters. NAB conventions no longer constitute themselves as legislative bodies: broadcasters now meet to greet, eat, shop and listen to speeches.

The big decision was made for the NAB membership by its board of directors last January. The board extended the contract of President LeRoy Collins until 1966 and thereby gave him a vote of confidence, despite some misgivings about his past performance and on the promise that he henceforth would aggressively defend broadcasters against inroads of government.

Members of the NAB should pay close attention to what transpires next week in Chicago. They should evaluate carefully the comments of members of the FCC at the panel discussion. They should observe particularly the demeanor of the two new commissioners—E. William Henry and Kenneth A. Cox—either of whom might be the next chairman. They should heed the scheduled debate between FCC Commissioner Robert E. Lee and William Pabst, NAB TV code board chairman, on the mischievous effort to have the FCC embrace the codes as part of the official regulations.

Broadcasters should look their leadership over. They should look themselves over. Is their NAB (which is to say their own governing body) performing in a manner that best conduces to their freedom and well-being? We do not attempt to provide the answer. We simply pose the question. It is a good one to ask of members who now pay NAB dues of some $2 million a year.

Stuck with the tab

AT about this time last year broadcasters were engaged in a vociferous debate over the future of music licensing. At the urging of a federal court, they were considering a deal to obtain reductions in the fees they pay the American Society of Composers, Authors and Publishers in exchange for giving up their ownership of Broadcast Music Inc. The deal did not go through, but we are reminded of it now by the recent revelation of ASCAP revenues (Broadcasting, March 18).

These figures show why ASCAP was willing to take a reduction in payments from broadcasters as bait to force a change in operations of its rival, BMI. In 1962, according to records filed in a New York court, ASCAP collected some $30.5 million from radio and television. Is its music actually worth that much to radio and television?

Broadcasters pay BMI less than half the amount they pay ASCAP. BMI’s revenue from radio and television in its latest fiscal year, which ended in mid-1962, was about $13 million. If broadcasters played about half as much BMI music as ASCAP music, it could probably be said that a consistent market value had been achieved. According to the best evidence, however, BMI provides about 40% of the music played on radio and television, and ASCAP provides about 50%. The other 10% is in public domain or comes from other licensing organizations.

It looks to us as though ASCAP music is overpriced. For all we know, BMI’s may be overpriced too. Certainly broadcasters are carrying a disproportionate share of the costs of music in the entertainment world. They contribute about 87% of ASCAP’s total revenues and more than 90% of BMI’s. Under these conditions other users of music are practically getting a free ride.

Another door slammed

LAST week’s decision by the House Rules Committee to defer action on a bill to permit radio and television coverage of committee hearings was the second discouraging rebuff that broadcasters have recently suffered in their efforts to gain access to important news events. The first occurred earlier this year when the American Bar Assn. voted to retain its Canon 35 which prohibits broadcast coverage in courtrooms.

As we said in this space two weeks ago, tactics must be changed. The case for access must be taken to the people in the hope that the people will force their courts and legislatures to expose their functions to public view. Are any broadcasters at work on documentaries and editorials? They had better be if they are serious in their desire to attain status equal to that of the press.

Play ball?

THE batting order at the FCC changes again. Kenneth A. Cox, a tough man on the regulatory field, who has been in the Broadcast Bureau bull pen for two years, joins the seven-man first team. He replaces the veteran T. A. M. Craven, who retires at 70 but will still be on the coaching line in satellite communications.

Mr. Cox has proved that while he is rugged in his field play, he is nobody’s patsy. As Broadcast Bureau chief he played the rules laid down by the FCC. As a commissioner he will participate in the making of the rules. There could be a big difference.

Newton N. Minow, who has been what the sports writers might call the sultan of FCC swat during the past two New Frontier years, is about to take the long walk—back to Chicago. He has a better contract there—with Encyclopaedia Britannica Inc.

The President, will have the opportunity to make his fourth appointment to the FCC team: (Newt was the first and the precocious E. William Henry the second). Who will the new player be? Will the chairmanship go to Tennessee Bill Henry? Or to the Seattle flash, Ken Cox? Or will it be a new graduate, freshly plucked by Brother Bob, from the New Frontier League?

No one but JFK knows.

HUBBARD BROADCASTING, INC.

MINNEAPOLIS • ST. PAUL, MINNESOTA
TELEVISION ZOOMAR has NEW all purpose lenses developed by ANGENIEUX-EVERSHED and ZOOMAR

EXTREME WIDE ANGLE
35 mm. wide angle coverage eases production at small studios. Confined sets appear larger. Near and far objects stand out in sharp focus. You get the illusion of great width and depth.

10 TO 1 ZOOM RATIO
The longest, most dramatic zoom ever developed.
35 to 350 mm. zoom range means one camera coverage of most studio production. Simplified camera placement will reduce rehearsal time.

SHORTEST WORKING DISTANCE...
3 feet to Infinity
Live or tape commercials calling for extreme close-ups...position the camera as close as 3 feet from the subject. Without adaptors...or re-focusing orthicon...you can zoom from this wide angle cover shot 40 inches wide to an extreme close-up 4 inches wide.

TELEPHOTO RANGE FOR REMOTES
A small convertor greatly extends the zoom range to make the Angenieux-Zoomar equally versatile for studio and remotes. From the first balcony at Madison Square Garden, you zoom from
